The Commission, which had been set up at The Hague in March, pointed out *inter alia* that, even from figures admitted by the Hungarian authorities, more than twice as many people had been tried during the preceding three months (April-June) than in the four months after the revolution; that not a single acquittal had been reported; and that the accused persons were denied the most elementary rights of justice. They found that there was no provision for impartial trials, no proper notice was given of the charges preferred, and the accused were unable to choose their counsel freely. Moreover, new laws introduced between April and June had "still further weakened the already insufficient safeguards of fair trials" and enabled the regime to re-try cases when the first verdict was unsatisfactory to it. It was pointed out in this connexion that the obvious reluctance of some judges and prosecutors to apply the death penalty had led to the creation of the so-called "people's courts" for this purpose. Attention was also drawn to the refusal of the Hungarian authorities to allow impartial legal observers from abroad to attend the trials.

Evidence given to the Commission showed that all Hungarian prisons were overcrowded, that 13,000 of those released from prison during the uprising had been rearrested, and that 20,000 others had been imprisoned in addition. Conservative estimates from reliable sources put the number of executions at between 2,000 and 5,000.

In December last the lawyers' associations of the British Conservative, Labour, and Liberal parties had formed a joint organization, under the name of "Justice," to try to ensure that the Hungarian trials were conducted fairly. Despite appeals to M. Kadar to suspend the courts-martial "in the name of humanity," and to allow the accused proper legal defence, the Hungarian regime refused to allow visas to leading British lawyers to attend the trials as observers.

The "Justice" organization was set up by the Inns of Court Conservative Association, the Society of Labour Lawyers, and the Association of Liberal Lawyers "to assist the defence of those charged with political crimes in Hungary" and to do all in its power to ensure that the trials were fairly conducted. It was proposed that three former Attorney-Generals—Sir Lionel Heald, Q.C., Sir Hartley Shawcross, Q.C., and Sir Frank Soskice, Q.C.—should attend the trials as impartial observers, together with Mr. Joseph Grimond, leader of the Liberal Party, and Mr. J. E. S. Simon, Q.C., chairman of the Inns of Court Conservative Association. As stated above, visas were refused by the Kadar regime, which ignored the appeal made by the "Justice" organization. Sir Hartley Shawcross was the British member of the International Commission of Jurists referred to above.

The outspoken opposition of many of Hungary's leading writers and journalists to the repressive measures of the Kadar regime led to the dissolution on Jan. 18, 1957, of the Hungarian Writers' Union and the subsequent arrest of many leading writers, authors and newspapermen. The arrested persons included a number of well-known Communist writers, among them the novelist Gyula Hay, holder of the Communist "Kossuth Prize." In a press statement on Jan. 25, Dr. Muennich (Minister of the Interior) denounced the authors' and journalists' associations as "hotbeds of reaction" and said that the arrested writers and journalists were being held "under the justified suspicion of having carried out counter-revolutionary activities."

A number of professors, students, and members of the artistic and liberal professions were arrested in subsequent months for alleged counter-revolutionary activities, "subversive" writings, illegal possession of arms, etc. According to reports from Hungary, many suicides had occurred among persons subjected to such charges. One of Hungary's leading poets, Istvan Eoersy (26), was sentenced by a Budapest court on May 23 to five years' imprisonment on charges of writing and distributing various publications attacking the regime and inciting the workers to strike. Eoersy, a prominent Communist intellectual, was accused *inter alia* of having written anti-Soviet verses during the uprising.

Protests against the Kadar Government's "purge" of writers and journalists were made not only in the Western countries but also by the Polish Writers' Union, which unanimously adopted a resolution condemning such actions as a violation of "the essential rights of man."

After a number of official denials by Budapest Radio that any deportations of Hungarian citizens had taken place after the Soviet intervention, the head of the Kadar Government's

Press Bureau (M. Szirmai) confirmed on Dec. 3, 1956, that "some" young persons had been deported to the U.S.S.R. by the Soviet military authorities. He added, however, that these had been "isolated cases" and claimed that all the deportees had been returned to Hungary in the meantime. Despite the Hungarian Government's prevarications on this matter, the report issued on June 20, 1957 by the U.N. Fact-Finding Committee on Hungary established that deportations had in fact taken place in considerable numbers after the second Soviet intervention (see page 15622, second column). The Workers' Councils, prior to their suppression, had strongly protested against the deportations and had made many unsuccessful representations to the Kadar regime for the repatriation of the deportees.

Kadar Government's Programme. - Cabinet Changes. - Postponement of Elections. - M. Kadar's Visit to Moscow. - Soviet Economic Aid for Hungary.

The first policy statement to be issued by the Kadar Government since the suppression of the uprising was published on Jan. 6, 1957, shortly after the Budapest meeting of Communist leaders from the U.S.S.R. (including M. Khrushchev), Bulgaria, Czechoslovakia, Rumania, and Hungary herself—see 15379 B. After saying that M. Nagy's Government had "opened the way for the counter-revolution which sought to overthrow the Hungarian people's democracy and create a country dependent on fascists, landlords and capitalists," the statement declared that a "dictatorship of the proletariat" had been established in Hungary and that "democratic rights and freedoms are guaranteed only to those workers, peasants, and intellectuals who are faithful to the people's regime." The statement was in the form of a 10-point policy declaration under the headings set out below:

(1) "Consolidation and Democratization."- The Government considered "the further democratization of the State system" as one of its most urgent tasks. Accordingly, public affairs would be conducted in future "with fewer full-time officials but with the participation of wide sections of the population," and the apparatus of the State would be reduced and simplified. The Hungarian Socialist Workers' Party was regarded as "the guiding force of the working class" and as leading "the patriotic People's Front which unites all the democratic forces." [This was the first intimation that the Hungarian Workers' Party the designation borne by the Communist party in Hungary prior to the uprising -had renamed itself the Hungarian Socialist Workers' Party.]

(2) Temporary Economic Measures.—Detailing "the vast damage to the economy caused by the counter-revolutionary events" and the "still greater damage" caused by the prolonged strike, the statement said that damage to public and private buildings amounted to 1,000 million forints; that goods worth 1,500 million forints had been destroyed; and that the loss in production had decreased the national income in 1956 by 9,000 million forints. An increase in coal production was of the "utmost urgency" to prevent the widespread closing-down of factories; "strict economy" would be necessary to avoid inflation; and there were "no prospects for further wage increases." While everything possible would be done to alleviate the situation, temporary unemployment might be caused by "the cuts in the State apparatus and the temporary fall in output, plus fuel and material shortages resulting from the counter-revolutionary plot." For some time to come the Government would be able to allocate only "very insignificant sums" for capital investment, and factories would be required to cover their expenditures from their own income. The statement emphasized that Hungary was willing to accept loans from abroad, "even from capitalist States," so long as they were "not bound up with political stipulations."

(3) Industrial Tasks.—To avoid inflation and unemployment and ensure the "quickest possible transition to normal life," the current Five-Year Plan would be dropped and replaced by "plans covering the next few months and the rest of 1957." At a later stage, a plan for a longer period—probably three years—would be drafted with the principal aim of raising living standards. The statement stressed the need for higher productivity, a lowering of production costs, and concentration on those commodities which Hungary could produce "cheaper, better and more advantageously than other countries."

(4) Agricultural Tasks.—The "socialist transformation of agriculture" would remain one of the Government's principal tasks and every assistance would be given to the collective farms, which would "play an important role in the future." Persons who damaged agricultural machinery or interfered with the collective farms would be punished "with all the severity of the dictatorship of the proletariat." Privately-owned farms would be permitted up to a "ceiling" of 10-12 hectares, and their products could be freely sold, except those which were State monopolies. There would be no forced collectivization of agriculture, and peasants would not be compelled to join farm collectives against their will.

(5) Trade.—Foreign trade would remain a monopoly of the State; "particular significance" would be attached to developing trade with other Socialist countries; and economic ties with all foreign countries would be based on "complete equality and mutual benefit." Private trade would be "enlarged within certain limits," and encouragement would be given to small artisans and other private enterprises which could help to increase the supply of consumer goods.

(6) Economic Management. Economic control would be simplified and enlarged by "mass participation", "exaggerated centralism" would be abolished, and "Leninist centralism" would be retained to ensure that there would be no "relapse into anarchy." Centralized management would be favoured only in the more important enterprises, but in smaller factories "greater independence must be ensured for local management bodies."

(7) Cultural Questions. - The Government would ensure "freedom and support for all scientists, writers and artists, irrespective of political affiliations, with the exception of enemies of freedom and Socialism." Pupils in elementary and secondary schools would be allowed to choose the foreign language they wished to study. [Hitherto Russian had been compulsory.]

(8) State and Church. -The Government "respects the freedom of conscience of all citizens and considers religious belief to be a private matter for each citizen." It would not, however, tolerate any of the Churches "placing itself at the disposal of reaction," and would expect loyalty from Church leaders. Religion as an optional subject in schools would be fully guaranteed, as well as freedom to attend classes on religion.

(9) Foreign Policy. Hungary's foreign policy would be based on "the firm alliance with the Soviet Union and all socialist countries" and "peaceful co-operation with all countries, irrespective of their social structure, on the basis of equality and non-interference in each other's domestic affairs."

As regards Hungarian-Soviet relations, the declaration said: "The Soviet Union was the State with whose aid our people succeeded in gaining their national independence at the end of the Second World War. Today the Soviet Union is again the State with whose help our people's regime repulsed the counter-revolutionary imperialist onslaught and defended its national independence. The Soviet Army in Hungary safeguards the people against possible military attack by the imperialists and thus protects the peaceful life of the Hungarian people . . . All present and future questions of Soviet-Hungarian relations, including the presence of Soviet troops in Hungary, will be settled by friendly negotiations."

(10) "Unity of Progressive Forces." -After pointing out that the declaration was not meant as an "all-embracing government programme," but only "defined certain tasks on the basis of the political platform outlined," the Government announced its intention of "conducting talks with various personalities or experts, whether members of parties or not, who are willing to fight against counter-revolution and for the maintenance of our social achievements." Such persons would be offered "leading positions, including participation in the Government itself."

The Hungarian Parliament, meeting on May 11 for the first time since the October uprising, unanimously voted to extend its life for a further two years (i.e. until May 1959), thereby putting off the general elections which were due to take place in May of the present year. The decision was taken after the deputies had heard a lengthy statement by M. Kadar "on the Government's activities during the past half-year."

M. Kadar's statement was largely a recapitulation, in greatly expanded form, of the policy declaration issued in January. After a violent attack on the "counter-revolutionaries" and the "Nagy-Losonczy group," he claimed that the Hungarian economy had made a rapid recovery during recent months, with the result that "our industrial production in the first quarter of 1957 was barely 20 per cent less than in the first quarter of 1956." The political basis of the State, he continued, would be built on "a powerful worker-peasant alliance" and of "all strata of our population which support our goal of building Socialism," including "the intelligentsia and progressive elements of the middle-class."

Discussing "the problems of multi-party government," M. Kadar said: "The functioning of several parties is not a necessary concomitant of proletarian dictatorship. As we know, a number of States on the road to socialism have but one party. On the other hand, in some countries which are building socialism -for example China and Poland—other parties have a share in governing the country side by side with the Communist Party. In Hungary, the various allied parties might well have effectively assisted in our construction even after 1948. In our view, we failed to take due advantage of that possibility. Ten years have passed since then, and history cannot be reversed. Besides, in studying the problem of coalition parties, we must not overlook the negative experience of October last . . . Under such circumstances, and in the given political situation, the time is not ripe for a multi-party governmental system . . ."

Defending the Government's decision to prolong the life of Parliament, M. Kadar said: "The National Assembly's mandate expires this year, and under normal conditions it should be dissolved and new elections proclaimed. The counter-revolutionary attack last October, however, profoundly disrupted public order and severely damaged the country's economy. The working population is now devoting itself to repairing the harm and healing the wounds. For this reason, the Government considers that, in the actual situation, it would not be right for us to spend our efforts on parliamentary elections."

As regards foreign relations, M. Kadar reaffirmed Hungary's close alliance with the U.S.S.R. and other countries of the "Socialist camp," including Yugoslavia, but said that "we are unable to accept the Yugoslav comrades' interpretation of the October counter-revolution." In this connexion he criticized "the one-sided attitude of the Yugoslav Press, which is full of articles telling us what is right and what is wrong in our actions and what we should or should not do." Relations with Austria had "changed for the worse as a consequence of the counter-revolutionary events" M. Kadar attacked the United States for having, he alleged, supported the "counter-revolutionaries" during the uprising, and also criticized Britain and France for "blindly following the anti-Hungarian policy of the United States."

The discussion of the "Hungarian question" at the United Nations was described by M. Kadar as "a violation of the U.N. Charter and open intervention in the internal affairs of our country." The U.N. Fact-Finding Committee was described as an "illegal" body which had been set up "to substantiate through the declarations of false witnesses all those lies and libels hatched by the imperialists with a view to harming Hungary."

In the course of his speech M. Kadar announced that the "Kossuth arms" would be dropped from the national flag and replaced by "a wreath of wheat ears tied with red-white-green" and surmounted by the Communist red star. Defending this decision, he said that the Kossuth arms "used to be the emblem of the Austro-Hungarian monarchy and . . . includes in its design the double cross which stands for serfdom and the three hills and four rivers symbolizing imperialist aspirations." [The replacement of the Communist emblem—now restored to the national flag—by the traditional Kossuth coat-of-arms was one of the principal demands of the revolutionaries at the time of the October rising, and had been accepted by M. Kadar after the rising was suppressed.]

The membership of the Hungarian Cabinet, which had been reorganized in February last (see below), was announced as follows by Radio Budapest on May 9: Prime Minister—Janos Kadar; First Deputy Premier—Dr. Ferenc Muennich; Deputy Premier—Antal Apro; Foreign Affairs—Imre Horvath; Interior—Bela Biszku; Defence—Major-General Geza Revesz; Agriculture—Imre Dogei; Finance—Istvan Antos; Heavy Industry—Sandor Czottner; Light Industry—Mme. Joszef Nagy; Justice—Ferenc Nezval; Education and Culture—Gyula Kallai; Health—Dr. Dolesal Frigyes; Foundries and Machine-building—Janos Csergo; Foreign Trade—Janos Incze; Internal Trade—Janos Tausz; Food—Imre Kovacs; Building—Razso Trautman; Posts and Transport—Istvan Kossa; Labour—Odan Kishazi; Planning—Arpad Kiss; Minister of State—Gyorgy Marosan.

A reorganization of the Cabinet had been announced on Feb. 28, the principal changes involved being as follows: (i) Dr. Muennich, hitherto Minister of the Interior and Minister of the Armed Forces, became First Deputy Premier; (ii) General Revesz, formerly an officer in the Soviet Army, became Minister of the Armed Forces; (iii) M. Bela Biszku, party secretary for Greater Budapest, took over the Ministry of the Interior. M. Sandor Ronai, formerly Minister of Trade, returned to his earlier post of president of the Hungarian Parliament, while new Ministers of Health and Education were appointed in the persons of Dr. Frigyes and M. Kallai (a journalist) respectively. General Revesz had been responsible for political indoctrination in the Hungarian Army since the October rising.

M. Kadar and other members of his Government paid a ten-day visit to Moscow from March 20-29 for discussions with Marshal Bulganin, M. Khrushchev, and other Soviet leaders. A joint communiqué announced that the U.S.S.R. had (1) granted Hungary a long-term credit of 750,000,000 roubles (about £67,000,000) which could be used during 1957 for the purchase of goods in the Soviet Union; (2) undertaken to supply Hungary with goods during 1957 to the value of 110,000,000 roubles; (3) deferred payment "for a long period" of Hungary's debts to the U.S.S.R., amounting to over 150,000,000 roubles; and (4) released Hungary from her obligation to pay the U.S.S.R. sums aggregating 1,000 million forints for the transfer to Hungary of former German property and for the Soviet share in the former mixed Soviet-Hungarian companies.

The statement also said that the presence of Soviet Army units on Hungarian territory was "a decisive factor in safeguarding Hungary from the aggressive designs of the imperialists." It added that talks would be held in the near future on the "temporary" stationing of Soviet forces in Hungary and on their "numerical strength, location and legal status." An agreement to this effect was signed in Budapest on May 27 (see 15644 C), on identical lines to the agreements previously concluded by the Soviet Government with Eastern Germany, Poland and Rumania.

Miscellaneous Developments.

Other developments during the period covered are summarized below under cross-headings:

16-Year Sentence on Mihaly Farkas. The Communist organ *Nep Szabadsag* (known before the uprising as *Szabad Nep*) announced on April 25 that Mihaly Farkas, the former Defence Minister and chief of the secret police (A.V.H.), had been sentenced to 16 years' imprisonment for "serious violations of the law during his period of office" No mention was made of his trial, the announcement being confined to a single sentence on the back page of *Nep Szabadsag*.

Mihaly Farkas had been expelled from the Hungarian Workers' Party in July 1956 (see 15057 A) a few days after M Rakosi's resignation as party secretary. During the "Stalinist" period he was the third most powerful member of the Communist hierarchy after Matyas Rakosi and Erno Gerö, and held the rank of general. The expulsion of Rakosi and Gero from the party was announced by Budapest Radio on Feb 3, 1957.

Allegations against Cardinal Mindszenty. Cardinal Mindszenty, who had been given asylum in the American Legation on Nov. 4, 1956, was accused by *Nep Szabadsag* on Feb. 6 of issuing instructions from the Legation which had resulted in the suspension of 18 "democratically-minded and progressive" priests by the Roman Catholic Church authorities. It was alleged that the Bishops of Vac and Szekesfehervar had acted as the Cardinal's "accomplices" and had taken "punitive measures" against the priests concerned at the Cardinal's instigation The Legation immediately denied these allegations, declaring that "while the Cardinal's health and personal comfort are being cared for to the fullest extent feasible within the confines of the Legation premises . . . everything practicable has been, and is being, done to ensure that he does not use the Legation in any way as a base for conducting political or related activities."

[Cardinal Mindszenty was still in the American Legation at the end of July, by which time he had been there for nearly nine months.]

U.S. Minister recalled from Budapest. - Expulsions of Attachés. The U.S. Minister in Budapest, Mr. Edward T. Wailes, returned to Washington on Feb. 27 after his recall had been demanded by the Hungarian Government on the ground that he had not yet presented his credentials, though he had been in Budapest since the beginning of November. The U.S. State Department explained that Mr. Wailes had arrived in Budapest on Nov. 2, 1956, with instructions to present his credentials promptly to the Hungarian Prime Minister, then M. Nagy. The statement continued: "Before Mr. Wailes was able to present his credentials, the Soviet Union, on Nov. 4, intervened in force in Hungary. In this situation Minister Wailes, acting under instructions from the [State] Department, refrained from presenting his credentials. There have been no subsequent developments in Hungary warranting the presentation of credentials . . . In this connexion it may be noted that the U N. General Assembly has taken no action to accept the credentials of the Hungarian delegation."

The U.S. assistant military attaché in Budapest, Captain Thomas R. Gleason, was expelled from Hungary on April 9 after being accused of "espionage." The allegation was denied by the U.S. State Department, which announced on May 30 the expulsion of the Hungarian military attaché in Washington, Lieut. Karoly Mezaros—apparently as a reprisal for the expulsion of Captain Gleason. On June 20 the Hungarian Government expelled the U.S air attaché in Budapest, Colonel Welwyn F. Dallam, alleging that he had photographed military objectives and helped "counter-revolutionaries" during the October uprising.

The "Oxford Students' Case." The Hungarian Government announced on Jan. 14 that four students of Oxford University had been arrested in Hungary and would be brought to trial on charges of possessing forged documents purporting to be made out by the Soviet Military Command in Budapest; acting (in the case of two of the students) as "members of the British Intelligence Organization"; seeking to gather information about the Soviet and Hungarian armies and on the Hungarian political and economic situation; and maintaining contacts between Hungarian students who had "defected to Britain" and other students still in Budapest.

The students concerned—Mr. Roger Cooper, of St. John's; Mr. Christopher Lord, of Magdalen; Mr. Basil Lord, lately of University College; and Miss Judith Cripps, of Somerville, grand-daughter of the late Sir Stafford Cripps—had been missing since Jan. 14 while driving by car across Hungary from Yugoslavia on their way back to Britain. It later became known that the car had broken down near Kecskemet and that they had been arrested and kept in custody. Mr. Cooper and Mr. Christopher Lord were in Hungary at the time of the uprising and had taken refuge in the British Embassy after delivering penicillin supplies. Both were accused by the Hungarian Government of being members of the "British Intelligence," of having "participated with counter-revolutionary groups in the building of barricades" during the uprising, and of having made "false and slanderous statements" about the situation in Hungary after their return to Britain.

The allegations against the four students were categorically denied by the British Government, which made repeated representations for their release. On Feb. 1 the Hungarian Government announced that the students would be set free "in view of their youth, their admission of guilt, and as a gesture of good will." They were escorted to the Austrian frontier on the following day, handed over to the Austrian authorities, and arrived back in England shortly afterwards. Mr. Cooper was rusticated for a term on his return to Oxford.

Report of U.N. Relief Mission to Hungary. Four experts of the U.N. Food and Agriculture Organization (FAO), led by M. de Seynes, of France, were allowed to enter Hungary during the first fortnight of January to study the relief needs of the Hungarian people. In a report to the U.N. Secretary-General (Dr. Hammarskjöld), presented jointly by M. de Seynes and FAO on Jan. 18, it was pointed out that food stocks had been destroyed and heavy industries brought to a virtual standstill, with resultant widespread unemployment, as

a result of the October rising, apart from the extensive damage to property. The food industry was operating at about 60 per cent of its former capacity; light industry at 50 per cent or less; the chemical and building industries at only 10 per cent; and the metallurgical industry had virtually stopped. In addition, the labour force in the coal mines had dropped from 90,000 to 50,000 and the average daily output of coal had fallen from 78,000 tons to 45,000 tons. An acute food shortage might develop by the spring unless outside help were forthcoming, and some 400,000 tons of wheat would have to be imported to ensure an adequate food supply until the next harvest.

Hungarian Invitation to U.N. Secretary-General. The Hungarian Government had made known on April 12 that it would "welcome" a visit to Budapest by Dr. Hammarskjöld, and that the U.N. Secretary-General had been invited to visit Hungary at any time convenient to himself. On April 26, however, Dr. Hammarskjöld said that he had no plans to visit Budapest. [As stated on page 15406, second column, the Hungarian Government had invited Dr. Hammarskjöld on Dec. 3 to visit Budapest in mid-December, but had repudiated its invitation on the following day.]

Lifting of Curfew Restrictions. The curfew imposed throughout Hungary after the October rising was ended at midnight on April 13-14 after being in operation for nearly six months.

In a statement to the Indian Parliament on Dec. 13, 1956, Mr. Nehru said that the Indian diplomatic representatives investigating the situation in Hungary (Mr. K. P. S. Menon and Dr. Khosla, the respective ambassadors in Moscow and Prague) had estimated that about 25,000 Hungarians and 7,000 Russians were killed in the uprising. Mr. Nehru pointed out, however, that it was exceedingly difficult to obtain reliable estimates; that a full report had not yet been received from Mr. Menon and Dr. Khosla; and that it would be contrary to normal diplomatic practice if confidential telegrams were published. The ambassadors had reported that although there might have been a small element in the uprising "which might be called counter-revolutionary or reactionary," the revolt was "essentially a national movement in which the great majority of the industrial workers and students took part, both in Budapest and elsewhere."

In its recent report to the United Nations, the U.N. Fact-Finding Committee on Hungary had expressed the opinion that Mr. Nehru's estimate of the casualties "may well be too high," and stated that it had failed to establish "reliable figures."—(Neue Zürcher Zeitung - Le Monde, Paris - Tanjug Agency, Belgrade - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune) **(Prev. rep. Hungarian Revolution, 15189 A; U.N. General Assembly Resolutions, 15521 A; 15405 A; U.N. Report on Hungary, 15621 A.)**

A. SPAIN. — Restoration of Monarchy on Death or Retirement of General Franco.

The Ministerial Under-Secretary of General Franco's Office (Señor Carrero Blanco) officially informed the Spanish Parliament on July 15 that the monarchy would be restored on the death or retirement of General Franco, the Head of State. In his statement to the *Cortes*, Señor Carrero Blanco said: "When the *Caudillo* is no longer with us, the destinies of Spain will be directed by a monarchy which is neither liberal nor absolute but traditional, popular, and Catholic. The person who embodies the monarchy will have to serve loyally the principles of the [Falangist] regime."

General Franco (who is 64) has been Head of State for 20 years. The next King of Spain is expected to be Prince Juan Carlos (19), son of Don Juan (the Pretender to the Spanish throne) and grandson of the late King Alfonso XIII.
(A.B.C., Madrid) **(Prev. rep. 14300 A.)**

B. SOVIET UNION. — Artificial Sea in Siberia.

A man-made "sea" with an area of nearly 400 square miles was inaugurated on June 28 in the Novosibirsk area of Siberia. Constituting a huge reservoir in connexion with a new 400,000 kw. hydro-electric station at Novosibirsk, on the River Ob, it is about 140 miles long, over 15 miles wide in places, and more than 70 feet deep. About 90,000 acres of forests were cleared to make the "Novosibirsk Sea" and about 35,000 people were resettled, including the 9,000 residents of Berdansk—now standing on a new site on the shores of the "sea" and constituting its chief port. The creation of an artificial sea in this area will open up a new transport route whereby grain from the Altai territory and the Novosibirsk region can be shipped to the Trans-Siberian Railway. Industrial and agricultural projects will also be set up in the area round the "Novosibirsk Sea," with power from the new hydro-electric station.
(Soviet Embassy Press Department, London)

C. AUSTRALIA - JAPAN. — Trade Agreement.

A three-year trade agreement between Australia and Japan was signed in Tokio on July 6 by the Japanese Prime Minister, Mr. Kishi, and the Australian Minister for Trade, Mr. McEwen.

The agreement (which came into immediate operation on a provisional basis, though it has to be ratified by both Governments) provided for most-favoured nation tariff rights for either side, and contained assurances of non-discriminatory treatment in import and exchange control. An official statement issued in Tokio said (i) that Australia would admit Japanese goods at Customs rates not higher than those applying to goods imported from other countries; (ii) that Japanese exports to Australia would not be subject to any discrimination in import licensing; and (iii) that Australia had agreed to enter into discussions with Japan within three years with a view to exploring the possibility of applying the General Agreement on Tariffs and Trade to their mutual trade.

Japan for her part undertook to import at least 200,000 tons of wheat from Australia in the first year, with a possible increase in succeeding years; to continue importing at least 30 per cent of her barley requirements from Australia; to give the Australian wool industry an opportunity of competing for not less than 90 per cent of Japan's total foreign exchange allocation for wool annually; and to continue the present duty-free entry of Australian wool for three years.

In order to safeguard Australian domestic industries against being flooded with cheap Japanese goods, the agreement included a clause enabling either country suffering damage to its own industries from excessive imports to impose quantitative restrictions.

Australian exports to Japan in the year ending June 30, 1957, amounted to £A.140,000,000, or 12 per cent of Australia's total exports, making Japan Australia's second biggest customer after Britain. The comparable figure in the year ended June 30, 1956, was £A.86,500,000, including £A.64,800,000 for wool. Japanese sales to Australia in 1956-57 were only £A.12,000,000, and, being subject to the highest Customs duties, accounted for only about two per cent of Australia's imports. The comparable figures for 1955-56 and 1954-55 were £A.22,592,000 and £A.18,422,000 respectively.

As a result of the agreement, Japan's exports to Australia were expected to be doubled within the first year and to reach about £A.43,000,000 by the third year of the agreement.

D. MOROCCO. — Prince Moulay Hassan proclaimed Heir to the Throne.

Prince Moulay Hassan, the eldest son of the Sultan of Morocco, was proclaimed heir to the throne on July 9, the date being chosen to coincide with his 28th birthday and with the Moslem festival of Aïd-el-Kebir. Those present at the investiture ceremony, which was held in the Royal palace at Rabat, included members of the Royal family, the Cabinet, leading officials, judges, officers of the General Staff, representatives of the French and Spanish Governments, and delegates from the political parties, the trade unions, and the Jewish community.

In the past the Sultan's successor who was not necessarily his direct heir had been chosen from among the Royal family by the *ulema* (doctors of Moslem law) of Fez, with the approval of the *ulema* of the other cities, and the Prince's investiture thus marked a break with a long-standing Moroccan tradition. Before nominating Prince Moulay Hassan as his heir, the Sultan had obtained the consent, not only of the Royal family and the *ulema*, but also of the Consultative Assembly, the political parties, and the trade unions, in order to signify his desire that Morocco should develop into a constitutional monarchy. (Le Monde) **(Prev. rep. Prince Moulay Hassan, 14946 A.)**

E. UNITED KINGDOM. — Lord Rochdale appointed Part-time Chairman of Cotton Board.

Sir David Eccles, President of the Board of Trade, announced on June 27 that Lord Rochdale had been appointed on a part-time basis to succeed Sir Raymond Streat, who had been full-time chairman of the Cotton Board since 1948, on Sir Raymond's retirement on Sept. 30. Lord Rochdale (51) is vice-president of the Lancashire and Merseyside Industrial Development Association, a governor of the B.B.C., and a former president of the National Union of Manufacturers.

F. FRANCE - NEW ZEALAND. — Diplomatic Missions raised to Embassy Status.

It was announced in Paris and Wellington on July 8 that the French and New Zealand Governments had agreed to raise their respective Legations in each other's capitals to Embassy status.—(Le Monde, Paris - New Zealand Directorate of Information, Wellington)

A. UNITED STATES. — Mr. Dulles on America's China Policy. - Reasons for Non-Recognition of Communist Regime. - Continued Deadlock in Sino-American Ambassadorial Meetings at Geneva.

In a speech in San Francisco on June 28, described by the State Department as a major policy statement, Mr. Dulles reviewed the Administration's China policy and gave detailed reasons why the United States would continue to refuse recognition to the Chinese Communist regime.

"On the mainland of China," said Mr. Dulles, "600,000,000 people are ruled by the Chinese Communists. That party came to power by violence and so far has lived by violence. It retains power not by the will of the Chinese people but by massive repression. It fought the United Nations in Korea; it supported the Communist war in Indo-China; it took Tibet by force; it fomented the Communist Huk rebellion in the Philippines and the Communist insurrection in Malaya . . .

"In the face of this situation the U.S.A. has supported, morally and materially, the free nations of the Western Pacific and South-East Asia. Our security treaties make clear that any violation of these nations by international Communism would be considered as endangering our own peace and safety, and that we would act accordingly.

"As regards China, we have abstained from any act to encourage the Communist regime, morally, politically, or materially. Thus we have not extended diplomatic recognition to the Chinese Communist regime; we have opposed its seating in the United Nations; we have not traded with Communist China, or sanctioned cultural intercourse with it. These have been, and are, our policies. But like all policies, they are under periodic review.

"As we review our China policy, we naturally recall our recognition policy as regards Communist Russia. The Bolsheviks seized power from Kerensky in 1917. Nevertheless, for 16 years we continued to treat the Kerensky representatives as representatives of the lawful government of Russia. However, by 1933 it seemed that the Communist regime might be considered as a peaceful member of society. For more than a decade it had committed no act of aggression. It had accepted the independence of Estonia, Latvia and Lithuania, and of Poland. It was not maltreating American citizens. It had promised to cease subversive activities in the U.S.A., to respect American rights in Russia, and to settle Russia's public and private debts to the United States.

"Also, by 1933 we desired to encourage the Soviet regime to resist Japanese aggression in the Far East. The Republic of China, inspired by that same notion, had itself recognized the Soviet Government in December 1932 and we promptly followed suit. We need not question that act of recognition under the circumstances which then prevailed. Recognition seemed indicated by many tests, and we did not read the future. However, it can, I think, be said with confidence that we would not have accorded recognition to the Soviet Union in 1933 had there been clear warning that the Soviet promises given in that connexion would be totally unreliable, that aggressive war would soon become an instrument of Soviet policy, and that they would be neutral toward Japanese aggression in Asia.

"In the case of Communist China we are forewarned. That regime fails to pass even those tests which, after 16 years, the Soviet regime seemed to pass:

(1) Soviet Russia, in 1933, had had a decade of peaceful non-aggressive relations with neighbouring countries. Communist China's past record is one of armed aggression.

(2) The Soviet regime seemed to want peace for the future. In the case of Communist China the situation is quite the reverse. Mr. Chou En-lai, at the time of the Bandung Conference, said: 'The Chinese people do not want to have war with the U.S.A. and are willing to settle international disputes by peaceful means.' But when we took him up and sought explicit reciprocal renunciations of force, his ambassador at Geneva, after presenting various evasive formulas, finally stated frankly that his regime did intend to use armed force to take Taiwan [Formosa] unless they could get it in some other way.

(3) In 1933 the Soviet Union was not flagrantly violating its international engagements. The Chinese Communist regime is violating the 1953 Korean armistice and the 1954 Indo-China armistice.

(4) There was reason to hope that the Soviet regime would treat our nationals with respect. The Chinese Communist regime violates the persons of our citizens in defiance of the elementary code of international decency, and it breaches its 1955 pledge to us to release them.

(5) It seemed, in 1933, that the Soviet regime and the United States had parallel interests in resisting Japanese aggression in the Far East. Today, the political purposes of Communist China clash everywhere with our own.

"U.S. diplomatic recognition of Communist China would have the following consequences:

(1) The many mainland Chinese who, by Mao Tse-tung's own recent admission, seek to change the nature of their Government, would be immensely discouraged.

(2) The millions of overseas Chinese would feel that they had no free China to look to. Today, increasing numbers of these overseas Chinese go to Free China to study. Six years ago there were less than 100 Chinese students from South-East Asia and Hong Kong studying in Taiwan. Today there are nearly 5,000. The number of Chinese students from overseas communities going to Free China has increased year by year; the number going to Communist China has declined, and hundreds of disillusioned students have made their way out of the mainland in the last two years. If the U.S.A. recognized the Communist regime, millions of overseas Chinese in free Asian countries would reluctantly turn to acceptance of the guiding direction of that regime. That would be a tragedy for them; and it would imperil friendly governments already menaced by Chinese Communist subversion.

(3) The Republic of China now on Taiwan would feel betrayed by its friend. That Government was our ally in the Second World War and for long bore alone the main burden of the Far Eastern war. It had many tempting opportunities to compromise with the Japanese on terms which would have been gravely detrimental to the United States. It never did so. We condemn the Soviets for having dishonoured their 20-year treaty pledge of 1945 to support the Chinese Nationalist Government as the Central Government of China. We are honour-bound to give to our ally, to whom we are pledged by a mutual defence treaty, a full measure of loyalty.

(4) The free Asian Governments of the Pacific and South-East Asia would be gravely perplexed. They are not only close to the vast Chinese land mass but they are geographically and, to some extent, politically, divided among themselves. The unifying and fortifying influence is above all the spirit and resolution of the United States. If we seemed to waver and to compromise with Communism in China, that would in turn weaken free Asian resistance to the Chinese Communist regime and assist international Communism to score a great success in its programme to encircle us.

(5) U.S. recognition of Communist China would make it probable that the Communist regime would obtain China's seat in the United Nations. That would not be in the interest either of the United States or of the U.N. The U.N. is not a reformatory for bad governments. It is supposedly an association of those who are already 'peace-loving' and are 'able and willing to carry out their Charter obligations.' The basic obligation is not to use force, except in defence against armed attack.

"The Chinese Communist Government has a record of successive armed aggressions, including war against the United Nations itself—a war not yet politically settled but discontinued by an armistice. The regime asserts not only its right, but its purpose, to use force if need be to bring Taiwan under its rule.

"Under the Charter, the Republic of China is entitled to a permanent seat and veto power in the Security Council. Should a regime which in seven years has promoted five foreign or civil wars—Korea, Indo-China, Tibet, the Philippines, and Malaya; which has fought the United Nations; which today stands condemned by the U.N. as an aggressor—should that regime be given a permanent seat, with veto power, in the body which under the Charter has primary responsibility for maintaining international peace and security? Communist Russia, with its veto power, already seriously limits the ability of the U.N. to serve its intended purposes. Were Communist China also to become a permanent, veto-wielding member of the Security Council, that would, I fear, implant in the United Nations the seeds of its own destruction . . ."

Mr. Dulles continued: "An argument sometimes heard is that diplomatic recognition is inevitable, so why not now? First of all, let me say emphatically that the U.S.A. need never succumb to the argument of 'inevitability.' We, with our friends, can fashion our own destiny. We do not accept the mastery of Communist forces. And let me go on to say that these Communist despotisms are not so immutable as they sometimes appear. Time and circumstances work also upon them.

"There is often an optical illusion which results from the fact that Police States, suppressing differences, give an external appearance of hard permanency; whereas the democracies, with their opposition parties and often speaking through different and discordant voices, seem to be unstable, pliable members of the world society. The reality, of course, is that a governmental system which tolerates diversity has a long life expectancy, whereas a system which seeks to impose conformity is always in danger. That results from the basic nature of human beings. Of all the arguments advanced for recognition of the Communist regime, the least cogent is the argument of 'inevitability.'

"There are some who suggest that if we assist the Chinese Communists to wax strong, they will eventually break with Soviet Russia, and that is our best hope for the future. No doubt there are basic power rivalries between Russia and China, but also the Russian and Chinese Communist parties are bound together by close ideological ties. Perhaps, if the ambitions of the Chinese Communists are inflated by successes, they might eventually clash with Soviet Russia. Perhaps, too, if the Axis Powers had won the Second World War, they would have fallen out among themselves. But no-one suggested that we should tolerate and even assist an Axis victory because in the end they would quarrel over the booty—of which we would have been part.

"We seek to appraise our China policies with an open mind and without emotion, except for a certain indignation at their prolonged abuse of American citizens in China. We have no feeling whatsoever that change is to be avoided merely in the interest of consistency, or because change might be interpreted as admitting past errors. We always take into account the possibility of influencing the Communist regime to better ways if we had diplomatic relations with it; or if, without that, we had commercial and cultural contacts with it. But the experience of those who recognize and deal with the Chinese

Communist regime convinces us that, under present conditions, neither recognition, nor trade, nor cultural relations, nor all three together, would favourably influence affairs in China. The probable result would be just the opposite of what we hope for.

"Internationally, the Chinese Communist regime does not conform to the practices of civilized nations; does not live up to its international obligations; has not been peaceful in the past; and gives no evidence of being peaceful in the future. Its foreign policies are hostile to us and our Asian allies. Under these circumstances it would be folly for us to establish relations with the Chinese Communists which would enhance their ability to hurt us and our friends.

"You may ask, 'What of the future? Are our policies merely negative? Do we see any prospect of resuming the friendly ties which, for many generations, the American people have had with the Chinese people, and which we want to have again? Do we see any chance that the potentially great Chinese nation, with its rich and ancient culture and wisdom, will again be able to play a constructive part in the councils of the nations?'

"We confidently answer these questions in the affirmative. We know that the materialistic rule of international Communism will never permanently serve the aspirations with which human beings are endowed by their creator. Communism is repugnant to the Chinese people. They are, above all, individualists . . . We can confidently assume that the Communist rule of strict conformity is, in China as elsewhere, a passing and not a perpetual phase . . ."

The U.S. Ambassador in Prague (Mr. Alexis Johnson) and the Chinese Ambassador in Warsaw (Mr. Wang Ping-nan) met on a number of occasions at Geneva during 1956, in continuation of the ambassadorial talks begun on Aug. 1, 1955 (see 14702 A, 14415 A). No progress, however, was made on any of the subjects discussed—i.e. Sino-American relations in general, the Taiwan (Formosa) question in particular, and the continued detention of U.S. nationals in China.

The Chinese Foreign Ministry issued a 4,000-word statement on March 4, 1956, declaring that the outstanding differences between China and the United States could only be settled by a conference of the Foreign Ministers of the two countries. It stated *inter alia*: "Although the American side has indicated that . . . a Sino-American conference of Foreign Ministers is not precluded, it has refused to take a definite stand on the question of holding such a conference."

The basic difference in the Geneva talks (according to the Chinese statement) was that the U.S.A. was insisting that Taiwan should be mentioned specifically in any joint communiqué on the renunciation of force, whereas China maintained that this would constitute "direct interference by the U.S.A. in Chinese domestic affairs." After saying that "the tension in the Taiwan area is created by the U.S. occupation of Chinese territory," the statement accused the United States of "obstructing agreement" in the Geneva talks and of "stepping up its military activities in the Taiwan area."

Mr. Wang Ping-nan issued a public statement on May 11, 1956, reiterating his Government's proposal that the Chinese and U.S. Foreign Ministers should meet personally to settle the Taiwan dispute "by peaceful negotiations." In reply, the U.S. State Department issued a statement on June 12, 1956, recapitulating the American position and giving some details of the talks between Mr. Johnson and Mr. Wang.

It was disclosed in the U.S. statement that Mr. Johnson had suggested to Mr. Wang on April 19, 1956, that the two sides should agree, "without prejudice to the pursuit by each side of its policies by peaceful means, or its inherent right of individual or collective self-defence," to announce (1) that China and the U.S.A. were "determined to settle disputes between the two countries through peaceful negotiations, without resorting to the threat or use of force in the Taiwan area or elsewhere"; and (2) that the two Ambassadors should continue their talks "to seek practical and feasible means for the realization of their common desire."

The U.S. statement continued: "This draft, the Communists state, was rejected by them on the grounds that it represents a demand by the U.S.A. that the Communists should 'accept the present state of U.S. interference in China's internal affairs and its occupation of Taiwan,' and that the U.S.A. 'has refused to take a positive stand on the question of holding a Sino-American conference of Foreign Ministers.' What the Communists fail to point out is that the above-mentioned American proposal is identical with the Communist proposal of Dec. 1, 1955, except for the addition of the words 'without prejudice to the pursuit by each side of its . . . inherent right of individual or collective self-defence,' and 'in the Taiwan area or elsewhere.'

The U.S. statement went on to emphasize that there could be no further excuse for the Communist refusal "to join in a meaningful renunciation of force" now that the U.S.A. had accepted the Communists' own proposal of Dec. 1, 1955, with the addition of words which made it clear (1) that neither party would abandon the pursuit of its policy by peaceful means; (2) that each party reserved the right of self-defence; and (3) that the renunciation of force applied equally to the Taiwan area and elsewhere. It continued:

"These reasonable hopes of the United States were met by a Communist rejection of what amounted to its own proposal . . . How can there be any possible objection to the words which the U.S.A. proposed to add to the Chinese draft unless the Communists are determined either not to join in a meaningful renunciation of force, or intend to reserve to themselves the use of armed force if they are not assured in advance that they will gain their goals? . . . The Communists make no mention of the fact that, although they undertook on Sept. 15, 1955, to permit Americans in China to return to the U.S.A., 13 Americans are still held in Communist prisons. We continue to seek the fulfilment by the Communists of their undertaking . . . We shall continue to seek a meaningful renunciation of force."

Mr. Johnson and Mr. Wang Ping-nan resumed their talks at Geneva on Feb. 13, 1957 their 65th meeting since the opening of the talks in August 1955. It was understood that the discussions dealt with two subjects: the release of Americans still imprisoned in Communist China, and the possibility of visits to China by U.S. newspapermen.

A. SPAIN - MOROCCO. — Diplomatic and Judicial Conventions. - Abrogation of Commercial Treaty.

Diplomatic and judicial conventions between Spain and Morocco were signed in Madrid on Feb. 11 by General Franco and the Sultan of Morocco.

Diplomatic Convention. This closely resembled the Franco-Moroccan diplomatic convention (see 14946 A) and contained the following provisions:

(1) Spain and Morocco, without detriment to their full sovereignty, would co-ordinate their foreign policies and consult together when their common interests required it.

(2) Spain would support Morocco's candidature for membership of international organizations.

(3) Their respective diplomatic missions in Madrid and Rabat would have the rank of embassies.

(4) In countries where Morocco had no diplomatic representation, and particularly in Spanish-speaking countries, Spain would undertake the representation and protection of Moroccan citizens and interests if so requested.

Judicial Convention. This provided (*a*) that Spanish officials might be placed at the disposal of Moroccan courts, particularly in the northern zone (the former Spanish zone), if the Moroccan Government so requested; (*b*) that the Spanish language would be used in the courts of the northern zone for as long as it was considered necessary; (*c*) that Spanish lawyers might practise in Moroccan courts, and *vice versa*; and (*d*) that Spanish jurists would collaborate in the training of Moroccan magistrates and in the preparation of a unified body of Moroccan legislation.

The Spanish Foreign Ministry announced on Feb. 12 that Spain had agreed to represent Moroccan interests in Argentina, Bolivia, Brazil, Chile, Colombia, Cuba, Dominica, Ecuador, El Salvador, Guatemala, Haiti, Honduras, Nicaragua, Panama, Paraguay, Peru, the Philippines, Uruguay, and Venezuela. A protest against this arrangement, as incompatible with the Franco-Moroccan diplomatic convention mentioned above, was lodged on Feb. 23 by the French Embassy in Rabat.

A joint declaration signed in Madrid on June 4 by M. Balafrej and Dr. Castiella, the respective Moroccan and Spanish Foreign Ministers, abrogated the Spanish-Moroccan commercial treaty of 1861, while Morocco undertook to give most-favoured-nation treatment to Spanish imports pending the conclusion of a new Customs agreement. M. Bouabid (Minister for Economic Affairs) told the Moroccan Consultative Assembly on the same day that the abrogation of the commercial treaties with the United Kingdom (see 15578 A) and Spain had made possible the introduction of uniform Customs tariffs throughout the whole of Morocco, including the northern zone and Tangier.

Four more agreements were signed in Madrid on July 7 between Spain and Morocco: (1) an agreement on the "monetary unification of Morocco," involving the withdrawal of the Spanish peseta from the northern zone (the former Spanish protectorate); (2) a trade and payments agreement; (3) an agreement on Spanish technical and administrative assistance to Morocco; and (4) a cultural convention. The first agreement will necessitate the purchase of pesetas by the Moroccan Government with Moroccan francs; as the Moroccan franc is at parity with the French franc, the operation will bring the whole of Morocco within the French monetary zone. It was understood, though not officially announced, that territorial questions at issue between the two countries had also been discussed, notably the question of the Spanish *enclave* of Ifni, on the Moroccan Atlantic coast.

(Prev. rep. Spanish-Moroccan Relations, 15110 A.)

B. FRANCE - POLAND. — Cultural Agreement.

A Franco-Polish cultural agreement was signed on July 9 providing for the free movement of nationals of either country within the other, the mutual importation of books, newspapers and periodicals, promotion of the teaching of the French and Polish languages, broadcast and television exchanges, and an increase in the number of scholarships and scientific fellowships.
(Le Monde, Paris)

A. UNITED KINGDOM. — The Army. - Estimates for 1957-58. - Mr. Hare's Review of Army's Achievements and Tasks. - First Guided Weapons Regiment. - Disbanding of Home Guard.

The Army Estimates for 1957-58 were published as a White Paper on April 29, together with a memorandum by the Secretary of State for War (Mr. John Hare) dealing mainly with the Army's tasks and activities during the past year.

The total of £401,400,000 shown for the Army in the Defence White Paper (see 15493 A) included the following principal items (1956-57 figures in parentheses): Pay and Allowances £92,700,000 (£103,100,000); Civilian Pay £90,800,000 (£96,000,000), Stores £56,700,000 (£105,200,000); Supplies £47,500,000 (£56,700,000); Land and Buildings £31,600,000 (£35,100,000); Non-effective Services (retired pay, pensions, gratuities, etc) £23,500,000 (£22,600,000); Reserve, Territorial Army etc. £15,200,000 (£16,800,000); Miscellaneous £7,400,000 (£13,000,000); War Office £3,900,000 (unchanged).

The accompanying memorandum explained that during 1957-58 the Army would contribute to the general saving on Defence expenditure by (*a*) a cut-back in orders for new equipment; (*b*) maximum use of existing stocks for normal maintenance purposes; (*c*) a reduction in the strength of the Active Army from 373,000 to 335,000. Continued savings would also result from the restriction of part-time training in the Reserve Army to volunteers, the withdrawal of British contractors from the Suez Canal base, and the ending of the subsidy to the Arab Legion.

The memorandum gave the following particulars of the changes in Army organization made during 1956-57:

Central Reserve. This had been reconstituted and was now organized for limited or global war, and also included units on a brigade basis specially trained for internal security duties. It would be the Government's policy to ensure that as overseas garrisons were reduced "the elements of the Central Reserve can be moved by air to any point of danger where they may be needed"

Headquarters. These had been reduced in numbers and size, and were now "planned to be the minimum needed tactically."

Coastal Artillery. Disbandment had been completed during the year.

Army Vehicles. Partly with a view to saving manpower, a 15-25 per cent cut had been imposed on vehicle strengths throughout the Army, and increased use was being made of trailers.

Reserve Army. Reorganization was nearly completed, involving the loss of 160 Territorial Army units (mainly by amalgamation) and of about 360 units in the Army Emergency Reserve. It had been decided to forego all training for part-time National Servicemen in 1957 (see 15344 A), and the Reserve Army would therefore go to camp as an all-volunteer force for the first time since 1950.

Territorial Army. The reorganization of the defence forces would inevitably call for further changes in the Territorial Army, but the Government intended that Territorials should continue to be trained in a fighting role. The main task of the T.A. would be home defence, but circumstances might arise in which some T.A. units would be needed for service overseas.

Army Cadet Force. This body was "a valuable recruiting ground for the Regular Army," and a committee had been set up under the Parliamentary Under-Secretary for War to examine its charter, organization, and training, in order to ensure that it was used to the best advantage.

Weapons and Equipment. The F.N. rifle (see 14931 A) had fully justified expectations in troop trials, and over 14,000 of these rifles were now in service, with home production due to begin in 1957. Large-scale production of a new sub-machine gun to replace the Sten gun had also been planned for 1957, and trials would take place of possible replacements for the Vickers machine-gun. In the interests of economy, however, and to reduce the strain on manpower, the Army aimed at simplifying its equipment as much as possible. It was therefore planned to produce "a family of weapons with no supplementary or overlapping members," which would "provide . . . a fine balance between the needs of limited operations on the one hand and of global war on the other." The memorandum added that progress had also been made in equipping the Army with operational instruments to measure nuclear radiation from both nuclear explosions and radioactive fall-out.

Manpower and Recruiting. Although Regular recruitment had improved by 10 per cent immediately after the introduction of the new pay code in 1956 (see 14887 A), this improvement had not been maintained. In this connexion Mr. Hare said: "I am not satisfied that the present combination of enlistment terms is best suited to provide the strength and structure needed to build up the all-Regular Army of the future, and we are at present examining possible alternatives in the light of experience over the past 10 years. More important still is to improve the conditions of life for officers, other ranks, and their dependants . . . I have in mind particularly the desirability of bringing about a greater measure of stability throughout the Army, and a reduction in the periods in which officers and soldiers are separated from their families."

The Officer Position. The number of officers had fallen in 1956-57 from 33,000 to 30,700 and would fall by a further 3,000 in 1957-58, owing to officers with short-service commissions ending their service and to the reduction in the number of National Service officers. The memorandum stressed the need for more candidates (particularly those with engineering aptitudes) for Sandhurst, and for more graduates to seek commissions under the University Graduates Entry Scheme.

Living Accommodation. The improvement of Army living accommodation was "a matter of absolute priority," and planned expenditure on new works remained high. Rebuilding and modernization was already in progress on 22 sites, and work was planned to start in 1957-58 at 15 more. The building and modernization of married quarters would continue; already since the war over 10,000 married quarters had been built and about 500 modernized.

Forces Overseas. The memorandum stated that during 1957-58 the strength of the B.A.O.R. would be reduced by about 13,000, chiefly in administrative units. The achievement of independence by Ghana had involved the transfer to that country of the Ghana Military Forces (to which 185 British officers and 220 n.c.o.s had been seconded), and plans were being made for handing over the Nigerian Military Forces to Nigeria in April 1958. The future organization of the forces in Sierra Leone and Gambia was also being studied. A major reorganization of the East African forces would take place during 1957, and certain British forces would be stationed in East Africa to help safeguard British interests in the Middle East and the Persian Gulf. All British forces still in Korea would be withdrawn during 1957-58, but a liaison mission would remain at U.N Command headquarters. In Malaya, where the Federation Army would be increased by two Malay and two multi-racial battalions, British forces would contribute to the expansion by transferring certain British Army units, composed mainly of Malays, to the Federation Army.

The Army Estimates were passed by the House of Commons on May 14 without a division.

Mr. Hare, moving their adoption, gave a warning that the current year's savings of nearly £100,000,000 (as compared with 1956-57) were unlikely to be repeated, since they had been achieved largely by the decision to eat into reserves. Although the size of the Active Army would be progressively reduced during the next few years, economies of the size to be made in the present year could only be made in future at the expense of the soldier himself or of the efficiency of the Army.

Dealing with questions of equipment and organization, Mr. Hare stressed that although the Army must be prepared to play its part as a deterrent to prevent global war, it must at the same time be equipped to carry out its Commonwealth and world-wide responsibilities and be capable of taking an effective part in limited operations. Although it needed its proper complement of tactical nuclear weapons, it would be "folly" to assume that conventional forces armed with conventional weapons would not remain of "paramount importance."

By the end of the five-year period ending in 1962, the Field Army would have been completely rearmed and the weapons of the 1939-45 war would have almost completely disappeared. In addition to the *Conqueror* tank (see 14931 A), which was already on field trials and was capable of defeating the heaviest known tank, the following new weapons would be introduced: (1) an anti-tank guided weapon which could "remove the heaviest tank from the field"; (2) a new medium tank, now in advanced development; (3) the *Saladin* armoured car (see 14931 A), with an armament giving it the punch of a medium tank, (4) the *Ferret*, a scout car of great versatility; (5) a new field gun to replace the present 25-pounder; (6) a nuclear guided weapon (at present being developed as supplementary to the U.S. *Corporal*), with high mobility and capable of quick development; (7) the *Thunderbird*, an anti-aircraft surface-to-air guided weapon; (8) the *L.70*, a new light A.A. gun to deal with low-flying planes (replacing the present *Bofors* 40-mm. gun), which would have improved radio fire-control and would be "the foremost gun of its sort in the world." In addition the whole range of engineering equipment was being modernized, including bridging, mines, tractors, and earth-moving machinery.

In nuclear war (the Minister continued) dispersion on the battlefield would be essential if overwhelming casualties were not to result. Communications would be uncertain, and there was an undoubted requirement for a smaller basic fighting formation capable of fighting on its own under a looser overall direction from headquarters than the Army was accustomed to. The Government had not yet reached a final decision, but, as already announced [see below], were thinking in terms of the brigade group, which would form a closely-integrated force, would be trained as a team, and would be sufficiently self-contained to be able to fight, move and maintain itself over long periods. It might be that this form of organization would also fit Britain's commitments in a "cold war," whilst in limited war a brigade group could be "married" with its heavier supporting arms. This scheme did not differ greatly from the ideas of Britain's allies, who were all tending towards smaller and more closely-integrated compact divisions.

The progressive introduction of new equipment, Mr. Hare pointed out, would go far to compensate for the numerical preponderance which any potential enemy was bound to have. Another factor was the growing ability of air transport to move large quantities of men and materials all over the world at short notice; if properly used, this could restore to Britain the traditional basis of her strategy—a swift application of small forces at decisive points. The necessary airlift would be provided by R.A.F. Transport Command, reinforced in emergencies by civil airlines, but air transport was not yet a complete answer to problems of mobility because modern armies used heavy equipment which could not be transported by air. There were three ways of meeting this difficulty: (i) all new items of equipment

for the Army would be regarded as potential air freight, and constant efforts made to reduce the amount of equipment necessary for the fighting forces; (ii) in many cases formations from Britain would be able, immediately on arrival at overseas destinations, to draw on the stocks of heavy equipment which the Government already maintained there, (iii) some tank-landing ships (taken out of reserve during the Suez emergency) had been retained in service and would be invaluable for carrying heavy tanks or equipment, or for landing operations where ports had been damaged and resort had to be made to the beaches.

Apart from the strategic air transport force, the R.A.F. would also have heavy freighters and light cargo aircraft for use respectively within a theatre of operations and in forward areas, whilst the Army would have helicopters and light aircraft for artillery observation and inter-communication duties.

After saying that the Army Council were considering how best, in the reorganization process, to avoid damaging regimental traditions, the Minister turned to the problem of redundancy. He explained that it appeared unlikely that it would be possible to work out, for every corps and regiment, the number of redundant officers and n.c.o.'s before November; he estimated, however, that about 3,000-4,000 officers, mostly majors and lieutenant-colonels, would be affected, whilst it was "fairly certain" that some warrant officers and senior n.c.o.'s would also be redundant. Officers below the rank of major would generally be unaffected. The Government would try as far as possible to achieve the reductions on a voluntary basis, and would invite applications from those who wished to take advantage of the compensation terms as soon as people had had time to consider them.

Mr. Hare concluded by stressing that the Government's decision to abolish National Service pre-supposed the ability to attract to the new all-Regular voluntary Army sufficient men of the necessary quality. To help ensure this, it had been decided to alter the terms of engagement, and in future the normal Army engagement would be for 22 years, without the present option of leaving after three years. The minimum Colour service would be for six years, with a further six in the Reserve. To meet cases where recruiting was extremely difficult, and to cover the case of National Servicemen who were prepared to do some extra service, it was proposed to have a 22-year engagement, but with the option (as at present) of breaking it at the end of three years, with four years' Reserve service; these cases, however, would be exceptional.

Mr. Julian Amery (Under-Secretary, War Office) had announced on March 11 that the War Office were considering two types of brigade group to replace the division as the main fixed formation of the Army. They were:

(1) an armoured brigade group comprising three armoured regiments, one infantry regiment, one infantry battalion, one regiment of medium artillery, an armoured car squadron, one light anti-aircraft battery, and a field squadron;

(2) an infantry brigade group consisting of three infantry battalions, an armoured regiment, a regiment of field artillery, a light A.A. battery, and a field squadron.

The standard brigade group would be intended for service in Europe and would comprise about 4,000-5,000 men, commanded by a brigadier. There was some doubt whether the designation "brigade group" was entirely suitable, and it might be changed to "light division."

Report of Committee on Employment of National Servicemen.

The report of the Wolfenden Committee on the Employment of National Servicemen in the United Kingdom (see page 14932) was published on Dec. 17, 1956.

The report stated that interviews with hundreds of National Servicemen had convinced the Committee that they almost invariably regarded their periods of duty as "an infliction to be undergone rather than a duty to the nation," and that this state of mind led them to consider "spit and polish," guard duty, and prolonged drills as "unnecessary impositions." The Committee believed that although in the past there might have been justification for the gloomy colours in which Service conditions were often painted, there was "very little now."

Discussing the question of how much of the traditional barrack-square discipline was necessary or desirable for National Servicemen, the report said that although it would be generally agreed that in the initial training of recruits there could not be separate standards for National Servicemen and Regulars, it must be recognized that "it is not always easy for the National Serviceman to understand why he should . . . spend so much time preparing equipment for inspections which appear to have no purpose." In particular, the report referred to the resentment caused by the requirement that men should themselves pay for materials used in cleaning uniforms and equipment. The Committee also strongly criticized, as "a poor background for National Service," the "thoroughly bad" accommodation at many camps and the "gloomy and obsolete barrack rooms" with primitive heating and sanitation.

The Committee's principal recommendations were as follows:

(1) The use of "every means of bringing home to all the duty the National Serviceman owes the country, and the gratitude the nation owes him."

(2) Steps to explain to National Servicemen the reasons for allocating them to particular branches of the Army, with appropriate training courses for commanding officers and staffs and an extension of the functions of personnel selection officers to include an explicit "public relations" aspect.

(3) Consultations between the War Office and employers and trade unions in order to assimilate the structure of Army trades as closely as possible to civilian trades.

(4) Replacement of National Servicemen by civilians wherever possible, the report stressing that man for-man the civilian attached to the Army cost the country less than the National Serviceman.

The Committee suggested in this connexion (i) that the Signals Service at bases and lines of communication in Britain, as well as the work of the R.A.M.C. in U.K. base hospitals, might be "civilianized"; (ii) that the vehicle overhauling functions of the R.E.M.E. might be better done by industry; (iii) that the Royal Army Service Corps needed only a small basis of uniformed men; and (iv) that in many cases civilians were more appropriate as mess waiters and batmen, and for gardening, cooking and record keeping duties.

(5) The report also suggested that the existing practice of regarding the five-day week, with frequent week-end leaves, as "a necessary concession to the civilian soldier" was "unsettling" and encouraged the National Serviceman to "lead a double life," putting up with his week's duties in the expectation of a civilian environment at the week-end. "It might well be," the report added, "that he would be happier if he took his period of service as a whole time commitment and stuck to soldiering without these repeated unsettlements."

Other recent developments in connexion with the Army are summarized below:

Formation of First Guided Weapons Regiment. The War Office announced on Feb. 19 that the first British guided weapons regiment, to be known as the 47th Guided Weapons Regiment (Field), would start forming early in March at Crookham (Hants.). The regiment, comprising about 530 men, would be armed with the U.S. *Corporal* missile (see 14931 A), the first supplies of which had already arrived. Training would be carried out by the Guided Weapons Wing of the School of Artillery at Larkhill (Wilts.).

The "Thunderbird" Guided Weapon. It was stated on May 15 that the *Thunderbird*, the Army's new surface-to-air guided weapon (see above), had been developed by the English Electric Company at the request of the War Office. It was "technically far in advance of any other surface-to-air guided weapon for a military role," and would be able to deal with targets at very high altitudes.

Army Appointments and Promotions. The following senior appointments had been announced in recent months (date of announcement in parentheses):

(i) Lieut.-General Sir Dudley Ward, Deputy Chief of the Imperial General Staff, as C.-in-C., British Army of the Rhine (*vice* General Sir Richard Gale) and concurrently Commander of the Northern Army Group, NATO (June 28, 1956). General Ward took up his new appointment on Jan. 1, 1957.

(ii) General Sir Nevil Brownjohn, lately Chief Staff Officer, Ministry of Defence, as Quarter-Master-General to the Forces. (Nov. 13, 1956).

(iii) Major-General R. W. Goodbody, Director Royal Artillery, War Office, as G.O.C.-in-C., Northern Command, with temporary rank of lieutenant-general. (Nov. 13, 1956).

(iv) Lieut.-General W. H. Stratton, Commander, British Forces, Hong Kong, as Vice-Chief of the Imperial General Staff (Feb. 4, 1957) *vice* Lieut.-General Sir William Oliver. General Stratton will take up his new appointment in September 1957.

(v) Major-General E. M. Bastyan, Vice-Adjutant-General, War Office, as Commander, British Forces, Hong Kong *vice* Lieut.-General Stratton. (Feb. 4, 1957).

(vi) Major-General N. P. H. Tapp, Director of Military Training, War Office, as G.O.C., East Africa, *vice* Lieut.-General Sir Gerald Lathbury. (March 12, 1957).

(vii) Lieut.-General Sir Edwin Herbert, G.O.C.-in-C., West African Command, as G.O.C.-in-C., Western Command, *vice* General Sir Lashmer Whistler, retiring. (June 22, 1957).

(viii) Major-General Frank Hastings Brook, lately Commander of the 1st Malay Infantry Brigade (1953-54), as G.O.C. of the Federation of Malaya Army. (June 25, 1957). The appointment was made by the High Commissioner of the Malayan Federation, on behalf of the Queen, with the concurrence of the Malay Rulers.

The promotion of General Sir Gerald Templer, Chief of the Imperial General Staff, to the rank of Field-Marshal was announced on Nov. 28, 1956.

Mr. Hare announced in the House of Commons on June 26 that the Government had decided "with great reluctance" that circumstances no longer justified the retention of the Home Guard, which would accordingly be disbanded on July 31.—(Times - Daily Telegraph - Manchester Guardian) (Prev. rep. Defence Policy, 15550 A; 15493 A; Defence Votes on Account, 15403 A; 1957-57 Estimates, 14931 A.)

Note. The Home Guard was originally formed (as the Local Defence Volunteers) in May 1940 at a time when a German invasion of Britain seemed imminent, the name being changed to "Home Guard" in July 1940. The force, in which 1,750,000 men served before it was "stood down" in December 1944 and disbanded in 1945, played a valuable part in the defence of Britain and in releasing Regular soldiers at home for overseas service. It was re-formed in April 1952 at the time of the Korean War, and had been on a reserve basis since March 1956. At the time of Mr. Hare's announcement the Home Guard consisted of an active cadre of 1,794 and a reserve roll of 59,081. (Daily Telegraph).

A. ITALY. — Zoli Cabinet's Offer of Resignation. - Non-acceptance by President Gronchi. - Senator Zoli remains in Office as Prime Minister.

Senator Zoli, the new Italian Prime Minister, tendered his Government's resignation to President Gronchi on June 10 following votes on his programme, first in the Senate and then in the Chamber of Deputies, in which he had been supported by a majority which included the neo-Fascist *Movimento Sociale Italiano* (M.S.I.).

In the Senate on June 5 the vote approving Senator Zoli's policy statement had been 132 to 93, with four abstentions. In addition to 108 votes from his own party (the Christian Democrats) and seven from Independents and others, he was supported by Senator Lauro's National Monarchists and the M.S.I. The opposing votes were cast by the Communists, Left-wing (Nenni) Socialists, Social Democrats, Liberals, and Republicans—i.e. by three of the four Centre parties in addition to the two Left-wing parties. The situation was the more paradoxical as Senator Zoli had put forward a progressive programme which, it was hoped, might have won the support of the Nenni Socialists in addition to that of all the Centre parties.

The three-day debate in the Chamber, which opened on June 5, ended in the early hours of June 8, when the President of the Chamber announced that 305 votes had been cast for the Government and 255 against, with 11 abstentions. The parties supporting the Government were the Christian Democrats, Monarchists, and neo-Fascists, whilst the opposition comprised the Communists, Nenni Socialists, Social Democrats, Liberals, and Republicans.

In view of the resentment which the vote in the Senate had caused within the Christian Democratic Party, Senator Zoli had announced during the Chamber's debate that he would resign rather than owe the Government's majority to the votes of the neo-Fascists; moreover, he would also refuse to count Communist votes in his majority if these should be given to him.

According to the figures originally announced on June 8, the Government, with 571 deputies present, 560 voting, and 11 abstaining, would have required a minimum of 281 votes (i.e. over one-half of the total vote) for a majority in the Chamber. Excluding the 24 votes of the M.S.I. from the 305 votes he actually received, Senator Zoli would have just achieved this minimum of 281. Subsequently, however, it was discovered that an error in the count had been made by the tellers and that one neo-Fascist and one Communist had been erroneously recorded as absent. With the correct count showing only nine abstentions instead of 11, the minimum required by the Government rose to 282 votes. As, without counting the neo-Fascist votes, the Government had obtained only 281, it was thus left one vote short of the majority which Senator Zoli had demanded as a condition for his continuance in office. In consequence he decided to resign on June 10.

Following Senator Zoli's resignation, President Gronchi consulted the party leaders, the presidents of the Chamber and Senate, and former Presidents of the Republic. On June 15 he asked Signor Merzagora, the President of the Senate, to "explore the possibilities of forming a new coalition government of the Centre parties."

On the previous day (June 14) President Gronchi had issued a statement declaring that his task could not be limited to giving the country a Prime Minister but that it was also his duty "to co-operate in the formation of a Government which meets the requirements of the nation and respects the authority of Parliament." Pointing out that his constitutional rights were wider than those of the French President, he maintained that the President of the Italian Republic had the right to appoint a Government "*per se*" and that its confirmation by Parliament was "a second act." This statement was strongly criticized by certain sections of the Christian Democrats on the ground that President Gronchi was, in effect, claiming a voice in the appointment of Ministers. As a result, President Gronchi called upon Senator Merzagora—an Independent elected on the Christian Democratic ticket—to undertake further negotiations with the parties, as stated above.

Senator Merzagora accepted this "exploratory mission" on the understanding that he himself would not take over the Premiership, and that his function would be exclusively that of an "honest broker" attempting to bring about "democratic collaboration' between the Christian Democrats and the other three Centre parties. On June 18, however, Signor Merzagora reported to President Gronchi that the party leaders had refused to discuss the question of a revived coalition with him, and had declared that only a Prime Minister-designate could usefully approach them on the subject.

President Gronchi thereupon asked Signor Fanfani, the secretary-general of the Christian Democrats, to attempt to form a Government—a task which Signor Fanfani conditionally accepted. On Jan. 21, however, Signor Fanfani abandoned his attempt, informing President Gronchi that he had met with "insuperable difficulties" in trying to revive the coalition of Centre parties, and had decided against attempting to form another minority Government consisting only of Christian Democrats.

In view of these developments President Gronchi informed Senator Zoli on June 22 that he had decided not to accept the latter's resignation, and asked him to approach Parliament again with his former programme and seek a vote of confidence. Senator Zoli accordingly presented himself to the Chamber and the Senate on June 25. On the following day the Chamber acknowledged, without a formal vote, that the Cabinet had withdrawn its resignation and intended to seek parliamentary support for the implementation of its programme. The Senate took a similar decision on June 28.

During the debate in the Senate, Don Sturzo (the veteran Christian Democratic leader) strongly criticized President Gronchi's interpretation of the powers of the Head of State. He also criticized the fact that President Gronchi's decision to refuse Senator Zoli's resignation had not been directly communicated to Parliament but had reached it in the form of a declaration by Senator Zoli himself.

The Government's programme, the implementation of which will be sought by Senator Zoli, includes the ratification of the Euratom and Common Market treaties, relief measures for the victims of the recent severe flooding of the River Po, and the Budget. The term of the present Parliament ends in 1958. (Giornale d Italia, Rome - Corriere della Sera, Milan)

B. ARGENTINA - VENEZUELA. — Breaking-off of Diplomatic Relations. - Venezuelan Rejection of Argentine Request for Expulsion of Ex-President Perón.

The breaking-off of diplomatic relations between Argentina and Venezuela was announced on July 7 by the Argentine President, General Aramburu, following the Venezuelan's Government's refusal to consider an Argentine request for the expulsion of ex-President Perón. It was stated in Buenos Aires that the Argentine Government would publish documents substantiating its charges that ex-President Perón had been fomenting terrorist plots from Caracas with the object of overthrowing the Argentine regime. It was also reported that the Argentine protest had been based on reports that Señor Perón had had a meeting in Caracas with the President of Paraguay, General Stroessner, during an official visit by the latter to Venezuela.

Ex-President Perón had first been given asylum in Paraguay after his overthrow in 1955, and subsequently took up residence in Panama after Argentine protests to the Paraguayan Government (see 14871 A). He later settled in Caracas, the Venezuelan capital. The Argentine Government had alleged that he was violating his asylum in Venezuela by fomenting terrorist plots against Argentina, both in the Argentine itself and in neighbouring countries.

The Venezuelan Ambassador in Buenos Aires (Dr. Atiliano Carnevali) was recalled to Caracas on July 7 shortly after it had been announced that the Argentine Government had requested the expulsion of ex-President Perón from Venezuela. The Argentine Ambassador in Caracas, General Carlos Toranzo Monero, was subsequently declared *persona non grata*, though the Venezuelan Government stated that it was not breaking off diplomatic relations with Argentina. The Brazilian Government agreed to represent Argentine interests in Caracas and Venezuelan interests in Buenos Aires.—(New York Times)

(Prev. rep. "Peronistas," 15512 A.)

C. JAPAN. — Easing of Embargo on China Trade.

In conformity with the decisions taken by Britain and a number of European countries, the Japanese Government announced on July 16 that the existing controls on trade with China would be relaxed to the level applying to trade with the U.S.S.R. and the countries of the Soviet bloc. A total of 270 "non-strategic items" had accordingly been removed from the embargo list, including certain types of machinery and machine-tools, electric motors, lorries, and diamond-tipped tools. It was officially stated that none of the items removed from the restricted list had any direct military value, and that there would be "no change in the Government's policy of placing the necessary restrictions upon items of strategic significance, in co-operation with the free nations." (New York Times)

(Prev. rep. 15607 A.)

D. UNITED KINGDOM. — Dr. Gilbert Murray's Ashes interred in Westminster Abbey.

The ashes of the late Dr. Gilbert Murray were interred in Westminster Abbey on July 5. The memorial service was attended by some 1,500 people, including 25 Ambassadors and Commonwealth High Commissioners and many eminent scholars and statesmen.—(Times)

(Prev. rep. 15588 C.)

A. LAOS. — Deadlock in Negotiations with Pathet Lao. - Rejection of Pathet Lao Demands. - Ministerial Crisis. - British-French-U.S. Declaration of Support for Laotian Government.

The negotiations between the Royal Laotian Government and the *Pathet Lao* for the implementation of their agreement of Dec. 31, 1956, on the reunification of the two *Pathet Lao*-held northern provinces with the rest of the country reached a deadlock in March, one of the principal reasons being the *Pathet Lao* demand that Laos should accept $70,000,000 in aid from Communist China. This condition (put forward in February) was reported to have been rejected by Prince Souvanna Phouma, the Laotian Prime Minister, on the grounds (*a*) that the reunification problem was strictly an internal matter, so that conditions including another country were out of order; (*b*) that the offer of aid from Communist China was an obvious attempt to increase the political strength and influence of the *Pathet Lao* leaders and to bring Communist "technicians" into Laos; and (*c*) that an economic aid programme of such proportions for a country the size of Laos [which has a population of only 2,000,000] would create strong pressure for diplomatic recognition of Communist China.

The Laotian National Assembly on May 29 passed a vote of no-confidence in the Government, by 13 votes to 11, after a heated debate in which the Government's conduct of the negotiations with the *Pathet Lao* was strongly criticized.

While unanimously approving the agreement with the *Pathet Lao* concluded on Dec. 31, 1956, the Assembly adopted another motion criticizing the delay in the negotiations for implementing the agreement, as well as the opposition within the Government against its realization. Finally, as stated above, it adopted the motion expressing the Assembly's disagreement with the continuance of negotiations by the Government on the basis outlined by the Prime Minister. It was stated in the French press that the internal opposition within the Government had been led by M. Kathay Don Sasorith, the Deputy Premier.

Following the Assembly's vote, Prince Souvanna Phouma resigned on May 30, and on June 3 King Sisavong Vong asked Mr. Kathay Don Sasorith to form a new Cabinet. The National Assembly, however, refused on June 30, by a single vote, to accept a Government headed by M. Sasorith. Two days later M. Bong Souvannavong (leader of the small National Union Party) was asked to take over the Cabinet formation but he, too, failed to obtain the necessary two-thirds majority, his investiture being rejected on July 6 by a single vote.

Prior to Prince Souvanna's defeat in the National Assembly, Britain, France and the U.S.A., in response to his request, had sent Notes to the Laotian Government on April 15 reaffirming their interest in the peace, sovereignty, independence, unity, and territorial integrity of Laos, and their anxiety to see the country reunited. The text of the British Note was as follows, the French and U.S. Notes being in identical terms:

"In response to the request of the Royal Government of Laos to the Governments of the United Kingdom, France, and the United States for a statement of their policy toward Laos, H.M. Government confirms its interest in the peace, sovereignty, independence, unity, and territorial integrity of the Kingdom of Laos. H.M. Government therefore continues fully to support the principle of the complete authority of the Royal Government of Laos over all its territory. It maintains the hope that a political settlement and the reunification of Laos will be effected in accordance with the principles of the Geneva Agreements on Laos of July, 1954, and the Resolution of the International Control Commission of Jan. 7, 1956.

"H.M. Government regrets that these objectives have so far been made impossible because the *Pathet Lao* forces, in spite of these Agreements and of the Resolution of the International Control Commission, have sought to place extraneous conditions upon their acceptance of the authority of the Royal Government and upon their reintegration into the national community. H.M. Government welcomes the firmness with which the Kingdom of Laos has resisted this manoeuvre, and is confident that the Royal Government will continue in its determination that the political future of the Kingdom of Laos shall not be dictated by dissident groups enjoying no constitutional status."

Official spokesmen in London, Paris, and Washington explained that the "extraneous conditions" demanded by the *Pathet Lao* for their agreement to the reunification of the two north-eastern provinces with the rest of the kingdom included the following: (i) a policy of neutrality involving the exchange of diplomatic missions with the Soviet Union, Communist China, and North Vietnam; (ii) acceptance of substantial economic and technical aid from the Communist bloc, particularly Communist China; and (iii) the formation of a coalition government in which *Pathet Lao* representatives would be included. These demands, it was pointed out, clearly reflected the attempt of the Communist bloc to alienate Laos from the Western countries, and had therefore not been accepted by the Laotian Government.

Prince Pethsarath Souvanna Vongsa (68), the eldest brother of Prince Souvanna Phouma and of Prince Souphannou Vong (the *Pathet Lao* leader), returned to Laos on March 22 after 11 years' exile in Siam. He was formerly one of the leading personalities in Laotian politics.—(Le Monde, Paris - Times - New York Times) **(Prev. rep. 15339 C.)**

B. UNITED KINGDOM.—Government Shareholdings.

The Chancellor of the Exchequer, Mr. Thorneycroft, issued on July 2 the following list of the Government's shareholdings in public companies, in reply to a question by Mr. Edelman (Lab.):

Suez Canal Company - 353,504 shares.
Cable and Wireless Ltd. - 30,000,000 shares of £1 each.
British Petroleum Co. Ltd. £56,250,000 Ordinary Stock: £1,000 Preference Stock.
Cunard Steamship Co. Ltd.—One £20 "Government" share; £46 Ordinary shares.
British Sugar Corporation -750,000 £1 shares.
Itabira Iron Ore Co. Ltd. (in liquidation) 61,220 First Preference shares of £1 each; 380,000 Second Preference shares of £1 each; and 493,982 Ordinary Shares of £1 each.
S.B. (Realisations) Ltd. - 148,540 5 per cent. Redeemable Cumulative Preference Shares of £1 each; 581,302 Ordinary shares of 5s. each; 250,000 "A" Ordinary shares of 5s. each.

This list did not include securities in iron and steel companies held by the Iron and Steel Holding and Realization Agency.

It was commented in the Press that at the closing Stock Exchange prices on July 2 the Government's holding in British Petroleum was worth £457,000,000; in the Suez Canal Company nearly £14,000,000; and in the British Sugar Corporation £609,000. (Times - Financial Times - Daily Telegraph)

C. SPAIN - PORTUGAL. — Franco-Salazar Meeting.

General Franco and the Portuguese Prime Minister, Dr. Salazar, had a two-day meeting at Ciudad Rodrigo on July 8-9, which was also attended by the Spanish and Portuguese Foreign Ministers, Dr. Castiella and Dr. Cunha respectively. The meetings were held in an atmosphere of secrecy and no official information was released apart from a brief communiqué which stated (i) that there was full agreement between the two countries on international questions, and (ii) that General Franco and Dr. Salazar had studied "necessary measures to reinforce the Iberian bloc—the expression of the solidarity of the peninsula—both politically and militarily." The communiqué made no mention of the possible restoration of the Spanish monarchy. (A.B.C., Madrid - Le Monde Paris) **(Prev. rep. 12174 C.)**

D. BURMA - ISRAEL. — Economic Co-operation.

An economic co-operation agreement between Burma and Israel was signed in Rangoon on June 11 whereby the two countries agreed to enter into negotiations for setting up joint ventures for the manufacture of rubber tyres, ceramics, glassware, paint and varnish. It was also agreed to carry out a joint study into the feasibility of a project for cultivating a million acres of waste land in the Shan States with wheat, corn, and soya beans, most of which would be exported to Israel. The agreement also provided that Burmese citizens would receive training and research facilities in Israel.
(Times - New York Times)

E. CHILE. — Final Results of General Election.

The new Chilean Congress elected in March was inaugurated by President Ibañez on May 21, the final party representation in the two Chambers (revised figures) being as follows:

Chamber of Deputies. Radicals 30; Liberals 32; United Conservatives 22; Falangists 14; Agrarian Labour 18; Chilean Socialists 8; National Party 6; Popular Socialists 5; Democrats 5; others 6.

Senate. Liberals 9; Radicals 9; United Conservatives 6; Popular Socialists 6; Agrarian Labour 4; National Party 4; Socialists 2; others 5.—(Bank of London & South America, Fortnightly Review) **(Prev. rep. 15500 A.)**

F. SYRIA. — Ending of Martial Law.

The Syrian Government decided on July 22 to lift the state of martial law except in the areas bordering on Israel. The free entry of foreign newspapers (many of which had been censored or prohibited in recent months) was also permitted, though press messages sent abroad remained subject to censorship. Martial law had been in force since the Anglo-French intervention in Egypt, and its repeal had been strongly demanded by the Opposition, which had threatened to resign from the Syrian Parliament *en bloc* if it were continued. (Times - Le Monde, Paris) **(Prev. rep. Syria, 15582 A.)**

JULY 27—AUGUST 3, 1957

A. UNITED KINGDOM. — The Economic Situation. - Government's Anti-Inflationary Policy. - Creation of Independent Council on Prices, Productivity and Incomes. - Statements by Mr. Thorneycroft. - Parliamentary Debate. - Increase in Rates for Local Loans.

The Chancellor of the Exchequer, Mr. Thorneycroft, announced in the House of Commons on July 25, in the course of a debate on the economic situation and specifically on the danger of inflation, that the Government had decided to set up an independent council on prices, productivity, and incomes as part of their contribution to the fight against inflation. The Chancellor had personally given a strong warning on the inflationary danger when speaking at the opening of new offices of the United Kingdom Provident Institution in London on July 10, and at a meeting of the National Productivity Advisory Council for Industry on July 12. Mr. Thorneycroft's statements, as well as those of the principal Opposition speakers in the economic debate, are summarized below.

Mr. Thorneycroft's Speech of July 10.

After referring to the "qualities of thrift and temperance which have been the foundation of our national life," the Chancellor continued:

"To-day men are asking whether these qualities still exist—or at any rate exist sufficiently—in our Government and our national character. Has inflation come to stay? Are prices bound to go on rising? Are fixed interest securities a sound investment? Put bluntly, the question now being asked is: 'How honest is our money?' The answer is: 'As honest as we choose to make it' . . . If a nation pays itself 7 per cent more for doing no more work, as happened last year, price increases will follow as night follows day. No economic or governmental magic, no system of controls, can stop that process. Before those price increases thus generated are to form the basis for another round of wage increases, the country should ponder the damage which could be done to this nation and to all who work in it.

"It may be convenient if I concentrate on those aspects of inflation which are by their nature of particular concern to the Government and to the City. Inflation is perhaps the most intractable and difficult problem which we have to face. Other countries have to face it too, and none have yet found a satisfactory solution. Yet here in this island, dependent as we are upon external trade, and with the responsibility of a world banker, we needs must find a way to meet this problem. We certainly shall not find an answer to it in blaming one another. The truth is that wage claims, profits, Government expenditure, Bank advances, and other factors all have their part to play. All the solutions are unpopular . . . And it is a relatively easy form of escapism, the moment a solution in one of these fields is even hinted at, for all the critics to condemn it and focus attention upon another aspect of the problem.

"The truth is that this nation must either squarely face the problem of inflation, and accept the policies necessary to check and curtail it, or face a continual decline in the value of its currency. If it is said that there is some danger in a Chancellor speaking in such forthright terms, my reply can only be that the dangers would be far graver if he failed to do so. What is the Government's part in all this? May I say this about the Government and its expenditure? Hardly a day passes without the Government being pressed to spend more money. It is said by highly-placed military persons that the only form of defence is to have all forms of weapons ancient and modern. It is said that expenditure on the Universities is grotesquely small. It is said that what we spend on roads is quite inadequate. And yet it is said at the same time—incongruously though it may be—that we ought to be dealing more effectively with inflation. You cannot at the same time press the Goverment to spend more and ask it to halt inflation. The fact is that in April we budgeted to spend less this year than we did last. In my Budget speech I pointed to the surplus of £468,000,000 and described it as a 'striking contribution towards the strengthening of our balance of payments and the stability of the economy.' It would at that time have been easy and popular to give away more of this surplus in response to those many critics who were then so busily engaged in pointing out the dangers, not of inflation, but of deflation. But I stood by my view that inflation rather than deflation was the real danger, and I feel sure that no discerning person would disagree with that judgment to-day.

"The scale of public investment is of course high, and will continue to be high. Steel and coal, transport and power, all these basic industries need capital. They will absorb large quantities in the years ahead. But not even in these fields can we develop faster than the resources which are available permit. We shall of course give these productive industries priority over advances in the Social Services. We cannot afford not to do so. Even so, there is a limit to the speed at which we can develop. We have not hesitated, and will not hesitate, to adjust even the most essential investment programmes. The object must be to secure that these programmes are matched by the savings available or the profits earned, so as to place a less heavy burden on the community. These are the facts of life. They are the same facts which face many of our partners in the Commonwealth to-day. We should be failing in our duty to the Commonwealth and to the whole world if we did not face them here in the United Kingdom.

"Lastly, as to credit policy. Sometimes I am urged to end the 'credit squeeze.' Sometimes I am told to dictate to the Banks on their liquidity ratios in order to intensify it. I wonder if those who advocate the second course want to use the banks as their agents to choke back production and raise unemployment. Oddly enough, the same people sometimes urge both these courses. I doubt their wisdom. Nevertheless, credit policy has an important part to play. Obviously we need to learn all we can about techniques in this field. We all look forward to the findings of Lord Radcliffe's Committee. But the Radcliffe Committee was never intended as a substitute for action. Whatever techniques we may develop, credit restriction clearly has a part to play in our struggle against inflation. On the other hand we must not deceive ourselves that improved techniques can ever be a complete answer. In February and March there was a marked upsurge in the level of Bank advances. I am glad to say that since my request to the Banks in April, the figures for April and May have shown a less disturbing trend, though I shall be bound to continue to watch the position very closely in the months to come.

"Perhaps I may take this opportunity of stating again the importance which I attach to limiting the quantities of Bank money available for long-term investment. The guidance which I have issued to the Capital Issues Committee still stands, and is being carried out in their day-to-day work—in particular, the principle that overdraft facilities for capital purposes should so far as possible be limited to short 'bridging' operations, designed to provide capital for short periods until more appropriate long-term arrangements for finance can be made. If this means less investment or investment at a slower pace, so be it. The fact remains that investment unmatched by savings is a battle lost against inflation. It is my intention that the borrowing of money should be as difficult as the real shortage of resources demonstrates to be necessary. I prefer that we should put honest money first and other considerations, including popularity, a long way after. Businesses, local authorities, public boards, and private persons too, must cut their Budgets in accordance with the national cloth. Directors and shareholders, bankers and taxpayers, will assist the community and themselves if they impress these facts on one another

"Of course I know that there are other factors in inflation . . . But the existence of other factors is not an adequate excuse for ignoring those that I have mentioned . . ."

Mr. Thorneycroft's Speech of July 12.

Addressing the National Productivity Advisory Council (which consists of representatives of employers, trade unions, and the nationalized industries) the Chancellor made it clear that there was, in his view, no new economic crisis. He rejected the possibility of "sudden panic slashes" but pleaded for restraint in wages, profits, and prices, announcing at the same time that Exchequer lending rates for borrowings by local authorities and the nationalized industries were being increased.

After saying that there was "no heaven-sent, painless and novel solution" of the problem of inflation, Mr. Thorneycroft declared that the struggle had to be fought on many fronts. He continued: "To say that there is no new solution is not the same as saying that there is no solution at all, or no policy to attain it. It is important, however, to be clear first about the facts; about the policies which the Government are pursuing and intend to pursue; about the areas of action in which they can operate, and how . . .

We have not been preserving the soundness of our money since the war. The pound was worth 20s. in 1947 and about 12s. 6d. today. The best answer to the reduction of inflation is that we should all produce more; work a little more effectively, a little harder; and have fewer restrictions upon output. The outlook for this year is not unsatisfactory in this regard. Production is moving upward

"In my judgment the Government's policy is a good one. It is clearly defined. It is working and will continue to work in future. We may from time to time adapt or adjust it, but we do not intend to reverse it. The big instrument of Government policy in all these matters is the Budget . . Investment, particularly investment for the public and basic sectors, is going to be large but, as in the private sector, must be matched with the savings which are available. It is in the private field that the Government's policy on monetary matters mainly operates. We have maintained the credit squeeze. We have decided as a matter of policy that the price of money shall be related to the real scarcity of resources which exists. We are often presssed to abandon this policy. We do not intend to do so . . . Nor should public spending be put into a specially privileged position. Today we have implemented that part of the policy by raising the Exchequer lending rates to keep them in line with the market. It will cost the local authorities and the nationalized industries more to borrow. And so, in existing circumstances, it should."

Turning to a part of the economy "not at any rate directly within Government control," Mr. Thorneycroft discussed the question of prices, profits and incomes. "It is sometimes suggested," he said, "that we should seek to control incomes, not directly, but by so organizing the economy that we choke back production and force unemployment to rise . . . I don't find the idea of artificially driving up the unemployment figures, at a time when so much needs to be done, a particularly attractive one . . . Moreover, I am not altogether satisfied that those economists and others who argue for this course quite realize the degree of unemployment that might be necessary for this policy to prove even partially effective.

"No theory, and no juggling with totals, can detract from the simple clarity of the cost-prices spiral through which we are passing. Coal prices are up, so gas, electricity, and transport will all cost the consumer more. All these increases are in the public sector, and neither import costs nor private profits introduce complications. The higher prices themselves add up to an additional £135,000,000 to £140,000,000 a year on the bills of the consumer. The solid bulk of it is due to wage increases, either in the industries concerned or in the industry supplying materials and equipment to them.

"Let me put this matter in another way. Last year's increase in wages and salaries came to nearly £900,000,000. It is perfectly clear that the supply of things to buy with those earnings cannot possibly increase at this kind of rate. £900,000,000 is more than the country spends on all the rents and all the rates combined; it would more than buy us a second and larger Health Service than we have today; it is the equivalent of two or three Navies.

"It is quite inevitable that increases in spending power of this size are bound to be frustrated by rising prices. There simply cannot be the extra stuff to buy. We are today suffering from an internally generated price rise . . . We have even contemplated the possibility of seeking to disguise these added costs by subsidizing in one form or another the nationalized industries, or permitting them to run at a loss. But no nation really possesses the resources to fake prices upon that scale, and the attempt would lead to even greater ills."

Referring to the idea now under consideration of some impartial body to produce an independent analysis of the related problems of incomes, costs and prices, the Chancellor said: "It would not be a wages court; it would not be a supernational authority; and it would not deal with individual wage claims . . . But it may well be that it could have an important part to play in keeping before the country the essential facts of our economic position."

Mr. Thorneycroft ended by saying that all these matters should be viewed in their true perspective. "There is more sound investment going on in this country than ever before," he declared. "Our exports are holding up pretty well in world markets. Our balance-of-payments outlook, on the best estimates we can make, is not unfavourable. All these good things can be frustrated unless we can halt this continuing process of rising prices . . . The policies which the Government are pursuing in the fields of credit, expenditure and investment are well designed to keep our efforts within the limit of our resources. We intend to continue these policies. If as a nation we can match that restraint by a determination not to take out, in the shape of higher incomes, money which has not been matched by new production, stable prices are well within our reach."

Economic Debate in House of Commons.

The Chancellor's announcement of the setting-up of a Council on Prices, Productivity and Incomes was made in the House of Commons on July 25 during a debate in which Mr. Harold Wilson, on behalf of the Opposition, strongly criticized the Government's economic policy.

Mr. Harold Wilson declared that there was "unprecedentedly widespread public concern about inflation," though it was no new or sudden crisis. To some extent it had been "over-dramatized and sensationalized," but there had been in the last few weeks a sudden realization of the degree of inflation in the country, and there was a feeling that the Prime Minister's "plateau" of price stability was now lost.

Continuing, Mr. Wilson maintained that the "plateau" policy had failed because Mr. Macmillan, while appealing for wage restraint, was himself forcing wage claims by forcing up prices. Government policy had gone wrong in three ways. Firstly, they had deliberately forced prices up and "given repeated twists to inflation." They were doing this again with rents. Secondly, the Government had relied almost solely on monetary control and found that it did not work. Thirdly, they had rejected selective controls. "The Government's approach," said Mr. Wilson," is all or nothing—full steam or full stop, accelerator full throttle or the brake. We say: 'Hold back inessential investment by investment controls and actively expand essential investment by tax concessions, public investment, and so on.'"

The Government had lost the greatest asset any Government could have in dealing with inflation—the support of the T.U.C. over wage restraint. This should not be laid at the door of individual union leaders, "not even Mr. Cousins." Wages were at the centre of the problem of the "cost-push inflation spiral," and the Opposition had warned the Government time and again that their policy could only lead to greater wage demands and industrial disputes. The same measure of restraint in wages, salaries, profits, and dividends was needed to-day as Sir Stafford Cripps had called for and achieved, and it must apply to rents as well as to other forms of income. Such restraint could be fairly asked for "only by a Government that backed their appeals by the same measures of social justice as backed Sir Stafford Cripps."

Those who appealed for restraint in income must create conditions in which such an appeal must succeed. It meant (i) a greater degree of planning of national resources; (ii) planning for expansion by giving priority to essential investment; (iii) real assurances on price stability in return for wage restraint, if necessary by a temporary wage freeze; (iv) a "socially just Budget" and social security provisions, including a tax on capital gains; and (v) "a real drive against the citadels of fiscal privilege."

There was need to use physical controls to hold back unessential investment, so that an ordered expansion could be planned of the investment needed for the basic industries and exports. This would mean particularly building licensing, and perhaps control over the use of sheet steel and other scarce materials for unessential purposes. Positive measures, tax incentives, the full use of the publicly-owned industrial capacity in the Royal Ordnance factories and elsewhere, guaranteed orders, and "blanket agreements" to call forth production of the goods most required, were all needed.

Also needed was a Budget strategy which gave a genuine surplus: enough, after allowing for private savings, to meet the investment programme. All this and more could be achieved, giving justice to the old-age pensioner at the same time, not so much by raising tax rates as by widening the tax base and making an attack on evasion and avoidance, supplemented in time by the savings accruing from the national superannuation scheme. Within the Budget strategy, "conditions of social justice" should be created by taxing the forms of spendable income which were now tax-free, such as capital appreciation.

In conclusion Mr. Wilson said that monetary policy had its contribution to make as part of the system of controls, but it must be a system "reflecting the conditions of the 1950's, not the 1930's or even the 1890's." A rational and effective monetary policy need not mean high interest rates, nor should the Government rule out the possibility of a two-tier interest rate system, with a lower rate for public and essential investment. As part of such a policy for stopping the cost-price spiral, they should be prepared to consider, as a short-term measure, arrangements -by voluntary or, if necessary, statutory control- for keeping prices for a period from rising above their present level in return for real assurances about costs.

Mr. Thorneycroft said that Britain's present problem was not like the balance-of-payments problem of 1951 [under the Labour Government]. The paradox which made things so easy for critics was that the country had prosperity on the one hand, and a decline in the internal value of the currency on the other. The present external outlook was good. At one time it was thought that "we might just about break even" on the external current account from mid-1956 to mid-1957, but now it was expected that there would be a surplus of £125,000,000 or more, and there was no reason whatever why in the coming year "we should not do better still."

Mr. Thornycroft continued: "All these benefits are against a background of prosperity in Britain greater and more widespread than ever before. Look where we will, there is a vast change compared with a quarter of a century ago." There was cause for concern, however, because these advances had been matched by a steady depreciation in the value of the currency for the last 12 years.

The Government had its part to play in checking inflation, but there was "no tap in the Treasury by which it can regulate the movement of prices." If inflation was to be checked, the first essential was to have a country which really wished this to be done and was prepared to accept the discomfort of any cures that might be involved. Up till quite recently he doubted very much if this had been the case. Too many people had seen the benefits of inflation without perceiving anything of its dangers or disadvantages. Wage-earners had enjoyed their wage increases, employers had enjoyed their bigger profits, but they would not regard these things as having any connexion with the fall in the value of money, which they disliked as much as anyone else. It was "not easy to cure people of a disease they did not recognize."

In the short term they could cover investment in the basic industries without inflation, and that was "the path of financial rectitude which they would seek to go on following." In the long term it was the responsibility of the Government to make as certain as they could that the combined investment programme, public and private, did not reach the point where there was a danger of overstraining the economy and where intolerable financial difficulties arose. The Government did not intend to let that happen. It might be necessary to revise some programmes to see that too many did not reach the peak at the same moment, and they would not hesitate to make the necessary adjustments.

He did not agree with the school of thought which suggested that a solution could be found by deflation. That would demand a change of method. They could put up taxes, cut investment, make credit dearer and scarcer, organize their own slump, and force unemployment to a figure needed to end wage claims to-day. All that would be a drastic departure from the objects for which they had all been striving since the war. They had been seeking full employment in a free society, and it would be a sorry reflection on society if stable prices could only be achieved by abandoning full employment.

"In 1956," the Chancellor continued, "production was a little up." Wages and salaries were 9 per cent up on the previous year, or an increase of £900,000,000. Profits were up by 3 per cent, or about £110,000,000. Of that £110,000,000, about one-half was undistributed, and of the rest about 50 per cent was paid in taxation, leaving about £25,000,000 extra in the pockets of shareholders. Of the additional £900,000,000 in wages and salaries, rather more than £100,000,000 went in taxation, leaving between £700,000,000 and £800,000,000 in the pockets of the workers. Extra purchasing power on this scale, unmatched by increased production, must have a powerful effect on the economy. It is the equivalent of trying to run two or three additional navies; it is more than all the rents and rates in Britain, or the equivalent of another bigger and better Health Service. Since then, the last round of wage increases will add several hundred millions more.

" What we are seeing to-day is the result of wage movements over the last 18 months coming out in the form of higher prices in coal, transport, postal charges, electricity, and gas. If we seek to meet these price increases by further wage increases, it will certainly all start to happen over again. In part, these increases reflect some contribution to capital, but in the main they reflect increased wage costs. They clearly have their effect in other sectors. The steel industry is acknowledged to be very efficient; its productivity increased by 20 per cent in the five years to 1956. But even with this, cost increases could not fail to be reflected in increased prices, and to-day the chairman of the Iron and Steel Board has announced such increases.

" But one way or another, the question always comes back to how one is to approach the problem of wages. We can neither fix them nor freeze them. To seek to fix all incomes in this country is not a solution which would appeal to anyone. Nor does anyone seriously contemplate trying to freeze wages. Wages should move up in an expanding economy. Men should share the benefits of their increased production, and it is certainly not inflationary for them to do so. What has gone wrong is that we have sought to pay wages out of relation to production, and if we are to have any hope of dealing with inflation we must stop doing that.

" The role of the Government is not to interfere with collective bargaining, but it is carrying that doctrine too far to say that the Government is to be indifferent to the relation between incomes and production. It is really the task of the Government to say plainly that if higher wages are paid, unmatched in what we as a nation produce, we are deliberately creating our own inflation.

" One contribution which we think can be made, not as a solution, but as some help to this, is the establishment of an independent council on prices, productivity, and incomes—and we intend to go ahead with that. It will have the following terms of reference :

> ' Having regard to the desirability of full employment and increasing standards of life, based on expanding production and reasonable stability of prices, to keep under review changes in prices, productivity, and the level of incomes, including wages, salaries, and profits, and to report thereon from time to time.'

" I shall be announcing the names of the chairman and other members of the Council as soon as possible."

The Government hoped that the Council would create a full appreciation of the facts, both among the public and among those more immediately concerned with cost and price matters. It was not there to arbitrate; it was not a wage court; and it was not concerned with specific wage claims or disputes, like a wage-fixing body. Its purpose was to survey past experience and to deduce from it some guidance for the future. It could not concern itself with every aspect of economic policy, but it would be free to comment on general problems inside the scope of its terms of reference, such as the effect of increased costs and prices on the competitiveness of U.K. exports, on the ability of the U.K. to pay its way abroad, and on the relationship between income, profits, investment and productivity. The Government did not put this forward as a panacea, but he was confident that the body created had a useful role to play, and that those who wished to tackle inflation would co-operate with it and pay heed to its reports.

The Chancellor concluded : "Meanwhile, the policy should be plain : Government spending must be held down as it was this year, and that means some difficult decisions as the stage is set for next year's estimates. Investment over the years must be planned to match savings, and if necessary re-phased. The credit squeeze must continue so that a boom can be prevented, and that means continued pressure by the banks. And wage and profit increases must be related to production. I recognize that this means adopting on occasion an old-fashioned policy of saying ' No.' If saying ' No ' leads to some measure of disagreement, so be it. It will be better to disagree than to drift. The Government intend to press home these policies. They may be unpopular, but they are right and provide the best road yet suggested for dealing with the problem of rising prices."

Mr. Gaitskell, Leader of the Opposition, said that there were circumstances in which a Government, if they were doing the right things in other ways, might find some such body as the new Council of value; but he thought it a mistake to make it an independent council. If one wanted to get action, the best way was to get both sides of industry together, and it would have been more sensible to have allowed this to develop out of the Joint Industrial Council. Dealing with the question of the Council's independence, Mr. Gaitskell asked what sort of members were to be appointed and whether they would really be able to make genuinely independent pronouncements. If they were merely going to draw attention to the facts in the economic situation, there was no need for it since the facts were known. If they were going to offer advice on policies, he did not believe that such a body, appointed by a Conservative Government, would be independent at all.

One would have supposed (Mr. Gaitskell continued) that the Chancellor would have taken the opportunity of at least making some gesture to the unions, but one could not describe his speech as " an olive branch to the T.U.C." The T.U.C. had made it abundantly plain that if one wanted to get a combined operation, one must have policies that appealed to the organized workers. It had also made it plain that the Government never listened to what they (the T.U.C.) said, had rejected their ideas of planning, and had refused their conception of social justice. The unions could not be expected to collaborate in these circumstances. Nor could they be expected to exercise restraint in wage claims when there was no restraint on tax remissions to wealthy people.

Mr. Gaitskell continued : " The truth is that the Government are utterly bankrupt of any policy . . . Unless the Chancellor is prepared to throw overboard the doctrinaire ideas of Conservative freedom, unless he is willing genuinely to try to create a society of social justice; unless he is prepared to use fiscal policies which really attack those who get away without paying tax; unless he can introduce such measures as a capital gains tax, for which there is an overwhelming case; unless he will deal with tax avoidance, and adopt policies which unite the country, there is no chance of defeating the powerful forces of inflation." Because the Opposition believed, in view of the Chancellor's " utterly negative and complacent speech," that there was no hope of any movement in this direction, they would be obliged to divide the House.

Mr. Macmillan, replying to the debate, said that every man and woman knew that for the great mass of the people there had never been such a good time or such a high standard of living and comfort as to-day. The *Daily Herald* [the Labour Party's organ] had chosen on that very day to put an advertisement in the *Financial Times* " urging, no doubt, capitalist employers to use the *Daily Herald* as an advertising medium." The advertisement said : " Thousands of *Daily Herald* families already enjoy a car—but many, many more will be planning one in the near future, if their standard of living continues to rise at the present rate.' "

Continuing, the Prime Minister said that when he was told by some academic writers that inflation could only be cured or arrested by a return to substantial or even massive unemployment, he rejected that utterly. There could be conditions of over-employment with insufficient mobility of labour, and they must not be deterred from taking appropriate measures to control inflation because some temporary dislocation would follow. Last year, the action he took as Chancellor had had that result, and the labour released was rapidly absorbed in new work to the public benefit. If the mass of the people ever believed that there was an intention to bring about large-scale unemployment, they would set their faces, and rightly, against every reasonable and proper measure that this or any other Government might propose.

Whether it was regarded as an economic or a social problem, it was their duty to see whether they could " alleviate, perhaps cure, a disease which, although not as dramatic as that which afflicted the country before the war, might in the long run be equally pernicious." He would pledge, on behalf of the Government, that they would not shrink from any measure, popular or unpopular, which they thought might be corrective. They had the right to make this claim because they had taken many measures of this kind, including credit restrictions, cuts in Government expenditure, abolition of subsidies, the Rent Act, the attempt to reduce the cost of the Health Service, and the new defence policy, all of which was a massive contribution towards the deflation of the economy.

In six years of Labour administration the trade balance had reached a cumulative deficit of £800,000,000 in spite of import controls and rationing. When the Socialists left office the adverse trade balance had been running at the rate of £700,000,000 a year. In the following six years there had been a surplus on the trade balance of £800,000,000, achieved not by a reduction of imports but by a great increase in exports. In the last four years, dollar imports had risen by 25 per cent but dollar exports had risen by 50 per cent.

Personal savings under the Labour Administration had almost been a minus quantity, standing at £160,000,000 in 1950. In 1956 they had been £1,500,000,000. The cost of living had gone up by 20 per cent in the six years of Conservative government, whereas under Labour rule it had risen by 40 per cent.

Referring to the nationalized industries, the Prime Minister said : " We have good men in them both at the top and throughout the industries. I do not think we shall do very much by criticism of them. We must find the best men we can get and help them. But the industries are in a sheltered position. Because they are sheltered, they have a special duty not to exploit the nation."

" If the problem of inflation is to be solved," said Mr. Macmillan, " it must be by a joint operation. In a period of full employment those who advise and manage organized labour must necessarily be in a position of great power. They must also realize they have increased responsibility. If they use their strength unwisely they might easily bring about the opposite of what they are seeking. They might even bring the collapse of the structure of full employment. Instead of benefiting their members, they might bring them great injury. If they are thought to use their position unfairly against the defenceless classes, they will build up against themselves the same kind of division which many of us remember, and so deeply regret, in our country between the wars. There is a point at which no Government, of whatever complexion, can stand idly by and, in the name of impartiality, be silent witnesses to economic decline."

Mr. Martin Lindsay (C.) stated that he and two other Conservative M.P.s would not be able to support the Government in the division. In his opinion the Government had not shown adequate leadership in dealing with the problem of inflation. The Government ought to say to those who had responsibility for dealing with the matter—the employers of nationalized and private industries, and the trade unions—that they regarded it as an unpatriotic act to formulate or concede wage claims which were not related to higher production, or to increase dividends.

The Vote for the Treasury (on which the debate had taken place) was carried on a division by 304 votes to 241—a Government majority of 63.

Council on Prices, Productivity and Incomes. - Government's Consultations with Industry and Trade Unions. - T.U.C. Statement.

The plan to set up an independent national body to advise on wages, profits, prices, and productivity had first been announced by the Prime Minister in a speech at Stockton (Co. Durham) on June 1. Though wider in scope, it originated from a recommendation of the courts of inquiry into the engineering and shipbuilding industries (see 15609 A) which had suggested the establishment of an authoritative and impartial body to advise on "wider problems of wages policy in an inflationary setting."

Mr. Macmillan said that full employment demanded a sense of responsibility, a measure of reasonable restraint, and a recognition by everyone of the basic fact that "to give ourselves more money without producing more is to give ourselves nothing of any real or lasting value." He added: "This is why I have asked the Chancellor of the Exchequer and the Minister of Labour to consult with representatives of industry—masters and men—on whether an independent body might help to throw light on all the different aspects of price stability and on the need for greater productivity to earn a higher standard of living. If such a body can help us we shall do our best to get it into being. We must again and again remind ourselves of the fundamental facts of elementary economics. These are that you cannot get a quart out of a pint pot; that the source of wealth is work; that ours is a country which must live by its exports in a world of severe competition."

Mr. Thorneycroft and Mr. Macleod accordingly had discussions with representatives of the Federation of British Industries, the British Employers' Confederation, the National Union of Manufacturers, the nationalized industries, and the T.U.C. between June 6-12 and again on July 17-18.

The General Council of the T.U.C. informed the Government on July 24 that the Government's proposal for the setting-up of the new body had been "noted"; that the assurance of Ministers that the proposed body would not interfere with the present system of collective bargaining or intervene in any negotiations or disputes in industry had also been "noted"; but that the General Council "reserved their position" on the Government's proposal. At the same time the General Council issued the following statement:

"The Chancellor has consulted the T.U.C. on the proposal to set up an independent body on productivity, prices, and incomes. He has emphasized that he was not asking for approval of the establishment of the body—the responsibility for setting it up would be the Government's alone. Neither, if it were set up, was he asking the T.U.C. to say in advance that it would approve its reports. The purpose of seeking the T.U.C.'s views, and, indeed, the results expected from such a body, are far from being explicit. One impression which appears to be getting abroad is that the Government, by its proposal, is taking steps to deal with the inflationary problem and that the T.U.C., if it opposes or withholds approval, is therefore preventing or working against a solution. In other words, Press and public discussion is being focussed on the question who is for and who is against the independent body, rather than on the major question of inflation and how to deal with it . . .

"The immediate question is whether a so-called independent or impartial body is likely to settle or make any contribution toward settling the controversy. It cannot be doubted that the basic elements in this controversy concern economic, social, and Governmental policies, on which decided and fundamentally differing views are held by representative organizations, political parties, and the Government itself. Thus, the T.U.C. has made representations to the Chancellor on the occasion of all his Budgets in recent years, but scarcely any of its suggestions have been accepted. In fact, the Government, in line with its economic and social outlook, has continued to adopt policies which the T.U.C. has opposed. It cannot be denied that many of these budgetary and other Government measures have directly resulted in increased prices to be paid by the consumer for essential goods and services, and others have resulted in a diminution of the burden of taxation, mainly on higher incomes.

"During the same period, Government policy has been directed towards a loosening of the economy, permitting a general expansion of business and industrial activity regardless of its social character and its demands on our limited resources, and at other times towards a greater financial stringency without any discrimination as to its social and economic effects. In a freer economy of this kind, the T.U.C. has warned the Government of the consequential natural exercise by the trade unions of their bargaining strength in order to maintain the purchasing power of wages. Conscious of the consequences of this inter-action of the forces affecting incomes and prices, not least upon their own members, the T.U.C. has consistently appealed to the Government to use its powers to prevent unnecessary price increases and thus to set the scene for a collective effort to control these forces and encourage greater productivity.

"While the T.U.C. cannot fail to be aware from past experience of the problems of wage bargaining under conditions of full employment and the importance of maintaining a correct balance between wages and other incomes and costs and prices, it is convinced that unless national economic policy is directed towards full employment and social welfare, and the Government is demonstrably taking measures to that end, it will continue to be impossible to advocate, with any hope of success, a policy of voluntary restraint. The more the Government has yielded to the demands for a freer market economy, the less have been the chances of voluntary control and co-ordination in the wages field.

"These fundamental differences cannot be removed by the setting up of an impartial body. The danger is that they may be temporarily overlooked if attention is diverted towards an examination by such a body, and that the responsibilities of the Government, employers and trade unions, and the public generally in facing the issues of policy involved would tend to be obscured.

"The General Council therefore note the proposal of the Government to set up an impartial body to consider wages, incomes, prices, profits, and productivity. They further note the assurances of Ministers that this body will not interfere with the present system of collective bargaining or intervene in any negotiations or disputes in an industry. The General Council reserve their position on this proposal of the Government."

Higher Interest Rate on Local Loans.

In accordance with the Chancellor's announcement at the meeting of the National Advisory Council on Productivity (see above), the Treasury announced on July 12 that interest on new loans to Local Authorities by the Public Works Loan Board would be increased from July 13 as follows (existing rates in parentheses): up to five years, 5¾ per cent (5¼ p.c.); over five and up to 15 years, 6 per cent (5½ p.c.); over 15 years, 5¾ per cent (5½ p.c.).—(Times - Daily Telegraph - Manchester Guardian - Daily Herald - Financial Times) **(Prev. rep. Anti-Inflationary Policy, 15481 A; Wages, 15432 A; Local Authority Loans, 15388 B.)**

A. FRANCE. — New Information Office.

On the proposal of M. Bourgès-Maunoury, the Prime Minister, the French Cabinet decided on July 11 to set up a new French information office (*Centre de diffusion française*) for the purpose of making the French viewpoint understood throughout the world and combating the anti-French propaganda in "certain countries."

It was officially announced (1) that the *Centre de diffusion française* would have the specific task of providing information abroad on French affairs, "particularly in connexion with North Africa and the French Union"; (2) that it would be under the direct control of the Cabinet and would be headed by a diplomat; (3) that it would not be concerned with cultural relations but would have the definite mission of "combating the anti-French propaganda in certain countries and re-establishing the truth"; (4) that it would have representatives abroad who would disseminate information through the media of pamphlets, press conferences, etc.; and (5) that the *Centre* would be assisted by a consultative committee.

M. Raymond Offroy, French Ambassador in Bangkok, was appointed on the same day as head of the *Centre de diffusion française*. It was also announced that the members of the above-mentioned consultative committee would include M. Pierre Commin, assistant secretary-general of the French Socialist Party, and Senator Longchambon, president of the *Association des français à l'étranger*.—(Le Monde, Paris)

B. BRUNEI. — Constitutional Reforms.

Draft constitutional proposals for the British-protected State of Brunei, in North Borneo, were published on July 26. Drafted by the British Government in consultation with the Sultan of Brunei, they provide for the replacement of the existing 20-member State Council (a body largely recruited on a hereditary basis from the State aristocracy) by the following bodies: (1) an Executive Council consisting of the Sultan as president and 15 other members, some chosen *ex-officio* and others elected by the district councils; (2) a Legislative Council consisting of a president and 26 members (15 unofficial, six official and five *ex-officio*), including four directly appointed by the Sultan; and (3) a Privy Council, which would advise on matters of ceremonial and protocol and consist of five *ex-officio* members and others nominated by the Sultan. (Times - Manchester Guardian)

C. CANADA. — Final General Election Result.

The postponed election in Wellington South (Ontario), caused by the death of the Liberal candidate during the general election campaign, was held on July 15 and resulted in the Progressive Conservatives winning the seat from the Liberals, who had held it since 1930. The successful Conservative candidate, Mr. Alfred Hales, polled 11,606 votes against 6,121 for the Liberal candidate and 305 for a C.C.F. candidate.

Dr. W. G. Blair, Progressive Conservative M.P. for Lanark (Ontario), died on June 16, necessitating a by-election in that constituency.—(Montreal Star) **(Prev. rep. 15613 A)**

A. PAKISTAN. — Legislative Preparations for General Elections. - Joint Electorate for Whole of Pakistan. - Constitution suspended in West Pakistan. - Resignation of Dr. Khan Sahib. - New Ministry formed by Abdur Rashid Khan. - President's Rule ended in West Pakistan. - Split in Awami League. - New Political Parties.

During its April session the National Assembly of Pakistan considered several Bills relating to the preparation of general elections throughout the country in March 1958, the most important of these measures being the Electorate Amendment Bill, which introduced a system of joint electorates for both West and East Pakistan. Details of these Bills are given below :

Electorate Amendment Bill. This Bill—introduced on April 22 by Mr. Suhrawardy, the Prime Minister—abolished the separate electorate system in the Province of West Pakistan and thus amended the Electorate Act of 1956, which had provided for joint electorates in East Pakistan but for separate electorates for Moslems and non-Moslems in West Pakistan (see 15241 A).

Explaining the new measure, Mr. Suhrawardy declared that there was no justification for having two separate systems of electorates in the two parts of Pakistan, and that the introduction of a uniform system for the whole country would help to create unity and cohesion. Denying the view that the system of joint electorates was fundamental to Islam, he declared that the minorities must put their trust in the Moslems, who would " look after their interests with possibly greater zeal than they themselves will be able to do." He expressed his personal opinion that most objections to the joint electorate system in West Pakistan were due to political factors.

Mr. C. E. Gibbon, the Deputy Speaker and Christian minority representative, opposed the Bill on the ground that it would " eliminate and exterminate the minorities of Pakistan." He threatened to take the matter to the Supreme Court " or even the International Court of Justice " if the Bill was passed.

Mr. Gibbon's amendment to circulate the Bill for the purpose of showing the public that the Government had " created revolutionary conditions " was lost by 36 votes to 14 and the Bill was passed by a voice vote on April 24, receiving the President's assent on April 30.

Electoral Rolls Bill. This measure, introduced on April 9 by the Law Minister, Sardar Amir Azam Khan, regulated the qualifications of voters at national and provincial elections and the preparation of electoral rolls. Its object was to clear the way for the Election Commission to make the necessary preparations for the first general elections in the country on the basis of universal adult franchise. It also contained certain provisions regarding delimitation of constituencies.

The Bill was subsequently passed and received the President's assent on April 30.

Representation of the People Bill. This measure, introduced by Sardar Amir Azam Khan on April 15, regulated the membership of the National Assembly and the two Provincial Assemblies ; laid down the qualifications and disqualifications for membership ; defined corrupt and illegal practices and other offences in connexion with elections ; and regulated the procedure for decisions on election disputes. It laid down that the National Assembly would comprise 310 members, half of whom would be elected by West Pakistan and the other half by East Pakistan, and that the two Provincial Assemblies would also have 310 members each.

The Bill was referred to a Select Committee.

Political Developments in West Pakistan.

President Mirza suspended the Constitution of West Pakistan on March 21, and took over the government of that province, after Dr. Khan Sahib's Ministry had lost its majority in the Provincial Assembly. The President's action was approved by the National Assembly on April 13 by 47 votes to 21, and on April 16 the Assembly agreed to extend President's Rule in West Pakistan for another four months—i.e. until Sept. 30, 1957.

The crisis was caused by the decision of the Moslem League party in the Provincial Assembly to demand the breaking-up of West Pakistan into fully autonomous provinces. When a resolution on this matter was debated in the Assembly on March 20, about 30 members of the ruling Republican Party crossed the floor and joined the Opposition ; in consequence, the Government (which had previously been supported by 164 of the 305 members) lost its majority. The Speaker, however, refused to allow a vote to be taken on a motion of censure on the Government which had been moved by Sardar Bahadur Khan, leader of the Moslem League.

Following the introduction of President's Rule, consultations on the formation of a new Provincial Government took place between President Mirza, Mr. Suhrawardy, and party leaders. A solution was delayed, however, by the controversy over the proposed division of West Pakistan, to which President Mirza and Mr. Suhrawardy were strongly opposed, but on which opinion was known to be divided in all the three main parties—the Moslem League, the Republican Party, and the Awami League. Dr. Khan Sahib claimed on April 1 that he could still command a majority in the Assembly, and that he should be allowed to resume office if new elections were not held. Sardar Bahadur Khan, on the other hand, claimed that the Moslem League was in a position to form a Ministry, and denounced the suspension of the Constitution as " a step which struck at the roots of democracy."

Speaking in the National Assembly's debate on April 13, Mr. Suhrawardy explained that President's Rule had to be proclaimed in West Pakistan to bring " some stability " into the uncertain political situation in that part of the country, and also to promulgate the provincial Budget. There had not been a single party with a majority at the time, and the various groups had joined hands only to bring down Dr. Khan Sahib's Government. Commending the resolution of April 16 extending President's Rule, Mr. Suhrawardy said that the extension was needed to stabilize political life in the province, declaring in this connexion : " There was so much political dishonesty that there was no alternative to President's Rule. A time has come when we should stand for clean politics. The destiny of the people should not be played with by a handful of politicians."

The Republican Party in the Provincial Assembly, meeting at Lahore on July 2, elected Sardar Abdur Rashid Khan as its leader in place of Dr. Khan Sahib, who had expressed the desire to relinquish office. Sardar Abdur Rashid Khan was Minister of Finance and Information in Dr. Khan Sahib's Government. The meeting was attended by 148 members of the Provincial Assembly and the party claimed that another 18 members had pledged support to it in writing, thus giving it an overall majority in the Assembly.

Dr. Khan Sahib formally resigned as Chief Minister on July 7, and on July 16 advised the Governor of West Pakistan (Mr. Gurmani) to appoint Sardar Abdur Rashid Khan as his successor. On the previous day President Mirza had issued a proclamation revoking President's Rule in the province and ordering the restoration of parliamentary government. The formation of the new Provincial Ministry was completed on July 17.

Political Developments in East Pakistan.

An open split in the Awami League (the ruling party in the province) occurred during the first half of 1957 owing to sharp dissensions between Mr. Suhrawardy, the Prime Minister and all-Pakistan Convener of the League, and Maulana Bashani, its president in East Pakistan. The points at issue were the Maulana's demand for full regional autonomy for East Pakistan in internal matters and for a policy of " neutrality and independence " in foreign affairs, including Pakistan's withdrawal from the Baghdad Pact and SEATO and the rejection of foreign economic aid.

After a meeting of the East Pakistan Awami League Council on Feb. 7-8 Maulana Bashani claimed that a resolution had been passed supporting his views and condemning the Baghdad Pact, but this was completely denied by Mr. Suhrawardy as well as by Mr. Ataur Rahman, the Provincial Chief Minister. In consequence of his differences with Mr. Suhrawardy, whom he accused of violating the party constitution, Maulana Bashani resigned from the presidency of the League on March 21. Nine of his supporters on the League's Working Committee also resigned on March 31 after the Committee's majority had suspended the organizing secretary of the League, Mr. Oli Ahad, for publishing a pamphlet condemning military pacts.

At a further session of the League's Council on June 13, Mr. Suhrawardy won a decisive victory when his foreign policy, though again strongly condemned by the Maulana, was endorsed by over 700 votes to 25 ; at the same meeting the Council supported (by over 700 votes to 14) a decision by the Working Committee to expel Mr. Oli Ahad for three years.

As a counter-action the Maulana immediately invited a number of left-wing Opposition leaders from West Pakistan to visit Dacca for consultations with him. They included two leaders of the National Party (see below), Mr. G. M. Syed and Mian Iftikharuddin. In co-operation with them he appointed a committee to draft a Constitution for a new party, and subsequently called a convention of all " democratic forces " to be held in Dacca on July 25-26 for the purpose of formally setting up the new party. On the eve of this meeting, the *Ganatantri Dal* (Democratic Party, an associate of the Awami League coalition) decided to merge with the new party upon its formation. The Awami League, on the other hand, strongly dissociated itself from the convention, both Mr. Ataur Rahman and the League's general secretary (Sheikh Mujibur Rahman) publicly declaring that they did not support the Maulana.

The Maulana's new party was duly set up at the Dacca convention, assuming the name of National Awami Party and electing the Maulana as its president—a development marked by demonstrations in Dacca against the Maulana. Further disturbances occurred during a public meeting sponsored by the new party, as a result of which the East Pakistan Revenue Minister, Mr. Mahmud Ali (who belongs to the *Ganatantri Dal*) resigned in protest.

Sheikh Mujibur Rahman had resigned on May 30 as Minister of Commerce in the Provincial Ministry in order to resume his work as general secretary of the Awami League. Under the League's Constitution a party official is not permitted to be a member of the Government, and Maulana Bashani had insisted on the Sheikh's resignation from the Ministry.

Other Political Developments.

A convention of six small left-wing Opposition groups, held at Lahore from Nov. 30-Dec. 2, 1956, decided to form a new party under the name of the Pakistan National Party.

The constituent groups included the Red Shirts (led by Khan Abdul Ghaffar Khan), the Azad Pakistan Party, the Sind Awami League, and the Sind Hari Committee. The new party's manifesto urged a change in Pakistan's foreign policy by making her "free from alignment with either block." It also called for unity among the "anti-imperialist" countries, and demanded the repeal of the existing internal security legislation.

The formation of a "Kashmir Liberation Workers' Committee" was announced on April 6 by Akbar Khan, the former major-general who had been involved in the "Rawalpindi conspiracy" case and had recently become a member of the Awami League. He stated that he planned to launch a strong "internal freedom movement" in the Indian-held part of Kashmir and to achieve its aims through civil disobedience, strikes, and general non-cooperation on the pattern of the Indian "freedom struggle."

On June 18 Akbar Khan announced the formation of a new political party with the objectives of bringing Pakistan into closer relationship with the other Moslem countries, of "liberating Kashmir from Indian occupation," and of rendering assistance to the "freedom fighters in Kashmir."

National Assembly By-election.

Dr. Khan Sahib, the former Chief Minister of West Pakistan (see above), was elected a member of the National Assembly from West Pakistan on April 23. His earlier election had been declared void by the West Pakistan High Court (see 15488 D). (Dawn, Karachi - Pakistan High Commissioner's Office, London - Times) **(Prev. rep. Electoral System, 15241 A; West Pakistan, 15006 A; East Pakistan, 15143 A.)**

A. LITERATURE. — Book Selections, July, 1957.

Selected books published in Great Britain, the United States and France are given below:

Great Britain. Abraham, J. Johnston - "Surgeon's Journey: An Autobiography." (Heinemann, 25s.)

Durrell, Lawrence - "Bitter Lemons." Cyprus 1953-1956. (Faber and Faber, 16s.)

Hunt, R. N. Carew - "A Guide to Communist Jargon." (Geoffrey Bles, 15s.)

Jean-Aubry, Gérard "The Sea Dreamer: A Definitive Biography of Joseph Conrad." Translated from the French. (George Allen and Unwin, 25s.)

Kohr, Leopold "The Breakdown of Nations." (Routledge and Kegan Paul, 30s.)

Leber, Annedore—"Conscience in Revolt." 64 Stories of the German Resistance to Hitler. Translated from the German (*Das Gewissen steht auf*). (Vallentine, Mitchell, 25s.)

Maclean, Fitzroy—"Disputed Barricade: The Life and Times of Josip Broz-Tito, Marshal of Yugoslavia." (Cape, 25s.)

Ogilvie, Vivian—"The English Public School." (Batsford, 30s.)

Rolt, L. T. C.—"Isambard Kingdom Brunel: A Biography." Longmans, 25s.)

Shepherd, Gordon—"The Austrian Odyssey." (Macmillan, 30s.)

Schlesinger, Arthur M., jr.—"The Age of Roosevelt: Volume I—The Crisis of the Old Order, 1919-1933." (Heinemann, 42s.)

Taplin, Gardner B.—"The Life of Elizabeth Barrett Browning." (John Murray, 42s.)

Waugh, Evelyn—"The Ordeal of Richard Pinfold." (Chapman and Hall, 12s. 6d.)

United States. Frank, Waldo—"Bridgehead: The Drama of Israel." (George Braziller, New York, $3.75)

France. Camus, Albert—"L'exil et le royaume." (N.R.F., Paris)

(Ed. K.C.A.) **(Prev. rep. Book Selections, 15644 D.)**

B. ATHLETICS. — New World Record for the Mile.

A new world record was set up at the White City (London) on July 19 by Derek Ibbotson, of Great Britain, who ran the mile in 3 min. 57.2 sec., thereby beating the previous world record by eight-tenths of a second. Three other athletes also ran the mile in under four minutes during the same race: Roger Delaney (Eire) in 3 min. 58.8 sec., S. Jungwirth (Czechoslovakia) in 3 min. 59.1 sec., and K. Wood (Great Britain) in 3 min. 59.3 sec. The previous world record for the mile, 3 min. 58 sec., was set up by John Landy (Australia) in June 1954, only six weeks after Dr. Roger Bannister (Great Britain) had become the first man to run the mile in under four minutes. Dr. Bannister's time was 3 min. 59.4 sec.—(Times) **(Prev. rep. 13651 C.)**

C. HONG KONG. — New Governor.

It was announced on Aug. 2 that the Queen had approved the appointment of Sir Robert Black, Governor of Singapore, as Governor and Commander-in-Chief of Hong Kong in succesion to Sir Alexander Grantham, who was retiring after holding the post since 1947. (Times) **(Prev. rep. 8537 C.)**

D. UNITED KINGDOM. — Loans for British Refugees expelled from Egypt. - Government Scheme.

A scheme of *ex gratia* loans to British nationals expelled from Egypt after the Suez crisis, to meet hardship caused through being deprived of access to their assets, was announced by the Foreign Secretary (Mr. Selwyn Lloyd) on July 15.

Mr. Lloyd said that the Government had been considering whether the definition of hardship under which the Anglo-Egyptian Resettlement Board at present operated should be drawn somewhat wider to include those suffering through being deprived of access to their assets. They had decided that this could best be achieved by a scheme of *ex gratia* loans as a measure of interim assistance. Payments would be calculated on the basis of the declarations of assets registered with the Foreign Office before July 15, the scale of payments being as follows:

Reckonable assets declared	Amount of loan
Up to £2,000 ..	70 per cent. £1,400 maximum.
£2,001-£2,500 ..	£1,400 (70 per cent of first £2,000) plus £100 = £1,500.
£2,501-£3,000 ..	£1,400 (70 per cent of first £2,000) plus £200 = £1,600.
£3,001-£5,000 ..	£1,400 (70 per cent of first £2,000) plus £600 = £2,000.
£5,001-£10,000 ..	£1,400 (70 per cent of first £2,000) plus £1,300 = £2,700.
£10,001-£15,000 ..	£1,400 (70 per cent of first £2,000) plus £2,000 = £3,400.
£15,001-£20,000 ..	£1,400 (70 per cent of first £2,000) plus £2,700 = £4,100.
£20,000 and over ..	£5,000.

Assets reckonable for the purpose of the scheme would be the following tangible items: Land, buildings, furniture and personal effects, vehicles, boats, livestock, bank balances, cash deposits and securities in Egypt, articles deposited for safe keeping, indemnities, water, gas, electricity, and Customs deposits, and securities on deposit in the United Kingdom.

In making payments under this scheme, no account would be taken of the grants made previously by the Resettlement Board, nor of advances against Egyptian pensions. Loans which had been made by the Board would, however, be taken into account in calculating the amount to be loaned under the scheme. It would be for the individual himself to decide whether he was eligible for the scheme and, if so, whether he wished to take advantage of it. Once he had done so he would not normally be eligible for further help from the Resettlement Board.

Mr. Selwyn Lloyd said that applications for loans should be made to the Resettlement Board and that no-one would be asked to make any repayment until his claim had been settled by the Egyptian Government.

The first report published by the Anglo-Egyptian Resettlement Board on Aug. 1 stated that over 6,000 British refugees had arrived in the U.K. from Egypt, of whom about 2,300 were still living in hostels. Personal allowances had been made to 4,800 people; maintenance was being paid to about 550 families, and the wages of about 170 supplemented; and over 550 had been helped to emigrate. Total expenditure so far had been nearly £665,000, including £270,000 for maintaining refugees in hostels.—(Times - Daily Telegraph) **(15389 A.)**

E. INDONESIA. — National Advisory Council.

The newly created National Advisory Council was inaugurated on June 12 by President Sukarno, who assumed the position of chairman of the Council.

In his inaugural speech President Sukarno emphasized that the setting-up of the Council was not intended to diminish the authority of either Cabinet or Parliament, and that the Cabinet would remain responsible to Parliament as hitherto. The President said that the Council represented "an amalgamation of dynamic forces in society which cannot be adequately channelled through Parliament."

The Council held its first session on July 13, when it discussed the following questions: a new movement, suggested by President Sukarno a few days earlier, aiming at a "mental revolution among the people" (see below); the restoration of normal conditions in the country after the unrest of the previous six months; the creation of a National Planning Board; and the granting of autonomy to the regions.

In earlier speeches President Sukarno had suggested that the National Planning Board should not only deal with economic reconstruction and development but with every aspect of Indonesian society, and should work out definite schemes in such fields as defence and education. In other speeches delivered during a recent visit to East Java, the President had declared that it was imperative to mobilize the people for a "mental revolution" so as to abolish the "colonial way of thinking" that still prevailed among Indonesians. He emphasized that there were four crises in the country which had to be overcome by democratic means—"a moral crisis, a political crisis, a crisis of law-enforcing agencies, and a power crisis."—(Indonesian Embassy, London) **(15636 A.)**

A. EGYPT. — The Cairo Espionage Trials.

The trial was held in Cairo from May 11-30 of 11 Egyptians, eight Britons (four *in absentia*), and one Yugoslav accused of espionage activities on behalf of Great Britain. One of the Egyptians was sentenced to death, while 12 of the other defendants (nine Egyptians and three Britons) were given terms of imprisonment (in some cases with fines and/or hard labour) ranging from three to 25 years. The remaining seven defendants were acquitted.

The defendants and the sentences imposed on them were as follows :

Death. Sayed Amin Mahmoud, headmaster of a preparatory school.

25 Years. Captain Ahmed Amin Mahmoud, naval officer and son of the above; Salah Hassan Bedeir, Army mechanic; Youssef Megali Hanna, Army engineer The first two were to serve their sentences with hard labour and to pay a fine of £E.2,000 each.

15 Years. Massif Morkos Mikhail, detective, who was also ordered to pay a fine of £E.2,000.

10 Years. Mr. James Zarb, the Maltese owner of a porcelain factory; Mr. Alexander Reynolds (*in absentia*); Youssef Bedeir, an employee in Mr. Zarb's factory. Mr. Zarb and Mr. Reynolds were to serve their sentences with hard labour.

Five Years. Mr. James Swinburn, business manager of the Arab News Agency (with hard labour); Anton Yakoub Abdelmalik, journalist; Mohammed Ebeid, architect; Samuel Attiya, a former employee of the Sudan Government.

Three Years. Ahmed El Sayed Rewish, a parliamentary clerk.

Acquitted. Mr. Charles Pittuck, assistant manager of the Marconi Radio Telegraph Company of Egypt; Mr. John T. Stanley, Cairo manager of the Prudential Assurance Co.; Mr. George Sweet, Mr. John McGlaston and Mr. George Roe (all *in absentia*); Colonel Milovan Gregorovic, of the former Royal Yugoslav Army; Hussein Ali El Kashef, a guard at the Yugoslav Embassy in Cairo.

Details of the preliminary proceedings, the trial itself, and the verdict are given below under cross-headings.

The Preliminary Proceedings.

The preliminary proceedings were exceptionally protracted: firstly, because of the Anglo-French-Israeli military intervention in the autumn of 1956 and the subsequent international crisis; and secondly, because of the extensive *dossier* drawn up against the accused, running to some 1,200 pages. The prosecution took considerable time to prepare its case on the basis of this *dossier*, and the defence, on its part, was granted additional time to study it. As a result, the 16 defendants—who were arrested in August-September, 1956 (see page 15083)—had spent more than eight months in prison before the trial began. The four others, all Britons, had left Egypt in August 1956 and were tried *in absentia*.

The 16 accused first appeared in court on Oct. 18, when the bench, meeting *in camera*, reserved a decision on the Public Prosecutor's request for a further 45 days' remand in custody. The request was subsequently granted on Oct. 23. No further public reference was made to the case until Feb. 7, 1957, when the Public Prosecutor announced that he would ask for the death sentence on 11 of the accused (including Mr. Swinburn, Mr. Zarb, Mr. Reynolds and Colonel Gregorovic) and for life imprisonment (25 years) for the nine others. Severe penalties were being called for, the Prosecutor explained, because Egypt was technically in a state of war with Israel at the time when the offences were committed. The Prosecutor also announced the specific terms of the indictment against the 11 for whom the death sentence was demanded, as follows :

" They obtained in wartime data, information and documents connected with the armed forces and their movements, equipment and military operations, which are considered national defence secrets that should have been restricted . . . to the authorities concerned. This activity was carried out with the intention of delivering these secrets to a foreign country, namely Britain. They actually delivered these secrets to officials of that country and others working for it."

Some information about the " spy ring " in which the accused were alleged to have participated was made public for the first time on Feb. 8 by the Government-controlled Middle East News Agency, which stated : " The public investigating authority first learned about the spying in 1953, and some of the members were kept under surveillance from then up to the time of their arrest. The authorities took action when they learned that the ringleader, James Swinburn, planned to leave for Britain and that he was to be replaced by Charles Pittuck."

The Agency alleged that Mr. Swinburn had been instructed by the British Embassy to meet Mr. Pittuck and to introduce him to Sayed Amin Mahmoud. After saying that the three men had met at Mr. Swinburn's flat in Zamalek [a Cairo suburb] on Aug. 27, the Agency's statement continued :

" The police raided the house, arrested the trio, and seized documents in their possession. Swinburn admitted his guilt and said he had been passing information he obtained from his agents to British Embassy officials. He identified his assistants and they were all arrested and made confessions. Investigation showed that they had all been working for British Intelligence and had been supplying it with information about armed forces and political activities in Egypt and [other] Arab countries. Pittuck told the investigators that he headed the network in Swinburn's absence and had received written instructions to pass on the information he gathered to one of the two First Secretaries of the British Embassy, who were later expelled by the Egyptian Government."

The defendants made their second appearance in court on Feb. 14, when the preliminary hearings proper were due to begin. The defence, however, secured an adjournment until Feb. 25 to enable it to study the evidence against the accused. A hearing accordingly took place on the latter date, two observers being present on behalf of the British defendants—Dr. Jean Lachenal, Professor of International Law at Geneva University, whom the British Government had retained to follow the proceedings on behalf of the British defendants, and Colonel Cyril Banks, Independent M.P. for Pudsey, whom the Prudential Assurance Co. had requested to act on Mr. Stanley's behalf. Both Professor Lachenal and Colonel Banks, however, were obliged to follow the proceedings from outside the courtroom, since the proceedings were held *in camera* as on the two previous occasions.

The court reserved its decision until March 4, when it announced at a public sitting that the accused would be sent for trial at the Cairo assizes and that, with one exception (Hussein Ali El Kashef, who was granted bail), they would remain in custody. On April 13, when the trial was due to begin, the defence pleaded successfully for a postponement until May 11 to enable it to complete its study of the evidence.

The Trial.

The trial was held in public under Chief Judge Mahmoud Abdel Latif and was attended throughout by two observers for the British Government—Professor Lachenal and Mr. Edmund Davies, Q.C., Recorder of Cardiff.

Case for the Prosecution. Pleas of " not guilty " were entered by all the defendants except Mr. Swinburn and Mr. Zarb, who, after protesting that they had heard the indictment for the first time that day, and that during the whole period of their incarceration they had had hardly any opportunity to consult their lawyers, stated that they would leave it to the latter to enter pleas on their behalf. The prosecution then called its witnesses, the first of whom, a captain of the Secret Police, alleged that the " spy ring " had been in operation for 14 years. He also alleged that Mr. Swinburn " was in permanent contact with the British Embassy's intelligence officer, Oliver St. John," and that Sayed Amin Mahmoud had visited Swinburn each week in disguise to convey intelligence reports from his son, at one time A.D.C. to General Negub, the former Egyptian President. The witness made the further observation that " had it not been for the troubles with the West over the nationalization of the Suez Canal, we would not have arrested the spies at that moment. We had to arrest them because their activity became dangerous."

The chief feature of the second day's proceedings was the evidence submitted by a colonel of the Egyptian Military Intelligence department who, in support of the prosecution's contention that the information gathered by the defendants was of a secret military character, dealt with various reports and inquiries on " defence secrets " which certain of the accused were alleged to have written. Although details of these documents were not disclosed (the judge rejecting a defence request for a session *in camera* for this purpose), they were stated to concern the following matters : (1) naval manoeuvres off Alexandria (allegedly reported by Ahmed Amin Mahmoud); (2) monthly production figures of factories producing for the armed forces (allegedly reported by Salah Hassan Bedeir); (3) the information that the tank-landing ship *Akka* had been filled with explosives and sent to Port Said on Aug. 27, 1956 in order to block the Suez Canal, and that another ship, the *Sudan*, had been similarly prepared in order to block the entrance to Alexandria harbour; (4) the fact that torpedo boats were ready at Port Said " to meet the enemy "; (5) details of military equipment and repairs carried out at Kantara (allegedly reported by Youssef Megali Hanna); (6) a Syrian request to Egypt for the establishment in Syria of an aviation college for pilots and mechanics, to be run by Egyptians (alleged source as above); (7) the setting-up of an aircraft repair workshop (alleged source as above); (8) the arrival in Egypt of 12 German experts to build rockets (alleged source as above); (9) the installations of a radar base in Cairo; (10) the arrival in Egypt of 10 tank transporters; (11) the names and sites of Egyptian Army outposts.

The final prosecution speeches were made on May 13-14 and, as previously announced, called for the death sentence on 11 of the accused and life imprisonment for the remaining nine. The Chief Prosecutor told the court that the case had arisen from " an imperialist attempt to infiltrate the country " at a time when Egypt and the Arab world were " striving to assert their independence." He particularly denounced Sayed Amin Mahmoud, who, he said, had been described by his own son as a " slave and loving servant of the British " and who, he alleged, had supplied vital information to the " enemy."

The second prosecutor dealt particularly with the prosecution's contention that the information gathered was indubitably of a secret military character. In this connexion he read reports, alleged to have been compiled by Sayed Amin Mahmoud, dealing with the following subjects : the strength of the Egyptian tank corps and

uneasiness amongst its officers caused by the transfer of some of their number; the arrival of an engineering corps division near Bilbeis; mine-laying in the desert; the emplacements and strength of artillery and infantry in Cairo; the establishment of an artillery contingent using rocket projectiles; the despatch of two groups of the National Guard to a Lower Egypt garrison; and the establishment of a secret military airfield in the Nile Delta. He also gave details of documents alleged to have been written by Salah Hassam Bedeir concerning the following subjects: the arrest and exile of Gamal Salem (brother of Major Salah Salem, former Minister of National Guidance); the despatch of an Egyptian military mission to buy torpedo boats from Czechoslovakia and equipment for the Alexandria naval base from Germany and Italy; the use of Egyptian frogmen; and the naval defences of Alexandria.

The third prosecutor, speaking on May 14, said that the alleged spy network had operated by means of a "conspiratorial system of cells," the cell leaders being, he alleged, Mr. Swinburn, Mr. Zarb, and Mr. Stanley. The last official to give them directives, he went on, was Mr. Jones, a secretary at the British Embassy, and even when "the threat of war had become imminent" in view of Sir Anthony Eden's speech of Aug. 2, 1956 "announcing troop concentrations against Egypt," all the accused had continued to supply British Intelligence with military information. Of the 11 Egyptian accused, the prosecutor said that they had agreed to continue to supply information if an alleged plan to move British Intelligence headquarters from Cairo to Beirut following the deterioration of Anglo-Egyptian relations in the previous summer were put into operation. As regards Mr. Zarb, the prosecutor said that while he had confessed to having worked for British Intelligence since 1954, the prosecution had proof that he had actually done so since 1953. His main role, he alleged, had been to maintain contact with Youssef Megali Hanna, from whom he had allegedly received reports on such subjects as coastal artillery batteries, tank repairs, and the methods of making bombs at Egyptian arms factories.

Turning to the case against Colonel Gregorovic, the prosecutor alleged that the latter's specific task had been to obtain information from Soviet-bloc embassies and also to report on the contacts of Egyptian officials with these embassies. He alleged also that Colonel Gregorovic had been a factor in "inciting" Britain against Egypt, since he had reported that Egypt was "heading towards Communism." At the time of the visit of Mr. Shepilov to Cairo in June 1956 [see 14959 A], Gregorovic had allegedly reported that, on Russian advice, the Arabs proposed to form a united front to oppose the Baghdad Pact and to draw up plans for the nationalization of Middle East oil. The result of these reports "was to drive the British mad to the extent of interfering militarily against Egypt." Referring to Mr. Pittuck, the prosecutor alleged that he had agreed to supervise the "spy ring" during Mr. Swinburn's absence.

In conclusion, the prosecutor stressed the prosecution's contention that the alleged offences had been committed when Egypt was in a state of war with Israel, since, in the prosecution's belief, the armistice agreement which had been in force since 1949 did not constitute peace.

Case for the Defence. The case for the defence was presented from May 20-30. The first defence counsel maintained that the fact that the investigating authorities had allowed the alleged "spy ring" to continue to operate for three years after they had learnt of its existence was "supreme proof that their work was not important and was not considered dangerous to the State." Dealing specifically with the case against Anton Yakoub Abdelmalik, counsel said that his client had been named in a statement by Mr. Swinburn as a source for "general political and economic reports." It was true that, in the course of his freelance work for the Arab News Agency, Yakoub had supplied press reports to Mr. Swinburn, its Cairo business manager, but he had never thought it was wrong to do so, especially since the Agency was semi-official in character.

Counsel for Sayed Amin Mahmoud described the latter as a "complete fraud" who had ten wholly imaginary informants on paper, and who, after being approached by the British in 1954, had supplied them with information which was either purely imaginary or based on local newspaper reports.

Counsel for Colonel Gregorovic described him as a "number one enemy of Communism" and as "Tito's greatest enemy," who, by combating Communism in Egypt, had hoped ultimately to rid his own country of Marshal Tito. Mr. Swinburn had testified (counsel alleged) that Gregorovic had been connected since 1945 with the secret anti-Communist department of the Egyptian Ministry of the Interior, and also that he had worked for British Intelligence with the agreement of the Egyptian Government. Moreover, immediately before his arrest, Egyptian security officers had asked Gregorovic for reports on Communist activities in Egypt. Repudiating the charge that Gregorovic had communicated with a foreign power, counsel alleged that a former First Secretary of the British Embassy, Mr. J. Gove [who was declared *persona non grata* by the Egyptian Government in August 1956—see page 15083] had been the "leader of the entire network" and was "the one criminal *par excellence* in this case" and the "one source of all evil." He alleged also that Colonel Gregorovic had never been in contact with Mr. Gove, but only with the British defendants.

When the trial resumed on May 27 after a recess, counsel for Mr. Pittuck and Mr. Stanley rejected the allegation that his clients had been guilty of "criminal conspiracy." All Mr. Pittuck had done was to state, when approached by Mr. Gove, that he was willing to serve his country. When, shortly afterwards, he had allegedly received codes and instructions from Mr. Gove, he had torn them up immediately; and when he visited Mr. Swinburn's flat [where he was arrested], he did so merely to find out what services were required of him. Of Mr. Stanley, counsel said that while his client had been on friendly terms with Colonel Gregorovic and the defendant Rewish, there had never been any exchange of information or "criminal agreement" between them.

Counsel for Mr. Swinburn and Mr. Zarb dealt in particular with the prosecution's contention (on which its call for the death sentence was based) that Egypt had been at war with Israel when the alleged offences were committed. Drawing on a special thesis on the subject prepared by Professor Jean Lachenal, counsel said that, under the terms of the 1907 Hague Convention, a state of war could not exist unless a declaration of war had been made. No such declaration had been made in the case of the Egyptian-Israeli conflict. In addition, war could only take place between States, and Egypt had declared in 1948 that it was going into Palestine to fight "armed gangs" and not a State. Nor had Egypt recognized Israel as a State by the 1949 Armistice Agreement. Counsel also pleaded for leniency for his two clients on the grounds that they had made truthful confessions and that the information which they had gathered was of a trifling nature.

Counsel for Ahmed Amin Mahmoud and Massif Morkos Mikhail claimed, with regard to the former, that he was not a traitor but a patriot who had formed a *fedayeen* group in 1953 and who had been praised by Colonel Nasser's brother. He had deliberately misled the British, every one of his reports being "a web of falsehoods and imagination." Of Morkos, counsel said that he had acted legally since all his reports had dealt with Communism, to which Egypt was opposed.

The case for the defence was concluded on May 30. Counsel for Mohammed Ebeid claimed that the prosecution's contention that the accused had plotted against Egypt had been disproved by Colonel Nasser himself, who had said in an interview with an American correspondent: "The case did not constitute a plot, as the accused were only gathering information."

The final speaker for the defence (Dr. Mohammed Hashem, a former Minister of the Interior) reverted to the question of whether Egypt was at war with Israel at the time of the alleged offences. He maintained that Egypt had consistently violated international law since 1948 by acting on that false assumption. The Palestine armistice, however, was no ordinary one which could cease at any moment when either side resumed hostilities; on the contrary, it stipulated that neither party could resume warfare and was "a special form of legal international contract between two parties under the control of a third party—the United Nations."

The Verdict. The verdict (as given above) was announced on June 22. On the date originally fixed for the announcement (June 10) the presiding judge had stated that the court's decisions would not be made known until June 22 and that the papers of one of the accused (Sayed Amin Mahmoud) were being referred to the Mufti. This action indicated that it was proposed to pass the death sentence on the accused in question (the assent of the Islamic religious leader being required for such a sentence under Egyptian law), but that no other death sentences were contemplated. The Mufti's assent to the sentence was subsequently announced on June 19.

In announcing the verdict on June 22, the presiding judge said of Mr. Swinburn, the alleged leader of the group, that while the court had found him guilty of all the offences with which he had been charged, it was acknowledged that he had been truthful in most of his statements and had thus been a help in proving the charges brought against "a few traitors who do not deserve the honour of being Egyptians." In addition, he had not been paid for his work but had acted solely from motives of patriotism. For these reasons, the court had decided to be lenient with him. On the other hand, Mr. Swinburn had refused to disclose the identities of the British colleagues who took his place while he was abroad; if he had done so, he might have been acquitted. As regards Mr. Zarb, the judge said that since he had been "disloyal, dishonest and most ungrateful" towards the country which had given him life-long hospitality, since he had been paid for his work, and since he had not confessed freely, the court proposed to treat him with "appropriate severity." Of Mr. Pittuck and Mr. Stanley, the judge said that there was not sufficient evidence to establish that they had intended to commit the offences alleged against them.

Following their release from prison, Mr. Pittuck, Mr. Stanley and Colonel Gregorovic left Egypt for London on June 30.

A. MIDDLE EAST. — Indonesian Contingent withdrawn from U.N. Emergency Force.

The Indonesian representative at the United Nations (Dr. Tjondronegoro) announced on July 22 that his Government intended to withdraw the Indonesian contingent of the U.N. Emergency Force in Egypt and would be unable to provide replacements for further service. The Indonesian contingent, nearly 600 strong, had been with UNEF since the middle of January and will return to their own country under arrangements to be made by the United Nations.

A. CHINA. — President Mao Tse-tung's Speech on "Correct Handling of Contradictions among the People."

An important speech by President Mao Tse-tung on "the correct handling of contradictions among the people," delivered before the Supreme State Council on Feb. 27, was published on June 18 in a text revised and enlarged by himself. The speech distinguished between (*a*) contradictions (using the term in the Marxist sense of "conflicts of interests") between "the people" and "the enemy," which were "antagonistic," and (*b*) contradictions among "the people" themselves and between the Government and the people, which were "non-antagonistic" and could be solved by democratic methods.

Enlarging on the Chinese Communist Party's slogan, "Let 100 flowers blossom and 100 schools of thought contend," President Mao emphasized that ideological and artistic controversies should be decided through free discussion and not by "crude coercive methods," and that the Communist Party and other parties should continue to exist side by side and to exercise mutual criticism, although the "building of Socialism" and the leadership of the Communist Party must remain the two guiding and unassailable principles by which all views were to be judged. He also referred to the fact that some strikes had taken place in 1956, and commented that such disturbances, the leaders of which should not be victimized, could serve a useful purpose in drawing attention to bureaucratic mistakes. The speech is summarized below from the text brought by the *New York Times*:

Types of Contradictions. "Never has our country been as united as it is today," President Mao said. "However, this does not mean that there are no longer any contradictions in our society . . . We are confronted by two types of social contradictions: contradictions between ourselves and the enemy, and contradictions among the people . . . If we are to have a correct understanding of these two different types of contradictions, we must first of all make clear what is meant by 'the people' and what is meant by 'the enemy.' The term 'the people' has different meanings in different countries, and in different historical periods in each country . . . At this stage of building Socialism, all classes, strata and social groups that approve, support, and work for the cause of Socialist construction belong to the category of 'the people,' while those social forces and groups that resist the Socialist revolution, and are hostile to and try to wreck Socialist construction, are enemies of the people.

"The contradictions between ourselves and our enemies are antagonistic ones," he continued. "Within the ranks of the people, contradictions among the working people are non-antagonistic, while those between the exploiters and the exploited classes have, apart from their antagonistic aspect, a non-antagonistic aspect . . . Our people's Government is a Government that truly represents the interests of the people and serves the people, yet certain contradictions do exist between the Government and the masses. These include contradictions between the interests of the State, collective interests, and individual interests; between democracy and centralism; between those in positions of leadership and the led; and contradictions arising from the bureaucratic practices of certain State functionaries in their relations with the masses . . .

"The contradiction between the working class and the national bourgeoisie is a contradiction among the people. The class struggle waged between the two is, by and large, a class struggle within the ranks of the people. This is because of the dual character of the national bourgeoisie in our country . . . Exploitation of the working class to make profits is one side, while support of the Constitution and willingness to accept Socialist transformation is the other. The national bourgeoisie differs from the imperialists, the landlords, and the bureaucrat-capitalists. The contradiction between exploiter and exploited, which exists between the national bourgeoisie and the working class, is an antagonistic one. But, in the concrete conditions existing in China, such an antagonistic contradiction, if properly handled, can be transformed into a non-antagonistic one and resolved in a peaceful manner . . .

"Since the contradictions between ourselves and the enemy and those among the people differ in nature, they must be solved in different ways. To put it briefly, the former is a matter of drawing a line between us and our enemies, while the latter is a matter of distinguishing between right and wrong . . . Ours is a people's democratic dictatorship, led by the working class and based on the worker-peasant alliance . . . That is to say, democracy operates within the ranks of the people, while the working class, uniting with all those enjoying civil rights, the peasantry in the first place, enforces dictatorship over the reactionary classes and elements and all those who resist Socialist transformation and oppose Socialist construction . . .

"Certain people in our country were delighted when the Hungarian events took place," Mao Tse-tung continued. "They hoped that something similar would happen in China, that thousands upon thousands of people would demonstrate in the streets against the people's Government. Such hopes ran counter to the interests of the masses, and therefore could not possibly get their support . . . There were other people in our country who took a wavering attitude towards the Hungarian events because they were ignorant about the actual world situation. They felt that there was too little freedom under our people's democracy and that there was more freedom under Western parliamentary democracy. They ask for the adoption of the two-party system of the West, where one party is in office and the other out of office. But this so-called two-party system is nothing but a means of maintaining the dictatorship of the bourgeoisie; under no circumstances can it safeguard the freedom of the working people . . .

"While we stand for freedom with leadership and democracy under centralized guidance, in no sense do we mean that coercive measures should be taken to settle ideological matters and questions involving the distinction between right and wrong among the people. Any attempt to deal with ideological matters or questions involving right and wrong by administrative orders or coercive measures will not only be ineffective, but harmful. We cannot abolish religion by administrative orders, nor can we force people not to believe in it. We cannot compel people to give up idealism, any more than we can force them to believe in Marxism. In settling matters of an ideological nature, or controversial issues among the people, we can only use democratic methods—methods of discussion, criticism, persuasion, and education; not coercive, high-handed methods . . .

"Quite a few people fail to make a clear distinction between these two different types of contradictions, those between ourselves and the enemy and those among the people, and are prone to confuse the two. It must be admitted that it is sometimes easy to confuse them. We had instances of such confusion in our past work. In the suppression of the counter-revolution, good people were sometimes mistaken for bad. Such things have happened before, and still happen today. We have been able to keep our mistakes within bounds because it has been our policy to draw a sharp line between our own people and our enemies and, where mistakes have been made, to take suitable measures of rehabilitation."

Suppression of Counter-revolution. Turning to the question of "suppressing counter-revolutionaries," Mao Tse-tung stated that "there are some who hold somewhat different views on this question . . . Those with a rightist way of thinking make no distinction between ourselves and the enemy, and mistake our enemies for our own people . . . Those with a leftist way of thinking so magnify contradictions between ourselves and the enemy that they mistake certain contradictions among the people for contradictions between ourselves and the enemy, and regard as counter-revolutionaries people who really are not. Both these views are wrong."

Although the events in Hungary had "caused some of our intellectuals to lose their balance a bit," Mao Tse-tung continued, "there were no squalls in our country" because "we had succeeded in suppressing counter-revolution quite thoroughly . . . After the liberation we rooted out a number of counter-revolutionaries. Some were sentenced to death because they had committed serious crimes . . . Since 1956, however, there has been a radical change in the situation. Taking the country as a whole, the main force of counter-revolution has been rooted out . . . There were excesses in some cases, and in other cases counter-revolutionaries were overlooked. Our policy is: counter-revolutionaries must be suppressed whenever they are found, mistakes must be corrected whenever they are discovered . . . Decisions on exoneration and rehabilitation should receive the same measure of publicity as the original mistaken decisions."

Agricultural Co-operation. After saying that "the organization of agricultural co-operatives has been successfully completed," Mao Tse-tung observed that "certain contradictions remain to be resolved, such as those between the State and the co-operatives and those within and among the co-operatives themselves . . . On the one hand, the co-operative economy must be subject to the unified economic planning of the State, but at the same time it should be allowed to retain a certain leeway and independence of action . . . On the other hand, every household in a co-operative can make its own plans in regard to land reserved for private use and other economic undertakings left to private management, but it must comply with the overall plans of the co-operative or production team to which it belongs.

"On the question of distribution, we must take into account the interests of the State, the co-operative, and the individual. We must find the correct way to handle the three-way relationship between the tax revenue of the State, accumulation of funds in the co-operative, and the personal income of the peasant, and pay constant attention to making readjustments so as to resolve contradictions as they arise. Accumulation is essential for both the State and the co-operative, but in neither case should this be overdone. We should do everything possible to enable the peasants to raise their personal incomes year by year on the basis of increased production."

Rejecting the view that the living standards of the industrial workers, but not of the peasants, had improved, Mao Tse-tung pointed out that the country's output of food crops had risen from 105,000,000 tons in 1949 to 180,000,000 tons in 1956, whilst the State agricultural tax amounted to about 15,000,000 tons a year, in addition to about 25,000,000 tons bought from the peasants by the State. "We are prepared to stabilize over a number of years the total amount of the grain tax and the amount of grain purchased by the State at approximately something over 40,000,000 tons a year," he went on. "This will help promote the development of agriculture and consolidate the co-operatives . . . With the exception of certain peasants who grow industrial crops, all peasant households will then have reserves of food grain or at least become self-sufficient . . . It is not right to make a superficial comparison between the average annual income of a peasant and that of a worker and draw the conclusion that the one is too low and the other too high. The productivity of the workers is much higher than that of the peasants, while the cost of living is much lower for the peasants than for

workers in the cities . . . However, the wages of a small number of workers and some Government personnel are rather too high; the peasants have reason to be dissatisfied with this, so it is necessary to make certain appropriate readjustments in the light of specific circumstances."

Industrialists and Businessmen. Discussing the position of industrialists and businessmen in Chinese society, Mao Tse-tung said: "The year 1956 saw the transformation of privately-owned industrial and commercial enterprises into joint State-private enterprises, as well as the organization of co-operatives in agriculture and handicrafts as part of the transformation of our social system. The speed and smoothness with which this was carried out are closely related to the fact that we treated the contradiction between the working class and the national bourgeoisie as a contradiction among the people. Has this class contradiction been resolved completely? No, not yet. On the one hand, members of the bourgeoisie have already become managerial personnel in joint State-private enterprises, and are being transformed from exploiters into working people living by their own labour. On the other hand, they still receive a fixed rate of interest on their investments in the joint enterprises; that is, they have not yet cut themselves loose from the roots of exploitation. Between them and the working class there is still a considerable gap in ideology, sentiments, and ways of life . . .

"Even when they stop receiving their fixed interest payments and rid themselves of the label 'bourgeoisie,'" Mao Tse-tung continued, "they will still need ideological remodelling for quite some time . . . During the last few years, most of them have been willing to study and have made marked progress. Our industrialists and businessmen can be thoroughly remoulded only in the course of work; they should work together with the staff and workers in the enterprise, and make the enterprises the chief centres for remoulding themselves. It is also important for them to change certain of their old views through study. Study for them should be optional. After they have attended study groups for some weeks, many industrialists and businessmen, on returning to their enterprises, find they speak more of a common language with the workers, and so they work better together."

The Intellectuals. "China needs as many intellectuals as she can get to carry through the colossal task of Socialist construction," President Mao went on. "We should trust intellectuals who are really willing to serve the cause of Socialism, radically improve our relations with them, and help them solve whatever problems have to be solved, so that they can give full play to their talents. Many of the comrades are not good at getting along with intellectuals. They are stiff with them, lack respect for their work, and interfere in scientific and cultural matters in an uncalled-for way. We must do away with all such shortcomings . . . It is not only necessary but also possible for large numbers of our intellectuals to change their world outlook. But a thorough change in world outlook takes quite a long time, and we should go about it patiently and not impetuously. Actually, there are bound to be some who are reluctant to accept Marxism-Leninism and Communism. We should not be too exacting in what we expect of them; as long as they comply with the requirements of the State and engage in legitimate pursuits, we should give them opportunities for suitable work . . . Ideological remoulding in the past was necessary and has yielded positive results. But it was carried on in a somewhat rough-and-ready way and the feelings of some people were hurt—this was not good. We must avoid such shortcomings in the future."

National Minorities. "The people of the national minorities in our country number more than 30,000,000," Mao Tse-tung stated. "Although they constitute only six per cent of China's total population, they inhabit regions which altogether comprise 50 to 60 per cent of the country's total area. It is therefore imperative to foster good relations between the Han [Chinese] people and the national minorities. The key to the solution of this question lies in overcoming Great-Han chauvinism. At the same time, where local nationalism exists among national minorities, measures should be taken to overcome it . . . In most areas inhabited by national minorities there has been a big improvement in relations among the nationalities, but a number of problems remain to be solved. In certain places both Great-Han chauvinism and local nationalism exist in a serious degree, and this calls for close attention . . .

Tibet. "Because conditions in Tibet are not yet ripe, democratic reforms have not yet been carried out there. According to the seven-point agreement reached between the Central People's Government and the local Government of Tibet, reform of the social system must eventually be carried out. But we should not be impatient; when this will be done can only be decided when the great majority of the people of Tibet and their leading public figures consider it practical. It has now been decided not to proceed with democratic reforms in Tibet during the period of the Second Five-Year Plan, and we can only decide whether it will be done in the period of the Third Five-year Plan in the light of the situation obtaining at that time."

"Letting 100 Flowers Blossom." Discussing the slogan "Let 100 flowers blossom [a Chinese proverb] and 100 schools of thought contend," Mao Tse-tung said: "It is harmful to the growth of art and science if administrative measures are used to impose one particular style of art or school of thought and to ban another. Questions of right and wrong in the arts and sciences should be settled through free discussion in artistic and scientific circles and in the course of practical work in the arts and sciences. They should not be settled in summary fashion. A period of trial is often needed to determine whether something is right or wrong. In the past new and correct things often failed at the outset to win recognition . . . The Copernican theory of the solar system and Darwin's theory of evolution were once dismissed as erroneous, and had to win through against bitter opposition . . . That is why we should take a cautious attitude toward questions of right and wrong in the arts and sciences, encourage free discussion, and avoid hasty conclusions . . . Ideological struggle is not like other forms of struggle. Crude, coercive methods should not be used in this struggle, but only the method of painstaking reasoning . . .

"People may ask, 'Since Marxism is accepted by the majority of the people in our country as the guiding ideology, can it be criticized?' Certainly it can. As a scientific truth, Marxism fears no criticism. If it did, and could be defeated in argument, it would be worthless . . . What should our policy be towards non-Marxist ideas? As far as unmistakable counter-revolutionaries and wreckers of the Socialist cause are concerned, the matter is easy; we simply deprive them of their freedom of speech. But it is quite a different matter when we are faced with incorrect ideas among the people . . . It is not only futile but very harmful to use crude and summary methods to deal with ideological questions among the people, questions relating to the spiritual life of man. You may ban the expression of wrong ideas, but the ideas will still be there. On the other hand, correct ideas, if pampered in hothouses without being exposed to the elements or immunized from disease, will not win out against wrong ones. That is why it is only by employing methods of discussion, criticism, and reasoning that we can really foster correct ideas, overcome wrong ideas, and really settle issues . . .

"There can be no doubt that we should criticize all kinds of wrong ideas . . . But such criticism should not be doctrinaire . . . While criticizing doctrinairism, we should at the same time direct our attention to criticizing revisionism. Revisionism, or rightist opportunism, is a bourgeois trend of thought which is even more dangerous than doctrinairism. The revisionists, or right opportunists, pay lip-service to Marxism and also attack doctrinairism. But the real target of their attacks is actually the most fundamental elements of Marxism. They oppose or distort materialism and dialectics, oppose or try to weaken the people's democratic dictatorship and the leading role of the Communist Party, oppose or try to weaken Socialist transformation and Socialist construction. Even after the victory of the Socialist revolution in our country, there are still a number of people who vainly hope for a restoration of the capitalist system. They wage a struggle against the working class on every front, including the ideological front. In this struggle their right-hand men are the revisionists . . .

"How are our people to determine what is right and what is wrong in our words and actions? Broadly speaking, words and actions can be judged right if they (1) help to unite the people of our various nationalities and do not divide them; (2) are beneficial, not harmful, to Socialist transformation and Socialist construction; (3) help to consolidate, not undermine or weaken, the people's democratic dictatorship; (4) help to consolidate, not undermine or weaken, democratic centralism; (5) tend to strengthen, not to cast off or weaken, the leadership of the Communist Party; (6) are beneficial, not harmful, to international Socialist solidarity and the solidarity of the peace-loving peoples of the world. Of these six criteria, the most important are the Socialist path and the leadership of the party.

"These criteria are put forward in order to foster and not hinder the free discussion of various questions among the people. Those who do not approve of these criteria can still put forward their own views and argue their case . . . Naturally, in judging the truth of scientific theories or assessing the aesthetic value of works of art, other pertinent criteria are needed. But these six political criteria are also applicable to all activities in the arts and sciences . . .

"All that is set out above stems from the specific historical conditions in our country. Since conditions vary in different Socialist countries and with different Communist parties, we do not think that other countries and parties must or need follow the Chinese way."

"Long-term Co-existence and Mutual Supervision." Mao Tse-tung next discussed the slogan "long-term co-existence and mutual supervision," which had been coined to define the relationship between the Communist and other parties. "It is the desire of the Communist Party, and its policy," he stated, "to exist side by side with the other democratic parties for a long time to come. Whether these parties can long exist depends not merely on what the Communist Party itself desires, but also on the part played by these parties themselves and on whether they enjoy the confidence of the people. Mutual supervision among the various parties has also been a long-established fact, in the sense that they advise and criticize one another. Mutual supervision, which is obviously not a one-sided matter, means that the Communist Party should exercise supervision over the other parties, whilst other parties should exercise supervision over the Communist Party . . . For a party as much as for an individual there is great need to hear opinions different from its own . . Of course, advice and criticism exchanged between the Communist Party and the other parties will play a positive role in mutual supervision only when they conform to the six criteria given above. That is why we hope that the other parties will all pay attention to ideological remoulding."

Disturbances. "In 1956 small numbers of workers and students in certain places went on strike," Mao Tse-tung continued. "The immediate cause of these disturbances was the failure to satisfy certain of their demands for material benefits, of which some should and could have been met, while others were out of place or excessive and therefore could not be met for the time being. But a more important cause was bureaucracy on the part of those in positions of leadership. In some cases responsibility for such bureaucratic mistakes should

be placed on the higher authorities, and those at lower levels should not be made to bear all the blame. Another cause was that the ideological and political educational work among the workers and students was inadequate. In the same year members of a small number of agricultural co-operatives also created disturbances, and the main causes were again bureaucracy on the part of the leadership and lack of educational work among the masses . . .

" In handling any disturbances, we should work painstakingly and should not use over-satisfied methods or declare the matter closed before it is thoroughly settled. The guiding spirits in disturbances should not be removed from their jobs or expelled without good reason, except those who have committed criminal offences or active counter-revolutionaries, who should be dealt with according to the law. In a big country like ours it is nothing to get alarmed about if small numbers of people should create disturbances ; rather we should turn such things to our advantage to help us get rid of bureaucracy."

Industrialization. In the final section of his speech Mao Tse-tung dealt with the problems arising from China's industrialization, and emphasized the need for strict economy. " We must gradually build a number of large-scale modern enterprises as the mainstay of our industries," he stated. " Without these we shall not be able to turn our country into a modern industrial power in several decades. But the majority of our enterprises should not be built in this way ; we should set up a far greater number of small and medium enterprises and make full use of the industries inherited from the old society . . .

" Heavy industry is the core of China's economic construction. This must be affirmed. But at the same time full attention must be paid to the development of agriculture and light industry. As China is a great agricultural country, with more than 80 per cent of its population in the villages, its industry and agriculture must be developed simultaneously. Only then will industry have raw materials and a market, and only so will it be possible to accumulate funds for the building-up of a powerful heavy industry. Everyone knows that without agriculture there can be no light industry. But it is not so clearly understood that agriculture provides heavy industry with an important market. This fact, however, will be more readily appreciated as the gradual progress of modernization of agriculture calls for more and more machinery, fertilizers, water conservancy and electric power projects, and transport facilities for the farms, as well as fuel and building materials for the rural consumers.

" The entire national economy will benefit if we can achieve an even greater expansion of our agriculture, and thus induce a correspondingly greater development of light industry during the period of the Second and Third Five-year Plans. With the development of agriculture and light industry, heavy industry will be assured of its market and funds, and thus grow faster. Hence what may seem to be a slower pace of industrialization is actually not so, and indeed the tempo may even be speeded up. In three Five-year Plans, or perhaps a little longer, China's annual steel output can be raised to 20,000,000 tons or more from the peak pre-liberation output of something over 900,000 tons in 1943 . . .

" In order to transform our country into an industrial Power," he concluded, " we must learn conscientiously from the advanced experience of the Soviet Union . . . There are two different attitudes in learning from others. One is a doctrinaire attitude—transplanting everything, whether suited or not to the conditions of our country. This is not a good attitude. Another attitude is to use our heads and learn those things that suit conditions in our country—that is, to absorb whatever experience is useful to us. This is the attitude we should adopt."

The *New York Times* commented that the views expressed in President Mao Tse-tung's speech differed in four important respects from the theory and practice of the Soviet Communist Party, especially under the Stalinist regime : (1) he rejected Stalin's theory (already condemned by M. Khrushchev—see 14992 A) that the class struggle became more acute during the advance towards Socialism, and maintained that the number of " counter-revolutionaries " had decreased and that more lenient methods could be applied ; (2) he opposed the monopoly of Marxism in the ideological field ; (3) he condemned the use of coercive methods in artistic and scientific controversies in stronger terms than had been used in recent Soviet statements on this subject (see 14817 A) ; (4) he advocated the simultaneous development of agriculture and of heavy and light industry, as opposed to the theory of priority for heavy industry supported by Stalin and reaffirmed in recent Soviet Government statements.—(New York Times)

A. CEYLON. — Appointment of New U.K. High Commissioner in Colombo.

It was announced in London on July 27 that Mr. A. F. Morley, Deputy High Commissioner in Calcutta, had been appointed U.K. High Commissioner in Ceylon in succession to Sir Cecil Syers, consequent on the latter's appointment as Secretary of the University Grants Committee in place of Sir Edward Hale. The two appointments take effect at the end of 1957.

(Times) **(Prev. rep. 11456 D ; 11419 E.)**

B. JAPAN. — Reconstruction of Kishi Cabinet.

A new Cabinet—drawn, like its predecessor, entirely from the ruling Liberal Democratic Party—was formed by Mr. Kishi on July 10 and sworn in by the Emperor Hirohito on the same day. Its membership was as follows :

Mr. Nobosuke Kishi ..	Prime Minister.
Mr. Mitsujiro Ishii ..	Vice-Premier and Director of the Hokkaido Development Agency.
Mr. Aichiro Fujiyama ..	Foreign Affairs.
Mr. Hisato Ichimada ..	Finance.
Mr. Toshiki Karasawa ..	Justice.
Mr. Ito Matsunaga ..	Education.
Mr. Shigesaburo Maeo	International Trade and Industry.
Mr. Muneori Akagi ..	Agriculture.
Mr. Hirohide Ishida ..	Labour.
Mr. Kenzo Horiki ..	Social Welfare.
Mr. Ryutaro Nemoto ..	Construction.
Mr. Sannojo Nakamura	Transport.
Mr. Kakuei Tanaka ..	Postal Services.
*Mr. Juichi Tsushima ..	Director of the Defence Agency.
*Mr. Matsutaro Shoriki ..	Chairman of the National Public Safety Commission.
*Mr. Yuichi Kori ..	Director of the Local Autonomy Board.
*Mr. Ichiro Kono ..	Director of the Economic Planning Board.
Mr. Kiichi Aichi ..	Chief Cabinet Secretary.

* Ministers of State.

With the exception of the Vice-Premier (Mr. Ishii) and of Mr. Kishi himself, all the Ministers of the former Cabinet were dropped. Of the key appointments in the new Cabinet, Mr. Fujiyama (Foreign Minister) was a newcomer to active politics, while Mr. Ichimada headed the Finance Ministry in the three Hatoyama Cabinets.

Mr. Fujiyama (60), president of the Japan Chamber of Commerce until his Cabinet appointment, is a prominent industrialist and a director of many leading companies. An intimate friend of Mr. Kishi, he was not a member of any political party or of the Diet prior to his appointment as Foreign Minister ; on entering the Cabinet, however, he announced his intention of joining the Liberal Democrats and of standing for the Diet at the next general election. He is a strong advocate of the South-East Asia development plan which Mr. Kishi discussed with President Eisenhower and with a number of Asian Premiers during his recent tour (see 15658 A). The Foreign Affairs portfolio was hitherto held by Mr. Kishi concurrently with the Premiership.

Mr. Ichimada, who succeeded Mr. Ikeda as Finance Minister, is a former Governor of the Bank of Japan and has held the Finance portfolio on previous occasions as stated above. The Tokio Correspondent of *The Times* commented : " He was considered the logical candidate as successor to Mr. Ikeda in the light of the sudden critical state of Japan's oversea payments balance . . . Although Mr. Ikeda is respected as a sound orthodox economist, he was requested to give up the Finance portfolio in token of his responsibility for the country's current financial difficulties and to make way for Mr. Ichimada, whose name is associated with tight money and deflationary policies."

Among other new Ministers, Mr. Kono was one of the most influential members of the Hatoyama Government (in which he held the portfolio of Agriculture) and is also one of the leading personalities in the Liberal Democratic Party. He was the chief negotiator of the peace treaty concluded with the Soviet Union in 1956.

In a policy statement on July 10, Mr. Kishi said that his new administration would correct " any further aggravation of Japan's foreign exchange position." He emphasized Japan's desire for close co-operation with the United States and the countries of South-East Asia.—(Times - Manchester Guardian)

(Prev. rep. Cabinet, 15456 C.)

C. ITALY. — Signor Giolitti leaves Communist Party.

The Italian Communist newspaper *l'Unità* published on July 24 a letter of resignation from the party by Signor Antonio Giolitti, a nephew of the famous Italian Prime Minister, and one of the most prominent among the younger members of the Italian Communist Party.

Signor Giolitti said in this letter that as his ideas had been rejected as " unprincipled revisionism," he had lost hope of being able to discuss within the party the political and ideological problems raised by the 20th Congress of the Soviet Communist Party and by the events in Hungary and Poland. Signor Giolitti had expressed his doubts on official party policy in a book, *Reform and Revolution*, which the party had condemned as " full of social democratic banalities and bourgeois ideology."

The Chamber of Deputies rejected the proffered resignation of Signor Giolitti as a deputy on July 26, the Communists abstaining.—(Corriere della Sera, Milan) **(Prev. rep. 15399 A.)**

A. GERMANY. — Allied Declaration on German Reunification. - Offer of Security Assurances to U.S.S.R. - East German Proposal for German "Confederation." - Rejection by Federal Republic.

A 12-point declaration setting forth the common policy of the British, French, U.S., and Federal German Governments on the question of German reunification was issued in West Berlin on July 29. It was signed by the three Western Ambassadors to the Federal Republic and by Dr. von Brentano (the Federal Foreign Minister) as representing "the only Government qualified to speak for the German people as a whole." The text was as follows:

"Twelve years have elapsed since the end of the war in Europe. The hopes of the peoples of the world for the establishment of a basis for a just and lasting peace have nevertheless not been fulfilled. One of the basic reasons for the failure to reach a settlement is the continued division of Germany, which is a grave injustice to the German people and the major source of international tension in Europe.

"The Governments of France, the United Kingdom and the United States, which share with the Soviet Union responsibility for the reunification of Germany and the conclusion of a peace treaty, and the Government of the German Federal Republic, as the only Government qualified to speak for the German people as a whole, wish to declare their views on these questions, including the question of European security, and the principles which motivate their policies in this regard:

(1) A European settlement must be based on freedom and justice Every nation has the right to determine its own way of life in freedom, to determine for itself its political, economic and social system, and to provide for its security with due regard to the legitimate interests of other nations. Justice requires that the German people be allowed to re-establish their national unity on the basis of this fundamental right.

(2) The reunification of Germany remains the joint responsibility of the four Powers who in 1945 assumed supreme authority in Germany, a responsibility which was reaffirmed in the directive issued by the four Heads of Government in Geneva in July, 1955. At the same time the achievement of German reunification requires the active co-operation of the German people as a whole under conditions ensuring the free expression of their will.

(3) The unnatural division of Germany and of its capital, Berlin, is a continuing source of international tension. So long as Germany remains divided, there can be no German peace treaty and no assurance of stability in Europe. The reunification of Germany in freedom is not only an elementary requirement of justice for the German people but is the only sound basis of a lasting settlement in Europe.

(4) Only a freely elected all-German Government can undertake, on behalf of a reunified Germany, obligations which will inspire confidence on the part of other countries and which will be considered just and binding in the future by the people of Germany themselves.

(5) Such a Government can only be established through free elections throughout Germany for an all-German National Assembly.

(6) There should be no discrimination against a reunified Germany. Its freedom and security should not be prejudiced by an imposed status of neutralization or demilitarization. Its Government should be free to determine its foreign policy and to decide on its international associations. It should not be deprived of the right, recognized in the U.N. Charter, for all nations to participate in collective measures of self-defence.

(7) Re-establishment of the national unity of Germany in accordance with the freely expressed wishes of the German people would not in itself constitute a threat to Germany's neighbours, nor would it prejudice their security. Nevertheless, to meet any preoccupation which other Governments may have in this respect, appropriate arrangements, linked with German reunification, should be made which would take into account the legitimate security interests of all the countries concerned. It was for this reason that, at the Geneva Foreign Ministers' Conference, the Western Powers made proposals for a treaty of assurance on the reunification of Germany.

(8) The Western Powers have never required as a condition of German reunification that a reunified Germany should join the North Atlantic Treaty Organization. It will be for the people of a reunified Germany themselves to determine through their freely elected Government whether they wish to share in the benefits and obligations of the treaty.

(9) If the all-German Government, in the exercise of its free choice, should elect to join NATO, the Western Powers . . . are prepared to offer, on a basis of reciprocity, to the Government of the Soviet Union and to other countries of Eastern Europe which would become parties to a European security arrangement, assurances of a significant and far-reaching character. The Western Powers are also prepared, as part of a mutually acceptable European security arrangement, to give an assurance that, in the event of a reunited Germany choosing to join NATO, they would not take military advantage as a result of the withdrawal of Soviet forces.

(10) But the Western Powers could not contemplate that the existence of NATO itself should constitute the subject of negotiations.

(11) The reunification of Germany, accompanied by the conclusion of European security arrangements, would facilitate the achievement of a comprehensive disarmament agreement. Conversely, if a beginning could be made towards effective measures of partial disarmament, this would contribute to the settlement of outstanding major political problems such as the reunification of Germany. Initial steps in the field of disarmament should lead to a comprehensive disarmament agreement, which presupposes a prior solution of the problem of German reunification. The Western Powers do not intend to enter into any agreement on disarmament which would prejudice the reunification of Germany.

(12) Any measures for disarmament applicable to Europe must have the consent of the European nations concerned and take into account the link between European security and German reunification."

The declaration concluded "The four Governments continue to hope that the Soviet Government will come to recognize that it is not in its own interest to maintain the present division of Germany. The Western Powers are ready to discuss all these questions with the Soviet Union at any time that there is a reasonable prospect of making progress. At such time there will be many points relating to the procedure for German reunification and the terms of a treaty of assurance which will require to be worked out by detailed negotiation. In advance of serious negotiations, the Western Powers cannot finally determine their attitude on all points. Nor can they contemplate in advance the making of concessions to which there is no present likelihood of response from the Soviet side.

"If negotiations are to be fruitful, both sides must approach them in a spirit of accommodation and flexibility. Through this declaration the Western Powers, in full accord with the Federal Republic, wish again to manifest their sincere desire to enter into negotiations with the Soviet Union in order to reach a European settlement and to give evidence that the paramount objective of their policy is the attainment of a just and lasting peace."

Two days before the Allied declaration was issued, the Prime Minister of Eastern Germany (Herr Grotewohl) had sent a memorandum to all diplomatic representatives accredited to the German Democratic Republic proposing that the two German States should enter into a contractual relationship as a "confederation," while at the same time retaining their present administrative arrangements. Herr Grotewhol laid down the following conditions as pre-requisites for such a "confederation": (1) the Federal Republic should withdraw from NATO and the Democratic Republic from the Warsaw Pact, armed forces in both parts of Germany should be strictly limited, and conscription should be abolished in the Federal Republic; (2) both German States should request the great Powers to arrive at a common agreement for the phased withdrawal of their forces from German territory; (3) no nuclear weapons should be stored in any part of Germany and all "nuclear war propaganda" should be strictly forbidden.

Herr Grotewohl reiterated the Soviet thesis that reunification could not be achieved through free all-German elections but only through a gradual *rapprochement* between Eastern and Western Germany. He proposed that the "confederation" should be established by treaty between the two German Governments, and that it should take the form of an All-German Council, recruited from both German Parliaments, which would endeavour to achieve conformity in matters of trade, currency, transport and communications, the status of Berlin, and other matters of common concern. This Council would be an advisory body and would make recommendations to both German Governments, which could accept or reject them. The lifting of the ban on "democratic organizations" in Western Germany —i.e. the West German Communist Party and the Communist-controlled "Free German Youth" organization was among the conditions mentioned by Herr Grotewohl as a pre-requisite for an all-German "confederation."

The East German proposals were rejected out of hand by all parties in the Federal Republic. Dr Adenauer, in a statement on July 28, said that Herr Grotewohl's proposals for a "confederation" between Eastern and Western Germany was "absolutely out of the question" and that the Federal Government could never agree to a step which would "strengthen the slavery of 17,000,000 people in the Soviet zone."

The Soviet Tass Agency described the four-power declaration on German reunification as "another scrap of paper added to the documents on the German question." It said that the Western Powers, "realizing that their proposals on the German question are unacceptable, want to exploit them as a counter-move to the Soviet disarmament proposals."

B. UNITED KINGDOM. — National Research Development Corporation. - New Chairman.

The Board of Trade announced on July 21 that Mr. W. R. Black had been appointed chairman of the National Research Development Corporation, in succession to the late Sir Alan Saunders. Mr Black is managing director of Associated Commercial Vehicles Ltd.—(Times - Daily Telegraph)

(Prev. rep. 11196 A.)

AUGUST 3—10, 1957

A. MALAYA. — Final Agreement on Malayan Independence. - New Constitution of the Federation of Malaya. - Acceptance by British and Malayan Parliaments and Malay Rulers. - Ruler of Negri Sembilan elected First Head of State.

An agreement ending the 83-year period of British indirect rule in Malaya, and also terminating direct British sovereignty over the former Straits Settlements of Malacca and Penang, was signed in Kuala Lumpur on Aug. 5 by Sir Donald MacGillivray (the High Commissioner) and the Rulers of the Malay States, in the presence of the Chief Minister of the Federation (Tengku Abdul Rahman) and members of the Federation Cabinet. Constituting the last formality before the achievement of Malayan independence within the British Commonwealth, it revoked all previous agreements between Britain and Malaya and will come into force on Merdeka Day (i.e. Independence Day)—Aug. 31, 1957.

The agreement was concluded between H.M. the Queen on the one hand and the Rulers of the Malay States on the other, including the minor chiefs of the State of Negri Sembilan (which is a confederacy of small states). Replacing the Federation of Malaya agreement signed in 1947, it says in part:

"Whereas it has been represented to her Majesty and their Highnesses and the ruling chiefs of Negri Sembilan that fresh arrangements should be made for the peace, order and good government of the territories within the Federation, and her Majesty and their Highnesses and the said ruling chiefs have agreed that the Federation should become an independent country within the Commonwealth ... it has been agreed that the [Straits] Settlements should cease to form part of her Majesty's dominions and that all power and jurisdiction of her Majesty or of the British Parliament in or in respect of the Settlements or the Malay States or the Federation as a whole should come to an end."

The above-mentioned agreement had been preceded by the publication on July 3 of the new Constitution of the Federation of Malaya, based largely on the recommendations of the Constitutional Commission headed by Lord Reid (see 15454 A), but differing from them in a number of important respects. After discussions in London between Mr. Lennox-Boyd (the U.K. Colonial Secretary) and Tengku Abdul Rahman, the new constitution was approved both by the British Parliament and the Federation Parliament. These and other recent developments in connexion with Malayan independence are described below under cross-headings:

New Constitution of the Malayan Federation.

The White Paper on the new Constitution (Cmd. 210), issued on July 3, explained that while the constitutional proposals were based on the recommendations of the Reid Commission, those recommendations had nevertheless "undergone changes both in substance and form" as a result of subsequent agreement between the British and Federation Governments. The more important of these changes were set forth in the White Paper, as summarized below:

Head of State. The Head of State of the Malayan Federation would be known as the *Yang di-Pertuan Agong* (not *Yang di-Pertuan Besar* as proposed by the Reid Commission). He would be elected for a five-year term by the Malay Rulers from among their number, and would be succeeded in rotation by the Rulers of other States on a basis of seniority, as recommended by the Reid Commission. In matters other than those within his discretion, he would act in accordance with the advice of the Federation Cabinet or of a Minister acting under the Cabinet's general authority. He would appoint the Cabinet—which would be collectively responsible to Parliament—on the advice of the Prime Minister (*Perdana Mentri*). All Cabinet Ministers would have to be members of one or other of the two Houses of Parliament. The Head of State would appoint as Prime Minister a member of the House of Representatives who, in his opinion, was capable of commanding the confidence of that House.

The Malayan Parliament. The Federation Parliament (*Majlis*) would consist of a Senate (*Dewan Negara*) and a House of Representatives (*Dewan Ra'ayat*). The Senate would have 38 members, of whom 22 would be elected (two from each State) and 16 would be appointed by the *Yang di-Pertuan Agong*. [The Reid Commission proposed that 11 Senators should be appointed by the Head of State.] The 16 nominated members would be chosen from persons who had achieved distinction in the professions, commerce, industry, agriculture, cultural activities, or social services, or who were representative of racial minorities or capable of representing the interests of aborigines (the primitive Semang, Sakai and Jakun peoples, living in remote jungle areas). The Senate would be presided over by a President (*Yang di-Pertua Dewan Negara*) chosen from among its members. Senators would have to be not less than 30 years of age.

The House of Representatives would have eventually 100 members (at first 104), elected in single-member constituencies by citizens who must have attained the age of 21, which would also be the minimum age for election to the House. The Speaker of the House (*Yang di-Pertua Dewan Ra'ayat*) would be chosen from among its own members.

KANSAS CITY MO. PUBLIC LIBRARY

Subjects for legislation were set out in a Federal List (i.e. legislation reserved to the Federation Parliament), a Concurrent List (i.e. matters on which both the Federal and the State Parliaments could legislate), and a State List (i.e. legislation reserved to the States). Federal law would prevail in the event of any inconsistency which might arise. Residual legislative power would rest with the States.

Citizenship. In conformity with the Reid Commission's recommendations, Malayan citizenship would be possessed by (*a*) all persons born in the Federation before Merdeka Day (Aug. 31, 1957), provided they had lived in the Federation for five out of the last seven years; and (*b*) persons who were living in the Federation on Merdeka Day but who were not born there, provided that such persons had lived in Malaya for eight out of the last 12 years. Under a new provision, however, the responsible Minister would decide at his own discretion in each individual case whether citizenship should be conferred on persons eligible in the latter group.

On the question of dual (i.e. Commonwealth) citizenship, it was laid down that "every person who is a citizen of the Federation will enjoy, by virtue of that citizenship, the status of a Commonwealth citizen in common with the citizens of all other Commonwealth countries"

Special provision was made for citizens of the U.K. and Colonies, including particularly the inhabitants of the former British Settlements of Malacca and Penang—the "Queen's Chinese," whose association with Britain dates back 150 years. Under the Constitution, they will retain their former status as citizens of the U.K. and Colonies but may apply for Malayan citizenship (if entitled to register as Federation citizens) within one year of Merdeka Day.

Judiciary. The Reid Commission's proposals on the Malayan judiciary were revised in certain respects "to maintain the independence of the judiciary from the executive and legislative authorities." As proposed by the Commission, the Supreme Court judges will be appointed by the Head of State, but the latter will have the obligation to consult the Rulers, the Prime Minister, and a Judicial and Legal Service Commission [a body not envisaged in the Reid report] before making such appointments. Whereas the Reid Commission had proposed that a judge could be removed from office by order of the Head of State, with parliamentary approval, the Constitution laid down that an independent judicial tribunal would be set up to consider any such case.

Malay Rights. A number of modifications were made to the Reid proposals with the aim of safeguarding the future economic position and prerogatives of the Malay population—a matter on which the Malay representatives had been particularly insistent since the publication of the Reid report. It was laid down that the Head of State, acting on the advice of the Cabinet, would have responsibility for reserving to the Malays a reasonable number of positions in the Public Service, education, business life, etc. Whereas the Reid Commission had proposed that these prerogatives should be reviewed after 15 years in "the appropriate legislature," the final constitutional text laid down that it would rest with the various State Rulers to keep a just balance between Malays and non-Malays.

Moreover, the Constitution laid down that Malay land reservations could only be cancelled if both the Legislative Assembly of the State affected and both Houses of the Federal Parliament agreed to such action by a majority of their members, and by the votes of not less than two-thirds of the members present and voting. The Reid proposals would have left this matter to the decision of the State Legislative Assembly alone.

Language. In conformity with the Reid proposals, Malay would be the official language of the Federation; English would also remain an official language for 10 years after independence, and "thereafter until Parliament otherwise provides." On the other hand, the Reid Commission's proposal that Chinese and Tamil should also remain official languages for ten years after independence was rejected. With the apparent aim of reassuring the non-Malays, however, it was laid down that no obstacles would be placed in the way of using (other than for official purposes), learning or teaching any language other than Malay.

Religion. The Constitution laid down that Islam would be the official religion of Malaya—thereby ignoring the majority recommendation of the Reid Commission, which had expressed the view that the new Constitution should contain no reference to a State religion. Every citizen, however, would be free to profess, practise and propagate his own religion, though the last-mentioned right would be "subject to any restriction imposed by State law relating to the propagation of any religion, doctrine or belief among persons professing the Moslem religion." It was stated that the proclamation of Islam as the State religion would "in no way affect the present position of the Federation as a secular State."

Tengku Abdul Rahman, accompanied by other Malayan ministers, had previously visited London from May 13-21 for discussions with Mr. Lennox-Boyd on the final details of the Constitution. Full agreement was reached in these talks, which were held at the Colonial Office under Mr. Lennox-Boyd's chairmanship. On his return to Kuala Lumpur, Tengku Abdul Rahman held a press conference on June 3 at which he explained that the question of dual (Commonwealth) citizenship had been one of the principal subjects discussed in London.

The Chief Minister explained that after Merdeka Day there would be only one loyalty in the Federation, and anyone taking an oath of Federal citizenship would have to renounce allegiance to any other country. Because Malaya would be a member of the British Commonwealth, all Malayan citizens would also enjoy Commonwealth citizenship. If, however, a citizen voluntarily claimed and acquired the right and privileges of any other country, he could be deprived of Federation citizenship. "If he [a Malayan citizen] goes to China and there exercises the rights of a Chinese, we can deprive him of Federal citizenship," the Chief Minister explained. "If British law says that only British-born citizens of the U.K. can exercise the right to be a Member of Parliament, and a Malayan citizen goes there and becomes an M.P., we can deprive him of Federal citizenship . . ."

In addition to his discussions with Tengku Abdul Rahman and the official Malayan delegation, Mr. Lennox-Boyd also heard the views of unofficial Malay and Chinese delegations which visited London to raise objections to various constitutional provisions relating to citizenship, the franchise, religion, the status of the different languages, and other matters.

The unofficial delegations represented Malay and Chinese groups opposed to the two main parties supporting the Federation Government—the United Malays National Organization (U.M.N.O.) and the Malayan Chinese Association (M.C.A.). Both delegations asserted that the constitutional proposals contained insufficient guarantees for their respective communities, the unofficial Malay delegation expressing particular opposition to the concept of dual citizenship and demanding that there should be only one citizenship for the Federation. Mr. Lennox-Boyd promised that these viewpoints would be taken into consideration as far as possible.

Constitution accepted by Federation Parliament and Malay Rulers. - Election of First Head of State.

A motion approving the new Constitution, moved by Tengku Abdul Rahman, was unanimously adopted on July 11 by the Legislative Assembly in Kuala Lumpur after a 12-hour debate.

The Chief Minister paid high tribute to Britain for guiding Malaya toward independence; stressed the cordiality and friendship which had characterized the negotiations; and expressed his conviction that relations between Britain and independent Malaya would remain "as cordial and helpful as they are today." In a tribute to the part played by the British people in Malaya, he said: "They have devoted their lives to the advancement of this country. Whatever their faults have been, they have made Malaya the prosperous and happy place it is today." He added: "I believe that we are able to stand on the threshold of independence only because of the tolerance of our plural community, their friendly attitude toward one another, and their acceptance of Malaya as an object of their absolute loyalty."

Nearly all the speeches welcomed the constitutional proposals as representing a fair, reasonable and workable compromise, though various objections were raised on matters of detail. The only overt criticism came from a few nominated Chinese members, led by Mr. S. M. Yong, who alleged that the constitutional proposals relating to citizenship by birth and residence would have the effect of making the Malayan Chinese "second-class citizens" *vis-à-vis* the Malays. Exception was also taken to the refusal to recognize Chinese as an official language. These criticisms were strongly repudiated by a number of other Chinese members, including the Minister of Transport (Mr. Ong Yoke Lin) and the Minister of Health (Mr. Leong Yew Koh), both of whom stressed that the constitutional proposals had the unanimous support of the Malayan Chinese Association.

The Rulers of the Malay States, who had unanimously accepted the Constitution on June 27, met at Kuala Lumpur on Aug. 4 to elect the first Head of State of the Malayan Federation (*Yang di-Pertuan Agong*). The election was made from among the nine Rulers by a combination of seniority (according to dates of accession) and the preference of the Rulers themselves, the choice eventually falling on the Ruler of Negri Sembilan, Sir Abdul Rahman.

The Sultan of Johore, though much the most senior of the Rulers, did not offer himself for election and was not personally present, his proxy being exercised by the Sultan of Kelantan. Accordingly, the Rulers first considered the candidacy of the Sultan of Pahang, as the second in seniority after the Sultan of Johore, but only three of the nine votes were cast in his favour. On the second ballot the Rulers voted on the claims of the Ruler of Negri Sembilan, who received eight votes and was therefore declared elected. The Sultan of Selangor (Sir Hisamuddin Alam Shah) was elected deputy Head of State.

Sir Abdul Rahman (62) was called to the Bar by the Middle Temple in 1928, and was a magistrate as well as an acting district officer before succeeding his father in 1933. He presided over each conference of Rulers held to discuss the new Constitution for an independent Malaya.

British Legislation. - The Federation of Malaya Independence Act.

The Federation of Malaya Independence Bill, providing for the establishment of the Malayan Federation as an independent sovereign State within the Commonwealth, was enacted on July 31 after an unopposed passage through both Houses of the British Parliament.

The Bill, a short measure of four clauses and two schedules, provided (1) for the approval of the constitutional arrangements set out in the White Paper, and for the implementation of the new Malayan Constitution by Order-in-Council on the "appointed day" (Aug. 31, 1957); (2) that existing legislation in the Federation would remain in force until amended or repealed; (3) that the Colonial Development and Welfare Acts would cease to apply to the Federation as from the "appointed day," except for schemes already undertaken at that date; (4) that the Judicial Committee of the Privy Council would have jurisdiction to hear appeals from the Supreme Court of the Federation, in accordance with arrangements to be reached between H.M. the Queen and the Head of State of the Federation.

[Neither the Bill nor the White Paper dealt with future defence arrangements, which will be the subject of a special treaty to be concluded with the Federation Government on the lines of the provisional agreement announced on Jan. 10 - see page 15455.]

The Bill was moved on second reading (July 12) by Mr. Lennox-Boyd, and was welcomed by Mr. James Griffiths (Lab.) on behalf of the Opposition.

Mr. Lennox-Boyd said that the long and honourable association that had existed between Britain and Malaya in the past would be continued in the future, though in a new form. The Constitution represented a genuine compromise between the different sections of the population; the citizenship proposals were "a triumph of good sense and tolerance"; and a fair balance had been struck between Malays and Chinese. Economic viability was an essential prerequisite for political independence, and Malaya, with her up-to-date rubber and tin industries, would have little difficulty in standing on her own feet both economically and financially were it not for the emergency.

As Malaya could not be expected to stand alone in her share of the fight against international Communism, she would receive from Britain up to £20,000,000 during the five-year period 1957-61 to help her combat the emergency. Terrorism, though greatly reduced, still existed, and it would be combated until finally extirpated. Special arrangements would be made with regard to the participation of British forces in anti-terrorist operations after Aug. 31, 1957. The Federation Ministers were fully alive to the danger that the Communist terrorists might seek to achieve by other means what they had failed to do by force, and economic development would be one of the weapons employed in combating terrorism.

On the financial side, Malaya had made an important contribution to the stability of the sterling area, and intended to maintain her connexion with it. She was resolved to order her policy in conformity with the principles of membership of the sterling area, and would continue to enjoy access to the London market for raising loans. As regards defence, negotiations were in progress between the British and Federation Governments and an agreement was being prepared which fully recognized the independence of Malaya and in no way derogated from her sovereignty.

Referring to the former Straits Settlements, Mr. Lennox-Boyd pointed out that the Bill provided *inter alia* for the relinquishment of the Queen's sovereignty over Malacca and Penang, and their incorporation as new States. Accordingly, they would enter the Federation as equal partners with the other Malay States on Merdeka Day, and would be within the Commonwealth like the rest of Malaya. He concluded. "In commending the Bill to the House, I should like, as the last Colonial Secretary who will have responsibility for Malaya, to reaffirm our trust in the leaders of Malaya and our confidence in the future of their country."

Mr. Griffiths said that the Bill provided an opportunity to establish a strong, viable, democratic State which would be of immense influence in a crucial part of the world. A complicated Constitution had been introduced, and the House must ensure that the rights and autonomy of the different States were preserved in such a way that this did not prevent the working of a strong and viable Federal Parliament. For this reason he thought it would have been wise had provision been made for the revision of the Constitution after 15 years. After regretting that Malaya had to begin her independence with the emergency still in existence, Mr. Griffiths said that there could no longer be any pretence by the Communists that they were "fighting imperialism."

Mr. Creech Jones (Lab.)—a former Colonial Secretary, like Mr. Griffiths—urged a "generous approach" to Malaya's financial difficulties, and asked Mr. Lennox-Boyd to reconsider the cutting-off of Colonial Development and Welfare grants to Malaya.

Mr. Alport (Under-Secretary, Commonwealth Relations Office) said that the outstanding allocation of Colonial Development and Welfare grants, totalling some £4,300,000, would remain available to complete the various projects in Malaya for which the money had been allocated. Of this amount, £300,000 would be used to complete the construction of the University of Malaya. The Malayan Federation would also remain eligible for technical assistance under the Colombo Plan after Merdeka Day.

In the House of Lords, where the Bill was given a second reading on July 29, the principal feature of the debate was a complaint by Lord Reid (chairman of the Reid Commission, and a leading constitutional lawyer) at the alterations and amendments which had been made to the report presented by his Commission. "In the interest of the reputation of my distinguished colleagues," he declared, "I disclaim all responsibility for the present form of the Constitution."

Lord Reid complained that the draft presented by his colleagues and himself had been extensively altered, and asserted that many of the changes " did not make a ha'porth of difference " and tended towards obscurity and not clarity. " The drafting of this Constitution," he added, " falls far short of the high standard the House is accustomed to in Government Bills of this kind."

Lord Ogmore, from the Opposition front bench, said that although Lord Reid and his colleagues had worked for eight months on their report, the White Paper did not even mention them and had even " insulted " them by speaking of the removal of " ambiguities and inconsistencies " in the report and of " improving its form." He added : " Considering that these [the members of the Reid Commission] were some of the most eminent jurists in the Commonwealth, it was cheek of someone preparing the White Paper in the Colonial Office to treat the report in that way."

Lord Perth (Minister of State for the Colonies) said that the Government had not intended to suggest that the Reid report contained ambiguities. He regretted that Lord Reid should have been " upset," and he could " only hope that the Parliamentary draughtsman, in whom I have full confidence, and Lord Reid will both prove to be right and that the new Constitution will work. We all know that the spirit is more important than the words."

Malayan Diplomatic Appointments. - New British High Commissioner in Malaya.

Tengku Abdul Rahman announced on July 3 that Dato Nik Ahmed Kamil bin Haji Mahmoud, Malayan Commissioner in Canberra [see page 15154], had been appointed the first Malayan High Commissioner to the United Kingdom. The Tengku also announced the following appointments: (i) Dr. Ismail bin Dato Abdul Rahman, Minister for Commerce and Industry, as Malayan Ambassador in Washington, permanent representative to the United Nations (if Malaya was accepted as a U.N. member), and " roving envoy " with the rank of Minister without portfolio; (ii) Mr. Gunn Lay Teik, former Government Chemist, as High Commissioner to Australia *vice* Dato Nik Kamil; (iii) Inche Othman bin Mohammed, the present Malayan Commissioner in London, as Permanent Secretary to the Ministry of External Affairs; and (iv) Inche Bahadon bin Haji Hassan, former Deputy Chief of Police in Trengganu, as Chargé d'Affaires in Bangkok.

It was announced in London and Kuala Lumpur on May 22 that Mr. Geoffrey William Tory (44), U.K. Deputy High Commissioner in Australia, would become the first British High Commissioner to the independent Malayan Federation on Aug. 31, 1957, when the present High Commissioner (Sir Donald MacGillivray) would leave Malaya. Mr. Tory was Counsellor at the British Embassy in Dublin and Deputy High Commissioner in Pakistan before taking up his present appointment in Australia.

New Director of Emergency Operations.

The Federation Government announced on July 22 that Lieut.-General Sir Archibald Cassels, Director-General of Military Training at the War Office, would succeed Lieut-General Sir Roger Bower as Director of Emergency Operations against the terrorists on Aug. 31, 1957. General Cassels would be directly responsible to the Malayan Government, which would pay his salary, and would co-ordinate the operations of the Federation Army and of the British, Gurkha and Commonwealth contingents in Malaya.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Malaya, 15454 A.)**

A. CANADA. — Diplomatic Appointments.

Mr. Diefenbaker, the new Canadian Prime Minister, announced on June 25 that Mr. George Drew (63), the former leader of the Progressive Conservative Party and previously Premier of Ontario, had been appointed Canadian High Commissioner in London in succession to Mr. Norman Robertson. The appointment of Mr. Robertson as Canadian Ambassador in Washington, in succession to Mr. Arnold D. P. Heeney, had been announced on March 15.

It was stated in Ottawa that Mr. Drew had recovered from the illness which had caused his resignation from the leadership of the Progressive Conservative Party in the autumn of 1956.

Other recent Canadian diplomatic appointments were: (*a*) Mr. I. S. MacDonald, Ambassador in Belgrade, as the first Canadian Ambassador to Austria, following the raising of the respective Legations to Embassy status; (*b*) Mr. Arthur Irwin, previously High Commissioner in Canberra, as Ambassador to Brazil (both announced in September 1956); (*c*) Mr. Arnold M. MacDonnell, Deputy Under-Secretary for External Affairs, as Ambassador to Egypt and Minister to the Lebanon in succession to the late Mr. E. H. Norman (see 15524 A); (*d*) Mr. Evan Gill, High Commissioner in Pretoria, as Canada's first High Commissioner to Ghana (both May 22, 1957). (Department of External Affairs, Ottawa - Montreal Star)

(Prev. rep. 14924 C; Mr. Drew, 15152 D.)

B. UNITED KINGDOM. — £1,750,000 Appeal by Oxford University for Repairs to Historic Buildings.

An appeal for £1,750,000—to be raised within 10 years— to repair, restore and preserve the historic buildings of the University of Oxford was launched on June 11 by Lord Bridges, chairman of the appeal committee. Its signatories included the Chancellor of the University (Lord Halifax), the Prime Minister (Mr. Macmillan) and his three immediate predecessors (Sir Anthony Eden, Sir Winston Churchill and Lord Attlee), and the Archbishop of Canterbury.

The appeal said that " the ancient and historic buildings of the University of Oxford and of its colleges and halls, part of the nation's heritage," were today " endangered by the state of dilapidation into which many of them are falling." Although £293,000 had been spent on repairs in the past 10 years, the task was proving too great for the University authorities and colleges to finance without impairing their vital academic responsibilities.

Lord Bridges explained at a press conference that the University was faced with " frightful problems " of decaying stonework, timbers and beams. The case for a single appeal for the University's buildings was " absolutely conclusive " since college endowments, owing to inflation, were worth much less than formerly; some colleges were well endowed, others were badly off, and some had far worse repair problems than others.

The gross sum needed for repairs was estimated at £2,090,000, the net sum of £1,750,000 being arrived at by allowing for the amount (£340,000) which the University and colleges could find from their own resources. The sum required by the University was £430,000, of which the Sheldonian required £120,000, the Bodleian Library £42,000, St. Mary's Church £51,500, the Radcliffe Camera £42,500, and other historic buildings £174,000. The needs of colleges which had historic buildings requiring repair were about £1,470,000, apart from £190,000 to cover architects' fees. The needs of All Souls, Merton, and Magadalen were omitted because they did not propose to ask for contributions towards the cost of repairing their historic buildings.

Lord Bridges added that more than 60,000 letters had been posted to Oxford graduates in all parts of the world asking them to make a personal sacrifice " to save what was peculiarly their own."

It was announced on July 27 that the Pilgrim Trust had made a grant of £150,000 to the Oxford Historic Buildings Appeal. A first payment of £25,000 would be made immediately, and the remainder in ten annual instalments of £12,500.

(Times - Daily Telegraph)

C. FRANCE. — New Government Appointments.

A list of members of M. Bourgès-Maunoury's Government, which was published in the *Journal Officiel* on June 18, contained some slight changes from that which had appeared earlier in the French Press, and which is reproduced on page 15598. All the changes related to the appointment of Secretaries and Under-Secretaries of State, whilst three additional appointments were published in the *Journal Officiel* of June 20. The changes were as follows :

Secretaries of State.

M. Hammadoun Dikko (Socialist) was appointed a second State Secretary for *France d'outre-mer* in addition to M. Modibo Keita (already listed).

M. Chérif Sid-Cara (Radical) and M. Abdelkader Barakrok were appointed Secretaries of State for Algerian Affairs in addition to Senator Marcel Champeix (Socialist).

Senator Jacques Bordeneuve [not Bordenave] became State Secretary for Education; he belongs to the *Gauche Démocratique*, the Radical group in the Senate embracing both the " traditional " and the " dissident " Radicals.

Under-Secretaries of State.

M. François-Bénard (U.D.S.R.) became Under-Secretary for Atomic Energy, not Secretary of State for Scientific Research.

M. Jacques Périer (Radical) was appointed Under-Secretary for the French Union attached to the *Présidence du Conseil.*

M. Achille Auban (Socialist), M. Jacques Faggianelli (Dissident Radical), and M. Antoine Quinson (*Rassemblement des Gauches*) became Under-Secretaries for Civil Aviation, the Merchant Navy, and War Veterans respectively.

M. Sid-Cara, a former senator and onetime Radical deputy for Oran, is president of the provisional administrative commission of the Oran department, while M. Barakrok is president of the regional commission for Eastern Algeria. Mme. Thome-Patenôtre [see page 15598, second column] is a senator belonging to the *Gauche Démocratique*; M. François-Bénard, a specialist on nationalized enterprises and mixed public undertakings, was a close collaborator of the late M. Maurice Petsche, Finance Minister and Minister of State from 1948-51; and M. Périer is a member of the Assembly of the French Union. (Le Monde, Paris) **(Prev. rep. 15597 A.)**

A. UNITED KINGDOM. — Overseas Information Services. - £2,000,000 Increase in Expenditure. - Expansion of B.B.C. Services and British Council Activities. - Closing-down of B.B.C.'s Scandinavian, Dutch and Portuguese Services.

A White Paper was issued on July 15 embodying the results of a study of U.K. oversea information services by Dr. Charles Hill (Chancellor of the Duchy of Lancaster) and setting out the Government's decisions. It recommended (1) a 15 per cent increase in the budget of the overseas information services, raising their annual cost from the present level of £13,000,000 to £15,000,000; and (2) a capital grant of £5,000,000 to the B.B.C. for the modernization of its equipment, including the construction of new transmitters.

The increase of £2,000,000 a year would be distributed as follows (present expenditure shown first, followed by suggested increase): B.B.C. Overseas Service—£5,750,000, increase £58,000; British Council—£3,500,000, increase £900,000; Foreign Office—£2,825,000, increase £300,000; Colonial Office—£320,000, increase £250,000; Commonwealth Relations Office—£680,000, increase £455,000.

The recommendations contained in the White Paper are summarized below under cross-headings:

B.B.C. Overseas Service. After declaring that "the impartiality and objectivity of the B.B.C. is a national asset of great value, and the independence that the Corporation now enjoys should be maintained," the White Paper stated that the following changes in the B.B.C.'s overseas services had been approved, involving additional gross expenditure of £258,000, savings of £200,000, and thus net additional expenditure of £58,000:

(1) The present daily broadcast of 21 hours on the General Overseas Service would be restored to its full schedule of 24 hours.

(2) The present Arabic service of 4½ hours daily would be extended to 9½ hours.

(3) There would be expanded services in the Hausa language (to Northern Nigeria), in Swahili (to East Africa), and in Somali.

(4) Minor expansions would be made in the programmes to the Soviet Union and Poland.

(5) Sound transcription service output would be expanded and programme expenditure, publicity, and audience research overseas developed.

(6) The recommendation made by the Drogheda Committee in 1953 for the abolition of the French, Italian, Danish, Dutch, Norwegian, Swedish, and Portuguese services was rejected by the Government on the grounds (i) that the closing-down of transmitting stations would weaken transmissions across the Iron Curtain; (ii) that retention of some of these services would be "an earnest of the Government's continuing interest in Western Europe." In consequence the B.B.C. had been asked to continue broadcasting to Western Europe in English, French, German, Italian, and Spanish, though the scope of the French and Italian services would be contracted, those to Austria and Germany integrated, and the Portuguese, Dutch, Norwegian, Swedish, and Danish services abolished.

(7) A capital expenditure programme had been approved in principle providing for the replacement of four B.B.C. transmitters now 20 or 25 years old; for improvements to six others; and for the improvement of existing relay facilities.

(8) The provision of a "Light" programme in the Middle East, locally produced and commercial in character, was under consideration.

Television Material. The White Paper stated that while it was too early to define a hard-and-fast policy about the use of television material, expansion should begin immediately. The Government had therefore decided on certain measures without prejudice to the future, as follows:

(1) The B.B.C. and the programme companies of the Independent Television Authority would be encouraged to expand their commercial arrangements for the showing of their own television films overseas.

(2) The Central Office of Information would be authorized to negotiate with the broadcasting authorities for the right to show certain selected television films produced for home viewing which, while having no commercial value, were thought by Government Departments to be useful for showing overseas either by television or in cinemas.

(3) The C.O.I., in contract with the B.B.C., the I.T.A. programme companies, or film producers, would substantially increase its activity and expenditure in the development of television films.

(4) As a first step, the C.O.I. would offer about one hour a week of televised British material to the principal television stations in most countries (except behind the Iron Curtain); weekly news services would be provided in Arabic and for South America, and a third news service for the Colonies; and more Commonwealth televiews (see 15434 A) would be produced for Australia and Canada, as well as new foreign-language programmes.

The British Council. After paying tribute to the "great value" of the work of the British Council, the White Paper stated that one of the purposes of the proposed new grant was to encourage the flow of teachers from Britain to overseas posts through the joint agency of the British Council and the Ministry of Education. There was a large demand in under-developed countries for British schools and British teachers, which the Government regarded as a great opportunity to spread knowledge of Britain and the British people. Stressing the urgent necessity of extending the Council's work, the White Paper announced the following decisions:

(1) There would be an expansion of the work of the British Council in Burma, Indonesia, Iraq, Persia, the Persian Gulf, South America, Siam, the Sudan, Turkey, and Yugoslavia.

(2) Within the Commonwealth the Council's service would be expanded in South Africa, Ceylon, India, and Pakistan, and in the Colonies in Hong Kong, Nigeria and Uganda.

(3) While Colonial Governments would continue to recruit direct for appointments in Colonial territories, the British Council might give financial assistance to make oversea posts attractive to teachers from Britain. As regards appointments in other oversea countries where teachers might be deterred from taking up posts by lack of assurance of adequate salary and security of contract, or by uncertainty of re-employment on return, it might be possible to meet these difficulties by extending the practice of giving a teacher going abroad a contract with the British Council, which would accept the responsibility for filling the post on behalf of the oversea authority concerned.

(4) An agency would be established by the Ministry of Education and the Scottish Office to assist the recruitment of teachers for oversea posts.

(5) There would be scholarships —50 in the first year, rising to 100 in the fourth year - to enable additional key students from overseas to come to Britain for training in the teaching of English. Arrangements for the training of oversea teachers of English in their own countries would also be strengthened.

(6) The Council's central services would be expanded, including the provision of more books and periodicals for libraries, and the extension of the Council's programme for receiving visitors from overseas. Increased grants would also be made for the inter-university exchange scheme, for student welfare services, and for a modest expansion of the arts programme, to be concentrated on drama.

Other Information Services. Government information services run by the Foreign Office would be expanded in Burma, Indonesia, Persia, Morocco, the Persian Gulf, and Tunisia and strengthened in Australia, Canada, India, Pakistan, Ghana, Malaya, and Nigeria. New offices would be opened in the Federation of Rhodesia and Nyasaland, Singapore, and East Africa.

The C.O.I. would improve and increase the number of magazines sent to the Commonwealth and the Middle East; its film and television services would be expanded; there would be more exhibitions in the Commonwealth, and more provision for official visitors to the U.K.; and its London press service (sent daily by radio to most parts of the free world), as well as its photographic services and the supply of newsreels for the Middle East, would be expanded and improved.

Administrative Organization. In conclusion, the White Paper said that "the necessary administrative arrangements, ministerial and official, have already been made" for the future co-ordination of the information services. It added: "There will be no encroachment on the responsibility of individual Ministers for the work of their information staffs. Nor is there any intention to establish a Ministry of Information."

The allocations to be spent on the information services in each area, exclusive of broadcasting, were shown as follows (present expenditure given first, followed by proposed increase in the area's budget): European —£200,000, increase £92,000; Middle East—£308,000, increase £147,000; South-East Asia - £320,000, increase £53,000; South America —£111,000, increase £14,000; Commonwealth -£1,255,000, increase £455,000; Colonies —£486,000, increase £250,000; and Central Services—£3,300,000, increase £1,000,000.
(Cmd. 225 - Times - Daily Telegraph - Manchester Guardian)
(Prev. rep. Drogheda Report, 13602 A.)

B. PAKISTAN. — New Ministry in West Pakistan.

The membership of the new Provincial Ministry formed in West Pakistan by Sardar Abdur Rashid Khan, as well as the distribution of portfolios, were announced on July 17 as follows:

Sardar Abdur Rashid Khan—Chief Minister, Services, General Administration, Tribal Affairs, Home, Prisons, Excise and Taxation, Forests, and Sport; Khan Iftikhar Husain (Khan of Mamdot)—Revenue; Pirzada Abdus Sattar—Finance, Law, Indus Basin Water Dispute; Syed Abid Husain—Communications and Works; Kazi Fazlullah—Development, Irrigation, and New Barrages; Sardar Abdul Hamid Khan Dasti—Education; Mr. Muzaffar Ali Khan Qizilbash—Industries, Labour, Commerce, and Village Aid; Syed Hasan Mahmud—Social Welfare, Local Government and Information; Mr. Mumtaz Hasan Qizilbash—Agriculture, Food and Civil Supplies; Mir Ali Ahmad Talpur—Co-operation; Khan Khuda Dad Khan—Health; Sheikh Masud Sadiq—Refugees and Rehabilitation.

In addition to the new Chief Minister, the following members of the new Cabinet had held office in the previous Ministry of Dr. Khan Sahib: the Khan of Mamdot, Syed Hasan Mahmud (both of whom retained their former portfolios), Kazi Fazlullah, and Sardar Abdul Hamid Khan Dasti.—(Pakistan High Commissioner's Office, London) **(Prev. rep. 15677 A.)**

A. TUNISIA. — Abolition of the Monarchy. - M. Bourguiba proclaimed President and Prime Minister of Tunisian Republic. - Formation of New Ministry.

The Tunisian Constituent Assembly unanimously decided on July 25, at the end of a two-day debate: (1) to abolish the monarchy; (2) to proclaim Tunisia a republic; and (3) to invest M. Habib Bourguiba (the Prime Minister) with the functions of Head of State and with the title of President of the Republic.

Strong criticisms of the deposed Bey (Sidi Lamine) and of the Beylical family were made by numerous deputies in the course of the debate. The Libyan Ambassador, who was present with other members of the Diplomatic Corps, walked out after one of the deputies, M. Rashid Driss, had made an attack on all monarchical regimes with the express exception of the British Royal Family. Other speakers, however, paid tribute to the patriotism of the late Moncef Bey, the predecessor of the deposed Bey.

M. Bourguiba, replying to the debate, began by deprecating the remarks of M. Driss. He declared in this connexion: "Preceding speakers have expressed their opinions on the monarchical regime. I wish to make it clear that in speaking of the 'monarchical regime' we are thinking of Tunisia only. We are free to choose the system we wish, and at the same time we respect the systems of all other countries."

The Prime Minister went on to criticize the Bey of Tunis, and his predecessors, as "people who have lived in ignorance and had only one aim—to safeguard their regal position even at the expense of the interests of the Tunisian people. They thought, and still think, that they are not of the same common clay as the rest of the people . . ." He alleged that throughout the period of the French protectorate the Beys of Tunis had displayed a "lack of dignity," in contrast to the behaviour of other Royal Houses which had "stood at the head of their peoples in resistance to the invader."

M. Bourguiba disclosed that in 1950 he had had a conversation with Prince Chadly, the Bey's eldest son, during which he (M. Bourguiba) had announced that a "decisive struggle" was about to be launched against "French colonialism." He had asked Prince Chadly to urge his father and all the Beylical family to participate in this struggle, but the Bey, "fearing for his throne," had refused to do so and had relied instead upon "colonialist support."

"After we gained internal autonomy," M. Bourguiba continued, "the Bey no longer felt he could rely on colonialist support, and began to play the game of Salah Ben Youssef [see 15412 D]. Moreover, when the Tunisian Government asked for control of the police and *gendarmerie*, we saw that the Bey tried to convince M. Seydoux [then French representative in Tunisia] that he need accept nothing beyond the Conventions of June 1955 [see 14289 A]. The Bey did not consent to seal the decree creating the National Constituent Assembly, though well aware that we were acquainted with his manoeuvres and that he was evoking a rising tide of popular indignation . . ."

M. Bourguiba ended his speech by advising the Constituent Assembly to choose a republican regime "to guarantee the independence and sovereignty of Tunisia." He added: "The past shows that we can have no confidence in the princes of the reigning family. No action prompted by a spirit of vengeance will be taken against the person of the Bey or against any member of his family."

Immediately after the proclamation of the republic, the Constituent Assembly's decision was conveyed to the Bey in person by the Ministers of the Interior and Justice, the secretary-general of the Assembly, and the Chief of Police. Later in the day the Bey was escorted from his palace at Carthage to a villa on the outskirts of Tunis which had been placed at his disposal; he was accompanied by his three sons—Prince Chadly, the Crown Prince (*Bey du Camp*), Prince Mohamed, and Prince Salaheddine—and his daughter, Princess Zakia. It was understood that the Bey and his family would be given the choice of going into exile or of remaining in Tunisia as private citizens.

The president of the Constituent Assembly (M. Djellouli Farès) issued a statement on July 26 making it clear that M. Bourguiba remained Prime Minister despite his proclamation as President of the Republic—a point which had not been clarified in the resolutions adopted by the Assembly. The statement said that the executive power remained in operation until the promulgation of a new Constitution, and that President Bourguiba, as head of the Government, had complete freedom to reconstruct the Ministry.

The former Cabinet tendered its collective resignation to President Bourguiba on the same day, a new administration being formed by the President on July 30 with the following membership (all the Ministers were designated Secretaries of State):

M. Habib Bourguiba—Prime Minister; M. Bahi Ladgham—State Secretary for Defence and for Co-ordination of all the State Secretariats; M. Sadok Mokkadem—Foreign Affairs; M. Ahmed Mestiri—Justice; M. Taieb Mehiri—Interior; M. Hedi Nouira—Finance; M. Ezzedine El-Abassi—Commerce and Industry; M. Mustapha Filali—Agriculture; M. André Barouch—Public Works and Reconstruction; M. Rashid Driss—Postal Services; M. Ahmed Ben Salah—Health; M. Lamine Chabdi—Education; M. Mohamed Chakroun—Social Affairs. In addition there were three Under-Secretaries of State.

Eleven of the 16 ministers held office in the former Cabinet, in which M. Ladgham, second-in-command to M. Bourguiba, had been Deputy Premier. The most important new appointments were those of M. Mokkadem (Ambassador in Cairo) as State Secretary for Foreign Affairs, and of M. Ahmed Ben Salah (vice-president of the Constituent Assembly and head of the principal trade union, the *Union Générale des Travailleurs Tunisiens*) as State Secretary for Health. Among the other new State Secretaries was M. Rashid Driss (deputy mayor of Tunis), whose outburst against monarchical systems had drawn a rebuke from M. Bourguiba, as stated above.

The deposed Bey, Sidi Lamine (66), came to the throne in 1943 after his predecessor, Sidi Moncef, had been deposed by General Giraud in the confused period which followed Tunisia's liberation by the Allied forces. In the words of *Le Monde*, the deposition of Sidi Moncef was "apparently due to his nationalist attitude and relations with the Néo-Destour rather than for a 'collaboration' with Germany which was never proved." Regarded at first as an usurper, Sidi Lamine subsequently gained a certain popularity after Sidi Moncef's death in exile. With the rise to power of the Néo-Destour, however, and in particular since M. Bourguiba's return from exile, the monarch was subjected to increasing criticism on the grounds of his alleged vacillation *vis-à-vis* the French authorities and his alleged failure to give whole-hearted support to the independence movement. In recent years the Bey's powers had been greatly diminished through such measures as a two-thirds reduction in his Civil List and the suppression of the judicial privileges formerly enjoyed by the Beylical family. At the time of his deposition, virtually the only prerogative remaining to the Bey was that of "sealing" (i.e. assenting to) decrees or of withholding his assent—in which case he had the power to retard the application of certain measures.

The establishment of the Tunisian Republic brought to an end the Husseinite dynasty which had reigned in Tunisia since the beginning of the 18th century. Though for a long period a vassal-state of the Ottoman Empire, Tunisia progressively freed herself from Turkish overlordship and had practically acquired sovereignty at the time of the establishment of the French protectorate in 1881.—(Le Monde, Paris) **(14812 A.)**

B. SUDAN. — Introduction of the Sudanese Pound. - Exchange Agreement with Egypt. - British Release of Egyptian Blocked Sterling Balances for Sudan.

A new Sudanese currency, the Sudanese pound, came into circulation on April 8. It replaced the Egyptian pound which, in addition to British coins, had hitherto been the legal currency in the Sudan. The external value of the Sudanese pound was fixed at parity with the Egyptian pound, or 2.55187 grammes of fine gold.

Like the Egyptian pound, the Sudanese pound is divided into 100 piastres, each piastre being divided into 10 millièmes. Pending the establishment of a Central Bank, the new Sudanese currency notes are issued by the Sudanese Currency Board.

Under an agreement concluded with Egypt on April 7, after two years of negotiations, Egypt undertook to transfer to the credit of the Sudan up to £20,000,000 of her blocked sterling balances with the Bank of England in settlement of (i) the commitments of the National Bank of Egypt's Cairo office to its branches in the Sudan, less any indebtedness of the Sudanese Government to the Egyptian Government; and (ii) Egyptian notes and coins presented by the Sudan for redemption (within three months). The agreement also provided that if Egypt's total indebtedness to the Sudan should exceed £20,000,000, a special account in Egyptian pounds would be opened with the National Bank of Egypt, out of which up to £E2,000,000 annually could be used by the Sudanese Government for the payment of Egyptian goods and services and for certain other specified purposes.

The Sudanese Minister of Finance and Economics (Sayed Ibrahim Ahmed) announced on July 1 that £E16,300,000 of Egyptian notes had been exchanged to that date, and that, in accordance with the agreement with Egypt, an additional £E3,000,000 circulating in coinage would remain legal tender until June 1958.

It was announced in London on April 11 that, as a result of the agreement between Egypt and the Sudan, H.M. Government had agreed to release £5,000,000 from Egypt's blocked sterling balances for transfer to the Sudanese Government in connexion with the currency exchange.
(Sudan Government Information Centre, Khartoum - Times)

Note. According to figures published by the National Bank of Egypt, Egyptian blocked sterling balances in the No. 2 Sterling Account amounted to £100,300,000 as at Nov. 30, 1956, in addition to £7,800,000 in the No. 1 Account, which had been temporarily frozen by the British Government on July 27, 1956, following the nationalization of the Suez Canal. The transfer of £20,000,000 from the No. 2 Account to the No. 1 Account on Jan. 1, 1957 (see page 15548, second column) increased the No 1 Account to £27,000,000 and reduced the No. 2 Account to £80,300,000. The above-mentioned transfer of £15,000,000 for the benefit of the Sudan further reduced the No. 2 Account to £65,300,000. (Times)

A. ARGENTINA. — Paris Agreement on Multilateral Trade and Payments Scheme and Argentine Debt Settlement. - Provisional Agreements on Implementation. - West German and Italian Adherence. - Argentine Payment of First Annual Debt Quota. - Dollar Purchase from International Monetary Fund.

An Argentine financial mission headed by Dr. Mendez Delfino visited Britain, France, Italy, Western Germany and other European countries during the second half of 1956 to discuss the practical implementation of the multilateral trade and payments scheme which was concluded in principle in May 1956 with nine European countries and came into operation on July 2, 1956. The talks in Bonn and Rome were intended to bring about Western Germany's and Italy's adherence to the scheme, while those in London, Paris, Brussels and other European capitals aimed at the conclusion of bilateral agreements with each of the countries concerned to implement the scheme, which also covered the settlement of Argentina's large commercial debts to these countries.

Although Dr. Mendez Delfino reached provisional bilateral agreements with Britain, Italy, Denmark, Sweden, Norway, Austria, Belgium, Luxembourg, and the Netherlands, a deadlock arose because of the inability of Argentina and Western Germany to agree on the size of Argentina's commercial debt to that country—a question which was also linked up with the fate of German industrial property which had earlier been seized by the Argentine Government. Since the German Federal Republic was by far the largest creditor of Argentina at that time, it proved impossible to put the general European debt settlement arrangements into operation pending the determination of the size of the German claims.

Difficulties also arose with France, which had pressed for a settlement of long-outstanding French compensation claims in connexion with the nationalization by the Peron regime of certain French property, including several breweries and the port installations at Rosario.

Subsequently the rapidly deteriorating position of the Argentine economy retarded the further progress of these negotiations, while in March 1957 it was reported in the British Press that further serious difficulties had arisen because Western Germany had succeeded in the intermediate period in reducing her outstanding claims against Argentina to a disproportionate extent as compared with the other creditors.

Argentine negotiations with Western Germany were resumed in April 1957, a provisional agreement being signed in Bonn on June 18 providing for the Federal Republic's entry into the multilateral system, the consolidation of Argentine commercial debts to Western Germany (given by the Argentine Finance Minister, Dr. Krieger Vasena, as about $140,000,000), and a settlement of the question of former German property in Argentina.

According to reports published in Bonn, that part of the agreement dealing with former German property provided (*a*) that German undertakings in Argentina which had been nationalized at the end of the war as enemy property (including the Argentine branches of Siemens, I. G. Farben, Merck, and other German concerns) would be put up for public auction; (*b*) that the proceeds would be divided between the Argentine Government and the former German owners; and (*c*) that all patents and trade-marks held by these firms would be returned to Germany. The Federal Republic had renounced its restitution claims in respect of German property which had been sequestrated after the fall of the Peron regime on the ground that the firms concerned had allegedly collaborated with that regime; one of the largest of these firms was the Argentine branch of Mercedes-Benz.

A meeting between representatives of Argentina and the European creditor-countries, which opened in Rome on July 31 in order to discuss the new Argentine-German arrangements in the light of those with the other creditors, reached agreement on Aug. 2. It was announced that a " fair share " of Argentine annual debt payments would be allotted to Germany on a scale proportional to the annual shares received by the other principal European creditors—Great Britain, Italy, and the Netherlands.

Meanwhile the Argentine Ministry of Finance had announced on June 28 that the first annual quota of Argentina's debts to the European creditor-countries had been paid to Britain, Italy, and the Netherlands; no payment had been made to France and Western Germany because reimbursements to those two countries already exceeded the agreed quotas. The amount of the payments was subsequently given as equivalent to $18,700,000, of which $6,900,000 was paid to Italy, $3,700,000 to Britain, and $8,100,000 to the Netherlands.

The total amount of Argentine commercial debts owing to the 11 European countries adhering to the Paris Agreement was given as about $520,000,000, including interest. The provisional bilateral agreements with each of those countries provided for the consolidation of these debts and their amortization over 10 years on a strictly proportional basis at an average rate of interest of 3½ per cent per annum. Of the total debt, Britain's share amounted to £19,000,000, representing Argentina's use of the £20,000,000 reciprocal overdraft facility which had been arranged in former Anglo-Argentine trade and payments agreements.

The International Monetary Fund announced on April 15 that Argentina had purchased $75,000,000 from the Fund (i.e. one-half of her quota of $150,000,000 in the I.M.F.), of which $37,500,000 had been paid in gold. -(Bank of London and South America, Fortnightly Review - Times - Le Monde - Financial Times - International Monetary Fund, Washington) **(Prev. rep. 15021 A.)**

B. SOVIET UNION. — Agrarian Reforms. - Creation of All-Union Ministry of Agriculture.

A decree was issued on July 4 by the Soviet Government and the central committee of the Communist Party abolishing, as from Jan. 1, 1958, compulsory deliveries to the State of agricultural produce from the private holdings of collective farmers and of factory and office workers.

An accompanying statement on the present position of Soviet agriculture said that grain deliveries in 1956 were 1,400 million poods (nearly 22,600,000 tons) higher than in 1953, " due primarily to the contributions of the collective and State farms." Deliveries of potatoes and other vegetables had increased during the three-year period by more than 3,000,000 tons, or 54 per cent; sugar beet by 36 per cent; meat by 25 per cent; and milk by 70 per cent. Whereas compulsory deliveries from the private holdings of collective farmers and of factory and office workers now played " a negligible part " in State procurements, the collective and State farms accounted for 81 per cent of all meat deliveries, 84 per cent of milk deliveries, and 89 per cent of wool deliveries. Moreover, the State's requirements for grain, sugar-beet, cotton, flax, hemp, oil-bearing crops, and vegetables were met entirely from the collective and State farms. As regards agricultural mechanization, there were at the present time " more than 1,500,000 tractors, about 380,000 combines, and millions of other agricultural machines working on the collective and State farms."

The statement " noted with satisfaction " the widespread response to the Government's appeal to the collective farms " to spread socialist emulation for 100 or more centners of meat and 400 or more centners of milk per 100 hectares of farm land, with a view to overtaking the United States in the next few years in *per capita* output of livestock produce." [One centner per hectare = nearly 90 lb.]

[As stated on page 15640, first column, M. Molotov, M. Malenkov, and M. Kaganovich were accused of having opposed the above-mentioned decree.]

Under a decree of the Presidium of the Supreme Soviet, announced on May 31, the Ministries of Agriculture and State Farms were merged into a " Union-Republican " Ministry of Agriculture headed by Mr. V. V. Matskevich.—(Soviet Embassy Press Department, London) **(Prev. rep. Agricultural Policy, Five-Year Plan, 14717 A.)**

C. UNITED KINGDOM. — Gold and Dollar Reserves. - $14,000,000 Fall in July.

The Treasury announced on Aug. 2 that the sterling area's gold and dollar reserves had fallen during July by $14,000,000, after taking into account (*a*) the payment of $21,000,000 to the E.P.U. in respect of the U.K.'s deficit in June; (*b*) the payment of $4,000,000 to creditor countries in the E.P.U. under bilateral settlements; and (*c*) the receipt of $1,000,000 in U.S. defence aid. As a result, the gold and dollar reserves stood at $2,367,000,000 on July 31.

Provisional figures for the E.P.U. July settlement showed that Britain had a deficit of £18,000,000, three-quarters of which would be settled in gold or dollars and the remaining quarter by an increase in the U.K.'s debt to the Union. (Treasury Press Office, London - Times - Financial Times) **(Prev. rep. 15657 A.)**

D. INDIA - CHINA. — Renewal of Trade Agreement.

The two-year trade agreement between India and the People's Republic of China of Oct. 14, 1954, was renewed until Dec. 31, 1958, under letters exchanged in New Delhi on May 25. The only changes referred to payments which could in future be effected either in Indian rupees or sterling, as well as certain restrictions on the conversion into sterling of the rupees held by the People's Bank of China with the Reserve Bank of India.

During the period April 1, 1956 to Jan. 31, 1957, Indian imports from China amounted to Rs. 63,800,000, against Indian exports of only Rs. 28,200,000.—(The Hindu, Madras) **(Prev. rep. 13890 A.)**

A. INDIA. — Final Results of General Election. - Appointments to State Ministries.

The elections to the *Lok Sabha* in the Chamba, Mahasu, and Pangi constituencies of Himachal Pradesh, which had been postponed at the time of the general election in March because of snowbound conditions, began during the last week of May and ended on June 7. It was announced on June 23 that all four seats had been won by Congress, those elected including Dr. Y. S. Parma, former Chief Minister of Himachal Pradesh, and Pandit Padam Dev, the former Home Minister. The results of the elections in the double-member Kangra constituency (Punjab), which had likewise been postponed because of snowbound conditions in this mountainous area near the Tibetan border, were announced on July 27, when two Congress members were returned. These results increased the representation of Congress in the *Lok Sabha* to 369 members.

Developments in the various States in connexion with the State and territorial elections are summarized below.

Elections in Himachal Pradesh. The elections to the Territorial Council, which coincided with those for the above-mentioned *Lok Sabha* seats, resulted as follows: Congress, 22; Scheduled Caste Federation, 2; Praja Socialist, 1; Independents, 16.

Elections in Kashmir. The elections for the seven seats in the Jammu and Kashmir Assembly, which had also been postponed in March because of snowbound conditions, were held during the second half of May, the final results being announced on June 3. With these results, and the allocation to the National Conference of a seat originally attributed to the *Praja Parishad*, the membership of the State Assembly became as follows: National Conference, 68; *Praja Parishad*, 5; *Harijan Mandal*, 1; Independent, 1.

Two women members were nominated by the *Sadar-i-Riyasat*, bringing the Assembly's membership to 77.

The new State Assembly elected on July 16 half the membership of the Kashmir Legislative Council, all the 18 seats being won by the Kashmir National Conference. The party had previously secured the four reserved seats for the Doda, Poonch, Ladakh, and Kargil constituencies, as well as the eight seats filled by members nominated by teachers' organizations, local authorities, and village communities. The remaining six members of the Legislative Council were later nominated by the *Sadar-i-Riyasat*.

Bihar Ministry. The membership of the Bihar State Ministry formed by Dr. Sinha on May 6, and the distribution of portfolios, were as follows:

Dr. Shri Krishna Sinha—Chief Minister, Political, Industries, Irrigation and Power; Dr. A. Narain Sinha—Finance, Labour and Agriculture; Mr. S. O. Munemi—Prisons, Relief, Rehabilitation and Transport; Mr. B. Paswan—Excise, Forests and Welfare; Mr. B. C. Patel—Health, Supply and Food; Mr. Binodanand Jha—Revenue and *Panchayats*; M. J. N. Lal—Co-operatives, Veterinary, Animal Husbandry, and Law; Kumar Ganganand Singh—Education; Mr. Maqbool Ahmad—Public Works and Local Self-Government. [Dr. A. N. Sinha died on July 5.]

In addition there were 12 Deputy Ministers, including two women.

Uttar Pradesh Ministry. Dr. Sampurnanand's Ministry was enlarged on June 10 when Mr. Mohanlal Gautam was sworn in as the tenth Minister, taking over the Co-operatives portfolio from Mr. Zaheer.

West Bengal Ministry. Mr. Harendra Nath Chaudhuri, who had been Education Minister in Dr. Roy's 1948-52 Ministry, was sworn in as the 14th member of Dr. Roy's new Cabinet on July 8, taking over again the Education portfolio. Mr. Chaudhuri is a member of the West Bengal Legislative Council.

Kashmir Ministry. Bakshi Ghulam Mohammed tendered his resignation as Chief Minister on July 12, following his unopposed re-election as leader of the National Conference Assembly Party. He was asked by the *Sadar-i-Riyasat* to form a new Ministry, and on July 26-27 announced its membership as follows:

Bakshi Ghulam Mohammed—Prime Minister, Finance, Law and Order, Police, Militia, Information, Transport, Planning, General Administration, Scheduled Castes and Tribes, and Tourism; Shamlal Saraf—Education and Health, and Archeology; Dinanath Mahajan—Law and Revenue, and Rehabilitation; Mir Ghulam Mohammed Rajpuri—Industry and Commerce, Labour, Forest Industries; Kotwal Chunilal—Development, Public Works, Irrigation and Power; Mr. Shamsuddin—Local Self-Government and Community Projects. A seventh Cabinet Minister will be appointed for Food and Agriculture.

Six Ministers of State were also appointed, including the Head Lama of Ladakh (Kushak Bakula), hitherto a Deputy Minister.

A feature of the new Ministry was the exclusion of the left-wing Sadiq group, which had been in a majority in Bakshi Ghulam Mohammed's previous Ministry but with whom acute differences had arisen. Although Bakshi Ghulam Mohammed was reported to have offered portfolios in his new Ministry to Mr. G. M. Sadiq (the former Education Minister) and Mr. G. L. Dogra (the former Finance Minister), they were said to have declined to participate. The other two outgoing Ministers of the Sadiq group were Mir Kasim and Mr. D. P. Dhar.

The only Minister taken over from the previous Cabinet of Bakshi Ghulam Mohammed was Mr. Shamlal Saraf. Four Ministers (all lawyers) entered the Cabinet for the first time—Mr. Mahajan and Mr. Chunilal (who represent the Hindu community in Jammu), Mr. Shamsuddin, and Mir Ghulam Mohammed Rajpuri.

Mr Sadiq resigned on Aug. 6 from the executive of the National Conference, together with five other members. On the following day he alleged in a press statement that the party had ceased to be a democratic organization and was now in the hands of a few individuals. He added that he and his group would in future act as a "corrective" within the party "if we are permitted to function," and would continue to follow the party's ideals, principles and policies. In their joint letter of resignation, Mr. Sadiq and his colleagues alleged that corruption was rampant in public life and that there was constant interference by party officials in the administration.

A Bill providing for the creation of a Legislative Council for Andhra Pradesh, and for an increase in the membership of the existing Legislative Councils in other States, was introduced in the *Lok Sabha* on July 25 by Mr. A. K. Sen, the Central Minister for Law.—(The Statesman, Calcutta - The Hindu, Madras - Indian High Commissioner's Office, London)

(Prev. rep. 15533 A.)

B. CANADA - UNITED STATES. — Joint Air Defence Headquarters. - DEW Line in Operation.

A joint statement issued in Washington and Ottawa on Aug. 1 by Mr. Charles E. Wilson (U.S. Secretary of Defence) and Major-General Pearkes (Canadian Minister of National Defence) announced that Canada and the U.S.A. had agreed to integrate their air defence operations and planning for the North American continent. Accordingly, they would (i) set up "at an early date" a system of integrated operational control of all air defence forces in the continental U.S.A., Alaska, and Canada under an integrated command responsible to the Chiefs of Staff of both countries; (ii) establish a joint headquarters at Colorado Springs; and (iii) work out plans for immediate use in case of emergency. Other aspects of command and administration would remain "the national responsibility" of the two countries. The announcement pointed out that the new agreement extended the mutual security objectives of NATO to the air defence of the Canada-United States region.

It was announced at the same time that General Earle E. Partridge (Commander of the U.S. Continental Air Defence Command, with headquarters at Colorado Springs) would head the new joint command; that Air Marshal C. Roy Slemon (Chief of Canadian Air Staff) would be Deputy Commander; and that Air Marshal H. L. Campbell would succeed Air Marshal Slemon as Chief of Canadian Air Staff.

The U.S. Air Force announced on July 30 that the Distant Early Warning Line (DEW Line), the 3,000-mile radar chain across the Arctic fringe of the North American continent, would go into full operation on the following day. The DEW Line, the construction of which started late in 1954, and which cost $600,000 000, comprises an electronically connected system of detection and warning devices to give maximum warning of the approach of hostile aircraft by the short route across the Arctic. The various stations forming the line stretch from Western Alaska across the upper rim of the continent, through Canada to Baffin Island.

(New York Times - New York Herald Tribune - Montreal Star)

(Prev. rep. 14235 B; DEW Line, 13896 A.)

C. ITALY - EGYPT. — New Payments Agreement. - Liquidation of Egyptian Clearing Debt.

Negotiations for a revision of the 1952 payments agreement between Italy and Egypt opened in Rome on May 22, a new agreement being initialled on June 8 containing the following provisions:

(*a*) Italian ships would pay Suez Canal dues to Egypt in "multilateral lire" (i.e. transferable lire), the previous arrangement whereby payments were made into a clearing account being discontinued.

(*g*) Egypt would repay the debt of 8,000,000,000 lire (£E4,200,000) incurred by her under the 1952 clearing agreement in five annual instalments, with interest at 3 per cent, payment to be made in "multilateral lire."

(*c*) Egypt also undertook to set aside unspecified annual sums to cover the remittance to Italy of the savings of Italian residents already repatriated from Egypt or considering repatriation.

(*d*) Italian importers of Egyptian cotton would receive a 15 per cent discount.

(*e*) All financial transactions between the two countries would in future be conducted in "multilateral lire."

The conclusion of the new agreement settled the dispute [see page 15545, second column] which had arisen between Egypt and Italy following the Egyptian refusal to accept canal dues from Italian ships by payments into the former clearing account.—(Corriere della Sera, Milan) **(15545 A.)**

A. INTERNATIONAL BANK.—Loans and Bond Issues. - Borrowings from Switzerland and Western Germany.

The following loans were announced by the World Bank during the first seven months of 1957, in addition to one made in November last to Chile.

Chile. (*a*) $15,000,000 on Nov. 2, 1956, jointly to the *Corporación de Fomento de la Producción* (the Government agency responsible for promoting economic development) and to *Empresa Nacional de Electricidad S.A.* (*Endesa*) for electric power development in Chile, specifically in the Concepción and Santiago-Valparaiso areas. The Grace National Bank of New York participated in the loan to the extent of $298,000. Terms: 20 years; 5 per cent interest, including 1 per cent commission; repayment to begin Oct. 15, 1960.

The loan, which was guaranteed by the Chilean Government, was the World Bank's second loan to Fomento and Endesa for electric power development. The first, for $13,500,000, had been made in 1948.

(*b*) $21,800,000 on July 24, 1957, to increase Chilean coal production, viz. $12,200,000 to the *Compania Carbonifera y de Fundición Schwager*, and $9,600,000 to the *Compania Carbonifera e Industrial de Lota*, with the *Corporación de Fomento de la Producción* as co-borrower. The Schwager and Lota companies produce about 80 per cent of all the coal mined in Chile. The Grace National Bank of New York participated in both loans to a total of $200,000. Terms: 15 years; 5¾ per cent interest, including 1 per cent commission; repayment of the Schwager loan as from April 15, 1963, and of the Lota loan as from Oct. 16, 1962. Both loans were guaranteed by the Chilean Government. They brought total World Bank loans to Chile to $73,600,000.

Ethiopia. $15,000,000 on June 21, 1957, to the Ethiopian Government for the extension and further improvement of the highway system, including the construction of about 530 miles of new roads - the first construction of new roads in Ethiopia since before the Second World War. The First National City Bank of New York participated in the loan to the extent of $1,491,000. Terms: 20 years; 5¾ per cent interest, including 1 per cent commission; repayment as from Sept. 1, 1961.

This was the second World Bank loan for the Ethiopian highways, one of $5,000,000 having been made in 1950.

India. (*a*) $9,800,000 on May 29, 1957, to the Tata Hydro-electric Power Supply Company Ltd., the Andhra Valley Power Supply Company Ltd., and the Tata Power Company Ltd. for the expansion of their thermal electric power plant at Trombay, near Bombay. Terms: 18 years; 5¾ per cent interest, including 1 per cent commission; repayment as from April 15, 1960. Guaranteed by the Government of India.

This was the second World Bank loan for the Trombay thermal plant, the first one, for $16,200,000, having been made in 1954 to help in its construction.

(*b*) $5,000,0000 to Air-India International (the Indian international airline) in conjunction with a loan of $16,800,000 contracted by A.I.I. on Jan. 31 with five U.S. commercial banks—the First National City Bank of New York, the Bank of America N.T. and S.A., the Chase Manhattan Bank, the Irving Trust Company, and the First National Bank of Boston. The two loans will finance the dollar costs of three *Boeing-707* long-range jet airliners. Terms of the commercial bank loan: drawings may be made from July 1, 1959-Sept. 30, 1961, with repayment not later than between March 31, 1962, and March 31, 1965. Terms of the World Bank loan: 5¾ per cent interest, including 1 per cent commission; repayment between April 1, 1965, and Oct. 1, 1966 (to be advanced, however, if the commercial bank loans are repaid before March 31, 1965). Guaranteed by the Government of India.

In addition to the dollar cost of the aircraft themselves ($16,800,000) the equivalent of $5,300,000 will be required in sterling (£1,900,000) to pay for the Rolls-Royce *Conway* engines. The financing of this requirement is still under consideration by the Government of India.

(*c*) The equivalent of $90,000,000 on July 12, 1957, to the Indian Government to assist in the modernization and development programme of the Indian Railways. The total was divided into 8,640,000,000 Japanese yen (equivalent to $24,000,000), £6,825,000 sterling ($19,100,000), 7,000,000,000 Italian lire ($11,200,000), and U.S. dollars and various European currencies equivalent to $35,700,000. The loan will cover about half the cost of purchase of equipment from abroad on which payment falls due in 1957 and 1958, including over 500 locomotives, 10,000 freight cars, 100,000 wheel sets, 1,500 underframes, rails, and other materials. Terms: 15 years; 5¾ per cent interest, including 1 per cent commission; repayment as from July 1, 1961.

This was the largest single World Bank loan for any particular purpose and the second for the expansion of the Indian Railways, one of $34,000,000 having been made in August 1949.

Netherlands. The equivalent of $15,000,000 on May 15, 1957, to the Finance Corporation for National Reconstruction (*Herstelbank*), an institution owned jointly by the Netherlands Government and Dutch institutional and private interests which makes loans to industrial, commercial, and transport enterprises. Participating in the loan to the extent of $5,000,000 were the Netherlands Trading Society, *Amsterdamsche Bank, Twentsche Bank, Rotterdamsche Bank*, Philadelphia National Bank, Grace National Bank, and National Shawmut Bank of Boston. Terms: 5 years; 5¾ per cent interest, including 1 per cent commission; repayment between Nov. 15, 1959-May 15, 1962. The loan was guaranteed by the Netherlands Government.

This was the second World Bank loan made to the *Herstelbank*—one of $15,000,000 having been made in 1949, of which, however, $7,550,000 was subsequently cancelled.

Persia. $75,000,000 on Jan. 22, 1957, to the Persian Government (the first loan made by the World Bank to that country) to provide short-term finance for Persia's Second Seven-Year Development Plan. This plan is financed mainly out of oil revenues, but the latter are expected to fall short of expenditure during the early years and the World Bank loan is aimed at bridging the gap until more ample revenues become available.

Peru. $5,000,000 on March 13, 1957, to the *Banco de Fomento Agropecuario del Peru*, an autonomous credit institution of the Peruvian Government providing long-term loans for agricultural development. The New York Trust Company, the Bank of America, and the First National City Bank of New York participated to the amount of $1,101,000. Terms: 8 years; 5¼ per cent interest, including 1 per cent commission; repayment as from Aug. 1, 1959. Guaranteed by the Peruvian Government.

This was the second loan to the *Banco*, an earlier one for $5,000,000 having been made in 1954. It brought total World Bank loans to Peru to $40,900,000.

Ruanda-Urundi. $4,800,000 on June 26, 1957, to the U.N. Trust Territory of Ruanda-Urundi, in Central Africa, to help finance the construction of a modern port on Lake Tanganyika at Usumbura (the administrative capital) and the building of a 25-mile road from Usumbura to Kigali, on the 4,500-ft.-high Central Plateau, where most of the Territory's population and economic activity are concentrated. The Belgian-American Banking Corporation participated in the loan to the extent of $359,000. Terms: 20 years; 5¾ per cent interest, including 1 per cent commission; repayment as from Jan. 15, 1961. The loan was guaranteed by Belgium, which administers Ruanda-Urundi.

Loans from Switzerland and Western Germany.

It was announced on Sept. 18, 1956, that the Swiss Government had agreed to lend 200,000,000 Swiss convertible francs to the International Bank as from Jan. 1, 1957; the interest rate would be 3⅜ per cent p.a. and repayment would be made in six equal instalments between Jan. 1, 1960, and Jan. 1, 1965. The loan agreement was approved by the Swiss Parliament in December last.

On July 10, 1957, it was announced that the *Bank Deutscher Länder* in Frankfurt had agreed to lend $100,000,000 to the International Bank against the issue of 4¼ per cent Notes; of these, $40,000,000 would be repayable within one year and $30,000,000 each within two and three years respectively. This was the largest issue of dollar obligations by the World Bank placed entirely outside the United States.

Bond Issue.

$100,000,000 of World Bank Bonds were issued in the U.S.A. through a consortium of U.S. investment firms and banks on April 17. The bonds, with a currency of 21 years, bore interest at 4¼ per cent, and were issued at 98 per cent. This was the Bank's second bond issue in the U.S.A. in 1957.

Subscriptions.

The following increases in capital subscriptions were approved up to June 30, 1957: Brazil from $105,000,000 to $150,000,000; Dominican Republic from $2,000,000 to $4,000,000; Ecuador - from $3,200,000 to $6,400,000; and Nicaragua—from $800,000 to $3,000,000. These increases brought the World Bank's total subscribed capital to $9,268,000,000 as at June 30, 1957. Gross total loan commitments at June 30 amounted to $3,108,000,000, with cumulative disbursements at $2,296,000,000. The Bank's funded debt as at June 30, 1957, was $1,033,000,000. -(International Bank, Washington - New York Times - Neue Zürcher Zeitung)

(Prev. rep. 15302 C.)

B. UNITED KINGDOM. — Farm Wage Increase.

The Agricultural Wages Board decided on July 30, by a majority vote, to increase the minimum wage of adult farm workers in England and Wales by 9s. a week (bringing it up to £7 10s. for a 47-hour week), with proportionate increases for women and juvenile workers.

At earlier meetings of the Board the union representatives had asked for a "substantial increase," but this had been opposed by the employers' representatives. When the Board met on July 30, however, the employers' representatives had suggested an increase of 9s. a week, with a reduction in overtime pay from the existing rate of 4s. 6d. an hour to 4s. an hour for the first six hours overtime worked on weekdays. This was rejected by the union representatives and the independent members of the Board, whereupon the employers proposed an increase of 7s. weekly, with overtime at its existing rate. This also was rejected, and the unions then proposed a 9s. increase, with a proportionate increase in the overtime rate to 4s. 9d. an hour. The independent members supported this proposal on the understanding that it should not become effective before Oct. 28, instead of at the end of September as customarily.

The cost of the increase (applicable to about 600,000 workers) was estimated at about £13,500,000 a year. Negotiations for parallel increases were expected for Scotland and Northern Ireland.—(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. 15032 D.)

A. UNITED KINGDOM. — Mr. Maudling to deal with International Negotiations on European Free Trade Area. - Discussions with Scandinavian Countries and Netherlands on Free Trade Area Proposal.

It was announced from 10, Downing Street, on Aug. 7 that the Prime Minister had asked the Paymaster-General, Mr. Reginald Maudling, to supervise and co-ordinate the Government's preparations for the forthcoming discussions and negotiations between the U.K. and other countries concerning the establishment of a European Free Trade Area, and to act as the Government's representative in those discussions.

The statement added: "The Paymaster-General will work in consultation with the Ministers departmentally concerned with these matters, in particular the Foreign Secretary, the Chancellor of the Exchequer (who also has special responsibilities in this connexion as chairman of the O.E.E.C.), and the President of the Board of Trade. The Paymaster-General will report to the Prime Minister. He will continue to discharge his present functions, but for these additional duties will have a separate office in Gwydyr House [a Government building in Whitehall], together with a small staff."

Mr. Maudling (40) became Paymaster-General when Mr. Macmillan formed his Government in January, and was given the responsibility of representing the new Minister of Power (Lord Mills) in the House of Commons. In the immediate post-war years he was the member of the Conservative Party's parliamentary secretariat responsible for economic and financial matters, and in November, 1952 was appointed Economic Secretary to the Treasury. He held the latter post until Sir Anthony Eden appointed him Minister of Supply in April 1955.

Apart from the Ministers referred to in the official statement, Mr. Maudling will also work in consultation with the Secretary for Commonwealth Relations, the Colonial Secretary, the Minister of Agriculture, and the Minister of Power.

The new arrangement will relieve Mr. Selwyn Lloyd (Foreign Secretary), Mr. Thorneycroft (Chancellor of the Exchequer), and Sir David Eccles (President of the Board of Trade) of much of the detailed work involved in the Free Trade Area proposals. Mr. Thorneycroft will, however, continue (i) as chairman of the Ministerial Council of the O.E.E.C.; (ii) as "co-ordinator" of the O.E.E.C. discussions as a whole on the Free Trade Area proposals, and (iii) as British representative at O.E.E.C. Council meetings.

The plan for a European Free Trade Area had previously been discussed at a ministerial meeting of "Uniscan" [see 10496 A] held in London on June 5. The U.K. was represented by Mr. Thorneycroft, Sir David Eccles, and Mr. David Ormsby-Gore (Minister of State, Foreign Office), and the Scandinavian countries by Hr. Krag (Danish Minister of External Economic Affairs), Hr. Skaug (Norwegian Minister of Commerce), and Hr. Lange (Swedish Minister of Commerce).

No official statement was issued on the "Uniscan" discussions, but authoritative reports said that it had been generally agreed that it was desirable, in the interest of strengthening the economy of Western Europe, to extend the existing economic co-operation by creating a Free Trade Area which would include the six member-countries of the European Common Market.

Mr. Van der Beugel, the Netherlands State Secretary for Foreign Affairs, visited London on June 24-25 for Anglo-Dutch consultations on the establishment of the European Free Trade Area. It was stated afterwards that there had been agreement in principle that such an area would be an "essential complement" to the Common Market, and that negotiations for its establishment should be pressed forward as energetically as possible.—(Times - Daily Telegraph - Aftenposten, Oslo - Berlingske Tidende, Copenhagen - Netherlands News Agency)

(Prev. rep. 15393 A.)

B. NETHERLANDS. — Increase in Bank Rate.

The discount rate of the Netherlands Bank was raised from 3½ per cent to 4½ per cent on July 17. The official statement said that the change had become necessary in view of "the continuing lack of equilibrium in the country's economy," resulting in a further fall in Dutch foreign exchange reserves. (Algemeen Handelsblad - Netherlands News Agency)

(Prev. rep. 15216 C.)

C. LIBYA. — Iraqi General appointed Chief of Staff of Libyan Army.

A royal decree was issued by King Idris on July 25 appointing an Iraqi officer, General Abdel Ahmad Raghib, as Chief of Staff of the Libyan Army. The Iraqi Government had previously agreed to second General Raghib to Libya for three years to serve in that capacity.—(New York Times)

D. GUATEMALA. — Assassination of President Castillo Armas. - New Provisional President.

The President of Guatemala, Colonel Carlos Castillo Armas, was shot dead in the Presidential palace on July 26 by one of the palace guards. The assailant, Romeo Vasquez Sanchez (24), immediately committed suicide with the rifle that he had used to kill the President.

President Castillo Armas (42) was an unsuccessful candidate at the Presidential election of 1950, and was subsequently exiled. He returned to Guatemala from Honduras in July 1954, led the revolt which overthrew the pro-Communist regime of President Arbenz Guzman (see 13677 A), and was installed as President of Guatemala a few weeks later for a four-year term.

The Vice-President of Guatemala, Señor Luis Arturo Gonzales Lopez, was sworn in as provisional president of the Republic on July 27. His first act in that capacity was to impose a 30-day state of siege involving the suspension of constitutional guarantees, a ban on political activities, and the establishment of a curfew. A close associate of the late President Castillo Armas, whom he helped to organize the revolt against the pro-Communist regime, President Gonzalez Lopez had held the successive posts of Counsellor to the Presidency, Councillor of State, and president of the Guatemalan Congress.

A Government statement issued shortly after the assassination said that papers had been found on Vasquez Sanchez indicating that he had Communist affiliations. It was subsequently announced that eight members of the Presidential guard, including two officers, had been arrested on suspicion of complicity in the assassination of President Castillo Armas. The Guatemalan Embassy in Washington issued a statement describing Vasquez Sanchez as a Communist fanatic, and emphasizing that the murder of President Castillo Armas would not open the way for a return of Communism in Guatemala.—(New York Times - New York Herald Tribune)

E. CANADA. — Establishment of Canada Council for the Arts, Humanities and Social Sciences.

Legislation was enacted on March 28, 1957, implementing the recommendation of the Royal Commission of 1951 for the establishment of a Canada Council for the Arts, Humanities and Social Sciences. The Canada Council, established under the Act, consists of Mr. Brooke Claxton (a former Cabinet Minister) as chairman, Mgr. Georges-Henri Levesque (former Dean of the faculty of social studies at Laval University) as vice-chairman, and 19 other members, including many prominent educationists and businessmen.

At the Council's first meeting, held in Ottawa on April 30-May 1, Mr. Claxton announced that it had been allocated a sum of $100,000,000 of which half would form a University Capital Grants Fund and the other half an endowment fund. The former amount would be spent over a 10-year period on expanding the Canadian universities to help meet the growing demand for graduates; grants would be made on a basis proportionate to the population of the various Provinces, and would be matched on a dollar-for-dollar basis with sums raised by the universities themselves. The endowment fund—of which only the revenue would be spent—would be used, under the provisions of the Canada Council Act, "to foster and promote the study and encouragement of . . . the arts, humanities and social sciences."

Mr. Claxton pointed out that the Canada Council, as a new venture, would study the methods of the great foundations and organizations in Britain and the United States, such as the Arts Council of Great Britain and the Carnegie, Ford, Guggenheim, and Rockefeller Foundations.

In addition to the above-mentioned objectives, the Canada Council will foster Canadian cultural relations abroad, act as a Canadian national commission for the U.N. Educational, Cultural and Scientific Organization (Unesco), and establish scholarships.—(Montreal Star - Toronto Globe and Mail)

(Prev. rep. 15266 C.)

F. GREECE. — New Primate of Greek Orthodox Church. - Election of Archbishop Theoklitos.

Bishop Theoklitos, Metropolitan of Patras, was elected Archbishop of Athens and Primate of Greece on Aug. 7 in succession to the late Archbishop Dorotheos (68), who died in a Stockholm hospital on July 26 after undergoing a brain operation earlier the same month. The new Archbishop, who is 67, was born in the Peloponnesus and graduated in theology at the University of Athens; he was consecrated in 1931 and appointed to the Patras diocese in 1944. Archbishop Dorotheos had been Primate of the Greek Orthodox Church for little more than a year, having succeeded the late Archbishop Spyridon in March 1956.—(Times) **(Prev. rep. 14801 D.)**

A. UNITED KINGDOM. — Increased Remuneration for Ministers and Members of Parliament. - Attendance Allowance for Members of House of Lords.

The Prime Minister, Mr. Macmillan, announced in the House of Commons on July 4 that, following discussions between the leaders of the three parties, the Government had decided to increase the remuneration of Members of Parliament and Ministers and to introduce a daily expense allowance for members of the House of Lords. The total annual cost of the proposed salary increases would be £400,000. The new arrangements, which came into effect from July 1, were as follows (all figures per annum):

Members of Parliament. The basic salary of M.P.s would continue to be £1,000, but the existing sessional allowance of £2 a day (usually amounting to about £280 p.a.) would be replaced by a sum of £750 to cover parliamentary expenses. The Prime Minister explained that the Government had decided on the figure of £750 because the Select Committee of 1953-54 [see 13719 A] had found, on the basis of figures supplied by the Inland Revenue Department, that this was the average amount which M.P.s laid out "wholly, exclusively and necessarily" in the discharge of their parliamentary duties. The new total salary of £1,750 would be liable to tax, but, as hitherto, Members would be entitled to claim for expenses incurred in the course of their parliamentary duties.

Members of House of Lords. Peers (with the exception of Ministers) would be entitled to claim reimbursement of expenses arising out of attendance at the House up to a maximum of three guineas for each day of attendance. Since the proposed payment would be a reimbursement of expenses arising out of unpaid service, it would not be liable to tax. Mr. Macmillan said that the step had been taken because "it is not right that attendance in the House of Lords should be limited to those who can not only afford to give their service without any remuneration but who can meet out of their own resources the expenses inseparable from such service." The existing arrangement whereby peers could claim for the reimbursement of the cost of rail travel to and from Westminster would remain unchanged.

Ministers. All Ministers in the House of Commons would in future be entitled to draw £750 of their salaries as M.P.s. [Hitherto, only Ministers receiving a salary of less than £5,000 were entitled to draw part (£500) of their parliamentary salaries.] As regards actual ministerial salaries, the following increases would be made: Ministers of State - from £3,000 to £3,750; Financial and Economic Secretaries to the Treasury - from £2,000 to £3,750; Parliamentary Secretaries - from £1,500 to £2,500; Junior Ministers (mainly Lords Commissioners of the Treasury) receiving £1,000 or £1,200 £2,000 or £2,200 respectively (i.e. an increase of £1,000).

Whips. All Whips in the Commons would in future be entitled to draw £750 of their parliamentary salaries (instead of £500 as previously). In addition, the salary of the Chief Whip in the Commons would be increased from £3,000 to £3,750; those of the Deputy Chief Whip in the Commons and the Chief Whip and Deputy Chief Whip in the Lords from £1,200 to £2,200, and those of Whips in both Houses from £1,000 to £2,000.

Others. Increases would be introduced as follows: Chairman of Ways and Means, Lord Chairman of Committees, and Deputy Speaker—from £2,500 to £3,250; Leader of the Opposition—from £2,000 to £3,000; Deputy Chairman of Ways and Means—from £1,500 to £2,500. With the exception of the Lord Chairman of Committees, these persons would also be entitled to draw £750 of their parliamentary salaries (instead of £500 as previously). For the first time, the Speaker would be entitled to draw part (£750) of his parliamentary salary.

The Prime Minister also announced the introduction of cover schemes for personal injuries that might be incurred by Ministers or M.P.s in the course of official business.

Mr. Macmillan said that the Government proposed to take advantage of the opportunity afforded by the Bill covering the increases in ministerial salaries [see below] to include a clause whereby the terms of the Injury Warrant [which provides for the payment of compensation to servants of Crown (or their dependants) in the event of death or injury on duty] would be extended to Ministers. At the same time, arrangements would be made to secure insurance cover for M.P.s travelling on the business of the House, since in their particular case the application of the terms of the Injury Warrant would be inappropriate.

In conclusion Mr. Macmillan announced that the "long-deferred adjustment" in the salaries of members of the boards of nationalized industries would also take place.

The maximum salary of the chairman of a major board would be raised from £8,500 to £10,000, and that of other board members from £5,000 to £7,000. Full details of all the increases (which would be proportionate to the two examples quoted) would be published in a White Paper.

The Prime Minister's statement was welcomed by Mr. Gaitskell, Leader of the Opposition. In the House of Lords, Lord Home made a statement on behalf of the Government similar to Mr. Macmillan's statement in the Commons.

The Chancellor of the Exchequer, Mr. Thorneycroft, stated on July 4 in a written reply that, while information was not yet complete, it was estimated, that the average amount of M.P.s' expenses allowable for income-tax purposes for the financial year 1956-57 was about £880, as compared with the figure of £750 for the financial year 1952-53.

In the House of Lords a Government resolution approving the introduction of an expense allowance for peers was agreed to on July 8 without a division.

Introducing the resolution, **Lord Home** said that the scheme would be supervised by the committee of the Chief Whips of the three parties which already supervised the rail travel scheme. **Viscount Alexander of Hillsborough,** Leader of the Opposition in the House of Lords, expressed his satisfaction that the Government had found it possible to take this step "without attaching any strings in connexion with the constitutional future of the House."

On July 9 the House of Commons similarly accepted without a division a resolution (i) authorizing the increase in M.P.s' remuneration (described as "an allowance in respect of their parliamentary expenses"), and (ii) approving the introduction of an expense allowance for peers.

Mr. Butler (Home Secretary and Leader of the House), who moved the resolution, emphasized that while the expenses incurred by M.P.s were quite exceptionally heavy, they, unlike everyone else, had no employer from whom they could claim reimbursement.

Mr. Gaitskell, welcoming the resolution for the Opposition, said that because of the hardship which many Members had been suffering in recent years, there had been a definite decline in the efficiency of Parliament; if this process had not been arrested to some extent by the present proposals, it would have eventually affected the quality of those who sought to enter Parliament. Mr. Gaitskell went on to quote figures indicating that, even with the increase, M.P.s still received substantially less than parliamentarians in other countries. He concluded by expressing the hope that a system could be devised whereby M.P.s would not be required to regulate their own salaries. Either they could be linked with some other salary paid in an official capacity, or an outside tribunal could be set up to consider the matter from time to time.

The Ministerial Salaries Bill, providing for the increases in ministerial salaries previously announced, was introduced by Mr. Thorneycroft on July 9 and received an unopposed second reading on the same day. The Bill was read a third time in the Commons on July 11, passed through all its stages in the Lords on July 15, and received the Royal Assent on July 17. (Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. 14943 A; 13862 C; 13719 A.)

B. RELIGIOUS LIFE. — Mergers of Protestant Denominations in the United States. - Formation of the United Church of Christ.

A new Protestant denomination, the United Church of Christ, came into existence in the United States on June 25, 1957, as the result of a fusion between the Congregational Christian Churches, with 1,342,000 members, and the Evangelical and Reformed Church, with 800,000 members.

The merger, which had been under discussion for about 12 years, was finally approved by the Congregational Churches in July 1956 and by the Evangelical and Reformed Church in September of the same year. The Congregational Christian Churches stem from the Anglican Church of England, and the Evangelical and Reformed Church from German and Swiss theology. The United Church of Christ, with over 2,000,000 members, will be the seventh largest Protestant denomination in the United States.

An eventual merger of three of the Lutheran Churches in the U.S.A., under the name of the American Lutheran Church, was agreed upon in June 1956 by the Evangelical Lutheran Church (1,000,000 members), the American Lutheran Church (862,000) and the United Evangelical Lutheran Church (57,000), the target date of Jan. 1, 1960 being set for the establishment of the new Church. The E.L.C., with headquarters at Minneapolis, is of Norwegian origin; the A.L.C., with headquarters at Columbus (Ohio), was formed in 1930 by the merger of three synods of German background; and the U.E.L.C., in Nebraska, is of Danish origin.

Four other Lutheran churches—the United Lutheran Church (2,300,000 members), the Augustana Lutheran Church (540,000), the American Evangelical Lutheran Church (25,000) and the Finnish Evangelical Lutheran Church (35,000)—jointly decided in October last to merge with "all or any" Lutheran groups in the United States. A Joint Commission on Lutheran Unity was established by these four churches in December last.

The Presbyterian Church in the U.S.A. (over 3,000,000 members) and the United Presbyterian Church of North America (about 250,000) decided in 1956 to merge, as from June 1958, under the name of the United Presbyterian Church in the U.S.A.—(New York Times - New York Herald Tribune)

A. ISLAM. — Death of the Aga Khan. - Accession of Prince Karim as Aga Khan IV.

His Highness Sir Sultan Mohammed Shah, spiritual head (Imam) of the Ismaili Moslem sect, died at his villa in Switzerland on July 11, aged 79. Statesman, scholar, and sportsman, he played a distinguished role for many years in imperial and international affairs, particularly in connexion with the constitutional developments in India from the turn of the century to the nineteen-thirties. The Aga Khan was descended in the direct line from the Prophet Mohammed through Fatima, the prophet's daughter.

The eldest son of Aga Khan II, he was born in Karachi in 1877, and on the death of his father in 1885 succeeded as Aga Khan III when only eight years of age. Brought up by his mother, a Persian princess, he concerned himself closely from his early years with the welfare of the Ismaili Moslems and the general advancement of the Moslems of India, and while still a young man was nominated by Lord Curzon to the Viceroy's Legislative Council. Desirous of seeing Indian Moslems play their full part in public affairs, he founded the All-India Moslem League in 1906 and was its first president for three years. A liberal, an advocate of communal harmony, and an opponent of nationalist extremism, he welcomed the constitutional reforms initiated by John Morley in 1910 and co-operated closely with G.K. Gokhale, the Hindu nationalist leader, while remaining a convinced advocate of a united India within the British Commonwealth

At the outbreak of war in 1914 the Aga Khan's great personal influence and prestige in the Moslem world were exerted from the outset in the British cause. He issued a proclamation to his Ismaili followers in 1914 stressing their obligation to remain loyal to the British Crown, and when Turkey threw in her lot with Germany he issued a manifesto to the entire Islamic world stressing the importance of friendship and co-operation between Great Britain and the Moslem peoples. During the First World War secret missions of diplomatic importance were entrusted to him in Egypt, Switzerland, and elsewhere, some of which yielded important results. In pursuit of his policy of friendship between Britain and Moslem peoples, he endeavoured after the war to secure the mitigation—ultimately obtained—of the Allied terms to Turkey.

In Indian politics the Aga Khan strove consistently for a working agreement between Moslems and Hindus whereby communal claims could be adjusted in the interests of India as a whole; his efforts to achieve an agreement between the Moslem League, the Congress Party, and the minorities were, however, eventually defeated by extremism on both sides. He led the Moslem delegation at the London Round-Table Conference in 1930-32, acting concurrently as chairman of the entire British-Indian delegation. In 1933 he was chairman of the British-Indian delegation to the resulting Joint Select Committee of both Houses of Parliament, presided over by Lord Linlithgow, which was a prelude to the passing of the India Act of 1935. As Indian delegate to the League of Nations he was a conspicuous figure at Geneva in the 'thirties, being President of the League Assembly in 1937.

At the outbreak of the Second World War the Aga Khan issued a manifesto to the Ismaili Moslems enjoining loyal support to Britain. Owing to recurrent ill-health, he was unable to play any notable part in promoting Allied aims as he had done in 1914-18. He went to Switzerland for medical treatment in 1940, remained in that country throughout the war years, and did not return to England until 1947. A further succession of illnesses prevented him from accepting offers from Delhi of high diplomatic office abroad when a fixed date had been announced for the attainment of Indian independence. He took up Persian citizenship in 1949, while remaining a British subject.

The Aga Khan paid frequent visits to Britain throughout his life and had a long and close personal connexion with successive British sovereigns, particularly with Edward VII. Made a K.C.I.E. in 1902, he was subsequently the holder of four Grand Crosses—G.C.I.E. (1902), G.C.S.I. (1911), G.C.V.O. (1923) and G.C.M.G. (1955). In 1934 he was sworn of the Privy Council.

Within his own community the Aga Khan sponsored and encouraged a number of important social reforms among the Ismaili Moslems, particularly in the field of education and in raising the status of women by abolishing the veil. A generous benefactor and an organizer of great ability, he promoted the building of schools, hospitals, and other social and cultural amenities among the Ismaili communities in East Africa, Pakistan, India and elsewhere. Interested throughout his life in philosophical, political, and religious questions, he was a man of great culture, a lover of Persian poetry, and widely read in English, French and German literature. He was the author of *India in Transition*, an important study of Indian and Middle Eastern affairs which appeared in 1918, and of an autobiography, published in 1954.

As owner and breeder of racehorses the Aga Khan had an unparalleled career on the Turf, his colours being carried to victory in every important race in England, Ireland, France and India. He won the Derby five times, in addition to numerous victories in other classic races (the St. Leger, etc.), his horses winning £992,000 in prize money in England alone. Among many famous horses to carry his colours were *Bahram*, *Mahmoud*, and *Tulyar*, the last-named being sold to the Irish Government in 1953 for £250,000.

The Aga Khan was four times married: in youth to a cousin, the marriage being subsequently dissolved; in 1906 to an Italian sculptress, Signorina Teresa Magliano, who died in 1926; in 1929 to Mlle Andrée Carron, a French lady, the marriage being dissolved in 1942, and in 1944 to Mlle Yvette Labrousse, the present Begum. He was survived by his widow and by two sons—Prince Aly Khan (14), who was born of his second marriage, and Prince Sadruddin (24), born of his third marriage.

The Ismaili Moslems, numbering between 12,000,000 and 15,000,000, are most numerous in East Africa, Pakistan, the Bombay area, Persia, the Arabian littoral, and Syria. They form part of the Shia, one of the two great divisions of the Islamic religion—the other being the Sunni, to which the majority of Moslems belong.

The schism between the Shia and Sunni Moslems originated in a dispute over the succession to the Prophet Mohammed in the spiritual leadership of Islam (the Caliphate). The Ismailis take their name from Ismail, son of the sixth Imam (died A.D. 758), who, they hold, was wrongly disinherited by his father They played an important role in medieval Arab history, their followers conquering Egypt and North Africa and supplying the dynasty of Fatimite Caliphs which reigned in Cairo until overthrown by Saladin in the twelfth century.

The title "Aga Khan" was bestowed on the Imam of the Ismaili Moslems by the British Government in the 19th century. Its first holder was the Imam Hassan Ali Shah, who was born in Persia in 1800 and became Governor-General of Kerman. After disputes with the reigning Persian dynasty he settled in Bombay with several thousand followers and gave notable assistance to British arms both in the first Afghan war and in the campaign for the conquest of Sind. He died in Bombay in 1881 and was succeeded by his eldest son (Aga Khan II), who died in 1885 after enjoying the title for only four years.

A statement was issued on July 12 from the Villa Barakat, at Versoix (the Swiss home of the Aga Khan) announcing that Prince Karim (20), the eldest grandson of the Aga Khan and eldest son of Prince Aly Khan, had been nominated by his grandfather as Imam of the Ismaili Moslems. The reasons for the choice were set forth as follows in the will of the late Aga Khan III, which was made public on the same day:

"Ever since the time of my ancestor Ali, the first Imam—that is to say, over a period of some 1,300 years—it has always been the tradition that each Imam chooses his successor at his absolute and unfettered discretion from among sons or remoter male issue. In view of the fundamentally altered conditions in the world in recent years due to the great changes which have taken place, including the discoveries of atomic science, I am convinced that it is in the interest of the Ismaili community that I should be succeeded by a young man who has been brought up in the midst of the new age and who brings a new outlook on life to his high office as Imam."

The 20-year-old Prince Karim, who became the 49th Imam of the Ismaili Moslems, was educated at Le Rosey (the well-known Swiss public school) and was studying mathematics and allied subjects at Harvard at the time of his grandfather's death. He has spent most of his formative years in Europe and the U.S.A. but has also travelled widely in the Moslem world, particularly among the Ismaili communities of East Africa and the Middle East. It was understood that he would not be returning to Harvard following his accession as spiritual leader of the Ismaili sect.

Prince Karim is the elder son of Prince Aly Khan by the latter's first marriage to the Hon. Mrs Joan Guinness (formerly the wife of Mr. Loel Guinness), which was dissolved in 1949. Though the succession to the Imamate normally falls to the eldest son of the Imam, the matter is one for the individual choice of the holder of the office, and departures from the strict rule of succession have been made on occasion in the past.

Prince Karim formally took up his duties as Aga Khan IV on July 13, when Ismaili delegations from India, Pakistan, Malaya, Persia, Madagascar and Kenya were presented to him by the Begum at the Villa Barakat. He had previously received messages of allegiance from the Ismaili communities throughout the world. The first public statement issued by Aga Khan IV was worded as follows:

"My grandfather dedicated his life to the Imamate and Islam, both of which for him always came first, and above all other considerations . . . I follow a great man in a great responsibility . . . My life, as his, will be dedicated to the service of my followers . . . My aim in the future will be to continue the vast work of my grandfather, to do all in my power for the welfare and betterment of our community and its economic and financial institutions: maternity homes, boys' and girls' schools, hospitals, trusts, and European and American scholarships . . ."

The embalmed body of the late Aga Khan III was flown from Switzerland to Egypt and interred on July 19 in the grounds of his villa at Aswan, on the banks of the Nile. The mourners were headed by the Begum, Prince Karim (Aga Khan IV), and the latter's father, Prince Aly Khan. Some 800 Ismaili Moslem leaders from all parts of the world were present, in addition to official representatives of the British Government (Sir Edward Twining, Governor of Tanganyika) and the Egyptian Government.

(Times - Daily Telegraph - Manchester Guardian)

A. LEBANON. — Government Victory in General Election. - Defeat of "National Front" Bloc.

General elections held in the Lebanon in June resulted in an overwhelming victory for the Government headed by M. Sami Solh, and a correspondingly heavy defeat for the Opposition parties grouped in a National Front led by M. Saeb Salam and M. Abdullah Yafi, both former Prime Ministers. In the new and enlarged Chamber of Deputies (66 members, an increase of 22 under an electoral law passed in April) the Government obtained 50 seats and the National Front eight, the remaining eight seats going to small anti-government parties not affiliated to the National Front.

The Lebanese electoral system makes provision for the representation of all religious and sectarian communities in the country. Of the 66 seats in the Chamber of Deputies, 20 are reserved to Maronite Christians, 14 to Sunni Moslems, 12 to Shia Moslems, 7 to Greek Orthodox candidates, 4 to Greek Catholics, 4 to the Druses, 3 to Armenian Orthodox candidates, and one to the Armenian Catholics; the remaining seat is allocated to other religious minorities. The constituencies are of a multi-member character so that all the religious confessions can be represented. For example, in the first electoral district of Beirut both Government and Opposition lists must comprise two Sunni Moslems and one each from the Maronite, Greek Orthodox and Armenian Orthodox communities; and in the second electoral district the respective lists must include two Sunnis, one each of the Shia Moslem, Armenian Catholic, and Armenian Orthodox communities, and one representing all other religious minorities. A similar system operates in all other electoral districts.

The system described above is also reflected in the constitutional provision that the President of the Lebanese Republic must be a Christian and the Prime Minister a Sunni Moslem.

The general election was held in four stages on four successive Sundays, viz.: (1) on June 9 in Beirut (the capital) and South Lebanon; (2) on June 16 in the Mount Lebanon area; (3) on June 23 in the Bekaa valley, a fertile area lying between, and parallel to, the Lebanon and Anti-Lebanon ranges; and (4) on June 30 in North Lebanon.

Government candidates (grouped in lists representing the various communities, and not political parties) obtained large majorities in all four areas, particularly in Beirut and South Lebanon, the Mount Lebanon district, and the Bekaa valley. In Beirut, ten of the 11 candidates elected were Government supporters, the poll being headed by the Prime Minister (M. Sami Solh) with 19,078 votes. A significant result in the Mount Lebanon area was the defeat of M. Fuad Ammoun (a former Director-General of the Foreign Ministry), running on a pro-Egyptian platform, by M. Emile Boustany (an American-educated and pro-Western member of the outgoing Parliament), who polled 11,500 votes against 3,500 for M. Ammoun. The Foreign Minister, Dr. Malik, heavily defeated a Communist in North Lebanon. Voting was in general somewhat higher than at the last (1953) election—averaging 50-55 per cent in Beirut and South Lebanon against 40 per cent in 1953.

Although the elections were held in a calm atmosphere and with very few incidents, serious rioting occurred before the elections in Beirut, where eight persons were killed and over 100 injured on May 30 in clashes between National Front supporters on the one hand and troops and police on the other. The National Front, campaigning on a pro-Egyptian and pro-Syrian platform, and strongly opposed to the Government's pro-Western policy, had demanded on May 28 the resignation of the Government and the appointment of a caretaker administration under General Chebab (the Commander-in-Chief) so that the elections could take place in an "unbiased" atmosphere. Following the rejection of this demand, the National Front leaders—headed by M. Yafi and M. Salam—proclaimed a general strike and staged mass demonstrations in Beirut on May 30, leading to the above-mentioned disorders. Among those injured in the disturbances were M. Salam (who was taken to hospital), his wife, and the wife of M. Yafi. A Government statement said that the Opposition had hoped to carry out a *coup d'état* by inciting the crowds to seize control of Government buildings, whilst the Opposition claimed that it had intended to protest "peacefully" against the Government's foreign policy and its election tactics.

The tension was eased on June 3 by two decrees, the first of which appointed two "neutral" ministers (one Moslem and one Christian) to serve as a ministerial commission to supervise electoral procedures and investigate any allegations of irregularities. The second decree stipulated that all security measures taken during the period of the election, whether by the armed forces, police, or *gendarmerie*, would be subject to the final authority of General Chebab, whose impartiality was recognized by the Government and the Opposition alike. The National Front expressed itself satisfied with these assurances and agreed on the same day to call off the general strike—which, however, had met with a negligible response and had been confined to a few areas in Beirut.

Reports from the Lebanon indicated that Syria, Egypt, and the Communist countries had given overt support to the National Front's anti-Government and anti-Western campaign, despite Opposition denials. In a despatch from Beirut on June 2, the Special Correspondent of *The Times* in that city described the situation as follows:

"... The most significant developments have been substantiated reports of Syrian and Egyptian complicity in the Opposition's demonstrations, and the Opposition's simultaneous denials of foreign participation. Yesterday the Prime Minister, Sami Solh, referred to the part played in [the Beirut] disturbances by Palestine refugees (who are not allowed to take part in Lebanese politics), 'some Syrian mercenaries residing in Lebanon, and other non-Lebanese.' Security forces sources say that among those detained it is understood the number is about 500 - were Syrian subjects who illegally entered Lebanon and carried arms during [the Beirut] riots; and reports that two members of Syria's *Deuxième Bureau* were arrested, along with an officer who is believed to be a secretary of Colonel Sarraj, have now been confirmed. Of the eight people now acknowledged killed [in the riots], six came from outside Beirut, as also did a high proportion of the injured ...

"It is also learned from trustworthy sources that a Syrian car was seen unloading arms outside the Egyptian Embassy here early last week (reports from security forces refer to arms of Czech manufacture having been captured) and that £200,000 of Egyptian money was distributed in the Lebanon among Opposition supporters immediately before the disturbances. Evidence of Communist connivance centres around the activities of the Syrian Communist leader Khaled Bagdash, who is believed to have transmitted instructions to the agitators in Lebanon through one Nicholas Shawi, a naturalized Lebanese of Syrian origin ...

"No observer can fail to note the similarity between the Opposition's tactics here and those of the Nabulsi forces in Jordan six weeks ago ... Cairo, Damascus, and Moscow radios have been playing the same inflammatory role in this affair as they did in Jordan, describing the present Government as the 'tool of the imperialists,' and classifying the United States as the chief enemy."

The National Front's electoral defeat involved the unseating of M. Salam and M. Yafi, both of whom failed to secure election in South Lebanon.—(Le Monde, Paris - Times)

(Prev. rep. Elections, 13159 B.)

B. BULGARIA. — Purge of Communist Leaders.

It was announced in Sofia on July 16 that M. Georgi Chankov, a First Deputy Premier, had been expelled from the politburo and central committee of the Bulgarian Communist Party, and that M. Dobri Terpeshev (Minister of Labour) and General Yanko Panov had been expelled from the party's central committee. M. Chankov was expelled for "factional activity" and "systematically undermining party unity and the principle of collective leadership," while M. Terpeshev and General Yanov were expelled for "not having discontinued their activities against the party line and party unity, in spite of strong reprimands."

M. Chankov, a prominent leader of the Bulgarian Communist Party for many years, had held office almost continuously since 1947. M. Terpeshev had previously been expelled from the central committee as a "Titoist" in 1950 but was subsequently rehabilitated; little had been heard of him until January last, when he was appointed Minister of Labour. General Yanov, an Army officer, was a Communist of long standing.

A further announcement on July 17 stated (i) that M. Chankov had been relieved of his post as a First Deputy Premier; (ii) that he had been succeeded by M. Raiko Damyanov, Minister of Trade and one of the three Deputy Premiers; and (iii) that M. Boris Taskov had been appointed Minister of Trade *vice* M. Damyanov.—(Neue Zürcher Zeitung - Times - Le Monde, Paris) **(Prev. rep. Bulgaria, 15467 A; 15369 A; Soviet and Rumanian Purges, 15660 A; 15639 A.)**

C. UNITED KINGDOM. — Housing Construction.

Figures published by the Ministry of Housing and Local Government on Aug. 1 showed that 152,405 permanent houses and flats were completed in Britain during the first half of 1957, of which 85,922 were built by local authorities, 61,358 by private builders, 1,191 by housing associations, and 3,934 by Government departments. The total number of permanent houses and flats completed in Britain since the end of the war was given as 2,693,280, of which 1,917,965 had been built by local authorities, 667,580 by private builders, 41,028 by housing associations, and 66,707 by Government departments.—(Ministry of Housing and Local Government)

(Prev. rep. 15420 A.)

D. FINLAND. — M. Fagerholm elected President of Finnish Diet.

M. Karl-August Fagerholm, the former Prime Minister, was elected President of the Diet on May 31 (by 140 votes out of 163) in succession to M. Suksclainen, the new Prime Minister. (Le Monde, Paris) **(Prev. rep. 15573 A.)**

AUGUST 10—17, 1957

A. FRANCE. — Creation of Joint Organization for the Sahara. - Exploitation of Saharan Mineral Wealth.

The appointment of M. Max Lejeune as Minister for the Sahara in the Bourgès-Maunoury Cabinet brought into effect legislation which had been passed by the French Parliament in December last and promulgated in the *Journal Officiel* on Jan. 11, 1957.

The measure, providing for the organization of the French Sahara into a single economic unit under unified control, had been proposed by M. Mollet's Government on the grounds that such control was essential if the great natural resources of the Sahara were to be exploited with the utmost speed and efficiency. Political and administrative control of the Sahara, which is divided between the *Gouvernements-Généraux* of Algeria, French West Africa, and French Equatorial Africa, remained unchanged under the new arrangements.

The Bill was first passed by the National Assembly on Dec. 14, 1956, by 376 votes to 160 (the Communists opposing); approved by the Council of the Republic in a slightly different form on Dec. 28, by 296 votes to 38; and, with these amendments, was finally passed by the National Assembly on Dec. 30, 1956. Its main provisions were as follows:

(1) A new body, to be known as the Joint Organization for the Sahara (*Organisation Commune des Régions Sahariennes*), would be set up both to organize and control the economic development of the area and to raise the standard of living of the native populations. The new authority would be directly responsible to the Prime Minister's office.

(2) The Joint Organization would comprise the following organs:

(*a*) A Mixed Commission of Co-ordination and Control, consisting as to one-half of representatives of the territories concerned and as to the other half of members of the National Assembly, the Council of the Republic, the Assembly of the French Union, and the Economic Council, and having the task of "defining and controlling" the development programmes for the area.

(*b*) An Executive Committee (*comité de direction*), half of whose members would be nominated by the French Government and the other half by the Mixed Commission.

(*c*) A Delegate-General appointed by the French Government, who would be responsible for the execution of the programmes as well as for defence and public order. He would be assisted in the latter task by a general officer commanding the land and air forces stationed in the Sahara.

(3) The area under the control of the Joint Organization would comprise Southern Algeria, the northern parts of the French Sudan and Niger (French West Africa), and Chad (French Equatorial Africa). The West African colony of Mauretania, which under an earlier plan was to have formed part of the new organization, was left free to join later if it wished to do so.

(4) French technical and financial aid for the economic development of the Sahara area would be directed through the *Bureau Industriel Africain*. This bureau—defined at the time of its creation as "a bloc institution of an industrial and commercial character and financially autonomous"—is headed by M. Louis Armand, president of the French National Railways.

(5) With the approval of the French Government, the Delegate-General would have power to negotiate with foreign or international organizations in respect of loans or participations in Saharan undertakings.

(6) Neighbouring countries in North Africa (e.g. Morocco) could associate themselves permanently with the work of the Joint Organization, on which they would then be represented.

The detailed provisions of the Bill were worked out by M. Félix Houphouet-Boigny (an African), deputy for the Ivory Coast, Minister attached to the Prime Minister's office in M. Mollet's Government, and Minister of State in the Bourgès-Maunoury Cabinet. As the Government's chief spokesman in the National Assembly, he made an impassioned plea for the Bill's adoption in the joint interests of France and the populations of the territories concerned.

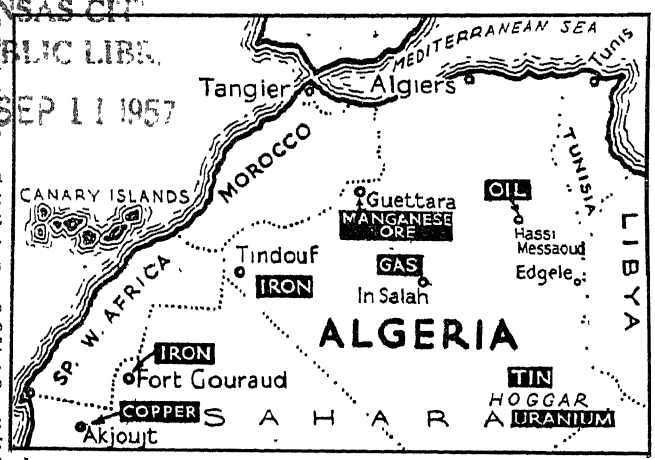
In a statement on June 19, M. Lejeune explained that in his ministerial capacity he would carry out the functions of the Delegate-General of the Joint Organization, and would also exercise the administrative powers delegated to him by the *Gouvernements-Généraux* of Algeria, French West Africa, and French Equatorial Africa within the zone covered by the Organization. M. Armand stated on the same date that the *Bureau Industriel Africain* had set up a special study centre for human problems, to deal with questions affecting those who would in future be employed in the Sahara.

Some details are given below of the oil and mineral resources of the Sahara, and of the plans for their exploitation:

Oil and Natural Gas. The first discovery of oil in the Sahara was made early in 1956 in the Edjelé region, near the Algerian-Libyan border. A second important strike at Tiguentourine, 45 miles west of Edjelé, was announced in June 1956. The discoveries were made by the *Compagnie de Recherches et d'Exploration de Pétrole au Sahara* (C.R.E.P.S.), one of the four companies controlled by the French Government which, under the general direction of the *Bureau de Recherches de Pétrole*, had been prospecting in the area since 1953. Royal Dutch-Shell have a 35 per cent interest in the C.R.E.P.S.

A still larger oil deposit was discovered in December 1956 at Hassi-Messaoud, in the Ouargla area of east-central Algeria, 400 miles south of Constantine. Further oil strikes in this area were reported in May-June 1957, intensive drilling operations being carried out by the *Société Nationale de Recherche de Pétrole en Algérie* (S.N. Repal)—one of the State-controlled companies—and the *Compagnie Française des Pétroles Algérie*.

KANSAS CITY PUBLIC LIBRARY SEP 11 1957



(*Financial Times*)

M. Collot, director-general of "S.N. Repal," said on June 14, 1957, that the minimum figure for the oil reserves at Hassi-Messaoud was estimated at 100,000,000 tons; that the transport of oil through a small provisional pipeline to Touggourt would begin in January 1958, the oil then being sent by rail from Touggourt to Philippeville *via* Biskra, and that a permanent pipeline, which was expected to be ready by 1960, would extend to Algiers or Bougie. It had been reported in March that work had started on enlarging the narrow-gauge railway from Touggourt to Biskra for the purpose of transporting the oil from Hassi-Messaoud.

M. Guillaumat, head of the *Bureau de Recherches de Pétrole*, stated on Jan. 21 that the Edjelé field would be producing 4,000,000 tons of oil per annum by 1959, while 5,000,000 tons were expected to come from Hassi-Messaoud. M. Maurice Lemaire (State Secretary for Industry in M. Mollet's Government, and one of the chief advocates of Saharan development), declared on March 11 that at least 10,000,000 tons of oil from the Sahara wells could be transported to the Mediterranean coast by 1960.

M. Lejeune, the new Minister for the Sahara, said in his press statement of July 10 (see above) that France could be self-sufficient in petrol within three years if the necessary financial and physical effort were made. It was "a miracle for France to have such riches within her grasp," but it was necessary to act quickly, to plan on a big scale, and to find a minimum initial investment of 350,000 million to 400,000 million francs.

It was announced on April 1, 1957, that three of the companies which had been conducting oil prospecting operations in the Sahara had been awarded a number of concessions (valid for five years) in the area: (*a*) the *Compagnie d'Exploration Pétrolière* (in which the French affiliate of British Petroleum holds a 2·08 per cent share, while 57 per cent of the capital belongs to the *Bureau de Recherches de Pétrole*) received four permits covering a total area of 33,290 square kilometres, with the obligation to spend at least 3,329,000,000 francs (about £3,329,000) on work in the area; (*b*) the *Compagnie de Recherches et d'Exploration de Pétrole au Sahara* received a permit covering 6,000 square kilometres on the Libyan border and involving a minimum expenditure of 600,000,000 francs (about £600,000); and (*c*) the *Compagnie Française des Pétroles Algérie* was granted a concession for an area of 5,200 square kilometres and requiring a minimum expenditure of 420,000,000 francs (about £420,000).

In addition to oil, large natural gas deposits have been discovered in the area south of In Salah (745 miles south of Algiers) and at Hassi-R'Mel, about 460 miles east of In Salah and some distance west of Hassi Messaoud.

Iron Ore. One of the world's largest deposits of iron ore, estimated at 3,000,000,000 tons, was found at Gara Djebilet, about 75 miles south-east of Tindouf in Western Algeria, near the borders of Morocco and the Spanish colony of Rio de Oro. The ore, with a consistency equivalent to second-grade Swedish ore, could be easily mined but an investment of 1,000,000,000 francs would be needed to build mine installations, a railway across Southern Morocco to the Atlantic coast, and a suitable port there (possibly at Agadir).

Iron ore in smaller quantities, but of a quality equal to the finest Swedish ore, was also found in the Fort Gouraud area of Mauretania. The *Société des Mines de Fer de Mauritanie* (Miferma) was founded some years ago to exploit these deposits, 15 per cent of its capital being originally taken over by the British Iron and Steel Corporation,

34 per cent by Frobisher Ltd. (the Canadian mining concern), and 51 per cent by French interests. Frobishers, however, decided in March 1957 to dispose of their holding, and on April 30 it was reported from Paris that 15 per cent of Miferma's share capital had been acquired, with the French Government's consent, by Finsider (the Italian concern which controls about one-half of the Italian steel industry), whilst the remaining 19 per cent of the former Frobisher holdings had been taken over by the existing French and British interests.

Other Minerals. The only other minerals at present being exploited in the region are coal deposits south of Colomb-Béchar (with an annual production of 300,000 tons) and a small amount of tin in the Niger territory. Plans have been made, however, for the exploitation of manganese deposits (estimated at 1,500,000 tons) at Guettara, south of Colomb-Béchar, and copper has been found at Akjoujt, in Mauretania. In addition, traces of uranium, wolfram and tin have been found in the Hoggar *massif* in the extreme south of Algeria.

It was announced in Paris on March 27 that major French banking interests had completed plans to form a new company to exploit the mineral and oil resources of the French Sahara. This company—the *Compagnie Française du Sahara*—would undertake exploration work and also finance the exploitation of proved resources. The main participants are the *Bureau Industriel Africain* (see above); the *Banque de l'Indochine*; Lazard Frères; the *Crédit Lyonnais*; the *Banque de Paris et des Pays-Bas*; the *Union Européenne Industrielle et Financière*; Rothschild Frères; and the *Banque de l'Union Parisienne*. M. Henri Bonnet, the former French diplomat, is president of the company.—(Le Monde, Paris - Times - Financial Times)

A. MAURITIUS. — Constitutional Reforms. - Commission of Inquiry into Voting System. - Introduction of Ministerial Government.

The British Colonial Secretary, Mr. Lennox-Boyd, made a statement to the House of Commons on March 8 on the results of discussions in London with a Mauritian delegation on the proposed constitutional reforms in the Colony (see 14820 A). The delegation, comprising eight members of the island's Legislative Council (four from the Mauritius Labour Party, two from the *Parti Mauricien*, and two nominated) had had talks with British officials at the Colonial Office, in which Mr. Lennox-Boyd and the Governor of Mauritius (Sir Robert Scott) participated.

Mr. Lennox-Boyd announced that full agreement had been reached on all outstanding points concerning the future constitutional status of the island, with the exception of the method of voting under the new constitutional system. In view of divergencies on this matter, it had been agreed to set up a three-member Commission to inquire into the question. The Colonial Secretary's statement is summarized below:

Method of Voting. Mr. Lennox-Boyd said that there was general agreement that elections to the Mauritius Legislative Assembly should be held by universal adult suffrage, and that voting should be on grounds of party and political principle rather than of race or religion. The Mauritius Labour Party had suggested that the island should be divided into single-member constituencies, but the other delegates thought that this would be impracticable, and he himself felt that it would tend to produce artificial boundaries which would perpetuate communal divisions. The *Parti Mauricien* and the nominated members, while preferring proportional representation by single transferable vote, had expressed readiness to accept the party-list system in an effort to reach agreement.

Electoral Commission. It had finally been decided that a Commission of three persons from outside Mauritius, to be appointed by the Colonial Secretary, should examine whether it was possible to divide the Colony into a series of single-member constituencies up to a maximum of 40, of approximately equal voting strength but with a minimum electorate in any one constituency of 5,000, so that:

(*a*) Each main section of the population should have adequate opportunity to secure representation in the Legislative Council corresponding to its numerical strength in the community as a whole.

(*b*) Each constituency should have reasonable geographical boundaries.

(*c*) The boundaries could be expected to endure for a reasonable number of years, while remaining consistent with the primary objective under (*a*).

If the Commission found that it was not possible to demarcate single-member constituencies in accordance with these basic principles, it would be instructed to demarcate boundaries for 11 three-member constituencies, based as far as possible on present geographical divisions. These constituencies should be roughly equal in the number of voters.

It had been agreed that if the Commission found that a satisfactory system of single-member constituencies could not be introduced in accordance with the above principles, elections should be held on the party-list system in the three-member constituencies to be demarcated by the Commission. All the Mauritian delegates had pledged themselves to co-operate, and to persuade the members of their parties to co-operate, in the acceptance and working of whichever of these two systems was introduced.

Legislative Council. In accordance with the constitutional proposals of 1956, the Governor would be enabled to appoint a maximum of 12 members to the Legislative Council, with the proviso: (*a*) that nomination would not be used to frustrate the results of the elections; (*b*) that it should ensure the representation of special interests of those who had no chance of obtaining representation through election; and (*c*) that it might be used to assist in the working of Government—"Government" in this context meaning a Government largely composed of Ministers and associated through them and their adherents with the Legislative Council.

Executive Council. It had been agreed that the Executive Council should consist of nine unofficial members (instead of the previous six), in addition to the three *ex-officio* members, and that its composition should reflect the composition of the Legislative Council—that is, any groups in the Legislative Council that accepted an invitation to join the Government would be represented among the nine unofficial members of the Executive Council in proportion to their strength in the Legislative Council. The appointments would be made by the Governor in accordance with this principle, and after consultation with the members of the Legislative Council.

Ministerial System. It had also been agreed that the ministerial form of government should be introduced as soon as possible, and before the next elections [due to be held in August 1958].

It was announced on July 16 that Mr. Lennox-Boyd had appointed Sir Malcolm Trustram Eve, Q.C., Mr. Robert Beloe, and Mr. E. R. Sunbury as the members of a Mauritius Electoral Boundary Commission which would visit the island during the summer and report to the Colonial Secretary in October. Sir Malcolm Trustram Eve (chairman) has presided over a number of Royal Commissions and official inquiries; Mr. Beloe is Chief Education Officer for Surrey; and Mr. Sunbury was secretary of the Ceylon Delimitation Commission in 1946.

A ministerial form of government was introduced in Mauritius on July 5, in conformity with the agreement reached at the London discussions and mentioned by Mr. Lennox-Boyd in his statement to the House. Nine unofficial members of the Executive Council were appointed Ministers (six with portfolios and three without portfolios), of whom six were members of the Mauritius Labour Party and three were non-political. Four of the nine members were elected under the existing system of proportional representation with single transferable vote, whilst five were nominated by the Governor after consultation with the Legislative Council. The appointments were as follows:

Mr. G. Forget, Health and Social Services; Dr. E. Millien, Labour; Mr. A. M. Osman, Agriculture and Lands; Dr. S. Ramgoolam, Ministerial Secretary to the Treasury; Mr. Guy Sauzier, Works and Communications; Mr. R. Seeneevassen, Education and Institutions. The three Ministers without portfolio (Dr. A. Celestin, Mr. R. Rault, and Mr. R. Vaghjee) will undertake some of the diverse duties of the three *ex-officio* members—the Colonial Secretary, the Procureur and Advocate-General, and the Financial Secretary.

[Mr. Sauzier, secretary of the Chamber of Agriculture, is an expert on questions relating to the sugar industry; Mr. Osman is a leading sugar planter; and Dr. Celestin is one of the leading surgeons in Mauritius. Mr. Sauzier and Dr. Celestin were members of the Mauritian constitutional delegation to London.]

The Legislative Council consists at present of 19 elected members (of whom 14 belong to the Mauritius Labour Party), 12 members nominated by the Governor, and three *ex-officio* members. The Governor's power to nominate 12 members ensures that all minorities—including Mauritian French, Moslem, Indian, Coloured, and Chinese—are adequately represented. Under the new constitutional proposals, the elected members will be increased from 19 to 25, while the nominated and *ex-officio* members will remain unchanged.

The two leading parties in Mauritius are the Mauritius Labour Party, in which the Hindu community is strongly represented, and the (conservative) *Parti Mauricien*. At the last municipal elections in Port Louis (capital of the island), held in September 1956, 11 of the 16 seats were won by the Labour Party and the other five by the *Parti Mauricien*.

B. TURKEY. — Civil Aviation Agreement with B.O.A.C. - British Participation in Turkish Airways.

Under an agreement signed in Ankara in July between Turkish Airways and the British Overseas Airways Corporation, B.O.A.C. agreed to buy £500,000 worth of shares in Turkish Airways and to open a 10-year credit for Turkish Airways of £1,500,000. The total of £2,000,000 will be used by Turkish Airways for buying five *Viscount* aircraft and spare parts, the first *Viscount* being delivered in December 1957 and the others during 1958. As a result of the agreement, Sir George Cribbet (deputy-chairman of B.O.A.C.) will join the administrative board of Turkish Airways.
(Turkish Embassy Press Department, London)

A. COLOMBO PLAN. — Wellington Meeting of Consultative Committee. - Increased Canadian Assistance. - U.S. Grant for Atomic Centre. - Reports of Consultative Committee and Technical Co-operation Council. - New Development Projects.

The eighth meeting of the Colombo Plan Consultative Committee was held in Wellington (New Zealand) from Dec. 4-8, 1956, under the chairmanship of Mr. T. L. Macdonald, N.Z. Minister of External Affairs. The 19 member-countries were represented as follows:

Australia—Mr. A. G. Townley, Minister for Immigration; **Burma**—U Raschid, Minister of Mines; **Cambodia**—M. Phlek-Phoeun, Minister of Public Works; **Canada**—Mr. Paul Martin, then Minister of National Health and Welfare; **Ceylon**—Senator Wijesinghe; **India**—Mr. B. R. Bhagat, Deputy Minister of Finance; **Indonesia**—Dr. H. Sinaga, Minister of Health; **Japan**—Mr. T. Takasaki. Minister of State in charge of the Economic Planning Agency; **Laos**—M. Insisiengmay, Minister of Finance, National Economy and Planning; **Nepal**—Sardar B. B. Pande, of the Ministry of Planning and Development; **New Zealand**—Mr. T. L. Macdonald, Minister of External Affairs; **Pakistan**—Sardar Amir Azam Khan, Minister of Information and Broadcasting; **Philippines**—Señor G. P. Ramos; **Siam**—Major-General Siriyodhin, Minister of Economic Affairs; **United Kingdom**—Lord Munster, Minister without portfolio; **Malaya**—Dr. Ismail bin Dato Abdul Rahman, Minister of Commerce and Industry; **North Borneo**—Mr. P. Lee Tau Sang; **United States**—Mr. Walter S. Robertson, Assistant Secretary of State for Far Eastern Affairs; **Vietnam**—M. Nguyen-Huu-Chau, Secretary of State at the Presidency. **Singapore** and **Sarawak** were also represented.

Mr. Holland (the N.Z. Prime Minister) said in his opening address that the total cost of the six-year development plan for the whole Colombo Plan area was likely to exceed £3,000,000,000, a total of £2,000,000,000 having been spent in the first four years of the Plan's operation. A communiqué issued at the end of the meeting stated that 1955-56 had been a "turning point" in the programme of the Asian members of the Colombo Plan. Many countries had recently formulated new or renewed national plans, and others had given continuing attention to improving the planning and execution of their public investment projects. The aim for 1956-57 would be to raise the level of expenditure (£791,000,000 in 1955-56) by over a quarter, to about £1,000,000,000.

During the meeting **Mr. Robertson** announced the U.S. Government's readiness to grant about $20,000,000 towards the initial operating costs of the Asian nuclear centre in Manila (see 14791 B). He also stated that the U.S.A. would devote $1,750,000,000, or two-thirds of its total foreign aid, to South and South-East Asia. **Mr. Martin** announced an increase in Canada's annual grant from $26,400,000 to $34,400,000, while **Lord Munster** explained that the main part of Britain's economic association with the Colombo Plan had been in the private sector, where large capital sums continued to be made available. Australia and New Zealand said they would maintain their present contributions.

The fifth annual report of the Colombo Plan Consultative Committee, which was approved at the Wellington meeting, was published in London on Jan. 15, 1957 (Cmd. 50). A summary of the first part of the report is given below.

Review of Economic Progress.

The economic position of the countries of the Colombo Plan area during 1955-56 reflected, in general, two major aspects of development. First, these countries were endeavouring to attain higher rates of economic growth while preserving the economic and social stability required to make that growth continuous. Secondly, development plans needed to be flexible as they involved assumptions about the availability of resources not yet in hand when programmes were formulated, and which were subject from year to year to fluctuations due to external as well as internal factors.

While world industrial production and trade continued to expand in 1955-56 and most of the Colombo Plan countries contributed to this expansion, the trade deficits of a number of countries in the first half of 1956 showed some increase, owing to larger imports National income continued to rise at a rate slightly in excess of population growth. Significant progress was also made in both the planning and execution of economic development programmes during the period.

Agricultural production, on balance, showed little improvement over the previous year in spite of improved cultivation methods and expansion of irrigation systems, since output depended preponderantly on weather conditions. Rice production, however, increased by 6 per cent; among cash crops the output of tea, sugar, rubber and jute had increased, but the production of raw cotton in India and Pakistan had declined by about 7 per cent. Increases were also reported in the production of coal, iron-ore, and crude petroleum.

The land area under irrigation in several countries was substantially increased. In India, during the first Plan period, the amount of irrigated land was increased by 16 3 million acres, and other countries were also engaged on schemes of irrigation and land reclamation. Increased emphasis had been placed on problems of agricultural credit and marketing and of rural co-operative societies. Further advances were made—chiefly in India, Pakistan, Burma and Indonesia—in community development programmes for raising the level of agricultural techniques and for mobilizing the initiative and co-operation of the people in improving their standards of living.

Electric power production for the area as a whole rose by about 12 per cent in 1955. The year also witnessed the start of operations in many new industrial establishments, the implementation of industrial programmes being given considerable emphasis in most countries in the area. The indices of industrial production in Pakistan and India rose in 1955 by 23 per cent and 8 per cent respectively. Cement production increased only slightly, and was insufficient to meet the growing demand due to increasing consumption. Production of cotton yarn and fabric rose by 10 per cent and 4 per cent respectively, expansion being particularly marked in Pakistan, where self-sufficiency in cotton textiles of medium varieties had been achieved. India and Pakistan also increased their output of jute products. A large expansion of steel plant was under way in India, and production in the engineering industry also showed considerable increases.

Regarding their financial situation, the report said that countries in the region had taken a variety of fiscal, monetary and other measures to preserve or restore internal stability and to promote development. Attempts had been made to raise revenue yields and to increase and tap domestic savings, but more effort was required inasmuch as developmental expenditure was increasing, and the gap between revenue (plus loans and other savings) and expenditure continued to add significantly to money supply. Budgetary deficits had increased in India and Pakistan in 1955-56, but in Ceylon budget surpluses constituted an important stabilizing factor and had enabled the Government to expand its development programme. The Philippines, Siam and Burma had to reduce their development expenditures to some extent.

On the external trade position of the countries, the report said: "A large portion of internal as well as external resources required for development had to be derived from foreign trade, which, for countries of the area, consists largely of the exchange of primary products for manufactured goods . . . Since a considerable degree of specialization exists in these countries, particularly as among fibres, rubber and metals, variations in the different sectors of industrial activity outside the area may have crucial effects on the trade of individual countries" In 1955 Indonesia, Malaya and Siam benefited from increased exports and rising prices of rubber and tin, and Ceylon and British Borneo from rubber. In the first half of 1956, exports in general tended to decline, and with higher imports had led either to increased trade deficits or lower surpluses. During the same period, reserves for the group (excluding Malaya) declined by the equivalent of £26.4 million. The devaluation of the Pakistan rupee, however, had had a favourable effect on that country's balance of trade.

As regards transport and communications, countries of the area were giving high priority to plans for increasing road mileage and improving railway systems. In India the production of rail wagons reached over 13,000, and 179 locomotives were produced in 1955-56. Pakistan was adding to its rolling-stock both from its own workshops and from abroad In Malaya and Borneo, the railway systems were being thoroughly overhauled. Extensions to the railway system in Siam would facilitate the transport of goods to Cambodia and Laos. Most countries in the region also registered considerable progress in the development of port facilities.

Expenditure on health, education, housing and other social services continued to increase. Progress was especially marked in the extension of primary education in India, Ceylon, Siam and Nepal.

The role of private investment, said the report, was important, although development programmes of countries in the area were focussed primarily on public investment and governmental planning. Public expenditure had itself stimulated private initiative, which had also been encouraged through tax incentives and financial assistance. Private investment of foreign capital was being invited by bodies like the International Finance Corporation. Joint ventures were also being undertaken with private foreign capital by Governments of the countries of the area.

Of India's First Five-Year Plan, which was completed in the year under review, the report said that though significant advances were made in both agricultural and industrial production, the average rate of investment had been no more than 6 per cent of national income over the first Plan period. With the labour force growing by 1,800,000 workers a year, employment opportunities, especially in the rural areas, were not increasing to relieve the pressure on land. The Second Plan, which aimed at an increase of 25 per cent in the national income (compared to 18 per cent secured during the First Plan), would have to meet the problem of unemployment carried over from the previous Plan period, besides relieving the under-employment existing in the rural and urban areas

Future Tasks.

The report pointed out that while considerable economic growth had been achieved by the region in past years, the next stage in development would tend to require more complex and difficult decisions in such matters as the maintenance of a balanced relationship between consumption and investment, and the pattern of investment. Increased consumption was one of the tangible benefits of development, especially in a region with very low living standards, but too great a consumption increase threatened to curtail investment and the future rate of growth. Moreover, as the population of the region continued to increase, future plans would have to take account not only of greater consumption demands, but also of the problem of providing satisfactory employment and training for an ever-growing labour force.

With the many natural hazards still to be reckoned with, there was need for maintaining flexibility in the furthering of development plans. At the same time, internal programmes ought to be equated with external resource availabilities in such a way as to achieve objectives without engendering critical balance-of-payments difficulties. The report warned that any development programmes which led to an impairment of the export earnings of a country, or of the prosperity of its trading partners, were likely to be self-defeating in the long run. Future problems would also require the mobilization of additional developmental energies in both the public and private sectors. The task of mobilizing resources was a continuing one, and in order to maximize the efforts and productivity of all parts of the economy, Governments ought not only to confine their efforts to those projects which they had themselves planned and directed, but should also promote—through training, administrative and financial measures—a more widespread initiative throughout the economy. In this connexion the report recommended the building of farm-to-market roads, or the assurance of power supplies as means to encouraging the individual farm producer, and private industry, respectively.

The report dwelt on the value of the regular consultation afforded by the Annual Consultative Committee meeting in assessing the general direction that member-countries should follow, and for providing new opportunities for co-operation between them. While some countries of the Plan area were more advanced in the implementation of long-range development programmes than others, opportunities arose for interchanges of mutual interest.

The first section of the report concluded: "As the Colombo Plan enters its sixth year, there is renewed courage, confidence, and determination to move ahead in the economic betterment of South and South-East Asia. The record of achievement set forth in this report gives reason to believe that, however great may be the difficulties ahead, they will be overcome."

Contributions to Economic Development.

In 1955-56 external assistance to the Colombo Plan countries was greater than that in previous years, and the rate at which it was used on specific projects was accelerated. Some details are given below:

Australia. From the beginning of the Plan until the end of the financial year 1955-56, Australia spent or committed £A32.2 million for economic development and technical assistance. Of the recipient countries, Pakistan had received £A11,759,000 (of which a little more than half had been spent at the end of the year, deliveries during the year including pumping sets and tube-well equipment); £A10.4 million was allocated to India, of which £A5.2 million had been spent (£A4.5 million on heavy earth-moving equipment, and £A187,157 for equipment for All India Radio), and Ceylon's share was £A2.8 million, of which £A1.5 million went to the Ceylon Irrigation Department and £A450,000 was spent on flour, proceeds from the sale of which would provide local funds for anti-tuberculosis clinics, a Rice Research Institute, and an Institute of Hygiene.) Other important allocations were: Indonesia, £A1.4 million (about half spent on agricultural equipment, trucks and cranes); Cambodia, £A596,000; Vietnam, £A294,000; Burma, £A294,000.

Canada. The Canadian Government's contribution to economic development for 1956-57 amounted to $34.4 million, bringing the total since 1951 to $162.8 million, excluding a special $5 million grant of wheat to Pakistan in 1953-54. The principal recipient countries were India ($80 million approx.), Pakistan ($57 million, plus the special grant of wheat referred to above), and Ceylon ($10 million approx. of capital aid).

Additional assistance of $5 million was given to India for the establishment of an atomic reactor near Bombay. A sum of $13 million was allocated in 1955-56 to the building of a large-scale hydro-electric generating station at Kundah, in South India.

Aid granted to Pakistan in 1955-56 included a further $9.2 million towards the Warsak hydro-electric project, bringing total Canadian aid for this project to $27.6 million. Wheat worth $1.5 million was made available to meet famine conditions, the proceeds being used on development projects.

Aid to Ceylon in 1956-57 would include $336,000 towards an aerial survey; $370,000 for two diesel locomotives; and $640,000 worth of flour, proceeds from the sale of which would be used for the rural road-building programme and construction costs at the University of Ceylon.

India. To assist in the implementation of Nepal's Five-Year Plan, India had offered material and technical aid up to 100 million rupees. In addition, Rs. 20 million would be spent in 1956-57 on highway and hydro-electric projects in Nepal.

New Zealand. Of the £N.Z.5 million appropriated by the New Zealand Government for Colombo Plan assistance, £N.Z.2.9 million had been utilized by or transferred to member-countries, while a further £N.Z.1 million would be devoted to specific projects. India had received £N.Z. 1.3 million (£N.Z. 1 million for the All-India Medical Institute and the remainder to promote the dairy industry); Pakistan, £N.Z. 1.4 million (£N.Z. 1,150,000 for the cost of equipment for the Zeal-Pak cement factory at Hyderabad, Sind); and Ceylon, £N.Z. 706,239, (£N.Z. 54,000 in 1955-56 to help establish a milk supply for Colombo).

United Kingdom. Investment by private enterprise continued to be the largest source of British capital in the area, as many U.K. concerns operated in South and South-East Asia, particularly in member-countries of the sterling area. While the amount of capital invested privately could not be calculated, the Reserve Bank of India had placed it at over £100 million (including re-invested earnings) between the middle of 1948 and the end of 1953. Another important field of British assistance was in the drawing-down of their sterling balances by countries of the Plan area, which constituted a demand on U.K. resources. In addition, the U.K. Government had offered since 1951 approximately £86 million as grants, loans, credits and technical assistance—i.e. some £6 million more than up to the end of 1954-55. Of this sum, over £54 million went to Malaya, Sarawak and North Borneo; £15 million as a loan to India for the construction of the new steel plant at Durgapur; and £7 million as the U.K.'s contribution to the Technical Co-operation Scheme. The U.K. had also agreed to release £18 million from its sterling subscription to the International Bank for use in the Colombo Plan Area.

United States. U.S. aid to Colombo Plan countries, offered through a number of agencies, amounted in 1955-56 to about $900 million, bringing total U.S. assistance since 1950 to over $2 billion. Of this sum, $535 million was offered through the Mutual Security Programme for 1955-56, and the U.S. Congress had approved approximately the same amount for 1956-57. Other important sources of finance were in the form of private investment (which in 1955 increased from $440 million to $480 million); the Agricultural Trade Development and Assistance Programme (sales under which totalled $544.2 million in 1955-56); and credits authorized by the Export-Import Bank, amounting in 1955-56 to $67 million.

In 1955-56, U.S. aid to India totalled $59 million, with emphasis on agricultural and transportation development programmes; to Pakistan, $106 million (chiefly for the Karnaphuli dam and the Taunsa barrage); to Siam, $34 million (for improving communications and training personnel); and to Vietnam, $203 million for rehabilitating and stabilizing the economy. In the same year the Philippines received $29 million under the Mutual Security Programme, and a credit of $65 million from the Export-Import Bank for industrial expansion. Aid to Cambodia amounted to $45 million and to Laos $48 million, in both countries primarily for improving transport facilities and stabilizing their economies. Assistance to Ceylon, initiated in 1956, totalled $5 million and would contribute to the objectives of the country's Six-Year Investment Programme. Indonesia received $11 million of U.S. aid, part of which was used for a campaign to eradicate malaria.

International Bank. In 1955-56 the International Bank made six loans, totalling $125.4 million, to countries within the Plan area, bringing the total amount of money loaned to those countries to $356.5 million.

The report said that in 1955-56 about $975 million of capital aid in the form of inter-governmental grants and loans had been made available by donor members outside the Plan area. Over the whole period of the Colombo Plan (from January 1950 to mid-1956), external aid from donor countries amounted to roughly $2,370 million.

Colombo Plan Technical Co-operation Scheme.

The annual report of the Colombo Plan Technical Co-operation Scheme, published on Nov. 1, 1956, stated that 4,227 training places and 572 experts had been provided under the scheme up to the end of June, 1956. Of the trainees, 641 had or were being trained in engineering, 638 in food, agriculture and forestry, 595 in administration, and 574 in education. Training places were also provided in medicine and health (524), industry and trade (343), transport and communications (276), and fuel and power (163). Experts had been provided for medicine and health (156), engineering (88), education (70), food, agriculture and forestry (67), transport and communications (65), and industry and trade (46).

Australia had offered the highest number of training places—(1,610), principally for Indonesia (392), India (199), Pakistan (194), Malaya (173), Ceylon (147), Burma (143), Singapore (95), and the Philippines (74)—and had provided 175 experts, including 49 to Malaya, 38 to Ceylon, and 35 to Pakistan.

Canada had provided facilities for 504 trainees, mainly from Pakistan (168), India (159), Indonesia (61), and Ceylon (52), and had sent 101 experts to Colombo Plan countries, including 52 to Ceylon, 14 to Pakistan, 12 to Malaya, and 10 to India.

Ceylon had arranged for 23 training places (Nepal 8, Malaya 7, Burma and Indonesia 3 each, Singapore 2), and had provided two experts (for India and Singapore).

India had made facilities available for 462 trainees (from Nepal 273, Ceylon 99, the Philippines 33 and Pakistan 27), and sent 20 experts (including 13 to Ceylon and 4 to Indonesia).

New Zealand had agreed to offer 307 training places, principally for Malaya (66), Ceylon (65), India (58), and Pakistan (57), and 53 experts (to Pakistan 15, Ceylon 14, India 8, North Borneo 7).

Pakistan had granted facilities for 30 trainees, including 10 from Ceylon, and 6 each from Burma and Malaya.

The **United Kingdom** had provided 1,274 training facilities, principally from Pakistan (346), India (347), Ceylon (332), Indonesia (91), and Burma (61), and 198 experts, including 81 each to Ceylon and India, and 29 to Pakistan).

The report said that expenditure on the scheme up to June 30, 1956, amounted to approximately £5,600,000, plus firm forward commitments of approximately £2,600,000, bringing the total to about £8,200,000.

Since the publication of the Fifth Annual Report, further offers of aid and technical assistance under the Colombo Plan were announced as follows:

Canada. An agreement covering Canadian aid to Ceylon during 1956-57 was signed in December 1956, which, in addition to the items mentioned in the Report, offered two sums of $400,000 each for electrical transmission lines in connexion with the Gal Oya Development Project, and for rural road construction. In May 1956 Canada had agreed to contribute $2,000,000 for the Khulna thermal power station in East Pakistan.

New Zealand. The N.Z. Government announced in November 1956 that it would contribute £45,000 to help meet the cost of restoring the Akkarayankulam irrigation-tank system in Ceylon. Later, an offer of £300,000 was made towards the establishment of a sugar mill at Dewanganj, in East Pakistan.

United Kingdom. It was announced on Jan. 29, 1957, that £120,000 worth of books and equipment would be made available by the U.K. Government for the Institute of Textile Technology at Dacca, in East Pakistan. A similar offer of equipment and machinery worth £125,000 was subsequently made for the Lyallpur Institute of Textile Technology (West Pakistan). A gift of £38,000 worth of equipment for expanding training facilities in telecommunications at the Haripur centre, in Pakistan, was made in April last.

Apparatus and equipment worth £17,000 for the Technical Training Institute at Amparai, set up by the Ceylon Government in connexion with the Gal Oya Development Project, was also announced in April last; this was additional to £4,000-£5,000 worth of equipment already provided for the Institute.

At a meeting in Colombo on April 30, 1957, Mr. R. H. Wade (New Zealand) was appointed Director of the Colombo Plan Bureau for Technical Co-operation in succession to Dr. Keyfitz, of Canada.—(Treasury Press Office, London - Commonwealth Relations Office, London - Times - Daily Telegraph - Manchester Guardian - N.Z. Directorate of Information Services, Wellington - Indian and Pakistani High Commissioners' Offices, London - Ceylon Government Information Department, Colombo - Colombo Plan Information Unit)

A. CYPRUS. — Relaxation of Emergency Regulations.

Nealy half the emergency regulations in Cyprus (33 out of a total of 76) were revoked on Aug. 9 by the Governor, Field-Marshal Sir John Harding. The most important regulation withdrawn was that relating to "consorting with terrorism" (introduced in November last), under which persons found in company with armed terrorists were liable to the death penalty or, in less serious cases, to life or lesser terms of imprisonment. Other regulations withdrawn included those giving the Governor power to detain suspected Eoka members without trial; to control lines of communication; and to appoint press and radio censors. In addition, the regulation banning all processions and assemblies was lifted (except for gatherings organized by illegal bodies, which remain prohibited); certain curfew regulations were relaxed; and persons leaving the island were no longer required to obtain exit visas, though passports remained necessary.

Emergency regulations remaining in force included those making the death penalty mandatory for carrying or discharging arms and throwing bombs; the ban on processions and assemblies by Eoka and other illegal organizations; the regulations authorizing deportation; those empowering search of persons, vehicles and houses, and arrest without warrant; and that section of the emergency regulations dealing with control of publications, under which the *Times of Cyprus* had been fined [see page 15477]. Moreover, under the Detention of Persons Law (passed before the emergency regulations came into force), the Governor still has the power to order detention of suspected persons without trial.—(Times - Daily Telegraph)

(Prev. rep. Cyprus, 15469 A.)

B. UNITED KINGDOM. — Royal Navy. - New Commander-in-Chief, Home Fleet.

The Admiralty announced on Aug. 1 that Admiral Sir William Davis (56), lately Vice-Chief of Naval Staff, had been appointed C.-in-C., Home Fleet, in succession to Admiral Sir John Eccles, the appointment to take effect from Jan. 1, 1958. The post of C.-in-C., Home Fleet, carries with it the NATO appointment of C.-in-C., Eastern Atlantic. Sir William Davis became Vice-Chief of Naval Staff (a post in which he was succeeded by Admiral Sir Caspar John) in 1954, and had previously served as Flag Officer (Air) Mediterranean, Naval Secretary to the First Lord of the Admiralty, and Director of Underwater Weapons. During the Second World War he commanded the cruiser H.M.S. *Mauritius* in the Sicily, Anzio and Normandy landings.—(Times - Daily Telegraph)

(Prev. rep. 15619 A.)

C. RHODESIA AND NYASALAND FEDERATION. — Introduction of Uniform Customs Tariff.

It was announced in the Federal Assembly on March 7 by the Minister of Finance (Mr. Macintyre) that Customs tariff discrimination within the Federation of Rhodesia and Nyasaland would cease forthwith, following the passage of a Bill amending the Customs Act with a view to removing the effects of the Congo Basin Customs Treaties [see below] and introducing a uniform tariff throughout the Federation.

Under the Congo Basin Treaties, imports into Nyasaland and the Northern Province of Northern Rhodesia had been subject to different duty rates from those applying to the rest of the Federation, and there were also no preferential tariffs for imports from Britain and the rest of the Commonwealth. Special Customs formalities were necessary for travellers between Nyasaland and the Northern Province of Northern Rhodesia on the one hand and the rest of the Federation on the other, as well as for manufacturers sending goods from Southern Rhodesia to the other two areas.

Under the new uniform tariff, imports from Britain and the rest of the Commonwealth will receive preferential treatment throughout the Federation—e.g. imports of most types of piece-goods from the U.K. will pay only one-quarter of the Customs duties previously charged in Nyasaland and the Northern Province of Northern Rhodesia; clothing imports only 10 per cent, instead of 20 per cent; lower-priced cars only 7½ per cent, instead of 17½ per cent; more expensive cars only 12½ per cent, instead of 25 per cent; and lorries only 5 per cent, instead of 10 per cent. Window-glass from Britain (previously paying 15 per cent) will be free, while other items benefiting will include sewing-machines, soap, cutlery, hollow-ware, confectionery, toilet and medical preparations, tinned fruits and vegetables, wooden furniture, hosiery, haberdashery, pressure lamps, torches, and batteries. Similar reductions will also apply to imports from South Africa.

The introduction of the new uniform tariff involved lengthy and difficult negotiations with a number of foreign countries which had previously benefited from the regime laid down by the Congo Basin Treaties. In order to compensate foreign manufacturers for their loss of free trade, and for the preferential treatment now granted to imports from Britain and the Commonwealth, a number of Federal duties on important items from foreign countries were reduced as from March 8.

(Federal Information Department, Salisbury)

D. NEW ZEALAND. — Forthcoming Retirement of Mr. Holland from Premiership and Political Life. - Mr. Holyoake elected Leader of National Party.

The Prime Minister of New Zealand, Mr. Sidney Holland, informed a conference of the National Party on Aug. 12 of his intention to retire from the Premiership and from political life at the end of the present session of Parliament. He said that he had had two warnings on the state of his health, first during the Suez crisis and recently in connexion with an injury to his back; although he had made a good recovery and was fit to carry on until the next general election, he had decided that it would be foolish to ignore these warnings and had therefore decided to retire.

Mr. Holland (63) first entered Parliament in 1935 for Christchurch North, a constituency which his father had represented. He succeeded Mr. Adam Hamilton as leader of the National Party in 1940, and became Prime Minister in 1949.

On the proposal of Mr. Holland, the National Party caucus unanimously elected Mr. K. J. Holyoake (acting Premier and Minister of Agriculture) to the party leadership on Aug. 13. Mr. Holyoake (53) entered Parliament in 1932, when he won the Motueka seat at a by-election. He had been deputy leader of the National Party for the past nine years and Minister of Agriculture since 1949. He led the New Zealand delegation in the recent trade talks with the U.K. Government (see 15594 A).

(Directorate of Information Services, Wellington)

(Prev. rep. 13953 A; 10393 A.)

E. SOVIET UNION. — M. Pervukhin to head State Committee on Foreign Economic Relations.

It was announced in Moscow on July 24 that (1) M. Mikhail Pervukhin had been relieved of his post as Minister for the Medium Engineering Industry and appointed chairman of a new State Committee for Foreign Economic Relations; and (2) that M. Yefim Slavsky, formerly head of the Atomic Energy Board, would become Minister for Medium Engineering Industry *vice* M. Pervukhin. It was understood that the new State Committee would be concerned mainly with Soviet foreign aid operations in other countries, both Communist and non-Communist—a role similar to that of the International Co-operation Administration in the United States.

(Soviet Embassy Press Department, London)

(Prev. rep. M. Pervukhin, 15639 A.)

A. UNITED KINGDOM. — White Paper on Future Organization of the Army. - Composition of Brigade Groups. - Amalgamation of Regiments. - Creation of Army Air Corps. - Disbanding of Glider Pilot Regiment.

The Government's plans for the future organization of the Army were published as a White Paper (Cmd.230) on July 17, and are summarized below.

The White Paper pointed out that the reduction of the Armed Forces announced last April (see 15493 A) would necessarily involve changes in the structure, organization, and order of battle of the Army; and that while the proportion of "teeth arms" to administrative services would be increased, the total number of Army units would have to be reduced. In deciding on the method of reduction and the units to be affected, the Army Council had taken into account such considerations as the organization of the different arms and services, the recruiting potentials of the different units, and their seniority and territorial affiliations. Where the primary loyalty was to the corps (as in the Royal Artillery and Royal Engineers) it had been decided to proceed by disbandment, thus affecting as few units as possible; but where the primary loyalty was to the regiment (as with the Royal Armoured Corps and the Infantry of the Line) the procedure would be by amalgamation, thus perpetuating the regimental spirit and traditions in which the units were rooted.

The reorganization and reductions would be carried out in two phases. It was intended that the bulk of the cuts in the fighting arms should be completed in Phase I by the end of 1959, and the rest in Phase II by the end of 1962. Any necessary reductions in any particular arm or corps would as far as possible be spread equitably throughout the arm or corps concerned.

Units would be affected as follows:

Royal Armoured Corps. To be reduced (by permanent amalgamations of pairs of regiments—see below) by six regiments in Phase I. In Phase II there would be a reduction of two more regiments, but the method of doing this had not yet been decided.

Royal Artillery. To be reduced in Phase I by 18 regiments and minor units equivalent to another regiment, and in Phase II by a further two regiments.

Royal Engineers. To be reduced by the equivalent of four engineer regiments in Phase I and one regiment in Phase II, with a consequent reduction in engineer supporting units.

Royal Corps of Signals. The number of regiments would be reduced when the Command structure of the Army at home and abroad had been reorganized.

Infantry. The Brigade of Guards would be reduced by one battalion in each phase—the Third Battalion Coldstream Guards in Phase I, and the Third Battalion Grenadier Guards in Phase II.

No reduction would be made in the Parachute Regiment.

The remainder of the Infantry of the Line would be reduced in Phase I by 12 battalions, and in Phase II by a further three. As with the Royal Armoured Corps, reductions would be by permanent amalgamations of pairs of regiments, and the reorganized Infantry of the Line would be grouped into 14 brigades (each consisting of three or four battalions) and the Parachute Regiment. Except for the Fusilier, Light Infantry, and Green Jacket Brigades, these infantry brigades—which would be administrative and not operational formations—would be constituted on a regional basis and would largely correspond to the existing groups of infantry regiments, though some of the names might be changed. To establish a sense of loyalty and unity, all regiments in a brigade would wear the same cap badge. The Army Council would consult with Colonels of existing regiments about the nomenclature and insignia of the amalgamated regiments and of the brigades.

Each brigade would have one band serving all its battalions, but the regiments would keep their own drum, pipe or bugle bands. Officer cadets would continue to be gazetted from Sandhurst into a regiment, but all majors and lieutenant-colonels would be placed, for promotion purposes on a common brigade list. Other ranks would serve where possible in the regiments of their choice, but promotion of the more senior would be on a brigade basis. There would be one depot for each brigade at which recruits would be trained, but each regiment would retain a small regimental depot for recruiting and conducting regimental affairs. Amalgamated regiments would have only one depot for this purpose.

The Territorial Army battalions of regiments to be amalgamated would retain their identity and existing titles.

Administrative Services. The reductions outlined above would have their counterparts in the administrative services, which would employ a larger proportion of civilians than hitherto.

Details of the proposed changes affecting the Royal Armoured Corps and the Infantry of the Line are given below:

Royal Armoured Corps.

The following pairs of regiments would be amalgamated to form new ones.

1st King's Dragoon Guards and the Queen's Bays (2nd Dragoon Guards).
3rd King's Own Hussars and 7th Queen's Own Hussars.
4th Queen's Own Hussars and 8th King's Royal Irish Hussars.
3rd and 6th Royal Tank Regiments.
4th and 7th Royal Tank Regiments.
5th and 8th Royal Tank Regiments.

Infantry of the Line.

The composition of the Brigades, showing amalgamations of regiments, is set forth below. Amalgamations in Phase I (*) or Phase II (†) are indicated:

Lowland Brigade.

The Royal Scots (The Royal Regiment).
*Regiment to be formed from The Royal Scots Fusiliers and The Highland Light Infantry (City of Glasgow Regiment).
The King's Own Scottish Borderers.
The Cameronians (Scottish Rifles).

Home Counties Brigade.

*Regiment to be formed from The Queen's Royal Regiment (West Surrey) and The East Surrey Regiment.
†Regiment to be formed from The Buffs (Royal East Kent Regiment) and The Queen's Own Royal West Kent Regiment.
The Royal Sussex Regiment.
The Middlesex Regiment.

Lancastrian Brigade.

*Regiment to be formed from The King's Own Royal Regiment (Lancaster) and The Border Regiment.
*Regiment to be formed from The King's Regiment (Liverpool) and The Manchester Regiment.
*Regiment to be formed from The East Lancashire Regiment and The South Lancashire Regiment.
The Loyal Regiment (North Lancashire).

Fusilier Brigade.

The Royal Northumberland Fusiliers.
The Royal Fusiliers (City of London Regiment).
The Lancashire Fusiliers.

Midland Brigade.

The Royal Warwickshire Regiment.
The Royal Leicestershire Regiment.
The Sherwood Foresters (Nottinghamshire and Derbyshire Regiment).

East Anglian Brigade.

*Regiment to be formed from The Royal Norfolk Regiment and The Suffolk Regiment.
†Regiment to be formed from The Royal Lincolnshire Regiment and The Northamptonshire Regiment.
*Regiment to be formed from The Bedfordshire and Hertfordshire Regiment and The Essex Regiment.

Wessex Brigade.

*Regiment to be formed from The Devonshire Regiment and The Dorset Regiment.
The Gloucestershire Regiment.
The Royal Hampshire Regiment.
*Regiment to be formed from The Royal Berkshire Regiment and The Wiltshire Regiment.

Light Infantry Brigade.

*Regiment to be formed from The Somerset Light Infantry and The Duke of Cornwall's Light Infantry.
The King's Own Yorkshire Light Infantry.
The King's Shropshire Light Infantry.
The Durham Light Infantry.

Yorkshire Brigade.

*Regiment to be formed from The West Yorkshire Regiment and The East Yorkshire Regiment.
The Green Howards.
The Duke of Wellington's Regiment (West Riding).
The York and Lancaster Regiment.

Mercian Brigade.

The Cheshire Regiment.
The Worcestershire Regiment.
*Regiment to be formed from The South Staffordshire Regiment and The North Staffordshire Regiment.

Welsh Brigade.

The Royal Welch Fusiliers.
The South Wales Borderers.
The Welch Regiment.

North Irish Brigade.

The Royal Inniskilling Fusiliers.
The Royal Ulster Rifles.
The Royal Irish Fusiliers.

Highland Brigade.

The Black Watch (Royal Highland Regiment).
†Regiment to be formed from The Seaforth Highlanders and The Queen's Own Cameron Highlanders.
The Gordon Highlanders.
The Argyll and Sutherland Highlanders.

Green Jackets Brigade.

The Oxfordshire and Buckinghamshire Light Infantry.
The King's Royal Rifle Corps.
The Rifle Brigade.

Parachute Regiment.

1st Battalion The Parachute Regiment.
2nd Battalion The Parachute Regiment.
3rd Battalion The Parachute Regiment.

Mr. Hare, the Secretary for War, stated at a press conference on July 24 that the effect of the changes would be to cut down the Army by 51 major units and "a very large number" of smaller ones to a total of about 165,000 officers and men. At the same time the present proportion of 58 per cent "teeth" units to 42 per cent "tail" units would become 65 per cent "teeth" and 35 per cent "tail."

Mr. Hare had previously announced in a written parliamentary reply (July 17) that it had been decided to form a new corps, to be known as the Army Air Corps, which would come into being on Sept. 1 and absorb the Glider Pilot Regiment, which would disband from the same date. The new formation would be a comparatively small body, largely of specialists and technicians, attached from other arms and specially trained. Its basic unit would be the flight, one of which normally would form part of an Army brigade group, but this organization would be flexible and might be modified by experience. Ordinary servicing of aircraft would for the first time be done by the Royal Electrical and Mechanical Engineers, but the Army would still rely on the R.A.F. for major repairs and overhauls, as well as for training selected R.E.M.E. personnel for their new duties.—(Cmd. 230 - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 1957-58 Estimates, 15669 A; Defence Policy, 15493 A.)**

A. TURKEY. — Creation of Ministry of Industry. - New Cabinet Appointments.

A new Ministry of Industry, replacing the Ministry for Industrial Development, started functioning on July 1, following the passage of the necessary legislation by the Grand National Assembly in May. Headed by M. Samed Agaoglu (the former Minister of Industrial Development), the new Ministry will not only control the work of State enterprises under its authority but will also co-ordinate the public and private sectors of industry and organize manufacturing industry, mining, and power as a whole.

Cabinet changes were announced during the latter part of July under which M. Semi Ergin (Minister of State and acting Minister of Defence) was appointed Minister of National Defence, while M. Fatin Rustu Zorlu (a former Minister of State and acting Foreign Minister) succeeded M. Ergin as Minister of State.

With these new appointments, and earlier changes, the composition of the Turkish Cabinet became as follows: M. Adnan Menderes—Prime Minister; M. Cemil Bengu, M. Fatin Rüstü Zorlu, M. Emin Kalafat, and M. Celal Yardimci —Ministers of State; Professor Hüseyin Avni Göktürk—Justice; M. Semi Ergin—National Defence; Dr. Namik Gedik—Interior; M. Ethem Menderes—Public Works, and acting Minister of Foreign Affairs; M. Hasan Polatkan—Finance; M. Tevfik Ileri—Education; M. Abdullah Aker—Economy and Commerce; Dr. Nafiz Korez—Health; M. Hadi Hüsmen—Customs and Monopolies; M. Esat Budakoglu—Agriculture; M. Arif Demirer—Communications; M. Mumtaz Tarhan—Labour; and M. Samet Agaoglu—Industry.
(Turkish Embassy Press Department, London) **(15499 C.)**

B. UNITED STATES. — New Secretary of Defence.

Mr. Neil H. McElroy (51), president of the Procter and Gamble Company of Cincinnati (the largest soap and detergent manufacturers in the U.S.A.), was nominated by President Eisenhower on Aug. 7 as Secretary of Defence in succession to Mr. Charles E. Wilson, the appointment being subject to Senate confirmation. Mr. McElroy served as chairman of the White House Conference on Education in 1956, but had otherwise had no previous experience of Government service. He is a director of General Electric and the Chrysler Corporation in addition to his interests in Procter and Gamble.

Mr. Wilson's letter of resignation was not made public, but it was understood that he had expressed the wish to retire after the end of the fiscal year 1956-57 (i.e. after June 30). It was stated at the White House that Mr. McElroy would work with Mr. Wilson at the Defence Department for the remainder of August "to get acquainted with his job."
(New York Times - New York Herald Tribune) **(12597 A.)**

C. UNITED KINGDOM - UNITED STATES. — The Voyage of "Mayflower II."

A project which had aroused great interest on both sides of the Atlantic was successfully realized on June 13, 1957, when the diminutive barque *Mayflower II* sailed into the harbour of Plymouth, Massachusetts, after a 54-day passage from Plymouth, England. The vessel, of only 180 tons, had been built in an attempt to reproduce the dimensions and appearance of the original *Mayflower*, in which the Pilgrim Fathers embarked at Plymouth (England) in 1620 and from which they landed at what is now Plymouth (Mass.), subsequently founding there the first permanent English colony in New England.

The idea of building a reproduction of the Pilgrim Fathers' ship and sailing her across the Atlantic as a gift from Britain to the U.S.A. was conceived shortly after World War II. The scheme, however, did not take definite shape until 1955, when a small group headed by Mr. Warwick Charlton, a British journalist and publicity expert, and including Mr. Felix Fenton, a British property-owner, formed a non-profit-making company under the name of "Project Mayflower Ltd." to carry it out. The task of designing a ship on the probable lines of the original *Mayflower* (of which few details have been handed down) was undertaken by Mr. William A. Baker, chief naval architect of the U.S. Bethlehem Shipbuilding Corporation and an authority on 17th-century ships. Working largely from conjecture, Mr. Baker drew up plans for a three-masted barque with a keel length of only 90 feet (i.e. that of an average tugboat), but with a high ratio of breadth to length and with the lofty overhanging forecastle and poop shown in naval pictures of the time It was specified that the hull, like that of the original *Mayflower*, should be built of Devonshire oak. The work of construction was entrusted to Messrs. J. and A. Upham of Brixham, Devon, from whose yard *Mayflower II* was launched on Sept. 22, 1956.

After fitting out at Brixham during the winter, the ship successfully underwent trials on April 17 and was then towed to Plymouth. Here her master, Commander Alan Villiers (the well-known author and sailing vessel expert), together with members of his crew of 32, took part in period dress in a ceremony at the historic Mayflower Stone, where the Pilgrim Fathers embarked in 1620. The ship was then towed out to Plymouth Sound and set sail thence on April 20.

A number of British firms co-operated by shipping small consignments of goods in *Mayflower II*, the project being financed also by gifts from individuals and firms, by the admission fees paid by the large numbers who saw her under construction, and by the sale of literature and souvenirs. Ship and cargo were insured at Lloyds' for £180,000 and £80,000 respectively, the insurance policies being couched in 17th-century phraseology. The navigational instruments used on the voyage (apart from the radio equipment) were also of the kind in use in 1620.

Commander Villiers had intended to take the northerly route across the Atlantic, and a reception had been planned at Plymouth, Mass., for May 25, by which date *Mayflower II* was expected to have arrived off the New England coast. On April 24, however, he signalled that owing to her late departure the vessel had missed the favourable spring winds on which he had counted, and that he had therefore decided to take the much longer southerly route *via* the Canary Islands and the Caribbean After an uneventful passage of about 5,400 miles the ship arrived on June 12 off Provincetown, Mass. (where the original *Mayflower* had first sighted the American coast) and, to save delay from headwinds, accepted a tow into harbour. At Provincetown Commander Villiers and his ship's company re-enacted the signing of the "Plymouth compact" [which provided the basis for the original settlement of 1620], and on June 13 *Mayflower II*, accompanied by aircraft, fleets of yachts, and numerous small craft, sailed across Cape Cod Bay to Plymouth. Here she received tumultuous greetings from a crowd of over 25,000, and Governor Foster Furcolo welcomed her on behalf of the State of Massachusetts and handed Commander Villiers congratulatory telegrams from President Eisenhower and Mr. Harold Macmillan

Mayflower II left Plymouth on June 30 and entered New York Harbour under full sail on July 1, being given an enthusiastic welcome by shipping in the port and by many thousands of spectators. In accordance with the intention of the promoters of the scheme, the ship was subsequently handed over to a U.S. non-profit-making organization, Plymouth Plantation Inc., for permanent berthing at Plymouth (Mass.) as part of a $1,000,000 national shrine.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Lloyd's List and Shipping Gazette)

D. FRANCE - SOVIET UNION. — Soviet Order for French Railway Equipment.

It was announced in Paris and Moscow on July 10 that the Soviet Government had signed a contract with a group of French engineering companies (Schneider-Creusot and Alsthom) for the supply of 35 electric locomotives for the Soviet railways. The locomotives, costing 5,250,000,000 francs, will be delivered in the next two years and will be designed to work in low temperatures. In return, France will buy coal and other raw materials from the Soviet Union.—(Le Monde, Paris)
(Prev. rep. 15402 A.)

A. SHIPPING. — World Construction, Second Quarter of 1957. - Orders for Liners and Tankers. - New Tanker Finance Companies. - Project for 65,000-ton British Atomic Tanker.

The summary of merchant shipbuilding for the second quarter of 1957, published by Lloyd's Register on July 24, gave the gross tonnage of vessels under construction throughout the world (excluding the U.S.S.R. and China, as well as all vessels under 100 tons, barges, etc.) as 8,778,635, of which 23.47 per cent. was building in the United Kingdom and 76.53 per cent. elsewhere.

Ships building in Great Britain and Northern Ireland numbered 326 of 2,060,763 tons (steamers 928,589 tons, motorships 1,132,174 tons), including 6 steamers of 25,000-30,000 tons, 18 steamers of 20,000-25,000 tons, and 4 steamers and 1 motorship of 15,000-20,000 tons. Of the total, 262 ships (1,057,871 tons) were building for Great Britain and N. Ireland, 16 (39,070 tons) for other British Commonwealth countries, 13 (129,850 tons) for Liberia, 10 (109,300 tons) for Norway, 4 (36,060 tons) for the Irish Republic, 2 (18,900 tons) for Greece, 1 (17,900 tons) for Panama, 1 (6,687 tons) for the Netherlands, 9 (6,165 tons) for the U.S.S.R., 2 (5,000 tons) for Cuba, 2 small vessels for Poland and 1 for Iraq, and 3 ships (32,600 tons) for unspecified countries. Principal shipbuilding centres were: the Clyde (96 ships of 614,879 tons), the Tyne (39 ships of 409,950 tons), Belfast (19 ships of 248,973 tons), the Tees (21 ships of 220,818 tons), Sunderland (28 ships of 207,197 tons) and Liverpool (15 ships of 128,623 tons).

Ships building abroad numbered 1,365 of 6,717,872 tons (steamers 2,622,159 tons, motorships 4,095,713 tons), divided as follows: Japan 194 (1,475,110 tons), Italy 111 (918,285 tons), Germany 253 (912,990 tons), the Netherlands 180 (585,841 tons), France 64 (481,999 tons), Sweden 65 (463,602 tons), the U.S.A. 37 (392,048 tons), Norway 83 (272,746 tons), Spain 93 (239,196 tons), British Commonwealth countries 56 (194,865 tons), Poland 66 (169,498 tons), Belgium 17 (149,526 tons), Denmark 31 (148,928 tons), Finland 49 (144,363 tons), Yugoslavia 28 (130,565 tons), Portugal 20 (21,849 tons), Turkey 9 (7,621 tons), Peru 1 (4,307 tons), Argentina 1 (1,600 tons), 2 small vessels each in Indonesia and the Irish Republic, and 1 each in Brazil, Uruguay, and Iceland. The total included 2 steamers of over 30,000 tons in Japan, 2 in Italy, and 1 each in France and the Netherlands, and 10 steamers of 25,000-30,000 tons in Japan, 2 in the U.S.A., and 1 each in France and Sweden.

Tankers building throughout the world numbered 294 of 4,066,208 tons, including 69 (929,085 tons) in the U.K., 52 (926,470 tons) in Japan, 29 (468,416 tons) in the Netherlands, 32 (195,623 tons) in Germany, and 17 (176,128 tons) in Norway.

Recent important developments in connexion with shipping and shipbuilding are summarized below:

Ship Launchings. Notable ships launched during the first six months of 1957 included the tankers *British Glory* and *British Trader* (each 32,000 tons), launched respectively by Vickers-Armstrong at Barrow-in-Furness on Feb. 1 and by John Brown and Co., Clydebank on June 26 for the B.P. Tanker Company; *Tidewater* (52,500 tons), launched by *L'Union des Constructions Navales de l'Atlantique* at St. Nazaire on Feb. 17 for the U.S. Tidewater Associated Oil Company; and *Agrigentum* (52,000 tons), launched on June 20 by the Ansaldo Company at Sestri Ponente (Genoa) for the Petroleum Transport Company, of Palermo.

Mersey Shipyard Expansion. Cammell Laird and Co. Ltd. announced on Feb. 6 that it planned to expand its Birkenhead shipyard at a cost of about £17,000,000 in order to improve the company's competitive position and enable it to build larger ships. The work was expected to take eight years. [Cammell Laird's Birkenhead shipyard has been in operation for well over a century, and at present employs 10,000 workers and has an annual output of more than 100,000 gross tons. Notable ships built in recent years include the Cunarder *Mauretania* (35,000 gross tons) and the aircraft carrier H.M.S. *Ark Royal*.]

New Continental Shipyards. A new Dutch shipyard, described as potentially the largest in Europe, was opened by the Verolme Shipbuilding Company on Rozenburg Island (near the entrance to the New Rotterdam Waterway) on June 27, when the keel was laid of a 35,000-ton tanker for the National Iranian Tanker Company. It was stated that it was intended to build ships of up to 120,000 tons capacity, and that, when completed, the yard was expected to cost the equivalent of £20,000,000.

An agreement was signed on Feb. 12 between Mr. Stavros Niarchos (the Greek shipowner) and the Greek Government providing for the expenditure of about $8,600,000 (£3,700,000) on the building of a shipyard at Scaramanga (near Athens) and of drydocks and repair yards at Suda Bay, Crete. It was stated in the Press that Mr. Niarchos would be associated with a Dutch shipbuilding company.

New Orders for Liners. New liners ordered during the first half of 1957 included:

(1) A turbo-electric liner of 45,000 gross tons and 27-27½ knots speed, ordered by the P. and O. Line from Harland and Wolff (Belfast) for the new through service U.K.-Australia-New Zealand-Vancouver-San Francisco-Panama-U.K. This ship, estimated to cost about £12,500,000, will be the largest liner built in the U.K. since the *Queen Elizabeth*, and is expected to reduce the sailing time from the United Kingdom to Sydney from four weeks to three. (Announced on Jan. 23).

(2) A passenger liner ordered by the Cunard Line from John Brown and Co. Ltd., Clydebank, for the Liverpool-Cobh-New York service. The size and cost of this ship were unofficially forecast as 30,000 gross tons and £6,500,000 respectively (announced May 26).

(3) A passenger liner (slightly larger than the *Empress of England*, 25,500 gross tons) ordered by the Canadian Pacific line from Vickers-Armstrong, Walker-on-Tyne, for its Canadian service. Delivery is scheduled early in 1961 (announced July 3).

Tanker Orders. The B.P. Tanker Co. Ltd. (the shipping organization of the British Petroleum Company) announced on June 26 that it had placed orders with 11 British shipbuilding companies for 26 new tankers aggregating 1,150,000 tons carrying capacity, and including seven ships of 65,000 tons each and nine of 50,000 tons each. All the ships were for delivery between 1960 and 1963, the orders having been distributed as follows: John Brown and Co., Clydebank—two 65,000-tonners and one 50,000-tonner; Cammell Laird and Co., Birkenhead—two 65,000-tonners; Fairfield Shipbuilding and Engineering Co., Govan, Glasgow—one 65,000-and one 50,000-tonner; William Hamilton and Co., Port Glasgow one 15,500-tonner; Harland and Wolff, Ltd.—three 50,000-tonners and three 15,500-tonners at Belfast and one 15,500-tonner at Govan; Hawthorn, Leslie and Co., Hebburn-upon-Tyne—two 34,500-tonners; Lithgows, Ltd., Port Glasgow one 34,500-tonner; Alexander Stephen and Son, Govan—one 50,000-tonner; Swan, Hunter, and Wigham Richardson, Wallsend-upon-Tyne—two 65,000-tonners; J. L. Thompson and Sons, Sunderland—two 34,500-tonners; Vickers-Armstrong, Barrow-in-Furness—three 50,000-tonners.

The existing strength of the B.P. Tanker fleet was given as 147 ships aggregating about 2,000,000 tons capacity, with 37 further vessels (apart from the 26 now ordered) already building or ordered for delivery by 1960.

Tankers ordered abroad included (*a*) two ships of 47,500 tons capacity each ordered by Norwegian owners from the Rosenberg shipyard, Stavanger (announced June 6); (*b*) six ships of 65,000 tons capacity each ordered in February by the U.S. Cities Service Petroleum Company from A-B Uddevallavarvet, Uddevalla (this order was stated to be the largest ever received by a Swedish shipyard).

Tanker Finance. Details were announced on Feb. 7 of a new company, to be known as Tanker Finance Ltd., formed by M. Samuel and Co. (the merchant bankers) to finance the building over the next three years of £30,000,000 worth of new tankers for the Shell Petroleum group. The new company would have a nominal capital of only £1,000, but arrangements had been made, in conjunction with Hoare and Co. and Joseph Sebag and Co., for it to borrow £22,500,000 from a group of insurance companies (headed by the Prudential Company), pension funds, and other institutions, and the balance of £7,500,000 from Lloyd's Bank. The ships would be taken over by Tanker Finance Ltd. and chartered back to the Shell group for 24-year periods at fixed rates of hire. The money borrowed from Lloyd's Bank would be repaid in equal annual instalments over eight years, whilst that borrowed from the insurance companies and institutions would be repaid between the ninth and 24th years.

It was announced on Feb. 27 that a similar company, known as the Tanker Charter Company, had been formed by Robert Fleming and Co. (the bankers) in conjunction with the Ship Mortgage Finance Company, to finance the building of £10,000,000 worth of tankers for the B.P. Tanker Company. The new company would borrow £15,000,000 from a banking syndicate headed by the National Provincial Bank, and the balance by long-term loans placed with institutional investors. The ships would be taken over by the Tanker Charter Company and chartered back to the B.P. Tanker Company on terms covering repayment of the loans plus interest over 23 years.

World Tanker Fleet. The following particulars of the composition by size of the world tanker fleet at Dec. 31, 1956 were given in Messrs. John I. Jacobs and Co.'s *Half-Yearly Review*, published in February 1957:

Tonnage	Numbers In service	Numbers On order	Oil Cos.' share* %
75,000 dwt. and over	1	8	—
50,000 to 74,999 dwt.	—	26	50.0
45,000 to 49,999 dwt.	7	116	48.6
35,000 to 44,999 dwt.	23	188	42.2
25,000 to 34,999 dwt.	291	284	38.0
2,000 to 24,999 dwt.	2,540	338	33.8
	2,862	960	36.8

*Percentage of tonnage in each size group owned by the oil companies themselves, and not by private shipowners—for the most part Greek or Norwegian.

Nuclear Propulsion.

It was announced on July 15 that John Brown and Company, the Clydebank shipbuilders, and the Hawker Siddeley aircraft and engineering group had jointly formed a new company—to be known as the Hawker Siddeley-John Brown Nuclear Construction Company—to build nuclear power units for merchant ships and undertake other nuclear projects. The company, whose chairman would be Sir Roy Dobson (a director of Hawker Siddeley), would have a capital of £500,000 subscribed by Hawker Siddeley and John Brown in equal amounts.

Sir Arnold Hall, technical director of the Hawker Siddeley group, explained that the group had been studying marine reactors for over 12 months, and that a project for a nuclear tanker (understood to be of about 65,000 tons) had already reached the design stage. Although it was impossible to make precise forecasts of operating costs, owing to the fact that no merchant ship using nuclear power had yet been built anywhere in the world, it was believed that a nuclear vessel of this size could deliver oil to Britain more cheaply than one powered by conventional means.

Messrs. Babcock and Wilcox, the boilermakers responsible for the boilers installed in the Calder Hall and Chapel Cross (Annan) atomic power stations, announced on July 21 that they were planning to build a 65,000-ton atomic tanker in conjunction with Cammell Laird and Co., the Birkenhead shipbuilders. The statement added that the two companies had been collaborating closely together, and with the Atomic Energy Authority, in the field of nuclear ship propulsion since April 1956.

On March 5 the Government had announced that a committee would be set up under the chairmanship of Rear-Admiral Guy Wilson (see 15412 B) to bring together all interests concerned—engineering, shipbuilding, shipping, and Admiralty—to tackle the problem of applying nuclear propulsion to merchant ships. (Lloyd's Register of Shipping - Times - Daily Telegraph - Manchester Guardian - Economist) **(15554 B; 15412 B)**

A. SYRIA - SOVIET UNION. — Soviet Technical and Economic Aid for Syria. - Moscow Agreement.

A Syrian Government delegation headed by M. Khaled Azem (the Minister of Defence) visited Moscow from July 24 to Aug. 7 for discussions with a Soviet delegation headed by M. Kuzmin, a First Deputy Premier. The Syrian Defence Minister also had talks with Marshal Bulganin, M. Khrushchev, and Marshal Zhukov.

A communiqué, signed by M. Khaled Azem and M. Kuzmin, was issued on Aug. 6 stating (1) that the Soviet Government was "ready to co-operate with Syria in the construction of railways and highways, irrigation projects, hydro-electric stations, and industrial and other establishments"; (2) that the U.S.S.R. would also help in geological surveys; (3) that a Soviet economic mission would visit Syria; (4) that the U.S.S.R. would give "favourable consideration" to a loan to Syria for the above-mentioned purposes; and (5) that Soviet organizations would also give "favourable consideration to the sale of machinery, equipment, materials and other goods to Syria, to the purchase of cereals from Syria, and to increasing Soviet purchases of cotton and other goods."

The communiqué said that Soviet economic and technical aid for Syria would be provided "without any political or other strings" and on a basis of "equality, mutual economic benefit, non-interference in domestic affairs, and respect for the national sovereignty of the Syrian Republic."—(Le Monde, Paris - Soviet Embassy Press Department, London)
(Prev. rep. 15582 A.)

B. UNITED STATES. — Fall in Population of New York City. - Results of City Census.

Preliminary results of a special census, published on July 12, showed that the population of New York City had fallen by 120,448 since 1950—the present figure being 7,771,509, compared with 7,891,957 seven years ago. Three of the five boroughs of New York City had shown population losses since 1950, as follows:

	1957	1950	
Bronx	1,422,410	1,451,277	−28,867
Manhattan	1,785,878	1,960,101	−174,223
Brooklyn	2,594,871	2,738,175	−143,304
Queens	1,758,204	1,550,849	+207,355
Richmond	210,146	191,555	+18,591

The census showed that New York, which formerly vied with London for the title of the world's largest city, had fallen to third place after Tokio and London—comparative figures being 8,471,637 for Tokio according to a recent Japanese census, making it the world's largest city, and 8,239,910 for Greater London (the metropolitan police area). Although final figures of the New York census will not be published until October, the *New York Times* said they were "not likely to change this ranking."—(New York Times) **(15284 E.)**

C. SPAIN. — Increase in Bank Rate.

The *Banco de España* raised its discount rate on July 22 from 4½ to 5 per cent. The rate had been raised from 3¾ per cent to 4½ per cent in September 1956 as part of the Government's campaign against inflation.—(A.B.C., Madrid)
(Prev. rep. 13830 E.)

D. UNITED KINGDOM. — Membership of Council on Prices, Productivity and Incomes.

It was announced from 10, Downing Street, on Aug. 12 that Lord Cohen (Lord of Appeal in Ordinary) had been appointed chairman of the new independent Council on Prices, Productivity, and Incomes. The other members of the Council would be Sir Dennis Robertson, lately Professor of Political Economy at Cambridge, and Sir Harold Howitt, partner in Peat, Marwick, Mitchell & Co., chartered accountants, and a member of the recent courts of inquiry into the engineering and shipbuilding disputes.

Lord Cohen (69) was chairman of the Company Law Amendment Committee, and first chairman of the Royal Commission on the Taxation of Profits and Income; Sir Dennis Robertson (67) was an adviser at the Treasury during the Second World War; and Sir Harold Howitt (70) is a leading chartered accountant.

It was stated that the Council would decide its own procedure and staff requirements, and would have no affiliation with any Government department. Its reports would not be submitted to any Minister but would be made generally available to the public. It would have no compulsory powers to call witnesses before it, and anyone it wished to hear or consult would be asked to appear voluntarily, but it would be provided with all the information which the Government might be able to furnish. It would decide for itself when and how its reports should be made and whether its sittings should be in public, and would be as free to comment on Government financial and economic policy as on any other matter relevant to its terms of reference. Questions concerning its activities would be answered in the Commons either by the Prime Minister or by the Chancellor of the Exchequer.

The members of the Council will not be paid a salary but will receive subsistence allowances similar to those paid to members of Royal Commissions.—(Times - Daily Telegraph) **(15673 A.)**

E. INDIA. — National Book Trust.

A National Book Trust was inaugurated by Vice-President Radhakrishnan on Aug. 1, with the aim of producing good books at low cost and making them available throughout India at moderate prices. In particular, it will publish classical Indian literature (Sanskrit), translations of standard books from one Indian language into another, translations of famous books from foreign languages, and reproductions of Indian paintings, sculptures and other art treasures. The books will be published in Hindi and other languages recognized in the Constitution, as well as in foreign languages. The National Book Trust was established by the Union Ministry of Education under the chairmanship of Mr. Chintaman Deshmukh, chairman of the University Grants Committee.—(Indian High Commissioner's Office, London - The Statesman, Calcutta)

F. NEW ZEALAND. — Unification of Presbyterian, Methodist and Congregational Churches.

It was announced in Wellington on July 15 that an overwhelming majority of the members of four churches in New Zealand—the Presbyterian Church, the Methodist Church, the Associated Churches of Christ, and the Congregational Union—had voted for unification, following several years' discussions on this question. Seventy-eight per cent of the Methodist Church membership voted, of whom 92 per cent were in favour of union. For the Presbyterians the percentage poll was 64, with 75.6 per cent in favour; for the Congregational Union, 71.3 per cent, with 88.4 per cent in favour; and for the Associated Churches of Christ, 75 p.c., with 94 p.c. in favour.—(Directorate of Information Services, Wellington)

G. MOROCCO. — Sultan assumes Title of King.

It was announced in Rabat on Aug. 14 that Sultan Mohammed V would be known in future as King of Morocco and not as Sultan. Accordingly, the country would henceforth be officially known as the Kingdom of Morocco and no longer as the Sherifian Empire. All foreign diplomatic missions in Rabat were informed of the changes.—(Le Monde, Paris)
(Prev. rep. 15666 D.)

H. AUSTRALIA. — Establishment of Council on Decimal Currency System.

It was announced in Canberra in July that a Council had been set up to work for the introduction of the decimal currency system in Australia. Its chairman is Sir Leslie Melville, Vice-Chancellor of the Australian National University (Canberra), and a former economic adviser to the Commonwealth Bank.
(Australian News and Information Bureau)

A. CAMBODIA. — Political Developments. - Cabinet Changes. - Prince Norodom Sihanouk's Visits to China and Europe. - Continuation of Chinese and Soviet Economic Aid. - U.S. and French Aid. - Emphasis on Neutralist Foreign Policy.

Although the Popular Socialist Community, led by ex-King Norodom Sihanouk, had won all the seats in the Cambodian National Assembly in the 1955 general elections (see 14484 A), the political situation continued to remain unstable, eight Cabinets being formed between January 1956 and the end of July 1957. Internal developments during this period are described below under cross-headings, together with developments affecting the country's foreign relations.

The Second Norodom Sihanouk Government.

Prince Norodom Sihanouk, who had provisionally accepted the Premiership for three months in September 1955, resigned on Jan. 3, 1956, and left for a visit to France. M. Oun Cheang Sun, who had been appointed his successor, tendered his resignation on Jan. 13 as a result of popular demonstrations in Pnom-Penh; this was accepted by King Norodom Suramarit, who announced that the Prince would resume office on his return. Prince Norodom Sihanouk's investiture as Premier and Foreign Minister was unanimously approved by the National Assembly on March 1, 1956.

Before resuming the Premiership, Prince Norodom Sihanouk had visited the Philippines from Jan. 31-Feb. 7, 1956. He subsequently stated that while in Manila he had been subjected to strong pressure from the late President Magsaysay, "at U.S. instigation," in favour of Cambodia's adhesion to the SEATO pact—an allegation which was strongly denied by the Philippine President. From Feb. 13-21, 1956, the Prince visited China, and while in Peking signed a Sino-Cambodian declaration of friendship which reaffirmed Cambodia's policy of neutrality and her support for the five *Panch Sila* principles of "peaceful co-existence."

The Prince's visit to China was followed by a deterioration in Cambodia's relations with South Vietnam and Siam, which had already been strained for some time, mainly as a result of frontier disputes; other questions at issue between Cambodia and South Vietnam included the status of the large Cambodian minority in South Vietnam, rights of navigation on Mekong River, and the asylum given by Cambodia to political refugees from South Vietnam. The Cambodian frontier was closed by South Vietnam in February and by Siam in March, 1956, Cambodia thus being subjected to an economic blockade. The Cambodian Government announced on March 24 that it would itself close the South Vietnamese frontier as a reprisal, except to goods in transit.

Prince Norodom Sihanouk again resigned the Premiership on March 30, 1956, in view of the opposition which his policy had encountered both at home and abroad. A new Cabinet was formed on April 2 by M. Khim Tit, who had been Vice-Premier under Prince Norodom Sihanouk.

In a broadcast on March 29 the Prince referred to "personal insults" to himself published in the U.S. Press during his visit to China, and said that he preferred to resign rather than "shake hands with those who had insulted him"; he also mentioned as reasons for his resignation "increasing internal pressures" and opposition by officials of the Finance Ministry to his proposals for the investment of U.S. aid funds. He subsequently accused the U.S.A. on April 7 of "treating him as a madman," and protested against the obstacles which, he alleged, had been placed in his way after his visit to Peking in order to bring about a change of Government.

In a letter to the Cambodian Government on April 19 the U.S. Secretary of State (Mr. Dulles) denied that the U.S.A. had threatened to cut off economic aid to Cambodia, or had compelled South Vietnam and Siam to exert economic pressure on her in order to force her to join SEATO; at the same time he gave an assurance that the U.S.A. would respect Cambodia's desire to pursue a neutral policy. The Siamese Premier, Marshal Pibul Songgram, announced on the following day that Siam had made Cambodia an offer of close economic co-operation between the two countries.

In order to rally support for Prince Norodom Sihanouk's policy, a national congress of the Popular Socialist Community was held in Pnom-Penh on April 21-22, 1956. In his report to the congress the Prince stated that the U.S.A. had promised to grant Cambodia unconditionally the same amount of aid as heretofore; that Siam had suggested conversations on the settlement of the frontier disputes; that offers of economic aid had been received from the Soviet Union, Poland, and China; and that the Soviet Union and Poland had also offered to establish diplomatic relations. After representatives of the two leading Opposition parties (the Democrats and the pro-Communist People's Party) had promised full support for the Prince's policy, the congress voted in favour of acceptance of economic aid from Western, Communist, or neutral countries, and the establishment of diplomatic relations with the Soviet Union and Poland.

Prince Norodom Sihanouk's Visit to Europe.

Prince Norodom Sihanouk arrived in Delhi on May 21, 1956, *en route* to Europe for a three months' tour, and had discussions with Mr. Nehru. At a press conference he expressed the opinion that Cambodia's policy of neutrality was now "better appreciated and accepted by all countries"; in particular, relations with South Vietnam were now normal and there was no longer any economic blockade. After leaving Delhi the Prince paid brief visits to Karachi and Baghdad, and spent a week in Paris.

From June 3-10, 1956, Prince Norodom Sihanouk visited Warsaw at the Polish Government's invitation. A statement issued at the end of his visit paid tribute to the contribution to peace made by the Cambodian Government's policy and by Polish co-operation in the work of the International Supervisory Commission in Indo-China, and announced that negotiations would take place for an economic agreement between the two countries. After visiting Stockholm and Madrid, where he met General Franco on June 23, the Prince proceeded on July 2 to Moscow for discussions with the Soviet Government.

A joint statement issued on July 7, 1956 announced that Cambodia and the Soviet Union had agreed to exchange ambassadors; that Marshal Bulganin, M. Khrushchev, and M. Shepilov (then Foreign Minister) had accepted an invitation to visit Cambodia; that the U.S.S.R. had offered Cambodia "technical and economic assistance without any mercenary conditions, to allow her to develop her economy and continue to defend her policy of neutrality"; and that Soviet and Cambodian experts would jointly examine the possibilities of Soviet assistance in building industrial and other undertakings and in training technical personnel.

From Moscow the Prince went to on Prague, where he discussed economic and political questions with the Czechoslovak Government, and from July 19-24 visited Yugoslavia for talks with President Tito. After visiting Switzerland and Italy he returned to Pnom-Penh on Aug. 21, 1956.

In a statement on his return the Prince said that he preferred foreign aid to take the form of technical or industrial assistance, such as the port of Kompongsom which France had offered to build, to "a money loan which too often does not help the people." He thanked France, the U.S.A., and the Colombo Plan countries for their assistance, and expressed the hope that "these countries will not take offence at the aid which we have obtained from the Communist bloc."

Foreign Policy Statement by Prince Norodom Sihanouk.

During his visit to France Prince Norodom Sihanouk explained why Cambodia had adopted a neutral foreign policy, and gave his views on her relations with the French Union, in an interview published in *Le Monde* on June 13, 1956. The most important passages are reproduced below:

"Cambodian neutrality, which can be compared to that of India, is for us a necessary consequence of the war in Indo-China. After the Geneva Agreements the Vietminh military elements which had penetrated Cambodian territory withdrew, but they left behind them populations strongly influenced by their propaganda, giving rise to a danger of internal subversion which we had to take into account. On the other hand, the inclusion of Cambodia in the SEATO protection zone, which we had not asked for, aroused distrust of us in the Communist countries, which feared that Cambodian territory would be transformed into a base for aggression.

"During the Bandung conference Mr. Chou En-lai asked me, in the course of a long conversation, 'what was this military agreement which bound us to the United States.' I was able to explain to him that we had not signed any pact of this kind, and that Cambodia had not asked for SEATO's protection. Moreover, all our military instructors—and there are not many of them—belong to the French mission. However, a doubt still remained on the Communist side, which could be expressed thus: (1) If Cambodia is really neutral, why does she accept only Western aid?; (2) Why does she accept the protection of SEATO?

"It was to answer these two questions that I visited Peking and concluded an economic aid agreement with China [see below]. For the same reason I agreed to visit Warsaw and Moscow. Henceforward we shall receive assistance equally from Communist and from Western countries. In addition, I have publicly stated in Tokio and Manila that we are ready to renounce our inclusion in the SEATO protection zone. Our policy is one of friendship with all countries, provided they respect our neutrality . . .

"Franco-Cambodian relations are excellent. No difficulty has arisen between our two countries since the agreements of November 1953, which set the seal on our independence. We no longer take part in the High Council of the French Union because its framework is too narrow and the very phrase 'French Union' is out of date. In the same way, our representatives in the Versailles Assembly [i.e. the Assembly of the French Union] are no longer replaced as vacancies arise. But that does not mean that we have cut ourselves off from France. France is our friend, and we are giving her time to settle her difficulties in North Africa and define a new conception of the French Union which might satisfy us. We will adhere to it when

the French Union is no longer confined within a rigid framework, headed by a High Council automatically presided over by France. We would like a real, not a legal union, which ties down no-one; a sort of periodical round-table conference, meeting in turn each of the member-countries. We should consider favourably any such proposal."

Economic Aid from Communist Countries.

Following Prince Norodom Sihanouk's visits to Communist China and the Soviet Union, a number of agreements for closer economic co-operation were concluded by Cambodia in 1956 and 1957.

A Chinese offer of economic aid was accepted by M. Khim Tit's Government on May 9, 1956, and a Cambodian delegation subsequently visited Peking to discuss the details. An agreement was concluded on June 22, 1956, whereby China undertook to finance the construction of factories, irrigation and electrification projects, and roads to the value of 8,000,000,000 francs (£8,000,000) and to supply technicians and specialists. A trade agreement with Communist China had previously been signed on April 24, 1956.

In accordance with the agreement between Prince Norodom Sihanouk and the Soviet Government, a commission of Soviet experts arrived in Pnom-Penh in December 1956, and began negotiations on Feb. 20, 1957. A trade agreement and an agreement on cultural and scientific co-operation were signed on May 31, 1957; it was announced at the same time that the Cambodian Government had accepted a Soviet offer to build a hospital in Pnom-Penh.

A trade agreement with Czechoslovakia had previously been signed on Oct. 8, 1956, together with an agreement on scientific and technical co-operation. The latter provided for the supply of Czechoslovak scentific and industrial equipment to Cambodia, and for exchanges of experts and students.

Economic Aid from France.

It was stated in *Le Monde* (Jan. 9, 1957) that French technical assistance to Cambodia was largely concentrated on public works, including the building of a deep-water port at Kompongsong, on the Gulf of Siam; the construction of a modern aerodrome at Pochentong, near Pnom-Penh; and preparatory investigations into the building of bridges at Pnom-Penh over the Tonlé-Sap and Mekong Rivers. Assistance was also being given in the organization of rural co-operatives and the establishment of agricultural research stations to modernize agricultural techniques.

Cabinet Changes, August 1956 - July 1957.

During Prince Norodom Sihanouk's absence in Europe, King Norodom Suramarit accepted the resignation of M. Khim Tit's Government on Aug. 8, 1956. M. Khim Tit—who was subsequently appointed High Commissioner in France—told the Press that his resignation had been caused by dissensions within the Popular Socialist Community, provoked by "the ambitions of certain of its members.'

On returning from his tour Prince Norodom Sihanouk at first refused to form a new Cabinet, but finally accepted the Premiership on Sept. 15, 1956, by the King's orders, to end the five-week-old Cabinet crisis. His Government included his uncle, Prince Monireth, who was placed at the head of a new Ministry entrusted with the eradication of corruption in the Civil Service. An announcement by Prince Monireth that persons guilty of corruption would be tried by court-martial was strongly attacked as unconstitutional, and in consequence the Cabinet resigned on Oct. 15.

Following the Prince's resignation, a new Government was formed by M. San Yun; this administration also resigned on Dec. 19, 1956, after the Assembly had refused to accept proposals for the taxation of salt and imports put forward by the Ministers of Commerce and Finance. At the King's request M. San Yun formed a new Cabinet from which these Ministers were excluded, but on March 27, 1957, the Assembly adopted a motion of censure on the Government's economic policy by 72 votes to nil, with five abstentions; the censure motion was occasioned by rising prices, the development of a black market, and the growth of unemployment.

Prince Norodom Sihanouk formed his fourth Government (in which he held the portfolios of Foreign Affairs, the Interior, and Planning) on April 7, 1957, receiving a unanimous vote of confidence on the following day. During July, however, the Prince announced his resignation on grounds of ill-health, and a new Cabinet was formed on July 30, 1957 by M. Sim Var, who stated that he would continue his predecessor's policy. (Le Monde, Paris - Times - New York Times - Soviet Embassy Press Department, London) **(Prev. rep. Cabinet, 14484 A; Relations with China, 15463 A; with U.S.S.R., 14875 C.)**

A. RHODESIAN FEDERATION. — First Bank Rate.

The Bank of Rhodesia and Nyasaland, the new central bank of the Federation, published a Bank Rate for the first time on August 1, the rate being fixed at 4½ per cent.
(Federal Information Department, Salisbury) **(14762 A.)**

B. JORDAN. — Further British Economic Aid. - World Bank Report on Economic Development.

It was announced on Aug. 6, that the British Government had agreed (subject to parliamentary approval) to give Jordan the outstanding balance of a loan for economic development which was originally granted in December 1955. Under that agreement, the U.K. had undertaken to pay £2,250,000 as an interest-free loan towards the Jordanian development programme for 1956-57, but only £1,120,000 had been drawn by the Jordan Government during that year. In May, 1957, Jordan had asked for the balance of £1,130,000 to be paid out.

The statement said that although there was no legal commitment for the U.K. to provide further funds after March 31, 1957, because of the abrogation of the Anglo-Jordanian Treaty, the U.K. Government had nevertheless offered up to £500,000 for 1957-58 and the balance during 1958-59.

The report of a World Bank survey mission on the economic development of Jordan was published on July 28. It outlined a 10-year programme of public investment, at an estimated cost of 42,350,000 Jordanian dinars (about $118,000,000), to increase productive resources, raise living standards, and reduce the Jordanian Government's reliance on external financial assistance.

The report said that in 1954, foreign loans and grants constituted about 60 per cent of Jordan's total foreign exchange receipts and of the Government's total revenues, and that foreign aid bore the cost both of defence expenditure and of aid to the Palestine refugees. Assuming that external aid continued to provide for these two items, it was expected that a sustained increase in total production of about 4 per cent a year might make it possible by 1965 to "taper off" foreign aid for development purposes.

With a population of 1,500,000, of which almost one-third were refugees, and with most of its 37,500 square miles desert, the problem of development in Jordan was difficult. In the absence of any known quantities of coal, oil, or metallic minerals, agriculture remained the primary occupation, but there was insufficient irrigated land to provide work for all. More than half the refugees were unemployed in 1955, and most of the remainder, as well as many of the local population, found only casual or seasonal employment.

The report gave priority to agricultural development, with emphasis on increasing production in rain-fed farm areas (about 750,000 acres) rather than by expanding irrigation. Although the potentialities of developing the Jordan Valley water resources were considered, the report did not include this in its programme pending a solution of certain questions affecting the interests of neighbouring States. It suggested, however, the irrigation of about 24,700 acres in the East Ghor area of the Jordan Valley, and a scheme for developing underground water resources.

As regards mining, the mission recommended a revival of Jordan's potash industry, and a rapid expansion of phosphate mining from 250,000 tons a year to perhaps 1,000,000 tons by 1965. In the field of transport, the most urgent needs were the building of a road from Amman to the port of Akaba, and the development of that port.

In conclusion, the report recommended the setting up of an independent monetary authority and the reorganization of the Jordan Development Board in order to supervise the entire development programme.—(Times - Daily Telegraph - International Bank, Washington) **(Prev. rep. 15660 B.)**

C. FRANCE. — Renaming of Departments.

During the early months of 1957 the department of Loire-Inférieure changed its name to Loire-Atlantique, while the department of Charente-Inférieure renamed itself Charente-Maritime. The changes were sought by the departmental councils concerned and approved by the French Government. As the department of Seine-Inférieure had been renamed Seine-Maritime in 1955 (see 14032 B) there are no longer any French departments bearing the designation "Inférieure." Although the word *inférieure* means "lower" (in the sense of Lower Loire, Lower Charente, and Lower Seine, the three departments concerned lying at the mouths of those rivers), it also has the pejorative meaning of "inferior" and was discarded for that reason.—(Le Monde, Paris) **(14032 B.)**

D. IRISH REPUBLIC. — Membership of International Bank and International Monetary Fund.

The Irish Republic became a member of the International Bank and the International Monetary Fund on Aug. 8. Its quota in the I.M.F. is $30,000,000 and its subscription to the capital stock of the Bank is 300 shares with a total par value of $30,000,000. The Irish Republic's admission brought the total membership of both institutions to 61, the total of members' quotas in the Fund to $8,967,000,000, and the total subscribed capital of the International Bank to $9,298,400,000.

A. INDIA. — First Report of Press Registrar. - Analysis of Indian Newspapers.

The first report of the Press Registrar, a post created under the Press and Registration of Books (Amendment) Act [see 14744 A], was presented to the Indian Parliament on July 22 by Dr. Keskar, the Union Minister for Information and Broadcasting. It showed that there were 6,570 newspapers (including periodicals) in the country, of which the largest number (1,254) was published in Hindi. Although Hindi newspapers outnumbered those in English, the latter nevertheless commanded the largest circulation in any language-group—730,000 for dailies and 2,380,000 for all categories combined, followed by Hindi with 350,000 and 1,600,000 respectively. Circulations in other major Indian languages were: Tamil, 970,000; Gujerati, 860,000; Marathi, 670,000; Urdu, 610,000; Bengali, 400,000; Malayalam, 350,000; Telugu, 330,000; Kanarese, 320,000.

The report (covering the period July 1 to Dec. 31, 1956) was divided into two parts: List A, which included 4,559 newspapers about which the Registrar had received particulars, and List B, which comprised 2,001 newspapers of which no particulars had been given, but for whose existence the State Governments had vouched. The study of circulation and ownership given in the report was confined to about 2,400 newspapers in respect of which detailed information had been received by the Registrar.

According to the report, Bombay had the largest number of newspapers of any State (1,271), followed by West Bengal (1,129), Uttar Pradesh (756), Madras (717), and Delhi (560). The number of newspapers published in these four States and Delhi constituted two-thirds of the total number of newspapers published in India. The number of newspapers in Madhya Pradesh was 165, while in the remaining States their number varied between 426 in Punjab and 34 in Assam. In the Union Territories it ranged between 17 in Manipur and four in Himachal Pradesh.

Analysis by languages showed that 19 per cent of the total number of newspapers were published in Hindi, 17 per cent in English, 10 per cent in Bengali, 9 per cent in Urdu, 7 per cent in Gujerati, and 5 per cent each in Marathi and Tamil. Newspapers in Hindi were published in all States except Assam and Orissa. Hindi claimed the largest number among dailies, bi-weeklies, weeklies, and fortnightlies. In the case of monthlies and quarterlies, Hindi ranked second to English.

A study of ownership based on the data received showed that individual ownership was the most predominant, accounting for 44 per cent of the newspapers analysed. The report gave details of nine chains, 13 groups, and eight multiple units of newspapers functioning in the country. The most numerous class of newspapers was monthlies (2,506), followed by 1,903 weeklies, 598 fortnightlies, and 476 dailies.

Under the Press and Registration of Books (Amendment) Act, 1955, which came into force on July 1, 1956, the Union Government became responsible for collecting information and statistics about the Press in India and, in particular, for studying trends in circulation and in newspaper ownership.
(The Hindu, Madras) **(Prev. rep. 14744 A.)**

B. BOLIVIA. — Removal of Left-wing Influence from Government and National Revolutionary Movement. - Resignation of Vice-President Chavez.

The removal of left-wing influence from the Bolivian Government and from the leadership of the ruling National Revolutionary Movement (*Movimiento Nacionalista Revolucionario*, M.N.R.) was carried out on July 14-15 by a caucus of M.N.R. leaders who voted to repudiate the party's national political committee, which is controlled by Señor Juan Lechin. [Señor Lechin is president of the Bolivian Labour Federation, the country's major workers' organization]. The caucus also empowered President Hernán Siles to break entirely with the Labour Federation by eliminating from his Cabinet the four Ministers representing the Federation.

Prior to this development, Señor Lechin and other elements in the M.N.R. had strongly opposed the economic stabilization programme for Bolivia drafted by an American economist, Mr. George J. Eder, and adopted by the Bolivian Government. The Vice-President of Bolivia, Señor Nuflo Chavez, resigned on June 24 in protest against Mr. Eder's proposals and also against the recent agreement (see 15644 E) on the settlement of Bolivia's foreign debts.—(New York Times)
(Prev. rep. 15644 E; 15402 D; 15034 C.)

C. NEW ZEALAND. — Inquiry into Decimal Coinage.

The N.Z. Minister of Finance, Mr. J. T. Watts, announced on May 6 that the Government had decided to set up a committee to inquire into a decimal coinage, under the chairmanship of Mr. A. B. Taylor, Deputy Secretary to the Treasury.
(The Dominion, Wellington) **(Prev. rep. 15705 H; 15284 B.)**

D. AFGHANISTAN - SOVIET UNION. — State Visit to U.S.S.R. by King of Afghanistan. - Extension of Soviet Economic Aid.

The King of Afghanistan (H.M. Mohammed Zahir Shah), accompanied by his Foreign Minister (Sardar Mohamed Naim), paid a State visit to the Soviet Union from July 17-31, flying to Moscow from Tashkent in a Soviet airliner. In the course of his tour King Zahir Shah attended a number of official functions, including a State banquet and reception given in his honour at the Kremlin by the Soviet Government, and also paid visits to Leningrad, Minsk, the Crimea, and Baku. While in Moscow he had conversations with President Voroshilov, Marshal Bulganin, M. Khrushchev and other Soviet leaders, whilst the Afghan Foreign Minister had discussions with M. Gromyko, Foreign Minister of the U.S.S.R.

Two communiqués were issued in Moscow at the conclusion of the King's visit, one signed by King Zahir Shah and President Voroshilov and the other by Sardar Mohamed Naim and M. Gromyko.

The communiqué signed by the two Heads of State referred to the "friendly and good-neighbourly relations" between the two countries and to the desire of both Governments "to promote world peace and security." It added (1) that King Zahir Shah had "explained the neutral policy of Afghanistan"; (2) that there was "complete unanimity of views" between the U.S.S.R. and Afghanistan on the need for "furthering international co-operation and mutual aid between the peoples and nations of the world"; (3) that both countries had affirmed "the principle of peaceful co-existence . . . in line with the U.N. Charter"; (4) that the U.S.S.R. and Afghanistan had "reaffirmed their desire to continue friendly relations and . . . to develop and strengthen them further." It was announced that President Voroshilov had accepted an invitation from King Zahir Shah to visit Afghanistan.

The communiqué issued by the two Foreign Ministers announced (1) that the Soviet Government had "decided to render Afghanistan disinterested technical and material assistance, which is not contingent on any political or other similar conditions, in carrying out oil prospecting work in Afghanistan's northern regions"; (2) that the U.S.S.R. would also "render Afghanistan assistance in training national technical personnel for its economic development"; (3) that talks would be held "on a regime for the Soviet Afghan frontier," to be finalized in treaty form; and (4) that both sides would co-operate in exploiting frontier waterways. The communiqué referred to the "atmosphere of friendship and complete mutual understanding" in which the talks had been held.

King Zahir Shah visited the Central Asian republics of Uzbekistan and Tajikistan before returning to Kabul.
(Soviet Embassy Press Department, London) **(14791 G.)**

E. SIERRA LEONE. — First Elections under Revised Constitution. - New House of Representatives.

The first elections under the revised Constitution of 1956 (see 15160 B) were held in Sierra Leone on May 5 for the 39 elected seats in the new House of Representatives. They resulted in a victory for the Sierra Leone People's Party (SLPP) led by the Chief Minister, Dr. M. A. Margai, which won 28 seats; six of the remaining seats went to the United Progressive Party (UPP) and five to Independents.

The House of Representatives has a membership of 57, of whom 39 are elected, 12 are paramount chiefs (who are required to be literate), two are nominated by the Governor to represent special interests, and four are *ex-officio* members. Of the 39 elected members, 14 are from the Colony, 24 from the Protectorate, and one is elected by the Bo urban area. [Sierra Leone is partly a Colony and partly a Protectorate.] The 12 paramount chiefs are selected by the Protectorate district councils, which are partly elected bodies.

The election manifesto of the SLPP called *inter alia* for the appointment of an All-African Cabinet headed by a Prime Minister; the abolition of the posts of Colonial Secretary and Chief Commissioner of the Protectorate; and the appointment of a Deputy Governor responsible for External Affairs and Defence. It pledged the party to work for the attainment of self-government by Sierra Leone "within the lifetime of the new legislature."

An eight-member Ministry was appointed after the elections in which Dr. Margai, in addition to remaining Chief Minister, took the portfolios of Health and Agriculture. In opening the new House of Representatives, the Governor (Sir Maurice Dorman) said that the Government would give high priority to education and to the exploitation of Sierra Leone's mineral wealth, and would work to prepare Sierra Leone for "self-government in the modern world."

Sir Ernest Broku-Betts, vice-president of the former Legislative Council, was elected Speaker of the House of Representatives. A former magistrate and puisne judge, he received a knighthood in the last Birthday Honours (see 15589 A).
(Times - Manchester Guardian) **(Prev. rep. Constitutional Reforms, 15160 B; Dr. Margai, 13770 D.)**

AUGUST 17—24, 1957

A. OMAN. — Imam of Oman's Revolt against the Sultan. - The Sultan's Request for British Military Assistance. - Rebellion quelled with British Aid. - Arab League's Support for Imam. - Meeting of U.N. Security Council. - Rejection of Arab Charges against Britain.

A revolt against the authority of the Sultan of Muscat and Oman (H.H. Said bin Taimur) broke out in the interior of the Sultanate in mid-July under the leadership of the former Imam of Oman, Ghalib bin Ali (see 14782 A). At the request of the Sultan, small contingents of British troops, with R.A.F. support, assisted the Sultan's forces to quell the rebellion. By Aug. 11-12 the Sultan's authority had been fully restored in the affected areas, the rebel leaders were in flight, and a number of small towns and villages formerly in rebel hands had been reoccupied by the British and Sultanate forces.

The revolt was led by the ex-Imam, his brother Talib, and the Sheikh Suleiman bin Himyar, a tribal chief and self-styled "Lord of the Green Mountains" (the Jebel Akhdar range, about 100 miles inland from Muscat, the capital of the Sultanate). The centre of the revolt was the township of Nizwa, from which the Imam had been expelled by the Sultan's forces in a bloodless campaign in December 1955 (see 14782 A). For some time previously the Imam had exercised a virtual *de facto* control in this remote area, and had attempted to set up an independent State in the interior of the Sultanate under his own sovereignty. After his expulsion from Nizwa in 1955, and the reassertion of the Sultan's sovereignty over the area, the Imam had been allowed to live in his native village under the guarantee of the chief sheikh of his tribe. His brother Talib, however, fled to Saudi Arabia and later went to Cairo, where he established a "Free Oman" office in support of the Imam's claims. According to *The Times*, he was believed to be living in the Saudi Arabian port of Dammam, on the Persian Gulf, shortly before the uprising. Propaganda attacking the Sultan of Muscat and Oman and supporting the Imam Ghalib had frequently been broadcast by Cairo Radio, both before and during the rebellion.

Unlike the British-protected trucial sheikhdoms on the Persian Gulf (Trucial Oman), whose defence and foreign relations are undertaken by Britain, the Sultanate of Muscat and Oman is an independent State which, however, has retained close treaty relations with Britain for more than a century. Commenting on the Sultan's request for British aid in suppressing the revolt, the Diplomatic Correspondent of *The Times* described the position as follows: "The Sultanate . . . is not a protected State, but Britain has protected the Sultan's interests at his request in the parallel Buraimi dispute [see 14534 A] and has been in treaty relations with the Sultanate since 1839. British subjects have frequently acted in an advisory capacity to the Sultan and British subjects officer the local forces. The British-protected States in the Persian Gulf, therefore, regard Britain as under as strong an obligation to Muscat and Oman as to themselves; and, if Britain failed to give support, confidence in the British intention to give adequate support in future to British-protected States such as Kuwait, Qatar, Bahrein, Abu Dhabi, or Sharjah against the encroachments of their rich and more powerful neighbour Saudi Arabia would be severely shaken."

The Sultan's forces—the Muscat and Oman Field Force—comprise three weak battalions and a battery of howitzers, commanded by 12 retired British officers serving under contract with the Sultan. In the neighbouring sheikhdoms there is an efficient motorized force of 1,200 men (the Trucial Oman Scouts) under British officers. At Bahrain, the headquarters of British Land Forces, Persian Gulf, there is also normally a half-battalion of British troops (at present the Cameronians), the other half-battalion being stationed in Kenya. There are R.A.F. bases and airstrips at Bahrain, Sharjah (Trucial Oman), and Salala (in southern Oman, near the border of the Aden Protectorate.)

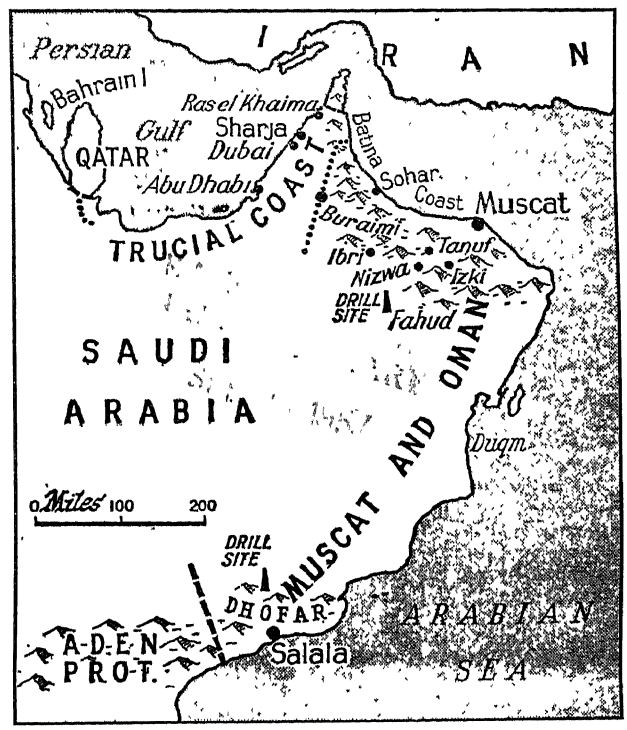
The only known oil resources in Oman are in the Fahud area (see map), where small-scale drilling operations are carried out by Petroleum Development (Oman), a subsidiary of the Iraq Petroleum Company.

The Military Operations.

The first intimation of the rebellion in Oman was given on July 19, when a British spokesman in Bahrein said that the insurgents appeared to be in control of the Nizwa area and had had "some initial success." British press reports from Bahrein indicated that the forces of the ex-Imam had driven the Sultan's forces from Nizwa, Firq, and other places in central Oman and were astride the important land route from Muscat to the Buraimi Oasis. Two days later the Sultan requested British aid in overcoming the rebellion, and the Sultan's Foreign Minister (Mr. Neil Innes, a British national) stated that plans were being concerted, in consultation with the British Government, to help the 1,500 troops of the Sultanate.

Sir Bernard Burrows, Political Resident in the Persian Gulf, announced in Bahrein on July 23 that R.A.F. aircraft had begun dropping leaflets on certain fortified places within a 50-miles' radius of Nizwa warning the occupiers, in the name of the Sultan, to evacuate them within 48 hours, after which the fortified places would be destroyed by air action. Sir Bernard disclosed that the rebels were using automatic weapons and land mines for the first time in Oman [the country of origin of these weapons was not disclosed]; that large shipments of arms had been smuggled to the rebels by sea during the past month; and that British frigates were patrolling the coast to prevent further arms smuggling.

R.A.F. *Venoms* from Sharjah made cannon-fire and rocket attacks on July 24, 25 and 26 against rebel-held forts at Nizwa, Izki (20 miles east of Nizwa) and Tanuf (7 miles north-east of Nizwa). In every case 48 hours' warning was given by leaflets dropped over these places. Subsequent reconnaissance showed that all three forts had been heavily damaged, particularly the fort at Tanuf.



(*Economist*)

Operations were temporarily suspended on July 26, when the red flag of the Sultan was seen to be flying over Izki instead of the white flag of the Imam. They were resumed on July 29, when attacks were made on a rebel fort at Birkat (a village 5 miles west of Izki), followed on July 30-31 by further attacks on a fort at Firq (10 miles south of Nizwa) and targets elsewhere in the Nizwa area. During the first week of August air operations were switched against rebel huts, tents and transport, several vehicles being destroyed and damaged in a camp at Firq which had been captured by rebel forces from the Sultan's troops. A news black-out was imposed in Bahrein on July 30, the only official information being given in brief communiqués. An official spokesman disclosed on Aug. 1 that the previous 48-hours' warning notice by leaflet had been reduced to 15 minutes in the attacks on the Firq camp and other rebel transport targets.

Meanwhile three companies of the Cameronians had been flown from Kenya to Bahrein to reinforce the half-battalion already in the Persian Gulf; it was disclosed in Bahrein on July 29 that a detachment of the Cameronians had moved into the Buraimi Oasis (about 150 miles north-west of the rebel-held region), where units of the Trucial Oman Scouts had been concentrated since the beginning of the uprising against the Sultan. The British C.-in-C., Middle East (Lieut.-General Sir Geoffrey Bourne) arrived in Bahrein from Cyprus on Aug. 1 for talks with Sir Bernard Burrows and Air-Marshal Sinclair (A.O.C. in the Persian Gulf area), after which he flew to Muscat for discussions with the Sultan.

In a press statement on Aug. 4, Air-Marshal Sinclair said that the operations against the rebels were about to enter the third phase—that of the "land strike," in which British forces would play a support role. The first and second phases—consisting of demonstration air strikes and restriction of rebel ground movement by air attack—had been virtually completed, and the ring was being tightened round the rebel forces. British troops had already entered Oman by land and air, while the Trucial Oman forces, under British officers, had secured Ibri (60 miles west of Nizwa) as a base for operations against the rebels. Air-Marshal Sinclair emphasized that British troops would be used only to maintain bases and lines of communication and would on no account enter any villages or towns, which would be occupied only by the Sultan's forces. The Trucial Oman Scouts would supply weapon support and ground-to-air contacts for the Sultan's troops, while the British were providing some scout cars flown from Aden. The British forces would be withdrawn from Oman as soon as the operations were completed and the Sultan's authority restored.

The "land strike" referred to by Air-Marshal Sinclair opened on Aug. 6, when British and Sultanate troops began an advance on Nizwa from the Fahud area, some 80 miles south-west of Nizwa. The first intimation that British forces were at Fahud was given in a Bahrein communiqué (Aug. 6) which stated that a concentration of British troops (the Cameronians), the Trucial Oman Scouts, and the Sultan's forces had been completed in this area, and that stores, petrol and ammunition had been "airlifted to an administrative base in the field." The communiqué added: "Owing to the difficult terrain, the establishment of this base has been one of the biggest difficulties, and the present state of readiness to commence ground operations is due to the magnificent achievements of the R.A.F. in moving essential supplies."

The advance on Nizwa was carried out in three columns—Cameronians, Trucial Oman Scouts, and the Sultan's forces—under the command of Brigadier J. A. R. Robertson. After a rapid advance across the desert, Brigadier Robertson's forces entered Firq (10 miles south of Nizwa) on Aug. 8 after passing through the village of Izz and recapturing the camp which had been attacked by the R.A.F. a few days earlier in an effort to destroy rebel transport. Although Firq was recaptured without opposition, strong resistance was encountered on Aug. 9 from a rebel force of 200 which had set up road-blocks and strongpoints a mile north of the village, across the route commanding the approaches to Nizwa. The Trucial Oman Scouts and the Sultan's forces were held up by sniping, and were pulled back a few miles while R.A.F. *Venoms* attacked rebel strongpoints on mountain ridges and in date-groves. On the following day (Aug. 10) R.A.F. *Shackletons* dropped fragmentation bombs on the rebel positions, with the result that the rebels were driven into the open and came under rocket and cannon-fire attack from *Venoms* which flew a number of sorties in support of the ground forces. The rebel resistance then disintegrated, the advance on Nizwa was resumed, and the rebellion collapsed on Aug. 11, when Nizwa was reoccupied without a shot being fired. A few miles beyond Nizwa, Brigadier Robertson's columns made contact at Birkat with other units of the Sultan's forces which had meanwhile advanced inland from Muscat through a pass in the Jebel Akhdar range.

A statement issued in Bahrein on Aug. 14, with the authority of the Sultan of Oman and Muscat, said that "the rising which was started by Talib has come to an end"; that the Sultan's authority had been fully restored in Nizwa, Tanuf, Izki, and other centres previously in rebel hands; and that a Governor appointed by the Sultan had arrived at Nizwa to restore the administration. The communiqué added that some of the rebels were fleeing to the mountains, pursued by the Sultan's forces, and that the elder son of Sheikh Suleiman bin Himyar had surrendered to the Government and renounced his father. The statement ended with an expression of the Sultan's gratitude to "his old friends," the British Government, for the military assistance rendered.

A British spokesman in Bahrein stated on Aug. 21 that casualty figures in the action against the Imam of Oman were one dead and four wounded, none of them British. One man of the Trucial Oman Scouts had died of wounds, two others had been wounded, and two men of the Sultan of Muscat's army had been wounded. The official estimate of the Imam's dead was about 30. [Brigadier Robertson had previously announced that about 25 rebels were killed in the air attacks at Firq on Aug. 9-10].

The British forces in Oman (i.e. the Cameronians) were evacuated by transport-planes during the week-end Aug. 17-18 and flown back to Bahrein. By agreement with the Sultan, the Trucial Oman Scouts and five armoured cars from Aden remained temporarily to safeguard communications in the Izki area—notably the oil-convoy route from Fahud to Izki—until the Sultan's forces were in a position to take over the task.

At the Sultan's request, British engineers blew up the forts in the villages of Tanuf (Aug. 14) and Izki (Aug. 17) before leaving Oman; both villages had been rebel strongholds, Tanuf Fort being the headquarters of Sheikh Suleiman bin Himyar. Also at the Sultan's request, R.A.F. *Venoms* destroyed fortified towers in the villages of Sait and Ghumr on Aug. 15 by rocket-attacks, after warning leaflets had been dropped. These two villages, in the heart of the Jebel Akhdar range, are in the territory of the Beni Hina tribe (to which the ex-Imam and Talib belong) and had been among the first to join the rebellion. The Imam's white flag had been observed flying over Sait on Aug. 14, and it was explained in Muscat that the towers of Sait and Ghumr had been destroyed largely for "psychological" reasons.

Nothing was known about the three leaders of the revolt, who were variously reported as having fled into the mountains or as making their way to the coast in an effort to escape from Oman. At the Sultan's request, the R.A.F. dropped leaflets on Aug. 20 offering, in the name of the Sultan, large rewards for the capture alive or dead of the ex-Imam, his brother Talib, and Sheikh Sulaiman bin Himyar.

British Statements on Oman Situation.

The British Foreign Secretary (Mr. Selwyn Lloyd) made the following statement in the House of Commons on July 22, in reply to questions about the situation in Oman and the military assistance rendered to the Sultan:

"Disturbances have recently been taking place in central Oman, a remote and difficult area in Arabia over which the Sultan of Muscat and Oman re-established his authority at the end of 1955. These disturbances have been stimulated by the former Imam of Oman, whom the Sultan allowed to retire peacefully in 1955 to a village in the area. The former Imam and his brother, Talib, appear to have managed to acquire a limited quantity of arms and have been trying to persuade some of the local tribesmen to defect against the authority of the Sultan . . . The Sultan has requested British assistance and this request has been agreed to. The local British authorities . . . have been given discretion within certain limits to take military action . . . The reasons for this action are that the dissidents have clearly received assistance from outside the territories of the Sultan. It is therefore, in view of H.M. Government, right that we should respond to the Sultan's request for help. We have had friendly treaty relations with the Sultan and his predecessors for the past 150 years."

In reply to questions by **Mr. Philip Noel-Baker** (Lab.), the Foreign Secretary explained that the Sultan of Oman had been also Imam (religious leader) of Oman up to 1793, when a separate Imam was elected but ruled under the Sultan. In 1913 the then Imam revolted, and from 1913 to 1920 there was a period of uncertainty. In 1921, however, an agreement was reached whereby the Imam was given certain autonomy within the realm of Muscat. The situation deteriorated prior to 1955, in which year the Sultan re-established his authority in the area.

Asked by **Mr. Nabarro** (C.) if representations would be made to the United States, "in view of the supreme importance of British oil supplies from the Persian Gulf, and the fact that allegations have been made that the arms reaching the Imam are of American origin," Mr. Lloyd replied: "I have no knowledge at all that the arms concerned are of American origin. All that we know is that there are modern arms in the area, which must have come from outside the territories of Muscat and Oman."

Mr. Wedgwood Benn (Lab.) asked if the Foreign Secretary would give an assurance that British troops, aircraft and ships would not be engaged until the House had been informed in advance, to which Mr. Lloyd replied: "Certainly not." Mr. Benn then sought to move the adjournment of the House "to draw attention to a matter of urgent and definite public importance—namely, the decision of the Government to offer British military assistance to the Sultan of Muscat and Oman." **The Speaker** ruled that Mr. Benn's motion could not be accepted, since the House was not in possession of facts which would enable him (the Speaker) to consider the matter as one of urgency.

[Mr. Benn announced on the following day that he would table a motion of censure on the Speaker for declining to rule that the Oman situation raised a matter of "urgent public importance." This motion, seconded by Mr. Paget (Lab.), was introduced in the House on July 29 but was withdrawn by Mr. Benn after a short debate.]

On July 23 the Foreign Secretary was asked by Mr. Aneurin Bevan (Lab.) whether "outside intervention" on behalf of the ex-Imam of Oman had been firmly established; whether it was from Saudi Arabia, as had been suggested; and whether H.M. Government would approach the U.S. Government with a view to bringing pressure upon Saudi Arabia, which had recently received arms supplies from the United States. In reply, Mr. Selwyn Lloyd said that certain arms must have been smuggled into Oman from outside because modern arms had been found in possession of the rebels; he could not say where they came from but the Government had "some suspicions." Close touch was being kept with the U.S.A., and he did not think any useful purpose would be served at the moment by making allegations against individual countries.

In a further statement to the House on July 29, Mr. Selwyn Lloyd said that the Government's decision to help the Sultan of Muscat and Oman was made for two reasons: firstly, the request of a friendly ruler who had always relied on Britain to help him resist aggression or subversion; and secondly, the direct British interests involved, in which connexion there was "no need to emphasize the importance of the Persian Gulf." The Foreign Secretary added:

"In the Gulf we have certain formal and implicit obligations to the rulers of Sheikhdoms under our protection to protect them against attack. This is generally understood throughout the area, and it has always been assumed that the Government would honour their obligations. The difference between a formal obligation and the obligations of a long-standing relationship of friendship is not readily apparent to the local rulers and people. If we were to fail in one area it would begin to be assumed elsewhere that perhaps the anti-British propaganda of our enemies had some basis to it, and that the Government were no longer willing or able to help their friends."

American Statements on Oman.

After a meeting between Mr. Dulles and the British Ambassador in Washington (Sir Harold Caccia), a statement was issued on July 26 by the State Department expressing the hope for a rapid settlement of the present difficulties in Oman. After noting that the Sultan of Muscat and Oman had traditionally close relations with Britain and had requested British aid in dealing with tribal problems in the past, the statement added:

"Inner Oman is essentially a tribal area where matters of sovereignty in the Western sense have not been of major importance. Revolts against the Sultan's rule in the area have occurred in the past. While the U.S.A. does not have direct and extensive information on the current difficulties, the State Department has been generally informed by the British. The matter appears to be a small-scale action involving a limited area and small forces. While certain of the participants in the current revolt have been recently in Saudi Arabia, inner Oman is not an area where Saudi Arabia has claimed sovereignty.

"The United States has no specific information on reports of outside arms in the area, but it is not uncommon for tribes in this area to obtain arms from outside. The area where the revolt has occurred appears to be within a concession area of the Iraq Petroleum Company, of which approximately one-quarter of the ownership is American. There are no claims by any other companies."

At a press conference on Aug. 6, Mr. Dulles said that there was "no basis whatsoever" for suggestions that American oil interests hoped to oust British oil interests from "trouble areas" in the Middle East; neither was any "sinister influence" exerted by U.S. oil companies in that region. The State Department's spokesman (Mr. Lincoln White) had previously described as "hogwash" suggestions that there had been any interference by American oil interests in the Oman crisis.

Arab League Call for Security Council Meeting on Oman. - Charges of "British Aggression."

The Political Committee of the Arab League, after a meeting in Cairo lasting several days, decided on Aug. 12 to call for an urgent meeting of the Security Council to discuss "armed aggression by the United Kingdom against the independence, sovereignty and territorial integrity of the Imamate of Oman." The letter to the president of the Security Council was signed by representatives of Egypt, Iraq, Jordan, Lebanon, Libya, Morocco, Saudi Arabia, Sudan, Syria and Yemen.

The letter said that the people of Oman had been "the victims of an armed aggression by the British Government . . . which has taken the form of full-scale war involving the use of modern destructive weapons . . . Through its armed aggression the British Government is seeking to destroy the sovereignty of Oman, a country . . . whose independence was reaffirmed in the Treaty of Sib [see below] which was entered into between Muscat and Oman on Sept. 25, 1920, through the British Government acting as an intermediary . . . The extreme gravity of the situation in that part of the Arab world makes immediate action by the Security Council imperative."

The ex-Imam's representative in Cairo (Sheikh Mohamed el-Harithy, head of the so-called "Free Oman" office in Egypt) had previously asked the Arab League to support the Imam, and had also sent Notes to the U.S. and Soviet Embassies in Cairo appealing for intervention on behalf of the Imam against the "aggression" of the "British and the Sultan."

The Sultan of Oman and Muscat sent a letter to the Security Council on Aug. 19 protesting against the Arab Powers' interference in Omani affairs, and stressing that the situation in Oman "falls entirely within our internal jurisdiction and is no concern of the U.N. Organization."

Security Council Meeting on Oman. - Rejection of Arab League's Allegations against Britain.

In response to the Arab League's request, the chairman of the Security Council during the current month—Dr. Urrutia (Colombia)—called a meeting of the Council on Aug. 20 to discuss the Arab charges against Britain. After debate, the Arab request that the Security Council should take action against "British aggression" in Oman failed to secure the necessary seven affirmative votes and was therefore rejected. Four countries supported the Arab request (Iraq, the U.S.S.R., Sweden, and the Philippines) and five opposed (Great Britain, France, Australia, Colombia and Cuba), while the United States and Nationalist China abstained from voting.

Mr. Hashim Jawad (Iraq) presented the Arab League's resolution in a moderately-worded speech in which he emphasized that discussion of the item in no way diminished Iraq's friendship with Britain. He alleged, however, that the British action in Oman was aimed at the subjugation of "a sovereign State of long standing," and asserted that it had "subverted the whole foundation of the U.N." and caused apprehension throughout the Arab world. As the use of arms was only justified in self-defence or with U.N. sanction, the British "intervention" in Oman fulfilled neither of these requirements. The independence of Oman had been reaffirmed in the Treaty of Sib signed in 1920, and "military intervention by British forces in collaboration with the forces of the Sultan" constituted a violation of that independent status.

Sir Pierson Dixon (Great Britain) described the Arab League's communication as "one of the strangest documents submitted to the Security Council" in recent years. The charges against Britain were devoid of any foundation, and the "incoherent and illogical" way in which they had been formulated in itself justified the Council in declining to deal with the matter. The letter charged the British Government with armed aggression against the independence and territorial integrity of the "Imamate of Oman," a State which did not exist. The facts were (1) that there was no independent sovereign State of Oman; (2) that the district of Oman [i.e. the interior of the Sultanate] was part of the dominions of the Sultan of Muscat and Oman; and (3) that the British military action had been taken at the Sultan's request to assist him in restoring order in face of a revolt against his authority which had been encouraged and supported from outside.

After recalling that the Sultan's sovereignty had been recognized by international treaties concluded with Britain, the U.S.A., and France, and most recently with India in 1953, Sir Pierson continued: "In support of the fiction that there exists an independent sovereign State of Oman, the signatories of the letter . . . allege that the independence of Oman was 'reaffirmed' in the so-called Treaty of Sib, which the letter describes as having been entered into 'between Muscat and Oman' on Sept. 25, 1920, with the British Government acting as intermediary. The facts are precisely the contrary: the sovereignty of the Sultan of Muscat and Oman over the district of Oman has for more than a century been internationally recognized, and the Sib agreement did not do more than allow the Omani tribes a measure of autonomy."

Referring to the recent disturbances, with which the letter purported to deal, Sir Pierson said: "The trouble was once again due to Ghalib bin Ali (the Imam) and his ambitious brother Talib, who raised a new revolt. It is significant that only one of the surviving signatories of the Sib agreement or their direct descendants supported this revolt, whereas the other surviving signatory and a number of descendants of signatories who are now dead supported the forces of the Sultan. The insurrection was, however, better prepared and more extensively supported from outside the country than had been the revolt of 1954-55."

Sir Pierson concluded: "I believe my Government's action has been in the interests of the stability of this area. The ancient and respectable Arab State of Muscat and Oman may seem very remote to us here in New York, but we cannot afford to forget the subversive forces so active everywhere in this area, stirring up trouble, sometimes through the most unexpected and unsuspecting channels. If the disturbance had not been checked, the consequences might have been felt very far beyond the Sultanate . . ."

Sir Pierson Dixon was supported by **M. Georges-Picot** (France), **Mr. Hill** (Australia), and **Dr. Nuñez-Portuondo** (Cuba), all of whom took the view that the matter was an internal affair of the Sultanate and thus outside the competence of the U.N. **General Romulo** (Philippines), while paying tribute to Sir Pierson's "able and lucid" statement and to the "convincing" nature of his arguments, felt that the matter should be placed on the Council's agenda as involving armed intervention by one country in the affairs of another, even if this were done at the request of the latter to quell an insurrection. **Mr. Jarring** (Sweden) also thought that the question should go on the Council's agenda.

M. Sobolev (U.S.S.R.), expressing full agreement with the Arab League's letter, said that British "aggression" in Oman constituted "a most flagrant violation of the principles of international law and the U.N. Charter." After referring to Britain's "seizure" of the Buraimi Oasis in 1955, and alleging that the oasis "belonged to Saudi Arabia," the Soviet representative said that British forces had "invaded" Oman after it had been made known that "important oil resources" existed in that country. He accused both British and American oil interests of being "ready to commit any crimes against the peace-loving Arab peoples."

Mr. Cabot Lodge (U.S.A.) said that the information available to his Government was "not sufficient to justify the United States in committing itself for or against inscription at this time." He added: "The facts with respect to developments in the area are complex and not entirely clear, and the applicable law, as well as the identity of the real parties in interest, is not free from doubt. However, I wish to make it clear that the U.S.A. does not accept as valid the interpretation of the situation set forth in the [Arab] letter, which is framed in such terms as to constitute a pre-judgment of the merits. Now that the military conflict has subsided, the U.S.A. strongly hopes that advantage will be taken by all concerned of the relative calm that prevails in the area to settle by peaceful means any legitimate grievances that may be involved . . . The U.S.A. also urges all Governments to refrain from taking any actions that might hinder the maintenance of tranquillity and order in the area."

Indian and Pakistani Reactions.

In a statement to the *Lok Sabha* in Delhi on Aug. 17, Mr. Nehru said that the Government of India "viewed with concern the news of the military action which has taken place in Oman" and had expressed this concern to the British Government. He pointed out, however, that the whole legal and constitutional position regarding Muscat and Oman was "somewhat complicated"; that India had no representatives in the Sultanate; and that she was not directly concerned in the matter as she was not a member of the Security Council. He added that he had "received directly or indirectly a message purporting to come from some representatives of the Imam of Oman," but had no news of the situation in the Sultanate beyond what appeared in the newspapers.

Mr. Suhrawardy (the Prime Minister of Pakistan), addressing the Commonwealth Correspondents' Association in London on July 30, pointed out that Britain was responsible for maintaining the territorial independence and integrity of the Sultanate. If Britain was "intervening," as had been suggested, it was only because she had this responsibility and because the Sultan had not taken upon himself "the defensive burden of an army and security forces." Mr. Suhrawardy added: "A great deal is being made out of this Oman dispute which is out of all proportion to the incident; it is not a dispute with regard to Arab territories, nor is the Arab world in any sense involved unless it is by means of tendentious propaganda which is meant to create more difficulties than it is worth."

The Treaty of Sib.

The Treaty of Sib, referred to in the Arab League's letter, and also by Sir Pierson Dixon in the Security Council, was signed at the Muscati seaport of Sib in 1920 between the predecessor of the present Sultan and a group of Omani sheikhs and tribal leaders. Purporting to govern the relations between the Sultan of Muscat and the Omani tribes, and accepted by the then Imam, its interpretation had given rise to the present controversy on the actual political and constitutional position in the Sultanate. Whereas the Sultan maintains that the treaty gives him authority over the whole of Muscat and Oman, the Arab League and the ex-Imam interpret the treaty as conferring autonomy on Oman—i.e. the interior of the country, as distinct from the coastal region of Muscat.

In a statement on Aug. 19, the Sultan said that the text of the treaty would not be published because it was solely a matter of internal interest and internal application. As the Sultan had not given his permission, it was accordingly not published in London, though its text was given in certain American newspapers. The background and terms of the treaty were, however, described as follows in a *Manchester Guardian* article (Aug. 6) from which the following extracts are taken:

"... In 1913 many of the tribes of the Oman hinterland rebelled against their generally recognized suzerain, the Sultan of Muscat, and elected their own politico-religious leader, the Imam of Oman. The fighting was protracted and unpredictable; the rebels came near to seizing Muscat itself; and the Sultan was saved from ignominy by the intervention of Great Britain, then, as now, the basic power in South-East Arabia.

"An agreement was then arranged between the Sultan and the inland tribes, represented by their respective leaders and by the Imam. This was the Treaty of Sib. The Sultan and Imam of the time, and most of the chieftains who put their names to the document, have been succeeded by others ... But the agreement is presumably still extant. Under the treaty it was agreed:

"On the part of the Imam and his associates—that the Omanis would not interfere with the Sultan's Government of Muscat, and would not fight against it; that there should be freedom of movement between the Muscati coastal district and the Omani hinterland; that criminals must not be protected; and that claims against Omanis by Muscatis must be justly heard according to Sharia law.

"On the part of the Sultan—that on commodities brought from Oman to the Muscati seaports not more than 5 per cent tax should be levied; that Omanis should be free to move to and from the coastal towns; that criminals should be extradited; and that (the most potent clause) there should be no interference by the Sultan in the internal affairs of Oman.

"At the time some British observers thought this agreement established, in effect, two separate States—Muscat on the coast, Oman in those parts of the interior inhabited by the signatory tribes (that is to say, the tribes acknowledging the leadership of the Imam). Certainly in the succeeding years the Imam did set up a rudimentary administration in the hinterland. He collected taxes and appointed a few clerks, teachers, jurists, and administrators. He had no standing army, but maintained a bucolic police force of about 2,000 men. By the 1950s the Imam Ghalib was even issuing passports, printed in Saudi Arabia, and asking for admission to the Arab League.

"But it would be wrong to imagine the two administrations as clear-cut entities. There was no frontier between Muscat and Oman. The division of power depended largely upon tribal sentiments and rivalries. Some of the hinterland tribes looked to the Sultan for leadership; some wavered in their loyalties according to circumstance. The extent of the two authorities fluctuated, and could be gauged accurately only by the whereabouts of local representatives and the outlook of tribal leaders.

"What is more, although there appears to have been no reference in the treaty to the Sultan's overlordship, it never seems to have been seriously doubted, at least in international usage, that he was legal suzerain of Oman. Successive foreign treaties recognized him as Sultan of both Muscat and Oman—including one with India in 1953. The last Imam, a universally respected sage called Khalili, readily gave his help when the Sultan wanted to expel the Saudis from Buraimi. It was only when Ghalib succeeded to power in 1954 that the idea of complete Omani sovereignty became a serious issue, and then largely under the stimulus of Saudi ambition ..."

The Diplomatic Correspondent of *The Times* commented (Aug. 19) that "the Imam's version of the treaty, which purports to give independence to the Omanis, is a crude fake put out by his mouthpiece in Cairo." The Correspondent added: "The Omanis may try to use the Treaty of Sib in the U.N. to show that, on paper, the Sultan has no suzerainty over them; but the British Government support the Sultan's view that since they did in fact acknowledge his authority for many years it was not necessary for him to have any other proof that he was Sultan of Oman as well as of Muscat." (Times - Daily Telegraph - Manchester Guardian - New York Times - The Statesman, Calcutta - Pakistan High Commissioner's Office, London - U.N. Information Centre, London) **(Prev. rep. Oman, 14782 A.)**

A. UNITED KINGDOM. — Pay Increases for Civil Servants and Local Government Officers.

It was announced on July 4 that the Treasury and the Civil Service unions had reached agreement on pay increases (as from July 1) averaging about five per cent for more than 600,000 non-industrial Civil servants, including 250,000 Post Office workers.

The Civil servants concerned were those earning up to £1,950 per annum, the total annual cost of the increases being £9,000,000 as regards the Post Office and £11,000,000 as regards all other departments. It was stated that the new rates of pay were intended to reflect "a fairly general movement in outside remuneration since mid-1956."

The Royal Commission on the Civil Service (see 14587 A) had recommended that Civil Service pay should be based on the principle of fair comparison with current rates for comparable work outside the Civil Service. A general increase was accordingly introduced on this basis in mid-1956, the new increase constituting a further application of this principle.

Some 180,000 local government staff in England and Wales received pay increases under an agreement reached on Aug. 21 by the National Joint Council for the local government service.

Under the agreement, the present four clerical grades were reduced to three and the minimum clerical salary was raised from £533 to £565 and the maximum from £789 5s. to £820. Administrative, technical and professional grades were reduced in number from seven to five, with a minimum of £575 instead of £543 5s. and a maximum of £1,325 instead of £1,230. To lighten the burden on local authorities, many of the increases are to be paid in two stages—part in September and part with the next annual increment of the officers concerned.

The new salary scales do not apply to senior local government officers, whose pay is settled by other negotiating bodies. (Times - Daily Telegraph) **(14933 F; 14847 B; 14587 A.)**

B. UNITED STATES. — New Director of Mutual Security Programme.

Mr. James Hopkins Smith jr., of Colorado, was nominated by President Eisenhower on Aug. 7 as head of the International Co-operation Administration—the agency administering the Mutual Security Programme—in succession to Mr. John B. Hollister, who had held the post since April 1955. Mr. Smith (46), a lawyer and rancher, was Assistant Secretary of the Navy for Air from 1953-56 and a vice-president of Pan-American Airways from 1946-49. A qualified pilot, he flew U.S. bombers to Russia during the Second World War and also served in the Pacific theatre.

Formal Senate approval of Mr. Smith's nomination was given on Aug. 19, and also of the nomination of Mr. McElroy as Secretary of Defence (see 15703 B). Mr. McElroy relinquished his interests in the soap firm of Procter and Gamble, and also his other business interests, prior to taking up his appointment at the Defence Department.—(New York Times) **(Prev. rep. 14173 A.)**

C. NETHERLANDS. — Further Rise in Bank Rate.

The Netherlands bank rate was raised on Aug. 15 from 4½ per cent to 5 per cent, barely a month after the previous increase from 3¾ to 4½ per cent. The latest weekly return of the Netherlands Bank showed a fall of 100,000,000 guilders in the gold and foreign exchange reserves, the latest increase in the bank rate being apparently designed to meet this situation.—(Algemeen Handelsblad, Amsterdam) **(15693 B.)**

D. JORDAN. — Diplomatic Relations with Nationalist China. - Exchange of Ambassadors.

It was announced in Amman and Taipeh (Formosa) on Aug. 12 that diplomatic relations had been established between Jordan and Nationalist China and that ambassadors would be exchanged. (Daily Telegraph - New York Times)

A. NORTHERN IRELAND - IRISH REPUBLIC. — Continuation of I.R.A. Terrorism in Northern Ireland. - Mass Internment of I.R.A. Leaders and Activists by Irish Republican Government. - Revival of Special Internment Powers. - Sentences against Terrorists in Northern Ireland. - Passage of Criminal Injuries Bill and Parliamentary Elections Procedure Bill.

In the light of continued terrorist attacks by members of the Irish Republican Army on objectives in Northern Ireland, and following a particularly serious incident on July 4 (see below), the Government of the Irish Republic issued on July 8 a proclamation reviving the special powers available to it under the Offences against the State (Amendment) Act of 1940 to intern members of illegal organizations without trial. At the same time the Irish Army authorities were instructed to prepare the internment camp at the Curragh (Co. Kildare)—the Army's principal training centre—for the reception of "a large influx of internees."

These measures had been preceded by a series of police raids on July 6-7 in which 63 men were arrested, including eight members of the executive council of Sinn Fein—among them the president of that organization, Mr. Patrick McLogan. Although many other Sinn Fein members were among those detained, they did not include the four members elected to the *Dail* in the recent general elections. Of the 63 men arrested, three were later released and the other 60 transferred to the Curragh.

The official statement announcing the reintroduction of the Government's internment powers explained that these powers applied to persons "who, in the opinion of a Minister, are engaged in activities which are prejudicial to the preservation of public peace and order or to the security of the State." It was also announced that, in accordance with the Act, a commission would be set up to hear appeals from internees against their continued detention.

Another statement issued on July 8 on behalf of the Minister of Justice said that "no-one has been arrested because of membership of the Sinn Fein organization . . . In all cases the reason for the arrest was that the individuals concerned were believed to be engaged in the activities of organizations attempting to maintain military or armed forces in contravention of the Constitution."

The Government's action was attacked in a statement issued on July 9 by "deputizing members of the governing council" of Sinn Fein.

The statement accused the Government of resorting to "totalitarian methods of repression and coercion for which the electorate gave no mandate four months ago." It added: "Presumably it is because of the progress that Sinn Fein has made towards the integration of the national territory that Mr. de Valera deems it necessary to resort to coercive methods against a national organization which obviously constitutes a challenge to his partition regime."

Mr. de Valera (the Prime Minister) issued a statement on July 28 in which he explained and defended the Government's action.

Mr. de Valera said that there could be neither ordered government, security nor progress in any community in which groups could organize, arm and equip themselves, assume powers of life and death, and arrogate to themselves the right to make war at will, in defiance of the legitimate Government and the basic law. Those against whom the Government had taken action were leading members of such groups, the activities of which had already led to loss of life and were likely, if continued, to embroil the Irish people not only in war with another country, but in a "hateful civil war" as well.

Referring to partition as one of the reasons put forward to justify the formation of armed groups, Mr. de Valera said: "The division of our country was effected against the expressed wish of the overwhelming majority of the Irish people. But if force were ever to be resorted to in an endeavour to end it, it would have to be force used with the authority of the Government and the assent of *Dail Eireann*. To permit private armies on the plea that they could end partition by force could lead only to anarchy and chaos. No party in *Dail Eireann* believes in force as a solution. They know that even if a military victory were secured, the use of force would leave behind a nation more deeply divided than it is now. No minority group has the right to commit the nation to the use of force."

Refuting the charge that, because many members of Sinn Fein were among those arrested, the Government's action was directed essentially against a perfectly constitutional movement, Mr. de Valera declared: "The persons detained were detained because they were members of one of the unlawful organizations . . . They were, indeed, leaders in that organization. They included the so-called 'Chief of Staff' and so-called 'Adjutant-General,' as well as other members of what they call the 'Army Council.' Can it be contended that by joining a movement, constitutional or professing to be so, persons who are engaged in illegal armed activities in defiance of the Constitution can secure immunity?"

In a further statement on July 29, Mr. de Valera denied a newspaper report that the Northern Ireland Government had delivered a direct ultimatum to the Irish Republican Government concerning the I.R.A.'s activities and that this had been reinforced by a protest from the British Government. "There was no such ultimatum and no such protest," the *Taioseach* declared.

In the period preceding the Government's action of July 8, a considerable number of further arrests had been made by the Irish Republican police—notably the arrest of 38 men on May 26 who were alleged to have been drilling in the Glencoe Valley (Co. Wicklow), and of another 28 in the same area on June 2, on similar grounds.

During the second half of July most of those I.R.A. members, who had been sentenced at the beginning of the year to short terms of imprisonment under the Offences against the State Act, and whose prison terms had expired, were immediately rearrested under the terms of the proclamation of July 8 and sent to the Curragh camp for detention. The total number of detainees at the camp was 114 at the beginning of August.

It was officially announced on July 16 that the Appeals Commission provided for in the Offences against the State Act would consist of Judge Barra O'Brien (of the Circuit Court), District Judge Eamonn O'Ryan (of the Dublin Metropolitan District Courts), and Colonel J. V. Joyce (of the Army headquarters staff).

It was stated that the Commission would have access to any relevant information or documents in the possession of the Government, and, on receiving a written application from a detainee, would conduct its inquiry and present a report to the Government. If the Commission reported that there were no reasonable grounds for the continued detention of an applicant, the applicant concerned would be released. It was also learned on the same day that any internee who was prepared to sign a statement to the effect that he had severed all connexion with illegal organizations would be released without further inquiry.

Incidents in Northern Ireland.

The I.R.A. terrorist campaign in Northern Ireland continued throughout the period covered, the principal incidents being summarized below:

March 2. A parked van belonging to the N.I. Electricity Board was burnt out at Newry (Co. Down) after an explosion.

March 6. The newly-built Army recruiting office at Newry was seriously damaged by an explosion.

March 7. An attack by a group of armed men on the R.U.C. station at Derrylin, Co. Fermanagh (the third in three months) was beaten off after a brief engagement, an R.U.C. officer being wounded. A bomb was thrown through the window of the Newry office of the N.I. Electricity Board but failed to explode.

March 10. The main road between Rosslea (Co. Fermanagh) and Fivemiletown (Co. Tyrone) was temporarily blocked when raiders blew up a bridge at Derrynecce, three miles from Rosslea and one mile from the border. After the incident, the N.I. police took special precautions to guard Rosslea's only other link with the rest of Northern Ireland—the Rosslea-Lisnaskea road—in the belief that the I.R.A. were attempting to isolate the village (which is flanked on three sides by Republican territory).

March 22. The telecommunications system over a wide area of northern Antrim was put out of order as the result of an explosion at the automatic telephone exchange at Rasharkin, Co. Antrim.

April 3. Two bombs were thrown at the R.U.C. station at Coalisland, Co. Tyrone, causing little damage.

April 10. Two electricity transformers on the outskirts of Londonderry were damaged by explosions. On the same day raiders blew up a new extension to the waterworks at Loughmore (Co. Tyrone), about half a mile from the border.

April 12. An automatic telephone exchange at Dunloy (Co. Antrim) was wrecked by an explosion, while two others (at Loughgiel, Co. Antrim, and Bellaghy, Co. Londonderry) were considerably damaged.

April 13. The Army recruiting office in Londonderry was seriously damaged by an explosion.

April 14. Part of the Corrick Water bridge over the River Glenelly, between Newtownstewart and Plumbridge (Co. Tyrone), was demolished by an explosion.

April 18. A bridge on the main Belfast-Dublin railway line, five miles south of Goraghwood (Co. Armagh), was badly damaged by an explosion.

April 21. A police constable was seriously wounded when a booby-trap exploded as he was attempting to remove a Republican tricolour flag from the top of a water-tower at the disused R.A.F. airfield at Cluntoe (Co. Tyrone).

An attempt to burn down a Customs and Excise building at Londonderry was foiled by the unexpected arrival of an official, who was able to beat out the flames before any serious damage was caused.

April 23. Terrorists burned down a shooting-lodge owned by Sir Harry Mulholland (former Speaker of the N.I. House of Commons) at Maghera, Co. Londonderry.

April 26. The main Great Northern Railway line between Dublin and Belfast was damaged by explosions at Silverwood, Co. Armagh (between Portadown and Lurgan).

May 3. Three telephone kiosks in South Armagh were wrecked by explosions.

May 4. An unsuccessful attempt was made on the lives of Sir Richard Pim, Inspector-General of the R.U.C., and Lady Pim as they were sailing by motor-boat on Strangford Lough, Co. Down. A detonator, connected by a fuse to a heavy charge of gelignite under the boat's engine, exploded when the exhaust had become sufficiently hot; warned by the explosion, however, Sir Richard was able to cut the fuse with seconds to spare. [A previous attempt had been made on the lives of Sir Richard and Lady Pim in December 1955, when cakes delivered at their home were found to contain cyanide.]

May 13. The port of Newry (the fourth largest in Northern Ireland) was put out of operation for a period of at least two months when explosives placed by terrorists severely damaged two sets of gates on the Newry Ship Canal connecting the port with Carlingford Lough. As a result, the m.v. *Dundalk* (owned by the British and Irish Steam Packet Co. Ltd.) was stranded in the port. The police found vehicle tracks leading from the area of the explosion to the Co. Louth border, some four miles away. The damage was estimated at £60,000 and the loss of trade to the port (which handled trade worth £3,000,000 in 1956) at £100,000.

May 16. A Special Constabulary hut at Coalisland (Co. Tyrone) was wrecked by an explosion.

May 24. A dockside electricity transformer in Londonderry was badly damaged by an explosion. The police later apprehended three men in the vicinity of a second transformer. [For the subsequent trial, see below].

June 12. In a series of four explosions in the Coalisland area, a signal-box at Coalisland station and a transformer at Gortgonis were destroyed, while damage was done to a telephone kiosk at Rock and to the Moor bridge over the Ulster Canal, on the main Portadown-Stewartstown road.

July 4. Constable C. Gregg was killed and another constable seriously wounded when an R.U.C. patrol was ambushed by terrorists between Forkhill and Crossmaglen, Co. Armagh, about 200 yards from the Eire border. Constable Gregg was the second policeman to be killed since the beginning of the current I.R.A. terrorist campaign. Two Special Constabulary drill halls—one at Beragh (Co. Tyrone) and the other at Dernawilt (Co. Fermanagh)—were wrecked by bombs.

July 8. An explosion seriously damaged a bridge over the railway line between Dungannon and Coalisland (Co. Tyrone), the debris blocking the line for some time. Another explosion partially wrecked a building at Castletown (Co. Tyrone) used as a courthouse, labour exchange, and Special Constabulary drill centre.

July 25. A group of armed men held up a Territorial Army lorry at Newry, ordered the driver out, and set the vehicle alight.

August 10. A group of armed men opened fire on the R.U.C. barracks at Swatragh (Co. Londonderry) but were driven off after a brief engagement. A Customs post at Mullan (Co. Fermanagh) was badly damaged by explosives.

August 11. The G.P.O. Engineering Department garage at Newry, and a nearby commercial garage, were completely destroyed by fire. The contents of the two garages (comprising 12 heavy vehicles, a variety of G.P.O. equipment, and four cars) were destroyed, the loss to the G.P.O. being estimated at £50,000. The N.I. Electricity Board's office in Newry was extensively damaged by another explosion.

A dredging barge belonging to the Ministry of Finance, and carrying hundreds of pounds' worth of equipment, sank in Lough Neagh after an explosion.

Following the two serious incidents in Newry mentioned above, the N.I. Minister for Home Affairs (Mr. Topping) signed an Order on Aug. 12 imposing a curfew from 11 p.m. to 5.30 a.m. in Newry and nine neighbouring districts in Counties Down and Armagh. The Order constituted the first use of the curfew powers given to the Minister under the Special Powers Act of December 1956—see 15290 A. As the area affected lies astride the main Belfast-Dublin road, a diversionary route was worked out for use during the curfew period.

August 17. Sergeant A. J. Ovens was killed, and three other policemen and two soldiers slightly injured, when a booby-trap explosion wrecked a disused farmhouse at Brackaville (Co. Tyrone), about 15 miles from the Eire border. On being advised by an anonymous telephone-caller that suspicious-looking persons had been seen to enter the house, Sgt. Ovens had taken a party of troops and policemen to investigate, and when he pushed open the door of the house a powerful explosion occurred. Twenty men were detained for questioning during subsequent investigations.

Following the incident of July 4 in Co. Armagh, Mr. Topping (the Minister of Home Affairs) stated in the N.I. House of Commons that the Prime Minister, Lord Brookeborough, had made representations on the matter to the U.K. Government. Replying to a question in the U.K. House of Commons on July 9 from Mr. Armstrong (Armagh, Ulster Unionist), Mr. Macmillan said that since it had been established that those concerned in the ambush had escaped into Republican territory, the British Ambassador in Dublin had taken up the matter with the Irish Republican Government, on instructions from London.

Counter-measures in Northern Ireland.

Throughout the period under review the police and military authorities continued their counter-measures against I.R.A. terrorism.

A particularly important operation (considered by senior R.U.C. officers as one of the most decisive blows yet struck against the terrorist organization) was carried out in the Londonderry area from March 30-April 1. Several large stores of arms, ammunition and explosives were found, as well as marked plans of the anti-submarine base on Lough Foyle, the R.A.F. station at Ballykelly, and the Royal Naval Air Station at Eglinton. Of 29 men arrested in the course of these raids, five were later detained in Belfast prison under the emergency powers.

Prison Sentences on I.R.A. Suspects.

The principal trials which took place in Northern Ireland against I.R.A. terrorists and suspects since the beginning of March are summarized below:

(1) At Antrim Assizes in Belfast, three Cork men who had been arrested after the raid on the R.A.F. installation at Torr Head on Dec. 12, 1956 [see 15290 A] were found guilty on March 6 on charges of illegal possession of arms and ammunition. One of the men, described as the ringleader, was sentenced to 12 years' imprisonment and the other two to ten years' each.

(2) At the Belfast City Commission, on April 11, 16 men (including seven from the Irish Republic) were sentenced to terms of imprisonment varying from 12 months to eight years on charges of membership of an illegal organization, and/or possession of weapons, ammunition or explosives, and/or possession of indiscriminating documents, or for aiding or abetting persons possessing arms and ammunition. The accused included the seven men arrested at Clontaffeece (Co. Down) on Jan. 3—see 15413 A.

(3) A man from Dungwen (Co. Londonderry), described by the judge as one of the leaders of a gang of "criminal thugs" who had been perpetrating not only material damage but murder, was sentenced to ten years' imprisonment at Belfast on July 26 on charges of possessing arms, ammunition, and an incriminating document.

(4) Three young men who had been arrested in Londonderry on May 24 in the vicinity of a transformer (see above) were found guilty at Belfast on July 26 on charges of conspiring to cause an explosion and of possessing explosives with intent to endanger life or cause serious injury to property. The leader of the group was sentenced to ten years' imprisonment, and the other two to six years' imprisonment each.

(5) A man who had been arrested in Londonderry on March 30 and who, in the prosecution's submission, had taken "a very prominent and leading part" in I.R.A. activities, was sentenced at Belfast on July 29 to four years' imprisonment for membership of the I.R.A. and possession of documents containing references to the destruction of roads and bridges in Northern Ireland.

The Criminal Injuries Bill.

The N.I. House of Commons gave a second reading on May 14 to the Criminal Injuries Bill.

Moving the second reading, the Minister for Home Affairs (Mr. Topping), said that the purpose of the Bill was "to enable the Government to recoup County Councils for the full amount of any criminal injury decrees given in respect of damage caused by members of the I.R.A., or of unlawful organizations, and to relieve persons who suffer this damage from the necessity of proving, as required by existing law, that three or more persons took part in causing the damage."

Hitherto, under an earlier Criminal Injuries Act which came into force on Jan. 1, 1957, the cost of compensation for damage to life and property caused by I.R.A. activities was borne half by the Government and half by the local authorities as a whole (*not* the local authority of the area in which any given incident occurred). In the early months of 1957, however, terrorist activities continued on a scale which had not been foreseen when the Act was passed; as a result, numerous local authorities had urged that compensation for damage should become a wholly national charge.

In his speech on the second reading of the new Bill, Mr. Topping announced that claims for compensation to date totalled almost £350,000.

After passing through its subsequent stages, the Bill was enacted in June.

Parliamentary Elections Procedure Bill.

Under the terms of the Parliamentary Elections Procedure Bill, which received a second reading in the N.I. House of Commons on June 25 by 25 votes to two, any candidate for the N.I. House of Commons was required in future to sign, in the presence of a Justice of the Peace, Commissioner for Oaths, or notary public, a declaration to the effect that he or she (i) recognized the "lawful authority" of the N.I. Parliament; (ii) would take his or her seat if elected; (iii) did not hold any disqualifying office; and (iv) was not a convicted felon.

The purpose of the Bill was to prevent members of illegal organizations (notably Sinn Fein, the political wing of the I.R.A.) from standing as parliamentary candidates. Its terms were essentially no more than a reaffirmation of the existing position as regards "abstentionist" candidates (i.e. candidates who were opposed to partition and who, when elected, refused to sit in the N.I. House of Commons since they did not recognize its competence). Hitherto, under the Representation of the People Act, 1934, candidates had

been required to sign a statement to the effect that they would sit if elected; this arrangement, however, had been circumvented by Mr. Liam Kelly, Sinn Fein member for Mid-Tyrone, and Mr. Charles McGlennan, "abstentionist" member for South Armagh, both of whom had attended the House on only one occasion and had thereafter taken no part in its activities. The Government introduced the measure in order to make sure that the law on this matter would be strictly applied in future. The provision concerning convicted felons was included in the light of the experience at the British general election of 1955, when two Sinn Fein candidates serving sentences for I.R.A. activities were elected, but eventually disqualified (see 14357 C, 14520 B). In the course of his speech Mr. Topping said that while the Bill contained no penal provisions, any case of violation would be referred to the Attorney-General to see whether a prosecution could be instituted.

Mr. Topping moved on Feb. 20 a Supplementary Estimate for 1956-57 arising largely from the cost of the counter-terrorist measures. The principal allocations were £155,000 for the Royal Ulster Constabulary and £87,200 for the Special Constabulary.—(Irish Times, Dublin - Belfast Telegraph - Northern Whig, Belfast - Times - Daily Telegraph)

(Prev. rep. 15413 A.)

A. WESTERN GERMANY.—Creation of New Federal Central Bank (Deutsche Bundesbank.)

The West German *Bundestag* unanimously passed legislation on July 4 setting up a *Deutsche Bundesbank* as the Federal Republic's bank of issue, and replacing the *Bank Deutscher Länder* as well as the existing central banks of the *Länder*. The *Bank Deutscher Länder* had been in existence since 1948, its main function being the issue and protection of currency; otherwise it had only equal status with the separate central banks set up by the *Land* Governments.

Under the legislation, the new *Deutsche Bundesbank* absorbed the existing central banks of the *Länder* and of Berlin, its total capital of 290,000,000 DM. being owned wholly by the Federal Republic. Its headquarters will be at Frankfurt as long as the Federal Government is established in Western Germany, but in the event of the Government moving to Berlin the bank will have its headquarters in that city.

The *Bundesbank* will regulate the note circulation and the supply of credit within the German economy, with the aim of safeguarding the currency. It will also handle banking transfers, payments and clearings for both domestic and foreign banks.

The Federal Government will have no power to give instructions to the *Bundesbank* within the latter's competence, but the bank will be under an obligation "to support the general economic policy of the Federal Government and to advise and inform the Federal Government on all matters of vital importance to monetary policy." Members of the Federal Government may attend the meetings of the Central Council of the bank [see below] and may move resolutions, but will not have a vote. Conversely, the Federal Government will invite the President of the *Bundesbank* to attend governmental discussions on matters affecting monetary policy.

The bank's monetary and credit policy will be determined by a Central Council, while the Board of Directors will be responsible for implementing the Central Council's decisions. The *Bundesbank* will maintain a central branch in each *Land* which will bear the name of *Landeszentralbank*.

The *Bundesrat* passed the Bill on July 19 against the votes of Bavaria and the Rheno-Palatinate.

The principal difficulty was over that clause of the Bill which provided that not only the Federal Republic, but also the *Länder*, would have to deposit all liquid assets with the *Bundesbank*. A compromise was found, however, by allowing the *Länder* to deposit their funds with other banks if consent had been given by the *Bundesbank*.

Herr Karl Blessing, a former director of the *Reichsbank* and more recently president of the Margarine Union, was appointed the first president of the *Deutsche Bundesbank*.

B. SPAIN - SOVIET UNION. — Russian Rejection of Spanish Gold Claim.

The Soviet newspaper *Pravda*, quoting "well-informed circles," said on April 5 that about 500 tons of Spanish gold sent to Russia by the Spanish Republican Government in 1937 during the Civil War had all been used up by that Government for purchases abroad. *Pravda* claimed that the Soviet authorities had receipts covering the entire amount and signed by Señor Largo Caballero (the Spanish Republican Premier) and Dr. Negrin (Finance Minister and later Prime Minister in the Republican Government). It was also claimed that the last letter of Dr. Negrin, dated Aug. 8, 1938, showed that the gold had been fully used up and that, in addition, there was a debt of $50,000,000 owing by the Spanish Republican Government, to whom the Soviet Government had granted at the time a credit of $85,000,000, of which only $35,000,000 had been repaid.—(Times - Manchester Guardian - New York Times)

(Prev. rep. 15376 B.)

C. INDIA. — Prohibition of Strikes in Essential Services. - Opposition to Government Legislation.

The Essential Services Maintenance Bill—a Government measure to prohibit strikes in essential services—was given a first reading in the *Lok Sabha* on Aug. 5 by 224 votes to 54, with 15 abstentions, and was finally passed on Aug. 6 by 226 votes to 51, after a stormy 11-hour debate in which Communist, Praja Socialist, Socialist and Independent members denounced the measure as "totalitarian." As the Council of State was not in session, the Bill was promulgated as a Presidential Ordinance immediately after its passage.

Under the Ordinance (which expires on Dec. 31, 1958) the Government assumed powers to prohibit strikes in a wide range of public services, including posts and telegraphs, transport, civil aviation, docks, defence and ordnance establishments, and any other service in which it considered that a stoppage "would inflict grave hardship upon the community." The Bill also provided penalties of six months' imprisonment and a fine of 200 rupees (£15) for strikers in essential services.

The introduction of the Bill was prompted by the threat of a strike for higher pay by about 500,000 employees in the postal, telegraph, civil aviation, customs and excise, and other Central Government services. Specifically, the Joint Council of Action of the unions concerned, headed by Mr. B. N. Ghosh (secretary-general of the National Federation of Posts and Telegraphs Employees), had demanded the appointment of a commission to inquire into the pay structure and, pending the commission's report, the grant of an interim increase. The Finance Minister, Mr. Krishnamachari, announced on Aug. 3 that the Government would set up a five-member commission, headed by Mr. Justice Jagannadha Das of the Supreme Court, to inquire into the pay of Central Government employees. However, as there was no mention of interim relief in the commission's terms of reference, the unions found the Government's decision unsatisfactory and called a strike of their members as from Aug. 9.

Speaking on the Bill on Aug. 5-6, the Home Minister (Pandit Pant) said that the Government would be "happy if no occasion arose to make use of the powers sought in the Bill." While admitting that prices had risen, he said that a rise in wages, at a time when the country's resources were mortgaged to implementation of the Second Five-Year Plan, could only accentuate the "vicious economic spiral." Having acceded to the union's demands for an inquiry commission, the Government was entitled to hope that there would be "no further insistence upon a wrong and suicidal course."

Following the promulgation of the Presidential Ordinance, the Government issued an Order on Aug. 6 declaring illegal the threatened strikes in the postal, telegraph, civil aviation and other public services. At the same time the President issued an Order prohibiting the participation by Civil Servants in demonstrations or strikes over matters pertaining to their conditions of service, under penalty of forfeiture of salary and possible dismissal.

In a nation-wide broadcast on Aug. 5, Mr. Nehru had appealed to the postal and other employees to forego "methods of strike and conflict involving ill-will and injury to all concerned." Replying to the union's demand for an interim pay increase, he said that the inquiry commission could make an interim report about relief and other matters, and added: "I do not know what more the Government can do in these circumstances." He gave a warning, however, that if the strike did take place, it would be the duty of the Government and of every citizen to help in protecting vital services. Speaking in the *Lok Sabha* on Aug. 8, Mr. Nehru, while giving no assurance that an interim wage award would be made pending the final ruling of the inquiry commission, reiterated that it would be left to the commission to consider the question of immediate relief.

The unions, which on Aug. 6 had reaffirmed their decision to strike, considered Mr. Nehru's statement of Aug. 8 an "improvement" on the earlier situation, and called off the impending strike on the same day.—(The Hindu, Madras - The Statesman, Calcutta - Eastern Economist, Delhi - Times)

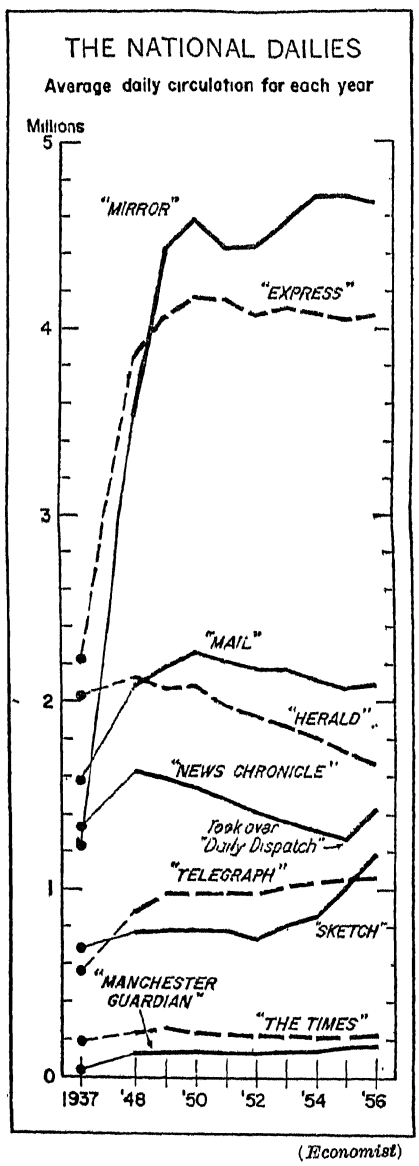
D. NORWAY. — Social Insurance Agreement with Britain. - Reciprocal Benefits for Tourists and Residents.

An Anglo-Norwegian convention was signed in London on July 25 whereby nationals of either country visiting or living in the other became eligible for the social insurance benefits of the country concerned on a reciprocal basis. The benefits cover medical treatment in case of sickness or accident, old-age pensions, children's allowances, and public assistance. British seamen serving in Norwegian ships, and *vice versa*, will be eligible for the benefits, in addition to tourists and permanent residents.—(Norwegian Embassy Press Office, Londo

A. UNITED KINGDOM. — Press. - Statements on Position of "Daily Herald" and "News Chronicle." - Odhams Press receives Licence to publish "Daily Herald." - Parliamentary Debate on State of the Press. - Editor of "Sunday Express" apologizes at Bar of House.

Widespread rumours of the possible closing-down of the *Daily Herald* and the *News Chronicle* owing to financial difficulties, or alternatively of a merger between the papers, were denied on June 7 by Mr. A. C. Duncan, chairman of Odhams Press Ltd., and by the management of the *News Chronicle*.

Since 1929 the *Daily Herald* had been published by Daily Herald (1929) Ltd., a company in which 51 per cent of the shares are held by Odhams Press (which prints the newspaper) and 49 per cent by the Trades Union Congress. Of the nine directors of the company, five are appointed by Odhams Press and four by the T.U.C. General Council, under an agreement reached in 1929. [The four T.U.C. members for the current year are Sir Tom Williamson, Sir Vincent Tewson, Sir Alfred Roberts, and Sir Tom O'Brien, M.P.] The *Daily Herald* supports the political policy of the Labour Party and the industrial policy of the T.U.C.



(*Economist*)

The *News Chronicle* is owned by the Daily News Trust, an organization controlled by members of the Cadbury family (the well-known cocoa and chocolate manufacturers). It gives general support to the Liberal Party.

Mr. Duncan, speaking at the annual meeting of Odhams Press Ltd., said that Odhams had put forward proposals to the T.U.C. for improving the "future prospects" of the *Daily Herald*, and were awaiting their reply. He said in his speech:

"The financial results of the paper, as with many other newspapers, are not all that could be wished, and various ways and means are being considered to improve them. The Press has been giving the *Daily Herald* a great deal of publicity lately. Numerous ideas have been given an airing, including mention of a merger . . . All I can say at the moment is that we do not contemplate the paper closing down." Mr. Duncan stressed that the *Daily Herald* had retained its place among the great national newspapers, with a sale of 1,650,000 copies a day.

The *News Chronicle* issued the following statement:

"For some weeks there has been open speculation about the future of the *News Chronicle*. Forecasts have ranged from the outright sale of the paper to its merger with the *Daily Herald* . . . We can resolve the uncertainty. We have no intention of being scuppered. Of course the *News Chronicle* has difficulties. So have several other newspapers. In a time of inflated costs, a paper which sells 1,400,000 copies a day obviously has more problems than papers which sell over 4,000,0000. But the admitted courage and enterprise of the *News Chronicle* are not going to be submerged by its difficulties. They are being devoted instead to finding a solution . . ."

After a meeting of the T.U.C. General Council on June 26, Sir Vincent Tewson announced (i) that the General Council "regard the continuation of the *Daily Herald* as essential to the trade union and Labour movement"; (ii) that it had consequently approved in principle the granting of a licence to Odhams Press to publish the *Daily Herald*; (iii) that the conditions of this licence would be the subject of direct negotiations with Odhams, to be held after consultations with the Labour Party; and (iv) that the four T.U.C. directors of Daily Herald (1929) Ltd. would act as a sub-committee to consult with Odhams Press.

The terms under which Odhams Press would be granted a licence to publish the *Daily Herald* were unanimously agreed to by the T.U.C. General Council on July 24. An official statement said: "Under the terms of the licence the *Daily Herald*, while retaining editorial freedom, is pledged to remain the firm champion of the policies of the T.U.C. and the Labour Party. The General Council therefore calls on trade unionists to give the *Daily Herald* their full support."

Although no details were issued, it was understood that the licence would be granted for 25 years, with provision for 12 months' notice of termination by either side, and that it would enter into force immediately. It was confirmed that the T.U.C. would still have their 49 per cent shareholding and would continue to have four directors on the board. *The Times* commented: "It appears that the main effect of the arrangement will be on the finances of Odhams Press, who will now be in a position to set off their losses on the *Daily Herald* against profits made by their other enterprises for taxation purposes."

The *Daily Herald* itself said that its "future as Labour's daily newspaper is assured," while Sir Vincent Tewson said that there was "no question now of the demise of the *Daily Herald*."

Prior to the agreement between the T.U.C. General Council and Odhams Press, the secretary of the Labour Party (Mr. Morgan Phillips) had declared that a Labour daily newspaper was "vital to the whole future of the Labour movement" and had called on all Labour supporters to give their "full loyalty and support" to the *Daily Herald*.

Sir Tom O'Brien, in a speech on May 18 to the Welsh Regional Council of Labour, had also referred to the difficulties of the *Daily Herald* and had spoken of the "appalling apathy" of the rank-and-file of the trade union movement, who, though enjoying "all the advantages of a Welfare State," were not able to "run and buy their own newspaper." After referring to the large circulations of the *Daily Mirror* and the *Daily Express*, Sir Tom said that the Labour movement was "surely entitled . . . to have a national newspaper with a three to four million circulation."

Parliamentary Debate on State of the Press.

The state of the Press was discussed on May 17 by the House of Commons, which adopted a private member's motion —moved by Mr. Kershaw (Conservative)—that "this House, recognizing the great importance of a free and independent Press, views with concern some recent examples of newspaper reporting, and is of the opinion that a vigorous effort by the industry itself to maintain a high standard of conduct is desirable."

Mr. Kershaw said that public concern about the state of the Press was shared by the Press itself. It was complained that pornography and crime were unreasonably exploited in certain sections of the Press; that the pursuit of the "exceptional and sensational" had been carried too far; and that there had been intrusions into private grief. The elevation of trivialities to a position of importance in certain newspapers made it impossible for the reader to form a coherent idea of current affairs, and this was a disservice to democracy. Pointing out that the Press Council had no sanctions at their disposal and could only censure, Mr. Kershaw urged that matters of professional ethics should be referred to a sub-committee of the Press Council which should be armed with sanctions to suspend or expel offending members from the journalistic profession. Ethics were well known, and could be defined and enforced; and the sub-committee he proposed should consist "only of professional men to judge professional standards."

Mr. Allaun (Lab.) said that seven groups controlled nearly all the national and Sunday newspapers, and within these groups were "a handful of rich and powerful men with controlling interests" who dominated public opinion. "They sincerely believe they are acting in the country's good, but it is easy for them to confuse the interests of their country with the interests of the business." As these newspapers became more and more extensive, they also became more expensive to own. Before the war newsprint cost £10 a ton, whereas today it cost £60 a ton because [Mr. Allaun alleged] the newsprint industry was dominated by four combines. After asking that the newsprint industry should be investigated by the Monopolies Commission, Mr. Allaun said—in an apparent reference to the *Daily Herald* and the *News Chronicle*—that two newspapers were in difficulties because each had a circulation of less than 2,000,000. As there was an average of three readers for each paper sold, "we have now arrived at the stage when anything less than 6,000,000 readers cannot have a newspaper of their own." As a result, "the dice were loaded against the common man," the present form of Press ownership was "vitiating democracy," and the freedom of the Press was "becoming an empty phrase."

Mr. Deedes (C.) said that, of the charges of pornography, sensationalism, intrusion and arrogance preferred against certain newspapers, the most significant and the most difficult to meet was the apparent obsession by some newspapers with trivialities. He referred to the prominence given to "the antics of Miss Dors [the film actress Diana Dors] and other well endowed young ladies," and described the film actress Marilyn Monroe as "a figure of real significance to be taken note of in discussing the obsession with apparent trivialty—Helen of Troy, Cleopatra, the Du Barry, and Pompadour automationized for mass consumption in this 20th century." He was not, however, wholly despondent, nor did he believe that the bad was eliminating the good. The *Daily Mirror*, having "run the whole gamut of strip cartoons, sensationalism, and other features," had in the past year taken a particularly responsible attitude on a number of serious international questions.

Mr. David Llewellyn (C.) said that Mr. Allaun was mistaken in imagining that suppressions were confined to the organs of the Right. "Indeed," he went on, "part of the difficulties of the *Daily Herald* has been that it has affronted some readership, which is not passionately addicted to the Left, by the over-statement and presentation of its case." Referring to rumours of "a marriage of convenience" between the *News Chronicle* and the *Daily Herald*, he said that the two papers were essentially incompatible and, for the sake of freedom of the Press, he hoped that the death of the *Daily Herald* could be avoided. The most practical aid which could be given to the *Daily Herald*, the *News Chronicle*, or any other paper in difficultics, was an offer of newsprint at lower prices.

Mr. Collins (Lab.), director of two small provincial newspapers, described the national scene as "disturbing." The two quality newspapers, *The Times* and the *Manchester Guardian*, which had small circulations but exercised immense influence, were at least making a loss on their newspapers; they might cover themselves in other directions but the papers themselves, he asserted, were not paying. The *News Chronicle* was losing money but had "so far survived on cocoa," while *Reynolds' News*, supported by the Co-operative movement, had made "a courageous attempt to build up a quality left-wing newspaper in face of a loss in circulation." After expressing fears for the future of these papers, and for that of the *Daily Herald*, Mr. Collins said that, irrespective of political opinion, it would be a "democratic disaster" if these national newspapers were to fall. After expressing his belief that the Press Council had failed "lamentably" to deal with the major difficulties and shortcomings of the Press, and urging that the Council should produce a code of ethics, he suggested that the larger local authorities should consider running municipal newspapers on commercial lines, thereby breaking up the chains of standardized provincial newspapers. He suggested also that the Government should take newspaper space to publicize matters of public interest which were inadequately treated in the newspapers.

Mr. George Thomson (Lab.) said that the increasing concentration of newspaper ownership in fewer and fewer hands, and with larger and larger circulations, had aroused even greater anxiety than matters of taste. It should be noted, however, that the quality papers had a 50 per cent higher circulation today than at the beginning of the war; the *Daily Telegraph*, for example, had increased its circulation at a greater rate during the past 20 years than any other newspaper in the country, even the *Daily Mirror*. The "massacre" in the newspaper world had been among the "middle-brow" papers.

Among other Members, **Mr. Robert Mathew** (C.) supported the suggestions of Mr. Kershaw and Mr. Collins that the Press Council should draw up a code of ethics, while **Sir Leslie Plummer** (Lab.) thought that the Press Council should be a statutory body, with lay members, reporting to Parliament.

Mr. J. E. Simon (Under-Secretary, Home Office), replying to the debate, said that all Members had recognized that a free society demanded a free Press. A system of subsidies, either direct (as in some of the foreign Press) or indirect, would be attended by great danger, and under the guise of freedom they might find themselves going a considerable way to losing it. For the same reason, he could not subscribe to the suggestion that there should be municipal or governmental trading in newspapers, or Government buying of newspaper-space—a step which would amount to a subsidy, and would destroy the independence of newspapers.

He believed that it was a despondent view to imagine that no newspaper could survive without a readership of 6,000,000. "It is a striking thing," said Mr. Simon, "that the *Daily Telegraph* has flourished with a readership of just over 3,000,000." A striking feature of the last 25 years was the way the quality newspapers had been increasing their circulations at a considerably higher rate than the popular Press had done.

Competition from outside the industry could be just as valuable as competition from within. Television appealed to the same type of audiences as the popular press. Although he would regret the amalgamation of the *News Chronicle* and *Daily Herald*, and the passing of those newspapers as independent organs—which, however, was not by any means decided—one should reflect that the needs they met were to a great extent met today by television.

It had been said that the people got the Press they deserved. In many respects they got a better Press than they deserved, but there could be little question that the public who read the popular press got what they wanted. "If that were not so, the popular press would not exist."

The Press Council at the moment was experimental. It had done excellent work, and it would be a great mistake at the present stage to interfere with its constitution. Nor did he favour the suggestion that the Council should have sanctions to impose professional standards. "It would be a grave and dangerous thing indeed," said Mr. Simon, "to give to anybody the right to suspend anyone from writing or publishing any printed matter. Even a surfeit of cheesecake is more palatable than a gag. . ."

Editor of "Sunday Express" apologizes at Bar of House.

The House of Commons Committee on Privileges, in a report published on Jan. 9, 1957, found that the editor of the *Sunday Express*, Mr. John Junor, had been guilty of serious contempt of the House in a leading article of Dec. 16, 1956, which was held to imply that M.P.s were receiving an unfair allocation of supplementary petrol allowances. The committee recommended that Mr. Junor should be "severely reprimanded" in view of "the gravity of the contempt committed."

Mr. Junor appeared at the Bar of the House on Jan. 24 to express "sincere and unreserved apologies for any imputation or reflection" which might have been cast upon the honour and integrity of members of the House in the *Sunday Express* article. He added:

"At no time did I intend to be discourteous to Parliament. My only aim was to focus attention on what I considered to be an injustice in the allocation of petrol—namely, the petrol allowances given to political parties in the constituencies. In my judgment, these allowances were a proper—and, indeed, an inescapable—subject of comment in a free Press. That was the view which I held then and hold now. But I do regret deeply and sincerely that the manner in which I expressed myself should have been such as to be a contempt of this House."

On the proposal of Mr. Butler (Leader of the House), supported by Mr. Gaitskell (Leader of the Opposition), the House decided without a dissentient vote to accept Mr. Junor's apology and to take no further action in the matter.

A. UNITED STATES. — Formation of Joint Federal-State Action Committee.

President Eisenhower appointed on July 20 a seven-member committee of Federal officials, including three members of the Cabinet, to co-operate with a ten-member committee of State Governors in a reappraisal of the functions and costs of government. The study group (known as the Joint Federal-State Action Committee) resulted from a proposal by the President on June 24, at his annual conference with the State Governors, that the States should take over more governmental responsibilities and costs—a suggestion which was endorsed by the Governors.

The members appointed by President Eisenhower included Mr. Robert B. Anderson, the new Secretary of the Treasury; Mr. James P. Mitchell, Secretary of Labour; Mrs. Marion B. Folsom, Secretary of Health, Education and Welfare; and Mr. P. F. Brundage, Director of the Bureau of the Budget.
(New York Times - New York Herald Tribune)

B. TURKEY. — Bosphorus Bridge Project.

A provisional agreement for the building of a suspension-bridge over the Bosphorus was signed by the Turkish Government with French and Turkish companies during July. The bridge will be built jointly by the *Compagnie Française d'Entreprises*, the *Compagnie Baudin-Châteauneuf*, and the Turkish contractors (RAR), and is scheduled for completion within four years. Costing approximately $30,000,000, it will be 1,340 metres long, 19½ metres wide and 50 metres in height. It was pointed out in Ankara that the bridge would be the only one in the world joining one continent to another. In addition to meeting national traffic needs, it would also link the road systems of Europe and the Baghdad Pact area, which would meet at the Bosphorus bridge. (Turkish Embassy, London)

C. YEMEN. — Russian Arms Deliveries. - Statement by British Foreign Office Spokesman.

Reports that considerable supplies of Soviet or Czechoslovak arms had been sent to the Yemen during the past month were confirmed on Aug. 9 by a spokesman of the British Foreign Office. The spokesman said that six shiploads of arms, and possibly seven, had arrived at Yemeni ports since the beginning of the year; that the supplies included a number of aircraft, "fairly old-fashioned machines of the piston-driven type"; and that there were "about 50 Soviet instructors or advisers on equipment in the Yemen." It was reported in the British press that the equipment included Soviet tanks of the T-34 type.—(Times - Daily Telegraph) **(Prev. rep. 15502 A.)**

A. RELIGIOUS LIFE. — Proposals for Closer Relations between Episcopal and Presbyterian Churches in England and Scotland. - Discussions between Anglican and Methodist Churches.

Far-reaching organizational changes aimed at closer relations between the Episcopal and Presbyterian Churches in England and Scotland were proposed in a unanimous report (*Relations between Anglican and Presbyterian Churches*) issued on April 30, 1957, by a committee representing the Church of England, the Church of Scotland, the Presbyterian Church of England, and the Episcopal Church in Scotland. The members of the committee included the Bishop of Derby (Dr. Rawlinson), who served as chairman; Principal R. D. Whitehorn, of the Presbyterian Church of England; and the Bishop of Brechin (Dr. Graham), of the Episcopal Church in Scotland. A summary of the principal proposals and recommendations is given below under cross-headings:

Basic Considerations. It was recognized that doubt might arise whether Churches were well advised to consider far-reaching changes to facilitate unity with Churches of another order, in view of differently-held conceptions of the ministry of the word and the sacraments. It was felt, however, that the questions arising between Episcopalians and Presbyterians lay at the heart of differences evidenced by other divisions, and that a "notable act of reconciliation" between them could not fail to introduce a new and promising element into the whole field of oecumenical relationships.

In the conversations between the Churches concerned, it had been of primary importance that all four Churches had been associated within the oecumenical movement and had shared in the revival of interest in Biblical theology. Among the most important fruits of oecumenical activity in recent years were the convictions that unity was essential to the Church's life; and that disunity in witness and mission meant not only a wasteful use of limited resources but a deeply damaging contradiction, since the Church could "not adequately fulfil its ministry of reconciliation in the world so long as it manifestly failed to heal and reconcile its own divisions."

In references to faults and errors of the past, the report stated: "It is acknowledged that mistakes have been made on both sides, and that over the generations attitudes tending to bitterness and strife have not been infrequent. But the time has come when the voice of mutual recrimination should be silent. A more positive and, therefore, a more hopeful appeal to the past is possible."

Governing principles in the conversations had been the need for unity, and for changes in both the historic Church systems if it was to be effected. Acting on those principles, the committee had made what they recognized to have been "no more than an exploratory survey." They had deliberately set aside or not discussed some problems on the ground that the time to deal with them would be when the Churches had resolved to plan for unity.

Proposed Changes in Church Organization. Two far-reaching changes in Church organization were suggested, one affecting the Presbyterian Churches and the other the Episcopal Churches:

(1) The Presbyterian Churches should have an order of bishops chosen by each Presbytery from its own membership. Such "presbyter-bishops" would be consecrated by bishops from the Episcopal Churches and by the Presbytery concerned, acting through its representatives; they would thus be acknowledged by Anglicans as being in the Apostolic succession, and also by the Presbyterian Churches. The "presbyter-bishop" would be president of the Presbytery, and would act as its principal minister in every ordination and in the consecration of other bishops. The Presbytery would retain its full place in the life and government of the Church, and the General Assembly of the Church of Scotland would retain its full authority in matters of doctrine, administration, legislation and judicature.

[These recommendations, if implemented, would involve radical changes in the present organization of the Church of Scotland.]

(2) The Episcopal Churches should adopt the principle of lay eldership, similar to the Scottish eldership. Lay persons should be given appropriate participation in the government of the Church at all levels—parochial, diocesan, provincial, and national. In England, at provincial and national levels, the bishops would retain their existing authority and place as an Upper House within each Convocation, but steps would be taken to include in or associate with the Convocation of each province a House of Laity. Efforts would also be made to procure a wider and more effective lay representation in the Church Assembly, and to revise the relationship between the Convocations and the Church Assembly viewed as a national synod.

Theological Considerations. Discussing the theological considerations involved in a possible *rapprochement* between the Episcopal and Presbyterian Churches, the report noted "both reassuring agreement and some serious divergence." On both sides, however, there had been a desire to examine afresh the idea of *episcopé* (i.e. pastoral government) and the mode of its exercise within the Church. In spite of divergencies on the question of episcopacy, there was on the Presbyterian side a willingness to consider the functions of a bishop, as recognized by the Anglican communion, so long as the office was duly integrated with the Presbytery and the whole Church. The concept of a "bishop-in-presbytery" appeared to be a possible modification of Presbyterian polity. Against the possibility of the acceptance of the "historic episcopate" by the Presbyterian Churches was set the possibility of a greater measure of "corporate episcopacy" by the Anglican Churches.

Implications of Proposed Changes. "In this new approach toward unity through mutual adaptation," said the report, "the conference [i.e. the committee] agreed that the appropriate changes in each Church are not to be regarded as accommodations in alternative forms of Church government, but as the spiritual and doctrinal requirements . . . to which the Churches must give heed if they are to move forward into fuller participation in the true wholeness of the one Church of Christ.

"In modifications of this kind each Church must fully respect the conscience of the other . . . Moreover, each Church must allow the other a measure of freedom in interpreting the changes proposed, and seek itself to interpret them not in accordance with the *status quo ante* in its own tradition but in accordance with the plenitude of order and practice in the enriched Church of the future.

"The modifications . . . do not envisage one single 'Church of Great Britain,' but rather a 'Church of England' and a 'Church of Scotland' in full communion with one another in the one Church of Christ. Nor do they involve a uniformity of life and worship throughout these Churches, but rather the freedom of each Church under God to continue and develop in its own full inheritance of life and worship throughout its parishes and congregations.

"What is envisaged . . . is a fullness of sacramental communion between these two Churches, involving fully authorized interchange of communicants and mutual recognition of ministries. The suggested modifications are designed both to make room for full intercommunion and to provide a way in which its implications can be worked out in reconciliation between the life and polities of the Churches concerned."

The report was considered on May 28 by the General Assembly of the Church of Scotland, meeting in Edinburgh. After lengthy debate, it was agreed by a large majority that it should receive "the careful study of Church members at every level" before any further action was taken. It was agreed that the report was "no more than an exploratory survey" and that it "in no way commits the Church of Scotland to accepting its arguments and conclusions."

In the version of the report issued jointly for the Church of England and the Scottish Episcopal Church, the Archbishop of Canterbury referred to the hope of the authors that their work would be studied and weighed before any responsible body of the four Churches was asked to record judgment on the recommendations. Speaking for the Church of England, Dr. Fisher said it was desirable that the report should be placed before the Lambeth Conference in 1958, and considered with other aspects of inter-Church relations, before the Convocations were asked to debate it.

Discussions on Closer Relations between Anglican and Methodist Churches. - Anglican and Methodist Delegations.

An important development during 1956 was the commencement of discussions between the Church of England and the Methodist Church on the possibility of closer relations between the two Churches. The discussions, which will be held in private, opened at Lambeth Palace on June 29, 1956, and are expected to extend over two or three years. Formal approval for such discussions had been expressed during 1955 by the synods of the Convocations of Canterbury and York and by the Methodist Conference.

The hope of seeing the Church of England "in close relation with an episcopal Methodist Church which still retains many of its own customs and modes of worship" was expressed in a report published on July 6, 1955, by two joint committees of the Convocations of Canterbury and York. [These committees were set up in 1953 to study the implications of a report, *Church Relations in England*, made in 1950 by representatives of the Church of England and the Free Churches.] It was regarded as essential "that if the suggestion of creating a Methodist episcopate be followed, such an episcopate should from the first be by some means linked with the existing episcopate of the Church of England." The hope was accordingly expressed that conversations, unrestricted in scope, might begin between the two Churches.

The joint committees referred as follows to certain stipulations which had been made by the Methodist Church, and to the Church of England's attitude to those stipulations:

"The first Methodist stipulation asks that the Church of England should acknowledge that 'our divisions are within the Christian Body which is throughout in a state of schism.' The Committees hesitate to use the precise words of this stipulation, because of the theological ambiguities attaching to the word 'schism,' but would regard all discussions between the Methodist Church and the Church of England as taking place within the Body of Christ. The Church of England must bear its share of the responsibility for the original division between us, and must in penitence admit that its members have too easily acquiesced in its continuance . . .

"The stipulation 'that the Methodist Church would be free to preserve the relations of intercommunion and fellowship with other non-episcopal Churches which it now enjoys,' in the opinion of the Committees, does not of itself raise an insuperable barrier to fruitful discussions with the Methodists. Yet the nature and extent of these 'relations of intercommunion and fellowship' must be an important subject in any such discussions. On the side of the Church of England also, its own essential order and discipline would need to be safeguarded."

The Methodist Conference, meeting in Manchester on July 8, 1955, passed a resolution (with only two dissenting votes) saying that the Methodist Church would "gladly respond" to any invitation to hold conversations which might lead to closer relations with the Church of England. The resolution was moved by Dr. Harold Roberts (Principal of Richmond College, Surrey), who said that "we have made it perfectly plain . . . that we could not consider closer relations with the Church of England, much as we desire them, at the expense of weakening our connexion with the Free Churches."

The Methodist Church subsequently accepted an invitation from the Convocations of Canterbury and York to hold discussions with the Church of England on closer relations between the two Churches, the membership of the respective delegations being announced on Feb. 23, 1956, in a statement issued jointly by both Churches. The Anglican members, appointed by the Archbishop of Canterbury, included the Bishops of Chichester, Liverpool, and Oxford, while the Methodist members (appointed by Dr. Leslie Weatherhead, president of the Methodist Conference) included Dr. Harold Roberts, Dr. Eric Baker (secretary of the Methodist Conference) and Dr. Weatherhead himself. Other members included the Rev. F. J. Taylor (Principal of Wycliffe Hall, Oxford) and Canon S. L. Greenslade (of Durham), on the Anglican side; and Dr. Norman Snaith (Principal of Wesley College, Leeds) and Dr. Gordon Rupp (lecturer in Modern Church History, Cambridge University) on the Methodist side. Each delegation included a lay member and a woman member—in the case of the Anglican delegation, Professor H. A. Hodges (Professor of Philosophy at Reading University) and Miss S. Lister (of the Central Council for Women's Church Work); and in the case of the Methodist delegation, Professor T. E. Jessop (Professor of Philosophy, Hull University) and Dr. Dorothy Farrer (Vice-Principal of the Methodist Deaconess College, Ilkley).

In the conversations between the Church of England and the Methodist Church, the Anglican delegation is led by the Bishop of Chichester (Dr. Bell) and the Methodist delegation by Dr. Harold Roberts.—(Church Times - Methodist Recorder - Times - Daily Telegraph - Manchester Guardian)

A. UNITED KINGDOM - UNITED STATES. — Dedication of Magna Carta Memorial. - Gift of U.S. Bar Association to Britain. - The Magna Carta Trust.

A memorial to Magna Carta, presented to Britain by the American Bar Association, was unveiled on July 28 at Runnymede in the presence of some 4,000 American lawyers visiting Britain in connexion with the annual convention of the American Bar Association, held for the first time in London.

Designed by Sir Edward Maufe, R.A., the memorial is in the form of a miniature Greek temple formed by a circle of eight hexagonal columns, topped by a glass-domed cupola. On the inner side of the cupola are inscribed the words: "Erected by the American Bar Association to commemorate Magna Carta, symbol of freedom under law." The memorial—which overlooks the famous meadow where King John signed the Great Charter in 1215—was placed in the care of the newly-formed Magna Carta Trust [see below].

Distinguished American lawyers present at the ceremony included Chief Justice Earl Warren and two other members of the Supreme Court, Justices John M. Harland and Tom C. Clark. Members of the British legal profession present included Lord Evershed, Master of the Rolls and chairman of the Magna Carta Trust, and Sir Hartley Shawcross, Q.C., M.P., chairman of the General Council of the Bar. In a speech at the unveiling ceremony, Mr. E. Smythe Gambrell (immediate past president of the American Bar Association) said that "the 250,000 lawyers of America, represented by the American Bar Association, have returned in devout pilgrimage to the ancestral home, to the well-springs of our profession and the fountain-head of our faith."

The Magna Carta Trust was set up at the Mansion House, London, on July 9 to perpetuate the principles of Magna Carta, preserve the sites associated with its signing for reverent use by the public, and commemorate triennially "the grant of Magna Carta as the source of the constitutional liberties of all English-speaking peoples and as a common bond of peace between them." The trustees include the Master of the Rolls, the Lord Mayor of London, the chairman of the English-Speaking Union, and the chairman of the Pilgraims of Great Britain. (Times - Daily Telegraph - New York Times)

B. SOUTH VIETNAM. — Confiscation of Property of ex-Emperor Bao Dai and "Supporters."

The Vietnamese National Assembly passed a Bill on June 29 authorizing the Government to seize the properties of Bao Dai (the former Head of State, now living in France) as well as those of his "supporters." The measure did not specify who the "supporters" were, this being left to the Government to decide by decree. During the debate, however, it was stated that the legislation was directed against the leaders of the "Movement for National Salvation" which had been formed in opposition to President Diem's regime by a number of former Ministers and generals now living in France, including M. Nguyen Van-Tam and M. Tran Van Huu, former Prime Ministers, and General Nguyen Van-Vy, a former Chief of Staff. (Le Monde, Paris - New York Times) **(Prev. rep. 14949 A.)**

C. TURKEY. — Diplomatic Appointments.

M. Nuri Birgi, formerly Secretary-General of the Turkish Foreign Ministry, arrived in London on June 1 to take up the post of Ambassador to Britain in succession to M. Urguplü, who had held the post since September 1955. M. Urguplü, formerly Ambassador in Bonn, had been appointed to the London Embassy in succession to M. Baydur, who died in February 1955. M. Birgi had represented Turkey at the London conferences on Suez during the autumn of 1956.

Together with M. Birgi's appointment to London, an extensive diplomatic reshuffle had been announced in Ankara on March 25, as follows: M. Selim Sarper, Turkish permanent delegate to the United Nations, was appointed permanent representative to the North Atlantic Council in Paris; M. Seyfullah Esin, Ambassador in Bonn and formerly in Moscow, succeeded M. Sarper at the United Nations; M. Setar Iksel, Ambassador in Athens, became Ambassador in Bonn; M. Nuredin Ergin, formerly Ambassador in Lisbon, succeeded M. Iksel as Ambassador in Athens; and M. Feridun Kemal Erkin, Ambassador in Madrid, became Ambassador to France *vice* M. Menemenjoglu, retiring.—(Turkish Embassy Press Department, London - Le Monde, Paris) **(Prev. rep. 12149 D.)**

D. UNITED KINGDOM. — Strength of Armed Forces.

Figures issued by the Ministry of Defence on Aug. 19 showed that the strength of the U.K.'s active armed forces at June 30, 1957, was 702,100 officers and men, compared with 761,200 at June 30, 1956—a reduction of over 59,000.

Figures for the three Services (with those for June 30, 1956, in parentheses) were:—

Royal Navy and Royal Marines.—14,000 officers (14,500) and 99,800 ratings (105,400), including 200 W.R.N.S. officers and 3,100 W.R.N.S. ratings.

Army.—32,000 officers (34,300) and 335,200 other ranks (365,100), including 400 W.R.A.C. officers and 4,000 W.R.A.C. other ranks.

Royal Air Force.—26,500 officers (26,700) and 194,600 other ranks (215,200), including 400 W.R.A.F. officers and 4,300 W.R.A.F. other ranks.

The totals include 7,000 National Service officers (8,000) and 237,600 National Servicemen (275,500).

Reserve and Auxiliary forces in the three Services totalled 521,500 (606,600), and civilian staffs directly employed numbered 252,500 (263,800).—(Times - Manchester Guardian) **(Prev. rep. 15493 A; 14773 A.)**

E. WESTERN GERMANY. — Equal Rights for Men and Women in Family and Inheritance Matters.

The *Bundestag* unanimously approved on May 3 legislation designed to define in detail, for purposes of family and inheritance law, the principle laid down in Article 3 of the Basic Law under which "men and women shall have equal rights." Those provisions of the Civil Code of 1900 which contradicted this principle had already been abolished as from April 1, 1953, under Article 117 of the Basic Law, but the lack of any new legislative definition had created considerable legal uncertainty. Some of the more important provisions of the Bill regulated the right of decision concerning the education of children, and the status of the property of married women.

(Frankfurter Allgemeine Zeitung)

F. INTERNATIONAL RED CROSS. — British Ratification of Geneva Conventions of 1949.

The Geneva Conventions Bill, authorizing the British Government to ratify the four Geneva Conventions concluded in 1949 under the auspices of the International Red Cross [dealing with the amelioration of the condition of wounded and sick in the armed forces on land and at sea, the treatment of prisoners of war, and the protection of civilians in wartime], was given second readings in the House of Lords on June 25 and in the House of Commons on July 12 respectively. After passing the remaining stages the Bill received the Royal Assent on July 31.—(Times - Daily Telegraph) **(Prev. rep. 13664 B.)**

G. SWIMMING. — New Cross-Channel Record.

A new cross-channel swimming record was set up on Aug. 21 by a British naval officer, Commander Gerald Forsberg, who swam from St. Margaret's Bay (near Dover) to a point on the French coast near Cap Gris Nez in 13 hours 33 minutes—thus beating by 22 minutes the previous record (13 hours 55 min.) set up in 1955 by Miss Florence Chadwick, the American swimmer. Commander Forsberg (45) is an assistant director of boom defence and marine salvage at the Admiralty.

(Times - Daily Telegraph) **(Prev. rep. 14552 H.)**

A. ISRAEL. — Withdrawal of British Oil Firms.

It was announced in London on July 23 by a spokesman of the Shell Petroleum Company that Shell and the British Petroleum Company (B.P.) had decided for commercial reasons to cease the marketing and distribution of petroleum products in Israel. No decision had yet been taken about the Haifa oil refinery. The spokesman said that the companies' operations in Israel during the past few years had not been "commercially attractive." He was not prepared to confirm reports that the Arab States had exerted pressure on the companies to bring about their withdrawal from Israel.

At the present time the Shell company markets the output of the Haifa refinery, which it owns jointly with B.P. through a subsidiary of the latter, Consolidated Refineries Ltd. The refinery is capable of processing some 4,000,000 tons of oil a year, and up to 1948 about 2,000,000 tons of oil was delivered annually to the refinery by pipeline from the Kirkuk oilfields in Iraq. This supply ceased on the outbreak of the Palestine War, and since then the refinery has been in partial operation, processing crude oil imported from other sources. At the present time it processes some 900,000 tons annually out of Israel's total oil consumption of approximately 1,400,000 tons, part of the processing being carried out by the Israel Fuel Corporation (*Delek*), a semi-governmental agency.

It was made known in London on the same day that the Shell company had notified the Israeli Government in advance of their intention to cease operations in Israel; that the Israeli Government had made representations to the British Government in an attempt to persuade the companies to remain; but that H.M. Government, in reply, had pointed out that the companies had reached their decision on commercial grounds and without prior consultation with the Foreign Office.

The companies' decision was strongly resented in Israel, where the press and public opinion generally regarded it as a "surrender" by Britain in face of pressure exerted by the Arab States in pursuance of their economic boycott of Israel. Many Israeli newspapers represented the decision as an "appeasement" of the Arab States on the part of Britain, an editorial in the influential *Jerusalem Post* declaring that Britain had "succumbed to Arab blackmail." It was recognized in official circles, however, that the companies had decided to leave Israel without prior consultation with the British Government.

The decision of the Shell and B.P. companies to cease operations in Israel was described by *The Times* (in an editorial on July 26) as "profoundly disquieting." The editorial article said:

"... In their official explanation of why they are planning the disposal of their marketing interests Shell and B.P. stress that their action is due to purely commercial reasons. Nevertheless it is a well-known fact that the Arabs have, ever since 1948, been exerting pressure on the companies to dispose of their interests in Israel. Whatever the companies may say, the world, and particularly the Middle East, will believe that their withdrawal is a concession to the Arab 'boycott committee.' The Israelis have a further anxiety. This is that other British firms operating in Israel and Arab countries will follow suit. This fear is probably groundless, since, even assuming that the oil companies' decision is coloured by political calculations, no other business is dependent on Arab good will to the extent that they are.

"The Israeli Government have already made representations to the British Government. The latter apparently wish to treat the transaction as purely commercial but... they can hardly divest themselves of all responsibility. Not only will they have to face the political consequences of the companies' act but they are involved as part-owners of one of those involved. [The British Government have a 51 per cent holding in B.P.]. They ought not to interfere to the point of compelling private companies to make purely commercial sacrifices. But they ought to resist clearly recognizable political pressures. The disposal of the marketing interests is a matter for serious concern. If the future of the Haifa refinery itself is at stake this must be faced squarely as an important political issue."

Criticisms of the companies' decision were made in the House of Commons on Aug. 2 by several M.P.s, notably Mr. John Dugdale (Lab.) and Mr. Langford-Holt (C.).

Mr. Dugdale believed that the reason for the companies' decision was "Arab pressure which has been exercised upon many firms of different countries operating in Israel—a pressure which is mainly bluff, as has been shown by British, French and German companies who have refused to abandon their operations in Israel." After asserting that Shell and B.P. were carrying out a "squalid deal with the Arabs" whereby they hoped to secure further gains in their trade with the Arab world by giving up their interests in Israel, he called upon H.M. Government to resist pressure from the Arab League and to instruct the companies to remain in Israel.

Mr. Maudling, replying for the Government, emphasized that Shell and B.P. had been losing a substantial sum annually on their operations in Israel and had therefore decided that their continued operation in that country was no longer commercially justifiable. As the decision was taken on purely commercial grounds, and was in no sense a political decision, the Government had no right to challenge the commercial judgment of the companies or to interfere in any way.

The Foreign Secretary (Mr. Selwyn Lloyd) had previously stated in the House on July 29 that the Government had no prior knowledge whatever of the companies' decision to dispose of their marketing interests in Israel.— (Times - Daily Telegraph - Manchester Guardian - Government Press Office, Jerusalem)

B. UNITED KINGDOM. - Import Policy. - Relaxation of Dollar Import Restrictions. - Anglo-Australian Meat Talks in London.

The President of the Board of Trade, Sir David Eccles, announced in a written parliamentary reply on July 2 that import controls would be removed on more than 500 industrial commodities, certain agricultural products mainly used in manufacture, and certain chemicals, imported from the U.S.A., Canada and other countries in the dollar area.

The broad effect of this decision (Sir David said) would be that, except in the case of leather, for which the dollar quota would be substantially increased, the remaining import controls on the basic raw materials of industry and on metal semi-manufactures would be removed. In most cases the main benefit would be the relief of importers from paper work, but in other cases importers would gain from increased competition amongst suppliers and easier access to the sources of supply which suited them best. The net cost of additional imports from the dollar area was not expected to exceed £3,000,000. Sir David pointed out, however, that there had been no change in the Government's policy of economizing on external expenditure.

The Board of Trade stated in a memorandum that existing restrictions would continue to apply to dollar imports of machinery, fuels, many food items, and most manufactured products, including some which were used in industry. In the case of leather the present complicated quota arrangements would be greatly simplified and there would be a quota covering all dollar countries of £2,000,000 a year, representing an increase of about £1,250,000.

The goods on which quota controls were relaxed included animal feeding-stuffs and seeds, mineral products and metals, oils, waxes and perfumery materials, miscellaneous animal and vegetable products, and chemicals, drugs, and medicines. The statement pointed out that a large number of the items affected had already been imported under open individual licences or under specific licences freely issued.

Talks between the British and Australian Governments on Australian meat supplies to the U.K. were held in London from June 7 - July 7. The conference, which took place at Australia's request, was held with the purpose of reviewing the 15-year agreement under which Australia exports to Britain most of her surplus meat production.

A joint statement issued in London and Canberra on July 7 said that the present position and the future prospects of the market for meat in the U.K. had been examined. The Australian delegation had thought that potential increases of meat supplies both from abroad and in the U.K. were likely to outrun the capacity of the U.K. market to take increased quantities at remunerative prices; they could not agree that increased consumption could absorb significantly increased supplies. The U.K. representatives had pointed out that *per capita* consumption of meat in the U.K. had only recently recovered to the pre-war level, and considered that there was no reason to doubt that continued increases in consumption were possible. Moreover, they did not share the view that substantially increased supplies were in sight.

In the light of their views of the market prospects the Australian representatives had requested that, "in order to make effective the policy stated in the Ottawa Agreement of giving Commonwealth suppliers an expanding share of meat imports into the U.K., quotas previously applied under that Agreement to restrict imports of foreign meat should be revised on the basis that quotas would be reduced to limits to be agreed and applied if and when foreign supplies reached such limits." The U.K. representatives had stated, however, that they could not regard the use of import restrictions, as proposed for the purpose of protecting the Australian interest in the U.K. market, as consistent with U.K. policies and existing international obligations.

The statement concluded: "Both sides agreed that the situation should be kept under review and that, whenever thought appropriate, further discussions could be arranged at the request of either side."

Mr. McMahon, the Australian Minister of Primary Industry, stated on July 7 that Australia's aim had been a limitation of Britain's meat imports from Argentina to 200,000 tons a year, compared with the present 442,000 tons.—(Times - Daily Telegraph - Financial Times - Board of Trade Journal - Australian News and Information Bureau) (11779 A.)

C. SWEDEN. — Increase in Bank Rate.

The Swedish *Riksbank* announced on July 10 an increase in the bank rate from 4 to 5 per cent. The rate had been raised from 2½ to 3½ per cent on April 10, 1955, and from 3½ to 4 per cent on Nov. 23, 1956.—(Svenska Dagbladet, Stockholm) **(Prev. rep. 15266 B.)**

AUGUST 24—31, 1957

A. SYRIA.—Purge in Syrian Army. - Pro-Communist Officer appointed Commander-in-Chief. - Allegations of "American Plot." - U.S. Diplomats expelled from Syria. - Syrian Ambassador expelled from United States. - Western and Middle East Reactions to Syrian Developments. - Turkish Discussions with King Faisal and King Hussein. - Syrian Denial of Communist Alignment.

An extensive purge of top-ranking posts in the Syrian Army, involving the appointment of a pro-Communist officer (Colonel Afif Bizri) as Commander-in-Chief of the Army, was announced in Damascus on Aug. 17. The announcement said that ten senior officers had been dismissed (a major-general, two brigadiers, and seven colonels); that Colonel Bizri, Chief of Internal Security, had been appointed C.-in-C. of the Army in succession to General Nizamuddin and promoted to major-general rank; and that Brigadier-General Jamal Feisal had been appointed head of the *Gendarmerie*, with Colonel Mohamed Jarrah as his assistant. [Colonel Jarrah was military prosecutor during the trials of Right-wing leaders accused of plotting with Iraq to overthrow the present Syrian Government—see 15582 A.] The Syrian Prime Minister, M. Assali, had announced on Aug. 15 that General Nizamuddin had asked to be retired on pension.

No official reasons were given for the changes in the Army leadership, but it was commented abroad that they had followed closely upon the Syrian allegations of an American "plot" to overthrow the regime [see below], and also shortly after the Syrian Defence Minister's visit to Moscow, where an agreement had been signed for extensive Soviet technical and economic aid to Syria—see 15705 A. General Bizri was described in the Lebanese press as a "card-carrying Communist," and newspapers in Jordan and the Lebanon said that the so-called "American plot" had been invented as a pretext for eliminating officers opposed to Syria's close connexion with the Soviet Union. The Jordanian newspaper *Al Jihad* denounced "the military regime which now rules Syria in the name of Russia and not in the name of Arabism and the Arabs."

The background and implications of the changes in Syria were described as follows in a Beirut despatch (Aug. 20) from the Special Correspondent of *The Times*:

"... Of the men behind the coup ... it can be fairly assumed that the [Syrian] Communist chief, Khaled Baqdash, is a leading though little publicized actor Certainly Baqdash is the most dominating personality in Syrian politics in spite of his lack of office. ... The new Commander-in-Chief, General Bizri, is also believed to be a party member. Born of a Sidon family in the Lebanon, he moved to Aleppo in his youth, where, according to sources here [in Beirut], he was known as a Communist at the age of 17. He was also among those young 'Nationalists' who took part in the anti-British Rashid Ali coup in Iraq in 1941. His abrupt elevation to the senior Army post can be regarded only as a sign of where the power lies. ... As for Colonel Sarraj [see 15582 A], for so long the Syrian bogy-man, it may be thought that recent events tend to confirm the view that he is not a Communist (although his wife is supposed to be), otherwise he might have been more to the fore now; probably he is more interested in the technical exercise of power for its own sake. In its effect on Middle East alignments the Syrian coup may yet prove more far-reaching than the Suez adventure. Aside from the obvious threat to the Baghdad Pact, which could swing Jordan finally into that organization, and its revelation of the inadequacy of the Eisenhower doctrine as a substitute for a Middle East policy, it may have important bearings on Anglo-American relations with both King Saud and Colonel Nasser. ..."

Syrian Allegations of "American Plot." - Expulsion of U.S. Diplomats - Syrian Ambassador expelled from Washington.

On Aug. 13, only four days before the Army purge, the Syrian Government had announced the uncovering by the military authorities of "an American plot to overthrow Syria's present regime." Three officials of the U.S. Embassy—Lieut.-Colonel Robert W. Malloy (military attaché), Mr. Howard E. Stone (the Embassy's second secretary for political affairs) and Mr. Francis J. Jetton (vice-consul)—were accused of complicity and ordered to leave Syria within 24 hours. It was alleged *inter alia* that the U.S. Government had been willing to give large sums of money to a new Syrian Government which would make peace with Israel, and that it had sent Mr. Stone—described as America's "No. 1 expert on *coups d'état*"—to Damascus to direct the alleged "conspiracy." The allegations were described as a "complete fabrication" by the U.S. Embassy in Damascus and the State Department in Washington, and also by the three diplomats on their arrival in Beirut.

In retaliation for the expulsion of the U.S. diplomats, the State Department announced on Aug. 14 that the Syrian Ambassador in Washington, Dr. Zeineddine, and the Second Secretary of the Syrian Embassy, Dr. Zakaria, had been declared *personae non gratae* and expelled from the United States [Dr. Zeineddine was visiting Syria at the time.] It was also announced that the U.S. Ambassador to Syria—Mr. James S. Moose jr., then in America—would not be returning to Damascus.

The State Department announcement referred to the "increasingly unfriendly attitude" adopted by Syria toward the U.S.A., culminating in the "fabricated charges of involvement in a plot against the Syrian Government." It also announced that a strong protest had been made to the Syrian Chargé d'Affaires in Washington against "the Government-inspired slanderous campaign which has been carried on against the U.S.A. by the Syrian press and the Syrian official radio"; "interference with an American diplomatic courier at the Syrian border on Aug. 12"; and the "totally unwarranted action" taken against the three U.S. diplomats in Damascus.

The Syrian military attaché in Rome (Colonel Ibrahim Husseini), who had been accused by his Government of complicity in the "American plot," said on Aug. 16 that a group of Syrian Army officers were trying to establish a Left-wing military dictatorship with the object of "throwing the country into the arms of the East" and of turning Syria into a full-fledged Russian satellite so that they could consolidate themselves in power.

After stressing that there had been no "American plot" whatever, Colonel Husseini said that what was actually happening in Syria was an "internal struggle for power" launched about a year ago by a group of Army officers who were captains at the time but had since secured higher posts in the Syrian Army. Comparing the "captains' plot" in Syria with the "officers' plot" in Egypt which brought Colonel Nasser to power, Colonel Husseini said that whereas the Egyptian group was genuinely neutral in the East-West conflict, the Syrian group was "overtly and actively" pro-Russian.

Colonel Husseini subsequently asked for asylum in Italy, after refusing to obey orders from his Government to return to Damascus.

Anglo-American Discussions on Syria. - President Eisenhower's Statement.

The Syrian situation was discussed at the State Department on Aug. 19 by Mr. Dulles and the British Ambassador in Washington, Sir Harold Caccia. No statement was issued, but Sir Harold Caccia subsequently commented—in reply to questions by newspapermen—that the trend of events in Syria apparently represented "a procession towards Moscow"—"first of all you start with Russian arms, then there is the visit of the Defence Minister to Moscow, and then internal changes, all tending in the same direction."

At President Eisenhower's press conference on Aug. 21, Mr. Merriman Smith (of the United Press) commented that Syria "seems to be drifting into the Soviet orbit" and asked the President what the United States "was doing about the situation in Syria."

After pointing out that there were "very definite limitations on what you can do in the internal affairs of any other country," the President said: "First of all, the situation there [in Syria] is that we were accused of a lot of things which are obviously a smoke-screen behind which people that have Leftist leanings are trying to build up their power. The pattern that is seemingly emerging is an old one—for the Soviets to insert or offer economic and military aid and, through doing so, to penetrate the receiving country with their agents; for these to get into power [and] to find stooges that will do their will; and finally to take over the country. How far this pattern has gone in Syria we don't know. Actually, there is a very strict censorship and our embassy is not free to give us all the information that it can get. We don't know exactly what is happening. So, frankly, what we are doing is getting every piece of information we can daily. We consult with others that are interested and have knowledge and are trying to keep abreast of the situation. It is not one of those instances that at present justify any kind of action at all under the Mideast Doctrine" [i.e. the Eisenhower Doctrine.]

Turkish-Iraqi-Jordanian Discussions. - Visit of King Faisal and King Hussein to Istanbul. - Mr. Loy Henderson's Mission to Middle East.

The developments in Syria aroused serious concern in Iraq, Jordan, the Lebanon and, more especially, in Turkey. The Istanbul Correspondent of *The Times* commented (Aug. 22):

"The Turkish Government is following events in Syria with deep concern. If Syria were to become for all practical purposes a Communist satellite, Turkey would be faced with a double threat: from the north—the Caucasian frontier with Russia—and from the south—along the extensive frontier with Syria. However, the Government has refused to be dragged into hasty action. There has been no move to concentrate troops on the Syrian frontier and there seems to be no likelihood of such an eventuality in the near future. The Government is naturally keeping in close touch with friendly Governments, among them Britain, the U.S.A., and Iraq, but it would be premature to say that any formal application has been made for common action on the part of the councils of the North Atlantic Treaty Organization or the Baghdad Pact."

King Hussein of Jordan and King Faisal of Iraq both arrived at Istanbul on Aug. 22, the latter being accompanied by the Iraqi Prime Minister, Mr. Ali Jawdat. The two kings had talks on Aug. 23 on board the Turkish presidential yacht, followed on Aug. 24 by further discussions in which the Turkish President (M. Bayar) and Prime Minister (M. Menderes) participated. No communiqué was issued, but it was understood that the talks were of an informal character and dealt with the Middle East situation in general and Syria in particular.

The U.S. State Department announced on Aug. 23 that Mr. Loy Henderson (Assistant Secretary of State in charge of Middle East affairs) had left on a visit to the Middle East to "obtain first-hand impressions of developments in the area and reactions to those developments there." Mr. Henderson arrived in Istanbul on Aug. 24 and had discussions during the next two days with President Bayar, M. Menderes, and the Kings of Iraq and Jordan. King Hussein left Turkey on Aug. 26 for a visit to Spain.

President Kuwatly's Visit to Cairo. - Syrian Denial of Pro-Communist Alignment.

President Kuwatly of Syria flew to Cairo on Aug. 17 for conversations with President Nasser, before going on to Alexandria for treatment at a hospital where he had previously received medical attention from time to time. On his return to Damascus (Aug. 25) M. Kuwatly declared that the situation in Syria was "sound," and fully understood by Egypt; that he had had several meetings with President Nasser; and that both Syria and Egypt would resist any pressure which might be brought against either country. He denied press reports that King Saud had invited President Nasser and himself to a meeting at Riyadh, the Saudi Arabian capital.

The Secretary-General of the Syrian Foreign Ministry (Dr. Terazzi) held a press conference on Aug. 22 at which he declared (1) that Syria's foreign policy had not changed or shifted toward the Soviet Union, but remained one of "positive neutrality and non-alignment with any power bloc"; (2) that the Soviet Government had made no offer of military aid to Syria during the recent visit to Moscow by M. Khaled Azem, the Defence Minister, nor had the question of military aid been raised; (3) that any meeting of the Baghdad Pact Powers to discuss Syria would be regarded as an "unfriendly act"; (4) that the foreign policy of Syria and Egypt "cannot be separated"; and (5) that in the event of an attack on Syria "it is not up to the Soviet Union to defend us but up to the free world."

Dr. Terazzi described President Eisenhower's views on the Syrian situation as "distorted"; reiterated the allegation that U.S. Embassy officials had plotted to overthrow the Syrian Government; and asserted that the changes in the Syrian Army were solely an internal matter and bore no relation to Syrian foreign policy, which continued to be based on the "Bandung principles" of peaceful co-existence, non-interference, and non-aggression.

A Syrian Government spokesman announced on Aug. 21 that "a few" Syrian officers had been arrested for plotting against the Government. He declined to name the officers concerned; stated, however, that they did not include the ten who had been dismissed on Aug. 17; and added that full details would be released when investigations had been completed.

A. ITALY. — Reinterment of Mussolini's Body.

The body of Benito Mussolini was reinterred on Aug. 30 in the family tomb at Predappio (his birthplace), in northern Italy, after having been handed over to his widow, Signora Rachele Mussolini.

Mussolini was killed by partisans at Dongo (Lake Como) on April 28, 1945, his body being subsequently buried in an unmarked grave in a Milan cemetery. In the following year the remains were snatched by former Fascists but were later recovered by the police at a convent in Pavia. On the instructions of the late Cardinal Schuster (Archbishop of Milan), and with the agreement of the Italian Government, the body was secretly reinterred in a Capuchin monastery at Cerro Maggiore, some 50 miles from Milan. The Capuchin monks were not aware of the identity of the body, whose whereabouts were kept a State secret to avoid pro-Fascist demonstrations. During the past ten years Signora Mussolini and her family had made a number of requests for permission to allow the body to be reinterred in the family vault at Predappio.

The inspector-general of police who took Mussolini's body to the monastery at Cerro Maggiore disclosed on Aug. 30 that its whereabouts had been known to fewer than ten people.
(Corriere della Sera, Milan - Giornale d'Italia, Rome)

B. WHALING. — London Meeting of International Whaling Commission.

The ninth annual meeting of the International Whaling Commission took place in London on June 24-28 under the chairmanship of Dr. S. J. Liencsch (Netherlands).

The meeting was attended by representatives of Australia, Brazil, Canada, Denmark, France, Iceland, Japan, Mexico, the Netherlands, New Zealand, Norway, Panama, South Africa, Sweden, the U.K., the U.S.A. and the U.S.S.R., and by observers from Italy, Portugal, the International Council for the Exploration of the Sea, the U.N. Food and Agriculture Organization, and the Association of Whaling Companies.

A statement issued on June 28 said that 20 factory ships and 225 catchers had taken part in the 1956-57 Antarctic season, the total Antarctic output of whale oil and sperm oil amounting to 2,245,535 barrels (374,239 tons), compared with 2,307,165 barrels (384,527 tons) in 1955-56. Output of whale and sperm oil from non-Antarctic sources amounted in 1956 to 605,189 barrels (100,865 tons), as compared with 520,090 barrels (86,683 tons) in 1955.

The Commission's Scientific Sub-committee had recommended that the Antarctic catch, which had been limited to 15,000 blue whales in the 1955-56 season and to 14,500 in 1956-57, should be still further reduced in 1957-58. In view of the economic and practical factors involved, however, the Commission decided that the present limit of 14,500 blue whales should stand for another season.

The Commission amended the schedule to the International Whaling Convention so as (i) to make a distinction between factory ships and refrigerated ships; and (ii) to provide that the clause prohibiting factory ships from hunting whales in non-Antarctic waters within 12 months of having completed a season in the Antarctic should not apply to refrigerated ships.

A draft agreement providing for the stationing of neutral observers with all Antarctic whaling expeditions, to prevent violations of the international restrictions, had been signed by Japan, the Netherlands, Norway, and the U.K. at a special conference at Oslo on March 20. The U.S.S.R. declined Norway's invitation to attend the conference, but during the London meeting of the International Whaling Commission the Soviet delegates announced that their Government had meanwhile signed the draft agreement.—(Lloyd's List and Shipping Gazette - Times - Norwegian Embassy, London)

C. UNITED KINGDOM. — Industrial Production Indices for 1956 and First Quarter of 1957.

Indices of industrial production (1948 = 100) prepared by the Central Statistical Office for 1956 and the first quarter of 1957 were as follows:

	Total All Industries	Mining and Quarrying	Manufacturing Industries	Building and Contracting	Gas, Electricity & Water
		1956.			
January ..	138	114	143	116*	183
February ..	136	115	146	116*	198
March ..	137	115	145	116*	171
April	136	111	141	125*	158
May	136	108	140	125*	143
June	138	115	147	125*	141
July	136	95	131	126*	132
August ..	134	81	114	126*	131
September ..	137	109	145	126*	144
October ..	136	115	147	127*	162
November ..	137	119	150	127*	179
December ..	135	110	135	127*	178
		1957.			
January ..	136	115	140	122*	188
February ..	137	122	146	122*	184
March ..	137	120	147	122*	168

* Quarterly average.

Provisional figures for all industries during the second quarter of 1957 were: 136 in April; 139 in May; and 140 in June.
(Treasury Press Office - Board of Trade Journal)
(Prev. rep. 14971 B.)

D. AVIATION. — Fastest Transatlantic Crossing.

The fastest crossing of the Atlantic to date was made on Aug. 25 by an R.A.F. *Valiant* jet bomber, piloted by Squadron-Leader R. Collins, which flew from Ottawa to Marham (Norfolk) —a distance of 3,800 miles—in six hours four minutes at an average speed of 540 m.p.h. An Air Ministry spokesman, however, pointed out that the flight would not count as a record, since it was "a routine return flight from Ottawa" and there were no observers on board. The official record is held by a *Canberra* which flew from Ottawa to London in six hours 43 minutes in June 1955, at an average speed of 496.8 m.p.h.
(Times - Manchester Guardian) **(Prev. rep. 15109 C; 14298 C.)**

A. NORTH ATLANTIC TREATY ORGANIZATION - WESTERN EUROPEAN UNION. — Compromise Agreement on Reduction of British Forces in Germany. - Censure Motion rejected by W.E.U. Assembly. - General Norstad's Concern over Troop Reductions. - Agreements on Support Costs between Federal Germany and Western Powers. - Reorganization of Netherlands Army. - First German Forces under NATO Command. - Anglo-German Defence Talks. - Other NATO Developments.

The British Government formally notified the North Atlantic Council and the Council of the Western European Union on Feb. 14 of its intention to reduce the British forces in Germany to an appreciable extent, in connexion with Britain's new defence policy of cutting the size of her armed forces while at the same time relying on the effectiveness of the nuclear deterrent.

Although detailed figures were not disclosed at the time, it was subsequently reported in the Press that it was proposed to cut the B.A.O.R. by about 27,000 men within some 12 months (including the special airborne brigade group of 5,000 men stationed in Germany), and thus to reduce the overall strength of B.A.O.R. and the 2nd Tactical Air Force from 77,000 to 50,000. At the same time, however, it was proposed that the airborne brigade group of 5,000 men should be kept in Britain as part of the strategic reserve, earmarked for immediate service on the Continent whenever necessary.

The proposed cuts had to be submitted for approval by the Council of the W.E.U. because of the provisions of Article 6 of Protocol II to the Western European Union Treaty, which formed part of the Paris Agreements of 1954. In this protocol Britain had committed herself to maintaining the effective strength of the British forces assigned to the Supreme Allied Commander, Europe, at four divisions and the 2nd Tactical Air Force, and "not to withdraw these forces against the wishes of the majority of the high contracting parties, who should take their decision in the knowledge of the views of the Supreme Allied Commander, Europe." This meant that a majority of the W.E.U. member-countries could stop any withdrawal except —as provided for in the protocol—"in the event of an acute oversea emergency."

In addition there was an undertaking given by NATO members to the North Atlantic Council in October 1955, when it was agreed that any Government contemplating a change in its commitments would inform the Council and the appropriate military authorities, and that this would be done in time for the Council's views to be fully considered.

Mr. Selwyn Lloyd, the U.K. Foreign Secretary, explained the reasons for the British proposals to a ministerial meeting of the Council of W.E.U. held in London on Feb. 26.

Mr. Lloyd explained that Britain had been overstraining her resources and was facing inflationary difficulties, which obliged her to cut down on her spending. One of the principal causes for these economic difficulties was the unduly high proportion of the country's resources—men, money, and materials—which were going to Defence. Arms expenditure last year had been £1,620,000,000, of which £80,000,000 had been recouped; but if this effort were continued at the same rate Britain would be spending £2,000,000,000 on defence by 1960 because of the increasing cost of weapons.

The Foreign Secretary stressed that Britain had been carrying an unduly large share of the defence burdens of the free world—in Korea, Malaya, Hong Kong, Arabia, and elsewhere—with defence commitments extending far beyond the European Continent. As a result, H.M. Government had decided that they must make "definite and substantial" changes in the armed forces by putting an end to automatic increases in arms expenditure, by making a substantial reduction in manpower, and by a reduction in overseas commitments —such as was taking place in Jordan. Unless, however, Britain was to abandon all her defence commitments outside Europe, some of the necessary cuts would have to fall on her European forces, though Mr. Lloyd stressed that the Government's proposals were open to discussion.

In seeking to mitigate the consequences of this decision, Britain contemplated keeping for NATO use in the British Isles a small part of those forces which were to be withdrawn from the Continent; their military equipment would be kept on the Continent so that there would be very little delay in bringing them, if necessary, into effective use in Europe. He also considered that the greater effectiveness of the new aircraft with which the 2nd T.A.F. was being equipped would largely offset the proposed reductions in the numbers of R.A.F. aircraft and personnel.

The British proposal gave rise to much concern among the other W.E.U. member-countries, particularly strong opposition being expressed in France and Western Germany.

French Ministers insisted that the British plan should be approved only if it conformed to the requirements of the Supreme Commander, whilst the Germans urged that it should be postponed for further review as it dealt with problems common to all the Allies It was also emphasized that any considerable reduction in the size of "conventional" NATO forces might face Western Europe with the prospect of being incapable of resisting Communist pressure unless it was prepared to embark on an all-out nuclear war. In this connexion Ministers from the Continental countries suggested that the British proposals might be re-phased so that their full impact could be delayed until the end of 1958 or the beginning of 1959.

Grave apprehensions about the British proposals had previously been voiced by the Supreme Allied Commander in Europe, General Norstad.

In a press statement on Feb. 5, General Norstad had emphasized that 30 divisions were the "strict minimum" needed to guarantee the NATO countries against attack Originally, he recalled, the defence requirements of Central Europe along the line of the Rhine had been set at 65 to 90 divisions, but the availability of new atomic weapons and greater divisional fire-power had made it possible, after a major re-examination of Allied tactics undertaken in 1954, to arrive at a plan for the defence of the whole NATO area with a force of some 30 divisions This requirement still represented the "minimum adequate," and SHAPE would be most reluctant to see any reductions in the "shield forces" covering the Central European sector. Asked what would happen if Britain went ahead with the proposed cuts in her forces on the Continent, General Norstad replied: "If it were an important reduction we would be forced to revise our whole concept, and we would have to see if the forces available would then be sufficient or not to continue our mission on its present basis"

Expressing the "utmost confidence" in the U.S. Strategic Air Command and R.A.F. Bomber Command as "retaliatory forces," General Norstad said that this force was "strong," "effective," and "a true deterrent"—"stronger and more effective than you [the press correspondents] or the general public realize." Nevertheless, he felt that the real deterrent to aggression was the "defensive shield" along the thousands of miles between NATO and the Soviet bloc—a shield which must be held to enable the retaliatory forces to be used effectively. He added that a deficiency in the "shield" had been the lack of a German armed contribution, but expressed satisfaction at the way in which the German defence build-up was now progressing. By the end of 1957, he said, Supreme Headquarters expected to have as part of the German contribution three motorized infantry divisions, two armoured divisions, and the nuclei of a mountain division and an airborne division. Moreover, the German Navy was expected to provide two or three minesweeper squadrons, and two German air transport squadrons would also be ready.

The North Atlantic Council considered the British proposals on Feb. 22, March 1, March 4, and March 13 without reaching agreement. Discussions by the W.E.U. Council on March 15-17, held at official level, were similarly inconclusive. Eventually, however, after the Ministers concerned had been urgently summoned to London, a meeting of the W.E.U. Council at ministerial level adopted on March 18 a compromise resolution incorporating certain suggestions made by Dr. Adenauer, the German Federal Chancellor. In this resolution the W.E.U. Council agreed (i) to recommend to the North Atlantic Council the carrying-out of a new overall review of the resources of the NATO allies; (ii) that the U.K. might in the meantime begin to carry out the reductions planned for the year April 1957-March 1958, having regard to the views of the Supreme Allied Commander; and (iii) that a decision on any further reductions should not be taken until October 1957, in the light of the NATO review.

The text of the W.E.U. Council's resolution was as follows:

"The Council of Western European Union met on March 18 in London . . . under the chairmanship of Mr. Selwyn Lloyd. Belgium was represented by M. Spaak, France by M. Pineau, the German Federal Republic by Professor Hallstein, Italy by Signor Martino, Luxemburg by M. Bech, and the Netherlands by Mr. Luns. Canada and the United States were represented by Mr. Robertson, the Canadian High Commissioner, and Mr Whitney, U.S. Ambassador in London, as observers.

"The Council continued the discussion, begun at ministerial level on Feb. 26, of the U.K. proposals for the future deployment of their forces on the mainland of Europe. It had been agreed at that meeting that examination of these proposals should be concluded at a further meeting of the W.E.U. Council in accordance with Article VI of Protocol II of the Paris Agreements. The British Government had put forward on Feb. 14, in connexion with their new overall defence plans, certain proposals regarding the future pattern of their forces on the mainland of Europe placed under the command of SACEUR [i.e. General Norstad]. The Council took note of the opinions expressed thereon in NATO, and also of the views of SACEUR.

"The Council recognized that the problems facing the U.K. were, in fact, common to all members of the Alliance and that these common problems called for a common solution within NATO. The seven Governments therefore agreed to recommend to the North Atlantic Council that they study urgently the proposals made by the German Chancellor for a new overall review of the resources of the Alliance covering: (*a*) military requirements and defence aims; (*b*) relationship between conventional and atomic forces and weapons; (*c*) relationship between modern armaments and economic and financial resources; (*d*) common production of modern weapons; (*e*) common solution of currency problems arising from the stationing of troops in other member-States.

"The U.K. Government, pending the result of this review by NATO, will carry out their plans for the 1957-1958 financial year, having regard to SACEUR's views. Any further reductions will only be decided in October 1957 after new discussions in W.E.U. in conformity with Article VI of Protocol II of the Paris Agreements, and in the light of the above-mentioned review."

The Council's decisions meant in practice that the British Government could put in hand the withdrawal of some 13,000 men during the financial year 1957-58, but that the number would not be regarded as a definitive figure until the NATO review had been made and agreement reached in the W.E.U. The question of the withdrawal of some further 14,000 men in the financial year 1958-59 would only be decided in October after further discussions. It was reported in the Press that the British Government had agreed not to transfer back to the U.K. the special reserve of 5,000 men maintained in Germany.

NATO Council Meeting in Bonn.

The North Atlantic Council held its regular meeting at ministerial level in Bonn on May 2-3—the first occasion that the Council had met outside the organization's headquarters in Paris and in the capital of one of the other member-countries. The Foreign Ministers present included those of Britain (Mr. Selwyn Lloyd), France (M. Pineau), Italy (Dr. Martino, who presided), Western Germany (Dr. von Brentano), the Netherlands (Mr. Luns), Denmark (Hr. Christiansen), Norway (Dr. Halvard Lange), Greece (M. Averoff), and the United States (Mr. Dulles).

The following communiqué was issued at the end of the meeting (cross-headings inserted):

Defensive Character of Alliance. "The Atlantic alliance has always been and remains purely defensive. It was created to protect its member-countries from any aggression. It has succeeded. But the danger of aggression clearly continues, and the countries of the alliance must therefore remain united to provide for their defence.

The Soviet Campaign of Intimidation. "The Council noted that . . . the Soviet leaders have launched a campaign which, while throwing the cloak of oblivion over Soviet repression in Hungary, is designed to induce public opinion in various member-countries to oppose the modernization of defence forces and to weaken the principle of collective security in NATO. The Council agreed that one of the objects of this campaign was to ensure for Soviet forces a monopoly of nuclear weapons on the European Continent. Such a situation clearly would not be accepted. It was with satisfaction that the Council noted the firm replies given to these Soviet manoeuvres.

Need for Conventional and Nuclear Weapons. "The Atlantic alliance must be in a position to use all available means to meet any attack which might be launched against it. It is the availability of the most modern weapons of defence which will discourage attempts to launch any such attack on the alliance. Pending an acceptable agreement on disarmament, no Power can claim the right to deny to the alliance the possession of the modern arms needed for its defence. If, however, the fears professed by the Soviet Union are sincere, they could be readily dissipated. All that is needed is for the Soviet Union to accept a general disarmament agreement embodying effective measures of control and inspection within the framework of the proposals made on numerous occasions by the Western Powers, which remain an essential basis of their policy.

The NATO "Shield." "During their discussions of the problem of security, the question was raised of the balance as between the latest weapons and conventional arms. The Council is awaiting the results of studies now in hand by the NATO military authorities to enable member-countries to decide together on the steps necessary for the development and balance of the different types of forces needed. The Council remains convinced that these decisions taken in common should take into account the need for NATO to retain an effective deterrent against aggression, including a powerful shield of land, sea and air forces, to protect the territory of member-States.

Hungary. "Recent events in Hungary have confirmed that freedom counts for nothing in Soviet eyes and that the U.S.S.R. is prepared to use force to crush the legitimate aspirations of nations. The Council agreed that the continued brutal repression of the struggle for freedom of the heroic Hungarian people . . . continues to make difficult an improvement in East-West relations.

German Reunification. "The Council discussed the effect of political developments in recent months on the question of German reunification. They decided to continue their efforts with every means at their disposal to induce the Soviet Government to carry out its agreement that Germany should be reunified by free elections. The Ministers view the prolonged division of Germany and the anomalous situation of Berlin as a continuing threat to world peace. They reaffirmed their determination by peaceful means to continue and intensify the common policy for the restoration of Germany as a free and united State within the framework of a system of European security. They directed particular attention to the inhumanity of the continued division of the German people.

Middle East. "The Council reviewed recent developments in the Middle East. They concluded that while the dangers to peace in the region remain great, certain new elements give promise of limiting the opportunities for Communist expansion and subversion. The Council emphasized the importance of current initiatives to improve the situation and to reinforce the efforts already made to ensure the security and integrity of countries in the Middle East.

NATO Political Co-operation. "The Ministers considered the state of the alliance in the light of political developments, both within and without the NATO area, which have taken place since they last met five months ago. In this connexion they reviewed the progress achieved in political consultation under the new procedures inaugurated as a result of the recommendations of the Committee of Three approved last December. They concluded that useful and concrete results had been achieved, and that the alliance was acquiring both greater maturity and solidarity.

Retirement of Lord Ismay. "The Council noted the report submitted by Lord Ismay [see below], and conveyed to him their thanks and gratitude for the supreme services which he has rendered to the cause of the alliance in the past five years."

Although not mentioned in the communiqué, it was announced by Dr. von Brentano on May 3 that the Council had agreed, on the initiative of both Mr. Selwyn Lloyd and M. Pineau, to make the Working Group on German reunification [see 15416 A] a permanent body; that it should continue to be responsible to and fostered by the British, French, U.S. and German Federal Governments; and that it should report to NATO.

Before the Council went into restricted session a number of important statements were made by the Ministers present.

Mr. Selwyn Lloyd said that the Soviet warnings about the consequences of nuclear war betrayed their concern at the cohesion of the West and its ability to adapt itself to new military developments. The threat of Soviet "nuclear retaliation" did not in any way alter the position of Britain, which had been a nuclear base for more than five years. "We have never supposed," he added, "that the Soviet Union would fail to use nuclear weapons against us in a global war. We are right to base our whole defence on the nuclear deterrent, and we have reason to believe that the Soviet Government respects that deterrent. We must see to it that this is the strength of our position, and that it is clearly understood by public opinion."

The Soviet Union (Mr. Lloyd continued) was seeking a period of co-existence in order to build up its long-term strength, and its diplomatic tactics consisted of "alternating bluster with blandishment." While the U.S.S.R. was building up its military striking power, it was trying to modernize and develop its economy in order to compete with Western standards. This was causing serious strain, as it was no longer possible to apply the former Stalinist methods of repression. The satellite countries were now becoming an anxiety and a liability to the U.S.S.R., but the Communist bloc remained intact. Outside this bloc Russia's exploitation of nationalist movements in Africa and other parts of the world, while possibly not meeting with all the success she had hoped for, had continued and must be watched. "This is not a moment for false optimism," Mr. Lloyd declared, "but we do not need to talk ourselves into a decline."

Mr. Dulles said that fears had been expressed that Britain's new defence policy of reducing the armed forces would set off "a chain reaction" within the Atlantic alliance; President Eisenhower, however, had asked him to inform the Council that no change was contemplated in the disposition of U.S. forces from the plans outlined at the Council meeting last December. The Secretary of State added that the Soviet Union was still trying to play a disruptive role because she did not like the military strength of NATO. The best way for the Russians to allay their fears would be to accept some control of disarmament. But whilst no group was more eager than the Atlantic alliance to reduce its armaments and the threat of nuclear war, it would be "folly to weaken our defences on the basis of Russian promises alone." Real progress could be made only when the Russians were prepared to accept reciprocal control and inspection of armaments.

Dr. von Brentano pointed out that the German Federal Government was "not very happy" about the reduction of British forces in Germany. He emphasized that the Federal Republic possessed no nuclear arms and had not asked for them; had also undertaken not to manufacture such weapons; and had voluntarily subjected herself to a strict and permanent control in this field.

M. Pineau stressed the need for developing conventional as well as atomic defences, whilst **Hr. Christiansen** and **Dr. Lange** gave assurances that their Governments had not been intimidated by the threats contained in Marshal Bulganin's letters [see pp. 15628-29].

M. Averoff disclosed that the Soviet Ambassador in Athens had recently threatened Greece with nuclear retaliation if the Greek Government allowed nuclear bases to be established on its territory. This threat had been rejected as an interference in Greek affairs.

Dr. Adenauer dealt largely with the problem of German reunification, but emphasized that it could not be attained by the "neutralization" of Germany, which would not reduce tension. In the present supersonic age a neutral zone in the heart of Europe would seem to serve no purpose, and in the event of war a neutral Germany would become a battlefield.

Turning to recent Soviet diplomatic moves, Dr. Adenauer recalled that Soviet leaders had advised people to take "realities" into account. Asking what these "realities" actually were, the Federal Chancellor said that the first reality was that the U.S.S.R. had maintained about 5,000,000 men under arms since 1945, which was a constant

potential threat The second was that the Soviet leaders had not abandoned their mission of Communist world domination. The third was that since 1940 the U.S S.R had penetrated westwards into the Baltic States, Poland, Rumania, Czechoslovakia, and East Prussia, and that Communist Governments had been formed wherever Soviet troops were stationed. The fourth reality was that the Western Powers had called a halt in Berlin, that the city had been supplied during the Russian blockade, and that the Atlantic Treaty had been signed. This firmness had convinced the Soviet Union that any further advance would entail military counter-measures. Western Germany, he concluded, was prepared to make her full contribution to West European security to ward off " the apocalyptic threat of modern war."

Dr. von Brentano, in a further statement on May 3, appealed to the other NATO countries not to forget Eastern Germany, declaring in this connexion : " Responsible political leaders in the Federal Republic should do everything possible to persuade the inhabitants of the Soviet Zone to abstain from imprudent actions. Nevertheless, situations might arise in which suffering caused by oppression and moral and material misery may reach a limit where reason becomes powerless to dictate action, and desperation and just anger break out with the violence of a volcanic eruption. If attempts were made to establish global peace without a solution of the German question, that peace would be built on a volcano."

Mr. Selwyn Lloyd, Mr. Dulles, and **M. Pineau** all stressed their anxiety to end the present division of Germany and gave assurances that German reunification was an essential aim of NATO.

Lord Ismay's Report.

The Council considered and adopted a report on the present position of NATO by Lord Ismay, the retiring Secretary-General.

The report stated that NATO possessed 150 airfields usable by all types of aircraft, compared with less than 20 in 1952. There were today 5,500 miles of land-lines, 1,250 miles of submarine cables, and 1,940 miles of radio links, whereas in 1952 these communications had been virtually non-existent. There were also 2,840 miles of oil pipelines, as well as storage facilities for 30,000,000 gallons of fuel. In the past five years infrastructure programmes amounting to £716,000,000 had been approved. As regards production of munitions, the combined capabilities of the European NATO countries had increased five-fold in the past five years. This had been due " in the first place to the sharing of the capital outlay for new plants between the European countries concerned and the U.S.A., and secondly to very large offshore orders."

Member-countries, however, were now faced with serious problems in the manufacture of atomic weapons. " For some time now," the report said, "the rapid advances made in manufacturing techniques and the introduction of new weapons have shifted the main effort from increasing the production capacity for conventional items to the development and supply of new equipment to meet the operational requirements of the Supreme Commanders. The problem is many-sided and difficult on account of the complex character of the equipment in question and the long lead-time involved, to say nothing of their much-increased cost."

Dealing with Civil Defence, Lord Ismay said : " There are some who say that the successful outcome of a nuclear war will depend upon the efficiency of the arrangements which have been made in time of peace to secure the home fronts more than on strictly military preparedness. There are others who argue that no civil defence can be effective against nuclear attack, and therefore that all civil emergency planning is a waste of time and money. The truth lies somewhere between these two extremes. But it cannot be denied that it is the bounden duty of every Government to do its utmost to make plans which would ensure that, in the event of the unspeakable catastrophe of a thermo-nuclear war, the civil population and civilian activities would be efficiently controlled and directed."

As regards political co-operation, Lord Ismay stated that this was increasing, but added : " The practice of consultations in the Council has not as yet developed sufficiently to meet the demands of political changes and world trends." Social and cultural co-operation had achieved " fairly modest " results.

The amount spent on information services had grown from £8,000 in 1952 to £93,000 in the present year, but " it must be frankly admitted that there is still widespread ignorance about NATO in all the member-countries."

Meeting of W.E.U. Assembly.

The Assembly of the W.E.U. held its third session in Strasbourg from May 6-8, 1957. It considered *inter alia* the report of its Defence Committee, a report by the W.E.U. Council of Ministers, and a motion censuring the Council of Ministers for the manner in which it had approved the reduction of British forces in Germany.

Defence Committee's Report. This report (published on May 2 and presented in the Assembly by Mr. Fens, Netherlands) expressed concern at the state of NATO forces in Europe, described the " shield " upon which NATO's strategy was based as " fragile," and declared that the lack of uniformity in equipment and logistics was such as to put the Supreme Commander at a great tactical disadvantage.

As regards the strength of the Central European Command, the report said only the American divisions were at full strength ; the British divisions were at some 60-70 per cent of establishment, the French contribution was gravely weakened by Algerian requirements, and there were as yet no German divisions. General Valluy (C.-in-C., Central Europe) had said that it would not be possible to give battle on the line of the Iron Curtain, but for political and psychological reasons he would try to protect the German population and the industrial resources of the Ruhr to the maximum possible extent.

Although paying a warm tribute to Britain for having hitherto maintained a first-class fighting force on the Continent, the Committee was highly critical of the British decision to reduce these forces, and said that any reduction of the still " too weak " ground forces at present stationed on the Continent was not acceptable.

The report asked the Assembly to confirm that the conclusion of an international agreement on " the honest limitation of armaments under mutual control " was the essential objective of Western policy. Pending the conclusion of such an agreement, the Assembly was asked to recommend to member-States

" (1) That the following principles be adopted :—

(i) That the effective defence of Western Europe on the basis of " forward strategy " requires . (*a*) an irreducible land force of 30 divisions equipped with tactical atomic weapons ; (*b*) a strategic nuclear striking force.

(ii) That a reduction of the still too weak ground forces at present stationed on the Continent of Europe would destroy the essence of the Western European defensive system, and is therefore not acceptable.

(iii) That all Western forces be equipped on equal terms with tactical atomic weapons and those missiles which improve tactical warfare.

" (2) That the following steps be taken in order to make our land forces a more effective fighting instrument :

(*a*) Standard types of relatively small and highly mobile divisions should be established and supplied progressively with standardized equipment.

(*b*) A common short mobilization period should be laid down for all the W.E.U. divisions serving under General Norstad.

(*c*) A period of military service should be established common to the seven member-States.

(*d*) A joint plan should be worked out for co-operation between territorial defence and civil defence forces of member-States."

The report added : " If Great Britain were to withdraw troops from Germany, it could not in logic be possible to prevent other States from doing the same. Must we not fear that the United States might lose their confidence in the defensive will of the European partners and withdraw their divisions also ? "

In replying to the criticisms contained in the report, Mr. Ormsby-Gore (U.K. Minister of State for Foreign Affairs) explained the background and implementation of the British decision. He rebutted the idea that British defence " re-thinking " had been carried out without warning ; recalled in this connexion that both in 1955 and in 1956 British Ministers had informed their NATO allies of the way in which British thought was moving ; and reiterated that the British plans did not mean a " retreat " from Europe.

The report was eventually adopted by the Assembly, which also unanimously approved a resolution recommending that the seven member-countries of W.E.U. should manufacture guided missiles in common, whilst the manufacture of nuclear weapons could be added at a later stage.

Censure Motion against Council of Ministers. This motion—the first censure motion to be moved in the Assembly—was signed by 12 delegates from France, Italy, and the Benelux countries and was introduced by M. P.-H. Teitgen (France) in reply to the report of the Council of Ministers which had been presented by M. Spaak (Belgium). The censure motion was debated at length by the Assembly, together with the new British defence policy. When put to the vote, however, it obtained only 31 votes in favour and 27 against, with 10 abstentions, thus failing to obtain the required absolute majority of 45 votes —i.e. a majority of all the members of the Assembly, whether present or not.

In its final form the motion stated that the report submitted by the Council of Ministers on the question of British troop reductions " does not contain the detailed explanation, which the Assembly has the right to expect," of why the Ministers had approved the reduction. After saying that the Ministers had not given sufficient study to the effect of the reduction, and expressing " deep concern " that European security was being " weakened by reducing defence forces which are already inadequate," it ended with the words : " The Assembly considers insufficient [the Ministers' report] and refers it back for re-examination and for a new report to be made to the Assembly."

During the sometimes heated debate those opposing the motion, led by the British delegation, argued that though it nominally criticized only the Council of Ministers, the outside world would be bound to interpret it as an expression of censure on the British Government. The supporters of the motion disclaimed any such intention, emphasizing that the aim was simply to complain to the Ministerial Council about the way in which it had approved a decision on a problem which was common to all Europe, and on which action should have been postponed until there had been a comprehensive international examination of the whole matter.

Mr. Hale (U.K., Lab.) made an impassioned appeal to the Assembly not to nourish British isolationism by continuing to criticize Britain and administering " little pinpricks," whilst Mr. Nicholson (U.K.,

Cons.) said that though he knew that the signatories of the motion were friends of Britain, they were "suffering from an almost virginal innocence" if they thought it was not a condemnation of British policy. The British point of view was strongly supported by **M. Dehousse** (Belgium), President of the Assembly of the Council of Europe and a member of the W.E.U. Assembly.

Comparative Figures of Defence Expenditure of W.E.U. Countries.

The following figures were issued in Paris on Feb. 26 showing the defence expenditure of the seven member-countries of W.E.U. in 1955, compared with their gross national income:

	Defence expenditure in 1955	Gross national income	% of gross national income spent on defence	Expenditure per head of population (approx.)	Pop. (thou.)
	£m.	£m.	%	£ s. d.	
Great Britain ..	1,569	16,762	9.3	30 12 0	51,221
France	1,117.6	14,401	7.8	25 14 0	43,441
Germany (West)	628.3	11,838	5.3	12 8 0	50,318
Italy	324.4	6,055.1	4.7	6 14 0	48,107
Netherlands ..	159.2	2,440.4	6.5	14 7 0	10,822
Belgium	121.2	3,090.1	4.0	13 12 0	8,896
Luxemburg ..	4.3	119	3.6	13 16 0	311

The figures showed that Britain spent more on defence than any of the other member-countries, not only absolutely but also in proportion to her gross national income. It was pointed out, however, that in comparing defence expenditure per head in the different countries it was necessary (i) to keep in mind that the average Briton's income was more than twice that of his Italian counterpart, and 30 per cent higher than that of his German counterpart; (ii) that account had to be taken of the differences in the cost of living in the seven countries.

Other Decisions of W.E.U. Council of Ministers.

At its meeting in London on Feb. 26 the W.E.U. Council of Ministers, in addition to considering the U.K. proposals for the future deployment of British forces on the European Continent, also considered proposals for improving future co-operation "with a view to promoting the strength and cohesion of the Western Alliance." The communiqué stated that they had agreed (1) that the Council should meet more frequently at ministerial level; (2) to call for "an urgent study . . . of the closer association and possible ultimate unification of the European assemblies"; (3) to begin "an urgent study of further steps to stimulate and extend the co-operation between the W.E.U. countries in the fields of research, development and production within the framework of the Standing Armaments Committee."

Agreement on West German Support Costs for Allied Forces in 1957-58.

The Anglo-German Economic Committee, which had been negotiating in Bonn since January on the question of German support costs for the British forces in Germany during the financial year 1957-58, reached agreement on March 8 on the following joint recommendations to the two Governments:

(*a*) Western Germany would pay a lump sum of 200,000,000 DM. (about £17,000,000) as straight support costs.

(*b*) She would pay a further 388,000,000 DM. (about £33,000,000) as a measure of mutual aid to the U.K.'s defence efforts within the framework of NATO.

(*c*) As a "further measure of mutual aid and with a view to strengthening the economic co-operation between the two countries," the *Bank Deutscher Länder* would deposit with the Bank of England an amount of £75,000,000 which would be used for the settlement of future German commitments, especially the payment of the annual instalments of £7,500,000 due to Britain under the agreement on the settlement of the German post-war debt to the U.K.—see 13156 B. [The amount of that debt outstanding was then about £120,000,000.]

(*d*) The existing German "Arms Purchasing Account" at the Bank of England would be increased from £20,000,000 to £30,000,000 to cover rising German arms purchases from the U.K.

The British Government's acceptance of the recommendations was indicated by the Chancellor of the Exchequer (Mr. Thorneycroft) in a statement to the House of Commons on March 4. In reply to Opposition questions, however, the Chancellor disclosed that a clause in the agreement would permit the Federal Republic to call at any time after Sept. 1, 1957, for a review of the agreement "in the light of any changes in the situation which may be held to have a bearing on the appropriate level of contributions."

The Diplomatic Correspondent of *The Times* commented (March 6) as follows on the background of the Anglo-German negotiations:

"Maintenance of British forces in Germany costs considerably more, both in sterling and in foreign exchange (marks), than it would cost to maintain the same forces at home. The current additional cost in foreign exchange is the equivalent of about £65,000,000 a year. If the proposed reductions are carried out this cost will, it is hoped, be reduced to about £60,000,000 for the next financial year.

"In face of this the German representatives on the Anglo German economic committee which has been discussing the terms have agreed to recommend to their Government a payment to the British Government of £50,000,000. . . . From the British point of view it does not now matter how the £50,000,000 is described. The whole, paid in marks, will be available to offset the foreign exchange costs of the British forces, and the Federal Government is, therefore, in practice meeting about five-sixths of this amount.

"From the Federal Government's point of view there were, however, objections to paying the whole sum specifically towards maintenance of forces in Germany. Payment of these costs, whether they are called 'extra costs' or by the former and to the Germans even less agreeable name of 'support costs,' is too reminiscent of the German post-war obligation to pay the costs of occupation. Moreover, last year Germany paid about £34,000,000 towards these costs. If the Federal Government had agreed to pay its whole contribution of £50,000,000 specifically towards the cost of maintenance, it could have been argued that the occupation system was being continued and, indeed, that its cost was rising.

"At the German request it was agreed that only £17,000,000 of the total £50,000,000 should be given towards cost of maintenance. The remaining £33,000,000 is given as mutual defence aid, such as any NATO ally may give to another, to even out the defence burden. It was fair that Germany should contribute a sum to Britain on this account, as Germany, by delaying the build-up of her own contingent, has saved herself a large part of her own defence costs."

The negotiations on the payment of German support costs to the other Western Powers maintaining forces in the Federal Republic were concluded on June 5, when agreements were signed with Belgium, Denmark, France, the Netherlands, the U.K., and the U.S.A. It was announced that total support costs in 1957-58 would amount to 1,198,600,000 DM., of which 588,000,000 DM. would be payable to Great Britain under the earlier agreement; 325,000,000 DM. to the U.S.A.; 225,000,000 DM. to France; 59,000,000 DM. to Belgium; 1,200,000 DM. to Denmark; and 400,000 DM. to the Netherlands. The payments to the U.S.A. and Belgium were half those made in the previous year (1956-57), and those to Denmark and the Netherlands slightly more than one-half.

It was announced in Bonn and Washington on June 14 that the U.S. Government, in accepting the abovementioned amount, had reserved the right to request a supplementary contribution during the last quarter of 1957 on the basis of Article 3 of the North Atlantic Treaty. In a Note exchange with the German Federal Government, the U.S. Ambassador in Bonn (Mr. David Bruce) pointed out that the amount of 325,000,000 DM. represented only a fraction of the additional expenditure incurred by the stationing of American troops in Western Germany and "a still less important fraction" of the total defence expenditure borne by the American taxpayers. The German Federal Government agreed that the present payment to the U.S.A. would "not prejudice a later voluntary contribution," and that the question could be re-examined in due course if the U.S. Government desired.

Anglo-German Defence Talks.

The German Defence Minister, Herr Strauss, visited London on May 23-24 for discussions with Mr. Duncan Sandys, the British Defence Minister. Mr. Aubrey Jones, U.K. Minister of Supply, took part in some of the talks, as well as General Heusinger (Inspector-General of the West German armed forces) Field-Marshal Sir Gerald Templer (Chief of the Imperial General Staff), Sir Dermot Boyle (Chief of Air Staff), and senior officials of the U.K. Ministries of Defence and Supply.

An official statement on the talks between Mr. Sandys and Herr Strauss was issued on May 24, as follows:

"In the course of their discussions the two Ministers reviewed a number of problems of special importance to the security of Europe. They found themselves in full agreement on the principles of collective defence, the central aim of which is, and remains, the prevention of war. They agreed that, pending the conclusion of a satisfactory disarmament agreement, this purpose can be achieved only through the deterrent power of the strategic weapons which are possessed by the United States and the United Kingdom, and by the maintenance of strong shield forces on the Continent of Europe.

"Herr Strauss emphasized the importance to the Federal Republic of these shield forces. Mr. Sandys made it clear that it was the firm intention of the British Government to continue to make a substantial contribution to these shield forces, in addition to making a British contribution to the strategic deterrent. The two Ministers expressed the conviction that close and friendly co-operation between Great Britain and Germany within the framework of NATO and the Western European Union constituted an important element in the collective defence of Europe.

"The two Ministers were joined for part of the discussions by the British Minister of Supply, Mr. Aubrey Jones. The Ministers considered how, in the interests of greater efficiency and economy, closer

co-operation between the two countries could be achieved in the sphere of defence research and development. They set up a joint committee of officials to determine the particular fields of activity in which such co-operation could be most fruitfully developed, within the framework of W.E.U."

In a press statement in London, Herr Strauss said that he had discussed with Mr. Sandys the political, military and other arguments that had led to the British White Paper on Defence, in order to see if the conclusions drawn by the British Government had "consequences for our plans in establishing the German forces."

After stressing that there was no difference of opinion on the need for collective defence, Herr Strauss said that the German Government agreed that the strategic deterrent was an "absolutely vital part of the whole defence system" and "should remain in the hands of the United States, for the major part, and of the United Kingdom" As regards "the other part" of the defence system—the field forces—both sides had agreed that the views of the Supreme Commander should be accepted.

Herr Strauss added that the chances of disarmament had also been discussed; that the German Government were ready to do all in their power to contribute to a disarmament agreement; but that this must provide effective controls in all fields, nuclear and otherwise. The German Government took the view that the production of atomic weapons should not be extended to other countries because the problem of control would become more and more difficult. This meant that the German Government would "stick to its obligation" to take no steps in the direction of German production of atomic weapons.

As regards defence research and development, Herr Strauss said that because of the vast cost "we thought that we could concentrate our efforts, rationalize our means, and distribute our tasks." The agreement did not, however, extend to production. Referring in this connexion to the recent Franco-German agreement on joint defence research and development [see below], Herr Strauss said that the bilateral exchanges between the British and Germans and the Germans and French might become trilateral for some questions.

After referring to the "mutually confident atmosphere" of the talks, Herr Strauss said he was "fully satisfied that a common line of defence had been found" and that there was "no reason for any distrust on any side."

Other NATO Developments.

Other important recent developments concerning NATO are summarized below under cross-headings:

Infrastructure Programme.

Plans for the further development of the NATO infrastructure over the period 1957-60 were announced on March 26. The new programme, involving expenditure of £225,000,000, will cover the construction of additional airfields, fuel pipeline systems and fuel storage facilities, and the completion of the naval bases programme. It will also provide for the incorporation of the newest technical developments in the NATO telecommunications system (e.g. communications by tropospheric and ionospheric "forward scatter" systems), and for an early warning radar network.

German Divisions under NATO Command.

The first three of the 12 projected West German divisions were officially placed under the command of the Supreme Allied Commander on July 5 at a ceremony at Marburg in the presence of General Norstad, General Valluy (C.-in-C., Allied Forces, Central Europe), Lt.-General Speidel (Commander of Allied Land Forces, Central Europe), and General Heusinger (Inspector-General of the *Bundeswehr*). The three divisions are of the Panzer Grenadier type, equipped with light armour.

The first operational unit of the new *Luftwaffe*, a transport squadron equipped with French aircraft, was made available to NATO on Aug. 24.

"Pentomic" Reorganization of U.S. Forces in Europe.

It was announced on March 14 that the 11th U.S. Airborne Division stationed at Augsburg (Bavaria) was being reorganized for atomic warfare on so-called "pentomic" lines. [The term "pentomic" is used to describe a division consisting of five combat groups, instead of the usual three, equipped with atomic weapons.] The division would be equipped with a battery of *Honest John* rockets and five batteries of 105 mm. howitzers, and its strength would be reduced from about 17,000 to 11,500 men. The West German Defence Ministry officially confirmed on March 15 that atomic warheads for use by the U.S. forces were stored in Germany, but emphasized that atomic ammunition could not be used without the prior approval of the North Atlantic Council.

U.S. Supply of Guided Missiles to NATO Allies.

The North Atlantic Council announced on April 12 that it had been informed by the U.S. Government that the United States was preparing to supply its NATO allies with guided missiles under the U.S. mutual aid programme for the fiscal year 1956-57. The weapons, comprising *Honest Johns* and *Matador* ground-to-ground missiles and the *Nike* ground-to-air missile, would be provided "in accordance with NATO military priorities, with the wholly defensive purpose of protecting military and population centres and to deter, and if need be to repel, aggression"

The U.S. representative had informed the Council that these defensive weapons had been tentatively allocated to certain NATO countries, based upon the guidance of the NATO military authorities; the final allocation scheme, however, was dependent on discussions "on measures necessary to the satisfactory absorption of the weapons in the recipient countries' forces." The statement recalled that U.S. law did not permit transfers or sales of nuclear components for weapons, but it was pointed out in the Press that the weapons to be supplied could be used with either atomic or conventional warheads [The delivery of U.S guided missiles to Britain had already been discussed at the Bermuda Conference between President Eisenhower and Mr. Macmillan.]

Danish and Norwegian Acceptance of Guided Missile Supplies.

The Norwegian Minister of Defence (Hr. Handal) told the *Storting* on June 6 that the Norwegian Government had accepted the U.S. offer to supply guided missiles for Norwegian defence, covering the supply of material for one *Honest John* battalion and one *Nike Ajax* battalion. He pointed out that only projectiles with ordinary explosives could be used in the *Nike Ajax*, whilst both conventional and atomic warheads could be used in the *Honest John* missile. "As far as we are concerned," he added, "the offer only means a replacement of our old artillery. We ourselves cannot produce atomic missiles. We have not asked for them and they have not been offered to us."

Dr Lange (the Norwegian Foreign Minister) said during the same debate that no Government could sentence the youth of its country to defend itself with old and out-of-date arms if the disaster of war should happen, and that rocket missiles were necessary for adequate defence. He added that "according to American law atomic arms cannot be offered to Norway, but if in the future it should become necessary to supply the Norwegian forces with atomic arms to bring her defence up to the level of that of the attackers, it would be a question which would have to be decided by Parliament."

The Danish Defence Minister (Hr. Poul Hansen) announced in the *Folketing* on June 19 that Denmark had similarly accepted the U.S. offer of the free delivery of rocket weapons of the *Honest John* and *Nike* types. He emphasized that there had been no offer of atomic warheads.

Reorganization of Netherlands Army.

Plans for the reorganization of the Netherlands Army for atomic warfare were announced in The Hague on Feb. 5. Under the scheme, which had been approved by NATO, the number of divisions would be reduced from five to four, but instead of one active division there would be two, each equipped to use atomic weapons. The new divisions would have a strength of 15,100 men, compared with 18,000 at present, but the actual number of military personnel would not be affected. Each of the new divisions would have seven battalions capable of operating independently at a great distance from each other. There would be 11 tank battalions with about 600 heavy tanks.

Mr. Staf, the Netherlands Defence Minister, stated on July 11 that the Netherlands could not follow Belgium's example in reducing the military service period from 18 months to 15 months. Theoretically, it would be possible to reduce the period to 16 months if 7,000 regulars could be found, but in spite of recruiting campaigns regulars were not coming forward in sufficient numbers.

New NATO Naval Command.

A new NATO naval command, the North Sea Sub-Area, came into being on April 1 with headquarters at Cuxhaven. It was announced that the new command would be headed by Captain Karl Zenker, of the Federal German Navy; that it would have charge of two German minesweeper squadrons; and that it would come under the C.-in-C., Allied Naval Forces, Central European Command (Vice-Admiral Bos, of the Royal Netherlands Navy).

Strengthening of Canadian Armoured Forces in Europe.

Mr. Ralph Campney, then Canadian Defence Minister, announced on April 17 that the 2nd Canadian Infantry Brigade at present stationed in Western Germany would be replaced in the autumn by the 4th Infantry Brigade, whose component of armour would be increased from the present strength of a squadron to that of a full regiment.

Supply of Canadian Fighters to Belgium.

Mr. Howard Green, the new Canadian Minister of Defence Production, announced on June 27 (i) that arrangements had been completed with the U S. Defence Department under which Canada would participate, through her mutual aid programme, in the supply by the U.S.A. of Canadian-produced CF-100 all-weather jet-fighters to Belgium; (ii) that Canada's share would include the provision of spare parts and engines, as well as ground support, test and training equipment, and training for pilots; (iii) that deliveries of aircraft and equipment would commence in 1957 and be completed by the end of 1958; and (iv) that the total cost of the programme was expected to be about $43,000,000, of which Canada's share under mutual aid would be 25 per cent.

British Aircraft Carrier Catapult adopted by France and Holland.

It was reported on December 28, 1956, that the steam catapult designed and developed in Britain and used operationally in some British and U S. aircraft carriers had been adopted by the Royal Netherlands Navy and the French Navy and would be incorporated in the Netherlands carrier *Karel Doorman* and the French carrier *Clémenceau* [the latter is still under construction]. It was stated that the U.S. Government had acquired the right to manufacture these catapults and that a number of U.S. carriers, including the 70,000-ton *Forrestal*, were being equipped with them.

Anglo-French Collaboration in Defence Research and Production.

M. Bourgès-Maunoury, then Minister of National Defence, visited London on Feb. 14-15 for discussions with the British Defence Minister (Mr. Sandys) on closer Franco-British collaboration in the sphere of defence production. A statement issued after the talks said that "M. Bourgès-Maunoury put forward certain proposals for closer collaboration on defence between Britain and France within the framework of the Western European Union, with particular reference to research and production. It was decided that these proposals should be examined by representatives of the two Governments, after which it is likely that Mr. Sandys will pay a return visit to Paris to continue the discussions."

In a press statement on his return from London, M. Bourgès-Maunoury said that the proposed co-operation would involve the exchange of information and possibly joint manufacturing plans. He added that France would be able to help Britain in certain fields in which she [France] held the lead, notably light tanks, guided anti-tank missiles, support aircraft, and electrical equipment.

Franco-German Agreement on Missile Research.

Plans for joint Franco-German research on guided missiles were announced on Jan. 17 after a visit by the French and German Federal Defence Ministers (M. Bourgès-Maunoury and Dr. Preuss) to the French rocket ranges at Colomb-Béchar, in the Sahara. It was stated that the two countries would share some of their research and discoveries in accordance with the provisions of the treaties [NATO and W.E.U.] to which they were parties.

Franco-U.S. Agreement on Defence Inventions.

An agreement providing for the exchange of technical information on defence matters was signed in Paris by the U.S. and French Governments on March 12. It was similar to those concluded by the U.S.A. with other NATO countries, e.g. the U.K., Western Germany, and Italy, and covered *inter alia* the exchange of information on defence inventions, with full protection of patents and other proprietary rights.

U.S. Warships loaned to Greece.

Admiral Burke, U.S. Chief of Naval Operations, stated on July 1, after a three-day visit to Athens, that Greece would receive from the U.S.A. in 1957 and early in 1958 two submarines, two destroyers, and several smaller naval craft on loan.

Dismantling of Leros Defences.

It was announced in Athens on June 4 that the Royal Hellenic Navy was dismantling the modern military installations which had recently been built on Leros Island (in the Dodecanese) by a decision of the North Atlantic Council under the NATO infrastructure programme. It was explained that the NATO Council had subsequently asked Greece not to use Leros as a base in peacetime, having endorsed the Turkish Government's view that the manning of military installations on Leros contravened the Italian Peace Treaty of 1947, which provided that the Dodecanese islands should remain unfortified. The Greek Government had not opposed the Turkish objections so as to show its willingness to abstain from any military measures which the Turkish Government might regard as prejudicial to Turkish security.

NATO Military Appointments.—New Commanders-in-Chief for Allied Land Forces, Southern Europe, Allied Naval Forces, Northern Europe, and Allied Forces, Mediterranean.

The following appointments were announced during the period under review :

Southern European Command SHAPE announced on April 23 that Lieut.-General Alessandro Albert (Italy) had been appointed C.-in-C. Allied Land Forces, Southern Europe, with effect from June 1, in succession to General Primieri (retiring). General Albert had been Commander of the Italian Third Army.

The appointment of Major-General Brooke Allen (U.S.A.) as Commander of the 6th Tactical Air Force, *vice* Major-General Grussendorf was announced on April 10.

Northern European Command. It was announced on Feb. 5 that Vice-Admiral A. R. Podder (U.K.) would succeed Vice-Admiral Gladstone as C.-in-C. Allied Naval Forces, Northern Europe, in June 1957.

Naval Commands. Admiral Sir Ralph Edwards (U.K.) assumed the post of C.-in-C. Allied Forces, Mediterranean on April 11; he succeeded Vice-Admiral Glover (U.S.A.).

In connexion with the appointment of Sir Guy Grantham as C.-in-C., Home Fleet (Portsmouth), in succession to Admiral of the Fleet Sir George Creasy [see 15619 A], it was announced that Admiral Grantham would also be Allied C.-in-C., Channel and Southern North Sea, with effect from May 1957.

It had been announced on Aug. 1, 1956, that the Supreme Commander had appointed Admiral Sala (France) as Deputy Naval Commander at SHAPE in succession to Admiral Lemonnier (retiring). Admiral Sala was French Naval C.-in-C. in the Mediterranean and Commander of Allied Naval Forces in the Western Mediterranean from 1951-56.

North Atlantic Council Appointments.

Sir Frank Roberts, formerly H.M. Ambassador in Belgrade, was appointed British representative on the North Atlantic Council *vice* Sir Christopher Steel [see 15453 A].

Mr. W. Randolph Burgess (48) was nominated by President Eisenhower on June 26, 1957, as permanent U.S. representative on the North Atlantic Council in succession to Mr. George W. Perkins. Mr. Burgess, a former New York banker, had recently been Under-Secretary of the Treasury.

It was announced in Paris on Aug. 2, 1957, that M. de Crouy-Chanel (52) had been appointed permanent French representative on the North Atlantic Council in succession to M. Parodi. M. de Crouy-Chanel had been Director-General at the *Quai d'Orsay*, and previously Minister at the French Embassy in London.

Dr. van Kleffens had been appointed Netherlands permanent representative to NATO on Nov. 8, 1956, in succession to Jonkheer A. W. L. Tjarda van Starkenborgh Stachouwer. Dr. van Kleffens, formerly Foreign Minister and subsequently Ambassador to the U.S.A., had been Minister to Portugal since 1950. He was President of the U.N. General Assembly in 1954-55.

U.S. Support for Entry of Spain into NATO. - Norwegian Opposition.

The U.S. House of Representatives passed a resolution on March 20, 1957, urging the admission of Spain to NATO. A similar resolution had been passed by the House on July 14, 1955.

The Norwegian Foreign Minister (Dr. Lange) was asked in a press interview on April 16 about the question of Spain's possible membership of NATO. His reply was reported to have been as follows : "The Foreign Minister made it clear that Norway's attitude to the question had not changed and that a Norwegian veto was to be expected if Spanish membership should be suggested by any country – whether it should be the U.S.A. or any other member-country – at the next meeting of the Council in Bonn."

This statement led to representations by the Spanish Government, which described Dr. Lange's purported statement as "unnecessary" and "unfriendly," particularly in view of the fact that Spain had not sought to become a member of NATO.

In reply to the Spanish protest, the Norwegian Foreign Ministry pointed out on April 25 that the statement had been made in answer to questions put to Dr. Lange, "presumably as a result of an earlier press report from Washington, which said that it would depend upon Norway whether or not Spain would be accepted as a member of NATO." Asked whether Norway would in fact veto Spanish membership if it should be raised in the North Atlantic Council, Dr. Lange had answered : "There is no indication that the question will be raised at the Council's meeting. Norway's view has already been made known in recent official statements by the Prime Minister [Hr. Gerhardsen] and myself."

The Norwegian reply also said that the Norwegian Government's attitude in this matter was based on the view held by it, with the full support of the *Storting* and of Norwegian public opinion, as to the actual character of NATO co-operation. The Government regarded this co-operation not only as a military alliance but also as a broad political co-operation, and considered it to be "of particular importance that the democratic aims expressed in the North Atlantic Treaty must form the basis for the Organization's work."

NATO Statement on Soviet Naval Strength.

In a paper drawn up by the staff of the NATO Supreme Allied Commander, Atlantic (Admiral Jerauld Wright) and published on April 15, it was stated that the Soviet Navy possessed over 250 long-range submarines and an additional 200 coastal submarines, supported by a surface fleet "which continues to expand" -consisting of some 25 modern cruisers and about 200 destroyers and escort vessels.

The paper said that these large naval forces were greatly in excess of Soviet defensive needs and that their primary purpose was to destroy the commerce and sea communications of the free world in the event of war, in an attempt to cut off the European members of NATO from outside help or supplies. In response to this challenge, Admiral Wright and his staff had evolved plans which could be summed up in the words "to strike and simultaneously to defend." The overall strategy for the defence of the Atlantic would consist of : (1) The Allied Atlantic Command projecting its atomic nuclear capabilities against enemy airfields and naval bases; (2) denying the Atlantic to the Soviets as far forward as possible; (3) protecting the transatlantic sea lines of communication.

To carry out this strategy, Admiral Wright would make use of the striking fleet assigned to him by the eight nations Canada, Denmark, France, the Netherlands, Norway, Portugal, the U.K., and the U.S.A.—bordering on the Atlantic. This striking fleet would be built round the attack aircraft carrier and would constitute "a mobile, elusive airfield complex at sea," geared for atomic war. The striking fleet would be "mobile, flexible, and to a great degree self-sustaining." Because it would always be moving, it would not be subject to pin-pointing for guided missile attack like stationary or geographically fixed targets ashore. "It would project its atomic offensive power right into the heart of enemy naval bases and airfields," and in doing so would supplement the efforts of NATO's land-based atomic air force.

The defensive aspect would consist of finding and destroying enemy submarines. The "backbone" for this task would be the anti-submarine carrier, co-ordinating its operations with escorts, destroyers, and carrier aircraft. Shipping in the Atlantic would be defended by long-range shore-based patrol aircraft and carrier planes, searching large ocean areas not covered by other forces.

At a press conference on the same day, Admiral Wright defined the three tasks of NATO as the defence of Europe, the defence of North America, and the defence of the Atlantic, all of which were of equal importance.

[Note.—In addition to the categories mentioned by Admiral Wright, the Soviet Navy possesses three old battleships of 23,000 tons, all launched before the First World War—the *Oktiabrskaya Revolutsia*, *Sevastopol*, and *Novorossiusk* (ex-Italian *Giulio Cesare*), the last-named having been ceded to Russia under the Italian Peace Treaty. The cruisers, of modern design, comprise 15 of 12,800 tons (the *Rurik*, *Alexander Nevsky*, etc.), 4 of 11,500 tons (*Chapayev* class) and 6 of 8,800 tons (*Maxim Gorki* class). The Soviet Navy also possesses the ex-German cruiser *Nürnberg* (renamed *Admiral Makarov*) and the ex-Italian cruiser *Emanuele Filiberto Duca d'Aosta* (renamed *Stalingrad*), both of 9,000 tons. As stated by Admiral Wright, there are no aircraft carriers.]

M. Spaak succeeds Lord Ismay as Secretary-General of NATO.

Lord Ismay, the first Secretary-General of NATO, retired on May 14, having held the post for over five years. M. Paul-Henri Spaak, the former Belgian Foreign Minister, officially assumed his duties as Lord Ismay's successor on May 16.

A. FRANCE - UNITED KINGDOM. — Revival of Channel Tunnel Project.

The Channel Tunnel project, which had been dormant for very many years, was revived during the spring of 1957, when it was agreed that a joint study should be set on foot by four interested bodies—the British Channel Tunnel Company, the French Channel Tunnel Company, the Suez Canal Company, and a private American company.

The director-general of the Suez Canal Company, M. Georges-Picot, announced on April 25 that his company had decided to make a technical study of the Channel Tunnel project—the announcement being made after M. Georges-Picot had visited London for discussions with Mr. Leo d'Erlanger (the banker), chairman of the [British] Channel Tunnel Company. In the same month a company—Technical Studies Inc.—was formed in New York by Comte Arnaud de Vitry (a French citizen) and Mr. Frank P. Davidson (a U.S. lawyer) with the object of promoting the construction of a Channel Tunnel and financing it from private, including dollar, sources.

The new plans for building a tunnel under the Straits of Dover were described by Mr. d'Erlanger at the 76th annual general meeting of the Channel Tunnel Co. Ltd., held in London on May 6.

Mr. d'Erlanger informed the meeting that conversations had taken place between the Suez Canal Company and the Channel Tunnel Company "with a view to the former taking a leading part in a thorough investigation of the subject." He added that "the advent of the Suez Canal Company is highly significant and will be of the greatest help towards the objective, especially if it is going to be achieved by private enterprise."

After saying that the plan would be "essentially a joint Anglo-French effort," Mr. d'Erlanger explained that the present intention was to create a company or syndicate in which the Suez Canal Company would have "a very substantial interest" and in which the Channel Tunnel Co. Ltd. proposed to reserve 20 to 30 per cent for itself and other British interests. He added: "This participation would be matched, it is to be hoped, by French interests, room being left for American participation. The object of this study company is to marshal as many relevant economic and technical factors as possible, short of incurring the heavy expenditure entailed by a physical survey, with a view to assessing . . . the merits of the whole project."

Mr. d'Erlanger concluded: "It would seem that this old and hoary subject is at last emerging into something which has now to be considered seriously. This change has come about by reason of the fact that we in Britain, so far from considering a Channel tunnel to be a threat to our island to-day, are coming round to the view that our economic and military security will in the future depend upon closer integration with the Continent. We have husbanded the slender resources of your company over all these years against the time when something really useful could be done to promote the project for which it was founded. This would seem the moment, and these the circumstances, in which your company would be justified in expending some reasonable part of these resources to achieve its aim. At the same time we have to thank all those loyal friends, both in the Channel Tunnel Parliamentary Committee and elsewhere, for their altruistic efforts in keeping the idea of the tunnel alive and in interesting the British Government in allowing the project to proceed."

In reply to a shareholder who suggested that the Channel Tunnel would cost £100,000,000, Mr. d'Erlanger said that it was "almost heaven-sent that the Suez Canal Company, with its position and its money, should be wanting to parent the idea." He pointed out that as both British Railways (who are large shareholders in the Channel Tunnel Co.) and the French Railways were State-owned, the British and French Governments would necessarily "have much to say on the subject," particularly at a time when the implications of a European Common Market entailed a close study of means of transport between Britain and the Continent.

Mr. d'Erlanger explained that present plans were for three tunnels: twin railway tubes each about 17 feet wide, connected at intervals by passages, and a drainage tunnel seven to ten feet wide. The rail tunnels would run from a point just behind Folkestone, pass under the shore at Shakespeare Cliff, near Dover, cross under the French coastline at Sangatte, near Calais, and emerge at a point three miles north of Marquise, between Calais and Boulogne. The tunnel would be 36 miles long, of which 22 miles would be under the sea.

The Channel Tunnel Co. Ltd. was formed in 1881 and has at present 547 shareholders, some of whom (in the words of *The Times*) "have held shares with dogged optimism since the company was formed without ever receiving a dividend." Current assets of the company are £22,823, and fixed assets on experimental workings, etc., are just over £89,000. Whereas for many years past the annual general meetings of the company had been attended by barely half-a-dozen shareholders, over 100 were present at the meeting on May 6.

An agreement setting up a Channel Tunnel Study Group was signed at the Paris offices of the Suez Canal Company on July 26 by representatives of the interested British, French and American groups and the Suez Canal Company. The four parties to the agreement were: (1) a British group, under the aegis of the Channel Tunnel Co. Ltd., represented by Mr. Leo d'Erlanger, Mr. R. B. Valentine and Mr. R. J. Whitaker; (2) a French group represented by M Louis Armand, chairman of the French State Railways and president of the *Union Internationale des Chemins de Fer*, M. Jacques Getten, a director of the French Channel Tunnel Company (*Compagnie Française pour la construction du tunnel sous la Manche*) and M. de Wouters, president of the *Fédération Routière Internationale*; (3) the Suez Canal Company; and (4) the American company, Technical Studies Inc.

The Study Group will study the possibilities of road and rail tunnels under the Straits of Dover and will have a steering committee (meeting alternately in London and Paris) consisting of three representatives each from the first three groups and one American representative. The committee will also include two prominent personalities, one British and one French, to act as chairman at the meetings in London and Paris. [It was announced that M. René Massigli, the former Ambassador in London, had agreed to act as French chairman.] A Director of Technical Studies will be appointed in connexion with the project.

The Channel Tunnel Parliamentary Committee (whose chairman is Mr. William Teeling, Conservative M.P. for the Pavilion division of Brighton) met at the House of Commons on July 29 to discuss the latest developments in connexion with the Channel Tunnel project. Mr. W. R. Merton, a director of the Channel Tunnel Co. Ltd., informed the committee that the above-mentioned Study Group would take the form of an international syndicate in which the British Channel Tunnel Company, the French Channel Tunnel Company, and the Suez Canal Company would each contribute 30 per cent, and the American group the remaining 10 per cent. The amount already raised by the syndicate was £100,000.

M. Georges-Picot had previously addressed the Channel Tunnel Parliamentary Committee on May 28. He explained that the Study Group hoped to complete its survey within 18 months and would present the results of its work to the British and French Governments.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times)

B. GHANA. — Creation of Ministry of Information and Broadcasting. - Resignation of Mr. Casely-Hayford.

It was announced in Accra on July 30 that a Ministry of Information and Broadcasting had been set up under Mr. Kufi Baako, hitherto Minister without portfolio. The Ministry will be responsible for broadcasting, film censorship, information and newspaper services, and printing, and will have a film unit.

Mr. Casely-Hayford (also a Minister without portfolio, and a member of Dr. Nkrumah's Cabinet since 1951) resigned from the Government on July 27 but remained a member of Parliament. It was understood that he disagreed with Cabinet colleagues on a number of issues, including the decision to put the head of Dr. Nkrumah on new coinage. One of the most influential members of the Government, he had frequently presided over the Cabinet in the absence of Dr. Nkrumah.
(Times - Daily Telegraph) **(Prev. rep. 15072 A.)**

A. EGYPT. — General Elections.

The first general elections to take place in Egypt since the revolution of 1952 were held on July 3. As all political parties had previously been dissolved, there was no organized opposition among the 2,528 candidates contesting the 350 seats in the *Majlis al-Umma* (National Assembly).

A decree of May 18 had laid down that all candidates would have to file their nomination papers by May 28, and that nominations would then be approved by the executive committee of the "National Union" created under the Constitution of 1956 (see 14927 A). In most cases approval would be automatic for candidates who were over 30 and had paid a deposit of £E50, but candidates falling into the following categories would be eliminated: (1) those convicted by the Revolutionary Tribunal and anti-corruption courts (which tried "public enemies" in the early days of the revolutionary regime); (2) those liable to "administrative custody" under the Revolution Command Council's ruling of June 22, 1956 (administrative custody included arrest, house arrest, and police surveillance); (3) convicted criminals; (4) those dismissed from public office for lack of integrity, unless five years had elapsed since their dismissal.

On May 29 President Nasser appointed the executive committee of the National Union, consisting of himself as chairman and of Abdel Latif el-Boghdadi (Minister of Municipal and Rural Affairs); Zakari Mohieddin (Minister of the Interior); and General Abdel Hakim Amer (Minister of War and C.-in-C. of the Armed Forces). After scrutinizing the applications of candidates, the committee announced on June 17 that it had approved 1,318 nominees and rejected 1,210 as "undesirable" or "unworthy," including all the candidates presented in five constituencies.

Six million voters (including women, who voted for the first time) were registered under the new electoral law which made all Egyptian citizens over 18 eligible to vote. Failure to vote rendered a registered male citizen liable to a fine of £E1, but women were allowed to refrain from voting if they wished.

As a result of the elimination of many candidates, 62 were returned unopposed, of whom 16 were members of the Cabinet. They included Wing-Commander Ali Sabry, President Nasser's political adviser; Lieut.-Colonel Abdel Hatem, head of the Government Information Office; Lieut.-Colonel Anwar Sadat, secretary of the Islamic Congress and managing editor of the Government newspaper *Al Goumhouria*; and Major Khaled Mohieddin, editor of the evening newspaper *Al Massaa*.

Polling was heavy in the remaining constituencies, especially in Cairo. Electoral disturbances occurred at several places, 80 people being arrested at Disna and 16 people being killed and many others injured at the village of Yesmina, in southern Egypt.

It was announced after the elections that only about 100 candidates had been returned with the required absolute majority, whilst the vote in the remaining constituencies (about 170) had been split among several candidates. A second ballot was therefore held on July 14 for these seats, each being contested by the two candidates who had obtained the highest number of votes in the first ballot. Two women —Miss Rawya Attiya, of Cairo, and Mrs. Amina Shoukri, of Alexandria —were among those returned in the second ballot, being the first women ever elected to any Arab Parliament.

The new Assembly met for the first time on July 22, electing Abdel Latif el-Boghdadi as its Speaker. Mr. Boghdadi relinquished his former portfolio of Rural and Municipal Affairs on taking up his new post.

In his inaugural speech to the Assembly, President Nasser accused the Western Powers of having wished to "strangle Egypt economically" by laying down "conditions" for economic and defence aid. He alleged in this connexion that America had demanded that Egypt should adhere to "imperialist regional alliances" as a condition of receiving defence aid from the United States, and that Britain had interrupted arms deliveries to Egypt "because we refused to adopt a pro-British attitude at the Bandung Conference." He went on to attack Israel as a "bridgehead of imperialist expansion in the heart of the Arab world," and expressed Egypt's support for the Algerian people in their "struggle for independence."

President Nasser said that the rapid growth of the population and rising unemployment "make it imperative that we should develop our economy rapidly." The Government would accordingly proceed with the first phase of the Aswan Dam project, to be carried out over five years at a cost of £E.60,000,000, of which £E.28,000,000 would be obtained from foreign sources. Referring to the withdrawal of projected U.S. and British aid for the Aswan Dam project, President Nasser said that the Western Powers had "imposed conditions for their assistance" and that Egypt had "refused such sordid bargains and nationalized the Suez Canal Company."

Reiterating his allegations that the Western Powers had sought to "strangle" Egypt by withholding economic aid, President Nasser said that the failure of this "Operation Famine" had "driven the imperialists to the last resort violence." He added: "The mad adventure of last autumn was the last imbecility in the sombre annals of colonialism. The imperialists have played their last card, and nothing more remains to them but spite and hate . . ."

In the course of his speech President Nasser said that Egypt continued to "adhere totally" to the "Bandung principles," to world peace, and to "a peaceful settlement of the Palestine problem conforming to the rights of the Arab peoples." Reviewing internal conditions since the establishment of the Republic, he admitted that "we have made certain mistakes . . . gone too far and lacked experience." Nevertheless, "we have learned from our mistakes and that is the essential thing."

Wing-Commander Ali Sabry was appointed on Aug. 2 to the post of Minister of State for Presidential Affairs. One of President Nasser's closest associates, he had been head of the Presidential Political Affairs Department for most of the period since the deposition of King Farouk. (Le Monde, Paris - Times - Daily Telegraph - Manchester Guardian - New York Times) **(Prev. rep. Presidential Election, 14953 A; New Constitution, 14927 A.)**

B. UNITED KINGDOM. — Retail and Wholesale Price Indices. - Movements in 1956 and First Half of 1957.

A survey of the Board of Trade's retail price index for "all items," covering the 18-month period to June 1957 and taking the level in January 1956 as 100, showed that the index stood at 101 in March 1956, rose to 103 in April and May, but fell to 102 in June, remaining at that level until September, and standing at 103 from October to December 1956. From January 1957 to April it was 104, in May 105, and in June it rose further to 106. Movements in the retail price index since October 1956 were as follows:

The retail price index rose from 102.7 in October 1956 to 103.1 on Nov. 13, the rise being due principally to increases in the price of eggs and to a seasonal rise in the average price of household coal. On Dec. 11 the index had risen to 103.4 despite a reduction in food prices, owing to increases in the price of petrol, paraffin, and National Health prescriptions.

During the first half of 1957 the index registered further upward movements. At Jan. 15 it stood at 104.4, largely due to higher food prices and fares. It fell to 104.3 on Feb. 12 and to 104.1 on March 12, but rose to just under 104.5 on April 16 because of increases in local rates in most areas in England and Wales, although the petrol duty had been reduced. The figure for May was 104.6 and for June 18 105.7, the increase being due mainly to rises in the average prices of potatoes, bacon, eggs, and tomatoes.

The basic materials index for November-December, 1956 (June 30, 1949=100) showed a marked rise, standing at 160 in November and at 161.6 in December (the highest point since May 1952). The rise was mainly due to increases in the prices of rubber and wool after the closing of the Suez Canal.

In the first six months of 1957 the basic materials index declined, standing at 160.8 in January and 159.6 in February, owing to lower prices for rubber and copper. In March it fell further to 158.7, rose in April to 160 because of higher prices for raw wool, raw rubber, and copper, but declined in May to 159.8 and in June to 155.8, due to lower commodity prices except for wool.—(Board of Trade Journal - Financial Times) **(Prev. rep. 15236 B.)**

C. ISRAEL. — New Seaport planned at Ashdod.

Plans by private American and Israeli promoters to build a new seaport at Ashdod, 20 miles south of Tel-Aviv, were announced in the latter city on Aug. 4. It is proposed to build the new city on the site of the biblical city of Ashdod, the promoters having received a concession from the Israeli Government for this purpose.

The project is designed to give Israel a second major shipping outlet to supplement Haifa in the north. It will be carried out in stages over the next ten years at a total estimated cost of $500,000,000, a population of 150,000 being envisaged for the new city when completed. The promoters of the project are Mr. Philip M. Klutznick, founder of the Chicago suburb of Forest Park and president of the Jewish ex-servicemen's organization in the United States, and Mr. Oved Ben-Ami, founder and mayor of Nathanya, an Israeli coastal resort with a present population of 40,000.

The new city will be built on a 10,000-acre site (at present covered by sand dunes) under a master-plan drafted by two Tel-Aviv architects. The plan envisages a commercial and business centre covering 175 acres, the remainder being utilized for general and light industries, port facilities and warehousing, three parks covering 500 acres, a sports arena and other recreational facilities, and residential areas.—(New York Times)

A. YUGOSLAVIA - SOVIET UNION. — Deterioration of Soviet-Yugoslav Relations after Hungarian Uprising. - Subsequent Yugoslav Initiative for Détente between Yugoslavia and U.S.S.R. - Statements by President Tito and M. Rankovich. - Discussions between Yugoslav and Soviet Leaders in Rumania.

Relations between Yugoslavia on the one hand and the Soviet Union and its "satellites" on the other, which had greatly improved during the autumn of 1956, again deteriorated following the Hungarian uprising. Strong exception was taken in the Soviet Press to the views on developments in Hungary expressed by President Tito in his Pula speech (see 15258 A), and by M. Kardelj (a vice-president of the Federal Executive Council) in a speech to the Yugoslav National Assembly on Dec. 7. In the latter speech M. Kardelj rejected the Soviet claim that an attempt at counter-revolution had taken place in Hungary; suggested that the basic cause of the uprising was a political system which had prevented the mass of the people from exerting a direct influence upon the authorities and had strengthened bureaucratic elements in the Communist Party and the State; and maintained that the Hungarians, in seeking to defend previous Socialist gains by creating workers' councils, had acted in a Socialist spirit. M. Kardelj was violently attacked on Dec. 18 by *Pravda*, which accused him of "revisionism" and declared that Yugoslav invitations to Hungary to follow her example constituted "interference in Hungary's internal affairs." In reply, the Yugoslav official newspaper *Borba* accused *Pravda* of reverting to "methods which Yugoslavs hoped, and still hope, would disappear," and declared that "methods of slander cannot serve the interests of the workers' movement."

M. Popovich, the Yugoslav Foreign Minister, told the National Assembly on Feb. 26, 1957, that economic as well as ideological difficulties had recently appeared in Yugoslavia's relations with the Soviet Union. "Unexpected difficulties" had been encountered by a Yugoslav trade delegation during negotiations in Moscow, and the Soviet Government had proposed to postpone the granting of a credit which it had undertaken to provide for building an aluminium factory (see 15035 B) "to such a period as is unacceptable to us." Quoting Marshal Bulganin's letter to Dr. Adenauer [see 15370 A], in which the Soviet Premier had suggested the early restoration of good relations between the U.S.S.R. and Western Germany despite the differences between them, M. Popovich said that "we should be satisfied if such a standard were also applied to us and our policy"; instead, however, the Soviet Union and some other East European countries had conducted a campaign against Yugoslavia "to compromise our State and social system, isolate our country, and discredit our policy." The essence of the dispute lay in differing views on Yugoslavia's relations with the "Socialist camp" and on who should be at the head of it. M. Popovich emphasized that Yugoslavia did not want to enter this "camp," and that the Yugoslav Government stood by the views which it had expressed on the events in Hungary.

In addition to a concerted and bitter campaign against Yugoslavia in the Soviet press and radio, strong anti-Yugoslav statements also appeared in certain Soviet-bloc countries, notably Czechoslovakia, Eastern Germany, and Albania. Moreover, Yugoslavia's attitude towards the Hungarian question was strongly criticized on March 28 by Marshal Bulganin and M. Kadar during the latter's visit to Moscow [see page 15564]. Addressing a public meeting in the Kremlin, Marshal Bulganin said that the Yugoslavia's appraisal of events in Hungary "does not in essence differ from the imperialists"; that the Yugoslav Government had "shut its eyes to the Fascist terror" and supported M. Nagy; and that it was "not by chance that Nagy and his group took refuge in the Yugoslav Embassy." M. Kadar in his speech accused M. Kardelj and M. Popovich of maintaining "an attitude analogous to that of Dulles and the 'Voice of America.'"

Both President Tito and M. Rankovich (a vice-president of the Federal Executive Council, like M. Kardelj) reaffirmed the Yugoslav Government's policy on Hungary, and on its relations with the "Socialist camp," at a meeting on April 18.

President Tito said: "We have not joined any 'camp' because we do not wish to lose the role which Yugoslavia plays in the world, and which enables us to take an independent attitude in expressing our views on all questions of internal and external policy. That is what has annoyed our Soviet comrades so much. . . . The question is often raised here [in Yugoslavia] whether we can trust them any more, as we are now placed in an awkward position for the second time. I feel that it would be wrong to put matters in such a way. I think that the subjective element plays the main role in this; that is, the attitude of certain leaders who cannot rid themselves of old ideas on the relations between Socialist countries. Although they have to some extent modified the Stalinist tendencies in their policy, these tendencies are still deeply rooted in Soviet policy towards both Yugoslavia and other countries." Referring to the controversy over Hungary, he continued: "They [the Soviet leaders] persistently maintain that Yugoslavia bears a large part of the blame for the events in Hungary. There is not an atom of truth in this. On the contrary, it was we who worked against the possible evil consequences of the policy pursued by the Rakosi clique, and they themselves admitted to us that this policy had led to a very serious situation. But when tragic events occurred there, with consequences which did not fail to affect the Soviet Union's prestige, they wanted to shift the responsibility on to us. . . ."

M. Rankovich declared that "the events in Hungary were primarily a manifestation of the conflict between the progressive aspirations of the broadest strata of the Hungarian people, who were fighting for free Socialist development and respect for their national dignity, and the forces in Hungarian society which for years had resisted these tendencies and striven to foist an unacceptable way of life upon the Hungarian working people. This truth cannot be minimized by the fact that counter-revolutionary elements were active at the same time inside and outside Hungary, and attempted to profit by these events."

Nevertheless, a striking improvement in Soviet-Yugoslav relations occurred during May. President Tito disclosed in an interview with *Politika* on May 25 that the Yugoslav Government had taken the initiative in this matter; that they had felt that any further deterioration in relations with the East European countries was "unreasonable"; and that they wished "to co-operate in all matters in which this is possible without forsaking our positions of principle." "Looking at things in perspective," he said, "it is impossible for us today not to have good relations with other countries which are our neighbours." The Soviet leaders, he added, had responded by stopping their campaign against Yugoslavia, and had apparently "insisted that other countries should also treat Yugoslavia differently and give up their unprincipled attacks."

Two days later, however, President Tito made it clear that he desired good relations with "both camps." Friendship with the U.S.A., Britain and France, he emphasized, should not preclude a *rapprochement* with the Soviet Union, whilst the improvement of Yugoslavia's relations with her Eastern neighbours "should not weaken our ties with the West."

General Gosnjak, the Yugoslav Defence Minister, left Belgrade on June 7 for a 15-day visit to the Soviet Union at the invitation of the Soviet Defence Minister (Marshal Zhukov), accompanied by senior officers of the Yugoslav Army, Navy and Air Force. This was the first time that high-level military contacts had been established between the two countries since the "Cominform" breach in 1948. The visit was regarded as having political as well as military significance, since General Gosnjak is a member of the Executive Committee (the former Politburo) of the Yugoslav Communist Party, whilst Marshal Zhukov was at that time a candidate-member of the Presidium of the Soviet Communist Party.

Opening a congress of workers' councils in Belgrade on June 25, President Tito protested strongly against criticisms of Yugoslavia's internal system by other Communist parties. Although this speech was at first assumed to reflect a new deterioration in Soviet-Yugoslav relations, it was subsequently suggested, in the light of later developments in the U.S.S.R., that President Tito's purpose was to make clear Yugoslav support for M. Khrushchev against his opponents on the Central Committee of the Soviet Communist Party, which was then in session (see 15639 A).

President Tito spoke as follows: "When the apologists of a dogmatism of questionable origin dispute the value of our system of workers' management, calling it anarchy and the like, we have not the least need . . . to justify its correctness and effectiveness, since it has proved its worth in practice . . . We have no intention of imposing our system on anyone, but we must defend it against those who are blind and deaf to the facts." Denouncing "malicious" critics of Yugoslavia, he went on: "It is time to put an end to this, and for everyone to worry about himself in the first place—to let everyone build Socialism as he understands it and as his conditions permit. . . . It is impossible to speak of good and sincere relations between ourselves and some of the East European democracies if they merely pay lip-service to the improvement of relations with Yugoslavia, while telling their own party members and peoples that Yugoslavia is 'seething with revisionism,' that it is 'not Socialist,' that we 'co-operate with the imperialists' and so on. . . . We cannot be gulled with words which do not conform with practice."

Yugoslav spokesmen welcomed the expulsion from the Soviet Government and the Communist Party Central Committee of M. Molotov (who was accused of opposing the improvement of relations with Yugoslavia—see 15639 A), M. Malenkov, and M. Kaganovich, and the removal from the Central Committee of M. Shepilov, whose references to Yugoslavia in his speech of Feb. 12 (see 15370 A) had caused great offence in Belgrade. M. Rankovich commented that "this decision ensures a more resolute implementation of the line of the 20th Congress," and that "the removal of such men from leading positions in the party will be favourably reflected in relations between the Soviet Union and other countries."

Moscow radio announced on Aug. 3 that representatives of the Governments and Communist parties of Yugoslavia and the U.S.S.R. had met in Rumania on Aug. 1-2, the Yugoslav delegation having been led by President Tito, M. Kardelj, and M. Rankovich and the Soviet delegation by M. Khrushchev, M. Mikoyan, and M. Kuusinen. No indication had previously been given that such a meeting was to take place, complete secrecy was maintained during the discussions, and the meeting-place in Rumania was not disclosed.

An official announcement (Aug. 3) stated that, in addition to questions relating to the international situation and problems of the international workers' movement, the two delegations had discussed the relations between the Soviet Union and Yugoslavia and the activities of the two Communist parties. Both sides had reaffirmed their determination "to work for a further all-round development of relations and for the removal of obstacles hindering this development," and had confirmed their agreement on the main problems of the present world situation." The statement continued:

"The two delegations stressed the fact that relations between the U.S.S.R. and Yugoslavia would continue to develop on the basis of equality, mutual assistance and co-operation, respect for sovereignty, independence, and non-interference. The delegations reaffirmed the significance of the Belgrade and Moscow declarations for the development of friendly relations between the two countries and of co-operation between the Soviet Communist Party and the Yugoslav Communist Alliance on the basis of the principles of Marxism-Leninism, and expressed their readiness in the future to implement the principles laid down in these declarations."

The secret meeting of the Soviet and Yugoslav leaders followed a visit to the U.S.S.R. by M. Kardelj and M. Rankovich, who had left Belgrade on July 7 for a stay in the Crimea which was officially described as a "holiday," and who arrived on July 16 in Moscow for informal talks with a number of Soviet personalities. It was officially announced in Moscow on July 18 that MM. Kardelj and Rankovich had met the leaders of the Bulgarian and Albanian Communist parties (respectively M. Zhivkov and M. Hoxha) in the presence of M. Khrushchev and other members of the presidium of the Soviet Communist Party—this being the first occasion since the Cominform breach of 1948 that the Yugoslav leaders had accepted contacts jointly with Soviet and "satellite" Communist parties, to whom they had hitherto been most strongly opposed. The fact that the Yugoslavs agreed to such a meeting on Russian soil was regarded as a concession to M. Khrushchev's declared aim of drawing Yugoslavia closer to the "Socialist camp."

A. INTERNATIONAL COURT OF JUSTICE.—British Reservations on Acceptance of Compulsory Jurisdiction.

A White Paper was published in London on Aug. 23 setting out certain reservations made by the British Government to their acceptance of the compulsory jurisdiction of the International Court, and previously notified to the U.N. Secretary-General in a letter of April 18. The two reservations were as follows:—

(1) The British Government would no longer accept the Court's jurisdiction in disputes "relating to any question which, in the opinion of the Government of the United Kingdom, affects the national security of the U.K. or any of its dependent territories." The interpretation of the phrase "national security" would be a matter for H.M. Government and not for the International Court.

The Government would, however, accept international law as the arbiter of what fell within the jurisdiction of the United Kingdom, and thus outside the scope of the Court. [The French and U.S. Governments, on the other hand, claim the right to decide for themselves what falls within their own internal jurisdiction.]

(2) The second British reservation excepted from the Court's jurisdiction "disputes in respect of which any other party to the dispute has accepted the compulsory jurisdiction of the International Court of Justice only in relation to or for the purposes of the dispute; or where the acceptance of the Court's compulsory jurisdiction on behalf of any other party to the dispute was deposited or ratified less than 12 months prior to the filing of the application bringing the dispute before the Court."

[This reservation was meant to exclude the possibility of another Government accepting the Court's jurisdiction *ad hoc* when it thought it had a good case against the British Government, and then refusing to accept it when the British Government thought that they themselves had a good case.]

The White Paper mentioned that it had been objected in some quarters that the Government had failed to notify Parliament of these changes, thus infringing the "Ponsonby rule" requiring all treaties and foreign commitments to obtain parliamentary approval. The Government held, however, that it was not customary to submit this type of document to Parliament, since it was not a foreign commitment.
(Times - Manchester Guardian)

B. AUSTRALIA. — Labour Defeat in Queensland Elections. - Formation of Liberal-Country Party Ministry. - Mr. Nicklin becomes State Premier.

Mr. Vincent Gair, Premier of Queensland and leader of the Queensland Labour Party formed in opposition to the official Labour Party (see 15516 A), resigned on June 13 after his Government had been defeated in the State Parliament on the previous day by 49 votes to 25. The (official) Australian Labour Party joined with the Liberal and Country Party Opposition in opposing Mr. Gair's request for additional finance to enable the Government to meet commitments until the end of October.

The Administrator of Queensland (Chief Justice Mansfield) agreed to dissolve the State Parliament after Mr. Nicklin (leader of the Liberal-Country Party Opposition) and Mr. Duggan (leader of the official Labour Party) had informed him of their inability to form a stable Government owing to the lack of the necessary parliamentary majority. On June 25 Mr. Gair announced that State elections would be held on Aug. 3 - two years before they were normally due - to enable the new Parliament to assemble in time to pass a Supply Vote before present funds were exhausted.

The Queensland elections resulted in an overall majority for the Liberal and Country Party coalition and in a corresponding defeat for the Labour Party, which had been in power in the State for 25 years. Results were as follows, the figures in parentheses showing party strengths at the dissolution of the former Parliament: Liberal-Country Party 41 (24); Australian Labour Party 20 (24); Queensland Labour Party 11 (25); Independents 2 (2).

One result is outstanding, owing to the death of Mr. G. H. Devries (the former Minister for Mines) during the election. There were four unopposed returns (three Country Party and one Liberal), including that of Mr. Nicklin in the Landsborough constituency. Latest overall figures showed 282,357 votes for the Liberal-Country Party, 192,545 for the Australian Labour Party, 143,184 for the Queensland Labour Party, and 25,820 for Independent candidates. Mr. Gair, leader of the Q.L.P., retained his seat at South Brisbane, but Mr. J. E. Duggan (State leader of the A.L.P.) lost his seat at Toowoomba to the Liberal candidate (Alderman M. J. Anderson, mayor of Toowoomba). Among other A.L.P. candidates defeated was Mr. F. M. Forde, a former Prime Minister of Australia, who lost the Flinders seat to a Country Party candidate by only eight votes.

A new State Ministry was formed after the elections by Mr. Nicklin, leader of the Country Party and former Leader of the Opposition, and was sworn in on Aug. 12. It consisted of six Country Party and five Liberal Ministers, its membership being as follows:

Mr. G. F. R. Nicklin—Premier and Chief Secretary; Mr. K. J. Morris—Deputy Premier and Minister of Labour and Industry; Mr. J. C. A. Pizzey—Education; Mr. A. W. Munro—Attorney-General; Mr. T. A. Hiley—Treasurer and Minister for Housing; Mr. E. Evans - Development, Mines and Roads; Mr. A. G. Muller - Public Lands and Irrigation; Dr. H. W. Noble - Health and Home Affairs; Mr. O. O. Madsen - Agriculture and Stock; Mr. J. A. Heading—Works and Local Government; Mr. G. W. Chalk - Transport.

Mr. Nicklin (62), the first non-Labour Premier of Queensland for a quarter of a century, has been a member of the State Parliament since 1932 and Leader of the Opposition since 1941. A retired fruit farmer, he served with the Australian forces in France during the First World War and was mentioned in despatches. Mr. Morris, the Deputy Premier, is leader of the Liberal Party in Queensland.

Mr. L. Wood (member for North Toowoomba) was elected leader of the Australian Labour Party in Queensland and concurrently Leader of the Opposition in the new Parliament in succession to Mr. Duggan, who lost his seat as stated above.
(Queensland News Letter) **(Prev. rep. 15516 A.)**

C. SINGAPORE. — New Governor.

Mr. W. A. C. Goode, Chief Secretary in the Singapore Government, was appointed Governor of Singapore on Aug. 27 in succession to Sir Robert Black, consequent on the latter's appointment as Governor of Hong Kong (see 15078 C). The appointment is expected to take effect at the end of 1957.

The Times stated that Mr. Goode would "almost certainly" be the last British Governor of Singapore, as the constitutional agreement of April last (see 15557 A) provides that the office of Governor shall be abolished, and a Malayan-born person become Head of State, when Singapore achieves internal self-government at an unspecified date after Jan. 1, 1958.

Mr. Goode (50) joined the Malayan Civil Service in 1931 and was a district officer in Pahang before the war. He was held by the Japanese as a prisoner-of-war from 1942-45 and worked on the Burma-Siam railway.—(Times - Daily Telegraph)
(Prev. rep. 13959 D.)

AUGUST 31—SEPTEMBER 7, 1957

A. ARGENTINA. — Constituent Assembly Elections. - Majority for Radical Parties.

Argentina's first elections since the overthrow of the Peronista regime were held on July 28, under a decree which had been issued on April 12 by the Provisional Government of General Aramburu. The decree laid down (1) that a Constituent Assembly of 205 members would be elected by proportional representation; (2) that the Assembly would have the task of reforming the Constitution; (3) that it would begin its deliberations on Sept. 1 and finish them at latest by Nov. 14, 1957, to enable a writ to be issued for a general election in February 1958 (i.e. after the constitutional reforms had been adopted).

The decree gave powers to the Constituent Assembly to change 30 of the 110 Articles in the nation's original Constitution (the Constitution of 1853, which had been adopted in 1956 after the annulment of the Peronista Constitution of 1949). Specifically, the Assembly was asked to determine "whether it is necessary to modify the nation's electoral system; whether it is necessary to strengthen individual liberties and freedom of opinion, as well as other social and individual rights; and whether it is necessary to establish a greater balance among the powers exercised by the various branches of the Government."

The 205 seats in the Constituent Assembly were contested by 2,188 candidates representing over 50 registered parties, of whom, however, the great majority were small groups of little political significance. The most important parties were the Left-wing Radicals (*Unión Cívica Radical Intransigente*), led by Dr. Arturo Frondizi; the Moderate Radicals (*Unión Cívica Radical del Pueblo*), led by Dr. Ricardo Balbin and Dr. Zavala Ortiz; the Christian Democrats, a new Catholic party of moderate conservative tendencies; and the Socialist Party, led by Dr. Alfredo Palacios. Only three parties—the two Radical groups and the Christian Democrats—presented candidates in all 23 electoral districts (i.e. the 22 provinces and the Federal capital, Buenos Aires).

The electorate numbered 9,726,520, comprising 4,976,815 male and 4,749,705 female electors. Voting was compulsory except for invalids, persons over 70, and those living more than 100 kilometres (about 56 miles) from a polling station, abstentions being punishable by heavy fines except for persons in these three categories. To allow the political parties to organize their election campaigns, the Government lifted on June 28 the state of siege which had been in force since the overthrow of the Perón regime in September 1955. [The state of siege had officially prohibited meetings of more than two people, but this prohibition had in fact never been enforced.] At the same time President Aramburu announced that some 200 persons who had been held without trial for political or other reasons would be automatically released.

Although the proscribed Peronista party took no part in the election, ex-President Perón issued instructions from Caracas to his followers to repudiate what he described as "the dictatorship" by casting blank ballot-papers.

A number of bomb explosions, attributed by the Government to Peronista supporters, occurred in Buenos Aires and its suburbs during June and the first fortnight of July, the targets including public works, factories, railways and other utilities. The frequency and regularity of the attacks indicated that they were part of an organized plan and not sporadic outrages by individual Peronistas. Although a train was derailed and some small fires started, no serious casualties were caused, all the bombs being small and apparently home-made.

The Uruguayan Government announced on June 26 that it had documentary proof that ex-President Perón and his supporters were plotting both inside and outside Argentina to organize a revolution against the Argentine Government. The announcement said that 15 Argentine exiles had been interned, and that the seized material showed that ex-President Perón had been corresponding from Caracas with [Argentine] supporters in Montevideo.

Apart from the above-mentioned incidents, the election campaign took place in an orderly atmosphere and without disturbances. Official but provisional results issued on July 31 by the Ministry of the Interior showed the distribution of seats in the new Constituent Assembly as follows:

Moderate Radicals ..	76 seats
Left-wing Radicals ..	70 seats
Socialists	11 seats
Christian Democrats ..	9 seats
Democratic Party	9 seats
Progressive Democrats ..	6 seats
Federal Union (*Unión Federal*)	3 seats
*Other parties	15 seats

*Comprising two seats each for the Communists, Labour Party (*Partido Laborista*), Corrientes Liberals, Corrientes Conservatives, and San Juan Radicals, and one seat each for the Independent Civic Party (*Partido Cívico Independiente*), Workers' Party, Buenos Aires Conservatives, Chaco Conservatives, and Salta Labour Party.

The elections thus resulted in a victory for the moderate parties and, in particular, for the two Radical groups, whose combined strength exceeded that of all other parties in the Constituent Assembly. Moreover, they showed a majority for the parties advocating constitutional reform, which had been supported by the Moderate Radicals, the Socialists, the Christian Democrats, and a number of other parties and groups, mostly of the Centre and Left.

A tabulation by the Ministry of the Interior stated that the "majority" group in the Constituent Assembly (i.e. the parties favouring constitutional reform) would command 120 seats, including the Moderate Radicals, Socialists, Democrats and Christian Democrats, Progressive Democrats, and minor parties. The "minority" group (opposed to constitutional reform) was estimated to have 85 seats, comprising the Left-wing Radicals and various minor parties, including the *Unión Federal*. A majority of 35 was thus envisaged for the parties supporting constitutional reform.

The Moderate Radicals headed the national poll with 2,117,161 votes, while the Left-wing (Frondizi) Radicals polled 1,821,459 votes. The fact that the latter party obtained the same number of seats as the Moderate Radicals, although polling fewer votes, was attributable to the working of the proportional representation system, which was used for the first time in an Argentine election. Of the other major parties, the Socialists polled over 500,000 votes (a tenfold increase compared with the presidential election of 1951, when they received 55,000 votes), while the Christian Democrats received over 420,000 votes on their first appearance at the polls. Conservative and Right-wing parties in general polled poorly. The Communist vote, though only 230,000, represented a fourfold increase compared with 1951, when the Communists received 71,000 votes.

The total number of votes cast (including "blanks") was 8,601,102, about 82 per cent of the electorate. Excluding "blank" ballots, 4,093,989 votes were cast for the parties supporting constitutional reform and 2,360,167 for the parties opposing it.

Of the 32 members returned in the Federal capital (Buenos Aires) 12 were Moderate Radicals, 9 Left-wing Radicals, 7 Socialists, 2 Christian Democrats, 1 Communist, and 1 member of the Independent Civic Party. The Moderate Radicals polled 403,744 votes in the capital, the Left-wing Radicals 298,736, and the Socialists 226,950, no other party polling more than 100,000 votes

In Buenos Aires province, the members elected comprised 17 Moderate Radicals, 15 Left-wing Radicals, 4 Socialists, 2 Christian Democrats, 2 Communists, and five members of other parties. The Moderate Radicals received 655,971 votes, the Left-wing Radicals 518,481, and the Socialists 144,547, other parties polling insignificantly.

The number of blank voting papers—presumably those of Peronista supporters—was 2,146,946, or about 25 per cent of the total number of votes cast. Analysis of the returns showed that the greatest number of "blanks" had been cast in the northern and western provinces, and a much smaller number in Buenos Aires and its vicinity (there were 283,946 blank voting-papers in the capital and 543,923 in Buenos Aires province).

Although ex-President Perón and his supporters hailed the large number of "blanks" as evidence that *Peronismo* still commanded great popular support, it was pointed out in Government circles that the Peronistas had confidently forecast "four to five million" blank votes prior to the elections. Moreover, it was believed that not all the "blank" votes represented Peronista sentiment, since several nationalist and right-wing parties had also instructed their supporters to return blank papers as a token of opposition to the Government—e.g. the extreme right-wing *Azul y Blanco* (Blue and White Party, so called from the national colours). President Aramburu himself described the election results as a "blow to dictatorship" and a clear sign of the people's preference for "democracy and liberty."

The new Constituent Assembly held its first meeting on Sept. 1 at Santa Fé, the city where the Constitution of 1853 had been drawn up. After an embittered exchange with other delegates, the Left-wing Radicals headed by Dr. Frondizi walked out after alleging that the Government had acted "illegally" in summoning the Assembly.

New Ministers of War and Air.

General Ossorio Arana resigned on May 17 as Minister of the Army and was succeeded by General Victor J. Mayo, with the title of Minister of War. [The Provisional Government thus restored the title of War Minister instead of Army Minister,

which was adopted during the Perón regime]. The Under-Secretary of the Army, General Luis Leguizamon Martinez, also resigned in sympathy with General Ossorio Arana, and was replaced by Colonel Martin Cabanillas with the title of Under-Secretary of War.

General Ossorio Arana was appointed Army Minister by the late President Lonardi in November 1955, in succession to General Bengoa. His letter of resignation emphasized the common democratic ideals of himself and President Aramburu, and stated that he had accepted the Army Ministry while the country was progressing towards the goal of civil government, which was now in sight. The resignations of General Ossorio Arana and General Leguizamon Martinez were unofficially attributed to differences within the Army High Command. General Mayo had been placed on the retired list at his own request in 1950.

The Air Minister, Commodore Eduardo McLoughlin, resigned on Aug. 8 and was succeeded by Commodore Jorge Horacio Landaburu, head of the military aviation school at Córdoba. Commodore McLoughlin's resignation was believed due to resentment among younger Air Force officers over some appointments made by him.—(Times - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde) **(Prev. rep. 15671 B; 15512 A.)**

A. CEYLON. — The Language Controversy. - Agreement between Mr. Bandaranaike and Federal Party. - Cancellation of Proposed Civil Disobedience Campaign.

The discussions between the Prime Minister of Ceylon, Mr. Bandaranaike, and the Federal Party leaders on the latter's linguistic and other demands, which had begun on June 26, ended on July 25 with a compromise settlement. During the talks Mr. Bandaranaike emphasized that the Government was not prepared to discuss the establishment of a federal Constitution, regional autonomy, or the abrogation of the Official Language Act. He suggested, however, that the Government's draft Regional Councils Bill should be examined to see whether provision could be made under it to meet some of the Federal Party's demands; in consequence, an agreement was reached on this question, the details of which were not published.

On the linguistic question, it was agreed that Tamil should be recognized as the language of a national minority, that the language of administration in the Northern and Eastern provinces should be Tamil, and that provision should be made for the non-Tamil-speaking minorities in those provinces. Mr. Bandaranaike also stated that the question of Ceylonese citizenship for persons of Indian descent, and of revision of the Citizenship Act, would receive early consideration. In view of these concessions, the Federalist leaders (Mr. Chelvanayakam and Mr. Vanniasingham) announced that they had decided to call off their proposed civil disobedience campaign, which had been planned to begin on Aug. 20.

Although the official statement on the agreement did not mention the colonization question (the fourth main issue raised by the Federal Party), Mr. Bandaranaike told the House of Representatives on Aug. 5 that he had given an assurance that the Government had no intention of "swamping" the Tamil-speaking areas with Sinhalese colonists; this did not mean, however, that Sinhalese would be excluded from colonization schemes in the Northern and Eastern provinces. The Regional Councils to which it was proposed to entrust the subject of colonization would be under parliamentary control, and all regulations adopted by them would require parliamentary approval. Full details of the Government's proposals on the Regional Councils and the linguistic question would be placed before the House within a short time.

An emergency convention of the Federal Party, which met at Batticaloa (Eastern Province) on July 28, unanimously decided to accept the agreement with the Prime Minister as an "interim adjustment," and ratified the decision to cancel the proposed *satyagraha* campaign. A resolution was adopted, however, reaffirming the party's "unalterable determination" to achieve (i) an autonomous Tamil linguistic State or States within a Federal Union; (ii) parity of status for the Tamil and Sinhalese languages throughout Ceylon; and (iii) recognition of the right to full citizenship of all Tamil-speakers who had made Ceylon their permanent home.

The agreement between the Government and the Federalists was strongly criticized by sections of both Sinhalese and Tamil opinion.

Inside the Cabinet, the two representatives of the Ceylon Revolutionary Socialist Party (Mr. Gunawardena and Mr. P. H. W. de Silva) were reported to have objected to the wide powers which it was proposed to grant the Regional Councils. The United National Party issued a statement on July 26 declaring that the agreement would disrupt the unity of the country, and that the powers granted to the Regional Councils would jeopardize its economic development.

A number of Sinhalese organizations, including the Sinhalese People's Association and the Ceylon Council of Monks, informed Mr. Bandaranaike on Aug. 4 of their intention to launch a civil disobedience campaign unless he repudiated the agreement by Oct. 1.

Both the minor Tamil parties - the Tamil Resistance Front and the Tamil Congress attacked the agreement. Mr. Suntharalingam (the only Tamil Resistance Front M.P.) made a speech at Batticaloa on July 29 near where the Federal Party convention was being held - denouncing the Federalist leaders, and had to be rescued from an angry crowd by the police. Mr. Ponnambalam, leader of the Tamil Congress, accused the Federalist leaders of "betraying" the Indian plantation workers, and appealed to all Tamils to repudiate the agreement and to continue the struggle until their language was granted equal status. On the other hand, Mr. Abdul Aziz, the president of the Democratic Workers' Congress (the Indian estate workers' organization), expressed his support for the agreement in a speech at the Federal Party convention.

The tension between the Federal Party and the Government was temporarily revived by a statement issued by Mr. Bandaranaike on Aug. 12 in order to reassure Sinhalese opinion, in which he reaffirmed that the establishment of Regional Councils would not mean the introduction of a federal system and of racial division, and that Sinhalese would remain the only official language.

The Prime Minister emphasized that the Councils would be controlled by Parliament and would deal only with minor colonization schemes; that major colonization projects in the Northern and Eastern Provinces would be handled directly by the Central Government; and that anyone corresponding with the Government after 1960 would receive replies in Sinhalese.

Dr. Naganathan, secretary of the Federal Party, issued a statement on the following day commenting on the Prime Minister's interpretation of the agreement. He declared that "the policy of political agreement by negotiation appears to be futile because the Government cannot be depended upon," and added that "the possibility of carrying on our freedom struggle through civil disobedience may be deemed necessary again."

In view of this development, further talks between Mr. Bandaranaike and Mr. Chelvanayakam (leader of the Federal Party) were held on Aug. 15-16, resulting in a joint statement saying that there were "no substantial differences of opinion on the few points on which some misunderstanding has arisen." The statement added:

"On the language issue the Prime Minister stated that the proposed legislation will be in conformity with the four points set out by the Prime Minister [see 15643 A] and would include matters relating to this subject embodied in the joint statement issued on July 25, 1957.

"In regard to colonization the Prime Minister emphasized that . . .the instrument of colonization should not be used to convert the Northern or Eastern provinces into a Sinhalese majority-area or in any other manner to the detriment of the Tamil-speaking people of those areas.

"The Prime Minister explained that in regard to certain classes of colonization schemes, particularly in cases where a reservoir was situated in one regional area and the land to be developed in another regional area, provision would have to be made for an appropriate adjustment between the interests of the Central Government and the Regional Councils concerned, which would, however, be done within the principles and spirit of the agreement.

"The impression that may have arisen in certain quarters that the agreement has broken down is not justified. It is only when the details of the necessary legislation, which is being drafted, are ready that the public will be able to see the position clearly as a whole."

The statement concluded with an appeal to the public to await the legislation and "not to exacerbate speculative feelings by discussion at this stage."—(Ceylon Government Information Department - Times - Manchester Guardian) **(Prev. rep. 15643 A.)**

Note. According to the 1953 census, 5,621,332 people in Ceylon spoke Sinhalese and 2,369,155 Tamil. The Tamil-speaking population fell into three groups: 917,705 Ceylon Tamils, whose ancestors had lived in Ceylon for centuries; 983,304 Indian Tamils (plantation workers of Indian origin); and 468,146 Ceylon Moors (Moslems of Arab descent). Although the majority of the Tamil-speaking population live in the Northern and Eastern Provinces, nearly 600,000 of the Ceylon Tamils are settled in other parts of the country.

B. PERSIA - SOVIET UNION. — Joint Utilization of Water and Power Resources.

An agreement was signed in Teheran on Aug. 11 under which Persia and the U.S.S.R. agreed to co-operate in the joint utilization of the frontier stretches of the Rivers Atrek and Araks as sources of irrigation and electric power production. It provided for the construction of a number of hydro-electric stations to produce power for adjacent Soviet and Persian territory; the irrigation of about 154,000 acres in the Soviet Republic of Azerbaijan and an equal area in Persian Azerbaijan; and a dam and reservoir on the Atrek River to irrigate over 48,000 acres in Persia and Soviet Turkmenistan. (Soviet Embassy Press Department, London) **(15499 B.)**

A. UNITED KINGDOM. — British Transport Commission. - Report for 1956. - Increases in Railwaymen's Wages and Freight Charges. - New Freight Charges Scheme in Force. - Further Increases in Passenger Fares. - Progress of Railway Electrification.

The report and accounts of the British Transport Commission for the year ended Dec. 31, 1956, were published on June 28, 1957. They showed that British Railways—the principal sector of the Commission's activities—incurred a deficit during the year of £57,496,624, made up of an operational deficit (the first since nationalization) of £16,496,624 and of interest and other central charges amounting to £41,000,000. The Commission's remaining activities earned a combined operational surplus of £20,977,141, reduced by interest charges and central expenses to a net surplus of £3,069,982.

The whole of the year's deficit on British Railways, together with the Commission's accumulated deficit on net revenue account at Dec. 31, 1956 (£69,751,712) and interest on capital borrowings for British Railways during 1956 (£282,687), was transferred under the provisions of the Transport (Railway Finance) Act to a Special Fund, for amortization later. The surplus of £3,069,982 earned on the Commission's other activities was carried to revenue account.

The Special Fund mentioned above (in effect, a form of Suspense Account) stood at £127,530,973 at Dec. 31, 1956.

The report attributed the year's heavy deficit to three main factors: (1) the decline in freight traffic carried by British Railways and British Road Services; (2) the gap in time between the incidence of increased wages and other costs and the authorization of higher fares and charges in order to meet them; (3) the continuation of inflation, although in a less acute form.

With regard to (1) the Commission said: "It became increasingly realized during the year that public transport in Britain had not in fact been nationalized, and that all the transport activities operated by the Commission together represent less than one-third of the total transport activity of the country . . . The other great problem is the continued growth in the numbers of privately-owned cars and commercial vehicles . . . There is a fundamental paradox in having at the same time overcrowded roads and an apparatus of public transport which could, in fact, carry greater traffic . . . The greater the congestion of road traffic which the continuous multiplication of cars and lorries brings about, the more expensive it becomes to provide public transport."

The Commission declared itself confident, however, that the benefits which would result from railway modernization and the transfer of its accumulated deficit to a Suspense Account would enable it steadily to improve its trading position in the next few years. In this connexion the report said: "The most important features [in 1956] were the progress made with the modernization and re-equipment of the railways, and the settlement of the Commission's finances upon a realistic basis for the difficult period of reconstruction and reorganization . . . Various projects began to materialize in 1956 with the placing of large orders for rolling-stock and for electrical and signalling and other equipment. Indeed, some of the new rail services are already in operation and increasing benefits will become manifest from now on. In certain respects, notably electrification of main and suburban lines, an advance on the time-table as first conceived can now be foreseen."

Analysis of Financial Results.

The financial results of the Commission's various activities were shown as follows: *Principal Carrying Activities*—gross receipts, £682,709,744; working expenses, £685,998,150; deficit, £3,108,406. *Other Principal Activities* (docks and harbours, inland waterways, hotels and catering, letting of land and buildings)—gross receipts, £50,471,779; working expenses, £45,144,572; surplus, £5,327,207. *Income from Subsidiary and Associated Companies* (i.e. bus and shipping companies, travel agencies, etc.): surplus, £2,351,716.

This left a net working surplus of £4,480,517, but, after taking into account interest charges and central administrative expenses totalling £58,907,159, the surplus was converted into a deficit of £54,426,642. As explained above, the transfer of £57,496,624 (representing the year's deficit on British Railways) to a special account enabled a net surplus of £3,069,982 to be shown.

Of the total receipts, passenger traffic accounted for £269,041,459 (6.5 per cent up on 1955), freight traffic for £400,783,953 (2.4 per cent up), and miscellaneous activities for £12,974,340 (54 per cent up). Details are shown below (all figures £ million):

	Gross Receipts	Working Expenses	Surplus (+) or Deficit (−)	Better (+) or Worse (−) than 1955
British Railways (incl. collection and delivery)				
Passengers 127.5	480.1	496.6	−16.5	−18.3
Freight, Parcels and Mails 344.6				
Miscellaneous 8.0				
British Road Services (Road Haulage)	48.5	46.7	+1.8	−2.5
Road Passenger Services (Provincial and Scottish)	57.7	52.4	+5.3	−0.3
London Transport Road Services	56.5	54.0	+2.5	−0.5
Railways	23.6	21.6	+2.0	+0.8
Ships: Passenger and Cargo Services	15.4	13.6	+1.8	−0.2
Inland Waterways (Carrying Operations)	1.02	1.19	−0.2	−0.1

The percentages of working expenses to gross receipts were as follows: railway freight and passenger services, 103; road haulage services, 96; road passenger services (Provincial and Scottish), 91; London Transport road services, 96; London Transport railways, 91; ships, 88; inland waterways, 117.

Non-carrying Activities. The net profit of £5,327,207 (against £5,549,628 in 1955) was arrived at as follows:

Docks, Harbours and Wharves—net receipts £2,537,635 (£2,994,783 in 1955).

Inland Waterways (non-carrying activities)—deficit £299,783 (£171,604 in 1955).

Hotels and Catering—an overall loss of £204,078, arrived at as follows: refreshment rooms—profit £359,587; hotels—loss £9,383; restaurant cars—loss £554,282. Figures for 1955 were: refreshment rooms—profit £176,749; hotels—loss £5,376; restaurant cars—loss £678,812; overall loss, £507,439.

Letting of Land and Buildings—net receipts, £3,293,433.

The following detailed information was given in the report issued by the British Transport Commission:

Passenger Traffic. Total receipts amounted to £269,041,000 (£252,562,000 in 1955). In spite of the bad summer and the continued growth of private transport, the number of journeys and passenger-miles recorded for British Railways both showed increases of 4 per cent (passenger mileage constituting a record). On London Transport, however (which was worst affected by the growth of private transport), passenger journeys and mileage fell by 4.4 per cent and 2.6 per cent respectively; they also declined slightly on Provincial (Tilling group) and Scottish buses.

Passenger Fares. Although many goods and services were about three times as dear as in 1929, average fares on British Railways and London Transport, reckoned in terms of receipts per passenger-mile, were little more than double pre-war, while for Provincial and Scottish buses the increases were even less. In real terms, therefore, these fares had all fallen since 1938, although average real wages had risen by 50 per cent.

Freight Traffic. Total freight receipts (including parcels and mails) amounted to £400,784,000 (£391,337,000 in 1955), of which British Railways accounted for 86.0 per cent, British Road Services for 11.8 per cent, Ships for 2.0 per cent, and Inland Waterways for 0.2 per cent.

The report explained that during 1956 there had been an increase of about 6 per cent in "C" licensed (private traders') road vehicles, and that, in the absence of an increased volume of traffic to be carried, this was bound to result in poorer utilization of vehicles of all kinds, both road and rail. On British Railways, general merchandise carryings—the traffic normally most vulnerable to "C" licence discrimination—had declined by a further 2 per cent. Coal and coke carryings were actually slightly higher than in 1955, but when allowance was made for effects of the 1955 coal strike the underlying trend was a slight decline. Mineral traffic rose by over 2 per cent. There had also been a further decline in carrying by British Road Services, largely as a result of further disposals of vehicles, but partly as a result of the growth of "C" licence operations.

Level of Freight Charges. The report pointed out that in spite of the 5 per cent increase in rail charges in April, 1956 (see 14807 A), rail charges for the main traffic groups were still below the pre-war level if considered in "real" terms—or, in the case of coal, only slightly above it. The same applied to road haulage charges.

British Railways Development and Equipment. (*a*) *Electrification*: Good progress was made in 1956 in planning the first stage (Manchester-Crewe) of the Euston-Manchester-Liverpool electrification; this section was expected to be open by 1958, and would be followed by Crewe-Liverpool and Crewe-Birmingham. Preliminary work had begun on the Colchester-Clacton-Walton-on-Naze line (Eastern Region), and planning had gone ahead on the Southern Region lines to the Kent coast (expected to cost £45,000,000).

(*b*) *Diesel Working.* At Dec. 31, 1956, 386 diesel vehicles were in use (over 2½ times as many as on Dec. 31, 1955), with a further 1,746 diesels on order. Additional multiple-unit and other services had been introduced (especially on the London Midland, Eastern, and North-Eastern Regions), and the construction had been approved of 22 lightweight "rail buses" for experiments in economical operation in country areas. Considerable progress had also been made in the introduction of inter-city express services by multiple-

unit diesel trains; these had already started between Edinburgh and Glasgow, and services between Liverpool, Leeds and Bradford and between Birmingham and Liverpool and Manchester would follow. Diesel expresses between Birmingham and Swansea would probably be introduced in the summer of 1957.

(*c*) *Locomotives and Rolling-Stock.* No new steam-passenger locomotives would be built after the 1956 programmes, and few, if any, steam locomotives of any kind after 1958, when existing programmes for heavy freight and mixed traffic locomotives would be completed.

Delivery of the first batch of 174 diesel main-line locomotives was now beginning and should be completed during 1958. These engines would be operated extensively in selected areas of the London Midland, Southern, and Eastern Regions to enable the Commission to draw up reliable standard specifications, and meanwhile further orders would be restricted. About 600 diesel shunting locomotives were in service, with a further 480 on order.

The stock of passenger coaches at Dec. 31, 1956 was 41,522 and that of goods wagons 1,117,464.

The Commission had now decided on the continuous vacuum-brake as standard for all freight and passenger rolling stock, except electric and multiple-unit diesel stock. About 44,000 wagons would be fitted in 1957, and about 80,000 converted in 1958. All new wagons would be fitted with continuous brakes.

(*d*) During the year plans had been completed for the reconstruction of various passenger stations, including Cannon Street (London), Banbury, Chichester, Plymouth North Road, and Weymouth; for improvements at Euston and St. Pancras, Coventry, Newcastle, Penzance, Swindon, Wakefield, Weymouth, and York; and for the modernization of Glasgow (Central), Dundee (Tay Bridge) and Southend. Schemes in hand included a new marshalling yard (costing £14,000,000) at Temple Mills, London, and improvements to goods depots and marshalling yards at Barking, Grimsby, Lincoln, Liverpool, Margam, Merthyr, Peterborough, Stockton, and Thornton (Fife).

British Road Services. Now that disposals of road haulage property had virtually ended, it was possible to review the vehicles left with B.R.S. and begin concentrating on 11 standard types of diesel vehicles. The number of B.R.S. vehicles at Dec. 31, 1956 was 20,587.

Provincial and Scottish Buses. 14,479 buses and coaches were in operation at Dec. 31, 1956.

London Transport. Important works completed or in progress during 1956 included the following: (*a*) the Rickmansworth-Amersham-Chesham electrification (started in 1939, suspended after the outbreak of war, and now resumed); (*b*) reconstruction of the two Underground stations at Notting Hill Gate to provide direct interchange between the Central and Metropolitan lines (in progress); (*c*) electrification of the Central Line between Epping and Ongar; (*d*) a new bus overhaul works at Aldenham—probably the largest and most up-to-date in Europe (completed).

Ships. Four new ships began service in 1956, including three of 4,800 gross tons and 21 knots for the Heysham-Belfast service. At Dec. 31 the Commission's fleet numbered 114 vessels, with 19 others building or ordered.

Staff and Wages. For the first time since 1952 British Railways' intake of recruits exceeded wastage, and the Commission's staff increased by 4,771 to 805,970 (570,547 employed on British Railways). Wage increases during the year were estimated to cost £34,600,000 in a full year, of which British Railways and London Transport would account for £27,700,000 and £2,500,000 respectively. No important stoppages of work took place during 1956.

New B.T.C. Coat of Arms. A design for an heraldically correct coat of arms having been approved by the College of Arms in England and the Lyon Court in Scotland, Letters Patent for "a full Armorial Achievement, with Standard and Badges" were presented to the Commission in June. B.R. locomotives, the power coaches of electric and diesel multiple-unit stock, and certain express coaches will all display the new railway badge.

Recent Developments in Nationalized Transport.

Important developments in connexion with nationalized public transport during recent months are described below.

Railwaymen's Wage Claims. Negotiations began in January 1957 between the B.T.C. on the one hand and the National Union of Railwaymen and the Transport Salaried Staffs Association on the other on the unions' claims (see 15432 A) for increases of 10 and 7½ per cent respectively. An offer by the Commission of 3s. weekly (based on the rise in living costs since the last increase to N.U.R. men in January 1956) was rejected on the grounds that it failed to cover the real rise in the cost of living or to give any financial recognition of railwaymens' efforts to raise productivity. A slightly improved offer by the Commission (Jan. 25), equivalent to an overall increase of 3½ per cent, was also rejected, whereupon the dispute was referred to the Railway Staffs National Tribunal.

The Tribunal published its findings on March 20, the majority report (signed by Sir John Forster, Q.C., the chairman, and Mr. A. J. Epsley, selected by the B.T.C.) recommending increases of 3 per cent only—i.e. less than already offered by the Commission. The third member of the Tribunal (Mr. Edwin Hall, selected by the N.U.R.) made no specific recommendation as to the rate of increase, but considered that it should be more than 3 per cent.

The majority report recalled that in December 1956 the Tribunal had considered a claim by the Amalgamated Society of Locomotive Engineers and Firemen for a 15 per cent increase for footplate staff, and had then awarded an increase of only 3 per cent, based on the rise in the cost of living. The report continued: "As in the case of the ASLEF claim, so in the present case we have reached the conclusion that the only ground upon which an increase in basic rates can be justified is an increase in the cost of living . . . In all the circumstances we recommend that the basic rates of the salaried and conciliation staff in respect of whom the N.U.R. make the present claim shall be increased by 3 per cent from the beginning of the first full pay period following Nov. 26, 1956" [i.e. the date to which the ASLEF increase was backdated].

Mr. Hall, on the other hand, claimed that basic railway wages compared unfavourably with wages in other nationalized industries, and that improvements were necessary, particularly in starting grades, to attract labour. He also held that the proposed 3 per cent increase would not cover even the actual rise in the cost of living index (which at the date of the report stood at 104.4, taking January 1956 as 100), and that railwaymen ought to be rewarded for their efforts to increase railway efficiency.

The Tribunal's majority recommendation was unanimously rejected by the N.U.R. executive on the same day, whereupon further talks on the "grave situation" took place with Sir Brian Robertson (chairman of the B.T.C.) and other members of the Commission. On March 22 agreement was reached on the basis of an overall increase of 5 per cent for all salaried and "conciliation" staff—3 per cent of the increase to be backdated from Nov. 26, 1956, and 2 per cent to March 4. The N.U.R., for its part, agreed (*a*) to replace the existing system of "recurrent and sometimes uncoordinated" wage claims by "periodical reviews at agreed intervals," and (*b*) "to continue with vigour the pursuit of increased efficiency."

The settlement had been negotiated on the understanding that it would apply to all railwaymen in the appropriate grades, and that the N.U.R. would endeavour to secure the agreement of the TSSA and ASLEF. On March 28, however, the ASLEF executive informed the Commission that it was prepared to accept the further increase of 2 per cent (i.e. the difference between the 5 per cent now offered to N.U.R. men and the 3 per cent already granted to ASLEF men in December), but would not agree to any "strings"—i.e. it would not accept the obligations set out above. The Commission replied that they were not prepared to pay the increase unless the other provisions of the agreement were accepted, and that footplate staff would therefore continue to be treated under the award of December, 1956. Further talks between the Commission and the ASLEF executive, however, resulted on April 6 in the Commission agreeing to waive the "strings" attached to the offer as far as ASLEF men were concerned, and to bring their increase up to 5 per cent retrospectively from March 4.

The increase of 5 per cent on January 1956 rates was estimated to apply to about 407,000 members of the N.U.R. and TSSA and to about 70,000 ASLEF men, its cost being unofficially put at about £14,500,000 in a full year. A similar increase (affecting about 120,000 workers and costing about £2,500,000 annually) was given on May 1 to railway workshop staff employed by British Railways and the London Transport Executive.

Electrification Contracts. The B.T.C. announced on Oct. 23, 1956, that it was placing contracts with British Insulated Callender's Cables Ltd. and the British Insulated Callender's Construction Co. Ltd. for the design, supply, and installation of the overhead conductor equipment for the Manchester-Crewe and Colchester-Clacton electrifications. These contracts, involving equipment for 220 and 50 track miles respectively, were the first to be announced since the Commission's decision to adopt the A.C. system as standard (see 14998 A).

Orders for electric traction equipment were announced on Jan. 16, 1957, the firms concerned being the Metropolitan-Vickers Electrical Company, the British Thomson-Houston Company, the English Electric Company, and the General Electric Company. The total value of the orders was about £8,000,000.

Design on Railways. The appointment by the B.T.C. of a panel to advise it on the appearance and design of equipment "used or seen by passengers, other customers, or staffs, or prominently visible to the general public" was announced on Oct. 22, 1956. The chairman of the panel is Mr. T. H. Summerson, chairman of the North-Eastern Area Board and a member of the Commission. Its members include Mr. W. J. Warboys and Sir Gordon Russell (respectively chairman and director of the Council of Industrial Design), in addition to employees of the B.T.C.

Automatic Train Control. Mr. Watkinson, the Minister of Transport and Civil Aviation, announced on Dec. 3, 1956 that he had given final approval for British Railways' system of automatic train control, which had been in use on the King's Cross-Grantham main line for 12 months and had proved entirely reliable. The system would be brought into use as soon as possible on all B.R. main lines at an estimated cost of about £20,000,000.

Inquiry into B.T.C. Buying Policy. Following allegations in April 1957 by Mr. E. L. Gethin (Supplies and Production Adviser to the B.T.C.) that the Commission had failed to obtain competitive tenders before placing railway modernization contracts, Mr. Watkinson announced on July 24 that he had asked Sir Harold Howitt (past president of the Institute of Chartered Accountants) to examine the Commission's purchasing arrangements. He added that at his (the Minister's) request Sir Brian Robertson had sent him a full report setting out the new purchasing policy which the Commission had

decided to adopt, and dealing with allegations in the House about specific contracts. Both Sir Harold Howitt's findings and the Commission's report would be published in due course.

New Railway Freight Charges Scheme. The B.T.C.'s new system of fixing rail freight charges, as amended by the Transport Tribunal, came into force on July 1, 1957.

As originally drafted, the scheme proposed maximum rates based on the weight and loadability of the goods, instead of the existing system of standard charges based on value. The Tribunal agreed to this general principle but stipulated that (*a*) traffic carried in owners' wagons or in tank wagons, or (*b*) consignments of 100 tons or more, should not be subject to "maximum rates" but to "reasonable charges" fixed by the Commission. It also rejected the Commission's proposal for a single series of rates; lowered the proposed maximum rates; and fixed a separate series of rates for goods normally carried in bulk.

Further Increase in Rail Freight Charges. The B.T.C. announced on July 1, 1957, that freight charges on British Railways would be increased by 10 per cent as from Aug. 1, owing to further heavy increases in working costs. To enable the increase to be fully effective, it was proposed to make use of the special statutory procedure for temporary authorization of an increase in the maximum charges fixed by the railway merchandise charges scheme. The Commission's statement read as follows:

"The last increases in railway freight charges came into effect on April 23, 1956. The increases actually applied then were considerably lower than those which the Commission had originally proposed. Since that time the Commission's working costs have risen by the equivalent of some £40,000,000 in a full year, due to increases in the price of coal, in wages and salaries, and in the prices of other items such as steel, road fuel, and tyres. The Commission has applied to the Minister of Transport and Civil Aviation for authority to increase charges for docks and inland waterways by five per cent. The Minister, after consulting the Transport Tribunal, has approved an application for increased charges . . ."

Increase in Passenger Fares. The Commission's statement also dealt with the question of increases in passenger fares, saying in this connexion:

"The Commission has had authority [though not exercised] since 1953 to increase ordinary main-line fares on British Railways from 1.8d. a mile to 2d. a mile, second class, with proportionate increases in first-class fares. The position in respect of these ordinary main-line fares is under review but . . . it is not intended to make any increase during the operation of the present summer holiday train services, which continue until Sept. 15.

"There is also at present under consideration by the Transport Tribunal an application to increase certain other fares [early morning return tickets and season tickets] on British Railways and London Transport, but the Commission . . . does not expect to use the new charging powers, if granted, before the autumn."

The Transport Tribunal announced on Aug. 7 that it had decided to confirm the B.T.C.'s application [see above] to increase fares on London Transport and British Railways' London lines, and to increase early morning and season fares outside London by amounts corresponding to those in London. The Commission reaffirmed, however, that it would not take immediate advantage of the authority granted to them to make increases in existing fares, and proposed to adhere to its decision not to increase fares on British Railways during the present holiday season.

The B.T.C. announced on Aug. 30 that ordinary second-class fares on British Railways would be raised to 2d. a mile from Sept. 15, with proportionate increases in first-class fares. From the same date the increases approved by the Transport Tribunal for London Transport and B.R. London lines would also operate, as follows:

London Transport. No change in the 3d. minimum or in 4d. fares up to 1½ miles, other 4d. fares increased to 5d.; no change in fares between 6d. and 1s. 4d.; 5d. fares increased to 6d.; 2d. increase in fares between 1s. 6d. and 2s. 8d.; 3d. increase in fares between 2s. 9d. to 5s. 2d.; 4d. increase in fares between 5s. 3d. and 7s. 8d.; 5d. increase in fares over 7s. 8d.

Early morning bus (single) and Underground (return) fares to be increased by 1d. or 2d., and monthly Underground season tickets by a maximum of 9s. for 23 miles. Proportionate increases in weekly or longer-period tickets.

B.R. London Lines. On the London, Tilbury, and Southend lines ordinary single fares raised from 4d. to 5d. for 2 miles; fares from 3 to 8 miles unchanged; fares for 9 miles to be increased by 1d.; for 10-19 miles by 2d.; 20-29 miles by 3d.; 40-59 miles by 4d.; 60 miles and over by 5d. Increases in day returns, double the above amounts.

Early morning return fares increased by 1d. or 2d. up to 9 miles, and 3d. from 10-27 miles, increasing to 1s. 8d. at 60 miles.

Monthly season tickets increased by 3s. 9d. for one mile, rising to 9s. at 23 miles or over, with proportionate increases in weekly and longer-period tickets.

B.R. Lines Outside London Area. Early morning return fares and season tickets to be raised by broadly similar amounts to the increases in the London area.

Certain miscellaneous passenger charges would also be revised; e.g. sleeping berth charges would go up by about 10 per cent, and seat reservations would be raised from 1s. to 2s.

The Commission pointed out (*a*) that the new second-class fare of 2d. a mile compared with 1d. a mile charged for monthly returns 20 years previously; (*b*) that the average fare per passenger-mile on British Railways had risen by only 115 per cent since pre-war, compared with an increase of 165 per cent in retail prices.

Canal Improvement Schemes. The B.T.C. announced on July 30, 1957 detailed programmes, to cost over £1,500,000, for the improvement of the Aire and Calder Navigation Canal (£955,000) and the Sheffield and South Yorkshire Navigation Canal (£593,250) to enable them to carry more traffic. The programmes will form part of the Commission's £5,500,000 plan for the development of its principal inland waterways (see 14725 A).

The resignations of Sir Henry Methuen (a member of the former Hotels and Catering Executive) and of Mr. J. Ryan (a member of the Western Area Board) from part-time membership of the British Transport Commission were announced in September and November last.

Mr. (now Sir) C. J. Geddes—see 15398 A—and Mr. S. H. Leake were appointed part-time members of the London Transport Executive with effect from Jan. 1 and April 1, 1957 respectively.—(British Transport Commission - Times - Daily Telegraph - Manchester Guardian - Financial Times)

A. INDIA. — Navy. - Acquisition of H.M.S. "Nigeria." - Appointment of First Indian Admiral.

The 8,000-ton cruiser H.M.S. *Nigeria*, purchased by the Government of India from Britain in 1954, was formally commissioned in the Indian Navy at Birkenhead on Aug. 29, when she was renamed I.N.S. *Mysore* by Mrs. Pandit, the Indian High Commissioner in London.

The *Nigeria* was built in 1940 and saw extensive service in Northern and Pacific waters during the Second World War. Since her acquisition by the Indian Navy she had been undergoing extensive refitting and modernization at Cammell Laird's yard, Birkenhead.

The other principal units of the Indian Navy are the 7,000-ton cruiser *Delhi* and the 1,700-ton destroyers *Rana*, *Rajput* and *Ranjit*. The *Delhi* (ex-H.M.S. *Achilles*, of the Battle of the River Plate) was launched in 1932 and acquired from Britain in 1948. The three destroyers—ex-British *Raider*, *Rotherham* and *Redoubt* respectively—were built in 1941-42 under war programmes.

The anti-aircraft frigate *Brahmaputra*, the first vessel of her type acquired by the Indian Navy, was launched at Clydebank on March 17, 1957. An anti-submarine frigate, the *Khukri*, and four coastal minesweepers had also been launched in Britain for the Indian Navy in 1956.

The Indian Defence Ministry announced on Feb. 12, 1957, that the 15,700-ton aircraft carrier H.M.S. *Hercules* had been purchased from Britain and was expected to join the Indian Navy in three to four years after modernization and refit at the Harland & Wolff yards, Belfast. The *Hercules* had been laid up on Tyneside since her completion in September 1945. The first aircraft carrier to be acquired by India, she will be specially fitted for tropical service and will receive an Indian name in due course.

Rear-Admiral R.D. Katari, the first Indian officer of flag rank, assumed the post of Flag Officer Commanding, Indian Fleet, on October 1956 in succession to Rear-Admiral Sir St. John Tyrwhitt, who had been seconded to India by the Royal Navy since 1955. The post is the highest in the Indian Navy except for that of Chief of Naval Staff.—(The Statesman, Calcutta - Indian High Commissioner's Office, London)

B. LITERATURE. — Book Selections, August 1957.

Selected books published in Great Britain and the United States are given below:

Great Britain. Allen, V. L.—"Trade Union Leadership." A Study based on Arthur Deakin. (Longmans, 30s.)

Dutourd, Roger—"The Taxis of the Marne." Translated from the French. (Secker & Warburg, 16s.)

Fedden, Sir Roy—"Britain's Air Survival." (Cassell, 11s. 6d.)

Gatland, K. W., and Dempster, D. D.—"The Inhabited Universe: An Inquiry staged on the Frontiers of Knowledge." (Wingate, 21s.)

Grimble, Arthur—"Return to the Islands." (John Murray, 18s.)

Leasor, James—"The Millionth Chance: The Story of the R-101." (Hamish Hamilton, 18s.)

Moore, John—"September Moon." (Collins, 15s.)

Morton, H. V.—"A Traveller in Rome." (Methuen, 25s.)

Nock, O. S.—"Branch Lines." (Batsford, 25s.)

Price, R. G. G.—"A History of *Punch*." (Collins, 30s.)

United States. Baruch, Bernard M.—"Baruch: My Own Story." Autobiography, Volume I. (Henry Holt, New York, $5.00)

Feis, Herbert—"Churchill-Roosevelt-Stalin: The War they Waged and the Peace they Sought." (Princeton University Press, $6.95)

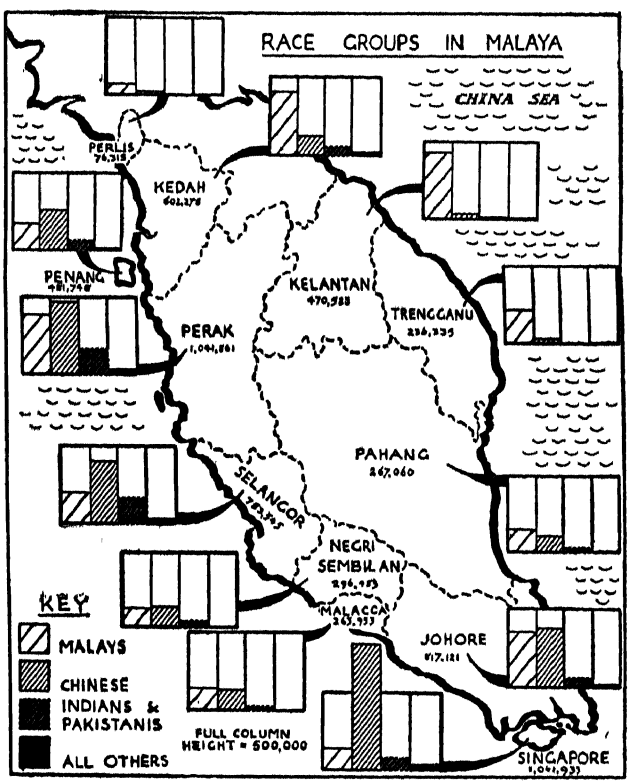
Wallace, Irving—"The Square Pegs: Some Americans who Dared to be Different." (Knopf, New York, $5.00)

(Ed. K.C.A.) **(Prev. rep. Book Selections, 15678 A.)**

A. MALAYA. — Achievement of Independence.

The independent Federation of Malaya, the tenth member of the British Commonwealth, came officially into existence on Aug. 31 (Merdeka Day). At a ceremony in Kuala Lumpur, which was *en fête* for the occasion, the Chief Minister (Tengku Abdul Rahman) formally proclaimed the independence of Malaya as "a sovereign, democratic and independent State founded on the principles of liberty and justice, and ever seeking the welfare and happiness of its people and the maintenance of a just peace among all nations." In a warm tribute to Britain, the Tengku said that Malaya had been "blessed with a good administration forged and tempered to perfection by successive British administrators," and called upon the people to see that "this legacy left by the British should not suffer in efficiency and integrity in the years to come."

Representatives of some 30 Commonwealth and foreign countries were present at the independence ceremonies, at which H.M. the Queen was represented by the Duke of Gloucester. The British representatives included Viscount Kilmuir (the Lord Chancellor), Field-Marshal Sir Gerald Templer (Chief of the Imperial General Staff and former High Commissioner in Malaya), and Sir Donald MacGillivray, the retiring High Commissioner. The Duke of Gloucester read a message from the Queen welcoming Malaya "with deep and real pleasure to the brotherhood of our Commonwealth family of nations," and expressing her Majesty's conviction that Malaya would "respond worthily to the challenging tasks of independence and continue to show to the world that example of moderation and goodwill between all communities that has been so marked a feature of her history." Messages of goodwill were sent to Tengku Abdul Rahman by Mr. Macmillan, Mr. Menzies, Mr. Holland, and other Commonwealth Premiers.



The 11 States of the Malayan Federation, showing racial composition. Population figures are for 1954. (*New Commonwealth*)

Malayan, British and Commonwealth troops took part in the Merdeka Day ceremonies at Kuala Lumpur, where the Union Jack was formally hauled down and the Malayan flag hoisted to the strains of the new Malayan anthem, *Negara Ku* ("My Country"). The Malayan flag has 11 red and white stripes (for the 11 States of the enlarged Federation), and a blue canton bearing the Islamic star and crescent in yellow.

A statement had been issued from 10, Downing Street, on Aug. 25 saying that "H.M. Government in the United Kingdom are happy to announce, after consultation with other Commonwealth Prime Ministers, that they have all agreed that Malaya shall from Aug. 31 be recognized as a member of the Commonwealth." The statement added that the Queen had made an Order-in-Council "giving the force of law, so far as it is for her Majesty to do so, to the new Constitution of the Federation of Malaya and the Constitutions of Penang and Malacca."

In a statement on Aug. 28, Tengku Abdul Rahman had announced the composition of the new Malayan Government as follows:

Tengku Abdul Rahman ..	Prime Minister and Minister of External Affairs.
Dato Abdul Razak bin Hussein	Deputy Premier and Defence.
Colonel Sir Henry Hau-shik Lee	Finance.
Inche Suleiman bin Dato Abdul Rahman	Interior and Justice.
Mr. V. T. Sambanthan ..	Health.
Inche Abdul Aziz bin Ishak ..	Agriculture.
Inche Sardon bin Haji Jubir	Works, Posts and Telecommunications.
Mr. Ong Yoke Lin	Labour and Social Welfare
Mr. Tan Siew Sin	Commerce and Industry.
Inche Mohamed Khir bin Johari	Education.
Inche Bahaman bin Samsuddin	Natural Resources.
Inche Abdul Rahman bin Haji Talib	Transport.
Dr. Ismail bin Dato Abdul Rahman	Minister Plenipotentiary without portfolio.

Several Ministers changed their former portfolios but there was only one newcomer to the Cabinet—Mr. Tan Siew Sin, a son of Sir Cheng-lock Tan, one of the leaders of the Malayan Chinese community. The new Minister of Education (formerly Assistant Minister of Commerce) took the place of Dato Abdul Razak, who became Deputy Premier and Minister of Defence. Mr. Sambanthan was formerly Minister of Labour, and Mr. Ong Yoke Lin was Minister of Transport. As previously announced (see page 15687, first column), Dr. Ismail bin Dato Abdul Rahman will be the first Malayan Ambassador in Washington, with a seat in the Federation Cabinet.

Tengku Abdul Rahman (54), the first Prime Minister of independent Malaya, is a younger son of a former Sultan of Kedah. He graduated from St. Catharine's College, Cambridge, and subsequently assisted his father in the administration of Kedah State, where he was a District Officer. After the Second World War he joined the United Malays' National Organization (UMNO) founded by Dato Sir Onn bin Ja'afar, and took an increasingly prominent part in the activities of that body. During the immediate post-war years he studied in London for his Bar examinations, and after passing them returned to Malaya in 1949 to take up a legal appointment. In 1951 he succeeded Dato Sir Onn bin Ja'afar as leader of UMNO following the Dato's unsuccessful attempt to convert the organization into a multi-racial party—an attempt which was rejected by UMNO and resulted in the Dato forming a new Independence of Malaya Party. In 1952 Tengku Abdul Rahman succeeded in bringing about an alliance between UMNO, the Malayan Chinese Association, and the Malay Indian Congress. He became Chief Minister in the same year, when this alliance won all but one of the 52 seats in the elections to the Federal Legislative Assembly.

Tuanku Sir Abdul Rahman (not to be confused with Tengku Abdul Rahman, the Prime Minister) was officially installed as King and Ruler of the Malayan Federation at Kuala Lumpur on Sept. 2, the ceremony being attended by the Duke of Gloucester, the Prime Minister and the Cabinet, the Rulers of the Malay States, and representatives of Commonwealth and foreign governments. Sir Abdul Rahman (the Ruler of Negri Sembilan) took the official style and title of "his Majesty the *Yang di-Pertuan Agong*." Under the new Constitution, he will reign for five years and will then be replaced by a successor elected by the Rulers of the Malay States.—(Times - Daily Telegraph) **(Prev. rep. 15685 A.)**

Note. The area, population (latest estimates) and capitals of the 11 States of the Malayan Federation are as follows:

	Area (sq. miles)	Population (approx.)	Capital
Johore	7,330	860,000	Johore Bahru
Kedah	3,660	635,000	Alor Star
Kelantan	5,750	488,000	Kota Bahru
*Malacca	640	280,000	Malacca
Negri Sembilan	2,580	315,000	Seremban
Pahang	13,280	278,000	Kuala Lipis
*Penang	110	504,000	George Town (Penang)
Perak	7,980	1,100,000	Ipoh
Perlis	310	81,000	Kangar
Selangor	3,160	830,000	Kuala Lumpur
Trengganu	5,050	247,000	Kuala Trengganu

*Former Straits Settlements, now possessing full Statehood under the new Constitution.

A recently-completed census in Malaya, of which the results have not yet been officially published, showed the population of the Federation as about 6,280,000 according to provisional figures. The State populations will therefore be somewhat larger than those given in the table above. Kuala Lumpur, capital of the Federation and of Selangor State, has a population of well over 200,000.

A. UNITED KINGDOM.—Electricity Supply Industry. - Appointments to New Central Electricity Generating Board and Electricity Council. - The Electricity Act, 1957.

Lord Mills, the Minister of Power, announced on Aug. 1 the following appointments to the Central Electricity Generating Board and the Electricity Council, both set up under the 1957 Electricity Act:

Central Electricity Generating Board.

Chairman (Salary £10,000 p.a.): Sir Christopher Hinton, F.R.S. (56), managing director of the Industrial Group of the Atomic Energy Authority (appointed for five years).

Deputy Chairman (£7,500): Mr. C. R. King (62), chairman of the East Midlands Electricity Board (three years).

Members (£7,000): Mr. F. H. S. Brown (47) and Mr. E. Long (59), respectively chief engineer and secretary, Central Electricity Authority.

Electricity Council.

Chairman (£10,000): Sir Henry Self (67), deputy chairman of the C.E.A. (two years).

Deputy Chairman (£7,500): Sir Josiah Eccles (60), also a deputy chairman of the C.E.A. (five years).

Part-Time Member and Deputy Chairman (£2,000): Professor R. S. Edwards (47), Professor of Economics at London University (five years).

Part-Time Member (£1,000): Lord Citrine (69), chairman of the C.E.A.

All the above appointments are on a full-time basis except those of Lord Citrine and Professor Edwards. Further appointments to the new bodies will be made in due course.

Sir Christopher Hinton was mainly responsible for the development of the Calder Hall project. Sir Henry Self and Sir Josiah Eccles had been deputy chairmen of the C.E.A. since 1947 and 1953 respectively. Sir Josiah had previously been chairman of the Merseyside and North Wales Electricity Board, while Professor Edwards served on the Herbert Committee, whose report formed the basis for the reorganization of the electricity supply industry.

Lord Mills also announced that Lord Citrine would take up his appointment as part-time member of the Electricity Council on Jan. 1, 1958, i.e. the day following the dissolution of the Central Electricity Authority; meanwhile his appointment as chairman of the C.E.A., due to expire in August, had been renewed until Dec. 31. The appointment of Lieut.-Colonel E. H. E. Woodward as a part-time member of the Authority, also due to expire, had been renewed for the same period.

The Electricity Act, 1957.

The Electricity Bill, providing for the dissolution of the Central Electricity Authority and its replacement by a Central Electricity Generating Board and an Electricity Council (see 15311 A), had been given an unopposed second reading in the House of Commons on Dec. 17, 1956, and in the House of Lords on April 30, 1957.

The principal changes made in the Bill during its passage through Parliament are summarized below:

House of Commons. In Standing Committee (Feb. 5 - March 21) Government amendments were agreed to (1) advancing from April 1, 1958 to Jan. 1, 1958, the date appointed for the dissolution of the Central Electricity Authority and the coming into operation of the new Central Electricity Generating Board and the Electricity Council (agreed to by 20 votes to 15); (2) empowering Electricity Boards, on giving 24 hours' notice, to enter and survey land—unless "covered by buildings or used as a garden or pleasure ground"—to ascertain whether it would be suitable for their purpose (carried by 21 votes to nine, the Labour members of the Committee voting with the Government and nine Conservatives opposing); (3) empowering the Scottish Electricity Board to provide bulk electricity supplies to "persons or organizations outside Britain," e.g. in Northern Ireland.

In the Report stage (April 3-4) the following Government amendments were introduced to meet criticisms expressed in Standing Committee by a group of Conservative back-benchers led by Mr. Nabarro. All the amendments were agreed to, the first one against strong Labour opposition:

(1) Restricting the powers to manufacture electrical plant, granted under the Bill to the Central Electricity Generating Board, by providing that they should apply only to "anything required by the Generating Board itself or by an Area Board for the purpose of research or development or for the repair or maintenance of their equipment." (Carried by 204 votes to 172).

(2) Extending from 24 hours to 28 days the notice required to be given by an Electricity Board before entering private land for the purpose of a survey.

(3) Empowering the Electricity Council or Area Boards, with the Minister of Power's consent and with Treasury approval, to borrow money by issuing Electricity Stock.

With regard to amendment (1), Mr. Maudling (Paymaster-General) explained that it had been argued (*a*) that no nationalized industry should have powers enabling it to spread beyond the purpose for which it had been created; (*b*) that there was no need to give the nationalized electricity industry power to manufacture plant, since private industry was perfectly capable of meeting all requirements; (*c*) that if competition in manufacturing were to arise between the nationalized industry and private industry, the former, having obtained its capital on easier terms, would compete on an unfair basis; (*d*) that the home market was of great importance to firms exporting electrical plant as a base from which to operate.

Against this, it had been argued that power to manufacture plant ought to be given to the nationalized industry as a reserve in case it could not obtain its requirements on reasonable terms. There was, however, the counter-argument that although in the past it might have been possible for manufacturers to "gang up" against the Board, the situation had been completely changed by the Monopolies and Restrictive Practices Act. Moreover, there was nothing to prevent the Generating Board buying plant abroad. After weighing up the arguments, the Government had decided that it was right to introduce the amendment.

Other Government amendments were agreed to in the Report stage, as follows:

(4) Permitting the Minister of Power to appoint up to three additional members of the Electricity Council. These members were not to be members of any Electricity Board.

(5) Empowering Electricity Boards to fix maximum charges at which electricity might be resold, and to make different charges for different classes of customers.

(6) Requiring the Electricity Council to prepare annual statements of accounts according to the best commercial standards.

(7) Providing that the Central Electricity Generating Board and the Scottish Board should supply railways in England and Wales and in Scotland respectively on terms and conditions agreed between them or, in default of agreement, fixed by the Ministers of Power and of Transport and Civil Aviation.

The Bill was given an unopposed third reading on April 4.

House of Lords. The following Government amendments were agreed to without dissent in the Report stage (May 30) and during the third reading (June 6):

(1) To provide that there should be full-time members of the Central Electricity Generating Board, the Electricity Council, and the Area Boards, and to ensure a proper balance of full-time and part-time members.

(2) To ensure that a public inquiry would be held whenever a local planning authority objected to the erection of a power station or of overhead cables.

(3) Instructing the Central Electricity Generating Board and the Area Boards, when planning projects, to take into account their effect on amenities, natural beauty, or features of historical or other interest.

(4) To provide that the chairmen of the Central Electricity Generating Board and the Electricity Council should serve full-time.

(5) To ensure that, in forming plans, the Generating Board and the Area Boards should seek to preserve the flora and fauna of the district concerned, and any geological or physical features of special interest.

The Government suffered its first defeat in either House of Parliament since the General Election when an Opposition amendment (moved by Lord Lucas of Chilworth) was carried on June 6 by 33 votes to 31. The amendment stipulated that a public inquiry should be held into any scheme about which objections had been lodged with the local planning authority by the local authorities, the Council for the Preservation of Rural England, or any other appropriate national or local body.

The Lords' amendments were agreed to in the House of Commons on July 11, and the Bill was enacted on July 17.

During the second reading debate in the House of Lords, Lord Mills announced that a project had been worked out between the Central Electricity Authority and *Electricité de France* for the exchange of electrical energy by means of a submarine cable (see 15135 A). He added that the difference in peak loads in France and Britain suggested that there was an economic case for exchanging power at certain times.
(Times - Daily Telegraph - Manchester Guardian) **(15311 A.)**

B. NEW ZEALAND. — Power Development. - The Benmore Hydro-electric Project.

The Minister in charge of Hydro-Electric Development (Mr. Goosman) announced in August that the N.Z. Government would proceed immediately with the construction of the Benmore hydro-electric station on the Waitaki River, which would have a capacity of 480,000 kilowatts. Mr. Goosman said that the decision was of major importance to New Zealand, since upon it was based the integration of the electrical systems of the North and South Islands.

The Benmore project—the biggest yet undertaken in New Zealand—is estimated to cost £36,400,000. Construction will be spread over seven years, and it is due to come into operation in 1965. Six generators, each of 80,000 kilowatts, will be installed, as compared with eight generators, each of 40,000 kilowatts, in the Roxburgh scheme.—(Directorate of Information Services, Wellington) **(Prev. rep. 15624 C.)**

A. UNITED STATES. — Anti-Communist and Security Measures. - Supreme Court's Rulings on Interpretation of "Smith Act," Congressional Committees' Power of Cross-examination, and Dismissal of Government Employees on Security Grounds. - State Sedition Laws held Invalid by Supreme Court. - Trials and Convictions under "Smith Act."

The U.S. Supreme Court on June 17 gave three rulings of major importance on matters relating to security procedures and civil liberties: (1) ordering the release of five Communists and the retrial of nine others who had been convicted under the "Smith Act," it laid down that Communist Party membership was not sufficient ground for conviction under that Act; (2) it reversed the conviction of a trade union official, Mr. John T. Watkins, for contempt of Congress, and defined the constitutional limits on the right of Congressional committees to cross-examine witnesses; (3) it ruled that Mr. Dean Acheson, the former Secretary of State, had wrongfully dismissed a State Department employee, Mr. John Stewart Service, and that dismissals of Government employees on security grounds must conform to Civil Service regulations.

Details of these and other recent Supreme Court rulings, and of other developments connected with anti-Communist and security measures, are given below under cross-headings.

The "Californian Communists" Case.

The Supreme Court reversed on June 17 the conviction of five leading members of the Californian Communist Party (Mr. Philip Connelly, Mrs. Rose Kusnitz, Mr. Al Richmond, Mr. Frank Spector, and Mr. Henry Steinberg) who had been each sentenced in 1952 to five years' imprisonment and a fine of $10,000 on charges of "conspiring (1) to advocate and teach the duty and necessity of overthrowing the Government of the United States by force and violence, and (2) to organize, as the Communist Party of the United States, a society of persons who so advocate and teach" [see 12581 A]. The majority decision was supported by Chief Justice Warren and Justices Frankfurter, Harlan, and Burton; Justice Clark dissented, whilst Justices Black and Douglas maintained that all the convictions should be reversed on the ground that the "Smith Act" was unconstitutional.

The Court's decision was based on three main grounds: (1) it accepted the petitioners' contention that to "organize" meant to "establish"; that in this sense the Communist Party had been organized in 1945; and that, as the indictment had not been returned until 1951, "the three-year statute of limitations had run on the 'organization' charge"; (2) the judge's direction to the jury had been defective because it had failed "to distinguish between advocacy of forcible overthrow as an abstract doctrine and advocacy of action to that end"; (3) the only evidence against five of the petitioners had been that they were members or officials of the Communist Party, and no evidence had been produced that they had been engaged in any but wholly lawful activities. The evidence against the remaining nine petitioners, however, appeared sufficiently strong to justify a new trial.

Justices Black and Douglas contended that "the statutory provisions on which these prosecutions are based [i.e. the "Smith Act"] abridge freedom of speech, press, and assembly in violation of the First Amendment to the U.S. Constitution," and that the only overt act charged against any of the petitioners was that "they went to a constitutionally protected public assembly where they took part in lawful discussion of public questions, and where neither they nor anyone else advocated or suggested overthrow of the U.S. Government." Justice Clark dissented from the Court's interpretation of the term "organize," its conclusions regarding the judge's instructions to the jury, and its assessment of the evidence.

The Supreme Court set aside on June 24 the convictions of six Detroit Communists under the "Smith Act" [see 13604 C], and sent their case back to a lower court for reconsideration in the light of its judgment of June 17.

The Watkins Case.

The Supreme Court reversed on June 17 the conviction of Mr. John T. Watkins, an official of the United Automobile Workers' Union, who had been sentenced to a year's imprisonment and a fine of $100 for refusing to answer questions put to him by a sub-committee of the House Committee on Un-American Activities. The majority ruling, which strongly criticized the Committee's methods, was supported by Chief Justice Warren and Justices Black, Frankfurter, Douglas, Harlan, and Brennan, only Justice Clark dissenting.

"Petitioner was prosecuted," the Court's decision stated, "for refusing to make certain disclosures which he asserted to be beyond the authority of the Committee to demand. The controversy thus rests upon fundamental principles of the power of Congress and the limitations upon that power." When appearing before the sub-committee on April 29, 1954, Mr. Watkins had denied allegations that he had been a Communist, whilst freely admitting that he had co-operated with the Communist Party and participated in Communist activities during 1942-47. Questioned about a number of alleged Communists, he had stated that he would answer questions about persons whom he believed to be still members of the Communist Party, but not about "persons who may in the past have been Communist Party members or otherwise engaged in Communist Party activity, but who to my best knowledge and belief have long since removed themselves from the Communist movement," on the ground that such questions were not relevant to the Committee's work.

"The power of Congress to conduct investigations is inherent in the legislative process," the Supreme Court's decision continued. "But broad as is this power of inquiry, it is not unlimited. There is no general authority to expose the private affairs of individuals without justification in terms of the functions of Congress . . . We have no doubt that there is no Congressional power to expose for the sake of exposure. The public is, of course, entitled to be informed concerning the workings of its Government. That cannot be inflated into a general power to expose where the predominant result can only be an invasion of the private rights of individuals."

After noting that the Committee's mandate authorized it to investigate "subversive and un-American propaganda" which "attacks the principle of the form of government as guaranteed by our Constitution," the Supreme Court commented: "It would be difficult to imagine a less explicit authorizing resolution. Who can define the meaning of 'un-American'? What is the single, solitary 'principle of the form of government as guaranteed by our Constitution'? . . . The members of the Committee have clearly demonstrated that they did not feel themselves restricted to propaganda in the narrow sense of the word . . . Un-American activities were its target, no matter how or where manifested." The Committee's activities could "lead to ruthless exposure of private lives in order to gather data that is neither desired by Congress nor useful to it. Yet it is impossible in this circumstance, with constitutional freedom in jeopardy, to declare that the Committee has ranged beyond the area committed to it by its parent assembly because the boundaries are so nebulous."

The Supreme Court's decision pointed out that persons who had been summoned as witnesses before a Congressional committee, and who refused to answer "any question pertinent to the question under inquiry," might be punished by the Federal courts. It had not been made clear to Mr. Watkins, however, what was "the question under inquiry," and this point still remained obscure. "Petitioner was thus not accorded a fair opportunity to determine whether he was within his rights in refusing to answer," the decision concluded, "and his conviction is necessarily invalid under the due process clause of the Fifth Amendment" [i.e. the clause forbidding any person to be punished without "due process of law."]

On the same day the Supreme Court reversed the conviction for contempt of Professor Paul M. Sweezy, who had refused to answer questions asked by the Attorney-General of New Hampshire during an inquiry into alleged subversive activities in that State. On June 24 the Court set aside the convictions of three other witnesses who had refused to answer questions before Congressional committees, and of four witnesses who had refused to answer questions before the Ohio Un-American Activities Commission, and referred their cases back to the lower courts concerned for reconsideration in the light of its decisions in the Watkins and Sweezy cases.

The Service Case.

In its third important ruling of June 17, the Supreme Court unanimously held that Mr. John Stewart Service had been irregularly dismissed from the State Department in 1951.

Mr. Service, who had been employed as a Foreign Service officer since 1935, was three times cleared of allegations of disloyalty after investigations by the State Department in 1945-47, and again on three occasions in 1949-51 by the State Department Loyalty Security Board, which inquired into charges of pro-Communist activities brought against him by Senator McCarthy [see 10715 A]. The Deputy Under-Secretary of State approved the Loyalty Board's findings, but subsequently the Loyalty Review Board of the Civil Service Commission decided in December 1951 that there was "reasonable doubt" of Mr. Service's loyalty, whereupon Mr. Dean Acheson ordered his dismissal. The Washington Federal District Court ruled on June 30, 1955, that the Loyalty Review Board's decision was null and void, and that Mr. Acheson's action was valid because the Secretary of State had absolute discretion to discharge any employee [see 14482 A]. In its ruling on Mr. Service's appeal, however, the Supreme Court held that under Civil Service regulations the Deputy Under-Secretary's confirmation of the Loyalty Security Board's decision was final, and that Mr. Acheson had violated the regulations safeguarding employees' rights.

The Nelson Case.

The Supreme Court had previously ruled on April 2, 1956, that the States had no power to punish persons who advocated the violent overthrow of the Federal Government, on the ground that sedition laws in the States had been superseded by the "Smith Act." This decision—which was supported by Chief Justice Warren and Justices Black, Frankfurter, Douglas, Clark, and Harlan, with Justices Reed, Burton, and Minton dissenting—invalidated sedition laws in force in 42 States

(i.e. all the States except Arizona, Missouri, North Dakota, South Carolina, Oregon, and Washington) and in Alaska and Hawaii.

The Court's ruling was given in connexion with the case of Mr. Steve Nelson, the former chairman of the Western Pennsylvania Communist Party, who had been sentenced to 20 years' imprisonment in 1952 under the Pennsylvania Sedition Act, and to five years' imprisonment in 1953 under the "Smith Act" [see 13279 C]. The former sentence was subsequently reversed by the Pennsylvania Supreme Court, but an appeal to the Federal Supreme Court was lodged by the Pennsylvania State authorities with the support of the Federal Department of Justice and 30 other States.

In giving judgment, Chief Justice Warren gave three grounds for the Supreme Court's decision in this case: (1) the "Smith Act" as amended in 1948, the Internal Security ("McCarran") Act of 1950, and the Communist Control Act of 1954 "evince a Congressional plan which makes it reasonable to determine that no room has been left for the States to supplement it. Therefore a State sedition statute is superseded regardless of whether it purports to supplement the Federal law." (2) "Sedition against the United States is not a local offence. It is a crime against the nation. As such, it should be prosecuted and punished in the Federal Courts." (3) "Enforcement of State Sedition Acts presents a serious danger of conflict with the administration of the Federal programme."

A new trial for Mr. Nelson and the four Communists convicted with him was ordered by the Supreme Court on Oct. 10, 1956. The Department of Justice had moved that the case be remanded to a Federal District Court for a hearing on the credibility of Joseph Mazzei, a witness at their trial, as statements which he had subsequently made before other tribunals had cast doubts on his testimony. The Supreme Court, however, rejected the motion and ordered a new trial instead.

Trials under "Smith Act."

The first successful prosecution under the "informed membership" clause of the "Smith Act" took place in Chicago, when Mr. Claude Lightfoot, secretary of the Illinois Communist Party, was convicted on Jan. 26, 1955, of membership of an organization advocating the violent overthrow of the Government, the aims of which were known to him; he was sentenced on Feb. 15, 1955, to five years' imprisonment and a $5,000 fine. Mr. Junius Scales, chairman of the North Carolina Communist Party, was sentenced to six years' imprisonment on the same charge at Greenboro on April 22, 1955, and Mr. John Noto, a member of the New York State Communist Party, to five years' imprisonment at Buffalo on April 12, 1956. The Supreme Court decided on March 26, 1956, to hear the appeals of Mr. Lightfoot and Mr. Scales against their convictions.

Four groups of Communists were convicted or sentenced to terms of imprisonment between May 1955 and April 1956 on charges of conspiring to advocate the violent overthrow of the Government:

(1) Following the dismissal of a motion for a new trial, nine members of the Pennsylvania Communist Party who had been convicted on Aug. 13, 1954 [see 13842 A] were sentenced on June 20, 1955. Four of the defendants received three years' imprisonment, and the remaining five were given two years' imprisonment.

(2) Seven Communists from Colorado, Utah, and California were convicted at Denver (Colorado) on May 25, 1955, but were granted bail pending an appeal for a new trial.

(3) Six Ohio Communists were convicted in Cleveland on Feb. 10, 1956; four others were found not guilty, and one was acquitted on the ground of insufficient evidence. Five of those convicted were sentenced to five years' imprisonment, and the other to 3½ years. The trial was the first of 12 hitherto held under the "Smith Act" in which defendants who had not renounced Communism were acquitted by the jury; in the 11 previous trials, three defendants had been acquitted by directed verdicts and one by the jury after he had publicly renounced Communism.

(4) Six Connecticut Communists were convicted at New Haven on March 29, 1956; one was acquitted; and the jury disagreed concerning another. Those convicted were sentenced to terms of imprisonment on April 20, 1956.

Of the 11 members of the National Board of the Communist Party convicted in 1949 (see 10331 A), the last two to remain at liberty, Mr. Gilbert Green and Mr. Henry Winston, surrendered on Feb. 27 and March 5, 1956, respectively. They were sentenced on March 26, 1956, to three years' imprisonment, in addition to their original five years' sentence. Of the nine other Communist leaders tried with them, seven had begun their sentences after the dismissal of their appeal in 1951, and two (Mr. Gus Hall and Mr. Robert Thompson) failed to surrender to their bail, but were subsequently arrested and sentenced to additional terms of imprisonment.

One of the seven imprisoned in 1951, Mr. Irving Potash, was released on Dec. 9, 1954, and the other six (Mr. Eugene Dennis, Mr. John Williamson, Mr. Jacob Stachel, Mr. John Gates, Mr. Carl Winter, and Mr. Benjamin Davis) on March 1, 1955. All were rearrested immediately on a second charge under the "informed membership" clause of the "Smith Act," but were released on bail. With the permission of the Department of Justice, Mr. Potash (who was born in Kiev) and Mr. Williamson (a British subject) left the U.S.A. in March, 1955 and in May, 1955, for Poland and Britain respectively.

A Government motion to bring to trial Mr. William Z. Foster, the national chairman of the U.S. Communist Party, was rejected on April 25, 1956, by Judge Ryan, of the New York Federal District Court, on the ground that his trial would result in "serious and irreparable harm, if not in his death." Mr. Foster (76) had been indicted with the other members of the National Board in 1948, but his case was separated from theirs as he was found to be suffering from arterio-sclerosis.

A Bill increasing the maximum penalties under the "Smith Act" from 10 years' imprisonment, a $10,000 fine, or both, to 20 years' imprisonment, a $20,000 fine, or both, was passed by the Senate on July 13, 1956.—(New York Times - New York Herald Tribune) **(Prev. rep. 13842 A.)**

A. NEPAL. — Resignation of Mr. Prasad's Cabinet. - New Government formed by Dr. Singh. - "Democratic Front" formed by Opposition Parties.

The Prime Minister of Nepal, Mr. Tanka Prasad Acharya, requested King Mahendra on July 9 either to authorize a reconstitution of the Cabinet "to achieve homogeneity" or to relieve him of office within a month. [Mr. Prasad's Government, which had held power since January 1956, consisted of four members of the *Praja Parishad*, Mr. Prasad's party, and three Ministers nominated by the King]. King Mahendra accepted the Government's resignation on July 14, and asked Dr. K. I. Singh, leader of the United Democratic Party, to form a coalition Cabinet. After the other parties had refused to co-operate with him, Dr. Singh formed a Government on July 26 from his own party and Royal nominees, in which he held the posts of Premier and Home Minister.

Dr. Singh (52) led the insurgent forces in western Nepal during the revolt of 1950-51 against Rana rule; he refused to accept the cease-fire agreement whereby a coalition Government was formed under a Rana Premier, and continued guerrilla activities until he was captured. While a prisoner he organized a revolt in Khatmandu in 1952, and on its suppression escaped to Tibet on foot. He lived in exile in China until 1955, when he was allowed to return to Nepal and shortly after formed the United Democratic Party. After his return he strongly denied reports that he was a Communist, attacked Mr. Prasad's policy as pro-Communist and anti-Indian, and visited New Delhi, where he was received by Mr. Nehru.

At a press conference on Aug. 5 Dr. Singh expressed support for India's case in the Kashmir dispute, on which his predecessors had maintained an attitude of neutrality, and announced that his Government had begun negotiations for the repatriation of Nepalese in Pakistan and of Pakistanis in Nepal. He stated that the Government would not withdraw permission for the recruitment of Gurkhas for the British and Indian armies, as it could not provide alternative employment for them, but that Nepalese would not be allowed to serve in the Pakistani Army. He added that Nepal was prepared to accept economic aid from any country provided there were "no strings attached." Dr. Singh had previously stated that he would not allow Soviet or Chinese embassies to be opened in Nepal, and that all Nepal's foreign contacts would be made through her embassies in Delhi and London.

The *Praja Parishad* and the two other leading Opposition parties, the Nepali Congress and the Nepali National Congress, formed an alliance on Aug. 9 under the name of the "Democratic Front" to meet the "threat to democracy" created by Dr. Singh's appointment. This step, however, was opposed by Mr. Prasad, as the other parties had refused to support his policy of improving relations with China to counter Indian influence in Nepal. A proposal by Mr. Prasad for the merger of the *Praja Parishad* and the United Democratic Party had been rejected by the latter on July 24.

Dr. Singh announced on Aug. 12 that a security force would be recruited from ex-servicemen to maintain order in Khatmandu and prevent unconstitutional activities, and that a special intelligence department under his direct control would be attached to this force. He also warned the Press not to publish "anti-Crown and anti-national articles" in the name of free speech. In reply, the Democratic Front issued a strongly-worded manifesto which declared that "we deny the King any divine rights and affirm that the individual acts of the King can never be above criticism, particularly when the King acts without reference to democratic and constitutional practice. The monarchy cannot build on the threat of force, and if any attempt is made to divorce it from the democratic ideal it will lose its political basis . . . We are prepared to meet any onslaught on the people's democratic rights, and to safeguard the rights of newspapers to criticize the individual acts of kings."—(The Statesman, Calcutta - The Hindu, Madras) **(Prev. rep. 14716 A.)**

A. SOUTH AFRICA. — Controversy over National Flag and National Anthem. - The Flag Amendment Act.

A private member's Bill establishing the Union Flag as the only official flag of South Africa, and consequently abolishing the use of the Union Jack, was signed by the Governor-General on March 26, 1957, after having been accepted by the Government and passed by both Houses of the Union Parliament against the opposition of the United, Labour and Liberal parties. The legislation was introduced by Mr. Arthur Barlow, a member of the Conservative Party (disbanded in January last—see 15378 A).

Mr. Barlow (who is of British extraction) had introduced a motion in the House of Assembly on March 23, 1956, declaring that "the time has come, in view of the necessity for promoting a sound South African nationality, for recognizing the National Flag of the Union as the only official flag, and *Die Stem van Suid Afrika* in both Afrikaans and English as our own South African national anthem." He said that it would do "an enormous amount of good and raise the stature of South Africa" if the Union had only one national flag. The motion was supported by Mr. Frank Waring, also of the Conservative Party.

Dr. Dönges (Minister of the Interior) expressed gratification that the motion had emanated from "the English-speaking group," and said that the Government endorsed it and accepted it in principle.

Mr. Strydom (the Prime Minister) also welcomed Mr. Barlow's motion, declaring that South Africa was the only country in the world in the anomalous position of having two flags and two anthems, "and one of these flags and one of these anthems are those of another country." Whilst there were many countries which spoke two or more languages—e.g. Belgium and Switzerland—he did not know of any which had two official flags and two official anthems. No-one could expect that the United States, despite its British origin, should have *God Save the Queen* for its national anthem; nor could one expect that Argentina and Brazil, despite their respective Spanish and Portuguese origins, should fly the flags of Spain and Portugal as their national flags.

On Feb. 1, 1957, Mr. Barlow moved a Bill in the House of Assembly proposing to amend the Flag Act of 1927 (see footnote below) by abolishing the provision which laid down that the Union Jack should be flown side by side with the Union Flag on official occasions and on Government buildings. [Mr. Barlow's Bill made no reference to the question of the national anthem.] After strong objections by Mr. H. G. Lawrence (United Party), Mr. Strydom announced that the Government would accept Mr. Barlow's Bill and intended that it should be placed on the Statute Book "as soon as possible." He emphasized, however, that the Bill was regarded as an interim measure and would in no way prejudice the National Party's desire to have an entirely new flag when South Africa ultimately became a republic.

Mr. Lawrence (U.P.), who described Mr. Barlow as "a stormy petrel who represents nobody outside this House," declared that acceptance of the Bill would loosen South Africa's ties with the Commonwealth and remove a valuable symbol of Commonwealth association.

The Flag Amendment Bill was given a second reading on March 5 after a three-day debate, a United Party amendment for its rejection being defeated by 84 votes to 49.

Dr. Dönges, speaking on March 1, described the Flag Act of 1927 as a "constitutional anachronism," asserting that it had been intended merely as a temporary settlement of the flag question and not as a final solution. Today South Africa was "30 years older as a nation" and there had been "a great change in our hearts and in our national soul." The existence of two flags was a denial of the sovereign status of a country, particularly if one of them was the flag of another sovereign State. The adoption of a single national flag would enhance South Africa's national status and the status of her diplomatic representatives abroad, who would no longer have to fly two flags from their offices. He again expressed "sincere gratitude" to Mr. Barlow and Mr. Waring for introducing and supporting the Bill, declaring that it was "one of the best auguries for the future of South Africa" that two English-speaking members had promoted such legislation. On the question of the national anthem, Dr. Dönges said: "I think there is no doubt that if there is to be one flag there should be one national anthem, and I would interpret the acceptance of this Bill in that sense."

Sir De Villiers Graaf (U.P.), Leader of the Opposition, moved the Bill's rejection. To many people, he said, the Union Jack meant something more than a symbol of Commonwealth association, whilst to another group it was seen in quite a different light—as a symbol of inferiority and a reminder of defeat. The interesting thing about the latter group, however, was that it had never at any time numbered among its members the great figures on the Boer side during the South African War. On the contrary, General Smuts and other great Boer leaders had subsequently fought under the Union Jack and had added to its lustre and renown. Whilst he (Sir de Villiers Graaf) had always regarded the Union Flag as his own flag, the extremist wing of the National Party had never accepted that flag and continued to desire another, because their ultimate aim was not only a republic but a republic outside the Commonwealth. "Had the Prime Minister approached this matter in a different manner," he declared, "and had there been consultation and an attempt in advance to avoid a unilateral step, there might have been a very different approach. If this Bill was the final acceptance of the national flag we might have felt differently about it. But what is the use of departing from the firm ground of the 1927 agreement to follow a path so dangerous to the present Union Flag? . . ."

Mr. Swart (the Minister of Justice) denied that the Nationalist attitude towards the Union Jack was one of hatred or bitterness. "We who went through the South African War," he declared, "saw our flag taken away from us and the Union Jack placed over us. That is the flag that waves over us today, and yet it is taken amiss that we want our own South African flag and not a symbol of the victor." Mr. Swart pointed out that all the members of the Commonwealth had only one flag with the single exception of South Africa.

In the resumed debate on March 4, **Mr. Mitchell** and a number of other United Party members sought in vain to obtain assurances from the Government that the abolition of the Union Jack would not be a step towards the abolition of the present Union Flag and to South Africa's eventual secession from the Commonwealth. Mr. Mitchell asked Mr. Strydom why he had not called a conference of all interested parties in an effort to reach agreement on the flag question.

Mr. Alex Hepple, leader of the Labour Party, said that there was no reason to reject the Bill *prima facie*, and in other circumstances the whole House might have supported it. In existing circumstances, however, the Bill was "suspect," and he wondered whether the Government's willingness to afford time to a private member's Bill on this matter might not be "a prelude to next year's election." Instead of approaching the flag question in a manner which would appeal to all sections of the population, they had chosen an approach aimed at "an easy political triumph for a party representing one section only." **Mrs. Ballinger** spoke against the Bill on behalf of the Liberal Party.

A Nationalist member, **Mr. Basson,** declared himself "a staunch supporter of our membership of the Commonwealth the finest and most valuable of all international organizations to which we can belong." He said that though the British flag would go from South Africa, the English language and the British parliamentary system would stay—"two of the richest assets South Africa possesses."

The Bill was given a third reading in the House of Assembly on March 7 (by 73 votes to 42), was subsequently passed by the Senate, and received the Governor-General's assent as stated above.

Mr. Strydom announced on May 2 that *Die Stem van Suid Afrika* would in future be the only national anthem of the Union, and would be played at functions where the Governor-General or the Queen (in her capacity as Queen of South Africa) were present. He defended this decision on the ground that as it had been decided that South Africa should have only one national flag, it was logical that she should have only one national anthem. [*Die Stem* and *God Save the Queen* had previously had equal status and were both played on official occasions.] The decision was strongly criticized by the Opposition on the grounds that it had been taken without prior consultation with the Opposition parties, and that it was calculated to exacerbate relations between the English-speaking and Afrikaans-speaking sections of the population. (Cape Times - Cape Argus - Die Burger)

The Flag Controversy. A prolonged and embittered dispute on the flag question during the 'twenties was ultimately resolved by the Flag Act of 1927, representing a compromise between those who wished to retain the Union Jack and those wishing to abolish it. The Act created a new Union Flag and laid down that it should be flown side by side with the Union Jack on all official buildings and on official and ceremonial occasions, etc. The Union Flag—now the sole flag of South Africa—consists of three horizontal stripes of orange, white and blue, the white stripe bearing in miniature the Union Jack, the *Vierkleur* flag of the former Transvaal Republic, and the republican flag of the Orange Free State. A strong section of Nationalist opinion has demanded an entirely new flag for South Africa on the ground that the present National Flag still incorporates the Union Jack in its design.

B. PAKISTAN. — Master Plan for Dacca.

It was announced in London on Sept. 5 that the U.K. Government had commissioned the London firm of Messrs. Minoprio and Spenceley and P. W. Macfarlane to draw up a master plan for the development of Dacca (the capital of East Pakistan) at the request of the Pakistani Government. The announcement—which was issued by the Treasury—said that the Government of Pakistan had applied to the U.K. Government in January last, under the Colombo Plan Technical Co-operation Scheme, for assistance in preparing a comprehensive report on the development of Greater Dacca, whose population had grown from 350,000 in 1947 to 600,000 at the present time. It was estimated that the city and its environs would eventually have a population of 2,000,000. Messrs. Minoprio and Spenceley and P. W. Macfarlane have considerable experience of town-planning in Britain and the Middle East, and have recently completed a master plan for Baghdad.—(Pakistan High Commissioner's Office, London - Treasury Press Office) **(Prev. rep. Colombo Plan, 15699 A.)**

A. UNITED STATES. — Senatorial Election in Wisconsin. - Democratic Candidate wins Seat of late Senator McCarthy.

The first Democratic senator to be returned in Wisconsin for 25 years was elected on Aug. 28, when Mr. Edward W. Proxmire defeated the Republican candidate, Mr. Walter J. Kohler jr., for the seat formerly held by the late Senator Joseph McCarthy. Senator McCarthy, the most controversial figure in American politics in recent years, had died on May 2 of a liver complaint, aged 47.

Joseph Raymond McCarthy was born at Grand Chute, Wisconsin, the fourth of seven children of Timothy McCarthy (an Irish immigrant) and Bridget McCarthy. After working in various jobs, including that of manager of a grocery store, he entered Marquette University (Milwaukee) in 1930, took a law degree, and was admitted in 1935 to the Wisconsin bar. He subsequently joined the Republican Party, was elected a State judge in 1939, and joined the Marine Corps in 1942 as a lieutenant, serving as an air-gunner in the Pacific. On account of a leg injury he was released from active duty in February 1945 and returned to his judicial duties in Wisconsin.

Judge McCarthy (as he then was) entered the U.S. Senate in 1946, when he defeated Senator Robert M La Follette jr., who had previously sat for Wisconsin as a Progressive. His first three years in the Senate were uneventful, but on Feb. 9, 1950, in a speech at Wheeling (West Virginia) which caused a nation-wide sensation, he claimed to have in his possession a list of 205 names which were known to Mr. Dean Acheson (then Secretary of State) as being members of the Communist Party " and who are nevertheless still working and shaping policy in the State Department." Senator McCarthy, though subsequently amending the figure of " 205 " to " 57 ", continued to make frequent reference to this " list " but never revealed the names of any individuals.

The charges were denied *in toto* by the State Department, and a fortnight after his Wheeling speech Senator McCarthy was asked to substantiate his allegations before a special sub-committee of the Senate Foreign Relations Committee which had been set up under Senator Tydings (Democrat). After more than 3,000,000 words of testimony, Senator McCarthy was unable to produce even one identified Communist Party member in the State Department at the time mentioned, and the majority report of the sub-committee condemned him for making " irresponsible " and " untruthful " accusations.

In the new Senate, however, Senator McCarthy's influence was greatly enhanced by his appointment (Jan. 31, 1951) as a member of the Appropriations Sub-committee. Sweeping and unsubstantiated attacks on alleged " Communists " and " Communist sympathizers" in the Roosevelt and Truman Administrations were followed in June 1951 by a speech in which Senator McCarthy made a violent attack on General George Marshall (Chief of Staff of the U.S. Army in World War II, and later Secretary of State), whom he accused of being involved in a " conspiracy " to weaken the United States *vis-à-vis* the Soviet Union. Despite the widespread resentment aroused by this baseless attack on General Marshall, one of the most respected personalities in the U.S.A., Senator McCarthy continued to bring similar charges against individuals, secured the removal from the Foreign Service of important officers, and increasingly fostered the concept of " guilt by association " which gave rise to the term " McCarthyism " to denote the Senator's " witch-hunting " activities.

In August 1951, following a resolution by Senator Benton (Democrat), a Senate sub-committee was set up to investigate aspects of Senator McCarthy's financial affairs. Detailed testimony was taken, and a report was issued after Mr. McCarthy had repeatedly declined to appear before the sub-committee on the grounds that it was controlled by Democrats and that its members were out to " smear " him. The sub-committee indicated that it had wished to question Senator McCarthy about a $10,000 cheque he had received from the Lustron Corporation (manufacturers of pre-fabricated houses) at a time when he was a member of the Senate Banking and Currency Committee. [The latter committee had jurisdiction over the Federal Reconstruction Corporation, which had lent $37,500,000 to Lustron before that firm went bankrupt.] Senator McCarthy said that the cheque had been in payment for a pamphlet he had written for Lustron.

Re-elected for Wisconsin in 1952, Senator McCarthy came into open conflict with the Eisenhower Administration in January 1953, when he attacked the nominations of Dr. James B. Conant (President of Harvard University) as Ambassador in Bonn and of Mr. Charles E. Bohlen as Ambassador in Moscow. Two months later he began a protracted controversy with Mr. Harold E. Stassen (Director of the Mutual Security Administration) over Greek-registered ships trading with Communist ports in the Far East. For some considerable time Senator McCarthy had been denouncing the Democratic Administrations of Presidents Roosevelt and Truman as " 20 years of treason," and on May 30, 1953, he referred to " 21 years of treason," presumably to include the first year of President Eisenhower's term of office.

Meanwhile, in the Republican-controlled Congress elected in 1952, Senator McCarthy had become chairman (in January 1953) of the powerful Permanent Sub-committee on Investigations, which assumed powers to investigate the Executive Branch of the Government. Allegations of espionage and sabotage at the Army Signal Corps installations at Fort Monmouth (New Jersey), and of disloyalty in the State Department's " Voice of America," yielded no evidence of spies or persons of proved disloyalty, but only some laxity in rooting out " security risks " in certain departments. The Fort Monmouth case led to a spectacular " showdown " between the U.S. Army and Senator McCarthy when, on Aug. 25, 1954, hearings began before the Permanent Sub-committee on Investigations into the Army's charges that Mr. McCarthy and certain members of his sub-committee staff had sought to obtain preferential treatment for Mr. David Schine after he had been drafted into the Army. [Mr. Schine was an unpaid assistant on Senator McCarthy's sub-committee.] On the other hand, Senator McCarthy alleged that the Army had sought to use Mr. Schine as a " hostage " to get the sub-committee to ease its pressure into the Fort Monmouth investigations. The televised hearings, lasting 36 days and involving more than 2,000,000 words of testimony, ended in majority and minority reports by the sub-committee and several independent reports by individual members (see 13864 A).

Three months later Senator McCarthy faced another investigation —the fifth in four years—when Senator Flanders (Republican) introduced a motion for the appointment of a special committee of Senators to investigate allegations against Senator McCarthy that might warrant censure. The charges that the committee was called upon to investigate were (1) Incidents in contempt of the Senate or Senatorial committees. [This included Senator McCarthy's failure in 1951 to explain his receipt of $10,000 from the Lustron interests.] (2) Instances of encouragement of U S. employees to violate the law and their executive oaths of office. [This was based, in part, on Senator McCarthy's invitation to Government employees to furnish him with documentation of subversive or other criminal matters in their departments.] (3) Incidents involving the receipt or use of confidential information from Executive files. [During the sub-committee hearings on the Army case Senator McCarthy had had a controversial document in his possession.] (4) Incidents involving abuse of colleagues in the Senate. (5) Incidents relating to the examination by Senator McCarthy of Brig.-General (now Major-General) Ralph W. Zwicker during the Fort Monmouth inquiry. [Senator McCarthy had told General Zwicker that he was " not fit to wear the uniform of a general "].

After prolonged hearings, in which Senator McCarthy appeared with counsel, the committee (headed by Senator Watkins, Republican) issued a report (on Dec. 2, 1954) censuring Senator McCarthy and " condemning " him on two counts—that he had abused the 1951 sub-committee [see (1) above] and that he had attacked the Watkins Committee and its members in language that reflected on the dignity and integrity of the Senate. [The motion of censure was the first to be passed against a member of the Senate since 1929.] President Eisenhower, who had previously expressed his displeasure at Senator McCarthy's methods, personally congratulated Senator Watkins and his committee on their report, whereupon Senator McCarthy attacked the President himself (see 13951 A).

Though returned for Wisconsin at the Senatorial elections in November last, Senator McCarthy had played little part in public affairs since December 1954, having entered hospital on several occasions in the past two years owing to recurrent ill-health.

In the election on Aug. 28 for the late Senator McCarthy's seat, Mr. Proxmire polled 435,085 votes against 313,631 for Mr. Kohler and thereby became the first Democratic senator for Wisconsin in a quarter of a century. [The returns were complete for all but four of the State's 3,361 polling stations.] Three other candidates—a right-wing Republican, a " McCarthyite " and a Socialist Labour candidate—polled less than 25,000 votes between them.

Senator Proxmire (41), a graduate of both Harvard and Yale, is head of a printing company and was elected to the Wisconsin State Assembly in 1950. A liberal Democrat, he unsuccessfully stood for the State Governorship on three occasions, being twice beaten by Mr. Kohler, the unsuccessful Republican candidate in the senatorial election. Mr. Kohler, an " Eisenhower Republican," has served two terms as Governor of Wisconsin.

As a result of Senator Proxmire's victory, the Democrats have 50 seats in the Senate and the Republicans 48. Mr. Proxmire will serve for the unexpired term of the late Senator McCarthy—i.e. until January 1959. (New York Times)
(Prev. rep. Senate Elections, 15565 C.)

Note. The various investigations referred to in the obituary of Senator McCarthy are described in Volume IX of *Keesing's Contemporary Archives*—see Index for that volume under " United States," sub-heading " McCarthy, Senator." For Senator McCarthy's " Wheeling speech " of 1950 and its repercussions, see Volume VII (10715 A).—Ed. K.C.A.

B. TURKEY. — Purchase of British Destroyers.

Four British destroyers—the *Marne*, *Matchless*, *Meteor* and *Milne*, each of 2,840 tons—were purchased for the Turkish Navy under an agreement signed in Ankara on Aug. 16. All were built under war programmes and saw extensive service in World War II.—(Turkish Embassy Press Office, London)
(Prev. rep. 11130 G.)

A. SOVIET UNION. — Statement on Development of Inter-Continental Rocket Missile. - Resumption of Soviet Nuclear Weapon Tests.

The Soviet News Agency (Tass) announced on Aug. 26 (1) that successful tests had been carried out of "a super long-distance inter-continental multi-stage ballistic rocket"; and (2) that tests of nuclear and thermo-nuclear (hydrogen) weapons had taken place in the Soviet Union during the past few days.

The first announcement said that a rocket of the type described had been successfully launched a few days earlier, the tests having "fully confirmed the correctness of the calculations and of the design selected." After saying that the rocket had "flown at an unprecedentedly high altitude, covered a vast distance in a short time, and landed in the target area," the announcement added: "The results obtained show that it is possible to direct rockets to any part of the world. The solution of the problem of designing inter-continental ballistic rockets will make it possible to reach remote areas without resorting to the strategic air force, which at the present time is vulnerable to up-to-date means of anti-aircraft defence."

The second announcement merely stated that the nuclear test explosions had taken place at a high altitude and were successful.

Two days later the East German News Agency, in a despatch from Moscow, quoted an article in *Sovietskaya Aviatia* (the organ of the Soviet Air Force), written by Major-General G. I. Pokrovsky, giving some details of the purported performance of the Russian inter-continental missile.

General Pokrovsky (of the Soviet technical engineering service) claimed that the rocket could be directed to any part of the earth, reach an altitude of 1,000 kilometres (600 miles), and strike its target at "the unimaginable speed of 25,000 kilometres an hour" (15,000 m.p.h.). Describing the accuracy of the missile as its "outstanding attribute," he said that it could be "assumed" that its margin of error would "not be more than 10 to 20 kilometres" (six to 12 miles) from the target area. He stated also that the rocket could be fitted with hydrogen warheads, thereby "guaranteeing" the destruction of any target.

The following statement was issued on Aug. 30 by General Norstad (Supreme Allied Commander, Europe) in connexion with the Tass announcement:

"The Soviet announcement that an inter-continental ballistic missile has been tested must be taken seriously. The announcement itself, however, came as no surprise. NATO defence plans have for some time taken account of the probability that the Soviet Union would in due course have such a weapon.

"The critical technical solutions for producing long-range ballistic missiles seem to be well in hand, certainly so far as concerns the Western Powers. It was to be expected that Soviet science, by reason of its enormous efforts in the same field, would achieve at least some preliminary success.

"What, among other things, interests us about the Soviet statement is its studied vagueness. Any weapons system must be accurate and reliable if it is to be militarily useful. From the West's considerable experience in the development of both inter-continental range (5,000 miles or so) and intermediate range (roughly 1,500 miles) missiles, we know that a tremendous amount of work must be done to translate a prototype into a reliable ballistic missile system that is operationally effective at strategic range.

"I have no reason to doubt that the U.S.S.R. has tested a ballistic missile. However, an operational weapon for the ranges contemplated must still be a long way off. Meanwhile, the advantage rests and will continue to rest incontrovertibly with the NATO Powers because of their clear superiority in manned aircraft. Meanwhile, too, the West is successfully bringing along long-range ballistic missiles for its arsenal. In proper time they will join the deterrent, and there is therefore no reason for the NATO community to be disconcerted by the Soviet announcement.

"Finally, I am wondering why the U.S.S.R. chose this particular time to claim as a spectacular success a technical development that was expected but is still far from having any direct military application. Two years ago the U.S.S.R. employed its full arsenal of intimidation in trying to prevent the German Federal Republic's entry into NATO. A year ago, in a tense international situation, it raised against Europe the threat of rocket attacks. On both occasions the alliance was unshaken, even unimpressed. So will it be now."

The British Defence Ministry also issued a statement (Aug. 27) pointing out that the Russian announcement had been "studiously vague on such matters as the altitude and range of the missile and the size of the target area." After recalling that development of these weapons had been proceeding "ever since the Germans demonstrated the potentialities of the V-2," it added: "The [Russian] statement that a launching has been carried out does not necessarily mean that they are yet in sight of an operational weapon, but we must expect continued progress."

The U.S. Atomic Energy Commission had previously announced on Aug. 23 that the Soviet Union had "resumed testing of nuclear weapons at its Siberian proving grounds," and that a "detonation of substantial size" had taken place on Aug. 22.—(Soviet Embassy Press Department, London - Times - Manchester Guardian - New York Times) **(15540 A.)**

B. AVIATION. — New World Altitude Record.

A new world altitude record of 70,000 feet (13¼ miles) was set up over the English Channel on Aug. 28 by a British *Canberra* bomber piloted by Mr. Michael Randrup, who was accompanied by Mr. Walter Shirley. Mr. Randrup is chief test pilot of D. Napier and Son (one of the English Electric group of companies) and Mr. Shirley is deputy chief engineer of the Napier company.

The machine, fitted with a *Scorpion* rocket engine, took off from Luton Airport and made an initial climb off the Isle of Wight to 44,000 feet on its two Rolls-Royce *Avon* turbo-jets (the standard engines fitted to *Canberra* aircraft). The *Scorpion* rocket motor was then brought into action and the *Canberra* climbed rapidly until the rocket was shut down at 70,000 feet. Mr. Randrup explained that almost all the thrust which carried the plane to the record altitude came from the *Scorpion*, which used high-test peroxide and kerosene for fuel. The *Canberra* was still climbing "extraordinarily rapidly" at 70,000 feet and could have gone higher, but "we deliberately stopped when we had gone high enough." The outside temperature at 70,000 ft. was - 55 deg. C. and the top of the cockpit canopy was completely frosted up; nevertheless, he and Mr. Shirley were "quite comfortable" at that altitude and had no need for the emergency pressure suits with which they were issued. [A new type of pressure clothing was worn by Mr. Randrup and Mr. Shirley during their flight to protect them from the effects of a sudden failure of the cockpit pressurization system.] Mr. Randrup said that he had clearly seen the French coast and the Channel Islands, and disclosed that he had been up to the record height eight or 10 times before. It was explained in the Press that the *Canberra* had been very near the critical point at which the stalling speed of an aircraft and the critical "Mach number" (i.e. the effects of the sound barrier) tend to converge, the margin between the "stall" and the "Mach number" at 70,000 feet being only about 15 m.p.h.

The *Scorpion* rocket engine has been developed by the Napier company; details remain secret but it is known that it can be repeatedly started and stopped at any height. The flight was observed for record purposes by the Royal Aero Club, representing the International Aeronautical Federation.

The previous altitude record of 65,890 ft. was set up on Aug. 29, 1955, by Wing-Commander W. F. Gibb, of the Bristol Aeroplane Company, in a *Canberra* powered by two Bristol *Olympus* turbo-jets.—(Times - Daily Telegraph) **(Prev. rep. 14406 B.)**

C. ZANZIBAR. — First Elections.

The first elections in the history of Zanzibar were held on July 22 for the six unofficial seats in the Zanzibar Legislative Council.

The elections were contested by three main parties: (1) the Afro-Shirazi Union, which, broadly speaking, represents the African population; (2) the Moslem Association; and (3) the Nationalist Party, claiming to represent the Zanzibari Arabs. Whereas the Afro-Shirazi Union is pro-British, the Nationalist Party demands the abolition of British rule, friendship with Egypt and other Arab countries, and the annexation to the Sultanate of the Mombasa coastal strip. The Shirazis are indigenous Africans claiming remote Persian descent, and take their name from the Persian city of Shiraz. [According to Zanzibari tradition, the indigenous population was conquered by the Persians in remote antiquity.]

The pro-British Afro-Shirazi Union, led by Abeid Karume, won three of the Zanzibar seats, while the two seats on Pemba Island were won by the Shirazis (the Africans and Shirazis did not combine on Pemba). The remaining seat was won by the Moslem Association. The Nationalist Party, led by Sheikh Ali Muhsin, failed to win a single seat, though supported by broadcasts from Cairo Radio. The Afro-Shirazi and Nationalist leaders opposed each other in the Ngambo constituency of Zanzibar, Abeid Karume receiving 3,328 votes against 918 for Sheikh Ali Muhsin.

The electorate numbered about 40,000, of whom over 90 per cent went to the polls. The franchise was exercised by men over 25 who were literate (in English, Arabic or Swahili); or who had land, income or property of at least £150 in value; or had an annual income of £120 or over; or had been in Government service. Men over 45 were allowed to vote without qualification.

The Zanzibar Legislative Council, reorganized on the basis of the constitutional reforms of 1955 (see 14456 C), comprises 13 official members and 12 unofficial members, six of whom are elected (i.e. those returned on July 22). The other six unofficial members are nominated by the Sultan on the advice of the Resident, who presides over the Legislative Council. (Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Zanzibar, 14456 C.)**

SEPTEMBER 7—14, 1957

A. MIDDLE EAST. — President Eisenhower's Warning on Growth of Communist Influence in Syria. - U.S. Arms Airlift for Jordan. - President Nasser's Support for Syria. - Agreement on Economic Union between Egypt and Syria. - Syrian Economic Delegation in Moscow. - Soviet Economic and Technical Mission to visit Syria. - Syrian Allegations of "Provocation" by American Warships.

Mr. Loy Henderson, the U.S. expert on Middle East affairs, returned to Washington on Sept. 5 after his talks in Istanbul with Turkish leaders and the Kings of Iraq and Jordan, with whom he discussed the recent developments in Syria (see 15721 A). Mr. Henderson also discussed the Syrian situation with Lebanese leaders during a visit to Beirut.

The U.S. State Department announced on the same date (Sept. 5) that Mr. Henderson had made an initial report to Mr. Dulles; that he (Mr. Henderson) had "found deep concern [in the countries visited] lest Syria should become a victim of international Communism and, as such, become a base for further threatening the independence and integrity of the region"; that Mr. Henderson's report would be studied by the State Department "in the light of the relevant principles of the U.N. Charter and the policies set forth in the joint resolution of March 9, 1957 [i.e. the Congressional resolution approving the "Eisenhower Doctrine"]; and that Mr. Dulles would in turn report to the President. Mr. Henderson himself said on his return to Washington that the situation in Syria was "extremely serious" and might affect "the security of the whole free world."

President Eisenhower's Warning on Communist Influence in Syria. - Reaffirmation of "Eisenhower Doctrine."

After a conference at the White House between President Eisenhower, Mr. Dulles, Mr. Henderson, and Mr. William Rountree (Assistant Secretary of State for Near Eastern, South Asian and African Affairs), Mr. Dulles issued a statement on Sept. 7 saying *inter alia* that the President had expressed the hope that "the international Communists would not push Syria into any acts of aggression against her neighbours" and that the Syrian people "would act to allay the anxiety caused by recent events." Mr. Dulles's statement—described by the *New York Times* as amounting, in effect, to a reaffirmation of the Eisenhower Doctrine—was worded as follows:

"At a meeting of Mr. Henderson, Mr. Rountree and myself with President Eisenhower, Mr. Henderson reported fully the exchanges of views which he had had in the Near East with high officials of Turkey, Iraq, Jordan and Lebanon.

"He reported that he had found in the Near East deep concern at the apparently growing Soviet Communist domination of Syria and the large build-up there of Soviet-bloc arms, a build-up which could not be justified by any purely defensive needs. There was particular concern over border incidents and intensive propaganda and subversive activities directed toward the overthrow of the duly-constituted Governments of Syria's Arab neighbours.

"The President gave careful consideration to Mr. Henderson's report, as well as the reports received by the State Department from U.S. Ambassadors in the area. The President appraised the situation in the light of the U.N. Charter, which denies Syria the right to use force except in self-defence.

"The President recalled his message to Congress of Jan. 5, 1957, in which, after describing Russia's long-time ambition to dominate the Near East and the current activities there of international Communism, he had sought authority to help the nations of the area to defend their independence.

"The President affirmed his intention to carry out the national policy expressed in the Congressional Middle East resolution which had been adopted, and exercise as needed the authority thereby conferred on the President. In this connexion, the President authorized the accelerated delivery to the countries of the area of economic and other defensive items which have been programmed for their use.

"The President expressed the hope that the international Communists would not push Syria into any acts of aggression against her neighbours and that the people of Syria would act to allay the anxiety caused by recent events."

A British Foreign Office spokesman stated on Sept. 9 that H.M. Government shared the anxiety that had been expressed over recent developments in Syria. The spokesman recalled that the "Eisenhower Doctrine" had been widely welcomed in Britain at the time of its formulation; expressed the British Government's satisfaction "that the President has now reaffirmed this policy"; and added that Britain was keeping in close touch with the U.S. Government "on these and all other matters of common concern."

U.S. Airlift of Arms to Jordan.

The State Department confirmed on Sept. 6 that the United States was expediting arms deliveries to Jordan and other Middle East countries [unnamed, but understood to be Iraq and Saudi Arabia] in response to representations from the recipients, who had expressed fears lest the Russian arms shipments to Syria might eventually be used for aggressive purposes. Details of the arms were not given, but it was understood that they consisted of anti-tank guns and other defensive weapons, together with ammunition. Eight *Globemasters* and "Flying Boxcars" arrived at Amman on Sept. 9 and unloaded arms supplies, five of the machines having flown direct from the United States and the others from U.S. bases in Europe. The flights were made across Libya, the Sudan and Saudi Arabia so as to avoid crossing Syria or Egypt.

The Jordanian Foreign Minister (Mr. Samir Rifai) stated at a press conference on Sept. 10 that the arrival of the U.S. arms supplies was "a normal happening which unfortunately coincided with this abnormal atmosphere" [in the Middle East]. In reply to questions, he said that Jordan regarded Israel as "a much greater danger than Syria"; that "Israel and international Communism are our greatest enemies"; and that "no Arab country would ever be prepared to fight another Arab country." As regards the U.S. arms, Mr. Rifai stressed that their arrival by air had been planned long beforehand and that the Jordanian Government had known that they were *en route*. There had been "no special urgency" about their arrival, and the arms themselves were intended solely for Jordan's internal security. Jordan was grateful for American military and economic aid, and was prepared to accept such aid "from any quarter under conditions which do not involve us in military pacts or interfere with our independence and freedom."

Mr. Rifai declined to comment on the situation in Syria, beyond remarking that Jordan did not feel justified in interfering in the internal affairs of that country. While reiterating that Jordan would continue to fight Communism, he deplored the importation of "ideological struggles" between the Great Powers in the Middle East and expressed anxiety lest the area should become a "battle-ground in the cold war."

President Nasser's Support for Syria.

In a press statement on Sept. 9, broadcast by Cairo Radio, President Nasser expressed Egypt's "unconditional support" for Syria and attacked American policy in the Middle East.

In this statement, made to the Cairo newspaper *Al Ahram* in question-and-answer form, President Nasser accused the U.S.A. of trying to turn the Middle East into a sphere of American influence, and rejected American concern over the events in Syria as "mere propaganda." Declaring that "Syria's only sin in the eyes of American policy was that she did not dance to the American tune and obey American orders," he said that the real aim of U.S. policy in Syria was "to relieve the pressure on Israel, to draw attention away from her, and to divert it to other channels in line with American policy." After failing to persuade the Arabs to conclude a peace settlement with Israel, the U.S.A. had decided "to create artificial dangers to break up Arab unity and dissipate its strength," and had chosen the "Communist threat" for this purpose.

Colonel Nasser went on to assert that U.S. policy in the Middle East had three principal aims: to "liquidate the Israel question on the basis of the *status quo*, which means converting the armistice lines into permanent borders and repudiating the rights of the Palestine Arabs"; to "impose a defence agreement which would serve American interests alone"; and to "get the Arabs to line up behind American policy on all international questions, thus converting the Arab countries into a U.S. sphere of influence." The latest phase of this policy, beginning with the "Eisenhower Doctrine," was aimed at "putting some Arab countries in one sphere together with Israel, a sphere in which the United States would play the role of conciliator and co-ordinator in all military fields. Thus Israel would no longer be the enemy of those Arab States but their partner in an alliance."

After asserting that the United States knew that Syria had not gone over to the "Communist camp," Colonel Nasser described the flying of U.S. arms supplies to Jordan as part of "a large-scale intimidation campaign designed to put the wind up some Kings and Premiers." The weapons supplied to Jordan were not intended for use against any outside enemy but "to control the interior and to stamp out Arab nationalism should this prove possible."

In conclusion, Colonel Nasser declared that Egypt would "stand at the side of Syria unconditionally and unreservedly," and that "all Egypt's political, economic and military potentialities are behind Syria in her battle, which is our battle and the battle of Arab nationalism."

The new Syrian C.-in-C., General Bizri, accompanied by Colonel Sarraj (head of Syrian military intelligence), visited Cairo on Sept. 11-12 for talks with President Nasser and General Amer, the Egyptian C.-in-C. It was stated that the talks had dealt with the co-ordination of the Egyptian and Syrian armed forces and the general military situation. Before leaving Cairo, General Bizri declared that the Syrian and Egyptian forces were "one army under one command," and that both countries would consider an attack on the other as an attack against itself.

Syrian-Egyptian Agreement on Economic Union.

An agreement establishing an economic union between Egypt and Syria was signed in Damascus on Sept. 4 by Dr. Kaissouny, the Egyptian Finance Minister, and M. Khalil Kallas, the Syrian Minister of Economy. The communiqué stated that a joint committee would be set up to report, within three months, on "concrete measures" for the final economic unification of the two countries. Meanwhile, the following measures would be taken "to develop commercial exchanges between the two countries and consolidate their economic collaboration":

(1) Revision of the existing Syro-Egyptian trade agreement so as to promote trade exchanges between the two countries to the greatest possible extent.

(2) A similar revision and expansion of the existing payments agreement between the two countries.

(3) Encouragement for the setting-up of joint commercial and industrial undertakings, including an industrial bank, a commercial bank, and joint concerns for shipping, air transport, and insurance. Reciprocal technical aid was also envisaged.

(4) Free movement of nationals between the two countries, including reciprocal rights of domicile, work, and participation in any commercial, industrial and agricultural enterprises.

Syrian Economic Delegation in Moscow.

A Syrian delegation headed by M. Hassan Jbara (chairman of the Council for Economic Development) visited Moscow from Aug. 28 to Sept. 3 for discussions on matters arising out of the Syro-Soviet economic agreement concluded on Aug. 6 (see 15705 A). A joint communiqué stated (i) that the Syrian delegation had had talks with the State Committee for Foreign Economic Relations (see 15701 E), in which experts of both countries had taken part; (ii) that they had dealt with "problems concerning the co-operation envisaged by the Soviet-Syrian communiqué of Aug. 6"; (iii) that it had been agreed that "the final co-ordination of all questions will take place in Syria"; (iv) that "an appropriate agreement will be signed on economic and technical co-operation"; and (v) that a Soviet economic delegation would go to Syria for this purpose in the near future, headed by M. Nikitin, vice-chairman of the State Committee for Foreign Economic Relations.

The communiqué said that the matters discussed had included Soviet economic and technical aid to Syria "in the sphere of railway and highway construction, irrigation, the building of electric power stations and industrial and other installations, and geological prospecting." No details were given of specific projects, but the Beirut Correspondent of *The Times* reported (Aug. 27) that they were expected to include the building of a dam on the Euphrates to provide hydro-electric power and irrigation for the newly developing Jezireh area; a new railway from Jezireh to Latakia through Aleppo; and the development of the port of Latakia, Syria's principal outlet on the Mediterranean. Syria was expected to make payment through increased exports of cotton and cereals to the U.S.S.R. It was stated in this connexion that the Communist countries already took nearly 40 per cent of Syria's cotton exports, and that Syria's wheat surplus for the current year was estimated at 1,000,000 tons.

Syrian Allegations of U.S. "Provocations."

A Syrian official spokesman alleged on Sept 9 that five American warships had approached the Syrian coast on the previous day; that two unidentified jet planes had flown over a Syrian town (unnamed); and that the United States was committing "provocative actions to force Syria to take measures which would be used as a pretext for committing aggression against her." The allegations were completely denied in Washington, where it was pointed out that no U.S. warships were operating in the vicinity of Syrian waters.

The Syrian Cabinet met in emergency session on Sept. 10, no official statement being issued. It was reported in Beirut, however, that the Cabinet had considered a protest to the United Nations against the alleged "provocation" by American warships. It was also understood that it had been decided to send Notes to Jordan, Iraq and the Lebanon asking those countries if they had expressed anxiety at the Syrian situation to Mr. Loy Henderson during his Middle East visit.

The U.S. airlift to Jordan was strongly criticized in Damascus, a Government spokesman asserting that the United States had been "angered by Syria's attainment of uncommitted military and economic power."—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Soviet Embassy Press Department, London) **(Prev. rep. Syria, 15721 A.)**

A. INDIA. — Report of Official Language Commission.

The report and recommendations of the Official Language Commission were issued on Aug. 12, a year after they had been submitted to President Prasad. The Commission of 21 members, set up in 1955 under the chairmanship of the late Mr. B. G. Kher (see 14321 C), recommended the increasing use of Hindi for official purposes in place of English, but said that it was "neither necessary nor possible to pronounce now whether a general change-over would be found practicable by 1965" (as required by the Indian Constitution) since it would depend on the efforts made in that direction in the meantime. Hindi, being "the obvious linguistic medium for pan-Indian purposes," should replace English in so far as it would act as the mass medium for India's programme of compulsory elementary education, and also in administration, public life, and the day-to-day business of the country. This decision had been taken because more people spoke and understood Hindi, and not because other regional languages were in any way inferior to it in point of development.

While no restriction was to be imposed on the use of English for any part of the country's purposes, the report advocated that in future it should be taught in secondary schools principally as a "language of comprehension" and not as a "literary language," except where it was taken voluntarily. English would continue to be used as long as necessary as an alternate medium for competitive examinations for All-India Services, and for use in the Supreme Court and the High Courts. At the time of the change-over, however, the entire Statute Book of the country should be in Hindi, which should also be the language of legislation in the States, of the Central Parliament, and of statutory orders and rules issued under any law. Translations into regional languages should be provided where necessary.

Regarding the regional languages, the Commission recommended their retention for administrative and judicial purposes in the State Governments; but where this entailed dealing with other State Governments, or with the Central Government, the medium of communication should be Hindi. Primary education should be conducted in the language of the region, but at the secondary stage instruction in Hindi should be made compulsory the decision as to when compulsion should be introduced being left to the State Governments concerned. **Other recommendations included the setting-up of a National Academy of Languages, preferably at Hyderabad, for developing India's 14 major languages.**

Two members of the Commission (Dr. Suniti Kumar Chatterjee and Dr. P. Subbarayan, who dissented from its recommendations) held that a hasty attempt to achieve the change-over would result in the "imposition of Hindi on non-Hindi-speaking people," leading to confusion in public life. They suggested that the different States should be left to decide, after Hindi had been voluntarily adopted by them, to what extent it could be used for communication with the Central Government and with other State Governments. English should continue to be used until such time as the official language eventually adopted had been fully developed.

The Constitution requires the appointment of a second Commission in 1960 to consider whether the progress made with regard to Hindi justifies the change-over by 1965.
(The Hindu, Madras - The Statesman, Calcutta) **(14321 C.)**

B. SOVIET UNION. — Abolition of Ministry of State Control. - Replacement by Control Commission. - M. Molotov appointed Ambassador to Mongolia.

It was announced on Aug. 29 that the Presidium of the Supreme Soviet had abolished the Ministry of State Control (formerly headed by M. Molotov before his expulsion from the party leadership) and had established in its place a Control Commission under the Council of Ministers.

It was explained (1) that the change had been necessitated by the new conditions arising from the extension of the powers of the Union Republics and local industrial administrations under M. Khrushchev's decentralization plan (see 15575 A); and (2) that the Control Commission would "check on behalf of the Government the actual fulfilment of its decisions on major national economic problems" and ensure strict economy in State expenditure.

The former Ministry of State Control had general supervisory authority over other Ministries and Government organs, and over State property such as factories and warehouses. It was responsible *inter alia* for control of State expenditure and for ensuring that Government decisions were carried out.

The Tass Agency announced on Aug. 30 that M. Molotov had been appointed Ambassador to the Mongolian People's Republic. — (Soviet Embassy Press Department, London) **(Prev. rep. M. Molotov, 15639 A.)**

A. NIGERIA. — The London Constitutional Conference. - Agreement on Formation of All-African Federal Government and Regional Self-Government. - New Federal Government formed by Mr. Balewa.

The Nigerian constitutional conference, which had originally been planned for September 1956 but had been postponed because of the inquiry into the affairs of the African Continental Bank (see 15489 A), opened on May 23 at Lancaster House, London, with the Colonial Secretary (Mr. Lennox-Boyd) in the chair. Proposals put forward by the three Regional Premiers—the Sardauna of Sokoto (Northern Region), Chief Awolowo (Western Region), and Dr. Azikiwe (Eastern Region) —for the granting of independence to the Federation of Nigeria not later than 1960 were rejected by Mr. Lennox-Boyd, who refused to agree in advance to a fixed date for independence. Agreement was reached, however, on a number of major constitutional changes, including (1) the appointment of a Prime Minister of the Federation, with an all-Nigerian Executive Council; (2) the establishment of full self-government in the Eastern and Western Regions immediately, and in the Northern Region in 1959; (3) the establishment of responsible government in the Southern Cameroons; and (4) the formation of a bicameral Federal Legislature after the attainment of independence, consisting of a House of Representatives elected by direct suffrage and a Senate.

The Nigerian delegation at the London Conference consisted of 35 delegates (10 from each region and five from the Southern Cameroons) and 18 official advisers. The delegation included representatives of all the major parties in the three regions— eight from the National Council of Nigeria and the Cameroons (N.C.N.C.), seven from the Action Group, five from the Northern People's Congress, two from the Northern Elements Progressive Union, and one each from the United Middle Belt Congress and the United National Independence Party—and six representatives of chiefs and other groups.

At the beginning of the conference the three Regional Premiers and Dr. Endeley (Leader of Government Business in the Southern Cameroons House of Assembly) submitted a joint memorandum proposing that the British Government should undertake to grant independence to the Federation in 1959. Mr. Lennox-Boyd, however, suggested that the conference should first deal with a number of other important questions, such as the future structure of the Federation and the allocation of revenues. Further discussion on independence was accordingly postponed until June 23, when Mr. Lennox-Boyd made the following statement:

"I understand that it is proposed that some time about January 1960 the new Nigerian Parliament will debate a resolution asking H.M. Government to agree to full self-government within the Commonwealth by a date in 1960 which will have been mentioned in the resolution. In any case, the constitutional machinery would take time, and you [the Nigerian delegates] would no doubt bear this very much in mind in coming to a conclusion as to what date you should ask for. It might therefore be (as many of you have urged) a good thing for there to be some informal consultation with us as to what sort of date was realistic. On receipt of your resolution H.M. Government will consider it with sympathy, and will then be prepared to fix a date when they would accede to the request. We could not at this stage give any undertaking that the date would be the same date as asked for in the resolution, though we would do our utmost to meet the resolution in a reasonable and practicable manner. Delegates, I hope, know H.M. Government well enough to be sure that they would not invent reasons for artificially extending the date. H. M. Government would, of course, be very much guided in their choice of a date by the way everything was going, by how the two Regions now about to enjoy self-government had taken the strain of this great step forward, and by how the country as a whole had faced up to the problem of minorities, on which a commission would already have reported."

The Regional Premiers and Dr. Endeley replied on June 24 in the following joint statement:

"... We feel bound to express our disappointment that it has not been possible for H.M. Government to give an undertaking to grant independence to Nigeria on a date to be named in 1960 by the new Nigerian Parliament. The year 1959 has been unanimously proposed by the people of Nigeria, and we have given consideration to a date in 1960 only because we appreciate that the solution to the various problems that must be disposed of before independence will take longer than we had thought. Having gone thus far on the path of reason and realism, we had thought that the Secretary of State would accede to our united wishes. In the circumstances, we can do no more than take note of the Secretary of State's statement, while reserving to ourselves the right to pursue the issue further with a view to impressing upon H.M. Government the necessity for granting independence to the Federation of Nigeria not later than April 2, 1960."

The decisions of the conference, which concluded on June 26, were published on July 4 as a White Paper (Cmd. 207) and are summarized below under cross-headings:

Regional Self-government. Agreement was reached on proposals for the constitution of the Eastern and Western Regions as self-governing regions forthwith. The Governors of the Regions would retain the power to disallow measures which contravened British treaty obligations or conflicted with the functions of the Federal Government, but in all other matters they would act on the advice of their Ministers, and would cease to preside over the Executive Council. With the Secretary of State's approval, the Governor-General might issue directions to a Region to ensure that its executive authority was not used to impede or prejudice the Federal Government. In order to ensure the independence of the Public Service and the judiciary, all Public Service matters would be controlled by regional commissions "insulated from politics"; judges would be appointed by the Governor on the advice of the Regional Judicial Service Commission; and the Director of Public Prosecutions would be an officer in the Public Service with sole responsibility for the initiation, conduct, and discontinuance of prosecutions. A House of Chiefs, such as already existed in other regions, would be established in the Eastern Region.

Regional self-government would be introduced in the Northern Region in 1959. In the meantime, the European members of the Executive Council (the Civil Secretary and the Financial Secretary) would be replaced by African Ministers, but the Governor would continue to preside over the Council and would retain his reserve powers. The post of Deputy Governor would be created. The number of elected members in the House of Assembly would be increased from 131 to 170, and the House of Chiefs would be enlarged from 50 to 62 to include all first-class chiefs. Provisions were laid down for devolution of powers to provincial assemblies.

The Federal Government. The Governor-General would select a Prime Minister of the Federation who enjoyed the support of a majority of the House of Representatives, and would request him to select not less than 10 Ministers, one of whom must come from the Cameroons. The European *ex-officio* members of the Executive Council (the Chief Secretary, the Attorney-General, and the Financial Secretary) would be dropped, and instead of the Chief Secretary the office of Deputy Governor-General would be established The Governor-General would continue to preside over the Executive Council and would retain his reserve powers.

The present House of Representatives would run its full course until about the end of 1959. Its successor would consist of 320 members, elected on the basis of one member for about each 100,000 of the population. At the same time a second House would be established, with the title of Senate, consisting of 12 members from each region and from the Southern Cameroons, four members from the federal territory of Lagos, and four representatives of special interests appointed by the Governor-General at his discretion. The Senate would have power to delay Bills (other than money Bills) for six months.

The House of Representatives would be elected by universal adult suffrage in the Eastern and Western Regions, Lagos, and the Southern Cameroons, and by adult male suffrage in the Northern Region.

Minority Problems. After discussions on the possible creation of new States and the revision of boundaries, during which representatives of minor tribes expressed fears of coming under the domination of the Ibos, Yorubas, or Hausas (the leading tribes in the Eastern, Western, and Northern Regions respectively), it was agreed that an Inquiry Commission should be appointed to ascertain the facts about the fears of minorities, to propose means of allaying them, and to consider what safeguards should be included for this purpose in the Constitution. If no other solution seemed to meet the case, the Commission would be empowered to make detailed recommendations for the creation of not more than one new State in each Region. Before agreeing to any such recommendations, the British Government would take into account the effect of the establishment of any new State on the existing Regions and on the Federation as a whole, and would have to be convinced that any new State would be economically and administratively viable.

Division of Functions. One of the main differences of opinion at the conference arose over whether the police should remain a federal force (the view of the Eastern Region) or should be transferred to regional control, as advocated by the Western and Northern Regions. It was agreed that the police should be moved from the federal list of subjects to the concurrent list, as law and order were the concurrent responsibility of the Federal and Regional Governments. After independence the ultimate responsibility for law and order would be inherited by the Federal Government from the Secretary of State, and it would therefore always be necessary to have a federal police force. During the transitional stage the federal police forces stationed in the Regions would be reorganized so that they could become the nucleus of regional forces at a later date, and a Police Service Commission would be set up to ensure that no police force should fall under political party control. The final decision whether the Regions should set up their own police forces would be taken by the Governor-General immediately prior to independence.

A commission was appointed to examine how far taxation policy should be in the hands of the Regions and how far in those of the Federal Government, and to consider the degree of federal control over loan and credit policies, having regard to the creation of a new Nigerian currency and of a Central Bank.

The Overseas Civil Service. Members of the Overseas Civil Service employed by the Nigerian Governments would be given the opportunity to enter the service of the United Kingdom Government; those who did so might continue to be employed in Nigeria on secondment to a Nigerian Government so long as their services were required. While serving on secondment, an officer might be considered for appointment to any post for which the Secretary of State was in a position to select candidates. The Federal and Regional Governments undertook to treat "special list" officers on equal terms with other candidates for posting and promotion; this would not preclude them, however, from reserving a list of posts for Nigerians, by agreement with the British Government.

The Cameroons. Responsible government would be introduced in the Southern Cameroons. The Governor-General would be the High Commissioner; the Executive Council would contain a majority of elected members, and would be headed by a Premier; the elected members of the House of Assembly would be increased to 26; and a House of Chiefs would be established. [The delegate from the Northern Cameroons reaffirmed the desire of this area to remain part of the Northern Region.]

The Trusteeship Agreement would be reviewed when Nigeria became independent, in consultation with the U.N., and there would be no question of forcing the Cameroons to remain part of an independent Nigeria contrary to her own wishes.

In statements made after the conference, the Premiers of the Northern and Western Regions both said that they were satisfied with its results. Dr. Azikiwe, on the other hand, expressed disappointment with the failure to reach agreement on the demand for independence by 1959.

The **Sardauna of Sokoto** (Premier of the Northern Region) described the conference as "a real step forward in our constitutional advancement." Those taking part had "seen clearly what problems must be solved before a united Nigerian people can take their place beside the other countries of the British Commonwealth," whilst the leaders of all political parties had achieved "unprecedented" unity and had shown that they could meet to discuss Nigeria's problems calmly and dispassionately.

Chief Awolowo (Premier of the Western Region) expressed confidence that Nigeria would become fully self-governing by April 2, 1960. While everything had not gone "exactly as each delegation would have wished," he was "perfectly satisfied" with what the conference had achieved.

Dr. Azikiwe (Premier of the Eastern Region), on the other hand, said that the Colonial Secretary had "studiously ignored the feelings of Nigerians, who, through their duly accredited representatives, had demanded independence for 1959." The "partial failure" of the conference he attributed to two factors: (i) the "immaturity" of the Nigerian delegations, who had agreed to place the subject of independence by 1959 second on the agenda, contrary to their previous agreement that it should be the first item, and had accepted the suggestion that the date-line for independence should be shifted from 1959 to 1960; and (ii) the diplomacy of Mr. Lennox-Boyd, who (Dr. Azikiwe asserted) had "spared no effort to play on the vanity of the Nigerian delegations."

The congress of the Action Group (the governing party in the Western Region) resolved on July 13 "to work relentlessly with a view to rallying the whole country for the attainment of full Nigerian independence on April 2, 1960."

Formation of New Federal Government.

The first all-African Federal Executive Council was formed on Aug. 30 by Mr. Balewa, the leader of the Northern People's Congress in the House of Representatives. To demonstrate the unity of Nigeria, Mr. Balewa selected his Ministers not only from the Northern People's Congress, the N.C.N.C., and the Kamerun National Congress (which had formed the previous Government) but also from the Action Group, which had constituted the Opposition. The membership of the new Government was as follows:

*Mr. A. A. Tafawa Balewa	Prime Minister and Finance.
*Dr. K. O. Mbadiwe ..	Commerce and Industry.
*Mr. A. M. Ribadu	Lands, Mines and Power, and Lagos Affairs.
*Chief Festus Okotie-Eboh	Labour and Welfare.
*Mr. Raymond Njoku ..	Transport.
Chief S. L. A. Akintola ..	Communications and Aviation.
*Mr. Aja Nwachuku ..	Education.
Mr. Ayo Rosiji	Health.
*Chief Kolawole Balogun ..	Research and Information.
*Mr. J. M. Johnson ..	Internal Affairs.
*Mr. M. I. Wada	Works and Surveys.
*Mr. Victor Mukete ..	Minister of State representing the Southern Cameroons.
Mr. Z. B. Dipcherima ..	Minister of State.

*Member of the previous Executive Council.

Mr. Balewa (45), the son of a farmer, became a teacher and studied at the London University Institute of Education. He entered the Council of Ministers in 1951 as Minister of Works, and became Minister of Transport in 1955, being appointed a member of the Governor-General's Privy Council and a C.B.E. in the same year. The Action Group is represented in the new Government by **Chief Akintola**, formerly Leader of the Opposition, and **Mr. Rosiji**, a Lagos barrister. The only other new Minister is **Mr. Dipcherima**, formerly Parliamentary Secretary to the Ministry of Transport.

In view of the importance of this constitutional advance, the Governor-General (Sir James Robertson) opened the new session of the House of Representatives on Sept. 2 with a State procession from Government House. The day was celebrated in Lagos as a public holiday.

Other Nigerian Political Developments.

Other recent political developments in Nigeria are summarized below under cross-headings:

Elections in Western Region. General elections to the House of Assembly in the Western Region took place in May 1956 and resulted in a victory for the Action Group, which won 48 seats. The remaining 32 seats were won by the N.C.N.C.

Elections in Southern Cameroons. As a result of general elections to the Southern Cameroons House of Assembly, held on March 15, 1957, the Kamerun National Congress retained power, though with a reduced majority. Results for 17 of the 19 seats were as follows, the position in the former Assembly being shown in parentheses: Kamerun National Congress 10 (16), Kamerun National Democratic Party 5 (2), Kamerun People's Party 2 (1). The Kamerun National Democratic Party was described by *The Times* as "a party formed by Communist-inspired refugees from the French Cameroons." The Kamerun People's Party is an offshoot of the N.C.N.C.

Merger of Action Group and United National Independence Party. It was announced on July 17, 1957, that the United National Independence Party had decided to merge with the Action Group. The United National Independence Party, which was led by Professor Eyo Ita, had been formed in the Eastern Region in 1953 as the result of a split in the N.C.N.C.

The appointment of Mr. G. W. Bell, Political Agent in Kuwait, as Governor of the Northern Region in succession to Sir Bryan Sharwood-Smith, retiring, was announced on July 24, 1957. (Report of the Nigerian Constitutional Conference, Cmd. 207 - Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Constitution, Council of Ministers, 14140 A; Elections in Western Region, 12016 A.)

A. JAMAICA. — Rail Disaster.

The worst rail disaster in Jamaica's history occurred on Sept. 2, when 174 people were killed and between 600 and 700 injured, many seriously, when an excursion train was derailed at Kendal, 65 miles north-west of Kingston.

The train was returning to Kingston from Montego Bay (the seaside resort on the north-west coast) with some 1,500 excursionists, most of them members of a party organized by a Roman Catholic Church in Kingston; they included a high proportion of children, many of them accompanied by their parents. The disaster took place as the train was rounding a double bend, nine of the 12 coaches leaving the rails and one of them plunging into a 20-foot ravine. Nearly all the coaches were smashed and burned, and rescue work went on for nearly 24 hours to extricate hundreds of trapped passengers and recover the bodies of the victims. Many of the dead could not be identified, the bodies being buried in mass graves near the scene of the crash and at Mandeville (10 miles distant) by order of the Jamaican Government. The Chief Minister, Mr. Norman Manley, immediately went to the scene of the disaster and subsequently appointed an Inquiry Commission headed by the Chief Justice, Mr. Colin MacGregor. A relief fund was opened to which the Jamaican Government contributed £10,000. Sunday, September 8, was observed throughout the island as a day of national mourning, special services being held in churches of all denominations.

The disaster was the worst in Jamaica since 1907, when 800 people were killed in the Kingston earthquake of that year. (Times - Daily Telegraph - Manchester Guardian)

B. AUSTRALIA. — Canberra Development Plan.

The Federal Minister of the Interior (Mr. Fairhall) announced on Aug. 25 that a five-year plan for the development of Canberra had been put in hand as from the beginning of the new financial year in July. A National Capital Development Commission would be set up to control the anticipated rapid development of the city during the next five years, and to co-ordinate the functions of planning and construction at present divided between the Department of the Interior and the Department of Works.

Mr. Fairhall stated that the plan would cover the transfer of Government departments (notably defence) from Melbourne to Canberra, and that a population of 60,000 was envisaged by 1962, compared with Canberra's present population of 35,000. (Australian News and Information Bureau)

A. OLYMPIC GAMES. — The Melbourne Olympiad.

The XVIth Olympiad of the Modern Era was held at Melbourne from Nov. 22 to Dec. 8, 1956—the first occasion on which the Games had taken place in the Southern Hemisphere. The Prime Minister of Australia (Mr. R. G. Menzies) was President of the Games; Mr. (now Sir) W. S. Kent Hughes, formerly Federal Minister for the Interior and Works, served as chairman of the Organizing Committee; and Lieut.-General Sir William Bridgeford was Chief Executive Officer for the Games. The Olympiad was opened by H.R.H. The Duke of Edinburgh, who was then visiting Australia in the course of his world-wide Commonwealth tour (see 15411 A).

Because of the tense international situation at the time owing to the crises in Hungary and the Middle East, and because of the great expense of sending teams to Australia, fewer competitors took part than was the case in the Helsinki Olympiad of 1952. [The total number of athletes participating at Melbourne was 3,539, compared with 5,867 at Helsinki.] Nevertheless, the number of countries represented (67) was only two short of the Helsinki record of 69, the countries participating in the Melbourne Games being as follows:

Afghanistan, Argentina, Australia, Austria, Bahamas, Belgium, Bermuda, Brazil, British Guiana, Bulgaria, Burma, Canada, Ceylon, Chile, Colombia, Cuba, Czechoslovakia, Denmark, Eire, Ethiopia, Fiji, Finland, Formosa China (i.e. Nationalist China), France, Germany, Great Britain, Greece, Hong Kong, Hungary, Iceland, India, Indonesia, Israel, Italy, Jamaica, Japan, Kenya, Korea (South), Liberia, Luxemburg, Malaya, Mexico, New Zealand, Nigeria, North Borneo, Norway, Pakistan, Persia, Peru, Philippines, Poland, Puerto Rico, Portugal, Rumania, Siam, Singapore, South Africa, Sweden, Trinidad, Turkey, Uganda, Uruguay, U.S.A., U.S.S.R., Venezuela, Vietnam (South), Yugoslavia.

The principal countries absent were the Netherlands, Spain, Switzerland, Communist China, Egypt, Lebanon and Iraq.

The Netherlands Olympic Committee withdrew from the Games because the Soviet actions in Hungary had "spoiled the Olympic atmosphere" and made it impossible for Dutch athletes to take part together with Soviet teams; the 100,000 guilders (£10,000) which had been raised for the expenses of the Dutch team were made available for the relief of Hungarian refugees. The Spanish Sports Federation also withdrew from the Olympiad in protest at the Soviet intervention in Hungary, declaring that it was not fitting that Spanish athletes should compete "while the liberty of peoples is being trampled upon."

The Swiss Olympic Committee had decided on Nov. 7 not to send a team to Melbourne because the Swiss gymnastic associations had refused to send athletes, as a protest against the Soviet repression of the Hungarian uprising. Three days later, however, the Swiss Committee reversed its decision and announced that it would be participating in the Olympiad. As it subsequently proved impossible to charter an aircraft in time to take the Swiss team to Melbourne, Switzerland's participation in the Games had to be abandoned for that reason.

Communist China refused to take part in the Games because of the International Olympic Committee's decision to allow a team from Formosa to compete under the designation "Formosa China." The All-China Athletic Federation in Peking demanded that the International Committee should withdraw its permission for Nationalist China to compete separately; claimed that the All-China Federation should be recognized as the only national Chinese Olympic organization; and declared that "this artificial splitting of China cannot be tolerated." The International Committee rejected these complaints and the Chinese People's Republic withdrew from the Games.

Egypt had demanded that the International Olympic Committee should expel from the Games those countries "guilty of aggression against Egypt" (i.e. Britain, France and Israel). The demand was rejected by the International Committee, which expressed its astonishment that Egypt should have made such a demand "based on purely political motives." The Lebanon withdrew from the Games because of Australia's attitude during the Suez crisis.

In contrast to the Chinese attitude (see above), Eastern and Western Germany had agreed to send an all-German national team to Melbourne, its members being chosen on the basis of individual performance.

The International Olympic Committee had previously given tentative recognition to the East German Olympic Committee on condition that it reached an agreement with the West German Olympic Committee on an all-German team for Melbourne. Such an agreement was subsequently arrived at by the two German Committees, which agreed that each committee should bear the costs of competitors from its own part of Germany. It was also agreed that the all-German team should compete under the black-red-gold flag, which is common to the Federal Republic and the Democratic Republic.

About 45 members of the Hungarian Olympic team, including both men and women, decided at the end of the Games to remain in Australia rather than return to Hungary. All of them were subsequently given asylum in Australia or the United States. Four members of the Rumanian team also sought asylum in Australia.

Of about 175 Hungarian athletes, trainers and coaches, only about 130 returned to Hungary. Those remaining in Australia included some of Hungary's best-known athletes and trainers, as well as the deputy chairman of the Hungarian Olympic Committee. Other Hungarian athletes, though returning to Europe, got off the plane at Milan, Paris and other places to join families who had succeeded in escaping from Hungary.

All the track and field events, as well as the hockey and association football finals, were held at the Melbourne Cricket Ground, which served as the main Olympic Stadium and whose capacity was increased to 120,000 by a new three-tiered concrete stand, 80 feet high, holding 40,000 people. An Olympic Park was built on a 25-acre site beside the Yarra River, at a cost of £A4,000,000, in which a new stadium was built for the swimming, diving and water-polo events, capable of seating 5,000 people. The yachting events were held in Port Phillip Bay, on which Melbourne is situated, while the rowing and canoeing events were held on Lake Wendouree (near Ballarat), about 70 miles from Melbourne.

The 3,500 athletes were housed in an Olympic Village built on a 112-acre site at Heidelberg (near Melbourne) at a cost of £A2,750,000.

Owing to Australian quarantine regulations, the Equestrian Olympic Games were held in Stockholm from June 11-17, 1956, and not in Melbourne. The Australian authorities had refused to lift the regulation whereby all foreign horses coming into Australia, except those from Britain, Ireland and New Zealand, must spend six months in quarantine.

In accordance with tradition, the Olympic Torch was kindled by the sun's rays at the foot of Mount Olympus in Greece. It was carried by relays of Greek athletes to Athens and taken on board an airliner of Qantas Airways for the 10,000-mile flight to Darwin (North Australia), being kept alight thoughout the journey. From Darwin it was flown by the Royal Australian Air Force to Cairns, on the coast of Northern Queensland. The Olympic Torch was carried by relays of Australian athletes from Cairns to the Olympic Stadium in Melbourne (a distance of 3,000 miles), during which the runners crossed the Great Dividing Range. The route taken was Cairns - Townsville - Rockhampton - Brisbane - Sydney - Canberra - Bendigo - Ballarat - Melbourne—i.e. down the whole east coast of Australia to Sydney, and thence inland across part of New South Wales and most of Victoria.

The detailed results of the Melbourne Olympic Games are set out below, giving the first three placings in the final of each event (i.e. those qualifying for gold, silver, and bronze medals respectively):

Men's Athletics.

100 Metres. 1. R. Morrow (U.S.A.) and W. Baker (U.S.A.), each 10.5 sec; H. Hogan (Australia) 10.6 sec.

200 Metres. R. Morrow (U.S.A.) 20.6 sec (new Olympic record); A. Stanfield (U.S.A.) 20 7 sec.; W. Baker (U.S.A.) 20 9 sec.

400 Metres. C. Jenkins (U.S.A.) 46.7 sec., K. Haas (Germany) 46.8 sec.; A. Ignatyev (U.S.S.R.) and V. Hollsten (Finland), each 47 0 sec.

800 Metres. T. Courtney (U.S.A.) 1 min. 47.7 sec. (new Olympic record); D. Johnson (Great Britain) 1 min. 47.8 sec.; A. Boysen (Norway) 1 min. 48.1 sec.

1,500 Metres. R. Delany (Eire) 3 min. 41.2 sec. (new Olympic record); K. Richtzenhain (Germany) 3 min. 42.0 sec.; J. Landy (Australia) 3 min. 42.0 sec.

5,000 Metres. V. Kuts (U.S.S.R.) 13 min. 39.6 sec. (new Olympic record); G. Pirie (Great Britain) 13 min. 50.6 sec.; G. Ibbotson (Great Britain) 13 min. 54.4 sec. Two of the three finalists—Vladimir Kuts and Gordon Pirie—had held the world record for the distance, which is at present held by Pirie (13 min. 36.8 sec.).

10,000 Metres. V. Kuts (U.S.S.R.) 28 min. 45.6 sec. (new Olympic record); J. Kovacs (Hungary) 28 min. 52.4 sec.; A. Lawrence (Australia) 28 min. 53.6 sec.

Marathon. A. Mimoun (France) 2 hr. 25 min. 00 sec.; F. Mihalic (Yugoslavia) 2 hr. 26 min 32 sec., V. Karvonen (Finland) 2 hr. 27 min. 47 sec. Emil Zatopek (Czechoslovakia), who set up the Olympic marathon record at Helsinki in 1952 (2 hr 23 min. 03 sec), finished in sixth place.

4×100 Metres Relay. U.S.A., 39.5 sec. (new world and Olympic record); U.S.S.R., 39.8 sec.; Germany 40.3 sec.

4×400 Metres Relay. U.S.A. 3 min. 04.8 sec.; Australia 3 min. 06.2 sec.; Great Britain 3 min. 07.2 sec.

20,000 Metres Walk. L. Spirin (U.S.S.R.) 1 hr. 31 min. 27.4 sec.; A. Mikenas (U.S.S.R.) 1 hr. 32 min. 03.0 sec.; B. Junk (U.S.S.R.) 1 hr. 32 min. 12.0 sec.

50,000 Metres Walk. N. Read (New Zealand) 4 hr. 30 min. 42.8 sec.; E. Maskinskov (U.S.S.R.) 4 hrs. 32 min. 57.0 sec.; J. Ljunggren (Sweden) 4 hrs. 35 min. 02.0 sec.

110 Metres Hurdles. L. Calhoun (U.S.A.) and J. Davis (U.S.A.), each 13.5 sec. (new Olympic record); J. Shankle (U.S.A.) 14.1 sec.

400 Metres Hurdles. G. Davis (U.S.A.) 50.1 sec.; E. Southern (U.S.A.) 50.8 sec.; J. Culbreath (U.S.A.) 51.6 sec.

3,000 Metres Steeplechase. C. Brasher (Great Britain) 8 min. 41.2 sec. (new Olympic record); S. Rozsnyoi (Hungary) 8 min. 43.6 sec.; E. Larsen (Norway) 8 min. 44.0 sec.

High Jump. C. Dumas (U.S.A.) 6 ft. 11¼ in. (new Olympic record); C. Porter (Australia) 6 ft. 10½ in.; L. Kashkarov (U.S.S.R.) 6 ft. 9½ in.

Long Jump. G. Bell (U.S.A.) 25 ft. 8¼ in.; J. Bennett (U.S.A.) 25 ft. 2½ in.; J. Valkama (Finland) 24 ft. 6¼ in.

Pole Vault. R. E. Richards (U.S.A.) 14 ft. 11¼ in. (new Olympic record); R. Gutowski (U.S.A.) 14 ft. 10½ in.; G. Roubanis (Greece) 14 ft. 9 in. The Rev. Robert Eugene Richards (30), who has cleared 15 feet over 100 times, broke his own Olympic record (14 ft. 11¼ in.) set up at Helsinki in 1952.

Hop, Step and Jump. A. Ferreira da Silva (Brazil) 53 ft. 7¼ in. (new Olympic record); V. Eirnarsson (Iceland) 53 ft. 4 in.; V. Kreer (U.S.S.R.) 52 ft. 6¼ in.

Throwing the Javelin. E. Danielsen (Norway) 281 ft. 2¼ in. (new world and Olympic record); J. Sidlo (Poland) 262 ft. 4½ in.; V. Tsibulenko (U.S.S.R.) 260 ft. 9½ in. Egil Danielsen (23) was the first Norwegian to win an Olympics title for 36 years.

Throwing the Hammer. H. Connolly (U.S.A.) 207 ft. 3¾ in. (new Olympic record); M. Krivonosov (U.S.S.R.) 206 ft. 9½ in.; A. Samotsvetov (U.S.S.R.) 205 ft. 3 in.

Throwing the Discus. A. Oerter (U.S.A.) 184 ft. 10½ in. (new Olympic record); F. Gordien (U.S.A.) 179 ft. 9½ in.; D. Koch (U.S.A.) 178 ft. 5½ in. Fourth place went to M. Pharaoh (Great Britain), the first British athlete to be placed in the first six in this event since 1896. His throw was 178 ft. 0½ in.

Putting the Weight. P. O'Brien (U.S.A.) 60 ft. 11 in. (new Olympic record); W. Nieder (U.S.A.) 59 ft. 7¾ in.; J. Skobla (Czechoslovakia) 57 ft. 10¾ in.

Decathlon. M. Campbell (U.S.A.) 7,937 points (new Olympic record); R. Johnson (U.S.A.) 7,587 points; V. Kuznetsov (U.S.S.R.) 7,465 points. The Decathlon comprises running (100, 400 and 1,500 metres), jumping (long and high), 100-metres hurdles, the pole vault, the discus and javelin, and putting the weight.

Women's Athletics.

100 Metres. Betty Cuthbert (Australia) 11.5 sec. (equals Olympic record); C. Stubnick (Germany) 11.7 sec.; M. Mathews (Australia) 11.7 sec.

200 Metres. Betty Cuthbert (Australia) 23.4 sec. (new Olympic record); C. Stubnick (Germany) 23.7 sec., M. Mathews (Australia) 23.8 sec.

4×100 Metres Relay. Australia 44.5 sec. (world and Olympic record); Great Britain 44.7 sec.; U.S.A. 44.9 sec.

80 Metres Hurdles. Shirley Strickland (Australia) 10.7 sec. (new Olympic record); G. Köhler (Germany) 10.9 sec.; N. Thrower (Australia) 11.0 sec.

High Jump. Mildred McDaniel (U.S.A.) 5 ft. 9¼ in. (new world and Olympic record); T. Hopkins (Great Britain) and M. Pisaryeva (U.S.S.R.) each 5 ft. 5½ in.

Long Jump. Elzbieta Krzesinska (Poland) 20 ft. 10 in. (new world and Olympic record); W. White (U.S.A.) 19 ft. 11½ in.; N. Dvalishvili (U.S.S.R.) 19 ft. 11 in.

Throwing the Javelin. Inese Janzeme (U.S.S.R.) 176 ft. 8½ in. (new Olympic record); M. Ahrens (Chile) 165 ft. 3½ in.; N. Konyayeva (U.S.S.R.) 164 ft. 11½ in.

Throwing the Discus. Olga Fikotova (Czechoslovakia) 176 ft. 1½ in. (new Olympic record); I. Beglyakova (U.S.S.R.) 172 ft. 4½ in.; N. Ponomareva (U.S.S.R.) 170 ft. 8 in. The previous Olympic record (168 ft. 8¼ in.) was achieved by Nina Ponomareva at Helsinki in 1952.

Putting the Weight. Tamara Tishkyevich (U.S.S.R.) 54 ft. 5 in. (new Olympic record); G. Zybina (U.S.S.R.) 54 ft. 2¾ in.; M. Werner (Germany) 51 ft. 2½ in.

Men's Swimming.

100 Metres Free-Style. J. Henricks (Australia) 55.4 sec. (new Olympic record); J. Devitt (Australia) 55.8 sec.; G. Chapman (Australia) 56.7 sec.

400 Metres Free-Style. M. Rose (Australia) 4 min. 27.3 sec. (new Olympic record); T. Yamanaka (Japan) 4 min. 30.4 sec.; G. Breen (U.S.A.) 4 min. 32.5 sec.

1,500 Metres Free-Style. M. Rose (Australia) 17 min. 58.9 sec.; T. Yamanaka (Japan) 18 min. 00 sec.; G. Breen (U.S.A.) 18 min. 08 sec.

200 Metres Breast-stroke. M. Furukawa (Japan) 2 min. 34.7 sec. (new Olympic record); M. Yoshimura (Japan) 2 min. 36.7 sec.; V. Yunitshev (U.S.S.R.) 2 min. 36.8 sec.

200 Metres Butterfly-stroke (new event). W. Yorzyk (U.S.A.) 2 min. 19.3 sec.; T. Ishimoto (Japan) 2 min. 23.8 sec.; G. Tumpek (Hungary) 2 min. 23.9 sec.

100 Metres Back-stroke. D. Thiele (Australia) 1 min. 02 sec. (new Olympic record); J. Monckton (Australia) 1 min. 03 sec.; F. McKinney (U.S.A.) 1 min. 04 sec.

4×400 Metres Relay. Australia 8 min. 23.6 sec. (new world and Olympic record); U.S.A. 8 min. 31.5 sec.; U.S.S.R. 8 min. 34.7 sec.

Women's Swimming.

100 Metres Free-style. Dawn Fraser (Australia) 62.0 sec. (new world and Olympic record); L. Crapp (Australia) 62.3 sec.; F. Leech (Australia) 65.1 sec.

400 Metres Free-style. Lorraine Crapp (Australia) 4 min. 54.6 sec. (new Olympic record); D. Fraser (Australia) 5 min. 02.5 sec.; S. Ruuska (U.S.A.) 5 min. 07.1 sec.

100 Metres Back-stroke. Judy Grinham (Great Britain) 1 min. 12.9 sec. (new Olympic record); C. Cone (U.S.A.) 1 min. 12.9 sec.; M. Edwards (Great Britain) 1 min. 13.1 sec. Miss Grinham is the first British Olympic swimming champion since 1924.

100 Metres Butterfly-stroke. Shelley Mann (U.S.A.) 1 min. 11.0 sec. (new Olympic record); N. Ramey (U.S.A.) 1 min. 11.9 sec.; M. Sears (U.S.A.) 1 min. 14.4 sec.

200 Metres Breast-stroke. Ursula Happe (Germany) 2 min. 53.1 sec. (new Olympic record); E. Székely (Hungary) 2 min. 54.8 sec.; E. Ten-Elson (Germany) 2 min. 55.1 sec.

4×100 Metres Relay. Australia 4 min. 17.1 sec. (new world and Olympic record); U.S.A. 4 min. 19.2 sec.; S. Africa 4 min. 25.7 sec.

Diving and Water Polo.

Men's Springboard. R. Clotworthy (U.S.A.) 159.56 points; D. Harper (U.S.A.) 156.23 points; J. Capilla (Mexico) 150.69 points.

Men's Highboard. J. Capilla (Mexico) 152.44 points; G. Tobian (U.S.A.) 152.41 points; R. Connor (U.S.A.) 149.79 points.

Women's Springboard. Mrs. Pat McCormick (U.S.A.) 142.36 points; J. Stunyo (U.S.A.) 125.89 points; I. MacDonald (Canada) 121.40 points.

Women's Highboard. Mrs. Pat McCormick (U.S.A.) 84.85 points; J. Irwin (U.S.A.) 81.64 points; P. Myers (U.S.A.) 81.58 points.

Water Polo. Champions—Hungary; runners-up—Yugoslavia; third place—U.S.S.R.

Yachting.

The yacht races were held in Port Phillip Bay, a few miles from the Olympic Stadium in Melbourne. Results were as follows:

Finn Class. 1. Denmark; 2. Belgium; 3. U.S.A.

5.5 Metre Class. 1. Sweden (*Rush V*); 2. Great Britain (*Vision*); 3. Australia (*Buraddoo*).

Star Class. 1. U.S.A. (*Kathleen*); 2. Italy (*Merope III*); 3. Bahamas (*Gem IV*).

Sharpie Class. 1. New Zealand (*Jest*); 2. Australia (*Falcon IV*); 3. Great Britain (*Chuckles*).

Dragon Class. 1. Sweden (*Slaghoken II*); 2. Denmark (*Tip*); 3. Great Britain (*Bluebottle*). The yacht *Bluebottle* is owned by H.M. the Queen and the Duke of Edinburgh.

Rowing.

The rowing events were held on Lake Wendouree (near Ballarat), about 70 miles from Melbourne. Results were as follows:

Single Sculls. V. Ivanov (U.S.S.R.) 8 min. 02 sec.; S. Mackenzie (Australia) 8 min. 07 sec.; J. Kelly (U.S.A.) 8 min. 11 sec.

Double Sculls. 1. U.S.S.R., 7 min. 24.0 sec.; 2. U.S.A., 7 min. 32.2 sec.; 3. Australia, 7 min. 37.4 sec.

Coxed Pairs. 1. U.S.A., 8 min. 26.1 sec.; 2. Germany, 8 min. 29.2 sec.; 3. U.S.S.R., 8 min. 31 sec.

Coxwainless Pairs. 1. U.S.A., 7 min. 55.4 sec; 2. U.S.S.R., 8 min. 03 sec.; 3. Austria, 8 min. 11 sec.

Coxed Fours. 1. Italy, 7 min. 19.4 sec.; 2. Sweden, 7. min 22.4 sec.; 3. Finland, 7 min. 30.9 sec.

Coxwainless Fours. 1. Canada, 7 min. 08 sec.; 2. U.S.A. 7 min. 18 sec.; 3. France, 7 min. 20 sec.

Eights. 1. U.S.A., 6 min. 35 sec.; 2. Canada, 6 min. 37 sec.; 3. Australia, 6 min. 39 sec.

Canoeing.

The Olympic Canoeing Regatta was also held on Lake Wendouree, results being as follows:

1,000 Metres Kayak Singles. G. Fredriksson (Sweden) 4 min. 12.8 sec.; I. Pissarev (U.S.S.R.) 4 min. 15.3 sec.; L. Kiss (Hungary) 4 min. 16.2 sec.

10,000 Metres Kayak Singles. G. Fredriksson (Sweden) 47 min. 43.4 sec.; F. Hatlaczky (Hungary) 47 min. 53.3 sec.; M. Scheuer (Germany) 48 min. 00 sec.

1,000 Metres Kayak Pairs. 1. Germany, 3 min 49.6 sec.; 2. U.S.S.R., 3 min. 51.4 sec.; 3. Austria, 3 min. 55.8 sec.

10,000 Metres Kayak Pairs. 1. Hungary, 43 min. 37 sec.; 2. Germany, 43 min. 40.6 sec.; 3. Australia, 43 min. 43.2 sec.

1,000 Metres Canadian Singles. L. Rottman (Rumania) 5 min. 05 sec.; I. Hernek (Hungary) 5 min. 06 sec.; G. Bukharin (U.S.S.R.) 5 min. 12 sec.

10,000 Metres Canadian Singles. L. Rottman (Rumania) 56 min. 41 sec.; J. Parti (Hungary) 57 min. 11 sec.; G. Bukharin (U.S.S.R.) 57 min. 14 sec.

1,000 Metres Canadian Pairs. 1. Rumania, 4 min. 47 sec; 2. U.S.S.R., 4 min. 48 sec.; 3. Hungary, 4 min. 54 sec.

10,000 Metres Canadian Pairs. 1. U.S.S.R., 54 min. 02 sec.; 2. France, 54 min. 48 sec.; 3. Hungary, 55 min. 15 sec.

500 Metres Kayak Singles—Women. E. Dementieva (U.S.S.R.) 2 min. 18 sec.; T. Zenz (Germany) 2 min. 19 sec.; T. Soby (Denmark) 2 min. 22 sec.

Cycling.

1,000 Metres Time Trial. L. Faggin (Italy) 1 min. 9.8 sec.; L. Foucek (Czechoslovakia) 1 min. 11.4 sec.; A. Swift (South Africa) 1 min. 11.6 sec.

1,000 Metres Sprint. Final placings—M. Rousseau (France); G. Pesenti (Italy); R. Ploog (Australia).

2,000 Metres Tandem. Australia beat Czechoslovakia by 10.8 sec., with Italy third.

4,000 Metres Team Pursuit. Italy (4 min. 37.4 sec., a new Olympic record) beat France (4 min. 39.4 sec.) in the final, with Great Britain third.

Road Race (187.73 km. or 116.65 miles). E. Baldini (Italy) 5 hours 21 min. 17 sec.; A. Geyre (France) 5 hours 23 min.; 6 sec. A. Jackson (Great Britain) 5 hours 23 min. 17 sec.

Fencing.

Foil (Individual). 1. C. D'Oriola (Italy); 2. G. Bergamini (Italy); 3. A. Spallino (Italy).

Foil (Individual)—Women's. 1. G. Sheen (Great Britain); 2. O. Orban (Rumania); 3. R. Garilhe (France). Miss Gillian Sheen was the first British fencer to win a gold medal in the Olympic Games.

Epée (Individual). 1. C. Pavesi (Italy); 2. G. Delfino (Italy); 3. E. Mangiarotti (Italy).

Sabre (Individual). 1. R. Karpati (Hungary); 2. J. Pawlowski (Poland); 3. L. Kuznetsov (U.S.S.R.).

Foil (Team). 1. Italy; 2. France; 3. Hungary.

Epée (Team). 1. Italy; 2. Hungary; 3. France.

Sabre (Team). 1. Hungary; 2. Poland; 3. U.S.S.R.

Boxing.

Fly-Weight. T. Spinks (Great Britain) beat M. Dobrescu (Rumania) on points.

Bantam-Weight. W. Behrendt (Germany) beat S. Song (Korea) on points.

Feather-Weight. V. Safronov (U.S.S.R.) beat T. Nicholls (Great Britain) on points.

Light-Weight. R. McTaggart (Great Britain) beat H. Kurschat (Germany) on points.

Light-Welter-Weight. V. Enguibarian (U.S.S.R.) beat F. Nenci (Italy) on points.

Welter-Weight. N. Linca (Rumania) beat F. Tiedt (Eire) on points.

Light-Middle-Weight. L. Papp (Hungary) beat J. Torres (U.S.A.) on points.

Middle-Weight. G. Chatkov (U.S.S.R.) knocked out R. Tapia (Chile).

Light-Heavy-Weight. J. Boyd (U.S.A.) beat G. Negrea (Rumania) on points.

Heavy-Weight. T. Rademacher (U.S.A.) beat L. Mukhin (U.S.S.R.); referee stopped fight in first round.

Wrestling.

Free Style.

Fly-Weight. 1. T. Tzalkalaman (U.S.S.R.); 2. M. Khojastehpour (Persia); 3. H. Akbas (Turkey).

Bantam-Weight. 1. M. Dagistanli (Turkey); 2. M. Yaghoubi (Persia); 3. M. Chakov (U.S.S.R.).

Feather-Weight. 1. S. Sasahara (Japan); 2. J. Mewis (Belgium); 3. E. Penttila (Finland).

Light-Weight. 1. E. Habibi (Persia); 2. S. Kasahara (Japan); 3. A. Bestayev (U.S.S.R.).

Welter-Weight. 1. M. Ikeda (Japan); 2. I. Zeuglin (Turkey); 3. V. Balavadze (U.S.S.R.).

Middle-Weight. 1. N. Nikolov (Bulgaria); 2. D. Hodge (U.S.A.); 3. G. Skhirtladze (U.S.S.R.).

Light-Heavy-Weight. 1. G. Takhti (Persia); 2. B. Kulayev (U.S.S.R.); 3 P. Blair (U.S.A.).

Heavy-Weight. 1. H. Kaplan (Turkey); 2. U. Alichev (Bulgaria); 3. T. Kangasniemi (Finland).

Greco-Roman.

Fly-Weight. 1. N. Solovyev (U.S.S.R.); 2. I. Frabba (Italy); 3. D. Egribas (Turkey).

Bantam-Weight. 1. K. Vyrupaev (U.S.S.R.); 2. E. Vesterby (Sweden); 3. F. Horvat (Rumania).

Feather-Weight. 1. R. Makinen (Finland); 2. I. Polyak (Hungary); 3. R. Dzneladze (U.S.S.R.).

Light-Weight. 1. K. Lehtonen (Finland); 2. R. Dogan (Turkey); 3. G. Toth (Hungary).

Welter-Weight. 1. M. Bayrak (Turkey); 2. V. Maneyev (U.S.S.R.); 3. P. Berlin (Sweden).

Middle-Weight. 1. G. Kartosa (U.S.S.R.); 2. D. Dobrev (Bulgaria); 3. K. Jansson (Sweden).

Light-Heavy-Weight. 1. V. Nikolayev (U.S.S.R.); 2. P. Sirakov (Bulgaria); 3. K. Nilsson (Sweden).

Heavy-Weight. 1. A. Parfenov (U.S.S.R.); 2. W. Dietrich (Germany); 3. A. Bulgarelli (Italy).

Weightlifting.

Bantam-Weight. C. Vinci (U.S.A.) 754½ lb. (new world and Olympic record); V. Stogov (U.S.S.R.) 743½ lb.; M. Namdjou (Persia) 732½ lb.

Feather-Weight. I. Berger (U.S.A.) 776½ lb. (new world and Olympic record); E. Minayev (U.S.S.R.) 754½ lb.; M. Zielinski (Poland) 738 lb.

Light-Weight. I. Ryibak (U.S.S.R.) 837½ lb. (new Olympic record); R. Khabutdinov (U.S.S.R.) 821 lb.; C. H. Kim (Korea) 815½ lb.

Middle-Weight. F. Bogdanovski (U.S.S.R.) 925½ lb. (new world and Olympic record); P. George (U.S.A.) 909 lb.; E. Pignatti (Italy) 843 lb.

Light-Heavy-Weight. T. Kono (U.S.A.) 986½ lb. (new world and Olympic record); T. Stepanov (U.S.S.R.) 942 lb.; J. George (U.S.A.) 920½ lb.

Middle-Heavy-Weight. A. Vorobayev (U.S.S.R.) 1,019 ½ lb. (new world and Olympic record); 2. D. Sheppard (U.S.A.) 975½ lb.; J. Debuf (France) 936½ lb.

Heavy-Weight. P. Andersen (U.S.A.) and H. Selvetti (Argentina) each 1,102 lb. (new Olympic records); A. Pigaiani (Italy) 997½ lb.

(The weight given represents in each case the sum of three lifts—press, snatch and jerk).

Shooting.

Clay Pigeon (two 75- and one 50-shot series). G. Rossini (Italy) 200 points (new Olympic record); A. Smelczynski (Poland) 195 points; A. Ciceri (Italy) 190 points.

Free Pistol (60 shots at 50 metres). P. Linnosvua (Finland) and M. Omarov (U.S.S.R.) each 556 points; O. Pimon (U.S.A.) 551 points.

Running Deer (100 shots at 100 metres). V. Romanenko (U.S.S.R.) 441 points (new Olympic record); P. Skoldberg (Sweden) 432 points; V. Sevriugin (U.S.S.R.) 429 points.

Free Rifle (120 shots at 300 metres). V. Borissov (U.S.S.R.) 1,138 points (new Olympic record); A. Erdman (U.S.S.R.) 1,137 points; V. Ylonen (Finland) 1,128 points.

Small Bore Rifle—Prone (40 shots at 50 metres). G. Quellette (Canada) 600 points; V. Borissov (U.S.S.R.) 599 points; G. Boa (Canada) 598 points.

Small Bore Rifle (120 shots at 50 metres—prone, kneeling and standing). A. Bogdanov (U.S.S.R.) and O. Horinek (Czechoslovakia) each 1,172 points (new Olympic records); N. Sundberg (Sweden) 1,167 points.

Silhouette (60 shots at 25 metres). S. Petrescu (Rumania) 587 points (new Olympic record); E. Cherkassov (U.S.S.R.) 585 points; G. Lichiardopol (Rumania) 581 points.

Equestrian.

Owing to Australian quarantine regulations, the Equestrian Olympic Games were held in Stockholm (from June 11-17, 1956) and not in Melbourne. Results were as follows:

Grand Prix Jumping—Individual. H. G. Winkler (Germany) on *Halla*, 4 faults; R d'Inzeo (Italy) on *Merano*, 8 faults; P. d'Inzeo (Italy) on *Uruguay*, 11 faults.

Grand Prix Jumping—Team. Germany (H. G. Winkler on *Halla*, F. Thiedemann on *Meteor*, A. Lütke-Westhues on *Ala*), 40 faults; Italy (R. d'Inzeo on *Merano*, P. d'Inzeo on *Uruguay*, S. Opes on *Pagaro*), 66 faults; Great Britain (W. H. White on *Nizefella*, Miss Pat Smythe on *Flanagan*, P. D. Robeson on *Scorchin*), 69 faults.

Grand Prix de Dressage—Individual. H. St. Cyr (Sweden) on *Juli*, 860 points; L. Hartel (Denmark) on *Jubilee*, 850 points; L. Linsenhoff (Germany) on *Adular*, 832 points.

Grand Prix de Dressage—Team. Sweden (G. Persson on *Knaust*, H. St. Cyr on *Juli*, G. Boltenstern on *Krest*) 2,475 points; Germany (L. Linsenhoff on *Adular*, H Weygand on *Perkunos*, A. Kuppers on *Afrika*) 2,346 points; Switzerland (G. Fischer on *Vasello*, G. Trachsel on *Kursus*, H. Chammartin on *Woehler*), 2,346 points.

Three-Day Event (dressage, endurance and jumping). 1. P. Kastenman (Sweden) on *Ilustor*; 2. A. Lütke-Westhues (Germany) on *Trux von Kamax*; 3. Lt.-Col. F. W. C. Weldon (Great Britain) on *Kilbarry*.

Three-Day Team Competition. 1. Great Britain (A. E. Hill on *Countryman III*, Lt.-Col. Weldon on *Kilbarry*, Major Lawrence Rook on *Wild Venture*); 2. Germany (A. Lütke-Westhues on *Trux von Kamax*, K. Wagner on *Prinzess*, O. Rothe on *Sissi*); 3. Canada (J. Elder on *Colleen*, B. Herbinson on *Tara*, J. Rumble on *Cilroy*).

Modern Pentathlon.

Individual Results. L. Hall (Sweden) 4,833 points; O. Mannonen (Finland) 4,774.5 points; V. Korhonen (Finland) 4,750 points.

Team Results. U.S.S.R. 13,690.5 points; U.S.A. 13,482 points; Finland 13,185.5 points.

(The Modern Pentathlon consists of five competitions—riding, fencing, shooting, swimming and running.)

Men's Gymnastics.

12 Exercises (Combined). V. Chukarin (U.S.S.R.) 114.25 points; T. Ono (Japan) 114.20 points; I. Titov (U.S.S.R.) 113.80 points.

Horizontal Bar. T. Ono (Japan) 19.60 points; I. Titov (U.S.S.R.) 19.40 points; M. Takemoto (Japan) 19.30 points.

Parallel Bars. V. Chukarin (U.S.S.R.) 19.20 points; M. Kubota (Japan) 19.15 points; T. Ono (Japan) and M. Takemoto (Japan) each 19.10 points.

Rings. A. Azarian (U.S.S.R.) 19.35 points; V. Muratov (U.S.S.R.) 19.15 points; M. Kubota (Japan) and M. Takemoto (Japan) each 19.10 points.

Pommelled Horse. B. Chakhlin (U.S.S.R.) 19.25 points; T. Ono (Japan) 19.20 points; V. Chukarin U.S.S.R.) 19.10 points.

Floor Exercises. V. Muratov (U.S.S.R.) 19.20 points; N. Aihara (Japan), V. Chukarin (U.S.S.R.) and W. Thoresson (Sweden) each 19.10 points.

Long Horse Vault. H. Bantz (Germany) and V. Muratov (U.S.S.R.) each 18.85 points; I. Titov (U.S.S.R.) 18.75 points.

Men's Team Championship. U.S.S.R. 568.25 points; Japan 566.40 points, Finland 555.95 points.

Women's Gymnastics.

8 Exercises (Combined). L. Latynina (U.S.S.R.) 74.93 points; A. Keleti (Hungary) 74.63 points; S. Muratova (U.S.S.R.) 74.46 points.

Beam. A. Keleti (Hungary) 18.80 points; E. Bosakova (Czechoslovakia) and T. Manina (U.S.S.R.) each 18.63 points.

Parallel Bars. A. Keleti (Hungary) 18.96 points; L. Latynina (U.S.S.R.) 18.83 points; S. Muratova (U.S.S.R.) 18.80 points.

Broad Horse Vault. L. Latynina (U.S.S.R.) 18.83 points; T. Manina (U.S.S.R.) 18.80 points; Q. Colling (Sweden) and O. Tass (Hungary) each 18.73 points.

Floor Exercises. L. Latynina (U.S.S.R.) and E. Keleti (Hungary) each 18.73 points; E. Leustean (Rumania) 18.70 points.

Women's Team Championship. U.S.S.R. 444.80 points; Hungary 443.50 points; Rumania 438.20 points.

Association Football.

Champions - U.S.S.R.; runners-up --Yugoslavia; third place - Bulgaria. The U.S.S.R. beat Yugoslavia in the final 1-0, while in the semi-finals U.S.S.R. beat Bulgaria 2-1 and Yugoslavia beat India 4-1. The two losing semi-finalists played for third place, Bulgaria beating India 3-0.

Hockey.

Champions - India; runners-up —Pakistan; third place--Germany. India beat Pakistan in the final 1-0, while in the semi-finals India beat Germany 1-0 and Pakistan beat Great Britain 3-2. The two losing semi-finalists played for third place, Germany beating Great Britain 3-1.

Basketball.

Champions - U.S.A.; runners-up U.S.S.R.; third place Uruguay.

The Melbourne Olympic Games, like the 1952 Games in Helsinki, were noteworthy for the high standards achieved and for the number of new Olympic and world records established. Among many outstanding performances were those of Vladimir Kuts, the Soviet athlete, in establishing new Olympic records for the 5,000 and 10,000 metres, and of Christopher Brasher, the British athlete, in setting up a new Olympic record for the 3,000 metres steeplechase. A total of 98 medals was won by the U.S.S.R. (23 for gymnastics and 22 for athletics), followed by 74 for the U.S.A. (31 for athletics and 20 for swimming) and 35 for Australia (14 for swimming and 12 for athletics). British competitors also did well, winning 24 medals (six gold).

The medals won in the Melbourne Olympiad (including the Equestrian Olympic Games at Stockholm) are shown below:

	Gold	Silver	Bronze	Total
U.S.S.R.	37	29	32	98
United States	32	25	17	74
Australia	13	8	14	35
Hungary	9	10	7	26
Germany	6	13	7	26
Italy	8	8	9	25
Great Britain	6	7	11	24
Sweden	8	5	6	19
Japan	4	10	5	19
Finland	3	1	11	5
France	4	4	6	14
Rumania	5	3	5	13
Poland	1	4	4	9
Turkey	3	2	2	7
Canada	2	1	3	6
Czechoslovakia	1	4	1	6
Persia	2	2	1	5
Bulgaria	1	3	1	5
Eire	1	1	3	5
Denmark	1	2	1	4
Chile	—	2	2	4
South Africa	—	—	4	4
Norway	—	1	2	3
Yugoslavia	—	3	—	3
New Zealand	2	—	—	2
Mexico	1	—	1	2
Belgium	—	2	—	2
Argentina	—	1	1	2
Korea	—	1	1	2
Austria	—	—	2	2
Brazil	1	—	—	1
India	1	—	—	1
Iceland	—	1	—	1
Pakistan	—	1	—	1
Greece	—	—	1	1
Switzerland	—	—	—	1
Uruguay	—	—	1	1
Bahamas	—	—	1	1

The Winter Olympic Games.

The Winter Olympic Games, held in connexion with the Melbourne Olympiad, took place at Cortina d'Ampezzo (in the Italian Dolomites) from Jan. 26 to Feb. 5, 1956. Results were as follows:

Nordic Ski-ing.

15 Kilometres (9.3 miles). H. Brenden (Norway) 19 min. 39 sec.; S. Jernberg (Sweden) 50 min. 14 sec.; P. Koltchin (U.S.S.R.) 50 min. 17 sec.

30 Kilometres (18.6 miles). V. Hakulinen (Finland) 1 hour 44 min. 06 sec.; S. Jernberg (Sweden) 1 hour 44 min. 30 sec.; P. Koltchin (U.S.S.R.) 1 hour 15 min. 45 sec.

50 Kilometres (31 miles). S. Jernberg (Sweden) 2 hrs. 50 min. 27 sec.; V. Hakulinen (Finland) 2 hrs. 51 min. 45 sec.; F. Terentiev (U.S.S.R.) 2 hrs. 53 min. 32 sec.

Relay (4 × 10 kilometres). U.S.S.R. 2 hrs. 15 min. 30 sec.; Finland 2 hrs. 16 min. 31 sec.; Sweden 2 hrs. 17 min. 42 sec.

Jumping. A. Hyvarinen (Finland) 227 points; A. Kallakorpi (Finland) 225 points; H. Glass (Germany) 224.5 points.

Combination. (15-km. and jumping). S. Stenerson (Norway) 455 points; B. Eriksson (Sweden) 437.4 points; F. Gron-Gasienica (Poland) 436.8 points.

Women's Ski-ing (10 km.). L. Kozyreva (U.S.S.R.) 38 min. 11 sec.; R. Eroshina (U.S.S.R.) 38 min. 16 sec.; S. Edström (Sweden) 38 min. 23 sec.

Alpine Ski-ing.

Giant Slalom. T. Sailer (Austria) 3 min. 00.1 sec.; A. Molterer (Austria) 3 min. 06.3 sec.; W. Schuster (Austria) 3 min. 07.2 sec.

Slalom. T. Sailer (Austria) 3 min. 14.7 sec.; Ch. Igaya (Japan) 3 min. 18.7 sec.; S. Sollander (Sweden) 3 min. 20.2 sec.

Downhill. T. Sailer (Austria) 2 min. 52.2 sec.; R. Fellay (Switzerland) 2 min. 55.7 sec.; A. Molterer (Austria) 2 min. 56.2 sec.

Women's Giant Slalom. O. Reichert (Germany) 1 min. 56.5 sec.; J. Frandl (Austria) 1 min. 57.3 sec; D. Hochleitner (Austria) 1 min. 58.2 sec.

Women's Downhill. M. Berthod (Switzerland) 1 min. 40.7 sec.; F. Danzer (Switzerland) 1 min. 45.4 sec.; L. Wheeler (Canada) 1 min. 45.9 sec.

Speed Skating.

500 Metres. E. Grishin (U.S.S.R.) 40.2 sec. (new Olympic and world record); R. Gratch (U.S.S.R.) 40.8 sec.; A. Gjostvang (Norway) 41 sec.

1,500 Metres. E. Grishin (U.S.S.R.) and Y. Mikailov (U.S.S.R.) each 2 min. 08 sec. (new Olympic and world records); T. Salonen (Finland) 2 min. 09 sec.

5,000 Metres. B. Shilkov (U.S.S.R.) 7 min. 48.7 sec. (new Olympic record); S. Eriesson (Sweden) 7 min. 56.7 sec.; O. Gontcharenko (U.S.S.R.) 7 min. 57.5 sec.

10,000 Metres. S. Eriesson (Sweden) 16 min. 35.9 sec. (new Olympic record); K. Johannesen (Norway) 16 min. 36.9 sec.; O. Gontcharenko (U.S.S.R.) 16 min. 42.3 sec.

Figure-Skating.

Men. H. A. Jenkins (U.S.A.) 166.43 points; R. Robertson (U.S.A.) 165.79 points; D. Jenkins (U.S.A.) 162.82 points.

Women. Tenley Albright (U.S.A.) 169.97 points; C. Heiss (U.S.A.) 168.02 points; I. Wendl (Austria) 159.44 points.

Pairs. 1. Schwarz and Oppelt (Austria); 2. Dafoe and Bowden (Canada); 3. M. and L. Nagy (Hungary).

Bobsleigh.

2-Man Bob. Italy I, 5 min. 30.14 sec.; Italy II, 5 min. 31.5 sec.; Switzerland I, 5 min. 37.5 sec.

4-Man Bob. Switzerland I, 5 min. 10.4 sec.; Italy II, 5 min. 12.1 sec.; U.S.A., 5 min. 12.4 sec.

Ice Hockey.

Six countries competed for the Olympic Ice Hockey Championship (Canada, Czechoslovakia, Germany, Sweden, U.S.A. and U.S.S.R.), which was won by the U.S.S.R. The United States were runners-up, with Canada in third place.

The U.S.S.R., competing for the first time in the Winter Olympic Games, won the greatest number of medals (16), followed by Austria (11) and Sweden (10). The best individual performances were those of Toni Sailer, the Austrian ski-ing champion, who won three gold medals as winner of the three Alpine events for men.

The next Olympic Games will be held in Rome in 1960.

A. UNITED KINGDOM. — The Road Traffic Act. - Provisions and Parliamentary Passage. - Road Safety Measures. - Report on Accidents to Child Cyclists. - Road Accidents, 1947-1956.

The Road Traffic Act, designed to promote road safety and relieve traffic congestion, came into force on Jan. 1, 1957. The Bill had been given a second reading in the House of Commons on July 4, 1955 and, after prolonged debate and discussion, had received the Royal Assent on Aug. 2, 1956.

A broadly similar Bill, but with important differences, had passed through the House of Lords in 1954-55 (second and third readings on Dec. 21, 1954 and March 25, 1955 respectively), and had been given a second reading in the House of Commons on April 5, 1955. Further consideration of this Bill, however, had been dropped at the dissolution of Parliament on May 6, 1955.

The chief difference between the two Bills lay in their provisions regarding roadworthiness of vehicles. Under the earlier Bill the Minister of Transport would have had power to have motor-vehicles tested for roadworthiness, and make the issue of a motor-vehicle excise licence conditional on the holding of a certificate that the vehicle complied with legal requirements. Tests would have been carried out either in Government testing stations or—under suitable safeguards—in private garages, and examiners would have had to state their grounds for refusing a certificate, with a right of appeal to the Minister. Tests would at first have been confined to certain types of vehicles. This provision was dropped in the later Bill, but an amendment requiring vehicles over 10 years old to be tested was subsequently added—see below.

The principal provisions of the revised Bill (i.e. the legislation which came into force on Jan. 1, 1957) were as follows:

Roadworthiness. It was made an offence to sell or supply motor vehicles whose brakes, steering gear, or tyres failed to comply with the requirements of the Road Traffic Act of 1930.

Motoring Offences. The Bill established the new offence of "causing death by reckless or dangerous driving" as an alternative to the existing offence of manslaughter.

Penalties for other offences were increased as follows (previous penalties in parentheses):

(*a*) *Exceeding the Speed Limit.* Fine on first summary conviction £30 (£20), with disqualification from driving (at the magistrates' discretion) after a second offence (instead of after the third).

(*b*) *Reckless or Dangerous Driving.* £100 fine or four months' imprisonment, or both, with disqualification at magistrates' discretion (£50 or four months).

(*c*) *Driving Under the Influence of Drink or Drugs* Fine on a first summary conviction, £100 (£50).

Speed Limits. The 30 m.p.h. speed limit in built-up areas was made permanent, instead of being subject to annual renewal by Parliament as previously. The Bill also stipulated that goods vehicles must observe the appropriate speed limit, whether loaded or empty.

Parking. The Bill empowered the Minister of Transport (*a*) to make regulations increasing police powers to remove vehicles causing obstructions, and to require the owners of vehicles involved in parking offences to disclose the identity of the driver at the time; (*b*) to fix (on the application of the local authority) experimental parking places on highways for which charges would be made. Any profits would be devoted by the local authorities to the provision of additional "off-the-street" parking space.

[It was explained in the Press that under existing law local authorities could not make charges for highway parking. It was expected that the first "parking meters" would be installed in Central London, the Government's intention being to discourage long-term parking on highways by fixing charges on a steeply upgraded scale.]

Provisional Driving Licences. The validity of these licences was increased from three months to six months, and the cost from 5s. to 10s. Licensing authorities, however, were authorized to refuse to renew provisional licences if the holders did not appear likely to take driving tests within a reasonable time.

[This proviso was intended to prevent learner-drivers—particularly motor-cyclists, who need not be accompanied by qualified drivers—from driving with "L" plates for an excessive time.]

Goods Vehicles. The Bill extended the grounds on which road transport licences might be revoked to cover (*a*) failure to maintain the vehicle in a serviceable condition; (*b*) non-compliance with limits of speed, weight, and loading.

Cyclists. The Bill introduced the new offence of "reckless, dangerous, or careless driving" for cyclists and tricyclists (hitherto only liable to penalties for "furious driving"). It fixed penalties at a fine of up to £30 for a first offence and six months' imprisonment, or a fine of £30, or both, for conviction on indictment.

Pedestrians. A new offence—"failure to comply with police directions"—was added to the existing offences of "loitering on a pedestrian crossing" and "obstructing the free flow of traffic." Pedestrians infringing the new regulation became liable to fines up to £20.

The Bill also authorized the Minister of Transport to make regulations applicable to particular pedestrian crossings, instead of only general regulations applying throughout the country as previously.

[It was explained that this would enable the Minister to carry out local experiments in pedestrian control, including a ban on crossing roads at certain points except by pedestrian crossings.]

Road Safety Propaganda. The Bill empowered the Minister of Transport to make grants towards the training of road users, and authorized local authorities to make grants for road safety propaganda.

The Bill received a second reading in the Commons after an Opposition motion for its rejection had been defeated by 287 votes to 212.

Mr. Molson (Parliamentary Secretary, Ministry of Transport and Civil Aviation), who moved the second reading of the Bill, said that although there were about twice as many vehicles on the road as before the war, the number of casualties per 1,000 vehicles had fallen from 99 in 1934 to 41 in 1954, and the number of children killed from 1,038 in 1938 to 616 in 1954. There was, however, a widespread feeling that the penalties imposed by the courts for motoring offences were often unduly light, and that the standard of car maintenance, especially with regard to brakes, steering and tyres, was "thoroughly unsatisfactory." It was also the case that juries were frequently reluctant to convict on manslaughter charges because this offence was associated in their minds with "brutal and sordid affairs." The new offence of "causing death by reckless or careless driving" had therefore been introduced to meet this difficulty.

Mr. Molson explained that the Government had dropped the clause of the original Bill providing for the compulsory testing of vehicles, largely because of the difficulty of finding enough inspectors with the necessary technical qualifications. Proposals to extend spot-testing of private vehicles were being considered, and meanwhile valuable results should be obtained from the clause prohibiting the sale of vehicles with defective brakes, steering, or tyres.

As regards road congestion, Mr. Molson stressed that the greatest single cause was car owners' practice of driving to work and leaving their cars parked for many hours on the highway; e.g. recent surveys had shown that 78 per cent of kerb space in Central London and the West End was occupied in the middle of the day by parked cars. Many people parked their cars on the highways, not because of lack of alternative accommodation, but because it was easier and cheaper to do so. It was estimated that one-third of garage space in Central London was unoccupied at midday, and that the Portman House car park (one of the largest in London, accommodating 300 cars) was never even half full. Experiments abroad had shown that parking meters (with charges fixed at a deterrent level after two hours) were effective in remedying this abuse. The Government recognized, however, that an increase in "off the street" parking space was needed.

Mr. Molson concluded by saying that the existing law relating to "drunkenness in charge of a car" frequently encouraged persons, who were no longer fit, to drive home at once instead of waiting until they were in a steadier condition. It was proposed at a later stage of the Bill to introduce a new clause [see below] which would distinguish between actually "driving under the influence of drink" and being "drunk in charge" of a car.

An Opposition amendment calling for the rejection of the Bill on the ground that it "failed to provide a comprehensive policy to deal with the urgent and increasing problems of road traffic and road safety" was moved by Mr. G. Russell Strauss (Labour).

Describing the Bill as "a mere hotch-potch of minor measures," Mr. Strauss declared that arterial roads were becoming increasingly blocked by traffic, with the result that motorists suffered, industries were handicapped, costs were rising, exports were affected, and road accidents were again beginning to rise. He strongly criticized the dropping of the original proposals for compulsory vehicle inspection, pointing out that in the U.S.A. there were 20 per cent fewer road accidents in States which had compulsory testing than in States where it was not enforced. This, in terms of British traffic and roads, meant that compulsory testing in Britain would prevent 500 road deaths and about 60,000 serious accidents annually. He called for the gradual introduction of a scheme under which all cars between 10 and 15 years old would be inspected regularly.

After debate, the amendment was defeated by the above-mentioned majority and the second reading given.

In the Committee stage a new Government clause was approved covering the case of persons convicted of being "drunk in charge" of vehicles which they were not driving at the time (e.g. that of a car owner who, realizing that he was unfit to drive himself, got a friend to do so).

The clause (1) distinguished between the offences of being "drunk in charge" and of "driving while under the influence of drink or drugs"; (2) fixed penalties for convictions of "drunkenness in charge" at a fine up to £50 or four months' imprisonment for a first offence, and fines up to £100, or four months' imprisonment, or both, for a second or subsequent offence, together with disqualification from driving for 12 months or longer; (3) stipulated, however, that no-one should be convicted of being "drunk in charge" if he could prove that he had not driven since becoming unfit and had no intention of doing so. The clause also empowered the police to arrest without warrant "anyone committing an offence under this section of the Bill."

On Jan. 26, 1956, the Minister of Transport and Civil Aviation (Mr. Watkinson) accepted "for the time being" an Opposition amendment—subsequently agreed to—requiring all vehicles over 10 years old to be tested by Government or local authority inspectors. Those found satisfactory would be given certificates, and it would be an offence to use an uncertificated vehicle over 10 years old. The Minister announced, however, that he would later introduce a clause designed to achieve the same results by more flexible means.

The Bill was accordingly recommitted on May 30, 1956, to enable the Minister to substitute for the Opposition amendment a Government clause (1) empowering him to make regulations governing the appointment of vehicle inspectors, the provision of testing stations, the payment of fees, and the keeping of test-certificate registers; (2) giving owners of vehicles which had been refused certificates a right of appeal to the Minister, who might order re-examination; (3) authorizing the Minister, if he thought fit, to introduce compulsory tests for vehicles less than 10 years old.

Penalties for using (or causing or permitting to be used) an uncertificated vehicle over 10 years old were fixed at a £20 maximum fine for a first offence and a £50 maximum fine for a second or subsequent offence; moreover, the vehicle might be refused a licence until a test certificate was produced. The penalty for a person falsely representing himself as an examiner, or as employed by one, was fixed at a £100 maximum fine, or three months' imprisonment, or both.

In moving the amendment, Mr. Watkinson said that 72 per cent of vehicles tested at the Hendon station in March had one or more major defects, while 28 per cent of pre-1945 cars tested had defective brakes and 47 per cent defective steering. It was proposed to carry out the tests both in Government and local authority testing stations and in private garages, and to confine testing to brakes, steering, and lights. Tests would be made simple and cheap, and would be conducted by qualified examiners and Ministry of Transport officers.

The clause was welcomed on behalf of the Opposition by Mr. Strauss, who, however, criticized the use of private garages for testing and called for the testing of direction indicators, windscreen wipers, mirrors, and tyres. It was subsequently agreed to.

Other Government amendments were agreed to in the Committee and Report stages (May 30-31, 1956) as follows:

(1) Authorizing the Minister of Transport to designate parking-meter sites in London.

(2) Providing for the gradual replacement of annual driving licences by 3-year licences costing 15s.

(3) Authorizing the Minister to make regulations revising the minimum age (now 16) for the issue of motor-cycle licences.

(4) Empowering local authorities to designate roads where dogs must be kept on lead—under penalty (on summary conviction) of a £5 maximum fine.

[In moving this amendment, Mr. Molson stated that dogs were partly responsible for at least one-seventh of road accidents.]

An Opposition amendment (moved by Mr. Ernest Davies, Lab.), to provide for the revocation of an "A" or "B" road haulage licence on the ground that the holder indulged in unfair competition [leading to bad working conditions, excessive speed, etc.] was accepted by the Government and subsequently agreed to.

The Bill was given an unopposed third reading in the Commons on June 1, 1956.

The second reading in the House of Lords was given on June 12, 1956, The principal Government amendments agreed to in the Committee and Report stages were as follows:

(1) Empowering the Minister of Transport to introduce a 40 m.p.h. speed limit on selected roads outside the London area.

(2) Enabling local authorities, without first consulting the Minister, to prohibit or regulate the loading, waiting or unloading of vehicles.

(3) Defining "hours of darkness" throughout the year as "one half-hour after sunset to one half-hour after sunrise."

(4) Authorizing the imposition of charges for parking within the Royal Parks.

(5) Making it an offence to fail to conform to any lawfully-placed road sign. [The 1930 Road Traffic Act made it an offence to fail to conform to certain classes of traffic sign only.]

(6) Making illegal the holding of motor-cycle "scrambles" and car trials on footpaths and bridle-paths, except with the previous consent of the owners and occupiers of the land concerned.

The following amendments were also agreed to by the House of Lords:

(7) Empowering the Minister of Transport to make Orders intended to preserve the amenities of roads for the benefit of pedestrians and horse-riders (moved by **Lord Conesford**).

(8) Authorizing the police to remove any stationary motor-vehicle which infringed a parking regulation (moved by **Lord Lucas of Chilworth**).

Amendments by Lord Lucas (*a*) to confine vehicle-testing to Government testing stations; (*b*) to make all vehicles which had successfully come through "spot" tests entitled to test certificates, were defeated by 50 votes to 10 and by 35 votes to 9 respectively.

A further amendment by Lord Lucas, prescribing conditions for the manufacture of motor-cyclists' crash helmets and making it an offence to manufacture or sell sub-standard helmets, was accepted in principle by **Lord Mancroft** (Under-Secretary, Home Office), who promised to introduce a Government amendment to the same effect, but prescribing penalties for non-compliance. This amendment, fixing fines for non-compliance at £20 and £50 respectively for the first and for second and subsequent offences, was introduced by Lord Mancroft during the third reading on July 23, and accepted.

When the Lords' amendments were considered by the House of Commons on July 30, **Mr. Molson** moved an amendment providing for the regulation of cycle-racing on highways. He explained that it had been introduced at the request of the Interdepartmental Committee on Road Safety (see below), and would not apply to all cycle racing but only to racing (e.g. some forms of mass-start racing) regarded as dangerous to public safety. The amendment was carried by 200 votes to 162, and the Lords' amendments were also agreed to.

Although the Act as a whole came into force on Jan. 1, 1957, certain of its provisions were brought into effect earlier, under Ministry of Transport Orders. They were:

From Oct. 1, 1956—(*a*) Drivers who had not renewed their licences for 10 years or more were required to pass driving tests before obtaining new ones; (*b*) the 30 m.p.h. limit in built-up areas was made permanent.

From Oct. 19, 1956—Driving test fees were raised from 10s. to £1.

From Nov. 1, 1956 (*a*) The causing of road deaths by "reckless or dangerous driving" became punishable by 5 years' imprisonment; (*b*) the new provisions regarding "drunkeness in charge" (see above) came into force; (*c*) maximum penalties for "reckless, careless, or dangerous driving" or "driving under the influence of drink or drugs" were increased; (*d*) safety laws applying to motor vehicles were extended to cyclists; (*e*) traffic police were authorized to control pedestrians; (*f*) the sale of motor vehicles with defective steering, brakes, or tyres became an offence; (*g*) empty goods vehicles were required to comply with the same speed-limits as full vehicles; (*h*) motor-car or motor-cycle trials on footpaths became illegal without the prior consent of landowners and occupiers.

Road Safety Measures.

Other important developments in connexion with road safety are summarized below:

New Road Traffic Signs. New traffic sign regulations came into force from March 1, 1957, as follows: (1) "Halt" signs were required by March 1, 1958, to be illuminated by external lighting or reflectors; these signs, as well as "slow" and certain other signs, were allowed to be made larger. (2) The London type of "no waiting" sign was made universal (black on yellow where waiting was prohibited, or white on blue where it was restricted). (3) New types of sign were adopted for "road bends," "school children," and "major road ahead" (the change-over to be made by March 1, 1959), as well as for "cross-roads" (to be introduced as existing signs were out). (4) A new sign was introduced to indicate garages with parking facilities.

New Edition of Highway Code. An amended version of the Highway Code, based on the recommendations of the Interdepartmental Committee on Road Safety and approved by both Houses of Parliament, was published on March 22, 1956.

Mobile Traffic Squad for Central London. Lord Mancroft (Under-Secretary, Home Office) announced on June 21, 1955 the formation of a mobile traffic squad to deal with congestion in Central London.

Speed Limits. A motion to raise the speed limit for heavy goods vehicles from 20 to 30 m.p.h. was approved by the House of Commons on Feb. 26, 1957 by 198 votes to 151.

[Mr. Nugent (Joint Parliamentary Secretary, Ministry of Transport and Civil Aviation) stated in the House of Commons on Feb. 20, 1957 that 49 out of 67 local authorities consulted in the London area had agreed to raise the speed limit for motor cars to 40 m.p.h. on certain roads.]

Report on Road Safety of Child Cyclists.

A report on accidents to child cyclists was published by the Committee on Road Safety on May 27, 1956. The Committee was appointed by the Ministry of Transport and Civil Aviation and contained representatives of Government departments, the police, and road safety organizations.

Pointing out that 124 cyclists under 15 were killed and 2,100 others seriously injured on the roads in 1955, the report called for "considerable financial support" by the Government and the cycling interests for a major effort to reduce the number of accidents, which might otherwise "increase by half as much again in the next 10 years." "It seems ridiculous," it declared, "to devote large sums to the upbringing and education of children if, through parsimony in another direction, we neglect to keep them alive and unmaimed."

Because of the administrative difficulties involved, and the amount of enforcement duties which would fall on the police, the Committee rejected any suggestion that child cyclists should undergo a compulsory course of training and testing. Instead, it proposed a great expansion of voluntary training and testing schemes and the recruiting of a corps of paid instructors and testers to assist voluntary

workers in this field, emphasizing in this connexion that no extra burden must be placed on teachers. Other recommendations were as follows :

(1) Existing cycle tracks should be improved and new ones built—but not alongside new motor roads.

(2) Children's cycles should be inspected regularly as part of the training and testing scheme.

(3) Research should be carried out to develop a satisfactory rear-view mirror for cycles.

(4) Consideration should be given to the possibility of making rear-view wing mirrors compulsory for all motor vehicles.

(5) Drivers should reduce speed and give extra clearance in the neighbourhood of children.

(6) Parents should be reminded of their "fundamental responsibility for ensuring that their children are competent to ride and know the dangers" before being allowed to use the roads unaccompanied.

The report stressed that only a small proportion of the 3,000,000 child cyclists received systematic training, e.g. in the past eight years only about 100,000 children had passed the cycling proficiency test sponsored by the Royal Society for the Prevention of Accidents. The committee suggested that all children between 11 and 15 should be eligible for a written or oral examination and a practical test on a cycle, and, if successful, should receive proficiency badges to fix on their cycles. Children who had not taken the test should be required to carry a distinguishing mark (probably a white disc) on their cycles.

Road Accidents.

The following table gives the numbers of killed and injured in road accidents in each year from 1947 to 1955 :

	Killed	Injured	Total
1947 . .	4,881	161,318	166,199
1948 .. .	4,513	148,884	153,397
1949	4,773	172,006	176,779
1950	5,012	196,313	201,325
1951	5,250	211,243	216,493
1952 ..	4,706	203,306	208,012
1953 .. .	5,090	221,680	226,770
1954 . ..	5,010	233,271	238,281
1955 ..	5,526	262,396	267,922

During the same period the number of motor-vehicle licences had increased as follows : 1947—3,337,000 ; 1948—3,505,000 ; 1949—3,846,000 ; 1950—4,118,000 ; 1951—4,343,000 ; 1952—4,599,000 ; 1953—4,959,000 ; 1954—5,429,000 , 1955—6,044,000.

The number of casualties in 1955 was the highest since 1934, when, however, the number of motor-vehicles licensed was only 2,400,000, compared with 6,044,000 in 1955.

Ministry of Transport figures published on Sept. 4, 1957, showed that casualties from road accidents in Britain numbered 267,960 in 1956, comprising 5,367 killed, 61,455 seriously injured, and 201,138 slightly injured. The total included 91,130 casualties to motorists, 63,883 to motor-cyclists, 49,169 to pedal cyclists, and 61,689 to pedestrians. Casualties to children totalled 47,009, including 717 killed.—(Ministry of Transport and Civil Aviation - Times - Daily Telegraph)

(Prev. rep. Road Accidents, 8406 B.)

A. ISRAEL.—Industrial Development Plan.

Details were released in July of a five-year industrial development plan covering the period 1957-61. The plan—drawn up by the Minister of Commerce and Industry, Mr. Saphir, and hence known as the "Saphir plan"—envisages an investment of 538,000,000 Israeli pounds (IL.) over the five-year period. In his introduction to the plan, Mr. Saphir pointed out that with large-scale immigration in the present year, over and above the natural increase of population, it was expected that 150,000 new jobs would be needed during the next four years.

The plan provides for the establishment of 600 new industrial enterprises in different parts of Israel, the largest investment being in the Haifa area (IL.85,250,000), followed by IL.75,750,000 in the Tel-Aviv area and IL.65,550,000 in the Acre area. Other major investments will include IL.24,000,000 in the Mizpeh Ramon area (in the heart of the Negev), IL 18,000,000 on industrial buildings in the Beersheba-Sodom area, IL.35,000,000 in the Ashdod Yam area, and almost IL.10,000,000 in the Safed area.

The largest growth is planned for the metallurgical industry, involving investment of over IL.148,000,000 in a variety of new plants, including a shipyard, a diesel manufacturing plant, a metal container factory, and a scooter assembly plant This expansion is planned to increase the number of new workers in metal manufacturing by 10,000. Other projects include a rayon factory at Ashdod Yam ; a large expansion of the pulp and paper industry ; and similar expansion plans for the leather, chemicals, ceramics, glass, building materials, food, woodworking, printing, and diamond-cutting industries.

The plan anticipates that investment in the next few years will come from (*a*) Israeli and foreign *entrepreneurs* attracted by favourable investment conditions ; and (*b*) long-term Government loans.—(Government Press Office, Jerusalem)

B. SOUTH AFRICA. — Supreme Court upholds Validity of Senate Act and South Africa Act Amendment Act. - Judgment by Chief Justice Centlivres.

The Appellate Division of the Supreme Court of South Africa dismissed on Nov. 9, 1956, by a ten-to-one majority, an appeal against the refusal of the Cape Provincial Division of the Supreme Court to declare invalid the Senate Act of 1955 and the South Africa Act Amendment Act of 1956.

In giving judgment, **Chief Justice Centlivres** said that the Senate Act, taken by itself, could not be said to be invalid, as it did not repeal or alter the provisions of the South Africa Act entrenching Cape Coloured voting rights. Similarly, the South Africa Amendment Act, taken by itself, could not be said to be invalid, as it had been passed by a two-thirds majority of both Houses of Parliament at a joint sitting. There could be no doubt that the sole object of passing the Senate Act had been to provide the Government with such a majority in order to validate the Separate Representation of Voters Act of 1951. If a Legislature had plenary power to legislate on a particular matter, however, such legislation was valid whatever its real purpose. If Parliament had plenary power to reconstitute the Senate, evidence as to the purpose of the Senate Act was irrelevant. It was clear, from a consideration of other provisions of the South Africa Act, that the words "both Houses of Parliament" in Section 152 thereof meant the House of Assembly and the Senate as constituted from time to time.

Counsel for the appellants (Mr. Graeme Duncan, Q.C.), had contended that the reconstituted Senate was not one of the "Houses of Parliament" within the meaning of those words in Section 152, and that each and every power vested in the two Houses sitting bicamerally must be read as being subject to the proviso to that section. "If I understood Mr. Duncan's contention correctly," the Chief Justice continued, "the proviso to Section 152 should be construed in such a manner as to invalidate any Act which destroys any entrenched rights when such an Act is passed by means of a two-thirds majority which was artificially created for the very purpose of passing that Act. I know of no authority for justifying such a construction. In the present case, the Senate Act which created the artificial majority is not hit by the proviso unless one reads something by implication into the proviso. But Mr. Duncan expressly stated in the course of his argument that he did not rely on any implication . . . In the present case nothing was expressly stated in the proviso to Section 152 which would in any way invalidate the Senate Act. Nor was there anything in the proviso which entitled one, by reasonable or necessary implication, to hold that the Senate Act was in any respect invalid."

Continuing, the Chief Justice said that Mr. Duncan had relied strongly on the High Court of Parliament case [see 12780 A], in which it had been held that the so-called High Court of Parliament was not a court of law. In the present case, however, it could not be said that the reconstituted Senate was not a Senate in the ordinary meaning of the word. Parliament, sitting bicamerally, had plenary powers to reconstitute the Senate in any manner it pleased, and the purpose or motive which it had in mind was irrelevant in law.

"Each of the Acts with which we are concerned," the Chief Justice concluded, "is on its face *intra vires*, and each was enacted by a Legislature which was competent to enact it. The plan was not to effect indirectly something which neither Legislature had the power to achieve directly. The conclusion at which I arrive on the whole case is that the legislative scheme which was adopted is not open to attack in law. Each step taken in the scheme was taken in accordance with the provisions of the South Africa Act, and the scheme as a whole was designed in such a way that Act 46 of 1951 [i.e. the separate Representation of Voters Act] would be validated in accordance with the requirements of Sections 35 and 152 of the South Africa Act. I am therefore of opinion that the appeal should be dismissed."

Justices Hoexter, Fagan, De Beer, Reynolds, De Villiers, Brink, Beyers and **Hall** concurred in the Chief Justice's ruling, whilst **Mr. Justice Steyn** also dismissed the appeal in a separate judgment. In a dissenting judgment, **Mr. Justice Schreiner** said that the crucial issue was whether the Houses of Parliament referred to in the proviso to Section 152 "include a House created by Parliament *ad hoc*, that is, in order to produce by nomination or similar device a two-thirds majority at a joint sitting." The argument for the Government was that the Senate Act taken by itself was legal because it did not touch the appellants' voting rights, and the 1956 Act taken by itself was also legal because it was passed by a two-thirds majority in a joint session. Consequently, although the two Acts were part of a single legislative plan to bring about a result which could not be brought about by a bare majority of each House, the means adopted had enabled this result to be achieved. The validity of Parliament's action in passing the Senate Act, however, was closely related to the purpose for which it had been done.

Mr. Justice Schreiner concluded : "The appellants are entitled to object, not only to a Senate nominated to do nothing but vote in a joint session, but also to a Senate whose size and composition have been dictated solely by its joint session functions . . . I hold accordingly that on the proper construction of the South Africa Act, a Senate constituted *ad hoc* for the purpose of securing by nomination or its equivalaent a two-thirds majority in a contemplated joint sitting is not a House of Parliament within the meaning of the proviso . . . It is clear that the Senate set up under the Senate Act was as certain to provide the requisite two-thirds majority as if the

names of its members had been scheduled to the Act, or the Government had been empowered to nominate all of them. It is not seriously disputed by the respondents, and the history of the legislation proclaims, that the Senate Act was part of a legislative plan to create a Senate that would in that way provide the two-thirds majority required to remove the appellants from the common roll, and that it was enacted only for that purpose. For these reasons I would allow the appeal and grant an order declaring the South Africa Act Amendment Act to be of no legal force and effect."

The case was the first on a constitutional issue to be heard by the Supreme Court since its enlargement in 1955. The hearing took place in the *Raadsaal* at Bloemfontein, where the South African Constitution was drawn up in 1909.

A. PAKISTAN. — Mr. Suhrawardy's Visits to the United States, Spain and Jordan. - Meetings with President Eisenhower, General Franco and King Hussein.

The Prime Minister of Pakistan, Mr. H. S. Suhrawardy, visited the United States from July 10-26 after attending the Commonwealth Prime Ministers' Conference in London in June. Before visiting Washington he had paid a brief visit to Spain, where he met General Franco and signed a Spanish-Pakistani treaty of friendship in Madrid on July 8.

During his stay in Washington (July 10-12) Mr. Suhrawardy had discussions with President Eisenhower, Mr. Dulles, Mr. Wilson (then Secretary of Defence) and other Administration leaders. The following communiqué (cross-headings inserted) was issued at the conclusion of the talks:

U.S.-Pakistani Relations. "The President and the Prime Minister [Mr. Suhrawardy] reviewed the steady growth of the close, co-operative relations between their two countries. These relations are securely founded on mutual respect and trust between equal sovereign nations determined to maintain their independence by working together for peace and progress. They examined various joint programmes which serve further to strengthen these ties.

Collective Security in Asia and Middle East. "The President and the Prime Minister reaffirmed their determination to support and strengthen the systems of collective security which had been forged in Asia. They agreed that international Communism continues to pose a major threat to the security of the free world. They reiterated their determination to oppose aggression. It was recognized that this determination, expressed in such organizations as the South-East Asia Treaty Organization and the Baghdad Pact, as well as through mutual security agreements between Pakistan and the United States, had acted as a powerful deterrent to Communist aggression and had promoted stability in the treaty areas. They expressed the belief that an effective international agreement on disarmament under adequate and effective international safeguards would contribute not only to the security of the world but also to its material progress. They discussed the threat to the security and integrity of the nations of the Middle East resulting from the intrusion of Communist influence and subversion in that area. It was agreed that the United States and Pakistan would continue to exert their influence to promote conditions in the Middle East which will permit the nations of the area to work out their national destinies in freedom and peace.

Kashmir and the Canal Waters Dispute. "The Prime Minister referred to Pakistan's disputes with India over Kashmir and the distribution of waters of the Indus River and its tributaries. He said that Pakistan desires to settle such disputes peacefully and in conformity with international law and the decisions of the United Nations. The President expressed the hope that such regional disputes may be solved speedily, equitably and permanently in accordance with the principles of the United Nations. As regards the Indus waters, they welcomed the efforts of the International Bank for Reconstruction and Development to find a solution acceptable to the two parties concerned . . .

U.S. Food Aid for Pakistan. "The Prime Minister renewed Pakistan's request to purchase additional amounts of food-grains under the terms of the U.S. Surplus Agricultural Products Disposal Programme. The President assured the Prime Minister that Pakistan's minimum requirements would be given sympathetic and expeditious consideration, and would be met contingent upon the enactment of the extended programme by Congress."

From New York Mr. Suhrawardy flew to London and thence to Jordan, where he met King Hussein. At the end of a four-day visit to Amman, Mr. Suhrawardy issued a statement with King Hussein on Aug. 4 expressing their "determination to resist any aggression or subversion which exposed the stability and peace of the Middle East to danger," and declaring that Pakistan and Jordan would co-operate with each other "in pursuance of their common policies and interests."—(Pakistan High Commissioner's Office, London)

B. UNITED KINGDOM. — Gloucester By-election.

Polling took place at Gloucester on Sept. 12 in the by-election caused by the death of Mr. Moss Turner-Samuels, Q.C. (Labour), the result being as follows:

Diamond, John (Labour)	18,895
Dashwood, Francis (Conservative)	10,521
Lort-Phillips, Lt.-Col. P. H. (Liberal) ..	7,393
No change. Labour majority	8,374

Figures at the general election were: M. Turner-Samuels (Lab.) 21,354, D. C. Naploy (C.) 20,606—Labour majority, 748.

The Labour candidate received 51.3 per cent of the votes, the Conservative candidate 26.6 per cent, and the Liberal candidate 20.1 per cent, whereas at the general election the Labour candidate received 50.9 per cent and the Conservative candidate 49.1 per cent in a straight fight. The Labour proportion of the poll thus increased by 0.4 per cent and the Conservative proportion dropped by 20.5 per cent. The Liberal candidate polled the highest Liberal vote at Gloucester for 25 years and the Conservative the lowest for the same period.

71 per cent of the electorate voted in the by-election, compared with 80.9 per cent at the general election. The electorate totalled 51,812, a decrease of 29 since the general election.

Mr. Turner-Samuels (68), who died on June 6, had represented Gloucester since 1945 and had previously sat for Barnard Castle (Durham) in 1923-24. Born at Newcastle-upon-Tyne, he became a solicitor, served in the First World War, was called to the Bar in 1922, took silk in 1946, and became Recorder of Halifax in 1948. He was a writer on legal and political subjects and published works on trade unions, industrial negotiation, and the law relating to married women.

Mr. John Diamond (50) is a chartered accountant. He was M.P. for the Blackley division of Manchester from 1945 to 1951. (Times - Daily Herald) **(Prev. rep. By-elections, 15618 B.)**

C. MOROCCO. — Royal Charter for Tangier.

A Royal Charter was issued by King Mohammed V on Aug. 30 confirming all the economic and fiscal privileges enjoyed by Tangier (now an integral part of the Kingdom of Morocco) when it was an international zone.

The Charter provided specifically (1) for the maintenance of freedom of exchanges; (2) for unrestricted imports and exports into and out of Tangier, subject to Moroccan Customs regulations; (3) that the movement of goods between Tangier province [i.e. the former international zone, now administered as a province by a Moroccan governor] would take into account "the necessities of the economic development of the Province of Tangier and its port, on the one hand, and the general political and economic requirements of the Kingdom on the other"; (4) that any modification in the present taxation system would be compatible with Tangier's need for commercial development, particularly her commercial and financial freedom *vis-à-vis* the rest of Morocco; (5) that no modification of provisions (1) and (2) would be undertaken without six months' prior notice.

The Royal Charter also mentioned the possibility of creating a free port at Tangier.—(Le Monde, Paris)
(Prev. rep. Tangier, 15167 B.)

D. JAPAN - UNITED STATES. — Formation of U.S.-Japanese Committee on Security.

In accordance with the agreement between President Eisenhower and Mr. Kishi during their Washington discussions (see 15658 A), an inter-governmental Japanese-American Committee on Security was formed on Aug. 6 to maintain closer liaison between the two countries in security and related matters. The Japanese members include Mr. Fujiyama (Foreign Minister) and Mr. Tsushima (Director of the Defence Agency), while the American members include Mr. Douglas MacArthur II (Ambassador in Tokio) and Admiral Felix Stump (C.-in-C., Pacific).

The committee held its first meeting in Tokio on Aug. 16. A joint statement said that one of the topics discussed had been the withdrawal of U.S. troops from Japan and problems arising therefrom. The U.S. members had "expressed their understanding of these problems and their desire to facilitate effective solutions by advance consultation and close co-operation with the Japanese Government."

The committee will meet in Tokio whenever requested by either side. Its terms of reference include consultation regarding the disposition and employment of U.S. forces in Japan; consultation to ensure that any action taken under the U.S.-Japanese mutual security treaty conforms to United Nations' principles; and consideration of any future adjustments in the relationship between the United States and Japan "to meet the needs and aspirations of both peoples."
(New York Times) **(Prev. rep. 15658 A.)**

SEPTEMBER 14—21, 1957

A. WESTERN GERMANY. — Christian Democratic Victory in General Elections. - Absolute Majority for Dr. Adenauer in New Bundestag.

The third general election in the German Federal Republic, and the first since the attainment of independence, was held on Sept. 15. It resulted in a sweeping victory for the Christian Democratic Union (C.D.U.) led by Dr. Konrad Adenauer, which obtained an absolute majority of 43 seats in the new Bundestag and increased its vote by five per cent as compared with the last general elections in 1953.

The elections were contested by 16 parties, of which only four secured representation in the new Bundestag—the Christian Democrats, the Social Democrats, the Free Democrats, and the German Party. The following official but provisional figures, issued in Bonn on Sept. 16, show the number of seats held by these four parties in the Bundestag, the number of votes polled, and comparative figures for the 1953 elections:

	Seats		Votes		Percentage	
	1957	1953	1957	1953	1957	1953
Christian Democrats	270	244	14,998,754	12,443,981	50.2	45.2
Social Democrats	169	151	9,490,726	7,944,943	31.8	28.8
Free Democrats	41	48	2,304,846	2,629,163	7.7	9.5
German Party	17	15	1,006,350	896,128	3.4	3.3

The ten parties not represented polled less than seven per cent of the total vote between them. Of these parties, the largest number of votes (1,373,001) was polled by the Refugee Party (B.H.E.), which had 27 seats in the former Bundestag but is unrepresented in the new House. The (Catholic) Centre Party, which had two members in the former Bundestag, also failed to return any members to the new House. The extreme right-wing (neo-nazi) German Reich Party polled 307,881 votes (1.0 per cent), compared with 295,615 votes (1.1 per cent) in 1953. The South Schleswig Voters' Union, representing the Danish minority in Schleswig, polled 32,260 votes, against 44,633 in 1953.

The Communist Party had been dissolved in August 1956 (see 15086 D) and thus took no part in the elections; it polled 607,000 votes (2.2 per cent) in 1953 but returned no members to the Bundestag. The All-German People's Party, which polled 318,000 votes in 1953 and was also unrepresented, dissolved itself in the summer of 1957, its leader (Dr. Heinemann) advising its members to vote for the Social Democrats.

The principal features of the elections were (1) the increasing trend towards a two-party system, as shown by the fact that the Christian Democrats and the Social Democrats polled 82 per cent of the total votes between them; (2) the fact that a single party (the Christian Democrats) had gained an absolute majority of votes over all other parties combined, for the first time in German parliamentary history; (3) the decline of the smaller parties—notably the failure of the Free Democrats to emerge as a "third force" in West German politics, and the elimination of the Refugee Party at the Federal centre.

As shown in the table above, the Christian Democrats (including the Christian Social Union, the Bavarian wing of the party) returned 26 more deputies than in 1953 and increased its poll by over 2,500,000 votes. It achieved particularly notable successes in Schleswig-Holstein, where it won all 14 constituencies; in Württemberg-Baden, where it won 32 of the 33 seats; and in Bavaria, where all seats were won by the Christian Social Union. The economic prosperity of Western Germany, the great personal prestige enjoyed by Dr. Adenauer, and popular satisfaction with the Chancellor's foreign and domestic policies were all regarded as important contributory factors in the Christian Democrats' success at the polls. Despite its overall majority in the Bundestag, however, the C.D.U. does not command the two-thirds majority necessary to make changes in the Federal Constitution (the Basic Law).

The Social Democratic Party (S.D.P.), led by Herr Erich Ollenhauer, appreciably improved its position by returning 18 more deputies than in 1953 and polling about 1,400,000 more votes, thereby consolidating its position as the Opposition in the new Bundestag. The S.D.P. made gains in Hamburg and in the industrial areas of the Ruhr.

The Free Democratic Party (F.D.P.), on the other hand, returned seven fewer deputies than in 1953 and dropped over 300,000 votes, losing four of its seats in Hesse to the Christian Democrats. The decline in the F.D.P. vote was attributed by political commentators to the split in the party in 1956, which had resulted in the formation of a "breakaway" Free People's Party which subsequently merged with the German Party [these pre-election developments are described below]. The German Party, conservative and traditionally nationalist, slightly improved its position both in seats and votes, most of its deputies being returned in Lower Saxony.

The Refugee Party (*Bund der Heimatvertriebenen und Entrechteten*), though still represented in five *Länder* ministries, is no longer represented in the Bundestag, as stated above. Its failure at the polls was attributed (i) to the progressive integration of refugees from the former Eastern provinces during the past ten years, thereby making it increasingly difficult to organize the ex-refugees as an independent political force or to appeal to a specifically "refugee" sentiment; (ii) to the working of the electoral law (see below), which tended to operate against the smaller parties. The 1,373,001 votes polled by the B.H.E. (4.6 per cent) compared with 1,616,953 votes (5.9 per cent) in 1953, when the party returned 27 deputies.

The total electorate numbered 35,196,124, of whom 31,058,319 (88.2 per cent) went to the polls. The number of valid votes was 29,885,946. [In 1953 the electorate numbered 33,120,940, of whom 28,479,550 (86 per cent) voted]. The franchise was exercised by all men and women over 21 (with a few minor exceptions), voting by post being permitted for the first time. The Saar voted for the first time in a Federal election, following its reunification with the German Federal Republic on Jan. 1, 1957 (see 15303 A).

All leading Christian Democratic and Social Democratic personalities were re-elected, Dr. Adenauer being returned with a large majority in Bonn. Two Ministers did not seek re-election—Herr Kaiser (Minister for All-German Questions), who had been in ill-health for some months; and Dr. Balke (Minister for Atomic Energy Questions), who left political life to return to his profession of engineer.

Electoral System. - The "Five per cent" Clause.

As in 1953, the elections were carried out under a complicated electoral system whereby half the deputies were elected directly in constituencies, and the remainder were elected by proportional representation from party lists in the various *Länder*. With a few exceptions, the electoral law was virtually identical with that under which the 1953 elections were held (see page 13141).

The electoral law for the 1957 elections had been passed through all its stages in the Bundestag on March 15, 1956, after months of controversy—mainly between the Christian Democrats and the Free Democrats, the latter being then allied with the C.D.U. in the government coalition. Its principal provisions were as follows: (1) half the members of the new Bundestag would, as hitherto, be elected by direct vote in 242 constituencies (subsequently increased to 247 constituencies when the Saar became a *Land* of the Federal Republic); (2) the remainder would be elected by proportional representation from the *Land* lists; (3) each voter would have two votes—one for his constituency and one for the relevant *Land* list; (4) to secure representation in the Bundestag, a party would have to obtain five per cent of the national vote or three seats by direct election in the constituencies (this provision, aimed against the proliferation of "splinter" parties, was stricter than in 1953, when it was possible for a party to obtain representation in the Bundestag if it returned only one member by direct election); (5) West Berlin, as hitherto, would be represented by 22 delegates who would sit in the Bundestag without voting rights (except on procedural matters), and who would be chosen in proportion to party strengths in the West Berlin House of Deputies.

The Bill was passed against the votes of the German Party, the Bavarian members of the C.D.U. (i.e. the Christian Social Union), and a few individual C.D.U. members, all of whom urged a simpler electoral system based on the "simple majority" principle as in Britain. The Social Democrats and the Free Democrats supported the Bill, though the S.D.P pressed for the West Berlin representatives to be allowed full and direct participation in the work of the Bundestag. [Two days earlier, however, the Western Powers had sent a Note to the Federal Republic stating that they would object to any change in the existing arrangements for West Berlin.]

When the Bill was originally drafted towards the end of 1955, the Christian Democrats had proposed that 60 per cent of the Bundestag seats should be filled by direct election and only 40 per cent by indirect election, i.e. from *Land* lists. The Free Democrats took strong objection to this proposal, maintaining that it would increase C.D.U. representation and reduce the representation of the smaller parties, including that of the F.D.P. After protracted negotiations between the two parties, during which the F.D.P. threatened to withdraw from the Government, the Bill as eventually adopted was agreed upon as a compromise measure.

In a ruling on Jan. 23, 1957, the Federal Constitutional Court at Karlsruhe upheld the constitutionality of the "five per cent" clause in the electoral law (see above), and at the same time dismissed petitions by the Bavarian Party and the All-German People's Party, both of which had alleged that the "five per cent" clause was unconstitutional.

The two parties—neither of which was represented in the Bundestag—asserted that the "five per cent" clause constituted an infringement of the right to vote and was contrary to Article 21 of the Basic Law, which guaranteed the free formation of political parties. In its judgment, the Constitutional Court ruled that a multiplicity of parties would make legislation difficult, if not impossible; that a Government without a majority could not be fully effective; and that "splinter" groups should therefore be excluded in order to prevent constitutional disturbances.

Unsuccessful attempts to amend the "five per cent" clause were subsequently made in the Bundestag by the Refugee Party, the German Party, and the Social Democrats. The first two parties sought to introduce a Bill under which a party could get representation if it obtained five per cent of the votes in two *Länder* (instead of five per cent of the votes in the Federal Republic as a whole, as laid down in the electoral law), or returned three deputies by direct election. The Social Democrats, who supported the Bavarian Party's arguments, sought to change the "five per cent" clause in such a manner that a party's eligibility for Bundestag representation would depend on its securing five per cent of the votes in any single *Land*, or the direct election of one member. Attempts by these three parties to introduce such legislation were defeated in the Bundestag on Feb. 7, 1957, by the votes of the Christian Democratic majority.

[The Bavarian Party (autonomist and monarchist) polled nearly 1,000,000 votes in 1949 and returned 17 deputies to the Bundestag elected in that year—see 10177 A. In 1953, however, it polled only 465,000 votes and failed to return any members. As stated above, the All-German People's Party dissolved itself before the recent elections.]

The "five per cent" clause did not apply to the Danish minority party in Schleswig (the South Schleswig Voters' Union), which was entitled to Bundestag representation if it won a constituency by direct election. It failed, however, to do this and in consequence is not represented in the new Bundestag. The 22 West Berlin delegates in the Bundestag were elected on Sept. 15 by the West Berlin House of Deputies; they comprised 12 Social Democrats, 7 Christian Democrats, 2 Free Democrats, and 1 member of the Free Democratic People's Party.

Pre-election Political Developments. - F.D.P. "Revolt" against Christian Democrats in North Rhine-Westphalia. - Split in Free Democratic Party. - Formation of Free People's Party. - Subsequent Merger with German Party.

The principal political developments in Western Germany prior to the elections were (i) a split in the Free Democratic Party (one of the three original parties in the Government coalition, the other two being the C.D.U. and the German Party), originating in a "revolt" by the F.D.P. against the C.D.U. in North Rhine-Westphalia; (ii) the formation of a "secessionist" group under the name of the Free People's Party, which continued to support the Government; and (iii) the subsequent merger of this group with the German Party. Thus, at the dissolution of the former Bundestag the coalition consisted only of two parties—the C.D.U. and the German Party, whereas after the 1953 elections it had consisted of the C.D.U., the F.D.P., and the German Party.

In February 1956 the Free Democrats in North Rhine-Westphalia, hitherto allied with the Christian Democrats in the *Land* Government, entered into an agreement with the Social Democrats to overthrow the *Land* Government headed by Herr Karl Arnold, the Christian Democratic Chief Minister of North Rhine-Westphalia. A declaration issued on Feb. 18, 1956, by the F.D.P. in North Rhine-Westphalia accused the C.D.U. of seeking at Federal level to force the Free Democrats to "surrender their political independence," of aiming at "one-party domination," of seeking to absorb the German Party and the B.H.E., and of opposing F.D.P. policies on the question of German reunification and other matters.

A motion of no-confidence in Herr Arnold was accordingly moved in the *Land* Parliament on Feb. 20, 1956, and carried by 102 votes to 96, the majority vote comprising the Social Democrats, the Free Democrats (with one abstention), and most of the nine Centre Party members. By an identical vote, the *Land* Parliament nominated Herr Fritz Steinhoff (Social Democrat) as *Land* Premier in succession to Herr Arnold, who had been Chief Minister of North Rhine-Westphalia for nine years.

The Free Democratic "revolt" against the C.D.U. in North Rhine-Westphalia was led mainly by the younger members of the F.D.P.—a party which includes a strongly nationalist section among its members, in addition to many Liberals and moderates. The chairman of the F.D.P. in North Rhine-Westphalia (Dr. Friedrich Middelhauve), refused, however, to associate himself with the manoeuvres to overthrow Herr Arnold, and abstained on the vote of no-confidence. Dr. Middelhauve, who had been deputy Chief Minister of North Rhine-Westphalia in Herr Arnold's Government, resigned from the party on Feb. 29, 1956.

A new Government was formed in North Rhine-Westphalia on the latter date (Feb. 29, 1956) consisting of a coalition between the Social Democrats, the Free Democrats, and the Centre Party. Its membership was as follows: Herr Steinhoff (S.D.P.)—Chief Minister; Herr Weyer (F.D.P.)—Deputy Chief Minister and Finance; Herr Biernat (S.D.P.)—Interior; Dr. Kohlhase (F.D.P.)—Economics and Transport; Dr. Amelunxen (Centre Party)—Justice; Professor Luchtenburg (F.D.P.)—Culture; Herr Hemsath (S.D.P.)—Labour and Social Affairs; Dr. Kassmann (S.D.P.)—Reconstruction; Herr Siemsen (S.D.P.)—Federal Affairs; Dr. Effertz (F.D.P.)—Food and Agriculture. The coalition between the F.D.P., the S.D.P., and the Centre Party commanded 110 seats out of a total of 200 in the *Land* Parliament.

Herr Steinhoff (59), the Burgomaster of Hagen, joined the S.D.P. at an early age and took a leading part in municipal affairs in the industrial town of Hagen until 1933, when he was removed from office by the Nazis. He was subsequently arrested by the Gestapo, imprisoned, and finally sent to the Sachsenhausen concentration camp. He played a prominent part in rebuilding the S.D.P. in North Rhine-Westphalia after the war, and became Burgomaster of Hagen in 1976.

In protest against the F.D.P. "revolt" against Dr. Adenauer in North Rhine-Westphalia, 16 of the 48 Free Democrats in the Bundestag withdrew on Feb. 28, 1956, from the F.D.P. parliamentary party. They included the four F.D.P. Ministers in the Federal Government—Dr. Blücher (Vice-Chancellor), Dr. Neumayer (Justice), Dr. Preusker (Housing) and Dr. Schäfer (Minister without portfolio)—in addition to Herr Euler, chairman of the Hessian branch of the party. The 16 deputies issued a statement justifying their withdrawal from the parliamentary party on the ground that the F.D.P. leadership under Dr. Dehler (the party leader) had been "pursuing a policy that has become increasingly contradictory and is calculated to confuse public opinion about the actual aims of the Free Democratic Party."

After a four-hour meeting under the chairmanship of Dr. Adenauer, the executive committee of the C.D.U. issued a statement on the following day declaring that the F.D.P.'s attitude in North Rhine-Westphalia "cannot be reconciled with the principles of loyalty, good faith and political decency," and paying tribute to Herr Arnold's work for the reconstruction of the *Land* during the past nine years. The statement expressed regret that the F.D.P. at the Federal centre had done nothing to prevent the developments in North Rhine-Westphalia and had, on the contrary, condoned them. The party's action in this matter had therefore "raised doubts about its trustful co-operation in domestic and foreign policies," and the split in the F.D.P. parliamentary party had "made it clear that these doubts were justified." In conclusion, the statement said that the Christian Democrats would "continue the coalition only with those members of the Bundestag who are willing loyally to co-operate and who reject the attitude of the Free Democrats in North Rhine-Westphalia" [i.e. with the 16 F.D.P. deputies who had denounced the party leadership.]

The 16 "dissident" deputies, including the above-mentioned four Ministers, subsequently formed themselves into a new party under the name of the Free People's Party, pledged to co-operate with the coalition and to adhere to the original F.D.P. principles. Dr. Preusker was elected chairman of the new party on June 24, 1956, when it held its first congress at Bochum. During the autumn of 1956, however, the Free People's Party decided to merge itself with the German Party, the merger coming into effect on Jan. 21, 1957.

Dr. Reinhold Maier, president of the Bundesrat and former Chief Minister of Württemberg-Baden, was elected chairman of the Free Democratic Party on Jan. 24, 1957, in succession to Dr. Dehler. All *Land* branches of the party had previously agreed to support Dr. Maier's candidature.

Dr. Maier was chairman of the German Democratic Party in Württemberg after the First World War, and a member of the Reichstag. As an anti-Nazi he was removed from the post of Minister of Economics in the Württemberg Government when Hitler came to power, and had to send his Jewish wife and their children to England. He was connected with the anti-Hitler Resistance movement during the Second World War, and had to go "underground" during its last year. He was *Land* Premier of Württemberg-Baden from 1945-53 at the head of an F.D.P.-S.D.P. coalition ministry, and became president of the Bundesrat in 1952.

Cabinet Reorganization.

The four Ministers of the Free People's Party (Dr. Blücher, Dr. Neumayer, Dr. Preusker and Dr. Schäfer) resigned from the Federal Cabinet on Oct. 6, 1956, in protest at alleged "leaks" from Christian Democratic sources of confidential discussions between the coalition parties on impending governmental changes. It was stressed, however, that the resignations implied no criticism of Dr. Adenauer's policies nor any lack of confidence in the Federal Chancellor.

After discussions between the Christian Democrats, the Free People's Party, and the German Party (the three parties forming the Government coalition at the time) the Federal Cabinet was reorganized on Oct. 16, 1956. It continued, as hitherto, to be drawn from the Christian Democratic Union (including the Christian Social Union in Bavaria), the Free People's Party, and the German Party, its members being as follows:

Abbreviations—C.D.U., Christian Democratic Union; C.S.U., Christian Social Union; F.P.P., Free People's Party; G.P., German Party.]

Dr. Konrad Adenauer (C.D.U.) ..	Federal Chancellor.
Dr. Franz Blucher (F.P.P.) ..	Vice-Chancellor and Minister for Economic Co-ordination.
Dr. Heinrich von Brentano (C.D.U.)	Foreign Affairs.
Dr. Gerhard Schroder (C.D.U.) ..	Interior.
Dr. Fritz Schäffer (C.S.U.)	Finance.
Professor Ludwig Erhard (C.S.U.)	Economics.
Herr Franz-Josef Strauss (C.S.U.)	Defence.
Dr. Heinrich Lubke (C.D.U.) ..	Agriculture.
Herr Anton Storch (C.D.U.) ..	Labour.
Dr. Hans-Christoph Seebohm (G.P.)	Transport.
Dr. Viktor-Emmanuel Preusker (F.P.P.)	Housing.
Herr Jakob Kaiser (C.D.U.) ..	All-German Affairs.
Dr. Hans-Joachim von Merkatz (G.P.)	Justice and Bundesrat Affairs.
Professor Theodor Oberländer (C.D.U.)	Refugee Affairs.
Dr. Siegfried Balke (C.S.U.) ..	Atomic Energy Questions
Dr. Franz-Josef Würmeling (C.S.U.)	Family Affairs.

The Cabinet was completed on Nov. 14 by the appointment of Herr Lemmer (a Christian Democrat from West Berlin) as Minister of Posts.

The Cabinet reorganization involved the dropping of four former Ministers—Herr Theodor Blank (Defence), Dr. Neumayer (Justice), Dr Hermann Schäfer and Herr Waldemar Kraft (both Ministers without portfolio). Herr Strauss, formerly Minister for Atomic Energy Questions, succeeded Herr Blank at the Defence Ministry; Dr. Balke (Minister of Posts) took over the Atomic Energy portfolio from Herr Strauss; and Dr. von Merkatz took over the portfolio of Justice from Dr. Neumayer, while remaining Minister for Bundesrat (Upper House) Affairs. Dr. Schröder, the Minister of the Interior, took over additional duties as chairman of the Federal Defence Council in succession to Herr Strauss, consequent on the latter's appointment to the Defence Ministry.

The membership of the Federal Government at the time of the general elections was as given above, no further Cabinet changes being made subsequent to the reorganization of October 1956. As stated above, the Free People's Party merged with the German Party in January last, its two Ministers (Dr. Blucher and Dr. Preusker) remaining in the Cabinet as members of the latter party.—(Frankfurter Allgemeine Zeitung - Die Welt, Hamburg - Times - Manchester Guardian) **(Prev. rep. 1953 Elections, 13141 A; Cabinet, 14562 B; 13205 A.)**

A. CZECHOSLOVAKIA - SOVIET UNION. — Discussions between Government and Party Leaders. - Bulganin-Khrushchev Visit to Prague.

A Soviet party and governmental delegation headed by M. Khrushchev and Marshal Bulganin visited Czechoslovakia from July 9-16 for discussions with leaders of the Czechoslovak Communist Party and Government, including President Zapotocky, M. Siroky (Prime Minister), and M. Novotny (First Secretary of the Czechoslovak Communist Party). In addition to the discussions in Prague, the Soviet leaders visited Brno, Bratislava, Kosice, Ostrava, Plzen (Pilsen), Olomouc, and other centres, as well as agricultural co-operatives, factories, and scientific institutions. M. Khrushchev addressed several public meetings at the places visited.

A joint communiqué was issued by M. Khrushchev and M. Novotny on July 16, as summarized below:

Soviet-Czechoslovak Co-operation. The communiqué stated (i) that important talks had been held on the co-ordination of industrial production and the economic policy of the two countries, and on questions of scientific and technical co-operation; (ii) that "a number of concrete economic agreements" had been signed, whilst a long-term trade agreement for 1958-60 would be signed shortly; (iii) that tourist exchanges between the two countries would be extended; and (iv) that the "exchange of economic, public, scientific and cultural delegations" would also be promoted.

Germany. After saying that "the policy pursued by the ruling circles of the German Federal Republic" was not helping "to eliminate the threat of war in Europe and throughout the world," the communiqué referred to the "intensified build-up of military potential" in Western Germany, "assisted by the ruling circles of Britain, the U.S.A., and France"; to "large-scale preparations for the atomic armament of the Bonn Army"; and to the "chauvinist propaganda" and "aggressive pan-German designs" of the Federal Government. It added: "All this makes it imperative for the peaceloving countries . . . to enhance their readiness to repulse any intrigues on the part of the West German militarists. The Czechoslovak Republic and the U.S.S.R., vitally concerned that the territory of Germany shall never again become a springboard of aggression, value all the more the existence of the German Democratic Republic, which is an important factor for the consolidation of peace and the easing of tension in Europe, and support its constructive efforts towards solving the German problem"

The Soviet "Anti-Party Group." The Soviet delegation had informed the Czechoslovak delegates in detail about the June plenary meeting of the Soviet Communist Party's central committee, which had discussed "the anti-party views and factional activities of the Malenkov-Kaganovich-Molotov group." The Czechoslovak Party had expressed its "complete agreement" with the decisions of the June meeting, and believed that "the exposure of the anti-Leninist group will serve further to strengthen the unity of the Soviet Communist Party's ranks and the cohesion of its central committee, and to promote the struggle for the successful implementation of the party's general line charted by the 20th [party] Congress."

Party Unity. The communiqué added: "Both delegations reaffirmed that the Leninist unity of the Communist and Workers' parties, and the cohesion of their leading bodies on the basis of Marxist Leninist principles, are a source of strength and invincibility for the party. Both parties believe that an unflinching struggle for party unity, against all expressions of factionalism and group action, is the sacred duty of every Communist. The representatives of both parties also noted that it is necessary resolutely to continue an unswerving struggle against revisionism, which is a sign of penetration by inimical bourgeois ideology into the ranks of the party. It is also necessary to prevent any divorce from the masses, as well as conservatism, which leads to sectarianism and dogmatism.

In a speech on his return to Moscow, M. Khrushchev said that the relations between the U.S.S.R. and Czechoslovakia were such as were found "only in the closest of families." He referred, however, to traces in Czechoslovakia of "bourgeois opposition" to the regime, which tried to "offer resistance, mainly of an ideological character, against this or that measure of the Government."

President Zapotocky, M. Novotny, and other Czechoslovak leaders had previously visited Moscow from Jan. 26-31, 1957, for similar governmental and party discussions. A communiqué on the governmental side of the discussions was issued by Marshal Bulganin and M. Zapotocky, its principal points being as follows:

(1) Both sides had agreed to strengthen the Warsaw Pact, as the West had "refused to accept Soviet peace proposals" or to disband NATO.

(2) The Czechoslovak Government supported the Soviet action in Hungary, the communiqué describing the Hungarian uprising as an "attempt to wrench Hungary from the Socialist camp and to launch an attack on the Socialist countries." It also pledged support to the Kadar Government against "any further attempts to interfere in Hungary's internal affairs."

(3) Both Governments condemned the "Eisenhower Doctrine" and reaffirmed their determination to "prevent German militarism."

(4) Czechoslovakia would continue to supply the U.S.S.R. with uranium ore, whilst the Soviet Government would help Czechoslovakia in the construction of atomic stations and experimental laboratories.

(5) The two Governments had agreed to set up an Economic Co-operation Commission, aimed at "co-ordinating industrial production through the mutually beneficial use of their natural and economic resources" [The first meeting of this Commission was held in Prague from May 15-17.]

A joint communiqué on the "party" aspect of the discussions, signed by M. Khrushchev and M. Novotny, stated that the two parties would "establish closer and more regular contacts" and that both sides condemned tendencies towards "nationalist and revisionist positions" and the spreading of "so-called national Communist ideas."—(Soviet Embassy Press Department, London - Times - Manchester Guardian - New York Times - Le Monde, Paris - Neue Zürcher Zeitung)

B. CANADA. — Federal By-election.

Mr. George H. Doucett, a former Minister of Highways in the Ontario Government, was returned unopposed on Sept. 9 as Progressive Conservative member for the Lanark constituency (Ontario) in the Federal by-election caused by the death of Dr. W. G. Blair. Mr. Doucett's election brought the Federal House of Commons up to its full membership, party strengths being: 112 Progressive Conservatives, 105 Liberals, 25 C.C.F., 19 Social Credit, 2 Independents, 1 Independent Liberal, 1 Liberal-Labour. As the Independent Progressive Conservative returned at the general election (Mr. Henri Courtemanche, member for the Labelle division of Quebec) subsequently joined the Progressive Conservative Party, the adherence of Mr. Courtemanche and the election of Mr. Doucett brought the party's representation in the House to 112. (Department of External Affairs, Ottawa - Montreal Star) **(Prev. rep. 15676 C; 15613 A.)**

A. GHANA. — Political Developments. - Deportation of Moslem Leaders. - Proposed Appointment of Regional Commissioners. - Suspension of Accra and Kumasi Municipal Councils. - Cabinet Changes. - Policy Statement by Dr. Nkrumah. - Opposition Allegations of "Dictatorial Tendencies."

A number of measures adopted by the Government of Ghana during the summer of 1957, including the deportation of opponents or critics of the Government and the replacement of regional officers by resident Ministers, provoked strong criticism from the Opposition, which accused the Government of dictatorial tendencies. Details of these measures and of other recent political developments in Ghana are given below under cross-headings.

Deportation of Opposition Spokesmen.

Mr. Bankole Timothy, deputy editor of the Accra *Daily Graphic* and Ghana correspondent of the London *Observer*, was ordered on July 31 to leave Ghana within 48 hours, on the ground that his presence was "not conducive to the public good." He did not appeal, and left on Aug. 2 for Sierra Leone, where he was born. Mr. Timothy had frequently criticized both the Government and the Opposition in his writings, and was the author of an approved biography of Dr. Nkrumah, the Prime Minister.

A cable expressing concern at the Government's decision was sent to Dr. Nkrumah on Aug. 1 by Lord Burnham, acting chairman of the council of the Commonwealth Press Union. In a reply published on Aug. 4, Mr. Baako (Minister of Information) denied that Mr. Timothy had been deported for his normal journalistic activities, and declared that "this Government will not tolerate any subversive activities by anyone, no matter what his profession."

Deportation orders were issued at the same time against two leading members of the Moslem Association Party, Alhaji Baba and Alhaji Lalemie, but an interim injunction was granted against these orders on Aug. 1 after writs had been filed declaring that Mr. Baba and Mr. Lalemie were Ghanaian citizens. When the case was heard before the Ashanti divisional court in Kumasi on Aug. 8, thousands of Opposition supporters demonstrated outside the court and seven people were injured in clashes with supporters of the ruling Convention People's Party (C.P.P.).

Mr. Geoffrey Bing, Q.C. (constitutional adviser to Dr. Nkrumah, and formerly Labour M.P. for Hornchurch), who appeared for the Government, contended that the burden of proof that they were not aliens rested on the applicants. [Under laws on citizenship and deportation passed in April and July, the Government was empowered to deport anyone who could not prove that he and one parent or grandparent was born in Ghana]. After Mr. Bing had given an assurance that the parties would not be deported pending the investigation of their claim to citizenship, Mr. Justice Smith discharged the injunction on Aug. 12, and the two men were arrested and removed to Accra.

[It was subsequently announced on Sept. 7 that Mr. Bing had been appointed Attorney-General of Ghana. He was on contract terms as a public officer for a period of 12 months, and did not become a member of the Government.]

A Special Deportation Bill empowering the Minister of the Interior to deport Alhaji Baba and Alhaji Lalemie without "appeal to or review in any court," and ordering their imprisonment for six months if they returned to Ghana without the Minister's written permission, was passed through all its stages on Aug. 23. The two men were flown to Kano (Northern Nigeria) immediately the Bill had received the Governor-General's assent. Rioting had meanwhile occurred in Accra on Aug. 20, when Opposition supporters stoned Ministers' cars, and again on the following day, when four people were injured in clashes between demonstrators and the police.

Announcing on Aug. 21 the Government's decision to introduce this Bill, Dr. Nkrumah referred to the violence and hooliganism which had occurred in Kumasi during the hearings and in Accra, and said that this would make it impossible to resume the hearing of the case in Ashanti. One of the Crown counsel in the case had been physically assaulted, and attacks had been made in the Press on the integrity of Mr. Justice Smith. "If therefore any other method of disposing of deportation orders can be found," Dr. Nkrumah added, "the Government think it is right that Mr. Justice Smith should not be subjected to the risk of further attacks, or called upon to adjudicate in a case where his good faith has been challenged."

The Christian Council of Ghana appealed to Dr. Nkrumah on Aug. 23 to withdraw the Bill, which, it said, violated the principle that "every citizen possesses the right to defend himself against any charge preferred against him." In reply, Dr. Nkrumah stated that the Bill was necessary because "those supporting the case of the two men were engaged in a systematic campaign to provoke violence, with the object of coercing the Government and bringing pressure to bear on the court." The Government had therefore taken the view that it was impossible to continue hearings of the case before Mr. Justice Smith, and had been faced with the alternative of yielding to threats of violence by abandoning any attempt to deport the men, or of deporting them by parliamentary action.

Protests against the deportation were also sent to the Government by the 64 paramount chiefs of the Southern Province and by the Anglican, Presbyterian, and Methodist Churches.

The hearing of the Moslem leaders' claim to Ghanaian citizenship was resumed in Kumasi on Sept. 5 before Mr. Justice Smith, who granted a request by their counsel for an adjournment. A statement was filed for the Government contending that the proceedings had been automatically determined by the Special Deportation Act. Mr. Akiwumi, counsel for the Government, said in a statement to the court that there had been no intention of not fulfilling Mr. Bing's undertaking that the two men would not be deported pending the investigation of their claim, but that subsequent events had made its fulfilment impossible.

Deportation orders were issued on Sept. 5 against two Moslem tribal leaders, Adamu Moshie and Adamu Gao, on the ground that their presence was "not conducive to the public good." Although settled in Kumasi for over 30 years, both were of French West African origin. The Minister of the Interior (Mr. Edusei) announced on the same day that he would introduce a Bill empowering the Government to "remove and detain any person who indulges in unconstitutional and subversive activities," and that Ghanaian citizens might be deported locally and restricted to a particular area, in some cases without being brought before a court.

Proposed Appointment of Regional Commissioners. - Suspension of Accra and Kumasi Municipal Councils.

The Statute Law Amendment Bill, introduced in the National Assembly on Aug. 26, provided for the abolition of European chief regional officers and regional officers and the appointment of regional commissioners, who would be resident Ministers and whose duties would include the maintenance of security and co-ordination of all Government departments in the regions. In support of the Bill, Mr. Edusei said that relations between the Government and the people would benefit from the appointment of resident Ministers in the regions. Dr. Busia (Leader of the Opposition), on the other hand, declared that the Bill had "objectionable implications" because it would lead to the introduction of party control over regional administration. Opposition to the Bill had previously been expressed by the paramount chiefs of the Coastal Province, the Asanteman Council in Ashanti, and the Northern House of Chiefs.

The Minister of Local Government (Mr. Ofori Atta) announced in the Assembly on Aug. 30 that district councils in the Northern Territories would be regrouped, and would no longer be identified with the boundaries of the paramount chieftaincies.

The Government had previously announced on April 4 that Christiansborg Castle, the Governor's residence since 1902, would become the Prime Minister's official residence and office, whilst the Governor-General would occupy the recently-erected State House. In reply to Opposition criticism that this change would involve unnecessary expenditure, Mr. Baako said that Christiansborg Castle had always been the seat of the Government, and the decision had been taken in consonance with Ghana's new political status.

The Government suspended the Accra municipal council (in which C.P.P. supporters had a majority) on April 17, on the grounds that it had not collected rates or submitted audited accounts and had allegedly made advances to councillors. Kumasi municipal council was also suspended on April 26, on the grounds that had repeatedly contravened provisions of the Municipal Councils Law, disregarded the Minister of Local Government's directions, and incurred unauthorized expenditure. In each case the council's functions were transferred to a committee of seven.

Cabinet Changes. - Dr. Nkrumah's Policy Statement.

A Cabinet reshuffle was announced in the National Assembly on Aug. 29 by Dr. Nkrumah, involving the following changes: Mr. Ako Adjei (previously Minister of the Interior and Justice) became Minister of Justice; Mr. Krobo Edusei (Communications) became Minister of the Interior; Mr. F. Y. Asare (Labour, Co-operatives, and Social Welfare) became Minister of Communications; and Mr. N. A. Welbeck (Minister without portfolio) became Minister of Labour and Co-operatives. The Ministry of Commerce and Industry was renamed the Ministry of Trade and Development, but remained under the same Minister, Mr. Kojo Botsio.

At the same time Dr. Nkrumah made a lengthy statement on the Government's home and foreign policy.

After announcing that the Government had taken the initiative in calling a conference of the independent States of Africa, which was expected to take place in Accra early in 1958, Dr. Nkrumah said that Ghana had close ties with the United Kingdom, with France, whose territories surrounded her on all sides, and with the U.S.A., which had always taken a lively interest in the development of emergent States. She would also endeavour to preserve normal relations with the Soviet Union and China. The Government would invite the Soviet, Chinese, and Japanese Governments to receive a trade mission from Ghana, and hoped that a mission would also be able to visit India and possibly other Far Eastern countries. "Ghana does not intend to follow a neutralist policy," he added. "It is our intention to preserve our independence and to act as we see best at any particular time."

Turning to home affairs, Dr. Nkrumah said that the Government contemplated introducing compulsory national service, side by side with the establishment of a volunteer territorial force. A "national builders' brigade" would be established to create employment, an intelligence services would be set up to give the Government "a comprehensive picture of the local and international situation"; and a Chief of External Intelligence would be appointed to provide "reliable information on the reactions of the outside world to the policies adopted by Ghana."

Commenting on foreign Press reactions to the recent deportations [see above], Dr. Nkrumah said that while he welcomed criticism, no Government could tolerate "untrue or exaggerated stories aimed at discrediting the Government and creating violence and disorder." He went on: "The deportation of three people from Ghana has aroused the attention of the world Press, sections of which often pass over in silence many of the arbitrary executions, arrests, and detentions which unfortunately occur in other parts of the world. I do not resent in any way criticisms that have appeared in liberal European papers. I think the critics have not been fully informed of the facts. I think if the true facts came out all the Opposition would be in gaol."

In the older democracies, such as Britain and the U.S.A. (Dr. Nkrumah went on), the Opposition conducted itself in a sober and responsible way because it had been in power and knew the problems of office. In Ghana, however, the Opposition had never held office, and there did not yet exist the "respect for the self-imposed rules of restraint" which was necessary on all sides if democracy was to be successful. "It is therefore necessary to impose by a positive discipline what in the older democracies is done subconsciously," he declared. "I do not in any way object to political attacks on me or my party. What is completely destructive of democracy, and what the Government will not tolerate, are unfounded and unwarranted attacks upon the judiciary, police, Civil Service, and Army. The Government intend to take every step necessary to protect these from criticisms which should be directed towards the Government, whose policies the security forces and the Civil Service are merely carrying out. "

Commenting on Dr. Nkrumah's speech, Dr. Busia declared on Aug. 30 that "the trend towards dictatorship has become more evident." In support of his statement he referred to "deportations, the banning of certain news on the radio, and ministerial changes tending to give the Government greater control of the police and the trade unions." Dr. Busia gave a warning that legislation tampering with the traditional structure of the Ashanti region and the Northern Territories might lead to a risk of civil war.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Cabinet, 15729 B.)**

A. KENYA. — Decline in Mau Mau Detainees.

The following information was given in the Colonial Office's annual *Report on Kenya*, published on Sept. 10: (i) the number of Mau Mau detainees in emergency detention camps was 31,532 at the end of 1956, a reduction of 13,415 since the end of 1955; (ii) the number of detention establishments had fallen during the year from 41 to eight; (iii) a review committee had recommended 915 Mau Mau convicts for remission of sentence, all of whom had responded to rehabilitation and earned accelerated release; (iv) the rehabilitation of women and young men, previously a "most intractable problem," had been particularly successful; (v) there were "virtually no backsliders among any detainees released after rehabilitation."—(Times) **(Prev. rep. Mau Mau, 15632 A.)**

B. MALAYA. — Admission to United Nations.

An application by Malaya for membership of the United Nations was unanimously approved on Sept. 5 by the Security Council. Malaya became the 82nd member-State of the U.N. when formal approval was given by the General Assembly at the opening of its 12th session in New York on Sept. 17.
(U.N. Information Centre, London) **(Prev. rep. 15738 A.)**

C. CEYLON. — Diplomatic Relations with Czechoslovakia at Embassy Level.

It was announced in Colombo on Sept. 12 that Ceylon and Czechoslovakia had decided to establish diplomatic relations at embassy level and to exchange ambassadors.
(Ceylon Government Information Department)

D. UNITED KINGDOM. — Government Changes.

The following changes in the Government were announced on Sept. 17:

Viscount Hailsham	Lord President of the Council.
Mr. Geoffrey Lloyd	Minister of Education.
Mr. Derek Walker-Smith ..	Minister of Health.
Mr. J. K. Vaughan-Morgan ..	Minister of State, Board of Trade.
Mr. R. H. M. Thompson ..	Parliamentary Secretary, Ministry of Health.

Lord Hailsham (49), formerly Minister of Education, took over the post of Lord President of the Council from the Earl of Home, who had combined it with the posts of Secretary of State for Commonwealth Relations and Leader of the House of Lords. As Lord President of the Council, Viscount Hailsham will be responsible to Parliament for matters connected with the Department of Scientific and Industrial Research, the Agricultural and Medical Research Councils, and scientific matters generally, including scientific manpower. Responsibility for atomic energy, however, will continue to be exercised by the Prime Minister. Lord Home remained Leader of the House of Lords, and Lord Hailsham deputy leader. [For biography of Lord Hailsham see 15072 D.]

Mr. Geoffrey Lloyd (53), who succeeded Lord Hailsham at the Ministry of Education, returned to the Government after being a back-bencher since December 1955. He had been Minister of Fuel and Power since 1951, but was dropped from the Cabinet when Sir Anthony Eden succeeded Sir Winston Churchill in the Premiership. [For biography of Mr. Lloyd see page 11796, first column.]

Mr. Derek Walker-Smith (47), previously Minister of State at the Board of Trade, succeeded Mr. Dennis Vosper at the Ministry of Health. Mr. Vosper, who had been taken seriously ill in July, resigned from the Government because his prolonged convalescence would not permit him to resume his ministerial duties at an early date. [A biography of Mr. Walker-Smith is given on page 15314.]

Mr. Vaughan-Morgan (52), formerly Parliamentary Secretary at the Ministry of Health, succeeded Mr. Walker-Smith as Minister of State at the Board of Trade. He is Conservative M.P. for Reigate, and was an industrialist and company director before entering politics. During Mr. Vosper's illness Mr. Vaughan-Morgan acted as ministerial spokesman in the Commons on matters relating to public health.

Mr. Thompson (44), M.P. for Croydon South, succeeded Mr. Vaughan-Morgan as Parliamentary Secretary at the Ministry of Health. Previously a Vice-Chamberlain of H.M. Household, he was succeeded in that office by Mr Peter Legh, M.P.

It was also announced that Mr. Geoffrey Lloyd and Mr. Reginald Maudling would be members of the Cabinet, whose size was thereby increased from 17 to 19. The average age of the Cabinet remained unchanged at 53. Mr. Maudling (40) is spokesman for the Minister of Power (Lord Mills) in the House of Commons, and also has special responsibility for co-ordinating the planning of Britain's association with the proposed European Free Trade Area.—(Times - Daily Telegraph) **(Prev. rep. 15595 A; 15492 B.)**

E. SHIPPING. — Permanent Home at Greenwich for Clipper "Cutty Sark."

The *Cutty Sark* (the sole survivor of the "clipper ship" era), now permanently berthed in a drydock at Greenwich, was opened to the public by H.M. the Queen on June 25.

Built on the Clyde in 1869, and deriving her name—meaning in the Scots dialect "short petticoat"—from Robert Burns's poem *Tam O'Shanter*, the *Cutty Sark* was intended for the tea trade from China to Britain, and combined small size (963 gross tons) with the ultra-fine "lines" and enormous sail-spread characteristic of the "tea clippers." Although she made a few fast passages from Amoy and Foochow to London, competition from steamers following the opening of the Suez Canal soon made voyages to China unprofitable for sailing vessels, and the ship was transferred to the wool trade from Australia to the United Kingdom. In this she remained employed until sold in 1895 to Portuguese shipowners, who renamed her *Ferreira*.

In 1922 the vessel put into Falmouth for shelter after encountering heavy gales, and was seen there by Captain Dowman, a retired master mariner who had served in her as an apprentice. He bought her, and after restoring her name and former rig, retained her at Falmouth as a memorial of the "clipper ship age" until his death in 1936, when the ship was presented by his widow to the Thames Nautical College and towed to the Thames. A few years ago the full restoration of the vessel was taken in hand—under the guidance of the Director of the National Maritime Museum—by an organization (The Cutty Sark Preservation Society) formed for the purpose under the patronage of the Duke of Edinburgh.

The site of the drydock in which the *Cutty Sark* is berthed was given by the London County Council, together with the surrounding area, which, planned as an open riverside area, will be known as the "Cutty Sark Gardens."
(Lloyd's List and Shipping Gazette - Times)

A. UNITED KINGDOM. — R.A.F. Estimates, 1957-58. - The Air Secretary's Review. - First British Guided Missile Squadron. - "Lancaster" Bombers and "Spitfire" Fighters withdrawn from Active Service.

The Royal Air Force Estimates for 1957-58 were published as a White Paper on April 25, 1957.

The net total of £1187,000,000 shown in the Defence Estimates included the following principal items (1956-57 figures in parentheses): Airframes, £72,500,000 (£65,000,000); Aero-engines, £61,200,000 (£74,500,000); Spares, Components, etc., £23,700,000 (£25,500,000); Armament, Ammunition and Explosives, £28,500,000 (£30,500,000); Radio and Radar, £28,400,000 (£29,000,000); Petrol and Oil, £45,750,000 (£51,000,000). The Estimates showed a decrease of about £4,000,000 in Service pay and allowances as a result of reductions in strength, but civilian pay and allowances were higher by £1,670,000, an anticipated reduction in strength being more than offset by increased rates of pay.

An accompanying memorandum by the Secretary for Air (Mr. George Ward) stressed that although ballistic missiles would "gradually come to play an increasing important part in the offensive deterrent," the manned bomber and fighter would continue to be needed for many years to come, whilst in such roles as air transport the need for manned aircraft was "likely to increase rather than diminish." The foundations of Britain's deterrent power would for many years remain the "V" bomber force, which would be progressively developed, and in which improved marks would be introduced able to carry power-guided bombs. Meanwhile stocks of nuclear weapons were increasing in line with Bomber Command's ability to carry them, and air defences were being recast to concentrate on the defence of nuclear bases.

The following information was given in the memorandum:

Bomber Command. The "V" bomber force was "building up steadily," with *Valiants* now at full strength, some *Vulcans* already in service, and the *Viceroy* due to enter service during the year. The light bomber force would be reduced to about half its present size, but the reduction would be more than counter-balanced by equipping the *Canberra* squadrons to deliver nuclear bombs.

Fighter Command. The *Javelin* was well established and popular with aircrews. Day-fighter squadrons were being equipped with the latest mark of *Hunters*, the F.6, and a production order had been placed for the supersonic P.1, of which the first prototype (the P.1B) had made its first flight in April, 1957.

[It was subsequently announced on Aug. 30 that the P.1B would be powered by two Rolls-Royce turbo-jet engines fitted with a re-heat device for augmenting thrust.]

Coastal Command. The capacity of this Command to deal with the submarine threat was being improved. The *Neptune* and *Sunderland* squadrons had been disbanded and the long-range maritime reconnaissance force wholly equipped with *Shackletons*, a new version of which (the Mark III) would soon enter service.

Second Tactical Air Force (NATO). The reductions mentioned in the Defence White Paper would mainly affect the day-fighter ground-attack element, and to offset the cut by higher quality the remaining squadrons would be re-equipped with *Hunter 6s*. The striking power of the 2nd T.A.F. would rest on its *Canberras*, equipped to deliver nuclear weapons.

Middle and Far East. British policy in these areas remained the provision of small air forces of high quality, ready to receive reinforcements from the U.K. in emergencies.

Canberras and *Hunters* were being introduced into both the Far East and Middle East Air Forces, and *Twin Pioneair* aircraft had also been ordered for these theatres.

Commonwealth Strategic Air Reserve. Arrangements for the Commonwealth Strategic Air Reserve were proceeding smoothly, and an understanding had been reached with the Malayan Government on the sites required for airfields and radar stations. The wartime airfield at Gan, on Addu Atoll (Maldive Islands), would be rebuilt as a staging post on the route to Australia, New Zealand, and the Far East [see 15295 A].

Control and Reporting. The "very high performance" of the new British radar equipment had enabled the control and reporting organization to be streamlined and the number of stations to be reduced. Integration of British and Continental systems had been further advanced by experience of joint working in extensive air exercises, and the Royal Observer Corps had carried out practice exercises in reporting and tracking radio-active fall-out.

Guided Missiles. The memorandum explained that these were of four main types: (1) *Air-to-air*, launched from aircraft; (2) *Surface-to-air*, fired either from the ground or from a ship; (3) *Air-to-surface*, including the powered or "stand-off" bomb; (4) *Surface-to-surface*, which might be either a winged, unmanned, expendable bomb or a ballistic rocket. The first type were defensive weapons, but the others were longer-ranged and were alternatives to the orthodox bomber. Most missile weapons were powered by rockets or ram-jets, but the latter method was not effective until high speeds had been reached; missiles so fitted were usually accelerated initially by "booster" rockets.

Alternative guidance systems (some of which were elementary and already inadequate) included: (*a*) the "beam-rider" system, in which the missile flew along a beam transmitted from an aerial near the launching point; (*b*) the "passive homer," in which the missile "homed" on to emissions from the target e.g. heat from its engines; (*c*) the "semi-active," where the target was "illuminated" by radar and the missile "homed" on to the radiated reflection; (*d*) the "active homing" system, in which the weapon generated its own signals and could "home" on to the target without external aid; (*e*) the "celestial guidance" system, which could be used for long-range bombardment missiles aimed at stationary targets, and comprised a complicated astro-navigation system locked on to a selected star by radar or infra-red.

Acceptance trials of the *Fireflash*, the R.A.F.'s first guided missile (see 14735 B), had been encouraging and several target aircraft had been shot down at operational ranges. Full-scale trials with this weapon were about to begin, and a more advanced missile (the *Firestreak*), based on the infra-red principle, would shortly begin acceptance trials. The *Firestreak* would be fitted to *Javelins* and *P.1's*.

Development of surface-to-air weapons was also well advanced. "Simulators" were being developed to reduce flying by target aircraft and firings of expensive missiles, but it would remain necessary to fire actual missiles against "drone" targets to test the reliability and effectiveness of the whole system.

Equipment had been ordered for an initial operational deployment of the *Bloodhound*, a ground-to-air missile of the "semi-active homing" type, and more advanced types of ground-to-air missile were also being developed.

Early missiles would carry high-explosive warheads, but the natural development was to fit atomic warheads, which the Government intended to do.

The first R.A.F. missile station was under construction at North Coates, Lincolnshire, and would be brought into use for service trials in 1958.

New Guided Missile Organization. A new organization was being set up at the Air Ministry under an Air Vice-Marshal to co-ordinate and plan the introduction of guided missiles and their associated radar, and to integrate them with the existing control, radar and fighter-defence systems.

Manpower. The strength of the R.A.F., at present about 230,000, would be reduced to about 210,000 by April 1, 1958. The memorandum stressed that although this reduction of 20,000 would necessarily entail some premature retirements of officers and N.C.O.s, those would be phased over a period and, as far as possible, would be limited to those nearing the end of their normal careers. Everything possible would be done to minimize the effect on individuals.

Recruitment. Recruitment of Regular airmen and airwomen had improved since the pay increases in April 1956 (see 14887 A). In this connexion the memorandum stressed that "the key roles of the R.A.F. in the country's defence system will continue to demand qualities at least as high as in the past."

Review by Secretary of State for Air.

The Air Estimates were passed by the House of Commons on May 9 without a division.

Mr. Ward explained that although the net Estimates were about £10,000,000 more than those for 1956-57, this was entirely due to the reduction of U.S. aid from £38,000,000 in 1956-57 to £9,500,000 in the current year. The real comparison, he stressed, was between the gross Estimates £506,150,000 for 1957-58 and £524,095,000 for 1956-57, giving a reduction in 1957-58 of nearly £19,000,000.

After pointing out that whatever progress might be made in the development of guided missiles, the manned aircraft, with the added flexibility offered by the human mind, would have the advantage for many roles, Mr. Ward spoke of the "revolution" which had taken place in the radar defence system during the past five years. The heart of the latest defence chain, he said, was a high-powered radar for early warning and control which, instead of the previous "rather complicated organization," would give the commander of the defensive forces an instantaneous picture of threatened attack hundreds of miles before the British coasts were reached. At the same time the number of radar stations was smaller and the operational machine could be simpler and more effective, whilst new plans on which the Government was working would result in a large reduction of manpower, coupled with vastly increased radar cover. Finality, however, was far from having been reached, for the defensive system must not only keep pace with the ever-developing threat, but must also be able to provide long-range early warning for the operation of Britain's guided-weapon defence.

Turning to the task of Transport Command in providing mobility for the Services, the Minister said that for long-range movement the main load would fall on the *Britannia*, of which 13 were on order (the first being due to come into service in 1958), with more to follow. For the present, however, Transport Command would have to rely on *Comet II's* (of which it had eight, with two more to be delivered shortly) and the *Hastings*, the latter being used for medium-range transport work after the *Britannias* had come into service. Movement within overseas theatres would be carried out largely by *Beverleys* (a large number of which were on order, with a third *Beverley* squadron in formation), whilst smaller aircraft—e.g. twin-rotor helicopters and twin- and single-engined *Pioneirs*—would also be needed. During the past year there had been a twofold increase in passengers carried by Transport Command, and it was hoped that by 1960 available capacity would be nearly three times the present figure.

With regard to air trooping, Mr. Ward explained that, in order to ensure flexibility and economy, the Government's policy was to invite independent operators to carry out the task, which was of great value to them and constituted about 65 per cent of their passenger-carrying activities. This arrangement left Transport Command free to concentrate on providing air movement support for the Services when necessary. All civil trooping aircraft were subject to the same statutory regulations as other civil aircraft. Before a contract was given, the method of operation, routes, crew qualifications, navigational facilities, and loads were examined and approved by the Ministry of Transport and Civil Aviation, the standards being those applied to British European Airways and the B.O.A.C. The independent operators had a good safety record, and since 1951—when they first started to operate trooping contracts—had carried well over 600,000 passengers with only five accidents involving loss of life. During the same period Transport Command had carried approximately 100,000 passengers with many *ad hoc* trooping flights, and had had only two fatal accidents—one at Lyneham in 1954, when a member of a *Valetta* crew was killed, and a more serious accident to a *Beverley* at Abingdon in March 1957.

As regards suggestions that there should be an independent inquiry into the Government's policy with regard to air transport and air trooping, Mr. Ward said that he had examined the proposal together with the Minister of Transport and Civil Aviation, and had decided that it must be rejected. The Government accepted full responsibility for its policy, and was not responsible to any *ad hoc* committee of inquiry but to Parliament. The Government emphatically rejected the suggestion that its trooping policy was endangering life unnecessarily, and examination of the findings of air accident investigations entirely vindicated its confidence in the safety standards it required for air trooping, in the efficiency with which air transport operators implemented them, and in the aircraft themselves.

Mr. Ward concluded by referring to the Minister of Defence's statement in April (see 15550 A) that the three Services together might have a surplus of between 5,000 and 7,000 officers and about the same number of warrant officers and N.C.O.s within the next five years. He gave an assurance that the R.A.F.'s share would in each case be "appreciably less than one-third of the total."

The following senior R.A.F. appointments were announced during recent months (dates of announcement in parentheses):

Air Vice-Marshal E. C. Hudleston (an Australian) as Vice-Chief of Air Staff—with rank of Air Marshal—in succession to Air Chief Marshal Sir Ronald Ivelaw-Chapman, retiring (March 25, 1957) Air Vice-Marshal Hudleston had been R.A.F. instructor at the Imperial Defence College since February 1956, and was previously A.O.C. No. 3 Group, Bomber Command, and Deputy Chief of Staff (Plans and Operations) at Supreme Headquarters, Allied Powers, Europe (SHAPE).

Air Marshal Lord Bandon, C.-in-C. of the 2nd Tactical Air Force in Germany, as C.-in-C. Far East Air Force *vice* Air Marshal Sir Francis Fressanges, retiring. (April 8, 1957)

Air Vice-Marshal J. H. Edwardes, Commandant of the School of Land-Air Warfare at Old Sarum (Wiltshire) as C.-in-C. of the 2nd T.A.F. *vice* Lord Bandon, with rank of Air Marshal. (April 8, 1957)

Air Chief Marshal Sir Walter Dawson, Inspector-General of the R.A.F., as Air Member for Supply and Organization *vice* Air Chief Marshal Sir Donald Hardman, retiring. (Aug. 26, 1957). The appointment takes effect on Jan. 1, 1958.

Air Marshal Sir Gilbert Nicholetts, A.O.C. Malta, and concurrently Deputy C.-in-C. (Air), Allied Forces, Mediterranean, as Inspector-General of the R.A.F. *vice* Sir Walter Dawson. (Aug. 26, 1957).

Air Marshal Sir Claude Pelly, C.-in-C Middle East Air Force, as Controller of Aircraft at the Ministry of Supply *vice* Air Chief Marshal Sir John Baker, retiring. (The appointment took effect on Nov. 19, 1956).

Air Vice-Marshal Sir John Whitley as Air Member for Personnel (with rank of Air Marshal) *vice* Air Chief Marshal Sir Francis Fogarty, retiring. (The appointment took effect on Jan. 1, 1957).

Air Vice-Marshal J. L. F. Fuller-Good as Commandant-General of the R.A.F. Regiment and Inspector of Ground Combat Training, *vice* Air Vice-Marshal B. C. Yarde. (Jan 28, 1957).

Air Vice-Marshal D. G. Morris as head of the new organization set up by the Air Ministry to co-ordinate the introduction of guided missiles and their associated radar, mentioned by Mr. Ward. (April 25, 1957).

The Air Ministry announced on Aug. 14 that the first British Guided Missile Squadron had been formed at the R.A.F. station at Valley (Anglesey). It would train pilots in the use of the *Fairey Fireflash* guided missile (see above).

The last of the *Lancaster* bombers, of which altogether 7,866 were built, and which during the war dropped 608,612 tons of high-explosive bombs over enemy territories in more than 156,000 sorties, made its final flight to the breaker's yard on Oct. 15, 1956. The last three *Spitfires*, which took part in the Battle of Britain in 1940, were withdrawn from service on July 11 but will take part in the annual Battle of Britain fly-past and other ceremonial occasions.

A. RHODESIA AND NYASALAND FEDERATION. — Publication of "Central African Examiner."

The first issue of a new fortnightly journal, the *Central African Examiner*, appeared on June 7. Described as "an experiment in journalism in a new and growing country," its declared aim is "to provide a comprehensive background to the news of the day for thoughtful people in the Federation of Rhodesia and Nyasaland and to help create an informed and critical approach to current problems."

Sir Geoffrey Crowther, the former Editor of the *Economist*, had previously visited the Federation and had given it as his opinion that there would be widespread support for a serious journal in that country. On his advice the Rhodesian Selection group of copper-mining companies decided to provide the financial support necessary for establishing the *Central African Examiner*, while agreeing to safeguard the integrity of the journal and the complete independence of the Editor.

The example of the *Economist* has been followed by the appointment of three independent trustees without whose consent the Editor cannot be dismissed. The trustees are Sir Robert Tredgold, Chief Justice of the Federation; the Rt Rev. Oliver Green-Wilkinson, Bishop of Northern Rhodesia; and Dr. Walter Adams, Principal of the University College of Rhodesia and Nyasaland. Sir Geoffrey Crowther has agreed to be a member of the Board of The Central African Examiner Ltd., of which Mr. A. B. MacLaren (a vice-president of Rhodesian Selection Trust) is chairman and Mr. David Cole (former Editor of the *Northern News*, Ndola) managing director. The members of the Board include an African barrister, Mr. H. W. Chitepo.

It was stated that the policy of the *Central African Examiner* would be the sole responsibility of the Editor, and that the journal would maintain an "independent and impartial attitude towards all questions, whether political, industrial, social or racial."

The Board of Directors, with the trustees' approval, appointed Mr. Francis Baughan as Editor of the *Central African Examiner*. Mr. Baughan was formerly on the staff of *The Times* (London), specializing in colonial affairs, and was also Editor of *The Times British Colonies Review*.
(Central African Examiner - Federal Information Department)

B. SOVIET UNION. — Restrictions on Foreign Shipping and Aircraft in Vladivostok Area. - Japanese, American and British Protests.

It was announced by Moscow Radio on July 20 that, with the single exception of vessels entering or leaving the port of Nakhodka, foreign vessels and aircraft would in future require the express permission of the Soviet authorities to enter the area of Peter the Great Bay. [Peter the Great Bay is a triangular inlet of the Sea of Japan and leads to Vladivostok, the Soviet Union's main Pacific port and naval base; it is about 100 miles wide. Nakhodka is about 50 miles south-east of Vladivostok.]

The announcement explained that the Soviet Council of Ministers had recently established the frontier of Soviet internal waters in the area, and hence the starting-line for calculating the width of Soviet territorial waters in the direction of the sea, as a line linking the mouth of the River Tyumen-Ula and Cape Povorotny (i.e. across the mouth of Peter the Great Bay).

The Soviet action led to protests by Japan, the U.S.A. and Great Britain. The Japanese Note, delivered in Moscow on July 26, claimed that the Soviet action "contravenes the principles of international law" and "unlawfully violates the Japanese people's freedom of fishing and navigation," as the area in question was "a traditional fishing-ground of the Japanese people." The American Note (the text of which was issued on Aug. 13) declared that the Soviet action constituted an attempt to appropriate unlawfully a large area of the high seas.

The British Note, handed over on Sept. 10, stated that "H.M. Government consider that this action of drawing a closing line of 102 miles in length has no foundation in international law, and that the Soviet action is contrary to the spirit, intention, and wording of Article 7 of the draft Articles on the Law of the Sea drawn up and accepted by the International Law Commission, whose members include a Soviet jurist." It added that the Soviet Government's action was also contrary to "the well-established principle of freedom of the seas."—(Soviet Embassy Press Department, London - Japanese Embassy Press Department, London - Times - Manchester Guardian - New York Times)

Note. The Article referred to in the British Note lays down that if the distance from one shore of an inlet to another were 15 miles or less, the waters of the inlet would rank as internal waters. If the distance were more than 15 miles, the normal rule for coastal waters (i.e. a three-mile strip of territorial waters) would apply.

A. UNITED NATIONS. — Dr. Hammarskjöld's Annual Report to U.N. General Assembly.

The annual report of the U.N. Secretary-General, Dr. Dag Hammarskjold, was issued on Sept. 4 for submission to the forthcoming (12th) session of the General Assembly. In his introduction, the Secretary-General pointed out that the United Nations had been confronted during the past year with some of the most difficult situations it had been called upon to meet since its foundation in 1945, notably in the Middle East and in Hungary. Dr. Hammarskjold's "historical account of these important developments up to June 1957," together with his "observations arising from the experiences of the past year," are summarized below:

The Palestine Question. "As this is written," said Dr. Hammarskjöld, "the U.N. Emergency Force is completing its sixth month of deployment on the Egyptian side of the armistice line with Israel. It has, I believe, been a pre-condition for the maintenance of general quiet in the area of its deployment, just as in earlier months it played an essential part during the withdrawal of foreign troops from Egyptian territory. The Commander and members of the Force have fully earned the admiration and gratitude of the United Nations for the manner in which they have served and continue to serve the cause of peace in the Middle East in a pioneering role accompanied by many difficulties and endowed with limited authority. Equally, thanks should be expressed to the States which have supplied the units composing the Force and given it logistical support . . .

"The quiet maintained in recent months helps towards creating a favourable setting for future progress toward those basic solutions which are so necessary to the security and well-being of all the nations of the area. Now, as always, progress toward such solutions depends primarily upon the attitude and initiatives of the Governments themselves. The U.N. can help by lending its influence, its presence, and the processes of diplomacy which are available to the world organization. It can also help by providing an objective judgment of the rights and interests involved.

"In the Palestine question the U.N. has two special responsibilities. One is in regard to the Armistice Agreements endorsed by the Security Council. The other is the humanitarian responsibility for the Palestine refugees, who have been under U.N. care for nine years as homeless victims of events outside their control, while the problems of repatriation or resettlement have remained unsolved by the Governments upon whom rests their hope for a life more consonant with human dignity.

"To work toward a restoration of the Armistice Agreements, and to give constructive help to the refugees, are obligations of first priority resting upon the Organization and its member-Governments. There continues to exist, I am convinced, a basic will to peace in the area despite whatever signs there may have been to the contrary. I would be the last to minimize the very great difficulties that lie in the way of steps by Governments which are necessary to translate this will to peace into concrete progress toward peaceful solutions. These difficulties must nevertheless be surmounted. The U.N. cannot and should not attempt to do this alone. The Governments concerned, with whom the power of decision rests, may not be able to do it alone. But the Governments, strengthened by the help available from and within the U.N., can, and I hope will, decide to lead their peoples step by step upon this road toward a more secure and promising future for them all.

The U.N. Emergency Force. "The U.N. Emergency Force is the first of its kind. It was created in a few days under emergency conditions without benefit of precedents. It is a temporary force with a limited mandate and designed to meet a special situation. But the value of such a force in situations like that in the Middle East had been fully demonstrated, and this value should be preserved for the future. There is need for careful analysis and study of the UNEF experience . . . should the Organization wish to build an agreed standby plan for a U.N. peace force that could be activated on short notice in future emergencies to serve in similar ways. Steps have been taken for such a study to be undertaken in the Secretariat."

The Suez Canal. "During the past year the U.N. has been concerned with the Suez Canal in two respects. There were differences over the regime of the Canal which arose after Egypt's nationalization of the Suez Canal Company, some of which are still pending. There was also the responsibility assumed by the U.N., at the request of the General Assembly and on the invitation of the Government of Egypt, to assist in reopening the Canal after it had been blocked last November.

"Like UNEF, the international clearance operation under the U.N. flag was the first undertaking of its kind attempted by the world organization. The vital importance of the Suez Canal to the economies of many nations made this a grave responsibility. The Canal was reopened to full traffic a little more than three months after the U.N. salvage fleet began its work. This was well ahead of schedule. The cost is estimated at about $8,600,000 . . . Since April, Suez Canal traffic has returned to the normal flow of recent years. However, various questions regarding the regime of the Canal following nationalization have still not found solutions which are generally accepted. It should also be noted that the six-year-old question of Israeli shipping remains in dispute.

"Members will recall that a number of questions and doubts concerning the Declaration registered by Egypt with the United Nations as an international instrument were left pending at the conclusion of the Security Council's meetings last spring. The President of the Council then stated that most members had qualified their acquiescence in the Egyptian declaration as provisional and that, pending concrete steps the Egyptian Government might wish to take to remove the doubts that had arisen, the Council would remain seized of the question. Since then, in accordance with the intention expressed in its Declaration, the Egyptian Government has deposited its acceptance of the compulsory jurisdiction of the International Court of Justice in legal disputes arising between the parties to the Constantinople Convention of 1888 in respect of the interpretation of applicability of its provisions. On other questions which arose at the Security Council meetings the Secretary-General has continued his efforts through informal contacts with the parties, without as yet being in a position to report further progress.

The Hungarian Question. "The Hungarian question will come once more before the General Assembly when the Assembly takes up the report of the investigation made by its Special Committee a few days after this communication reaches the hands of member-Governments . . . In view of the wide interest taken in the constitutional issues that were involved for the United Nations in both the Hungarian and Middle Eastern situations, and the discussions to which they have given rise, it may be useful to review the manner in which the General Assembly met these constitutional issues.

"There was, first, the matter of pronouncing judgment as to the facts and recommending remedial action. In the case of Hungary, just as in the Middle East crisis, there was a difference of opinion between a majority and a minority. In each case, the majority acted in a manner consistent with its interpretation of the applicability of the provisions of the Charter and of the powers granted to the General Assembly by the Charter. In both cases, it should be noted, the majorities were very large.

"There was, second, the matter of compliance by the member-States toward whom the Assembly's resolutions were directed. There were varying degrees of compliance at first in the withdrawal of troops from Egyptian territory and eventually full compliance as to withdrawal, though not with respect to some of the other recommendations of the Assembly. In the case of Hungary there was no compliance with the Assembly's political recommendations, a position based from the constitutional side on the minority's view of the applicability of the domestic jurisdiction clause of the Charter. In these circumstances, the question arose as to the means which the General Assembly might use to secure compliance.

"The Assembly may recommend, it may investigate, it may pronounce judgment, but it does not have the power to compel compliance with its decisions. Under the Charter, only the Security Council has the power to order the use of force, and then only to maintain or restore international peace and security. In the 'Uniting for Peace' resolution, the General Assembly adopted a plan under which it might make appropriate recommendations to member-States 'for collective measures, including in the case of a breach of the peace or act of aggression the use of armed force when necessary to maintain or restore international peace and security.' Thus, the General Assembly may recommend that member-States give aid, including economic sanctions and military aid, to the victim of an armed attack in the circumstances envisaged under Article 51 of the Charter. In such a case the power of decision on action implementing the recommendations would rest, as it constitutionally must under the Charter, with the respective member-Governments.

"At one stage, when there was delay in compliance with the General Assembly's resolutions calling for withdrawal of foreign troops from Egypt, the possibility of recommending sanctions arose, but no formal proposal to that effect was presented in the Assembly. Likewise, in the case of Hungary, when compliance was refused, no delegation formally proposed a recommendation by the General Assembly to member-States that they apply sanctions or use force to secure the withdrawal of foreign troops. The judgment of the majority of member-States as to the course to pursue in this latter case was, instead, reflected in the General Assembly's resolution of condemnation and its decision to order an investigation. Both of these measures were appropriate to the General Assembly's own constitutional authority.

The Role of the United Nations. "The events of the past year have, I believe, cast a clearer light upon the role of the U.N. in these times. The Charter does not endow the U.N. with any of the attributes of a super-State or of a body active outside the framework of decisions of member-Governments. The United Nations is, rather, an instrument for negotiation among, and to some extent for, Governments. It is also an instrument added to the time-honoured means of diplomacy for concerting action by Governments in support of the goals of the Charter. This is the role the Organization has played, sometimes successfully, sometimes with disappointing setbacks.

"From time to time complaints are heard about the limitations upon the Organization's power. It has even been suggested that, unless these limitations are corrected, the usefulness of the U.N. is so questionable that the main effort of the Governments in the search for peace should be concentrated in other directions. This view does less than justice to the contributions of the U.N. in its short life. Especially, it fails to take into account that the real limitations upon action by the Organization do not derive from the provisions of the Charter. They result from facts of international life in our age which are not likely to be by-passed by a different approach or surmounted by attempts at merely constitutional reform.

"To turn aside from the United Nations now because it cannot be transformed into a world authority enforcing the law upon nations would be to erase all the steady, though slow and painful, advances that have been made, and to close the door to hopes for the future of world society, toward which present efforts and experiences should be at least a modest stepping-stone.

"We should rather, recognize the United Nations for what it is—an admittedly imperfect but indispensable instrument of nations in working for a peaceful evolution toward a more just and secure world order. The dynamic forces at work in this stage of human history have made world organization necessary. The balance of these forces has also set the limits within which the power of world organization can develop at each step and beyond which progress, when the balance of forces so permits, will be possible only by processes of organic growth in the system of custom and law prevailing in the society of nations.

"These processes of adjustment take time. Systems of alliance, maintained side by side with the U.N. in recognition of the prevailing balance of forces, may serve a useful purpose during the period through which we are passing. However, most of us agree that such systems of alliance, like other traditional means of diplomacy and defence of national interests, are limited in their value as safeguards of the present and future security of our countries. Nations and groups of nations will never again be able to arrogate judgment unto themselves in international affairs in ways which once were a matter of course.

"The greatest need today is to blunt the edges of conflict among the nations, not to sharpen them. If properly used, the U.N. can serve diplomacy of reconciliation better than other instruments available to the member-States. All the varied interests and aspirations of the world meet in its precincts upon the common ground of the Charter. Conflicts may persist for long periods without an agreed solution, and groups of States may actively defend special and regional interests. Nevertheless, and in spite of temporary developments in the opposite direction under the influence of acute tension, the tendency in the U.N. is to wear away or break down differences, thus helping toward solutions which approach the common interest and application of the principles of the Charter.

"I believe that the criticism of the system of one vote for one nation, irrespective of size or strength, as constituting an obstacle to arriving at just and representative solutions, tends to exaggerate the problem. The General Assembly is not a Parliament of elected individual members; it is a diplomatic meeting in which the delegates of member-States represent governmental policies, and these policies are subject to all the influences that would prevail in international life in any case. Smaller nations are not in the habit of banding together against the larger nations, whose power to affect international security and well-being is so much greater than their own. Nor do I see justification for talk about the responsible and the irresponsible among the nations. Finally, the two-thirds rule applied to all major decisions in the General Assembly should serve as a reasonable assurance to those who may not fully share the views that have been here expressed . . .

"With its increase in membership, the U.N. more fully mirrors the realities of the present world situation than ever before . . . The United Nations reflects, but is in no sense a cause of, the renaissance of Asia. The awakening of Africa, and the other great changes that are under way in the balance of power and relationships of the peoples, are likewise part of the dynamics of history itself. As always, they bring with them many grave problems of adjustment. These all too easily may become the occasion for arousing passion, fear and hatred, and may lead in turn to violent upheavals and to the ultimate disaster of war in this atomic age.

"The functions of debate and vote are an essential part of the processes by which the U.N. can assist the Governments in avoiding these dangers and in guiding development in constructive and peaceful directions. But if it is accepted that the primary value of the U.N. is to serve as an instrument for negotiation among Governments, and for concerting action by Governments in support of the goals of the Charter, it is also necessary to use the legislative procedures of the U.N. consistently in ways which will promote these ends. In an organization of sovereign States, voting victories are likely to be illusory unless they are steps in the direction of winning lasting consent to a peaceful and just settlement of the questions at issue.

"Full weight should also be given to the fact that the processes of adjustment and negotiation which the institutions of the U.N. make available to the member-Governments embrace much more than the public proceedings of its Councils and Assembly. In the diplomacy of world organization the quiet work of preparing the ground, of accommodation of interest and viewpoint, of conciliation and mediation, all goes into the winning of consent to agreed solutions and common programmes. This forms a basis upon which the U.N. can become an increasingly influential and effective force to aid the Governments in pursuit of the goals of the Charter.

"There are, I believe, promising and practical opportunities for improving the practices and strengthening the institutions of the U.N. in this area of multilateral diplomacy. Especially in the past two years we have begun to explore these opportunities in a number of ways with generally positive results. I hope this evolution of emphasis and practice will be pursued and broadened in the future. This seems to be a more urgent task than to attempt formal constitutional changes, the consideration of which the Committee of the whole Assembly, charged with studying the problem of the time and place for a Charter review conference, unanimously wished to postpone until a later stage."

Disarmament. As the U.N. Disarmament Sub-committee was then in session in London, Dr. Hammarskjold made no comment on "the substance of the proposals presented," nor did he offer any opinion "on the degree of progress toward agreement that may have been made."

[As stated above, the Secretary-General's report was issued on Sept. 4. The disarmament talks in London, which had begun on March 18, ended in deadlock on Sept. 6, when they were adjourned indefinitely.]

Atomic Energy. Recapitulating the "important steps taken during the past year toward strengthening international co-operation in the use of atomic energy for peaceful purposes," Dr. Hammarskjöld pointed out (1) that the statute of the International Atomic Energy Agency had been unanimously approved in October 1956; (2) that the I.A.E.A. had come officially into existence in August 1957, when the requisite number of ratifications had been deposited; (3) that the Agency would hold its first session in Vienna in October; (4) that a draft agreement had been negotiated on the relationship between the Agency and the United Nations, which would be submitted for approval to the 12th Assembly session. "Thus the new institutional framework through which Governments can work together toward the goal of using atomic energy for man's benefit instead of his destruction is taking shape."

In addition, the second U.N. scientific conference on the peaceful uses of atomic energy would take place in 1958; the U.N. Advisory Committee on Atomic Energy had agreed upon an agenda "which promises to result in a world-wide pooling of further advances in knowledge, comparable in significance to what took place at the 1955 scientific conference"; and the General Assembly's Radiation Committee had made progress in its series of fact-finding surveys on the effects of radiation on health.

Dr. Hammarskjold commented: "All these steps in international co-operation have received inadequate public notice. Viewed in a longer perspective, they are opening doors to a future course of development of great and lasting significance If they were to be combined with a first constructive advance in the field of disarmament, to which they bear a close relationship, their impact on the trend of events might be of decisive importance."

Ghana's Admission to United Nations. Dr Hammarskjöld said that Ghana's entry into the United Nations had "a particular significance for the Organization" because "Ghana is not only a former dependent territory but includes a former U.N. Trust Territory, British Togoland, which had voted in a free plebiscite held under U.N. supervision to become part of the new State. Thus British Togoland became the first Trust Territory to attain the status of full self-government or independence, declared in the Charter as a primary objective of the International Trusteeship System. Both the emergence of the new State and the manner in which it has attained its independence are indicative of the possibilities inherent in those processes of peaceful change envisaged in the Charter . . . These events mark a new step in the development of the role of the Organization in Africa."

The International Court of Justice. "In my annual report of two years ago," said Dr. Hammarskjöld, "I expressed the hope that States which had not accepted the compulsory jurisdiction of the International Court of Justice might give favourable consideration to doing so in the near future. I can only express regret that in the intervening period the number of acceptances of compulsory jurisdiction has declined. Now only 32 States, out of the 84 parties to the Statute of the Court, have accepted that jurisdiction. This is contrary to the hopes of those who drafted the Charter at San Francisco. The Court was then rightly envisaged as having a major part to play in securing peace.

"Even more discouraging . . . is the fact that certain States have replaced or renewed their acceptances by declarations containing new and far-reaching reservations . . . I cannot fail to express my own concern over the possibility that the present trend, if not soon halted, may render the whole system of compulsory jurisdiction virtually illusory.

"The Court, like its predecessor under the League, has shown that it merits universal confidence. I am sure all those interested in the maintenance of peace through the establishment of a just international order, where strength alone is not the answer, would freely admit that the ultimate aim must lie in the universal acceptance of international law impartially administered by judicial tribunals. Even in the present state of international society there are many disputes which would be closer to settlement if the legal issues involved had been the subject of judicial determination.

"I can, therefore, only renew my appeal to States which have not accepted the compulsory jurisdiction of the Court to reconsider their position, and to those which have accepted to give earnest consideration to any reservations which may seriously weaken the jurisdiction of the Court. In any event, more frequent recourse to the Court, whether by way of compulsory jurisdiction or by specific agreement in each case, would be desirable. Every recourse to the Court will be a contribution to the establishment of the international society for which we are working."

World Economic and Social Development. Although U.N. studies and reports had shown "a picture of improving economic and social conditions throughout much of the world," and although the post-war period as a whole had been "marked by high levels of economic activity and considerable economic growth," these social and economic gains were "small when compared with needs." The Secretary-General commented in this connexion:

"The uneven rates of development in different parts of the world remain a source of concern. While production may be expanding and the level of living in general may be rising, the gains in *per capita* income are greatest in areas that are already economically advanced. The need for more rapid economic growth and social advancement in the less-developed regions of the world is a major challenge . . .

"Continued economic development in the world as a whole depends in large measure upon the possibilities of increasing the supply of energy. As rapid a development of atomic energy as possible is essential. Although atomic energy and possibly other non-conventional sources will come increasingly into use, the demands on conventional sources will go on expanding, and may be expected to continue to supply the greater part of the world's energy needs for some time to come. The Economic and Social Council [has] underscored the importance of international collaboration in the survey and development of energy resources. This is another matter to which I feel the U.N. should devote increasing attention . . .

"The need to accelerate both economic and social development of the less-developed countries is the more evident in view of the rapid growth of their population, which in many cases is now proceeding at an unprecedented pace as a result of improvements in health conditions and reduction of death-rates. Rates of growth that would double the population in 30 years or less are now not uncommon in the economically less advanced regions of the world; the implications of growth at such a pace cannot be ignored . . ."

Proposal for International Administrative Service. The Secretary-General said that he had submitted to the U.N. Economic and Social Council, at the latter's request, "a proposal for an experimental programme whereby the less-developed countries would be provided, at their request, with experienced administrators to work in their Civil Service and provide managerial and executive assistance where most needed throughout the public services, particularly those concerned with economic and social development." A memorandum would be transmitted to member-Governments for comment, and a further report on this matter would be submitted during 1958 in the light of the views expressed.

Human Rights. "Hitherto," said Dr. Hammarskjöld, "the human rights programme has been concerned primarily with the establishment of general standards and broad definitions, such as those proclaimed in the Universal Declaration of Human Rights . . . In the course of the year the U.N. has directed its attention toward the application of standards, toward the making of inquiries into the principles and practices in respect of specific rights, and toward the development of the means for nations and peoples to enter into a free exchange of experience in the protection of human rights. This 'action programme' calls upon Governments to submit reports on human rights every three years; directs the Commission on Human Rights to make intensive studies of specific rights (the first subject being 'freedom from arbitrary arrest, detention and exile'); and authorizes the Secretary-General to organize seminars on human rights, preferably on a regional basis.

"The positive objective of this programme, which is still in an experimental stage, is to enable nations and peoples to learn from one another of the results obtained and the difficulties encountered in the promotion of human rights, and to benefit thereby."

The Refugee Problem. The Secretary-General pointed out that the influx of over 170,000 Hungarian refugees into Austria, and some 20,000 into Yugoslavia, had made new demands both on the countries receiving refugees and on the services of the U.N. High Commissioner for Refugees. Although there had been a "widespread and generous" response to the U.N. appeals for aid to these refugees, there still remained "the task of meeting the long-term needs of Hungarian refugees awaiting emigration, particularly young people, and assisting the integration of those who wish to remain in the country of asylum. Further, the generous response to the needs of the Hungarian refugees may, perhaps, have tended to obscure the continuing responsibility of the international community for those other refugees within the mandate of the High Commissioner, many of whom have now been refugees for 11 years."

After pointing out that the General Assembly would have to decide whether the Office of the High Commissioner for Refugees should be continued beyond Dec. 31, 1958, and expressing the hope that the Office would be continued beyond that date, Dr. Hammarskjöld added: "An urgent effort is required to achieve permanent solutions for the refugees, particularly for those remaining in camps. A comparatively small number of men, women and children is now involved. More could be done for them if countries were to extend the practice of admitting families as units, even when they include admittedly 'difficult' cases. Surely it should be possible to provide the comparatively small sums involved, and to take those other measures necessary to bring us beyond the stage of temporary expedients and to lasting solutions."

The Secretary-General's report concluded with a tribute to the humanitarian work of the U.N. Children's Fund, and an appeal to member-Governments to give increasing support to UNICEF in its efforts on behalf of the world's children. (U.N. Information Centre, London) **(Prev. rep. A. RHODESIA AND NYASALAND FEDERATION. — Federation Citizenship Act.

A Bill establishing Federal citizenship and regulating analogous matters received a third and final reading in the Federal Assembly on March 14, 1957. The main provisions of the Bill (entitled The Citizenship of Rhodesia and Nyasaland and British Nationality Bill, 1957) were as follows:

(1) All Federal citizens would also become British subjects automatically.

(2) The following categories of persons would qualify for Federal citizenship automatically:

(*a*) All persons born in Southern Rhodesia who had already qualified for "British subject" status under Southern Rhodesian law;

(*b*) All persons born in Northern Rhodesia and Nyasaland who could claim "British subject" status by descent;

(*c*) All persons, whether or not they were born within the Federation, who were Southern Rhodesian citizens at the time of the enactment of the Bill;

(*d*) British subjects in any part of the Federation whose names were on a Federal voters' roll;

(*e*) Persons registered or naturalized in Northern Rhodesia or Nyasaland as citizens of the United Kingdom and Colonies.

(3) Newcomers to the Federation who were British subjects would be eligible for Federal citizenship after a qualifying period of two years.

(4) Alien immigrants would be eligible for naturalization (and hence Federal citizenship) after a qualifying period of five years.

(5) Africans in Northern Rhodesia and Nyasaland (at present British-protected persons for the most part) would have the right to apply for Federal citizenship and would receive it on subscribing to an oath of allegiance to the Queen.

(6) In future, with limited exceptions, persons naturalized or registered in Northern Rhodesia and Nyasaland would no longer become citizens of the U.K. and Colonies but Federal citizens.

(7) Those who became Federal citizens by process of application could be deprived of their citizenship if they were absent from the Federation for more than three years and for various other reasons. Citizens by birth or descent, however, could not be deprived of citizenship.

In a statement issued on Jan. 11, simultaneously with the publication of the Bill, the Federal Minister for Law (Mr. J. M. Greenfield) explained that the drafting of the Bill had presented unique difficulties in view of the fact that the Federation consisted of a self-governing colony (Southern Rhodesia) whose inhabitants were British subjects, and two protectorates (Northern Rhodesia and Nyasaland) whose inhabitants, unless they had inherited "British subject" status by descent, were British-protected persons.

The statement continued: "It is usual, of course, for a [Commonwealth] country to confer citizenship and the related status of British subject upon all persons who have associations with it by way of birth, descent, residence or other close connexion. In ordinary circumstances, the proposed Federal law would have done likewise, but the Federal Government was faced with the necessity of respecting the British-protected status of the indigenous inhabitants of Northern Rhodesia and Nyasaland and the close attachment which many of them have for that status.

When introducing the Bill in the Federal Assembly (Feb. 28), Mr. Greenfield stated that it had been drawn up because the Government considered it necessary to clarify completely the position of Federation citizens travelling abroad. In addition, all the more important countries in the Commonwealth had their own citizenship laws and it was thought desirable that the Federation should come into line with them.

(Federal Information Department, Salisbury)

B. LITERATURE. — Discovery of Unknown Comedy by Menander.

Professor Victor Martin, of the University of Geneva, announced to the Paris *Académie des Inscriptions* on Sept. 13 that he had discovered the only known complete text of a comedy by the Greek dramatist Menander (*c.* 340-290 B.C.), which he hoped to publish early in 1958. The manuscript, which is written on papyrus and is attributed by Professor Martin to the third century A.D., was found in the library of M. Bodmer, a Geneva collector of books and manuscripts, who had obtained it from a dealer. The comedy is entitled *Dyskolos* ("The Bad-tempered Man"), and according to a note on the manuscript was first performed in Athens in 316 B.C.

As the leading exponent of the Greek "new comedy," which dealt with everyday life in a satirical spirit, Menander exercised a strong indirect influence on the development of European drama through the imitations of his work contained in the comedies of the Latin dramatists Plautus and Terence. No complete play by him was previously known to exist, however, although large sections of two of his other comedies, *The Arbitrators* and *The Rape of the Ringlets*, have been recovered in recent years.—(Manchester Guardian)

A. UNITED KINGDOM. — Coal Industry. - National Coal Board Report for 1956. - Production Statistics. - Price Increases. - N.C.B. Appointments. - The Coal Mining (Subsidence) Act.

The 11th annual report of the National Coal Board, covering the year ended Dec. 31, 1956, was published on June 5. It showed that after meeting taxation and interest the Board had made a surplus of £12,800,000, compared with a deficit of £19,600,000 in 1955. This surplus—the highest since nationalization—reduced the Board's accumulated deficit to £23,800,000.

The report stated that output in 1956 was slightly higher than in 1955 and 17 per cent higher than in 1946, there being "every reason to expect" that the improvement would be maintained in 1957. Other favourable features were (*a*) a rise in manpower and in productivity; (*b*) a reduction in the amount of coal lost through disputes; (*c*) a reduction in imports.

The following information was given in the report:

Output. Saleable output of coal totalled 222,000,000 tons, compared with 221,600,000 tons in 1955. Output from N.C.B. collieries (207,400,000 tons) was about 500,000 tons less than in 1955, but opencast production rose by about 750,000 tons and production from licensed mines by 243,000 tons. Output from voluntary Saturday working declined by 591,000 tons.

Costs, Prices and Profits. Cost of production of mined coal totalled 74s. 5d. a ton, against 67s. 3d. a ton in 1955. Proceeds from the sale of coal averaged 77s. a ton (68s. in 1955), resulting in a profit on colliery operations (before charging interest) of 2s. 7d. a ton, or 1s. 10d. a ton more than in 1955. Profit on opencast mining totalled £8,600,000.

Productivity. This improved during the year, only 812 shifts being worked for every 1,000 tons of saleable output, compared with 816 shifts per 1,000 tons in 1955. Saleable output per manshift improved slightly by 0.01 per cent to 1,232 tons.

[Mr. James Bowman, chairman of the N.C.B., stated in this connexion that output in metric tons per manshift was 1.25 in Britain, 1.19 in Western Germany, 1.07 in France, 1.15 in the Saar, 0.84 in Belgium, and 0.96 in the Netherlands.]

Manpower. This rose towards the end of the year, the slackening demand for labour in other industries having arrested the decline in coalmining manpower of the two previous years. Although there were 3,503 more miners at Dec. 31, 1956 than at Dec. 31, 1955, the average throughout the year was only 703,400, compared with 704,100 in 1955.

Absenteeism. Both voluntary and involuntary absenteeism increased, total absenteeism among face-workers averaging 15.18 per cent in 1956, against 14.70 per cent in 1955.

Accidents. There were 318 fatal and 1,731 reportable non-fatal accidents during 1956, both figures being the lowest on record.

Strikes. Unofficial stoppages and restrictions of work in 1956 numbered 3,771 (the highest total since nationalization), compared with 3,581 in 1955. Coal lost through stoppages and restrictions in 1956 totalled 2,146,500 tons.

Mechanization. The report stated that 1956 saw the biggest advances yet made in coal mechanization, all divisions having reported increases in output by power-loading. Of the total output raised and weighed, 36,400,000 tons (15.5 per cent) were obtained from power-loaded faces, compared with only 25,100,000 tons (10.8 per cent) in 1955. An average of only 176 manshifts per 1,000 tons of output were required on power-loaded faces in 1956, compared with 280 manshifts per 1,000 tons on other faces.

Shortage of Large Coal. Tonnage of "large coal" fell in 1956 by 3,500,000 tons, the report explaining that although power-loading machines produced more coal, a greater proportion of this was small coal than with hand-loading. Research was in progress to produce power-loading machines which would cause less breakage of coal; some manufacturers were accepting smaller sizes of coal; and the railways were making increased use of briquettes. These measures should relieve the pressure of demand for large coal by 2,500,000 tons a year, which would otherwise have to be imported.

Imports and Exports. Coal imports in 1956 (mainly of "large coal") totalled 5,250,000 tons, the average loss being 65s. 7d. a ton. In this connexion the report stated that coal was produced and sold more cheaply in Britain than in any other European country, and was also cheaper than U.S. coal delivered at British ports. The N.C.B. aimed at ceasing coal imports as soon as possible.

Coal exports during the year amounted to about 8,000,000 tons.

Mr. Bowman, commenting on the Board's improved position, nevertheless gave a warning that a further rise in coal prices would be necessary during the summer in order to meet (*a*) the increased cost of steel, oil and greases; (*b*) the cost to the industry of the Mines and Quarries Act (£10,000,000) and the Coal Mining Subsidence Act (£5,000,000—see below); and (*c*) higher wages. The "substantial figures" involved were more than the increase in the industry's efficiency could absorb, and the Board had already concluded negotiations with the Government for a price increase.

Production Figures.

The following table shows the average weekly rates of coal production and consumption, and of manpower, output and absenteeism, in the second quarter of 1957:

	Saleable Mined Coal Produced Tons	Plus Opencast Tons	Total Production Tons	Inland Consumption Tons	Exports and Bunkers† Tons
April ..	4,066,475	246,100	4,312,575	4,210,500	178,500
May* ..	4,449,560	297,860	4,747,420	3,999,800	175,800
June ..	3,878,550	282,925	4,161,475	3,734,250	164,750
2nd Quarter	4,131,528	275,628	4,407,156	3,981,517	173,017

	Wage-earners on colliery books Total	No. of shifts worked per wage-earner at coal-face	Output per manshift at coal-face	Output per manshift overall	Percentage of absenteeism
April	711,125	289,375	4.6	3.386	1.236	13.01
May*	712,360	285,920	4.97	3.418	1.258	11.64
June	710,850	284,575	4.50	3.323	1.207	13.68
2nd Qtr.	711,445	286,623	4.69	3.376	1.233	12.77

*Average of five weeks.
†Including fishing vessels but excluding coastwise bunkers.

Recent developments in connexion with the coalmining industry are summarized below:

N.C.B. Quarterly Accounts. The N.C.B. accounts for the first quarter of 1957, published on Aug. 2, showed a surplus of £8,799,337 compared with a surplus of £6,090,000 in the first quarter of 1956. Total profits amounted to £15,497,337 (collieries £11,591,337, opencast workings £2,055,000), of which £6,180,000 was absorbed by interest charges. Saleable output totalled 56,360,170 tons, compared with 54,661,215 tons in the first quarter of 1956.

Price Increases. The price increases foretold by Mr. Bowman (see above) came into operation on July 1, when coal prices were raised by an average of 6s. 6d. a ton and the price of domestic coke by 8s. 1d. to 13s. 1d. a ton according to grade.

Prices of house coal were raised by an average of from 6s. 8d. to 8s 4d. a ton according to grade. The N.C.B. estimated that the increase would fall on various industries as follows: gas, 7s. 1d. a ton; N.C.B. coking plants, 6s. 10d.; other coking plants, 6s. 8d.; power stations, 5s. 1d.; railways, 7s. 7d.; iron and steel, 6s. 8d.; bunkers (coastwise), 7s. 5d.; bunkers (trawlers), 7s. 7d.; all other inland uses, 6s. 3d.; Northern Ireland, 6s. 2d.

A spokesman for the British Transport Commission estimated that the increases would add about £5,000,000 a year (8.5 per cent) to the Commission's coal bill. A spokesman for the Central Electricity Authority put the probable cost of the increases to the Authority at about £10,500,000.

Wage Increases and Saturday Working. The executive of the National Union of Mineworkers announced on May 30 [see 15530 A] that the wage increases negotiated with the N.C.B. on May 2 had been approved by a two-to-one majority by a miners' ballot held during the month. The men had also agreed (by 509,000 votes to 217,000) to continue Saturday working for another year.

N.C.B. Appointments. Mr. J. O. Blair-Cunyngham, N.C.B. Director of Staff, was appointed a full-time member of the National Coal Board by Lord Mills (Minister of Power) on Aug. 6. It was announced on Aug. 15 that Mr. C. G. Simpson, Deputy Director-General of Staff, would succeed Mr. Blair-Cunyngham as Director-General, whilst Mr. J. V. Wood, staff director, Northern (Northumberland and Cumberland) Division, would become Director-General of Industrial Relations.

The Coal Mining (Subsidence) Act.

The House of Commons gave an unopposed second reading on Jan. 31 to the Coal Mining (Subsidence) Bill, which made the National Coal Board responsible for remedying damage caused by subsidence resulting from coalmining operations to land, buildings, roads, railways, aircraft runways, sewers, drains, and other service lines and pipes.

The Bill (1) required the N.C.B., in the event of damage, to undertake any work needed to make the property concerned "reasonably fit for its original use"; if, however, the cost of making good the damage should exceed the depreciation in the value of the property, the Board might choose instead to contribute towards the costs incurred by some other person in carrying out the work; (2) empowered the Board to carry out preventive works, or (on undertaking to pay the cost) to require the owner of the property to do so; if he refused, the N.C.B. would be relieved of its responsibility to repair any subsequent damage. The Bill also required the N.C.B., within areas to be designated by the Ministers of Power, or of Agriculture, Fisheries and Food, to carry out or pay for measures to remedy, mitigate, or prevent deterioration of land drainage.

Mr. Maudling (Paymaster-General) explained that the Bill extended to shops, business premises, industrial buildings, farms, and local authorities' premises the principle that compensation should be paid for subsidence damage established by the Coal Mining (Subsidence) Act of 1950 [see 10398 A] in the case of dwelling-houses. It did not cover indirect damage, as the Government considered that this would be impracticable. The whole cost of compensation would be borne by the National Coal Board and was expected to amount to about £5,000,000 a year, equivalent to about 6d. on each ton of coal mined.

In the Report stage (July 4) Government amendments were agreed to (1) providing for compensation (on the same basis as for negligence) to be paid for death or serious injury attributable to negligence; (2) making the N.C.B. liable for certain kinds of damage occurring before the enactment of the Bill.

The Bill received the Royal Assent on July 31, 1957.

(Ministry of Power - Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. 1955 Report, 14882 A; Production Figures, Wage Increases, 15530 A; Price Increases, 14930 C; Coal Mining (Subsidence) Act, 1950, 10898 A.)**

A. SCOTLAND. — Edinburgh Development Plan.

Following its final approval by the Secretary of State for Scotland, a comprehensive 20-year development plan for Edinburgh was published by the City Corporation on Sept. 4. The plan was based on the assumption that the city's population would increase by five per cent by 1977 (i.e. to 500,000), and provided for development in two phases—1957-1962, and 1963-1977. Its main features were as follows:

(*a*) To accommodate the expected increase in population and to eliminate slums and overcrowding, 43,400 new houses would be built and a further 12,000 made available by the modernization of existing sub-standard properties.

(*b*) A number of new roads would be built, the most important being: (i) a relief road for the Bridges area (1 mile), part of which would run underground by a tunnel under St. Andrew's House and Calton Hill; (ii) an eastern approach road (3.6 miles) which would by-pass Musselburgh, skirt Holyrood Park, and end at the St. Leonard's roundabout (3.6 miles); (iii) a link road from St. Leonard's to Tolcross, part of which would consist of a tunnel; (iv) a road replacing the disused Union Canal (4 miles). In addition, an outer circular road would be formed by linking up existing roads. Land would also be allocated for a new western approach road (2 miles) and a new city by-pass road (8 miles), but the actual construction of these roads would not begin until some time after 1977.

(*c*) 24 new schools (seven secondary and 17 primary) would be built, while three of the city's 53 private schools (Mary Erskine School for Girls, George Watson's Ladies' College, and Edinburgh Academy primary department) would be transferred to new sites. In addition, sites were allocated for 42 new nursery schools, but construction of these would probably not begin until after 1977.

(*d*) Three new bus stations would be built, as well as a combined bus and helicopter station at the East Goods Yard, Leith Walk.

(*e*) A green belt would be established to "preserve and enhance the landscape setting of the capital."

(*f*) 482.6 acres of undeveloped land were allocated for industrial use, of which, however, 109.5 acres would probably not be developed until after 1977. In addition, 128 acres of already developed land would be redeveloped for industrial purposes. Two other important allocations were 290 acres for commercial use and 176 for general business use.

(*g*) 143 acres were set aside as cultural, university, and public building areas and would be used for such purposes as libraries, museums, concert halls, etc.

(*h*) Halls of residence for the University of Edinburgh would be built on a site at Salisbury Green.

A Corporation spokesman stated that the plan was not directly related to the earlier (and much wider-ranging) Abercrombie Plan of 1949, although the latter had produced a basis for the new proposals.—(The Scotsman, Edinburgh) **(Prev. rep. Abercrombie Plan, 10175 A.)**

B. CEYLON. — Inquiry into University of Ceylon.

The Ceylonese Minister of Education (Mr. Dahanayake) announced on Aug. 22 that he had invited Professor Joseph Needham, F.R.S., to head a three-man commission to inquire into the affairs of the University of Ceylon. If Professor Needham accepted the invitation he would be assisted by Mr. Chintaman Deshmukh, chairman of the Indian University Grants Committee and formerly Minister of Finance. The third member of the commission would be a Ceylonese. The commission would examine all aspects of university education in Ceylon and report on questions of external degrees, religious education, and higher education.

The University of Ceylon was established in 1942 under the direction of Sir Ivor Jennings (now Master of Trinity Hall, Cambridge), its first Principal. In recent months it had been strongly criticized, both inside and outside Parliament, on the grounds that it was doing little or no research and that its policy was not meeting the nation's requirements.—(Ceylon Government Information Department - Manchester Guardian) **(Prev. rep. 5252 B.)**

C. GUATEMALA. — Lifting of State of Siege.

The state of siege imposed after the assassination of President Castillo Armas was lifted on Aug. 22, having been in force for nearly a month.—(New York Times) **(15693 D.)**

D. UNITED STATES. — Record Balloon Ascent.

A successful experiment to test man's chances of survival on the edge of outer space was made on Aug. 19-20 by Major David G. Simons (34), a doctor in the U.S. Force, who ascended in a pressurized balloon to a height of 19 miles and remained suspended at the limit of the earth's atmosphere for 24 hours.

Attached to the balloon (a helium-filled sphere 200 ft. in diameter, made of plastic) was an aluminium gondola, pressurized and air-conditioned to enable its occupant to withstand conditions in the stratosphere. The gondola, 8 ft. high and only about 3 ft. wide, contained scientific instruments to enable Major Simons to make experiments into cosmic rays and other phenomena; it also contained a tape-recorder on which he was able to record his physical and psychological reactions throughout the experiment. The gondola was given an artificial atmosphere of oxygen and helium, and was specially insulated to protect its occupant from the intense radiation and extreme temperatures at the limits of the earth's atmosphere. Major Simons was sealed into the gondola ten hours before the ascent to accustom him to the oxygen-helium atmosphere he would have to breathe, and to give sufficient time to remove the nitrogen from his system. [If the ascent had been too rapid and Major Simons had had nitrogen in his system, the nitrogen would have formed bubbles in his blood, causing painful and possibly fatal "bends."]

The balloon was released on Aug. 19 from the bottom of an open 400-ft.-deep iron mine near Crosby, Minnesota, and shot into the air at 1,000 feet a minute from a launching truck at the bottom of the mine. After drifting 30 miles south-east and then westward, it ascended to 102,000 feet (19 miles) and remained for 24 hours at that altitude, where it was above 99 per cent of the earth's atmosphere. Throughout this period Major Simons was in radio contact with a monitoring van, which recorded his impressions and the results of scientific experiments carried out by him. The balloon descended on the following day (Aug. 20) in a field in South Dakota, after being aloft for 32 hours.

The gondola had tiny portholes through which Major Simons was able to make his observations and record his impressions of the upper atmosphere and outer space. He was able to descend by letting out some of the balloon's 3,000,000 cubic feet of helium from an electrically-controlled valve in the top of the sphere. Before descending from 19 miles up, he told ground control that he was "feeling fine, completely relaxed and enjoying the view."

After descending Major Simons told press correspondents that he had had "an indescribable ringside view of the heavens," had suffered no ill-effects, and had been too busy making cosmic ray tests and other experiments "to get lonesome" on the edge of outer space. Describing some of his impressions and observations, he said that the stars did not twinkle but shone steadily when seen from the limit of the atmosphere; that in daylight the sky appeared black overhead and violet-hued to the north; and that the sunrise was a "magnificent and awesome" sight. He added that he had clearly seen the earth's curvature from a height of 19 miles.

The officer in charge of the experiment (Colonel J. Stapp) said that Major Simon's ascent had proved that human beings could live outside the earth's atmosphere "by taking their own atmosphere with them." The "experiment in livability" at such altitudes had been so successful that it would have important applications in space travel.

Major Simons is in charge of the aero-medical laboratory at the Holloman Air Base, Alamogordo, New Mexico. His experiment was the first in a project ("Project Man High") designed to pave the way for space travel.—(New York Times)

E. GIBRALTAR. — New Governor.

It was announced on Sept. 18 that Lieut.-General Sir Charles Keightley had been appointed Governor of Gibraltar in succession to Lieut.-General Sir Harold Redman, and would take up his new appointment when General Redman's term of office expired towards the middle of 1958. General Keightley (56), who commanded the Anglo-French forces in the Suez operations last November, had been C.-in-C. Middle East Land Forces from September 1953 to August 1956. During the war he commanded the 30th Armoured Brigade, the 6th Armoured Division, the 78th Infantry Division, and the Fifth Army Corps, and after 1945 held the successive posts of Director of Military Training at the War Office, Military Secretary to the Secretary of State for War (then Mr. Shinwell), C.-in-C. British Army of the Rhine, and C.-in-C. Far East Land Forces before his appointment to the Middle East Command.—(Times - Daily Telegraph) **(Prev. rep. 14050 D.)**

F. NORTHERN IRELAND. — Lifting of Curfew.

The curfew imposed on Aug. 12 in Newry and adjoining districts of Counties Down and Armagh, following the I.R.A. outrages of the previous day, was lifted on Sept. 9 by the N.I. Minister of the Interior (Mr. Topping) after consultations with the police. Mr. Topping pointed out that there had been no further incidents during the four weeks in which the curfew had been in force.—(Belfast Telegraph) **(Prev. rep. 15713 A.)**

SEPTEMBER 21—28, 1957

A. NORWAY. — Death of King Haakon VII. - Accession of King Olav V.

King Haakon VII of Norway, who had been in failing health for several weeks, died in Oslo on Sept. 21, aged 85 years. He was the first sovereign of an independent Norway for more than five centuries, and at the time of his death was the oldest reigning monarch in Europe.

A Danish prince by birth, he was born at Charlottenlund (Denmark) on Aug. 3, 1872, the second son of Crown Prince Frederik of Denmark (later King Frederik VIII) and Princess Louise of Sweden and Norway. Christened as Christian Frederik Carl George Waldemar Axel, and known as Prince Carl, he entered the Royal Danish Navy at the age of 14 and pursued the normal career of a naval officer, rising from midshipman to captain. In 1896, when 23 years of age, he married his cousin Princess Maud, the third daughter and youngest child of the then Prince of Wales (later King Edward VII of Great Britain) and of Princess (later Queen) Alexandra. The marriage was solemnized at Buckingham Palace.

On June 7, 1905, the Norwegian Storting unanimously voted to dissolve the union with Sweden, which had lasted since 1814. The decision was ratified by a plebiscite of the Norwegian people held in August 1905, Norway thereby becoming a fully independent nation after more than 500 years. [Since 1397 Norway had been under the sovereignty of, or in association with, Denmark or Sweden.] The throne of independent Norway was offered by the Storting to Prince Carl, who accepted it on condition that he was chosen by a free vote of the people. Although there was considerable republican sentiment in Norway at the time, a national plebiscite held in November 1905 showed a four-to-one majority in his favour. Prince Carl arrived in Norway a few days later, chose the name of Haakon (borne by six Norwegian kings of the Viking Age), and declared his allegiance to the Norwegian Constitution, taking as his motto "All for Norway." In the following June King Haakon and Queen Maud were crowned in Trondheim Cathedral.

Throughout his long reign of 52 years, King Haakon identified himself fully with the life and independence of his adopted country. His strong attachment to democratic government, combined with his personal dignity, kindliness, and simplicity of life, made him greatly respected and beloved by the entire Norwegian people. As a "people's King" he dispensed with much of the pomp and ceremony traditionally attendant upon monarchies, and was personally known to many of his subjects.

Norway, neutral in the First World War, was invaded by Nazi Germany without warning on April 9, 1940. King Haakon immediately rejected Hitler's demand that Norway should surrender and that he (the King) should appoint the traitor Vidkun Quisling as Prime Minister, and issued a stirring call for resistance to the invasion. To avoid capture by the Germans, King Haakon, the Royal family and the Government left Oslo on April 10 and retreated northwards with the Army across the snow-covered mountains—a retreat during which the Luftwaffe systematically bombed the towns at which the King took up his headquarters. The King, Crown Prince Olav, and the Government eventually reached the West Coast port of Molde, which was in flames from German bombing, and subsequently sailed in a British cruiser for Tromsö, in the far north of Norway. For a month thereafter King Haakon and the Norwegian Government had their headquarters at Tromsö, a period during which Narvik was recaptured by the Allied forces and the Norwegian Army put up gallant resistance to the German invasion in face of overwhelming odds. On May 30, however, after the German breakthrough in France and the Low Countries, the Allies decided to evacuate Norway, and on June 7, 1940—35 years to the day after Norway had gained her independence—King Haakon, accompanied by Crown Prince Olav and the Norwegian Government, sailed for Britain in the British cruiser *Devonshire*.

During his five years' exile in Britain, King Haakon was the symbol and rallying-point of the Norwegian resistance to Germany both inside and outside Norway. He devoted his entire efforts to the organization and welfare of the Free Norwegian forces and the 25,000 Norwegian merchant seamen serving with the Allies; insisted on receiving personally every one of the many Norwegians who succeeded in escaping from their occupied homeland to Britain; and made frequent broadcasts to the people of Norway. Throughout the war years the King and the Government-in-exile were in close touch with the Home Front (the Resistance movement) in occupied Norway, whilst the Home Front, in its turn, took no important decisions without consulting the King and Government in London.

King Haakon made a triumphant return to Norway on June 7, 1945, amidst nation-wide enthusiasm and rejoicings. [It was commented in the Press that June 7 had been a fateful date throughout the King's life, being the date on which the Union of Sweden and Norway was dissolved (1905), resulting in his accession to the Norwegian throne; on which he was driven from his country by the German occupation (1940); and on which he returned in triumph to Norway in 1945.] Owing to the close wartime collaboration between the Government-in-exile and the Home Front, each of which had been aware throughout of the other's policies, the King's return was not complicated by the post-war differences between "exile" and "home front" governments which had such disturbing effects in some other countries formerly under German occupation. Normal general elections took place in Norway within a few months' of the King's return.

King Haakon, who was a great-uncle of Queen Elizabeth II, maintained close contacts with Britain throughout his life, and was a frequent visitor to the United Kingdom both before and after the war. In 1947 he attended the wedding of Princess Elizabeth (as she then was) and the Duke of Edinburgh; in 1948 he was one of the sponsors at the christening of their son, Prince Charles; in 1951 he paid a State visit to London (see 11615 A), during which he visited the Festival of Britain; and in the following year he was present at the funeral of his nephew, King George VI. During 1953 he paid State visits to Sweden and the Netherlands, and in 1955 welcomed Queen Elizabeth II and the Duke of Edinburgh during their State visit to Norway (see 14300 B).

A few days after the State visit of Queen Elizabeth II and the Duke of Edinburgh, King Haakon sustained a fractured thigh after a fall in his bathroom and had to enter hospital for the first time in his life. Although he subsequently recovered, his convalescence was slow and prolonged, and Crown Prince Olav had acted as Regent since his father's accident.

King Haakon was a widower, Queen Maud having died in 1938 (see 3330 F). Their only child, Prince Alexander Edward Christian Frederik, was born in 1903 and was given the Norwegian name of Olav when his father became King of Norway two years later.

Crown Prince Olav (54), who ascended the throne as King Olav V, took a written oath of allegiance to the Constitution two hours after his father's death, in the presence of the Norwegian Cabinet. At the same time he issued a proclamation in which he said he would retain his father's motto, "All for Norway." The oath of allegiance to the Constitution confirmed King Olav as the new sovereign, the coronation ceremony having been abolished by the Storting in 1908, three years after the accession of King Haakon.

King Olav was born in England (at Appleton House, near Sandringham) on July 2, 1903, and read economics and political science at Balliol College, Oxford. A well-known sportsman in his youth, he was an Oxford fencing blue and one of Norway's best ski-jumpers. In the 1928 Olympic Games he won Norway's first gold medal as helmsman of his yacht *Norma*. He married Princess Martha of Sweden in 1929, the three children of the marriage being Prince Harald (20), who succeeded his father as Crown Prince, Princess Ragnhild (27), and Princess Astrid (25). King Olav is a widower, the Crown Princess Martha having died in 1954 (see 13607 B).

National mourning for King Haakon was proclaimed throughout Norway, the leaders of the political parties cancelling their election campaigns until after the late King's funeral on Oct. 1. [General elections are to take place on Oct. 7.] Messages of sympathy on the death of King Haakon, together with high tributes to the late sovereign, were sent to King Olav by Queen Elizabeth II, the Kings of Denmark and Sweden, the President of Finland, President Eisenhower, and many other Heads of State.—(Norwegian Embassy Press Department, London - Aftenposten, Oslo - Times)

(Prev. rep. King Haakon, 14566 C; 12378 A.)

B. NIGERIA. — Inquiry Commission into Minorities.

The members of the Commission appointed by the Colonial Secretary (Mr. Lennox-Boyd) to examine the problem of minorities in Nigeria were announced by the Colonial Office on Sept. 25. They were Sir Henry Willink, Q.C. (chairman), Master of Magdalene College, Cambridge, and a former Minister of Health (1943-45); Sir Gordon Hadow, deputy Governor of the Gold Coast from 1954 until the territory became independent under the name of Ghana; Mr. Philip Mason, Director of Studies in Race Relations at Chatham House (the Royal Institute of International Affairs); and Mr. J. B. Shearer, manager for Greece of the Ionian Bank.

The Commission's terms of reference were as follows, in accordance with the conclusions reached by the Nigerian Constitutional Conference in London:

"(1) To ascertain the facts about the fears of minorities in any part of Nigeria and to propose means of allaying those fears, whether well or ill founded.

(2) To advise what safeguards should be included for this purpose in the Constitution of Nigeria.

(3) If, but only if, no other solution seems to the Commission to meet the case, than as a last resort to make detailed recommendations for the creation of one or more new States and in that case

(*a*) Specify the precise area to be included;

(*b*) Recommend the governmental and administrative structure most appropriate for it;

(*c*) Assess whether any new State recommended would be viable from an economic and administrative point of view, and what the effect of its creation would be on the Region or Regions from which it would be created, and on the Federation."

The commission will visit Nigeria and submit its report to the Colonial Secretary, who will then consult with the Nigerian Federal and Regional Governments.—(Times - Daily Telegraph) **(Prev. rep. 15747 A.)**

A. UNITED KINGDOM. — Bank Rate increased to Seven Per Cent. - Restriction of Public Investment Programmes. - Intensification of "Credit Squeeze." - Government's Determination to maintain Internal and External Value of the Pound. - Forthcoming Drawings on Export-Import Bank Credit. - Balance of Payments, 1956-57. - Rejection of Opposition Demand for Recall of Parliament. - Gold and Dollar Reserves in August.

In a new drive to halt inflation and maintain the value of the pound abroad, the Government took the following measures on Sept. 19:

(1) Increased the Bank Rate from 5 per cent to 7 per cent—its highest level since 1920-21;

(2) Announced a brake on investment spending by Government departments, local authorities, and nationalized industries aimed at saving £300,000,000-£350,000,000 over the next two years as a whole and at holding expenditure to the present year's level of £1,500,000,000;

(3) Asked the banks to hold "private sector" loans to the average of the last 12 months—about £2,000,000,000. [At Aug. 31, total bank advances were £2,054,000,000.];

(4) Instructed the Capital Issues Committee to take a "more restrictive and critical attitude towards applications to borrow and in particular towards applications for large amounts."

The new measures were announced in a statement by the Chancellor of the Exchequer, as follows:

"The Government are determined to maintain the internal and external value of the pound. For this purpose it will be necessary to intensify and strengthen the measures which they have already taken.

"There can be no remedy for inflation and the steadily rising prices which go with it which does not include, and indeed is not founded upon, a control of the money supply. So long as it is generally believed that the Government are prepared to see the necessary finance produced to match the upward spiral of costs, inflation will continue and prices will go up. The value of our money cannot be sustained unless we as a nation pursue the right policies at home. It will not be possible to check the rising cost of living and to maintain the worth of sterling if we try to spend more or live better than our resources allow or our production justifies. Steps have been and are being taken to limit current Civil and Defence expenditure. But a limitation of the Government's current expenditure is not enough.

"I said in the House of Commons on July 25 that 'it may well be necessary to rephase some programmes' in the field of public investment and that the Government would 'not hesitate to make the necessary adjustments.' The Government have accordingly decided upon certain further steps in relation both to public and private spending. Their object is to ensure that the supply of money and the consequent pressure of demand do not exceed the manpower and resources which are in fact available.

"In the first place, the Government propose to hold down the total of investment expenditure in the public sector, which was planned to rise substantially during the next two years, within the level attained this year. This includes the sum of investment by Government departments, by local authorities and by nationalized industries.

"Restrictions are also necessary in the private sector. The supply of money in this sector must be controlled, and for this purpose the Government are prepared to take all necessary measures. Although special considerations may arise in relation to certain export credits, it is the Government's view that the situation requires that the average level of bank advances during the next 12 months should be held at the average level for the last 12 months. I have informed the clearing bankers of this requirement. I am grateful for their co-operation in the past, and they have given me their assurance that, despite the difficulties, they will intensify the restriction of credit and do their best to achieve this result. I have no doubt that the banking system as a whole will give similar support.

"In addition to the need for dealing with this internal problem, we have to consider the pressures which have recently developed upon the external value of our money. The change in the exchange rate of the French franc generated a large-scale speculation among the world's leading currencies, in which sterling is necessarily most involved because it is so widely held. The Government intend to maintain the existing exchange rate parity of $2.80 to the pound, and they do not intend to allow the margins to widen. They consider that the existing parity is right and that the evidence of the U.K.'s balance of payments and trade figures supports this view.

"The Bank of England, with my approval, have announced the raising of Bank Rate from 5 per cent to 7 per cent. This exceptional rise is made necessary because of the heavy speculative pressure against sterling. But an increase was required in any event to give support to the measures already referred to during the period in which they are developing their full effect."

The announcement was made on the eve of the Chancellor's departure for the annual meetings of the International Monetary Fund and the International Bank in Washington, which will be followed by a meeting of Commonwealth Finance Ministers in Ottawa.

After the heavy run on sterling during August, which was stimulated both by the devaluation of the French franc and by the expectation that the German Deutschemark might be revalued, foreign pressure on the pound had continued in the international exchange markets, and the approach of the I.M.F. meeting in Washington had tended to revive speculation against sterling.

The sudden increase in the Bank Rate by a full 2 per cent caused an immediate sharp drop in the Stock Exchange prices of both Government securities and equities. After an initial slow reaction, however, the announcement of the Government's measures led to a decisive recovery of sterling in the foreign exchange markets on Sept. 23. By the following day the official sterling rate against the U.S. dollar had risen to 2.79½ (the highest level since the beginning of July, and comparing with 2.78 ⅜ on Sept. 18 just before the Government's announcement). Against the Deutschemark, sterling rose to 11.73⅞ (the highest rate since June 3, and comparing with 11.69 on Sept. 18), whilst against the Swiss franc the rate closed at 12.22½ (the highest since June 17, and comparing with 12.18¾ on Sept. 18). At the same time the rate for transferable sterling in Zürich reached $2.77 (the highest since Aug. 10, and comparing with $2.76 ⅜ on Sept. 18). Although sterling lost ground on Sept. 25, it rallied again on Sept. 26 and by Sept. 27 closed in London at $2.79 ⅜ and DM 11.71⅛ respectively, whilst in New York spot sterling closed at $2.79⅛-2.79½, and transferable sterling at $2.772-2.773.

After discussion with Mr. Gaitskell, the following statement was issued by Mr. Harold Wilson on Sept. 19 on behalf of the Opposition:

"In so far as the increase in Bank Rate is being put forward as a short-term emergency measure designed to deal with the speculative movements against sterling, we can only express the hope that it will prove successful and reserve any further comments on the foreign exchange position until we debate it in Parliament."

After pointing out that the Opposition's strong opposition to devaluation and their views on other aspects of the dollar position had been stated by Mr. Gaitskell in a speech to the American Chamber of Commerce on Sept. 17, the statement continued: "We cannot refrain from expressing our anxiety that . . . the Government have fallen back on the view that cutting back the level of production and employment is the only way of dealing with a foreign exchange crisis . . . Secondly, it is difficult to reconcile the Government's insistence that they are dealing only with a short-run speculative movement of capital with the announcement of measures which can only have serious long-term effects on our industrial output and productivity and represent a threat to the level of employment."

The Opposition "Shadow Cabinet" authorized Mr. Gaitskell on Sept. 23 to write to the Prime Minister and ask for an early recall of Parliament (normally due to reconvene on Oct. 29) to discuss the financial and economic situation after the Chancellor's return from Washington and Ottawa.

"In putting forward this request," Mr. Gaitskell said in his letter to Mr. Macmillan, "I must make it clear that we have no desire that anything should be said or done which might undermine confidence in sterling. But the grave and far-reaching measures announced, together with their implications for the nation and the circumstances which led up to them, should certainly be considered by Parliament at the earliest possible moment."

Mr. Macmillan declined the Opposition's request in a letter to Mr. Gaitskell on Sept. 24.

After stating that he had consulted with some of his Cabinet colleagues, the Prime Minister wrote: "Our view is that the situation is not one which requires an emergency summoning of Parliament. Parliament has been recalled on three such occasions since the war. These were the devaluation of the pound in 1949; the need in 1950 to take urgent action to amend the National Service Acts following the outbreak of the Korean War; and a critical stage in the Suez Canal problem in 1956. I do not consider that the present is comparable with any of these occasions.

"The measures which the Government have taken must of course be fully debated in Parliament; but I do not think that it is necessary that they should be debated immediately. Indeed, the discussions may be more fruitful if they take place after the situation had has an opportunity of developing. Moreover, it would be an advantage to the House to have a full account of all the international negotiations, not only those in Washington and Ottawa to which you refer, but also those in Paris, where the O.E.E.C. meeting will take place in the week beginning Oct. 14 [i.e. the special meeting of Ministers to receive the reports of the working parties on the proposed European Free Trade Area]. It follows that the earliest time would be in the week beginning Oct. 21. But under the present arrangement Parliament will meet on Oct. 29, and I do not think that there would be any significant gain from altering the date.

"The Government will naturally welcome a full debate on the economic situation when the House resumes, and will make whatever rearrangement of business is required to allow this to take place before the prorogation."

Reactions of both sides of industry to the Government's measures are summarized below.

Employers. A spokesman of the Federation of British Industries said on Sept. 19 that the Chancellor had "gone to the root of inflation," since "Government spending for investment, consumption and administration has continuously kept the money pump active, and efforts to drain the excess money off by high taxation have been self-defeating." He added: "It is to be hoped that within its new limits Government expenditure will lean in favour of productive investment such as roads, railways, power plants and the like, and against consumption and administration, which are still top-heavy."

"The rise in Bank Rate and the limitation of bank advances will severely handicap expanding industries by restricting productive investment. But the loss of productive capacity should be weighed against the intolerable damage which would flow from unrestrained inflation. Exports are still of the highest importance, and it is therefore encouraging to note that the Chancellor recognizes that special consideration may have to be given to export credits."

The British Employers' Confederation said that steadily mounting labour costs had been the major factor in forcing up prices and lessening Britain's competitive power in world markets, and that it was these which made the new measures necessary. "Many employers will be hard hit," the statement went on, "and some people will lose their present jobs, but if we all act sensibly there is no reason why there should be any widespread or lengthy unemployment. We ought to be able to get a closer balance between jobs and men instead of the situation which we have had in recent years of jobs chasing men, which has been debilitating for employers and workers alike, and has discouraged and made difficult needed increases in efficiency."

The president of the National Union of Manufacturers (Mr. C. S. Garland) emphasized that although the increase in the Bank Rate was necessary for monetary control, it would bear "very hardly on the small and medium-sized manufacturer who cannot secure the finance needed for expansion and development on the open market."

The Association of British Chambers of Commerce stated that if the Chancellor's move was the first of a series of considered steps in the Government's attempt to tackle inflation vigorously at its roots, then it would be understood in the general interest. There was no doubt, however, that it would come as a "profound shock" to many businessmen.

Trade Unions. The T.U.C. General Council issued a statement on Sept. 25 expressing "apprehension at the effect of the Government's actions upon the level of employment and productivity."

"The General Council," the statement said, "recognize the importance of maintaining international confidence in sterling, and the trade union movement has never been unwilling to support even distasteful measures which are seen to be necessary and are equitable in their impact. It is, however, clear that recent speculation against the pound has not arisen primarily from the internal situation in the U.K. but from the international economic situation, in which the policies of several leading countries are involved, and which will not be rectified by the U.K taking action alone.

"In the present situation there is no evidence that the level of industrial activity is higher than is desirable or that manpower and other resources are generally subject to undue strain The measures announced by the Government threaten to result in a lowering of activity in this country, and in a rise of the level of unemployment which is likely to be persistent. If this occurs, the benefits of increased output and living standards which might have been expected from capital investment of recent years will also not be realized

"The General Council have consistently criticized the Government's reliance on monetary methods of restriction on the grounds that these methods are indiscriminate in their effects on investment, and because accompanying direct restrictions on public investment tend to bear harder on this sector than do monetary methods on the private sector. This bias is undesirable."

The Government's determination that there would be no change in the parity of sterling was reaffirmed by Mr. Thorneycroft when he addressed the annual meeting of the I.M.F. on Sept. 24. He also announced that in order to combat any further speculation against the pound he was arranging to draw over the coming weeks the "stand-by" credit of $500,000,000 from the U.S. Export-Import Bank which had been arranged on Feb. 25 last (see 15416 D). As regards the U.K. balance of payments, he announced that the final figure for the year ended June 30, 1957, would be "just over £200,000,000."

Referring to the "sudden worsening of the imbalance in Europe which has been the main concern of European countries in the last two months," and to the widespread speculation which had arisen from "rumours that changes in the parity of sterling and the Deutschemark were imminent," Mr. Thorneycroft declared: "I have not come here to discuss the exchange rate parity of the pound. It stays at $2.80. Nor shall we allow the margins to widen. I stated this before I left London. I repeat it now. The German Government have been equally emphatic that the existing exchange rate of the Deutschemark will be held where it now is. Thus the policy on the exchange rate of Germany and the United Kingdom is definitely determined, and that is that."

Reviewing in detail the internal measures taken by the Government in the previous week, Mr. Thorneycroft said that to stop the inflationary spiral the Government had to be prepared to "deny the extra cash whatever other painful consequences might follow," and that the raising of the Bank Rate had been only one step in the process. Britain's difficulties in recent weeks, he continued, had been due not to lack of competitive ability as a trader but to speculation. This would be reflected in the next published figures of the sterling area's gold and dollar reserves and of the U.K. position in the E.P.U.—although it was right to mention that the reserves and the E.P.U. position were in any case seasonally under pressure at this time of year. The Government, however, had ample resources to deal with speculative pressure should it continue, and would not hesitate to use them, in this connexion the Chancellor announced the forthcoming drawing of the funds available under the Export-Import Bank credit.

After emphasizing that Britain's trading position was strong, Mr Thorneycroft continued: "When we looked at our prospects last December we said publicly that at best we would be in external balance over the year to June 1957. We had no thought then that we should be able in the disturbed conditions to earn the surplus on our external trading which is so essential to us Later on it looked as though our prospects might improve, and I told Parliament that we could hope for a surplus of about £125,000,000, say $350,000,000. Actually, the final figure will be just over £200,000,000, say $600,000,000. A surplus of $600,000,000 is on any reckoning a solid achievement.

"Looking forward, the trends in our economy suggest that we shall have a bigger surplus in the 12 months ending June 1958. Our exports have risen and continue to rise. Over the last three years our exports to the U.S. have risen by as much as two-thirds. This is not the picture of a declining currency. Our current trading balance therefore shows clearly that our parity is right"

The Chancellor went on to express the hope that future consideration of the problems of European imbalance and co-operation would take place in a calmer atmosphere, and without the burden of recurrent exchange speculation "I wish to emphasize," he added, "that the question of exchange rates must now be regarded as settled and will not be reopened in any discussions of these matters."

The British decision to maintain the present exchange rate of the pound was approved by the Managing Director of the I.M.F., Mr. Per Jacobsson, when he addressed the meeting.

Mr. Jacobsson said that "on the basis of present indications, including the realization of a surplus in the current account of the balance of payments, sterling is certainly not over-valued at its present parity. When exchange rates are on a realistic basis, there is great wisdom in strongly defending the existing rate structure. Such defence may require very stiff measures for a time, but that is better than to take the easy way out and fall into the habit of currency devaluation, which may be exceedingly difficult to break . . . The growing knowledge that there will be no alteration in the value of either the Deutschemark or the pound sterling should already in itself have a calming effect on the movement of funds."

The increase in the Bank Rate in Britain was welcomed as "a step in the right direction" by a spokesman of the West German *Bundesbank*, who added that Britain's economic policy had been given further support by the reduction of the German Bank Rate the previous day from 4½ to 4 per cent. As regards the position of the Deutschemark, Dr. Adenauer rejected suggestions of an upward revaluation during an interview over the Columbia Broadcasting System on Sept. 12. The West German representative at the I.M.F. meeting in Washington reaffirmed this decision on Sept. 24, declaring: "There is no intention whatsoever to contemplate a change in the dollar value of the Deutschemark, nor any change in the margins." The fact that the monthly foreign exchange surpluses and deficits of some countries had reached very extreme figures during the past few months was, he added, due to currency speculation which had been creating a "vicious circle feeding upon its own results," and which constituted "the most acute and pressing problem." [Details of the various measures taken by the German authorities in connexion with Germany's creditor position in the E.P.U. will be given in a separate article.—*Ed. K.C.A.*].

Sterling Area Gold and Dollar Reserves, August Figures.

The Treasury announced on Sept. 3 that the sterling area's gold and dollar reserves had fallen during August by $225,000,000, after taking into account (*a*) the payment of $38,000,000 to the E.P.U. in respect of the U.K.'s deficit in July; (*b*) the payment of $24,000,000 to creditor countries in the E.P.U. under bilateral settlements, including $21,000,000 to Western Germany. No U.S. defence aid was received during the month. As a result, the gold and dollar reserves stood at $2,142,000,000 on Aug. 31.

It was pointed out in the Press that the heavy fall in the sterling area's reserves during August had been the result of widespread speculation that the Deutschemark might soon be raised in value, and that the heavy flight of funds into Western Germany, and the run on the pound, had been especially stimulated by the partial devaluation of the French franc on Aug. 11. The effect on the gold and dollar reserves had been all the more intense since this was the time of year when the earnings of the sterling area were at their lowest, and when dollar expenditure on grain and tobacco was particularly heavy.

Provisional figures for the E.P.U. August settlement showed that Britain had a deficit of £63,500,000, the largest for some years; three-quarters of this would be settled in gold or dollars (involving a payment of some $135,000,000) and the remaining quarter by an increase in the U.K.'s debt to the Union.—(Treasury Press Office, London - Times - Daily Telegraph - Manchester Guardian - Financial Times)

A. UNITED KINGDOM. — Lord Hailsham appointed Chairman of Conservative Party.

The Conservative Central Office announced on Sept. 18 (*a*) that the Leader of the Party, Mr. Harold Macmillan, had appointed Lord Hailsham as chairman of the party organization in place of Mr. Oliver Poole; and (*b*) that Mr. Poole would act as deputy chairman of the party at Mr. Macmillan's request. Lord Hailsham's appointment to the party chairmanship was announced on the day following his appointment to the post of Lord President of the Council (see 15761 D).

In a press statement at Conservative headquarters on the same date (Sept. 18), Lord Hailsham said: "I have had a very strong impression in recent months that the fact that there was not in the Cabinet someone with an intimate relationship with the party—such as Mr. Herbert Morrison had when he was Lord President—has been a loss to the Government. As I see it, my appointment repairs that deficiency or loss. My duty will be to listen to people far more than to talk to them. I want to get the feel of things, which will enable me to play a part in the Cabinet which I know ought to be played by someone."

Disclaiming any intention that he should become an *éminence grise*, Lord Hailsham said: "I am not a substitute for my various colleagues who hold public offices. As a member of the Cabinet I am jointly responsible for policy, and I shall continue to be jointly responsible for policy with my colleagues. Obviously, I hope to influence them. I do not regard it as my function to invent some startling departure from what my colleagues and I have been doing as members of the Cabinet."

Lord Hailsham indicated that he would be making a close study of the Government's failure in recent by-elections, but would refuse to regard the Gloucester result (see 15756 B) as a starting-point in this study. "Personally," he added, "I do not put by-election results down to any one factor, local or national. It is a combination, and it is very important to evaluate this rightly. What has to be studied is the world, this country, and the changing scene to which we have as a nation constantly to adapt ourselves."

Mr. Oliver Poole (46) had been chairman of the Conservative Party since November 1955, when he succeeded Lord Woolton. *The Times* stated that the Prime Minister's intention in appointing Lord Hailsham was "to restore the strong link between the party and the Cabinet which existed in the days of Lord Woolton's tenure of office."

Mr. Macmillan had been elected Leader of the Conservative Party in succession to Sir Anthony Eden on Jan. 22, 1957, following his appointment to the Premiership after Sir Anthony's resignation.—(Times - Daily Telegraph)
(Prev. rep. 14439 E.)

B. SOVIET UNION.—Decree on Place-names.

The Presidium of the Supreme Soviet issued a decree on Sept. 11 stating (*a*) that the names of living persons would no longer be given to towns, regions, industrial enterprises, collective farms, etc.; and (*b*) that prominent personalities could only be commemorated in this manner posthumously, and in exceptional cases.

After recalling that many places and institutions had been named after living persons during the period of the "cult of the individual," a practice which had led to "the unjustified glorification of certain individuals," the decree stated:

(1) That it was "necessary to discontinue in the future the naming of territories, regions, districts, towns, industrial enterprises, railway stations, collective farms, institutions, educational establishments, and organizations after statesmen, public and political leaders, and workers in the fields of science and culture during their lifetime."

(2) That the naming of places after leading personalities could be done "only posthumously and in exceptional cases." The only bodies authorized to make such changes would be the Presidiums of the Supreme Soviets of the Union Republics; the U.S.S.R. Council of Ministers; or the Councils of Ministers of the Union Republics.

(3) That all regions, districts, towns, industrial enterprises, collective farms, etc., at present bearing the names of living personalities would be renamed.

The preamble said that Lenin had been "a model of modesty and simplicity" and an "irreconcilable opponent of the glorification of his name" during his lifetime, during which no region, district or town had been named after him. It was recalled that the cities of Leningrad and Ulyanovsk had been named after Lenin following his death in 1924.

C. INDIA. — Mr. Nehru's Visits to Syria, Scandinavia, Netherlands and Middle East. - Proposals for Danish and Dutch Technical Aid to India.

The Indian Prime Minister, Mr. Nehru, visited Syria and the Scandinavian countries while on his way to London for the Commonwealth Premiers' conference (see 15637 A). Leaving Delhi by air on June 14, he arrived in Damascus later the same day, and on June 15 had talks with President Kuwatly and other Syrian leaders; the Syrian Premier, M. Assali, had previously stated that these would primarily relate to new efforts for a solution of the Palestine problem and the return of the Palestinian Arab refugees to their homes. Before leaving Damascus Mr. Nehru received a deputation with which he discussed the Algerian question.

From Damascus Mr. Nehru flew on June 15 to Copenhagen and was welcomed by Hr. Hansen, the Danish Prime Minister, with whom he subsequently had informal discussions. Mr. Nehru, who had expressed great interest in the Danish co-operative and educational systems, inspected a co-operative dairy, farms, and a folk high school, lunched with King Frederik and Queen Ingrid, and visited Professor Niels Bohr, the famous physicist.

Immediately before Mr. Nehru left India, a delegation of the Danish National Committee on Technical Assistance had arrived in Delhi on June 13 to examine the possibility of carrying out in Mysore a joint Indo-Danish project for general education, including technical advice on agricultural matters. It was announced at the same time that the Indian and Danish Governments had agreed to raise their respective legations to the status of embassies.

On June 18 Mr. Nehru flew to Helsinki. Although he paid courtesy calls on President Kekkonen and Dr. Suksclainen (the Prime Minister), his two-day stay was devoted almost entirely to public engagements, including a reception by the Speaker of the Finnish Parliament (M. Fagerholm) and a visit to the industrial town of Meantine, and no political talks took place.

From June 20-22 Mr. Nehru visited Oslo, where he had informal talks with the Norwegian Premier, Hr. Gerhardsen, and was received in audience by the Regent, Crown Prince Olav. He next flew to Stockholm, where he had a 90-minute talk with the Swedish Premier, Hr. Erlander, and the Foreign Minister, Dr. Unden, the subjects discussed including disarmament and the suspension of nuclear weapon tests. Mr. Nehru concluded his Scandinavian tour on June 25 by visiting Malmö, where he lunched with King Gustav Adolf at his nearby estate on June 25 before flying to London.

After the Commonwealth Prime Ministers' conference Mr. Nehru visited the Netherlands from July 8-9 at the Dutch Government's invitation, and had talks in The Hague with Dr. Drees (the Prime Minister) Mr. Luns (Foreign Minister) and other members of the Government. During these talks Mr. Mansholt (Minister for Agriculture, Fisheries, and Food) submitted to Mr. Nehru proposals for Dutch technical and financial aid in a land reclamation project in the Saurashtra area of Bombay State, and also in the development of a leather industry. Mr. Nehru also visited Rotterdam and Delft and lunched with Queen Juliana.

From The Hague Mr. Nehru flew to Cairo, where he arrived on July 10. On the following day he discussed Middle East problems with President Nasser, the talks being attended by Dr. Fawzi (the Egyptian Foreign Minister), General Amer (War Minister), and Wing-Commander Ali Sabry (then President Nasser's political adviser). The main subjects under discussion were reported to be the unresolved problems of the Suez Canal issue, the resumption of Anglo-Egyptian relations, the Arab-Israeli question, and Algeria. Mr. Nehru also discussed the Algerian situation with the Tunisian Ambassador to Egypt (Dr. Mokkadem), who invited him to visit Tunisia.

After flying to Khartoum on July 12 for talks with Mr. Khalil, the Sudanese Prime Minister, Mr. Nehru flew back on July 13 to Cairo, where he had further talks with President Nasser. He returned to Delhi on the following day.

D. ISRAEL. — Diplomatic Relations with Ceylon.

It was announced in Jerusalem on Sept. 16 that Israel and Ceylon had agreed to establish diplomatic relations. Ceylon is the sixth Asian country to enter into diplomatic relations with Israel, the others being Burma, Japan, Laos, the Philippines, and Siam.—(New York Times)

A. SIAM. — Army Coup d'Etat by Marshal Sarit Thanarat. - Flight of Field-Marshal Pibul Songgram. - Mr. Pote Sarasin appointed Prime Minister.

The Government of Field-Marshal Pibul Songgram was overthrown during the night of Sept. 16-17 by a bloodless *coup d'état* carried out in Bangkok by Marshal Sarit Thanarat, Commander-in-Chief of the Siamese Army. The *coup* had been preceded by the resignation from the Government of Marshal Sarit (previously Minister of Defence) and other Ministers, and the subsequent resignation from the National Assembly of 62 members of the ruling *Seri Manangasila* party.

Four members of the Government, all senior Army officers, resigned on Aug. 21-22 after Field-Marshal Pibul Songgram had demanded that all Ministers should either relinquish their commercial and business directorships or tender their resignations. The Ministers who left the Government were Marshal Sarit Thanarat (Minister of Defence), Lieut.-General Kittikachorn (Deputy Minister of Defence), General Siryothin (Minister for Co-operatives) and General Prapart Charusathien (Deputy Minister of the Interior). Marshal Sarit explained that he resigned not because he was forced to choose between his position as Minister of Defence and his chairmanship of the State Lottery Bureau, but because he felt that Marshal Pibul's Government was out of touch with public opinion. [In addition to being chairman of the State Lottery Bureau, Marshal Sarit also held the chairmanship of the Thai plywood organization and of the Bank of Asia, all of which are Government appointments.]

Following these resignations, 62 members of the National Assembly —many of whom were Army officers—resigned *en masse* on Sept. 10 both from the Assembly and from the *Seri Manangasila* party. The 62 deputies decided to resign after attending a meeting summoned by Marshal Sarit, who was himself among the deputies tendering their resignations. All the deputies concerned were nominated members of the Assembly, whose strength was reduced by half as a result of the mass resignations (half the members of the Assembly are elected and the other half nominated).

Two days after (Sept. 12) it was announced that General Phao Sriyanond had resigned as Minister of the Interior but would remain Chief of Police. The circumstances of General Phao's resignation were obscure, but it was understood that his resignation had been demanded by supporters of Marshal Sarit, including an influential section of the Army.

[Since the general elections of February last (see 15615 A) General Phao had been one of the three "key" personalities in Siamese politics, the other two being Marshal Sarit and the Prime Minister, Field-Marshal Pibul Songgram. Foreign press correspondents in Bangkok suggested that there had been intense rivalry between Marshal Sarit and General Phao, in which the latter had progressively lost ground as a result of Marshal Sarit's increasing popularity with the Army and the civilian population generally. Although General Phao was previously reported to have tendered his resignation as Chief of Police on becoming Minister of the Interior (see final paragraph to 15615 A), he had apparently continued to hold that post concurrently with his ministerial portfolio since the formation of a new Cabinet after the elections.]

During the night of Sept. 16-17 units of the Siamese Army seized control of key points in Bangkok and other centres on the orders of Marshal Sarit, the *coup* meeting with no resistance and being carried without bloodshed. Marshal Sarit issued a proclamation on Sept. 17 announcing that martial law had been imposed; that the Army had been compelled to take action because Siam was "very disorderly and heading for disaster"; and that King Phumiphon Aduldet had appointed him Military Governor of Bangkok. He stated also that the Army's action had had the King's full support. It was also announced that all Ministers of Field-Marshal Pibul's Government had resigned and that General Phao had been superseded as Chief of Police by Major-General Pichai Montri, an Army officer.

At a press conference on the same day Marshal Sarit said that he wished to "beg Marshal Pibul Songgram's pardon" for the action taken, and expressed the hope that the former Prime Minister would continue to live quietly in Siam. Although Marshal Pibul had "made mistakes and followed mistaken advice," he had nevertheless done much for Siam. "I still regard him as my leader," Marshal Sarit added.

Field-Marshal Pibul Songgram, who had apparently been forewarned of the *coup*, left Bangkok by car shortly before the Army took over, crossed the Cambodian frontier, and arrived on Sept. 19 in Pnom-Penh, the Cambodian capital. It was announced that he would be granted political asylum in Cambodia. General Phao, the former Chief of Police, left Siam by air for Europe and subsequently arrived in Switzerland.

King Phumiphon Aduldet dissolved the National Assembly on Sept. 18 in preparation for new general elections to be held within 90 days. On the same day 123 "nominated" members, mostly military officers, were appointed to sit without elected members as a provisional Assembly until the elections.

Mr. Pote Sarasin (52), secretary-general of the South-East Asia Treaty Organization (SEATO), was appointed Prime Minister by the provisional Assembly on Sept. 21, to hold office until the general elections. Strongly pro-Western, and not associated with any of the political parties, Mr. Pote Sarasin was Foreign Minister from 1945 to 1950, and subsequently Ambassador in Washington for five years until his appointment as secretary-general of SEATO in July last (see 15644 F).

In a statement after taking office, Mr. Pote Sarasin criticized various newspapers and politicians (unnamed) who had attempted to weaken Siam's ties with SEATO and with the United States and the Western democracies. He announced that his Government would ensure free and satisfactory elections in December and would "investigate and expose" Communist activities in Siam—an investigation which would centre mainly on Communist support for left-wing newspapers.

The first appointments to Mr. Pote Sarasin's Cabinet, announced on Sept. 24, included General Kittikachorn as Minister of Defence; General Prapart Charusathien as Minister of the Interior; and Nai Sukich Nimmanhemin, leader of the (Opposition) Unionist Party, as Minister of Economic Affairs. Prince Wan Waithayakon remained Foreign Minister and Siamese representative at the United Nations. Generals Kittikachorn and Charusathien are both closely associated with Marshal Sarit and played prominent parts in the *coup* which overthrew Field-Marshal Pibul Songgram.

A spokesman of the U.S. State Department described the *coup* in Siam as "essentially an internal political development" which would neither damage the structure of SEATO nor affect the flow of U.S. military aid to Siam.—(Times - Manchester Guardian - Le Monde, Paris - New York Times)

(Prev. rep. 15644 F; 15615 A.)

B. NEW ZEALAND. — Mr. Holyoake becomes Prime Minister. - Knighthood conferred on Mr. Holland. - Cabinet Reorganization.

Mr. Sidney Holland formally tendered his resignation from the Premiership on Sept. 20 and was succeeded in that office by Mr. K. J. Holyoake, hitherto Deputy Premier and Minister of Agriculture. At Mr. Holyoake's request, Mr. Holland remained in the Cabinet as Minister without portfolio.

The New Zealand Cabinet was reorganized by Mr. Holyoake on Sept. 26, its membership being as follows:

Mr. Keith Holyoake	..	Prime Minister and Minister for Maori Affairs.
Mr. Sidney Holland	..	Minister without portfolio.
Mr. S. W. Smith		Internal Affairs and Agriculture.
Mr. T. L. Macdonald		External Affairs.
Mr. D. G. Eyre	..	Defence.
Mr. R. G. Gerard	..	Lands and Forests.
Mr. John Rae ..	..	Housing, and State Advances Corporation.
Dame Hilda Ross	..	Social Security and Welfare of Women and Children.
*Mr. J. K. McAlpine	.	Labour, Mines and Railways
*Mr. E. H. Halstead	.	Industries, Commerce and Customs.
*Mr. R. M. Algie	..	Education, Broadcasting, and Scientific and Industrial Research.
*Mr. J. T. Watts	..	Finance, Census and Statistics.
*Mr. W. S. Goosman	..	Works, Transport, and Hydro-electric Undertakings.
*Mr. J. R. Marshall	..	Attorney-General and Justice.
*Mr. J. R. Hanan	.	Health and Immigration.
*Mr. T. P. Shand	.	Postmaster-General, Telegraphs, and Civil Aviation.

*No change.

The reorganization involved the following changes: (i) Mr. Holyoake relinquished the Agriculture portfolio to Mr. Smith, who retained the portfolio of Internal Affairs; (ii) Mr. Corbett, formerly Minister for Maori Affairs, left the Cabinet through ill-health, the portfolio being taken over by Mr. Holyoake concurrently with the Premiership; (iii) Mr. Macdonald relinquished the Defence portfolio to Mr. Eyre (formerly Minister for Housing and State Advances) but retained the External Affairs portfolio; (iv) Mr. Gerard succeeded Mr. Smith as Minister for Lands and Forests, relinquishing his former post of Minister for Social Security; (v) Mr. John Rae (a former Government Whip), who entered the Cabinet for the first time, became Minister for Housing and State Advances *vice* Mr. Eyre, and also took charge of the Government Superannuation Fund, the National Provident Fund, and the Government Printing and Stationery Office; (vi) Dame Hilda Ross became Minister of Social Security *vice* Mr. Gerard, retaining the portfolio of Minister for the Welfare of Women and Children.

It was announced in London on Sept. 23 that the Queen had conferred the G.C.B. on Mr. Holland on his relinquishment of the office of Prime Minister of New Zealand.—(Directorate of Information Services, Wellington)

(Prev. rep. 15701 D; Cabinet, 15375 B; 14780 D; 13953 A.)

A. MEDICAL RESEARCH. — Reports of British Medical Research Council and American Cancer Society on Relationship between Smoking and Lung Cancer. - British and U.S. Governments' Decision to organize Information Campaigns on Dangers of Smoking.

The British Report.

A report published on June 27 by the Medical Research Council stated that the relationship between smoking and lung cancer was "one of direct cause and effect," in contrast to the Council's previous reports, which had merely referred to an "association" between the two. The British Government announced on the same day that it would take special measures to bring the Council's findings to the notice of the public, and particularly of those responsible for health education.

The report stated that the death-rate from lung cancer had more than doubled in 10 years, from 188 per 1,000,000 of the population in 1945 to 388 in 1955. Among males the disease was now responsible for approximately 1 in 18 of all deaths. Although the death-rate for women was comparatively low, it had shown a considerable increase in recent years and the disease was now responsible for 1 in 103 of all female deaths.

Commenting on these figures, the report said that the trend over the last few years indicated that the incidence had not yet reached its peak. The figures were not to be explained as a mere reflection of improved methods of diagnosis, but represented a real rise in the incidence of the disease, to an extent which had occurred with no other form of cancer. Only a small part of the rise could be attributed to the larger numbers of old persons now living, as in the last 10 years the lung cancer death-rates among both men and women had risen at all ages from early middle life onwards.

The extent and rapidity of the increase in lung cancer pointed clearly to some potent environmental influence which had become prevalent in the past half-century, and to which different countries, and presumably also men as compared with women, had been unequally exposed. The pattern of incidence of the disease ruled out any possibility that the increase could be due in a substantial degree to special conditions (such as occupational hazards) affecting only limited groups, and it was necessary to seek some factor or factors distributed generally throughout the population. From the nature of the disease attention had focussed on two main environmental factors: (1) the smoking of tobacco, and (2) atmospheric pollution, whether from homes, factories, or the internal combustion engine.

The evidence that heavy and prolonged smoking of tobacco, particularly in the form of cigarettes, was associated with an increased risk of lung cancer was not based on the observation that the substantial increase in the national mortality had followed an increase in the national consumption of cigarettes, but was derived from two types of special inquiry. In the first, lung cancer patients had been interviewed and their histories in relation to smoking and other factors compared with those of patients without lung cancer. The published results of 19 such inquiries (in Britain, the U.S.A., Finland, Germany, Holland, Norway, and Switzerland) agreed in showing more smokers and fewer non-smokers among the lung cancer patients, and a steadily rising mortality as the amount of smoking increased.

In the second type of inquiry, information had been obtained about the smoking habits of each member of a defined group in the population, and the causes of the deaths occurring subsequently in the group had been ascertained. There had been two such investigations, one in the U.S.A. covering 100,000 men aged 50-69 (see below), and the other in Britain covering over 40,000 men and women doctors. In both the results had been essentially the same. The investigation in Britain, which had been in progress for over five years, had shown, with regard to lung cancer in men, a higher mortality (1) among smokers than among non-smokers; (2) among heavy smokers than among light smokers; (3) among cigarette smokers than among pipe smokers; (4) among those who continued to smoke than among those who gave it up. The highest mortalities were found among men who continued to smoke cigarettes, heavy smokers in this group having a death-rate nearly 40 times that among non-smokers. The evidence suggested that the proportion of life-long heavy cigarette smokers who would die of lung cancer was likely to be of the order of 1 in 8, whereas the corresponding figure for non-smokers would be of the order of 1 in 300. The observation on the effect of giving up smoking indicated that men who ceased to smoke, even in their early forties, might reduce their likelihood of developing the disease by at least one-half.

The evidence from the many inquiries in the last eight years had been uniformly in one direction, and was very considerable. From the physical and chemical point of view there was nothing inherently improbable in a connexion between smoking and lung cancer. Tobacco smoke consisted largely of microscopic oily droplets held in suspension in air, and these were of a suitable size to be taken into the lungs and retained there. Over 100 constituents had so far been identified, and among these five substances had already been found which were known to be capable, in certain circumstances, of causing cancer in animals. Some workers had produced tumours in animals by painting concentrated extracts of tobacco tar on the skin. Known carcinogens were present in tobacco smoke in very small amounts, and there was no certainty that such low concentrations could be harmful to human beings; nevertheless, the finding of carcinogenic agents in tobacco smoke was an important step forward, in that it provided "a rational basis for the hypothesis of causation."

It had been known for some years, the report continued, that mortality from lung cancer was greater in urban than in rural areas. This fact, together with the identification of carcinogenic substances in coal smoke and motor-vehicle exhausts, had led to the supposition that atmospheric pollution might be concerned with the increase in lung cancer. The facts were particularly difficult to investigate, however, and the evidence was neither so consistent nor so extensive as that relating to smoking. On the one hand, no excess mortality from lung cancer had been observed in persons especially exposed by the nature of their work to atmospheric pollution, e.g. transport workers, garage hands, and policemen. On the other, higher death-rates had been observed among non-smokers in large towns than among those in rural areas. On balance it seemed likely that atmospheric pollution played some part in causing the disease, but a relatively minor one in comparison with cigarette smoking.

Knowledge of the causation of lung cancer was still incomplete, and many factors other than smoking were undoubtedly capable of producing the disease; e.g. at least five industrial causes had been recognized. Nevertheless, the evidence for an association between smoking and lung cancer had been steadily mounting throughout the past eight years, and during the whole of this period the most critical examination had failed to invalidate the main conclusions drawn from it. "In scientific work, as in the practical affairs of everyday life, conclusions have often to be founded on the most reasonable and probable explanation of the observed facts," the report concluded. "So far, no adequate explanation for the large increase in the incidence of lung cancer has been advanced save that cigarette smoking is indeed the principal factor in the causation of the disease. The epidemiological evidence is now extensive and very detailed. It follows a classical pattern on which many advances in preventive medicine have been made in the past."

Mr. Vaughan-Morgan, then Parliamentary Secretary to the Ministry of Health, made the following statement on the report to the House of Commons on June 27:

"The Government feel that it is right to ensure that this latest authoritative opinion is brought effectively to public notice, so that everyone may know the risks involved in smoking. The Government consider that these facts should be made known to all those with responsibility for health education. The Minister of Education included in his recently published *Handbook for Teachers on Health Education* advice about the dangers of smoking, and he is circulating copies of this statement to local education authorities and education authorities generally. Corresponding action will be taken by the Scottish Education Department in Scotland. The Government now propose to bring these views to the notice of the local health authorities who are concerned under statute in the prevention of illness, and who are responsible for health education as a means of prevention. Local health authorities will be asked to take appropriate steps to inform the general public, and in this task they will have the assistance of the Central and Scottish Councils for Health Education."

In reply to questions, Mr. Vaughan-Morgan said that the Medical Research Council's expenditure on the subject was about £40,000 a year, apart from expenditure on cancer research generally. Publicity material would be supplied by the Central Council for Health Education to the local health authorities, who would receive an Exchequer grant of 50 per cent of their expenditure.

A statement issued on the same day by the Tobacco Manufacturers' Standing Committee emphasized that it had not been established with certainty that there was a causal connexion between smoking and lung cancer, and maintained that the Medical Research Council's report did not contain any important new evidence. The Committee had previously issued on June 17 a report on the use made of the £250,000 research fund established by the tobacco industry in 1954, in which arguments were put forward against the theory that smoking was a cause of lung cancer.

During research in the tobacco companies' laboratories, the report stated, an automatic smoking machine had been evolved which closely duplicated human smoking, and smoke produced in it had been analysed by new techniques. Of two carcinogenic substances believed to be present in cigarette smoke, benzpyrene had been discovered in very small quantities, whilst dibenzanthracene had not been detected. Tests had also shown that the daily intake of benzpyrene from breathing London air was equivalent to that from 100 cigarettes, and it was most improbable that the amounts absorbed from normal levels of smoking could in any way be injurious.

The American Report.

A report on the relationship between smoking and death-rates was presented to the annual convention of the American Medical Association on June 4 by Dr. E. Cuyler Hammond and Dr. Daniel Horn, respectively director and associate director of statistical research for the American Cancer Society. The report was based on a study of 187,783 men between the ages of 50 and 69 living in nine States, which had been carried out by 22,000 volunteers over a period of 44 months. Analysis of the results suggested that cigarette smokers were 10 times

more likely to die of lung cancer than non-smokers, and that smoking increased the chances of fatal heart attacks by 70 per cent.

The report stated that final results, which fully confirmed those of earlier interim reports (see 13831 A), showed that death-rates from all causes were 68 per cent higher for cigarette smokers than for non-smokers; 43 per cent higher for men who smoked cigars or pipes as well as cigarettes; 22 per cent higher for cigar smokers; and 12 per cent higher for pipe smokers. Among cigarette smokers, death-rates were 34 per cent higher for those smoking under 10 a day than for non-smokers; 70 per cent higher for those smoking 10 to 20 a day; 96 per cent higher for those smoking 20 to 40 a day; and 123 per cent higher for those smoking 40 or over a day.

Out of 3,100 men smoking 40 or more cigarettes a day, 27 had died of lung cancer while the survey was in progress, as against 15 out of 32,392 non-smokers. The total death-rate from lung cancer was only slightly higher for cigar smokers than for non-smokers; appreciably higher for pipe smokers; and nearly 10 times as high for cigarette smokers. Even when allowance was made for the fact that cigarette smoking was more common in cities, the death-rate from lung cancer had been found to be 25 per cent lower in rural areas than in large cities, whether as a result of some factor in city life or better diagnosis "However that may be," the report continued, "the lung cancer death-rate was low among men who never smoked cigarettes regularly, and high among cigarette smokers in large cities, small cities, suburbs of towns, and rural areas. Whatever the urban factor may be, its effect on lung cancer death-rates is small as compared with the effect of cigarettes." The death-rate for cancer of the lips, mouth, tongue, pharynx, larynx, or œsophagus was seven times higher for cigarette smokers than for non-smokers; five times higher for cigar smokers; and 3½ times higher for pipe smokers.

Discussing heart diseases, the report stated that the death-rate for coronary artery disease was about the same for pipe smokers as for non-smokers, and 28 per cent higher for cigar smokers. It was 70 per cent higher for all cigarette smokers; 29 per cent higher for those smoking less than 10 a day; 89 per cent higher for those smoking 10 to 20; 115 per cent higher for those smoking 20 to 40, and 141 per cent higher for those smoking 40 or over The inquiry had also revealed an extremely high association between cigarette smoking and gastric ulcers; a very high association for pneumonia and influenza, duodenal ulcers, aortic aneurism, and cancer of the bladder; a high association for cirrhosis of the liver, and a moderate association for cerebral vascular lesions.

The U.S. Surgeon-General, Dr. Burney, stated on July 12 that in view of the "increasing and consistent evidence" that excessive cigarette smoking was one of the causative factors of lung cancer, the Public Health Service would carry out a nation-wide information campaign on the subject. The last statement issued by the Service on this question, in 1953, had noted the existence of a statistical association between smoking and lung cancer, but had left open the question of the nature of this relationship.

Statistics on Death-rate from Lung Cancer.

A report issued by the World Health Organization on June 15, 1955, showed that the death-rate for cancer of the respiratory system had greatly increased in all the countries studied in recent years, and was higher in Britain than in any other country. Mortality per 1,000,000 persons from this cause in 1952 was as follows (corresponding figures for 1949 are given in parantheses for purposes of comparison): males in England and Wales, 614 (495); females, 113 (98); males in Scotland, 563 (414); females, 109 (108). Outside Britain the death-rate from this cause in 1952 was highest for males in Switzerland (835), and for females in Eire (73).

Mr. Vosper, the U.K. Minister of Health, stated on March 12, 1957, that the death-rate from lung cancer in England and Wales was 279 per 1,000,000 persons in 1950; 302 in 1951; 328 in 1952; 343 in 1953; 369 in 1954; and 389 in 1955. According to figures published by the Registrar-General, the death-rate from cancer of the lung and bronchus among men in England and Wales was 607 per 1,000,000 in 1953, 657 in 1954, and 693 in 1955. The corresponding figures for women were 98 in 1953, 102 in 1954, and 106 in 1955.—(Times - Daily Telegraph - Manchester Guardian - New York Times)

A. PAKISTAN. — West Pakistan Assembly's Demand for Division of Province into Autonomous Units. - President Mirza's and Mr. Suhrawardy's Rejection of Constitutional Changes pending the 1958 Elections. - New Governor of West Pakistan.

The West Pakistan Provincial Assembly adopted on Sept. 17 a resolution in favour of the reconstitution of the Province as a sub-federation with four or more autonomous provinces. West Pakistan had been created as a single unit on Oct. 14, 1955, comprising the former provinces of Sind, Punjab, and North-West Frontier Province, the city of Karachi, the former States of Baluchistan, Bahawalpur, and Khairpur, the former Frontier States and Baluchistan States Union, and the former Frontier Province Tribal Areas.

The text of the resolution, which was moved by the leader of the National Awami Party (Mr. G. M. Bhurguri), was as follows: "This Assembly recommends the Government to communicate the views of this Assembly to the National Assembly that the Province of West Pakistan be reconstituted as a sub-federation with four or more fully autonomous provinces." The voting was 170 to four, with 121 abstentions, out of a total House of 305 (with five seats vacant).

Prior to the Assembly debate, the leaders of the Republican Party (the ruling party in West Pakistan) and the recently formed National Awami Party (see 15677 A) had signed an agreement on Sept. 15 pledging their support, both in the West Pakistan Provincial Assembly and in the National Assembly, for a resolution which would call "for the replacement of the one unit in West Pakistan by a zonal federation composed of autonomous provinces on a linguistic and cultural basis." The signatories to the agreement included Sardar Abdur Rashid (the Chief Minister of West Pakistan), Malik Firoz Khan Noon (leader of the Republican Parliamentary Party in the National Assembly), Mian Iftikharuddin and Mr. G. M. Syed (leaders of the National Awami Party), and Khan Abdul Gaffar Khan (the leader of the former Redshirt movement).

Those supporting the resolution accordingly included all the members of the National Awami Party and most of the Republicans. The four opposing votes were cast by three Republicans who refused to adhere to the agreement, and by one Independent The members of the Moslem League abstained, with the exception of six who voted for the resolution contrary to party instructions Eleven Republicans also abstained.

On Sept. 23, however, President Mirza of Pakistan issued a statement rejecting the possibility of a division of West Pakistan pending the general elections to be held in 1958. The President's statement was as follows:

"The recent recommendatory resolution passed by the West Pakistan Assembly regarding the reconstitution of the province of West Pakistan has caused considerable apprehensions amongst people and official classes. The Prime Minister and I have consulted together on the problems raised by it and we are of the view that there should be no tampering with the Constitution on such important issues at the present juncture. The integrity of Pakistan can only be maintained if we have stability, and we can have stability only if we have General Elections. General Elections must therefore be held in 1958 and, as corollary to this, these elections must be held under the present Constitution."

The President's decision was supported by Mr. Suhrawardy, the Prime Minister, in a broadcast the same night.

Mr. Suhrawardy said that any dismemberment of the one unit created in 1955 would entail radical changes in the administrative and legislative organs of West Pakistan and in various other spheres, which would make it impossible to hold general elections in 1958, "and perhaps not until 1960." The elections should, however, be held as early as possible in 1958, as this alone could "eliminate political manoeuvrings and blackmailing and tussling for power." Referring to the history of the one-unit scheme, the Prime Minister claimed that in spite of deficiencies there was today "a greater degree of psychological freedom and a greater sense of oneness and mutual reliance in the cause of the maintenance of the country's integrity and stability." Any retardation of this process might well lead to the disintegration of Pakistan, would weaken the sense of unity and patriotism, and would also upset the understanding and agreements between West and East Pakistan. He added: "I maintain that the future of West Pakistan, and indeed the fate of Pakistan, must be decided by chosen representatives of the people, and not be at the mercy of political manoeuvrings and political ambitions and unholy alliances. There should be no amendment of the Constitution on such radical lines until the general elections, after which the new Legislature may make what amendments it considers requisite."

Mr. Akthar Hussain (Secretary, Ministry of Defence) was appointed Governor of West Pakistan on Aug. 28, in succession to Mr. M. A. Gurmani who had submitted his resignation to President Mirza the previous day. Mr. Gurmani had earlier been summoned to Karachi following complaints by Republican Party leaders who alleged that he had deliberately undermined the prestige of their party and its Ministry in West Pakistan. Although Mr. Gurmani denied these charges and maintained that he had been acting strictly as the constitutional head of the province, he eventually resigned in deference to a request to that effect by the Pakistani Government (which is based on a coalition between the Republican Party and the Awami League).—(Pakistan High Commissioner's Office, London - Times) **(15677 A; 14584 D; 14521 A.)**

B. INDIA. — Revocation of Essential Services Maintenance Ordinance.

It was announced in Delhi on Aug. 12 that President Prasad had revoked the Essential Services Maintenance Ordinance, promulgated on Aug. 7 on the eve of the threatened strike of postal and telegraph workers and other Central Government employees. The President's decision was taken on the Government's advice, following the cancellation of the strike call by the unions concerned.—(The Hindu, Madras) **(15715 C.)**

A. UNITED KINGDOM. — Appointment of Committee of Inquiry into "Telephone-tapping." - Parliamentary Statements. - Disbarment of Mr. P. A. Marrinan.

It was announced on June 28 that, following consultations with the Leader of the Opposition (Mr. Gaitskell) and the Leader of the Liberal Party (Mr. Grimond), the Prime Minister had appointed a committee of three Privy Councillors to hold an immediate inquiry into the Home Secretary's powers to authorize the interception of telephone and postal communications. The three Privy Councillors were: Sir Norman Birkett (chairman), a former Lord Justice of Appeal; Lord Monckton, formerly Minister of Labour and National Service, Minister of Defence, and Paymaster-General; and Mr. Patrick Gordon-Walker, M.P. (Labour), a former Secretary of State for Commonwealth Relations. The committee's terms of reference were:

"To consider and report upon the exercise by the Secretary of State of the executive power to intercept communications and, in particular, under what authority, to what extent, and for what purposes this power has been exercised and to what use information so obtained has been put; and to recommend whether, how, and subject to what safeguards, this power should be exercised and in what circumstances information obtained by such means should properly be used or disclosed."

The appointment of the committee followed a number of parliamentary questions on the subject of "telephone-tapping." On June 6 Lt.-Col. Lipton (Lab.) had asked the Home Secretary (Mr. Butler) in what circumstances he had authorized the police to supply the Bar Council, in connexion with a disciplinary matter affecting a barrister, with transcripts of intercepted telephone conversations in the London area.

Mr. Butler stated in reply that "the material in question was obtained under the authority of a warrant of the Secretary of State and related to the case of a notorious and self-confessed criminal. It was disclosed to the Bar Council in response to a request from the Council for assistance in inquiries which they were making into complaints about the professional conduct of a particular barrister." In reply to a further question, Mr. Butler said that since "it is of the highest importance that persons concerned in the administration of justice should not be associated with criminals in their criminal activities . . . it was thought right to assist the Bar Council in their investigation of allegations of this nature."

In a further statement on June 7, Mr. Butler said that the prerogative power to intercept telephone communications could be used only by the personal authority of the Home Secretary and was, in fact, used solely in cases involving the security of the State or for the purpose of detecting serious crime. Noting that it was a settled principle not to disclose information gained in this way to "persons outside the public service," he assured the House that the case under discussion, with its "wholly exceptional" circumstances, would not be treated as a precedent.

In reply to a question by Mr. Gaitskell, Mr. Butler disclosed that it was not he (as had hitherto been generally assumed), but his predecessor, Lord Tenby (then Major Lloyd-George), who had taken the decision to pass on transcripts of intercepted conversations to the Bar Council. Mr. Butler also emphasized that "there is no question of using this power [to authorize interception] to obtain information about what passes between lawyer and instructing solicitor or from a member of the legal profession to his client."

In the course of the exchanges, Lt.-Colonel Lipton stated that he was at liberty to reveal that the barrister concerned in the case was Mr. P. A. Marrinan.

Further information on the matter was given in the following statement issued by the Bar Council on the same day (June 7):

"Statements have appeared in the newspapers suggesting that the Bar Council requested the Home Secretary to tap telephone lines of a barrister in connexion with disciplinary proceedings. This statement is totally untrue. Complaints were received by the Bar Council from the Attorney-General in regard to the conduct of a particular barrister and these were of a nature which suggested that the police might have relevant information. The Home Office were asked whether there was in fact any such information which could be made available to the Bar Council in connexion with their inquiries. The Home Secretary then made available a record of certain telephone conversations taken long before any intervention by the Bar Council and relating not to the telephone line of any barrister but to that of a person described by the Home Secretary as a self-confessed criminal. No question of disclosing conversations covered by legal privilege appeared to arise."

On June 8 the Attorney-General (Sir Reginald Manningham-Buller) issued a statement concerning his personal role in the case, as follows:

"When I referred certain matters relating to the conduct of a particular barrister to the Bar Council for investigation, I had no knowledge, and no reason to suppose, that any telephone conversations of his had been intercepted. Indeed, the first I knew of any such intercepts was when I saw Mr. Lipton's question on the Order Paper. I did not ask the Home Office to make such intercepts available to the Bar Council, nor did I know of any request that that should be done. The suggestion that I gave a 'tip-off' to the Bar Council, as the result of which the recordings were supplied, is wholly without foundation."

No new developments took place until June 25, when Parliament resumed after the Whitsun recess. On that date the Prime Minister stated in a written reply that he and Mr. Butler would like to confer with Mr. Gaitskell and Mr. Grimond "with a view to considering how certain aspects of this matter could best be handled in future."

Replying on June 27 to a series of questions, Mr. Butler provided further information both on the general position as regards "telephone-tapping" and on the Marrinan case in particular. The Home Secretary said:

"Interception is carried out not by the police, but by the Post Office acting on the authority of a warrant of a Secretary of State addressed to the Postmaster-General. The police and the Post Office are well aware that this authority is required; and I am informed that if a Post Office servant intercepts a telephone line and discloses the information obtained, contrary to his duty, he commits an offence.

"The Secretary of State considers each application to intercept a telephone line individually; permission is not given in relation to categories of offences or in relation to all offences of a given description. Each application is considered in relation to the circumstances of the particular case. No list of categories of offences can therefore be given."

On the subject of the Marrinan case Mr. Butler said:

"On Oct. 26, 1956, the Attorney-General, as head of the Bar, referred to the Bar Council a complaint of alleged unprofessional conduct by Mr. Marrinan in a matter about which evidence had been given in a trial at the Central Criminal Court.

"The secretary of the Council asked the police whether any further information was available about Mr. Marrinan's conduct. The only further information in the possession of the police was information obtained in June and July, 1956, as the result of an interception of the telephone line not of the barrister but of a Mr. Hill.

"The Secretary of State authorized disclosure of this information to the chairman of the Bar Council [Sir Hartley Shawcross, M.P.], who subsequently asked that he might have a copy of it, and for permission to disclose its existence to the Bar Council, to the Benchers of Mr. Marrinan's Inn, and to Mr. Marrinan, so that, if necessary, it might be used in connexion with any investigation into the conduct of Mr. Marrinan. This permission was given."

In accordance with the Prime Minister's proposal, two meetings were held (on June 27 and 28) between Mr. Macmillan and Mr. Butler on the one hand and Mr. Gaitskell and Mr. Grimond on the other. The outcome of the discussions was the decision to appoint a committee of inquiry into all aspects of the Home Secretary's prerogative with respect to "telephone-tapping."

Disbarment of Mr. Marrinan.

On June 27-29 the Benchers of Lincoln's Inn met as a disciplinary body under the chairmanship of Mr. Justice Roxburgh (Treasurer of the Inn) to consider the following charges against Mr. P. A. Marrinan:

(1) That he, "in a manner unbecoming a gentleman and a barrister," had associated with "persons of bad and disreputable character with criminal records"; (2) that he had done so in order to obtain professional work; (3) that in June, 1956, in Dublin, he had given legal assistance to two persons without being instructed by a solicitor; and (4) that at the Bridewell prison in that city he had attempted to help the two persons in question to evade rearrest.

In the course of the hearing, Mr. M. Griffith-Jones, who presented the case against Mr. Marrinan, made considerable use of transcripts of intercepted telephone conversations allegedly demonstrating that Mr. Marrinan was on terms of familiarity with Mr. Billy Hill [the "notorious and self-confessed criminal" referred to in Mr. Butler's initial statement.] Mr. Marrinan denied, however, that he had ever had any social contact with Mr. Hill or his associates. He also denied the charges under (3) and (4) above, maintaining, as regards the former, that he had gone to Dublin merely to give evidence and had in no way been acting for anyone.

Announcing the Bencher's conclusions on July 3, Mr. Justice Roxburgh said that while they had disregarded the charge under (4) above in view of the lack of any conclusive evidence, they had nevertheless been wholly satisfied as to the validity of the first two charges and of three of the four sub-sections of the third charge, and had accordingly concluded that Mr. Marrinan should be disbarred.

Mr. Marrinan's solicitors announced on July 4 that they would appeal against the decision. Appeal from a decision of the Benchers of an Inn of Court disbarring a barrister lies to the Lord Chancellor and the Judges of the High Court sitting as a domestic tribunal.—(Times - Daily Telegraph - Manchester Guardian)

A. UNITED NATIONS. — Special Session on Hungary. - Approval of U.N. Report on Hungarian Revolution. - General Assembly's Condemnation of Soviet Union and Kadar Regime.

Prior to the opening of the 12th session of the General Assembly on Sept. 15, the Assembly met in special session from Sept. 10-14 to debate the report of the U.N. Special Committee on Hungary (see 15621 A), which had been published in June. The U.N. Committee had been set up under the resolution of Jan. 10, 1957, adopted during the Assembly's 11th session (see page 15407, first paragraph), and the special session of Sept. 10-14 was convened by the Assembly's president (Prince Wan Waithayakon, of Siam) in view of the "pressing need" to consider the Committee's report before the opening of the 12th session.

After a five-day debate, the Assembly adopted on Sept. 14 by an overwhelming majority a 37-nation resolution which endorsed the report of the U.N. Committee and confirmed (*a*) that the Soviet Union, "in violation of the U.N. Charter, has deprived Hungary of its liberty and political independence and the Hungarian people of the exercise of their fundamental human rights"; and (*b*) that "the present Hungarian regime has been imposed on the Hungarian people by the armed intervention of the U.S.S.R." The resolution requested Prince Wan, as president of the 11th session of the Assembly, to take "such steps as he deems appropriate" to secure compliance with the U.N. resolutions on Hungary.

The resolution was adopted by 60 votes against 10 (the Communist countries, including Yugoslavia), with 10 abstentions—Afghanistan, Ceylon, Egypt, Finland, India, Indonesia, Nepal, Saudi Arabia, Syria, and Yemen—and South Africa absent. Its text was as follows:

"The General Assembly—

"Recalling its resolution of Jan. 10, 1957, establishing a Special Committee [on Hungary];

"Having now received the unanimous report of the Special Committee;

"Regretting that the U.S.S.R. and the present authorities in Hungary have failed to co-operate in any way with the Special Committee;

(1) Expresses its appreciation to the Special Committee for its work;

(2) Endorses the report of the Special Committee;

(3) Notes the conclusion of the Special Committee that the events which took place in Hungary in October and November, 1956, constituted a spontaneous national uprising;

(4) Finds that the conclusions reached by the Special Committee on the basis of its examination of all available evidence confirm that:

(*a*) The U.S.S.R., in violation of the U.N. Charter, has deprived Hungary of its liberty and political independence and the Hungarian people of the exercise of their fundamental human rights;

(*b*) The present Hungarian regime has been imposed on the Hungarian people by the armed intervention of the U.S.S.R.;

(*c*) The U.S.S.R. has carried out mass deportations of Hungarian citizens;

(*d*) The U.S.S.R. has violated its obligations under the Geneva Conventions of 1949;

(*e*) The present authorities in Hungary have violated the human rights and freedoms guaranteed by the Treaty of Peace with Hungary;

(5) Condemns these acts and the continued defiance of the resolutions of the General Assembly;

(6) Reiterates its concern at the continuing plight of the Hungarian people;

(7) Considers that further efforts must be made to achieve the objectives of the United Nations in regard to Hungary, in accordance with the purposes and principles of the Charter and the resolutions of the General Assembly;

(8) Calls upon the U.S.S.R. and the present authorities in Hungary . . . to desist from repressive measures against the Hungarian people; to respect the libety and political independence of Hungary and the Hungarian people's enjoyment of fundamental human rights and freedoms; and to ensure the return to Hungary of those Hungarian citizens who have been deported to the U.S.S.R.;

(9) Requests the President of the 11th session of the General Assembly, H.R.H. Prince Wan Waithayakon, to take such steps as he deems appropriate . . . to achieve the objectives of the United Nations in accordance with the resolutions of the General Assembly, to consult as appropriate with the Special Committee, and to report and make recommendations as he may deem advisable to the General Assembly;

(10) Decides to place the Hungarian item on the provisional agenda of the 12th session of the General Assembly."

The resolution was sponsored jointly by the United States, Great Britain, France, Belgium, Canada, Nationalist China, Iceland, the Irish Republic, Italy, Liberia, Luxemburg, the Netherlands, New Zealand, Norway, Pakistan, the Philippines, Portugal, Spain, Turkey, and a number of Latin American countries, including Argentina, Bolivia, Brazil, Chile, Colombia, Cuba, Guatemala, Peru, and Venezuela.

The Assembly Debate.

In opening the special session, Prince Wan emphasized that "the problem of Hungary is the problem of humanity." The principal speakers in the debate were Mr. Keith Shann (Australia), *rapporteur* of the U.N. Special Committee on Hungary, Mr. Cabot Lodge (U.S.A.), Mr. Frank Aiken (Irish Republic), M. Sobolev (U.S.S.R.), Commander Noble (Great Britain) and Mr. Arthur Lall (India). Extracts are given below.

Mr. Keith Shann stressed that all five members of the Special Committee on Hungary were in full and unanimous agreement, and expressed his conviction that the Committee's report would "stand the test of future investigation." Imputations [by the Soviet and Hungarian Governments] that the Committee had taken instructions from any source whatsoever were "an insult to men who approached their task with an attitude sincerely judicial and fair-minded." After speaking of the Committee's abortive efforts to secure co-operation from the Hungarian authorities, Mr. Shann said that "one can well understand the embarrassment which the Governments concerned now experience when confronted with the unanimous report of the Committee." He emphasized that all witnesses interrogated had participated in the events described in the report; that the evidence of witnesses had been carefully checked against others in places geographically far apart; and that the report was entirely factual and in no way based on hearsay or conjecture.

Mr. Shann continued: "What, in outline, were the facts which the committee found? They were—that the Soviet Union intervened with force in the internal affairs of Hungary to suppress a popular national uprising of the people against a form of government which they detested; that this uprising was not inspired or assisted from outside Hungary; and that the Government installed by Soviet armed might did not have the support of the Hungarian people, and had only been able to remain in power through the use of an apparatus of foreign force and internal repression.

"The methods of the secret police before and since the Hungarian revolution to maintain in power a Government without real popular support were viewed unanimously by the Committee with horror and scorn.

"There is no doubt what the real wishes of the Hungarian people would be if they had the freedom to express them. They do not wish to return to the past, to the days of the big landlords. The Committee found noteworthy unanimity among the witnesses on this point. They want a free society, with free political parties, a free press, and government by popular will. They want to be able to express themselves freely in political and intellectual fields, and not to be forced into the monotonous mould of dreary, one-party dogma. They want to live in peace and harmony with all nations of the world, and, by no means least, in friendly relationship with the Soviet Union. They entertain no feelings of enmity to the people in neighbouring countries. Their hostility is directed against the system of repressive government under which they have been forced to live, and what that system means—the loss of human rights domestically and the status of a colony in international affairs."

Mr. Cabot Lodge, who presented the resolution, listed eight promises which the Kadar regime had made but had never carried out: (1) to secure the withdrawal of Soviet troops from Hungary; (2) to abstain from reprisals against the freedom fighters; (3) to restore a multi-party system; (4) to hold free elections; (5) to uphold the right to strike; (6) to end the Soviet exploitation of Hungary, (7) to guarantee freedom for writers and artists; and (8) to guarantee freedom of religion. As regards (1) he said that a conservative estimate by the U.S. Government placed the present number of Soviet troops in Hungary, excluding air contingents, at 68,000, compared with only 25,000 before the revolution.

In an apparent attempt to anticipate objections from "neutralist" nations [e.g. India—see below], Mr. Lodge declared: "If we are to uphold the basic principles of the Charter we can do no less than to condemn these evil actions. There is nothing destructive about condemning evil. We do not condemn the doer but the deed. We approach the doer in a spirit of constructive hope. If our concern is genuine, it must take the form of action. It is not enough to accept the truth if we are too tired, preoccupied, or timid to act upon it. The Soviet Union has shown a great resistance to the voice of world opinion on this matter. But we cannot believe that it will be forever deaf to the voice of its own manifest interest, which is to act in harmony with the conscience of the world."

Mr. Frank Aiken made a strong indictment of the Communist system, denounced the suppression of the Hungarian people, and spoke in support of the resolution, whose sponsors included the Irish Republic. At the same time he urged the Assembly to "make every effort to discover whether it is possible to reach agreement on a fair and reasonable drawing back of the non-national forces on both sides from the border of Russian-occupied Europe," since such a withdrawal would "not only relieve the situation of the countries of Eastern Europe but give time and opportunity for a fresh search for peace based on law and justice."

Mr. Aiken said in this connexion: "To avoid prolonged negotiations and the great emotional difficulty of deciding what country must be evacuated in exchange for what other, we suggest that the drawing back should take place along longitudinal lines from either side of the border for an equal number of kilometres. In other words, for every step Russian troops took to the east, American

troops would take a step westwards. This drawing-back might be, for example, a few hundred kilometres in the first stage. A second phase might be a further reciprocal drawing-back, taking Russian troops out of Hungary and the other captive nations west of the Russian border established at Yalta and Potsdam."

M. Sobolev reiterated the Soviet Government's allegation that the Western countries were using the forum of the U.N. "for gross interference in Hungary's domestic affairs and for whipping-up the cold war in order to divert attention from their acts of aggression against many peoples." Describing the U.N. Special Committee on Hungary as an "illegal" body, and its report as "lies," "slander," and "a fabrication from beginning to end," he characterized the Committee as "a receiving centre . . . for collecting political gossip and slander dumped into it by the enemies of the Hungarian people and of other socialist countries." After a bitter attack on the Western Powers, during which he said that the "counter-revolutionary revolt in Hungary" was intended "to divert attention from British, French and Israeli aggression against Egypt," M. Sobolev said that the Soviet Union's "fraternal assistance" to Hungary had "prevented the threat of a fascist dictatorship in which thousands of the best sons and daughters of the Hungarian people would have perished." The Soviet delegate described the resolution before the Assembly as an "unceremonious contravention of the Charter," a "gross interference in Hungary's internal affairs," and "an attempt to use the U.N. as a tool of American foreign policy." In the course of his speech M. Sobolev denounced M. Imre Nagy as "a traitor to the interests of the Hungarian people" and "an accomplice of counter-revolutionary gangs."

[Speeches in similar terms were made by the Hungarian delegate, M. Mod, and by the delegates of Bulgaria, Rumania and other Communist countries.]

Commander Noble expressed the British people's abhorrence of the "brutal repression" in Hungary, and said that H.M. Government unreservedly accepted the findings of the U.N. Special Committee. A cursory glance at those findings was sufficient to explain why the Soviet Government and "its Hungarian puppets" had gone "to such absurd lengths to discredit them," since the findings were not only a condemnation of the Soviet-dominated regime in Hungary but "a damning commentary on a system of government which . . . has degenerated over the years into a ruthless dictatorship exercised by a small ruling clique."

Speaking of the "continuing and growing reign of terror" to which the Hungarian people were being subjected by the Kadar regime, Commander Noble said that by the end of May it was estimated that some 20,000 political prisoners were in prison or concentration camps under appalling conditions. Most of those arrested had not been brought to trial, and those who were tried could expect only a travesty of justice. By mid-July the number of death sentences admitted by the Kadar regime was 104, but the International Commission of Jurists believed there had been over 2,000 executions. Freedom of assembly was denied; the Press and radio were a Communist monopoly; the right to strike, at first acknowledged by M. Kadar, had been made a capital crime; and freedom of religious instruction, though allowed for a time after the revolution, had since been severely restricted again.

Challenging the view expressed by "some well-meaning people" that futher discussion of the Hungarian question could only lead to bitterness and diminish the prospect of an improvement in international relations, particularly with regard to disarmament, Commander Noble said that acceptance of this view would be "the worst possible service" to the U.N. and all it stood for. He added: "It would amount to recognition that, if a Great Power brazenly ignores world opinion and U.N. resolutions, it is pointless even to condemn its actions. If this precedent were set, a premium would be placed on defying U.N. resolutions in the knowledge that such defiance would give impunity not only to international action, but even to international censure. I do not see how the prestige and respect of the United Nations could survive."

Mr. Arthur Lall said that India's attitude to the Hungarian problem in the U.N. was the same as in the case of the Anglo-French intervention in Egypt--namely, "to avoid, as a negative approach to the situation, any condemnation of those who had acted in clear violation of the Charter." In the cases of both Egypt and Hungary, this attitude had been adopted "not because we were in doubt about what had occurred, but because of our firm conviction that it might have been detrimental to the situation to let indignation dictate the Assembly approaches . . . and . . . to allow unfriendliness to manifest itself."

Although India had "no desire to comment" on the report of the U.N. Special Committee (Mr. Lall continued), "we have always considered that the method of this inquiry, the circumstances in which it was constituted, and, consequently, its inevitably limited scope, would make it unfruitful in terms of the objectives of the Assembly. The overriding consideration . . . must be . . . the meeting of the national aspirations of the Hungarian people. This much is common ground between all of us . . . Both in the interests of Hungary itself and in the larger interests involved, we must turn away from the course of condemnation."

After stressing that India's approach to the problem "does not in the least mean that we in any sense approve of what has taken place in Hungary," Mr. Lall added: "We viewed those events as a tragedy, and our deep concern has been expressed by Mr. Nehru and by the Indian delegation in this Assembly at previous meetings. We are committed to a policy of national freedom to the withdrawal of all foreign troops, to non-intervention, to preserving the full sovereignty of the members of the U.N. and other States, and to full and responsible exercise of human rights."

Reiterating that India was "opposed to the presence of foreign troops whether in Hungary or anywhere else in the world," Mr. Lall warmly supported Mr. Aiken's proposal for the reciprocal withdrawal of Soviet and American forces in Europe. The Irish suggestion, "timely and most relevant," would "undoubtedly be better calculated to achieve the results which the people of Hungary desire" than the resolution before the Assembly.

Before the resolution was adopted by the above-mentioned majority, the Assembly rejected two Burmese amendments aimed (i) at substituting the word "deplores" for "condemns" in the fifth clause of the 37-nation resolution; and (ii) at deleting the provision that Prince Wan should "consult as appropriate" with the U.N. Special Committee on Hungary. The first amendment was defeated by 45 votes to 2 (with 30 abstentions) and the second by 42 votes to 3 (with 32 abstentions).

Although the Ceylonese representative on the U.N. Special Committee (Mr. Gunewardene, Ceylon's permanent representative at the U.N.) had signed the Committee's unanimous report and fully endorsed its findings, he found himself in the anomalous position of having to abstain from voting on the 37-nation resolution on the instructions of his Government. Mr. Gunewardene's signature to the report had been strongly criticized by Communist and Left-wing opinion in Ceylon, and the Ceylonese Government had recently expressed its dissatisfaction with the report as being based on "one-sided" evidence and had instructed Mr. Gunewardene to abstain from voting.

In a statement in Colombo on June 23, soon after the report was issued, Mr. Gunewardene strongly repudiated Soviet allegations—made in *Pravda* and other Russian newspapers, and by Moscow Radio—that the report was "a forgery fabricated in the lobbies of the U.S. State Department" and that pressure had been exerted on the U.N. Special Committee by the State Department and Mr. Cabot Lodge. Mr. Gunewardene described the Soviet charges as "libellous," "fantastic," and an insult to the United Nations, stressing that "neither the State Department nor Mr. Lodge had any access to the Committee and certainly not to me." He emphasized that the report was a truthful, sober and factual account of the events in Hungary and that it had been signed unreservedly by all five members of the U.N. Committee.

Replying on July 7 to critics who maintained that he should not have signed the U.N. report because of Ceylon's friendly relations with the U.S.S.R., Mr. Gunewardene said: "Local Communists say I am an American stooge. What else can they say? They have to support the mother country. They feel that the United Nations' report has damned Russia, and naturally they damn me."

Prince Wan refused Entry into Hungary.

The Kadar regime, like the Soviet Government, had bitterly attacked the U.N. report on Hungary as an "arbitrary grouping of events," "concealment of facts," and "false accusations by biased witnesses." After the adoption of the U.N. resolution, the Hungarian Foreign Ministry announced that Prince Wan would be refused entry to Hungary if he tried to visit the country in connexion with the U.N. resolution, since a visit for such a purpose would constitute "an unwarrantable interference in the country's internal affairs." It was added, however, that Prince Wan, Dr. Hammarskjöld, or any other distinguished personality in international life would be free to make a private visit to Hungary at a time convenient to themselves and to the Hungarian Government.

In a televised interview on Sept. 14, Prince Wan said he would do his utmost to carry out the task entrusted to him, and would begin his mission by conferring with the Hungarian and Soviet delegations at the United Nations. He emphasized, however, that "if I am to do anything I would have to go and negotiate with the Governments themselves."—(U.N. Information Centre, London - New York Times - Times - Daily Telegraph - Manchester Guardian - Indian High Commissioner's Office, London) **(Prev. rep. U.N. Report on Hungary, 15621 A; U.N. Resolutions, 15405 A; Hungarian Internal Situation, 15661 A.)**

A. CYPRUS. — Further Relaxation of Emergency Regulations. - Restrictions on Death Penalty.

The Governor of Cyprus (Field-Marshal Sir John Harding) amended the emergency regulations on Sept. 11 so that (1) persons convicted of discharging firearms or throwing bombs would no longer be liable to the death penalty (hitherto mandatory for these offences) but might be sentenced to imprisonment for life or a lesser period at the discretion of the courts; (2) the maximum penalty for carrying bombs or firearms would no longer be death but life imprisonment. (Times - Daily Telegraph) **(Prev. rep. 15701 A.)**

A. UNITED KINGDOM. — Increases in Postal, Telephone, and Overseas Telegram Charges.

New postal rates to come into force on Oct. 1 were announced by the Postmaster-General (Mr. Marples) on July 19. They included an increase in the basic rate for inland letters from 2½d. for two oz. to 3d. for one oz. Higher charges would also be introduced for inland and foreign postcards, overseas letters and telegrams, newspapers and other printed papers, and parcels, whilst there would be increases in certain telephone rentals and charges, foreign registration fees, and poundage rates on postal orders and foreign money orders. The changes, designed to raise Post Office revenue by about £42,000,000 a year, are summarized below:

	Old Rate	*New Rate*
Mail:		
Inland Letters* ..	2½d. for two ounces, then 1½d. for two ounces.	3d. for one ounce, 4½d. for two oz., then 1½d. for each two ounces.
Inland Postcards*	2d.	2½d.
Printed Papers* ..	2d. for four ounces, then 1d. for each two ounces.	2d. for two ounces, 4d. for four oz., then 1d. for each two ounces.
Parcels	From 1s. 4d. for 2 lb. to 3s. for 11 lb.	3 lb., 1s. 9d.; 4 lb. 2s.; 5 lb., 2s.3d; 6 lb., 2s. 6d.; 7 lb., 2s. 9d.; 8 lb., 3s.; 11 lb., 3s. 3d.; 15 lb., 3s. 6d.*
Newspapers* ..	2d. for six ounces, then 1d. for each six ounces.	2½d. for six ounces, then 1½d. for each six ounces.
Foreign Letters ..	4d. for one ounce, then 2½d. per oz.	6d. for one ounce, then 4d. per oz.
Foreign Postcards ..	2½d.	4d.
Foreign registration	6d.	1s. 0d.

*Also for Irish Republic.

In future, mail to the U.S.A., Egypt, Burma, Israel, and Jordan would pay foreign postage.

Charges for oversea printed papers and small packets would also be increased, the former from 1½d. for 2 oz. and ½d. for each additional 2 oz. to 2d. and 1d. respectively.

Remittance Services:
Poundage on Postal Orders up to 6s. 0d. to be increased.
Poundage on Foreign Money Orders to be increased.

Telegrams:
Home no change, Commonwealth ordinary rate raised from 1s. 4d. per word to 1s. 10d. per word. Other overseas charges up 40 per cent.

Telephone Rentals: *Old Rate*	*New Rate*
Business: London, £12 0s.; Big Cities, £11 10s.; Provinces, £11 0s. £1 10s. reduction for shared line.	All £14; £2 reduction for shared line.
Private: London, £10 0s.; Big Cities, £9 10s.; Provinces, £9. £1 10s. reduction for shared line.	All £12; £2 reduction for shared line.

Other Telephone:
Subscribers lose the allowance of free calls. Subscribers' local calls basic charge up from 2½d. to 3d. Substantial additional charges for Private Branch Exchanges. Subscribers' and call box short distance local and trunk calls increased.

Mr. Marples explained that the increases were expected to raise £23,000,000 from postal service and £19,000,000 from telecommunications, whilst new economies would be made within the postal service aggregating £3,000,000 a year. Eleven-twelfths of the total would be required to cover wage increases resulting from the decision to bring Post Office jobs into line with jobs in outside industry. He added that the Government had three alternatives: (*a*) to let the burden fall on the taxpayer; (*b*) to reduce services drastically; (*c*) to increase charges. They were unwilling either to pass the burden to the Exchequer or to damage the services which the Post Office provided for the community, and were therefore forced to raise charges. The higher tariffs represented about 11 per cent of Post Office income.

Replying to questions, Mr. Marples said that the basic rate for inland postage had been fixed at 2½d. in 1940, when postmen's basic wages were £3. 3s. a week, whereas they were now £9 17s. Taking the increases into account, inland post in Britain would still be cheaper than in any European country except Spain and Portugal, whilst the overseas rate, with few exceptions, would still be cheaper than in the rest of the world. Given reasonable stability in wage levels, no further general increases in Post Office charges were likely up to March 1959.

C. UNITED STATES. — President Eisenhower's Call for Voluntary Reduction of Oil Imports in 1957.

Acting on a Cabinet committee report which said that increasing oil imports threatened U.S. national security, President Eisenhower issued a statement on July 29 calling for a voluntary reduction of such imports by approximately 20 per cent during 1957.

The Cabinet committee report had warned the President that continued unrestricted imports in growing volume threatened the future of the domestic oil industry, and with it the national security of the United States. If imports were not checked the domestic oil industry would have no assurance of an adequate market for the product of new domestic oil discoveries, and in consequence would reduce its exploratory operations; continued exploration of new oil resources and maintenance of reserves was, however, essential to national security. The report also stressed the threat which might arise if a war or other emergency denied the U.S.A. access to foreign oil.

Recognizing that there were "important foreign policy aspects to the problem of limiting petroleum imports," the report stated: "The oil reserves and production capacities of other free nations, as well as our own, are important to our national security. A number of countries inevitably depend in varying degree upon access to our domestic market for their petroleum exports, and it must be recognized that it is also in the interest of our national security that our allies and friends have healthy and expanding economies. It is believed, however, that taking all factors into consideration, our national security requires the maintenance of some reasonable balance between imports and domestic production at this time. In the light of the foregoing considerations, our recommendations are framed with the objective of limiting imports in order to maintain such a balance and yet allow to other nations to participate in the growth of our domestic demand to a degree consistent with our national security."

The report recommended a 10 per cent cut on the basis of the average oil imports by the large oil companies during 1954, 1955, and 1956; this, however, represented a reduction of over 20 per cent on the import programmes submitted by the companies for the second half of 1957.

It was recommended by the committee that these restrictions should be voluntary but that, if they failed, the President should (*a*) rule that a threat to the national security existed; (*b*) invoke the powers available to him under the Trade Agreements Extension Act of 1955; and (*c*) impose mandatory quotas. Restrictions on imports to the Pacific coast were not regarded as necessary, at least for the first half of 1957, since that area was still not self-sufficient in its own oil production. The report also recommended that the plan should be reviewed annually with the aim of maintaining a ratio between imports and domestic production of approximately 12 per cent in all areas outside the Pacific coast.

The Secretary of the Interior (Mr. Seaton), said that no deadline had been fixed for the voluntary restrictions and that it would be "several months" before their success could be determined. He made it clear, however, that the companies had no alternative but to comply, and added that the programme had the approval of the Attorney-General (Mr. Brownell jr.), since it did not violate the anti-trust laws.

The members of the committee, in addition to Mr. Seaton, were Mr. Dulles (Secretary of State), Mr. Weeks (Secretary of Commerce), Mr. Quarles (Deputy Secretary of Defence), Mr. Humphrey (then Secretary of the Treasury), and Mr. O'Connell (Under-Secretary of Labour).

The principal oil companies affected by the cut in oil imports were the Atlantic Oil Co., Gulf Oil Co., Sinclair Oil Co., Socony Vacuum Oil, Standard Oil of California, Standard Oil of New Jersey, and the Texas Company.—(New York Times)

D. SHIPPING. — International Convention on Prevention of Pollution of the Sea by Oil in Force in 1958.

The British Ministry of Transport and Civil Aviation announced on Sept. 19 that the requisite 10 countries having now ratified the International Convention for the Prevention of the Pollution of the Sea by Oil drawn up in London in 1954, including the necessary five countries with tanker fleets of at least 500,000 gross tons each, the Convention would come into force on July 26, 1958.

The countries which had ratified were: Britain, Denmark, France, Norway, Sweden (all having tanker fleets of over 500,000 gross tons each), Belgium, Canada, the Irish Republic, Mexico and Western Germany. Between them these countries controlled about 45,000,000 gross tons of shipping, or about one-half of the world total, disregarding the U.S. reserve fleet.

The leading maritime countries still outside the Convention, with the sizes of their respective fleets in gross tons, were the U.S.A. (12,000,000), Liberia (5,500,000), and Italy, Japan and Panama (about 4,000,000 each). The Netherlands, also with about 4,000,000 gross tons, was expected to ratify shortly.
(Lloyd's List and Shipping Gazette) **(Prev. rep. 13598 C.)**

A. UNITED NATIONS. — International Atomic Energy Agency comes into Existence.

The International Atomic Energy Agency came officially into existence on July 29, 1957, by which date its Statute had been ratified by all five major "atomic" Powers (i.e. the U.S.A., United Kingdom, U.S.S.R., France and Canada) and 22 other countries.

The Statute of the I.A.E.A. (see 15261 A) was to enter into force when instruments of ratification had been deposited by 18 countries, including at least three of the five "atomic" Powers. The U.S.A., the United Kingdom, France and Canada all deposited such instruments on July 29, together with Australia and Brazil, whilst the U.S.S.R., which had ratified the Statute on Feb. 12, had deposited its instrument of ratification on April 8.

The following 27 countries, all of which had deposited instruments of ratification, were members of the Agency when it came into official existence on July 29: Afghanistan, Australia, Austria, Brazil, Byelorussia, Canada, Czechoslovakia, Denmark, Dominican Republic, France, Guatemala, Honduras, India, Israel, Japan, Netherlands, Norway, Pakistan, Portugal, Rumania, South Africa, Sweden, Switzerland, Turkey, U.S.S.R., United Kingdom, and United States.

U.S. membership of the Agency had been approved by the Senate on June 18 by 67 votes to 19, after an unsuccessful attempt by Senator Bricker (Republican, Ohio) to insert a "reservation" which would have specified that the U.S.A. could not make any nuclear fuels and materials available to the Agency except as authorized by Congress.

The "Bricker reservation," which was strongly opposed both by the Administration and by Republican leaders, was defeated by 55 votes (31 Democrats and 24 Republicans) to 31 (18 Republicans and 13 Democrats). As stated above, 67 Senators voted for U.S. membership of the Agency (35 Democrats and 32 Republicans) and 19 against (10 Republicans and 9 Democrats), the measure thus receiving far more than the two-thirds majority needed for ratification of international treaties. No action was required by the House of Representatives.

Senator Bricker had argued that a "reservation" such as he proposed was constitutionally necessary to protect Congressional control over the nation's resources and assets. The Administration and the State Department, however, took the position that Congressional control over the supply of nuclear materials to foreign countries was already provided for in the Atomic Energy Act of 1954. Moreover, it was felt that adoption of the "Bricker amendment" would have indicated a lukewarm attitude towards an agency which the U.S.A. had itself been the first to propose, and might thereby have had an adverse effect on the creation of the Agency itself.

The legislation providing for U.S. participation in the International Atomic Energy Agency was signed on July 29 by President Eisenhower, who had first suggested the creation of such an agency in his "atoms-for-peace" speech to the U.N. General Assembly in December 1953.—(U.N. Information Centre, London - New York Times) **(Prev. rep. 15261 A.)**

B. CANADA. — Cabinet Appointments.

The following appointments to the Federal Cabinet were announced on Aug. 7, Aug. 19 and Sept. 13:

Dr. Sidney E. Smith ..	Minister for External Affairs.
Mr. Douglas Harkness ..	Agriculture.
Mr. Paul Comtois	Mines and Technical Surveys.
Mr. Alvin Hamilton ..	Northern Affairs and National Resources.
Mr. J. Waldo Monteith ..	National Health and Welfare.

Dr. Smith (60), president of the University of Toronto, took over the External Affairs portfolio from Mr. Diefenbaker, who had held it concurrently with the Premiership. Born in Cape Breton Island, he served in the First World War, studied law at Dalhousie University and Harvard, and was called to the Nova Scotia Bar in 1921. He was appointed president of the University of Manitoba at the age of 37 and in 1945 became president of Toronto University. Dr. Smith resigned from his academic post on joining the Cabinet.

Mr. Harkness (for biography, see page 15614, first column) relinquished the portfolio of Northern Affairs on becoming Minister of Agriculture, a post to which no appointment was made when Mr. Diefenbaker formed his Cabinet. Mr. Comtois, M.P. for Nicolet-Yamaska (Quebec), had been general manager of the Quebec Farm Credit Bureau for the past 20 years and general manager of the Canadian Farm Credit Bureau from 1946-57. Mr. Hamilton, M.P. for Qu'Appelle (Saskatchewan), succeeded Mr. Harkness as Minister for Northern Affairs and National Resources. Mr. Monteith, the new Minister of National Health and Welfare, is M.P. for Perth (Ontario). The portfolios taken over by Mr. Comtois and Mr. Monteith, like that of Agriculture, were not filled at the time Mr. Diefenbaker formed his Cabinet after the general elections. All the new Ministers are Progressive Conservatives.

It was announced in London on Sept. 15 that the Queen had approved the appointment of Mr. Diefenbaker as a member of the Privy Council.—(Montreal Star - Department of External Affairs, Ottawa - Times) **(Prev. rep. Cabinet, 15613 A.)**

C. SOVIET UNION. — Deportation of "Anti-Social and Parasitic Elements" in Russian Soviet Republic.

A draft law directed against "anti-social and parasitic elements" in the Russian Soviet Republic (RSFSR) was published on Aug. 21 in *Sovietskaya Rossia*, the official newspaper of the RSFSR. It laid down that vagrants, beggars, and persons living on unearned incomes would be liable to banishment for periods of two to five years, and to compulsory labour during the period of deportation, if so decided by "general meetings of citizens."

The preamble said that although unemployment and the "exploitation of man by man" had been abolished in the U.S.S.R., there were nevertheless "people leading an anti-social, parasitic life." It added: "Such people either take up employment for the sake of appearances but actually subsist on unearned income . . . or, though fit for work, do no useful work either in society or in the home but engage in vagrancy and begging, and are often guilty of criminal acts." The law contained the following provisions:

(1) Adult able-bodied citizens who "lead an anti-social, parasitic life and persistently shun socially useful work, as well as those living on unearned incomes," would be liable to expulsion to other parts of the country for terms of two to five years, "with compulsory enlistment in work at the place to which they have been expelled."

The decision as to whether or not such persons should be expelled would be taken by general meetings of citizens. In urban areas such meetings would take the form of street or neighbourhood committees, or of inhabitants of residential buildings with at least 100 adult tenants; while in the countryside they would consist of the adult citizens of the village concerned. To carry out "public verdicts of expulsion" the meetings both in town and countryside would have to be attended by a majority of the adult citizens living in the street, neighbourhood, housing-block or village concerned. Decisions would be taken by simple majority vote.

If the "guilty party" exhibited "sincere repentance" and gave a "firm promise to rectify his conduct," the citizens' meeting could confine itself to issuing a warning to the individual concerned.

(2) Verdicts of expulsion would have to be confirmed by the appropriate local Soviet within three days.

(3) Adult citizens engaged in vagrancy or begging would be subject to expulsion to other parts of the country (if found guilty by citizens' meetings) for terms of two to five years, and would have to do compulsory work at the place to which they were expelled.

(4) Disabled or partly disabled persons who "persistently evade being placed in homes for the disabled and who engage in vagrancy and begging" would be subject to "compulsory residence in closed homes for the disabled."

Similar legislation is in force in other Union Republics, including Uzbekistan.—(Soviet Embassy Press Dept., London)

D. AUSTRALIA. — High Court's Ruling on States' Right to impose Taxation.

By a majority of four to three, the full bench of the High Court of Australia, sitting in Sydney on Aug. 23, declared invalid the provision of the Income Tax Act of 1942 (see 5194 A) whereby the Commonwealth Government acquired priority over State Governments in the collection of income and social service taxes. On the other hand, the Court was unanimous in upholding the validity of the States' Grants (Tax Reimbursement) Act (see 5194 A), under which States received an annual grant as compensation for loss of revenue provided they did not impose their own income tax. [Under the above-mentioned Income Tax Act, the States had retained their right to collect their own income tax. None had ever exercised it, however, since it would have amounted to double taxation.]

The Court's rulings derived from an action initiated four months previously by the Governments of Victoria and New South Wales. In this, the two Governments had challenged the validity of the provisions in question, claiming notably that the Federal Government's reimbursement had been unfairly apportioned in relation both to population and to the revenue derived from the various States. [Under the existing system of uniform taxation, the poorer and less populous States—Queensland, South Australia, Tasmania, and Western Australia—receive a larger share of the national revenue than they would if they had to rely on purely local taxation.]

Commenting upon the High Court's decisions, the Federal Treasurer (Sir Arthur Fadden) said that they did not appear to affect the existing position to any great practical extent. The Prime Minister of Victoria, Mr. Bolte (who was principally responsible for the appeal to the High Court), said that he took the judgment to mean that the Federal Government could not directly prevent or fetter the exercise of State powers and functions. Mr. Bolte added that the action had been brought, not merely in an endeavour to secure the restoration of the States' pre-war taxing powers, but also to arrest what he considered to be the undue growth of bureaucratic control from Canberra.—(Australian News and Information Bureau) **(Prev. rep. 7467 A; 5293 B; 5222 B; 5194 A; 4699 B.)**

SEPTEMBER 28—OCTOBER 5, 1957

A. RHODESIA AND NYASALAND FEDERATION. — Constitution Amendment Bill. - Passage by Federal Assembly. - Increase in Assembly Membership. - African Affairs Board requests Queen's Assent. - Franchise in Southern Rhodesia. - Tredgold Commission's Report. - Electoral Amendment Bill passed by Legislative Assembly. - Federal Government's Franchise Proposals.

The Southern Rhodesian Parliament approved on May 29 a resolution to the effect that it did not object to the introduction in the Federal Parliament of a Bill amending the Federal Constitution by increasing the membership of the Federal Assembly from 35 to 59. Similar resolutions were approved by the Legislative Councils of Northern Rhodesia and Nyasaland on June 18.

In Southern Rhodesia, the resolution was opposed by the two Dominion Party members and by Mr. Jack Keller (Independent Labour), who maintained that the Bill was designed to advance the Africans, that there were no good reasons for the increase in membership, and that this would cost too much.

In Nyasaland, the five African members of the Legislative Council walked out before the vote was taken after having strongly opposed the resolution itself and federation in general; the resolution was eventually adopted by the 11 official and the six European unofficial members.

In Northern Rhodesia, the Dominion Party member (Mr. J. Gaunt) and the three African members present voted against the resolution.

The text of the Constitution Amendment Bill enlarging the membership of the Federal Legislature had previously been published on May 21.

The Bill proposed :

(1) The number of elected members, who might be of any race, would be increased from 26 to 44, of whom 24 would be elected in Southern Rhodesia, 14 in Northern Rhodesia, and 6 in Nyasaland, compared with respectively 14, 8, and 4 at present.

(2) A new group of eight African elected members would be created, of whom four would be elected in Southern Rhodesia, two in Northern Rhodesia, and two in Nyasaland; this group—to be elected by members of all races—would include the two Africans from Southern Rhodesia who are already elected in this manner.

(3) In addition to the eight African elected members, two Africans from each of the Northern Territories would continue to be "specially elected" by African organizations as at present. There would also be—as hitherto—one European specially responsible for African interests from each of the three Territories, chosen on the present system, i.e. in Southern Rhodesia by members of all races, and in Northern Rhodesia and Nyasaland by the respective Governors.

(4) The effect of the Bill would therefore be to increase the number of members specifically concerned with African interests from 9 to 15, but a clause in the Bill provided for the ultimate elimination of members elected on a racial basis, laying down that if and when an African was elected as an "ordinary elected member" (i.e. a member representing an ordinary constituency and chosen by people of all races), then from the next general election the number of "ordinary elected members" for the territory concerned would be increased by one, whilst the number of "specially elected members" for African interests would be reduced accordingly. This reduction would take place seat by seat in the following sequence : first, the "elected African members," then the "specially elected African members" from Northern Rhodesia and Nyasaland, and ultimately the Europeans representing African interests.

(5) Territorial courts would have jurisdiction to adjudicate on questions connected with the registration and de-registration of voters.

The background of the Bill was explained in a memorandum accompanying it by Sir Roy Welensky, the Federal Prime Minister.

The memorandum said that the working of parliamentary democracy in the Federation made it essential to increase the size of the Federal Assembly. At present, of the 35 members only 26 were ordinary elected members divided up between two or more political parties; in consequence it was difficult from such small numbers to provide enough members for Select Committee work. Moreover, some of the constituencies were so large that it was an impossible task for an M.P. to do justice to his constituents.

Commenting on the increase in the number of African members, Sir Roy said that the method of electing the four Africans representing African interests in Northern Rhodesia and Nyasaland was very unsatisfactory, as they had a full vote, just like any other M.P., but were elected by a very small group of Africans, and members of other races had no say whatever in their election. The two Africans representing Southern Rhodesia were elected by voters of all races. "In their election," he continued, "political parties play their normal role, and the result is that these members fit much better into our parliamentary democratic system . . . I believe it is most important that we should have elected African members from all three Territories, elected by members of all races, who belong to the ordinary political parties."

With regard to the provision designed to ensure that, ultimately, representatives of particular races would disappear, the memorandum explained that if eventually 15 Africans could secure election by members of all races on a common roll, then there would be no more members specifically concerned with African interests This would mean the disappearance of the African Affairs Board [the standing committee of Parliament charged with examining all legislation to see that it does not discriminate against Africans]. The memorandum added, however . "By the time the turn to go of the Europeans representing African interests comes along the necessity for an African Affairs Board may be questioned."

The memorandum also said that these amendments to the Constitution would pave the way for a Federal Electoral Bill. In case, however, such a Bill was not passed before a general election became necessary, the Constitution Amendment Bill provided that the Governor-General could make regulations for the conduct of such an election.

The Bill was introduced in the Federal Assembly on June 25 by the Minister of Law, Mr. J. M. Greenfield, who announced that the African Affairs Board had not objected to its introduction. The second reading debate opened on June 26 and ended on July 18, when the Bill was passed by 23 votes to 9. The opposition consisted of the three Dominion Party members (Mr. W. J Field, Mr. G. F. M. van Eeden and Mr. R. W. Williamson), the Independent member for Lusaka (Dr. A. Scott), the two specially appointed European members from Northern Rhodesia and Nyasaland representing African interests (Sir John Moffat and the Rev. A. Doig respectively), and three of the four specially elected Africans from these two Territories (Mr. D. L. Yamba and Mr. M. Kakumbi from Northern Rhodesia and Mr. W. M. Chirwa from Nyasaland).

Opening the debate, Mr. Greenfield said that when compared with Legislatures in other countries it was obvious that the Federation was under-represented. South Africa had 159 M.P.s, Ghana 104, New Zealand 80, Tanganyika 61, including 44 unofficial members, Uganda 60, including 49 unofficial members, and Kenya 56, of whom 47 were unofficials. There was also a disparity between the membership of 35 of the Federal Assembly and those of the three Territorial Legislatures, which together had 78 members (including 30 elected members in Southern Rhodesia), although the scope of Federal jurisdiction was much wider than that of the Territorial competences Moreover, an increase of the Federal Assembly would greatly assist in the proper delimitation of electoral districts, whilst, in addition, with the present membership it might become very difficult to form a Government from 18 members of a party if there was a close result in a general election. The cost of increasing the Assembly's membership would be about £50,000 a year, made up mainly of salaries and allowances.

Replying to the debate, Mr. Greenfield said concern had been expressed at the possibility that African members might be elected by a body including European voters and which might, in fact, be overwhelmingly European. The Federal Party could not accept that this was a matter for concern. It abided by its policy of partnership and felt that members of all races should participate in electing their representatives to Parliament, just as these representatives should regard it as their duty to protect the interests of all races in Parliament.

The Bill passed the Committee stage on July 23 without amendment, the most controversial clause—Clause 2, which set out the composition of the enlarged House—being adopted by 19 votes to 11, with all the five African members present voting against it.

An amendment moved by the Rev. A. Doig, and aimed at making all African members from the Northern Territories specially elected members, was lost by 19 votes to 8. Previously, a motion moved by Sir John Moffat to the effect that the Bill be referred to a Select Committee had been rejected by 25 votes to 8 (the five African members, the Rev. Doig, Sir John Moffat, and Dr. Scott).

The Bill was given a third reading on July 31 by 25 votes to 9, thus obtaining the two-thirds majority required for constitutional amendments. The two African members from Southern Rhodesia, Mr. J. Z. Savanhu and Mr. M. M. Hove, voted for the Bill, but before the division Mr. Savanhu announced that he would resign his seat in the House at once. Those opposing were Sir John Moffat, Messrs. Yamba, Kakumbi and Chirwa, the Rev. Doig, Dr. Scott, and the three Dominion Party members.

During the debate Mr. Savanhu denied emphatically that his decision to vote for the Bill had been taken under pressure, whilst Mr. Hove explained that his earlier objection to the Bill had been met by the Government's indication that it was prepared to consider suggestions for the improvement of the franchise proposals.

Mr. Greenfield stated that Mr. Savanhu and Mr. Hove had made representations to the Government about the manner in which the new African representatives would be elected under the Bill. They had said they thought the income of £180 a year required as a qualification for the special voters' roll was too high to ensure that a reasonable number of Africans would be able to participate in the election of these new African members. In response to this, the Government was disposed to consider minor amendments to its franchise proposals when the relevant Bill was introduced, and it would "not resist an amendment to reduce the qualification from £180 to £150 a year."

Mr. Savanhu said in an interview afterwards that he had resigned his seat in the Federal Assembly because certain sections of his African constituents were opposed to the Bill.

"A politician must be consistent," he said. "An M.P. who has no responsibility to all sections of a multi-racial society has no right to be in the House. I have done my best to get concessions from the Government and I must thank the responsible Minister for agreeing to one of these—the lowering of the qualifications for the special roll. There was a suggestion that I should vote against the Bill and remain in Parliament as an Independent. This I refuse to do because I could not wield any influence with the Government. In the main I feel the Bill is a good one . . . I have adhered to the dictates of my conscience and have supported the Federal Party, my membership of which was endorsed by the All-African Convention, a body representing all African political opinion in Mashonaland, at the time of the last general election. I believe in the party political system. In my view it is the only means by which racial differences can be thrashed out in an atmosphere of cordiality. There must be give and take on both sides. In this case I am convinced that the enlargement of the House would do no harm to the African cause. The harm could come from the franchise—that must be faced when it comes."

It was announced on Aug. 1 by the Speaker of the Federal Parliament (Mr. Wilson) that the African Affairs Board (of which Sir John Moffat is chairman) had requested that the Constitution Amendment Bill be reserved for the assent of the Queen on the grounds that it was a differentiating measure—this being the first time that the Board had invoked its power to ask for a Bill to be reserved by the Governor-General "for signification of Her Majesty's pleasure."

A report giving the Board's reasons for this request said that in the present House, with its 35 members, Africans in Northern Rhodesia and Nyasaland controlled absolutely four African members. Under the Bill they would still control absolutely four members, but in a House of 59, whilst at the same time the number of Africans elected by both races would rise from two to eight and the number of members elected in the normal way by voters overwhelmingly European from 26 to 44. The Board also pointed out that although the two-thirds increase in the membership applied to both the elected members and the members representing Africans or their interests, the important thing in a Parliament was the size of the majority, and the proposed amendment caused a change in the difference in the size of the two groups. Whilst expressing full agreement that racial representation should wither away as rapidly as possible, the Board added that in this process Africans should not suffer any diminution of the powers which they now enjoyed under the Constitution.

The effect of the request of the African Affairs Board was that the Bill had to be sent to the Colonial Secretary, and that it will have to lie in the House of Commons for 40 sitting days together with the Board's report before a decision can be taken by the U.K. Government whether or not the measure shall be consented to and become law.

The Tredgold Commission's Report.

A judicial commission was appointed by the Southern Rhodesian Government on April 19, 1956, to make recommendations on the qualifications required for the franchise and for candidates for the Legislative Assembly. The members of the commission were Sir Robert Tredgold, Chief Justice of the Federation (chairman); Mr. Justice Murray, Chief Justice of Southern Rhodesia; and Sir Charles Cummings, resident director in Salisbury of the British South Africa Company and formerly Chief Justice of the Sudan.

The Commission's report, which was published on March 14, 1957, and is summarized below, recommended a common electoral roll divided into "ordinary" voters with higher income and educational qualifications and "special" voters with lower qualifications, whose votes would be reduced in value if they exceeded one-third of the total votes cast in any constituency.

The Commission accepted the precept that government must remain in the hands of "civilized and responsible persons," and declared that a country was amply justified in endeavouring to confine the franchise to those of its inhabitants who were capable of exercising it with "reason, judgment, and public spirit." The Commission therefore were against backward and illiterate people having the vote and opposed universal adult franchise, saying that there would be a danger of people without judgment exercising the vote and that this would at present place the European minority in the hands of the African majority. The Commission also opposed the system of multiple voting and any form of racial representation, since the interests of the people of the Colony as a whole were more important than any sectional interest. On the other hand, it rejected the suggestion that race or colour could be regarded as a satisfactory test of civilization or responsibility.

No alteration was recommended in the existing citizenship and residence qualifications, i.e. that a voter must be a Southern Rhodesian citizen, over 21, and resident in the Colony for six months and in the electoral district for three months. In place of the existing income and educational qualifications (an income of £20 a month or occupation of property valued at £500, an adequate knowledge of English, and the ability to complete unaided the voter's enrolment form), the Commission recommended as qualifications for ordinary voters either

(a) an income of £60 a month or occupation of property valued at £1,500, plus the existing literacy tests; or

(b) an income of £40 a month or occupation of property valued at £1,000, and a Standard VI education (roughly equivalent to a primary school education); or

(c) an income of £25 a month or occupation of property valued at £500, and a Form IV education (roughly equivalent to General Certificate of Education ordinary level).

For special voters the qualifications would be an income of £15 a month with the existing literacy tests. A married woman without income would be deemed to have the same means as her husband; if a married woman had an income, hers and her husband's would be added together, and the total deemed to be the means of each.

The Commission recommended that all voters on the existing roll should be placed on the new roll, and that delimitation commissions should be directed to delimit constituencies as far as possible to ensure that not more than one-third of the voters in any constituency should have special qualifications.

Any ordinary or special voter would be eligible to stand for election, provided he was not a Government servant, a criminal, or a lunatic.

Ordinary and special votes would count equally in any election, subject to a proviso that when the number of special votes cast in any constituency exceeded more than half the ordinary votes, the number of special votes should be reduced accordingly. For example, if 3,000 votes were cast, comprising 2,000 ordinary and 1,000 special votes, all would count equally in the final count. If, of 3,000 votes in another election, 1,800 were ordinary and 1,200 special votes, the latter could not count more than 900 (i.e. half of the 1,800 ordinary votes), and special votes cast for each candidate would be reduced proportionately, i.e. by one-quarter (1,200 to 900). If 2,000 ordinary and 2,000 special votes were cast, each special vote would be counted as a half-vote (as the total of special votes could not count more than 1,000), whilst if 2,000 ordinary and 3,000 special votes were cast, each special vote would count as only one-third of a vote.

The Commission thought it unlikely, however, that in the first instance, and for some years to come, the special votes would exceed half the ordinary votes in any constituency. As to the possibility of the election of racial candidates on a split vote, the Commission regarded this as unlikely, but suggested that this could be avoided by adopting the single transferable vote, whereby voters indicated their second choice in case no candidate won a clear majority.

"We frankly accept the fact," the report stated, "that for many years to come voters qualifying on ordinary qualification would be principally European and those qualifying on special qualification would be principally African. Nevertheless, the special qualification would give the African immediate and substantial voting power. As each constituency would contain voters of all races, no candidate for Parliament could base his appeal to the electorate on racial grounds without the risk of alienating a body of his constituents and thus jeopardizing his chances of election. For the same reason, no political party could base its appeal on racial grounds without risking the loss of marginal seats. This would have a legitimate and moderating effect on the counsels of all parties. The European section of the electorate would feel itself adequately protected against the possibility that it might be politically overwhelmed by backward and illiterate sections of an African population susceptible to unreasoning appeals to African nationalism. With these fears set at rest, the African would be admitted to a gradually increasing participation in political affairs and would be accustomed to a tradition of parliamentary government under conditions which encouraged co-operation with other races."

The report met with strong criticism, both from the Dominion Party (the Opposition) and a section of the ruling United Rhodesia Party, which maintained that it would lead to a "swamping" of the European voter, and from all sections of Africans. The Commission's proposals, however, were strongly supported by the Prime Minister, Mr. Garfield Todd, in statements both inside and outside Parliament.

During a debate on the report in May, Mr. Stumbles (Minister of Justice) said that the ground would be cut from under the feet of extremists at either end, if the vote could be given to responsible middle-class Africans. Such a middle class of Africans must be created, and many such Africans would now qualify under the "special" category. Referring to the criticism that Africans were being given the vote with one hand and having it taken away with the other, through the limitation of the "special" votes, Mr. Stumbles said that the commissioners thought it reasonable to say to a group of voters that they had reached the stage when they were entitled to some say in the country's affairs, but until they had more education and responsibility they should not assume control. Although the proposal was for a common voters' roll, he added, in practice there might have to be two rolls and two different kinds of ballot papers, to make it possible to separate the ordinary from the special votes.

Mr. Aitken-Cade (Dominion Party) strongly criticized the creation of a class of "special" voters, as this would create a grievance, and in an election the special voters would vote as a bloc for a candidate offering "lowering of standards and integration."

Mr. Todd said that there were three top groups in Southern Rhodesia—outstanding people, local leaders, and responsible and successful people in the professions, industry, and business—who were certainly worthy of a vote. These comprised most Europeans and some Africans, and fell into the Commission's "ordinary qualifications." There was also a bottom group of people who had not emerged from the "dominance of the witch doctor," were illiterate, and did not understand party government or democratic principles. The Commission had focussed attention on the middle or emergent group of Africans—those who were between those undoubtedly worthy of a vote and those certainly unworthy of one. In Southern Rhodesia the biggest group was the bottom one, bigger than the top and middle groups combined. Power must therefore not fall into the hands of the bottom group. There was a further danger—the middle group should not out-number in voting power the top group, or else the future of the country would be prejudiced. The fixing of the income qualification for this group at £15 a month would ensure that Africans who qualified under it would be well past the stage of unskilled labour, and could be regarded as responsible citizens.

In a speech on June 15, Mr. Todd gave warning that he would resign the leadership of the United Rhodesia Party and also the Premiership if Parliament refused to accept the Government's franchise proposals.

After declaring that "we are in danger of becoming a race of fear-ridden neurotics," Mr. Todd continued: "Southern Rhodesia finds itself the custodian of Rhode's liberal dictum of equal rights for civilized men, regardless of colour. If legislation further to implement that policy, when introduced to our House in July, were so changed as to continue to keep off the rolls our 6,000 Africans who have had 10 years' education and who work as teachers, agricultural demonstrators, medical orderlies, and so on, we should be so betraying the spirit of Rhodes that I would not continue to lead my party."

The Southern Rhodesian Electoral Amendment Act.

Details of the Southern Rhodesian Government's proposals for the franchise were published on June 23. These accepted the Tredgold Commission's proposal for the division of the electorate into "ordinary" and "special" voters, but provided for the inclusion in the special voters' category of persons with certain educational standards, irrespective of income. The other main differences from the Commission's proposals were the rejection of the plan for "fractionalization" of special votes, and the substitution of a provision that the number of special voters must not exceed 20 per cent of the number of ordinary voters. The main provisions of the Government's Bill, known as the Electoral Amendment Bill, were as follows:

(1) Persons over 21 holding either Southern Rhodesian or Federal citizenship would be eligible as voters. [Under the terms of the Federal Citizenship Act—see 15766 A—this meant that British immigrants would be able to vote after two years' residence, instead of three as hitherto]. Voters would also be required to have been continuously resident in Southern Rhodesia for six months and in the constituency for three months before registration.

(2) Applicants for registration would be required to complete their claim form unassisted in the presence of a registration officer, and to prove that they could speak, read, write, and comprehend English. [These regulations involved a considerable tightening up of the literacy test.]

(3) The qualifications for ordinary voters would be those recommended in the Tredgold Commission's report.

(4) For special voters the qualifications would be either an income of £20 a month plus the ordinary literacy test, or a Standard VIII education plus two years' continuous employment in the same occupation.

(5) When the number of special voters had reached 20 per cent of the total roll of ordinary voters, the special roll would be permanently closed.

(6) All voters on the existing roll would be enrolled as ordinary voters.

(7) Every married woman, except one married under a system permitting polygamy, would be deemed to have the same means qualification as her husband whenever she did not have the requisite qualification in her own right.

(8) The means qualification must have been held for two years before it entitled to registration. In the computation of income the value of board and lodging or any money received for either or both of these would be included. A formula would be worked out for checking annually the rise and fall in the value of the pound, and the monetary qualifications would be adjusted accordingly.

(9) Only persons qualified as ordinary voters would be eligible to stand for election.

(10) The single transferable vote would be used in elections in which there were more than two candidates.

In explanation why the Government had decided to permit the registration of special voters on a purely educational qualification, Mr. Todd issued the following statement on June 28:

"The reason why the Tredgold recommendations cannot be accepted as the only avenue to the voters' roll is that they exclude a large group of responsible people who, because of the present economic position of the Colony, earn less than £20 per month. Although our national income has increased by 23 per cent over the past three years, it stands at only £85 per head of the population today, as compared with £330 per head in the United Kingdom. This means that Government wage scales for Africans make it impossible for many, even though they have had ten years or more education and hold responsible positions, ever to get a vote. The scale for people of this qualification, who may be agricultural demonstrators or policemen, stops, after twenty years' service, at £18 10s. An African male nursing orderly would reach the £20 mark after eleven years but a female nursing orderly would never qualify. A trained teacher who had received a total of ten years' education would qualify after 13 years' service but a woman teacher would have to work for 18 years before she became eligible for the vote. But besides the Africans who are thereby excluded from the roll there are several thousands of lower paid Europeans, Asians and Coloured people.

Taking such facts into consideration, the Bill will provide for those who have had ten years' education, and who have worked for at least two years, to be enfranchised. Such special qualifications would not be regarded as a permanent measure and provision will be made that at the point where the number of voters who enter the common roll by way of the special qualification reaches one-fifth of those who enter by the ordinary qualifications, then the special qualification entrance will be closed permanently. This means that if there are 80,000 who could register under ordinary qualifications, there would be the opportunity for 16,000 Europeans and Africans (or one sixth of the total roll) to enter by the special qualifications. The alternative given under the special qualification is £20 per month with literacy, and while it is estimated that there are 5,000 Africans who could qualify only 700 have done so, although this is the present qualification and has applied for the past six years.

The number of Africans who have passed Standard VIII or equivalent is 10,160, a figure which, it is estimated, will rise to 16,690 by 1963. Of the 10,000 who have so far qualified it is probable that about 8,000 are 21 years of age or over."

The Bill was introduced into the Assembly on July 25 and given a second reading on Aug. 1. During the committee stage, however, an amendment was put forward laying down a minimum income qualification of £12 10s. a month for the special voters. As this received considerable support from among Government followers, Mr. Todd, in spite of his earlier opposition to any such means test, announced on Aug. 14 after an emergency meeting of the United Rhodesia Party caucus that the Government was prepared to accept an income qualification of £10 a month for special voters with a Standard VIII education, as this would not exclude the Africans whom he wished to see enfranchised. An amendment to this effect was accordingly inserted in the Bill and passed by the Assembly.

A second amendment excluding from the franchise persons married under any system permitting polygamy was adopted in committee on Aug. 15 by 14 votes to 6, with Mr Todd's support. When the report stage was reached on Aug. 20, however, the amended clause, which would have excluded thousands of Africans from the franchise who would otherwise have been eligible, was removed and the original text restored.

In this form the Bill was given its third reading on Aug. 21.

Federal Government's Franchise Proposals.

The Federal Government's franchise proposals for Federal elections were outlined on June 5 by the Premier, Sir Roy Welensky, and the Minister of Law, Mr. J. M. Greenfield, and were published as a White Paper on Sept. 19. Their main provisions were as follows:

(1) There would be two voters' rolls, the "A" or general roll and the "B" or special roll, both of which would be open to persons of all races. No voter could be included in both rolls.

(2) Both rolls would be open to persons over 21 who were Federal citizens or British protected persons by virtue of their connexion with Northern Rhodesia or Nyasaland, and who had been resident in the Federation for two years and in the constituency for three months. All prospective voters would be required to make a declaration of allegiance to the Queen, and would have to be able to speak, read, write, and understand English.

(3) The qualifications for general voters would be the same as those laid down for ordinary voters by the Tredgold Commission. Ministers of religion would also be eligible as general voters, provided they followed no other gainful occupation.

(4) The qualifications for special voters would be either an income of £12 10s. a month, occupation of property valued at £500, or an income of £10 a month plus a two-year course of secondary education of prescribed standard.

(5) General voters would elect 44 ordinary members (24 from Southern Rhodesia, 14 from Northern Rhodesia, and 6 from Nyasaland). Both general and special voters would elect eight African members (four from Southern Rhodesia and two each from Northern Rhodesia and Nyasaland), and in Southern Rhodesia one European representative of African interests. Thus general voters would have three votes in Southern Rhodesia (one for an elected member of unspecified race, one for an elected African member, and one for the specially elected European member representing African

interests) and two in Northern Rhodesia and Nyasaland (one for an elected member of unspecified race and the other for an elected African member). Special voters would have two votes in Southern Rhodesia (one for an elected African member, and one for the specially elected European member representing African interests), and one vote in Northern Rhodesia and Nyasaland (for an elected African member).

(6) A wife (or the first wife in cases of polygamous marriage) would be deemed to have the same income as her husband, but must have the educational qualification in her own right.

Mr. Greenfield said at a Press conference on Sept. 19 that the total electorate, at a rough estimate, would be about 119,000, of which 85,000 would be general voters, including 3,000 Africans, and 34,000 special voters, including 23,000 Africans.

In a previous statement in March, Mr. Greenfield had given the number of registered Federal voters in Southern Rhodesia as 52,213 (50,414 Europeans, 646 Asians, 593 Coloureds, and 560 Africans). In Northern Rhodesia there were 14,647 Federal voters, they were not required to state their race on their application forms, but from their names it appeared likely that 1,254 were Asians and 11 Africans. Figures were not available for Nyasaland, as Federal election rolls were compiled only when an election was about to take place; the total number of voters on the Territorial roll was 2,216, and judging by names it appeared that 347 were Asians.

Party Developments.

A joint statement issued on Sept. 19 by Sir Roy Welensky and Mr. Todd announced that differences over the franchise proposals which had been preventing the amalgamation of the Federal and United Rhodesia parties had "largely disappeared." In consequence Mr. Todd would recommend their fusion to the annual congress of the United Rhodesia Party, and Sir Roy Welensky to the Federal Party congress.

Proposals for a merger of the two parties had been put forward in September 1956 (see 15246 A). A joint constitution and policy statement was drawn up in May, and it was agreed to hold a joint congress in July; this was postponed *sine die*, however, as a result of differences between the party leaders over the franchise question.—(Federal Information Dept., Salisbury - Times - Manchester Guardian)

(Prev. rep. Federal Assembly, 15529 A; Parties, 15246 B.)

A. UNITED STATES. — Increase in Bank Rate. - Government Group to combat Inflation.

The U.S. Federal Reserve Board approved on Aug. 8 an increase from 3 per cent to 3½ per cent (the highest level since the early 1930's) in the discount rate of the Federal Reserve Banks in Chicago, Kansas City, Minneapolis and Philadelphia. Similar increases were subsequently made by the Federal Reserve Banks in Dallas, Atlanta, Boston and San Francisco (Aug. 12), Richmond (Aug. 19), St. Louis (Aug. 21), and Cleveland and New York (Aug. 23).

The increase in the Federal Reserve Bank rate followed an increase in the lending rates of the leading commercial banks from 4 per cent to 4½ per cent on Aug. 6-7, and was interpreted as a move to restrain inflationary tendencies.

It was announced in Washington on Sept. 13 that a high-level Government group had been established to hold regular consultations with President Eisenhower on anti-inflationary measures. In addition to the President, the group would consist of Mr. Robert B. Anderson (Secretary of the Treasury), Mr. William McChesney Martin jr. (chairman of the Federal Reserve Board), Mr. Raymond J. Saulnier (chairman of the Council of Economic Advisers), Dr. Gabriel Hauge (Special Assistant to the President on Economic Matters), and other officials who might be called into consultation.

Mr Anderson said that the group would discuss the "financial aspects" of inflation and "related problems," and that its establishment was an "added step" in the effort to halt rising prices. A Treasury spokesman stated that the group would meet with the President at least once a month. (New York Times - New York Herald Tribune)

(Prev. rep. 15194 D.)

B. INDONESIA - NETHERLANDS. — Dutch Residents in Indonesia. - Ambonese Refugees in Holland.

The Netherlands Minister for Social Welfare, Miss Klompé, announced on Sept. 17 that about 58,000 Dutch nationals were still living in Indonesia on Jan. 1, 1957, and that this compared with 74,000 on Jan. 1,1956, and 94,000 on Jan. 1, 1955.

The Minister also announced that the number of Ambonese refugees now living in camps in Holland was 17,500, against 12,500 in 1951. New camps were being built for them, and a sum of 11,286,100 Guilders had been earmarked in the Budget for this purpose.—(Netherlands News Agency)

C. INDIA. — Kohima Convention of Naga Leaders. - Demand for Formation of Nagaland as Centrally-administered Unit accepted by Indian Government. - Amnesty Grant.

A convention of loyal Naga leaders, sponsored by the Assam State Government and attended by 1,735 representatives of 19 sub-tribes and nearly 2,000 observers from various regions of Nagaland, met from Aug. 22-26 at Kohima, headquarters of the Naga Hills district. The convention unanimously adopted a resolution demanding the integration of the Naga Hills district of Assam and the Tuengsang frontier division (which is administered by the North-East Frontier Agency) as a single administrative unit under the Indian External Affairs Ministry, to be administered by the Governor of Assam on behalf of the President. This proposal (which meant the abandonment of the earlier demand for an independent Naga State) was envisaged as an "interim arrangement" pending a permanent political settlement within the Indian Union. Another resolution was adopted appealing to the Naga rebels still in arms to "give up the cult of violence" and to co-operate "for the good of our land and the free development of our people according to our traditions."

The Indian Prime Minister, Mr. Nehru, received in Delhi on Sept. 25 a Naga delegation chosen at the convention, and led by Dr. Imkingliba Ao, formerly a lieutenant of the rebel leader Zapu Phizo (who is still at large in the Naga Hills). At the meeting Mr. Nehru announced that while the Indian Government were not prepared to discuss any scheme based on the independence of the Naga areas, they accepted the Kohima convention's proposal for the formation of a Naga administrative unit under the Central Government. He gave an assurance that the necessary amendments to the Constitution would be considered by Parliament at its next session in November-December; welcomed the assurance by the delegation that every effort would be made to restore peaceful conditions; and announced that the Government would grant an amnesty to the rebels "in respect of all offences committed against the State in the past," though the amnesty would not cover future offences.

Prior to these developments the Indian Army had continued its operations against the rebels.

Major-General Kochar, G.O.C. Assam, reported on Nov. 21, 1956, that strong concentrations of rebels had been destroyed, and that about 1,200 of them had been broken up into small groups; a number of rebels were reported to have surrendered or been captured in subsequent weeks. Nevertheless, rebel raids on villages and communications continued in December, January, and February; in an action on Feb. 16, 1957, loyal Nagas repulsed nearly 200 rebels who attacked a village in the Tuengsang frontier division, inflicting heavy casualties on them. From January onwards, however, increasing numbers of the rebels surrendered; Phizo's sons and daughters gave themselves up on April 26, stating that they were unable to bear the hardships of life in the jungle; and his brother was arrested in August while attempting to escape to Burma.

The Governor of Assam, Mr. Fazl Ali, told the State Legislative Assembly on June 8 that in spite of the successful breaking-up of large rebel concentrations and the destruction of their hide-outs by the Indian Army towards the end of last year, the rebels had later regrouped themselves and had adopted "hit and run tactics" in small groups. The "hard core of hostile leadership in the Naga Hills," he said, with a fairly large number of followers and stocks of arms and ammunition, was still intact. Mr. Ali also stated that over 240 people, the vast majority of whom were loyal Naga villagers, were estimated to have been killed by the rebels. (The Statesman, Calcutta - The Hindu, Madras - Indian High Commissioner's Office, London)

(Prev. rep. 15276 A.)

D. NEW ZEALAND. — Cabinet. - Mr. Marshall appointed Deputy Premier.

The N.Z. Prime Minister, Mr. Holyoake, announced on Oct. 2 that Mr. J. R. Marshall, the Attorney-General and Minister of Justice, had also been appointed Deputy Prime Minister, and that the Minister of Finance, Mr. Watts, would be the third-ranking member of the Government. In addition to the above posts, Mr. Marshall (43) is in charge of the Electoral Department and of Publicity and Information. (Directorate of Information Services, Wellington)

(Prev. rep. 15773 B.)

E. IRISH REPUBLIC. — Increase in Bank Rate.

It was announced in Dublin on Sept. 29 that the bill discount rate of the Central Bank (the nearest equivalent to the British Bank Rate) would be increased from 5 per cent to 6 per cent as from Sept. 30. This decision followed the increase of the British Bank Rate on Sept. 19.—(Irish Times, Dublin)

A. EASTERN GERMANY - SOVIET UNION - POLAND. — Visits of Soviet and Polish Government and Communist Party Leaders to Eastern Germany.

A delegation of the Soviet Government and Communist Party visited Eastern Germany from Aug. 7-14 for discussions with the East German Government and leaders of the Socialist Unity Party. The Soviet delegation was led by M. Khrushchev (First Secretary of the Communist Party's central committee), and included M. Mikoyan (First Deputy Premier), M. Gromyko (Foreign Minister), M. Kumykin (Deputy Foreign Trade Minister), and M. Grishin (chairman of the All-Union Central Council of Trades Unions). East German leaders taking part in the discussions included Herr Walter Ulbricht (First Deputy Premier and First Secretary of the central committee of the Socialist Unity Party), Herr Grotewohl (the East German Prime Minister), Dr. Bolz (Deputy Premier and Foreign Minister), Herr Heinrich Rau (Deputy Premier and Minister for Internal and External Trade), Herr Nuschke, Herr Scholz, and Herr Leuschner (Deputy Premiers), and Herren Matern Oelsner (a Deputy Premier), and Stoph (Deputy Premier and Defence Minister) in their capacity as members of the political bureau of the S.U.P.'s central committee.

During their visit the Soviet leaders also inspected industrial enterprises, agricultural co-operatives, and scientific and cultural institutions. MM. Khrushchev, Gromyko, and Grishin went to Leipzig and Magdeburg, where M. Khrushchev addressed public meetings, whilst M. Mikoyan visited the Baltic ports of Stralsund, Warnemunde, and Rostock. M. Khrushchev also addressed the *Volkskammer* and a public meeting in the former Lustgarten in East Berlin.

A joint communiqué was issued on Aug. 14 and is summarized below under cross-headings.

After saying that the talks had been conducted "in an atmosphere of frankness and cordiality," and that they had "once again confirmed the complete unanimity of views of both sides on questions concerning the international situation, especially the situation in Europe," the communiqué continued:

Disarmament and West German Remilitarization. "Both sides expressed their resolve to continue unabated the struggle for the relaxation of international tension and for a general limitation of armaments and armed forces, for the immediate ending of atomic and hydrogen weapon tests, and for their complete prohibition. The Government of the German Democratic Republic supports the Soviet proposals for the ban, or at least a two- or three-year suspension, of tests of atomic and hydrogen weapons, and other concrete proposals for partial measures of disarmament which were put forward by the Government of the U.S.S.R. . . . Both sides unanimously condemn the position adopted by the Western Powers, who have refused to take any concrete decisions in the matter of practical measures leading to disarmament or the cessation of tests of atomic and hydrogen weapons.

"The Soviet Union and the German Democratic Republic consider it essential to declare that the stationing of American atomic weapons in Western Germany and other countries of Western Europe, and the decision of the organs of the North Atlantic bloc to equip European member-countries of NATO with atomic weapons, intensify the threat to peace and to the security of the countries of Europe . . The Government of the German Federal Republic, by tolerating and encouraging the disposition of atomic weapons of the Western Powers in Western Germany and by preparing the arming of the *Bundeswehr* with atomic weapons, is transforming the territory of the German Federal Republic into a main base of NATO for the waging of atomic war in Europe. Such actions of the German Federal Republic not only threaten the security of the peoples of Europe but are also fraught with mortal danger for the population of Western Germany itself, which in the event of war being unleashed by the NATO bloc would inevitably, as a result of the irresponsible policies of their ruling circles, be exposed to destruction by the concentrated blows of up-to-date nuclear weapons.

"The Government of the German Democratic Republic, in the name of peace in Europe and in the name of the future of millions of Germans, appeals to the Powers to renounce the introduction of atomic weapons in Germany. Once again it offers to the Federal Government an agreement to ban atomic arms from the armies of both German States and not to permit the manufacture of nuclear weapons in Germany. The Soviet Government fully understands and supports these proposals of the German Democratic Republic . . .

"In their joint statement of July 29, the Governments of the United States, Britain, France, and the German Federal Republic once again tried to make the end of the arms race dependent on the settlement of the German question, the solution of which they themselves are hindering in every way . . . That the present policy of the Western Powers and of the German Federal Government is merely leading to the further intensification of international tension in Europe and greater complication of the German question, also finds expression in the steps recently taken by them, which must further intensify the split of Europe and Germany, such as the conclusion of the "Common Market" and "Euratom" agreements and the creation of the so-called Baltic Command of NATO . . ."

Position in the Baltic. "The Soviet side expressed full solidarity with the joint statement by the German Democratic Republic and the Polish People's Republic (see below) that the Baltic must be a sea of peace and serve the interests of the peaceful development of the European countries. The Soviet Union supports the efforts of the two Republics to reach agreements with the other Baltic States with the object of bringing about co-operation between the Baltic countries and jointly solving their common problems . . ."

Withdrawal of Foreign Troops from European Countries. - European Collective Security Treaty. "The relaxation of tension in Europe would be considerably helped by such measures as the removal of all foreign troops from European countries and the conclusion of a non-aggression pact between the countries within the North Atlantic bloc and the Warsaw Pact defence system. The German Democratic Government notes with satisfaction the complete unanimity of views of both sides regarding the necessity of achieving within the shortest possible period a considerable limitation of the troops of the four Powers deployed in Germany. The acceptance by the Western Powers of this proposal would be an important step towards the withdrawal of all foreign troops from the territories of both Eastern and Western European States and the restoration of normal peace-time conditions on the continent of Europe. The German Democratic Republic states its preparedness to co-operate towards the setting up of a zone of limited and inspected armaments in Europe to facilitate the setting up of an effective system of European collective security."

German Reunification. "Both sides unanimously agree that the vital question affecting the German nation is the restoration of its unity, and is first and foremost a matter for the German people themselves. With this object in view the German Democratic Republic considers it essential first of all to come to an agreement with the Federal Republic over a common policy on the following matters.

(1) A ban on stationing or manufacturing any kind of atomic bomb or weapon on German territory, and banning all atom war propaganda.

(2) The withdrawal of both German States from NATO and the Warsaw Pact, the mutual abolition of compulsory military service, and an agreement on reciprocal limitation of the strength of their forces.

(3) A joint or separate appeal to the four Powers for the early withdrawal of their forces from the whole of Germany by stages.

Agreement between the German Democratic Republic and German Federal Republic on these matters would create the basis for the setting up of a German Confederation.

"The Soviet Union supports these proposals . . . The Soviet delegation declared that the U.S.S.R. was willing in all ways to contribute to a *rapprochement* and achievement of mutual understanding between the German Democratic Republic and the German Federal Republic, bearing in mind especially that the Soviet Union is the only great Power which has diplomatic relations with both German States . . .

"The present German Federal Government, ignoring the interests of the German people, hinders the establishment of good relations between the German Federal Republic and the U.S.S.R. . . . The main obstacle to the reunification of Germany as a peace-loving and democratic State is the present policy of remilitarization in Western Germany and her conversion into a military atomic base of the aggressive North Atlantic bloc. This policy of militarization is accompanied by the suppression in Western Germany of the democratic forces opposing preparations for a new war, as is strikingly illustrated by the banning of the German Communist Party. This policy deepens the rift between the two German States and threatens European peace and the security of the German people itself.

"Both sides consider it necessary to declare that there can be no question of the reunification of Germany at the expense of the interests of the German Democratic Republic and the social gains of its working people. There is only one way of peacefully solving the German problem—that of *rapprochement* and talks between the two German States now in existence. There can be no settlement of the questions affecting Germany as a whole without the participation of the German Democratic Republic . . . The peoples of the Soviet Union see in the German Democratic Republic an impregnable bastion of European peace. In view of the situation obtaining at present in Western Germany, the German Democratic Republic is called upon to play a particularly important role in the maintenance of peace in Europe . . .

"Both sides expressed their determination to take every step to further the cohesion of the forces of socialism and to strengthen the unity of the countries of the Warsaw Treaty. They once again reaffirm that, in accordance with their obligations under that treaty, the Soviet Union and the German Democratic Republic will jointly defend the independence of the German Democratic Republic and will tolerate no violation of its frontiers . . ."

Soviet-East German Economic Relations. After referring to the development of trade relations since the agreement of Jan. 7 last (see 15352 A), the communiqué announced that both sides had agreed that talks should be held in Berlin in the near future to conclude a Soviet-East German agreement on mutual deliveries of goods for the three-year period 1958-60, which would envisage a further increase in their commercial exchanges. The agreement would cover Soviet deliveries of goods needed by the German Democratic Republic, including coal and coke, iron ore, pig iron, rolled ferrous metal, non-ferrous metals, apatite concentrate, oil, timber, wool, cotton, grain and certain other food products, and the corresponding

East German deliveries to the Soviet Union of various types of machines, ships, instruments, apparatus, cable manufactures, and other kinds of equipment, materials, and goods.

Agreement was also reached on holding talks between representatives of both sides in the near future regarding the conclusion of an agreement on trade and navigation.

A new stage in the development of economic co-operation would take the form of extensive co-operation in the machine-building and other branches, on the implementation of which the economic planning organs of both countries were now working. Steps were also being taken to extend the exchange of information on scientific and technical achievements.

Party Problems. The communiqué said that both sides had discussed questions of further co-operation between the Soviet Communist Party and the Socialist Unity Party, as well as "urgent problems concerning the international labour movement," and that the talks had shown "full mutual understanding and identity of views on all questions under discussion."

After paying tribute to the achievements of the Socialist Unity Party, the communiqué declared that, "with the object of strengthening the unity of the party ranks and the fraternal solidarity of the Communist and Workers' parties," the representatives of both parties considered it "necessary to continue waging an irreconcilable struggle against revisionism, which spells surrender to the ideology of the enemies of the working class." Both parties would "implacably combat sectarianism, narrow-mindedness, and dogmatism, which lead to divorcement from the masses." It had also been noted that "notwithstanding the attempts by the reactionary imperialistic forces and all kinds of revisionist and opportunist elements to undermine the fraternal solidarity of the Communist and Workers' parties, the unity of the international Communist movement has lately been further strengthened."

In his speech at a special session of the *Volkskammer* on Aug. 8 M. Khrushchev dealt with the question of German reunification on similar lines to those stated in the joint communiqué, and strongly attacked Dr. Adenauer and the German Federal Government as well as the Western Powers, the timing of his speech, and of the Soviet visit to Eastern Germany as a whole, being regarded as significant in view of the fact that general elections were due to be held in Western Germany on Sept. 15.

Saying that "the crux of the matter is what kind of a united Germany must emerge as a result of reunification and along what lines it will be developed," M. Khrushchev made it clear that a reunified Germany must be a "peace-loving and democratic" [i.e. Communist] State. There were two ways to reunification, he said. The first was the Socialist and democratic way in peace—the policy of Eastern Germany; the other was the Junker and militaristic reactionism of Western Germany. The Russian people, who had suffered under German Fascism, stood against militarism and capitalism.

The "Western imperialists" wanted a Germany which would serve their aggressive intentions; they wanted to use Germans again for their capitalistic ends. Western Germany was preparing for a nuclear war, and it was important for the German people to realize that a new war would turn Germany into a desert. "In the event of the imperialists unleashing a new war," M. Khrushchev went on, "atomic and hydrogen bombs will start exploding precisely here where the line dividing the countries of the NATO bloc and the forces of the Socialist camp passes. It is extremely important for the West Germans to realize this at last and to prevent such a course of events. The German people must and can avert this catastrophe, provided they do not allow a handful of militarists and monopolists to dispose of their destiny. The statesmen of Britain, France, and other countries whose territories in the event of hostilities will be within the range of atomic and hydrogen weapons should likewise keep this in mind."

Turning to the procedure for bringing about reunification, M. Khrushchev said that "some West German politicians" thought of it as a four-Power problem, but the Soviet view was that it was "the duty of the four Powers to help the German people to solve the question themselves through direct talks between the two German States." "Much effort and time" would be required to overcome the difficulties and differences of opinion, but it was "the only way." The East German Government had frequently offered to negotiate, but the Federal Government refused and perpetuated the division of Germany. The proposal of Herr Grotewohl for a confederation (see 15684 A) was a practical and constructive suggestion.

Continuing, M. Khrushchev said Dr. Adenauer was basing his policy—as Hitler had—on military strength. Dr. Adenauer accused the Soviet Union of trying to influence the West German elections, but the Soviet Union "has never interfered in the internal affairs of the German Federal Republic, nor does it intend to do so. We cannot, however, overlook the fact that Herr Adenauer, carried away by the fever of the election campaign, has raised slander against the Soviet Union to the level of State policy."

"The road along which Adenauer wants to lead Germany," M. Khrushchev went on, "is a great hazard to the German people . . . Herr Adenauer is cleverly leading a part of the German people astray, and goes so far as to say that he represents the interests of the German working class. But the German working class is becoming increasingly aware of the danger of Adenauer's policy. We are convinced that the German working class will raise its voice in the struggle for peace . . . and use every opportunity to prevent the growth of militarism and the unleashing of a new war.

"The ruling circles of Western Germany care little for the fate of the German people. It is significant that, having refused to discuss the question of Germany's reunification with Germans, the West German Government prefers to discuss it with the Governments of the U.S.A., Britain, and France, as if it were with America or Britain that Western Germany should be merged and not with Eastern Germany. The Adenauer Government turns down talks between the two German States on the plea that this would mean recognition of the split of Germany. But the existence of two German States is an undeniable fact which must be taken into consideration."

After denouncing the declaration of the Western Powers and the German Federal Government of July 29 on the reunification of Germany (see 15684 A), M. Khrushchev continued: "The Western Powers again say that an all-German Government can be set up only through so-called free elections throughout Germany. But this is rank hypocrisy. Is it possible to speak of free elections in the German Federal Republic if the Communist Party is banned, if the progressive organizations of the working people are subjected to police persecution, and if war criminals and Nazis are playing an ever-increasing part in its political life? . . . The Western Powers are openly opposed to the neutralization or demilitarization of Germany. In their plans a united Germany is to join the aggressive Atlantic bloc, and the occupation forces are to remain on German territory . . . The Soviet Union has repeatedly called on the Western Powers to make a start on an agreed gradual withdrawal of troops from Germany. Furthermore, the Soviet Union has repeatedly declared its readiness to withdraw all its troops, not only from the German Democratic Republic, but also from Poland, Hungary, and Rumania, if the U.S.A. and other NATO countries withdraw their troops from Western Germany, France, Britain, etc."

After once more denying that the reunification of Germany had anything to do with the question of general disarmament as maintained by the Western Powers and Dr. Adenauer, M. Khrushchev, in conclusion, praised the friendship and close co-operation between the Soviet Union and the German Democratic Republic and declared that "there is not a single issue in dispute between us."

Prior to the Soviet visit, a delegation of Polish Ministers and Communist Party leaders had visited East Berlin from June 18-20 for discussions with the East German Government and Socialist Unity Party. The Polish delegation was led by M. Gomulka (First Secretary of the United Workers' Party) and M. Cyrankiewicz (the Prime Minister), and also included M. Ignar (Deputy Premier and chairman of the United Peasant Party), M. Rapacki (Foreign Minister), and M. Moskwa (Minister of Small Industries and Handicrafts and a Democratic Party leader). The East German delegation was led by Herr Grotewohl and Herr Ulbricht.

A joint governmental statement was issued on June 20 by Herr Grotewohl and M. Cyrankiewicz, which is summarized below under cross-headings.

Reaffirmation of Oder-Neisse Frontier and Polish-East German Friendship. Both sides declared that they were "firmly determined to pursue a policy consistently aimed at the maintenance and strengthening of peace," and that they were "firmly convinced that the present German-Polish frontier on the Oder and Neisse Rivers is an important element in the assurance of peace and security in Europe." The statement went on: "The friendly relations which have developed between the German Democratic Republic and the People's Republic of Poland on the basis of their mutual interests and as members of the Socialist camp constitute an important factor for European security and for the development of Socialism in both countries. The two Governments therefore declare that they wish to strengthen the friendly co-operation between their countries in all spheres."

Disarmament. The statement accused "certain imperialist circles" of "continuing their policy of war pacts, extension of military bases in other countries, and the development of weapons of mass destruction"; condemned the creation of Euratom and the Common Market as leading to a "perpetual division of Europe"; and denounced the Western countries' Middle East policy. Both Governments, the statement said, were in favour of an international agreement on the prohibition of weapons of mass destruction and the reduction of existing armed forces and armaments, and believed that the realization of the Soviet proposals for a suspension of nuclear tests and for the renunciation of the use of nuclear weapons would be first steps towards the complete outlawing of atomic and hydrogen weapons. They also expressed support for "partial solutions which would lead to future complete disarmament," as well as for the Soviet proposal "for the creation of a zone of limited and controlled armaments in Europe that would include both German States and some neighbouring countries."

West German Remilitarization. After condemning the remilitarization of Western Germany and "the storing of atomic weapons on West German territory," which was "becoming the most important atomic base of NATO in Europe," the statement went on: "The attitude of the present German Federal Government, which avoids any firm renunciation of the policy of strength in its relations with Poland, is an encouragement to those openly supporting revisionism and revenge. At the same time the German Federal Government

consistently opposes all steps towards disarmament . . . Both sides state that the revisionist activities in the German Federal Republic, especially regarding the established and unalterable German-Polish frontier on the Oder and Neisse Rivers, are directed against peace and security in Europe.

"German militarism is the enemy of the German and the Polish people. The German Democratic Government strongly opposes the activities of revisionist and revenge-seeking circles in the German Federal Republic, since they are directed against the German people themselves, in whose interest it lies to establish relations with the Polish people based on good-neighbourly and friendly co-operation. Every increase in the economic and political strength of the People's Republic of Poland is at the same time a support for the progressive and democratic forces in Germany in their fight against German militarism . . ."

European Collective Security. - Proposed Baltic Treaty. After emphasizing that both Poland and Eastern Germany were prepared "to strengthen the defensive association which binds them to the Soviet Union and to the other signatories of the Warsaw Pact," the statement declared that the two Governments were against a division of Europe into two antagonistic groups and would therefore support the proposal for the conclusion of a European Collective Security Treaty. They also agreed that "the Baltic must remain a sea of peace," and declared that they would "endeavour to reach agreement with the countries bordering on the Baltic and would take steps towards achieving this aim."

German Reunification. - Polish Support for G.D.R. The Polish Government, while stating that it was interested in normalizing relations with the German Federal Republic, reaffirmed its conviction "that the German Democratic Republic is of fundamental importance for the cause of peace and security in Germany and Europe," and was "the leading force in the German people's fight for a peaceful, democratic, and united Germany." Both sides agreed, the statement added, "that the peaceful reunification of Germany was the task of the German people themselves and can be achieved through an understanding between the two German States."

Polish-East German Co-operation. "Both sides expressed their conviction that the strengthening of the unity of the Socialist camp is the basic element in their policy of strengthening peace and international security and of carrying out their programmes of Socialist construction. The German Democratic Republic and the People's Republic of Poland are bound by inseparable ties of friendship and solidarity with the U.S.S.R., the People's Republic of China, the Czechoslovak Republic, and the other Socialist countries, between whom relationships of aid on a basis of equality and brotherly co-operation . . . are developing."

In conclusion, the statement referred to an agreement of April 17 providing for East German credits to Poland for the construction in that country of new lignite mines (see below); mentioned the recent signing of trade, payments, legal assistance, and frontier co-operation agreements between the two countries; and announced that they intended to conclude a consular agreement, an agreement on social policy, and a Customs agreement, and that they would "endeavour to develop and broaden their co-operation in the fields of science, industry, technology, culture, and education."

A lengthy statement of the two parties signed by Herr Ulbricht and M. Gomulka was also issued on June 20. It was remarkable for the concessions which Herr Ulbricht, known as one of the most orthodox Communists of Stalinist convictions, had made to M. Gomulka's views, which he had hitherto persistently opposed in public. The essential part of the statement was worded as follows:

"Both parties believe that the interests of Socialist construction and the maintenance of peace demand a further strengthening of unity and friendship and of brotherly co-operation between the Socialist countries. Both parties express their strong opposition to all attempts to weaken this unity and co-operation through anti-Soviet propaganda, and to every effort to sow dissension between the Socialist countries and parties. All countries have common principles of Socialist construction: the dictatorship of the proletariat in association with the working peasants, the leading role of the working class and its Marxist-Leninist party, the development of productive forces on the basis of socialization of the means of production, central planning, and the unity of the Socialist States. These principles should be applied in a creative way and with reference to the historically developed conditions and national characteristics of each country. This carries with it the necessity and the possibility for each country to apply its own forms and methods in building Socialism, while each Communist and Workers' party stands firmly on the basis of ideological clarity within its ranks and works determinedly against revisionist or dogmatic falsifications."

The Polish-East German trade and credit agreements referred to in the governmental communiqué were: (*a*) a trade agreement of March 20 which provided for a trade volume in 1957 of over 1,000,000,000 roubles (about the same as in 1956), thus ensuring that each country would continue to occupy second place in the foreign trade of the other; (*b*) a supplementary protocol, signed on April 17, under which Eastern Germany granted to Poland a credit of 400,000,000 roubles in connexion with German machinery supplies for the construction of new lignite mines in Poland; (*c*) a second supplementary protocol, also signed on April 17, which provided for a 17 per cent increase of trade exchanges over the 1956 total, Poland undertaking to supply additional quantities of coal and metallurgical products, in exchange for East German deliveries of chemicals, fertilizers etc.—(Soviet and Polish Embassies, Press Departments, London - Neues Deutschland, East Berlin - Times) **(Prev. rep. East German-Soviet Relations, 15648 C; 15352 A; East German-Polish Relations, 15584 D; Reunification, 15684 A.)**

A. SUDAN.—Appointment of Election Commission. - Elections to be held in 1958. - Constituent Assembly Act.

The Supreme Council of the Sudan announced on June 30 that as the term of the present Sudanese Parliament expired on that date, and as it would be impossible to hold elections within 30 days or in the autumn, the elections would be held throughout the country on Feb. 27, 1958.

Previously the Supreme Council had, in accordance with a recommendation by the Sudanese Government, appointed in June an Election Commission to conduct the forthcoming parliamentary elections, in conformity with Article 43 of the Transitional Constitution. Sayed Hassan Ali Abdalla (Governor of the Blue Nile Province) was appointed president of the commission, and Mohammed Yousif Mudawi and Chief Andrea Gore its other members.

Before its dissolution on June 30 the Sudanese Parliament had passed a Bill laying down the procedure for the next parliamentary elections, and another Bill defining the composition and functions of the Constituent Assembly.

Parliamentary Elections Act. This measure laid down that for the next general elections to the House of Representatives the Sudan would be divided into constituencies, each comprising about 60,000 population according to the last general census, with the proviso that the population in any one constituency should not be less than 50,000 nor more than 70,000 For the Senate there would be 30 constituencies.

All male Sudanese of 21 years or over and ordinarily resident in the constituency for not less than six months immediately before the closing of the electoral roll would be qualified to vote in the elections to the House of Representatives, whilst the age qualification for voting in Senate elections was 30 years or over.

The Act also laid down that the elections to both Houses would be direct and secret; fixed a procedure for by-elections; and dealt with the compilation of the electoral rolls, the nomination of candidates, and other electoral matters

Constituent Assembly Act. This measure provided that the Constituent Assembly would consist of all members of the House of Representatives and the elected members of the Senate; that it would be presided over by the Speaker of the House of Representatives, who would be known as the President of the Constituent Assembly; and that the Assembly's task would be to frame and adopt a Constitution, as well as to draft a law for elections to the first Parliament to be convened under the Constitution. The Constituent Assembly would be free to make its own procedural and business rules. It would be dissolved with the adoption by it of the new Constitution.

Because of the preparatory work for the parliamentary elections next year, it was announced in September that no by-elections to local government councils would be held pending the general elections as long as the remaining members of those councils were able to form a quorum.—(Sudan Government Information Centre, Khartoum)

B. UNITED STATES. — Ban on Travel to Bulgaria and on Admission of Bulgarian Journalists relaxed.

The U.S. State Department announced on Sept. 5 that U.S. citizens, who had "professional or other legitimate reasons," would henceforth be allowed again to undertake "visits of limited duration" to Bulgaria if their journey was "in the national interest." Reciprocally, applications of Bulgarian news correspondents for permission to visit the U.S.A. would be considered on the merits of each case, in the light of U.S. legislation controlling the admission of Communists.

The State Department spokesman explained that the immediate reason for the decision was to enable Mr. Avery Brundage, president of the International Olympic Committee and a U.S. citizen, as well as six other officials of the U.S. Olympic Committee, to attend the meeting of the International Olympic Committee which was to open in Sofia on Sept. 20. He added that applications of *bona fide* correspondents for validation of their passports for travel to Bulgaria to cover the meeting would also be considered, and that one such application had already been granted.

Travel by U.S. citizens to Bulgaria had been banned since February 1950, after the U.S. Government had broken off diplomatic relations with that country, following a Bulgarian request for the withdrawal of the U.S. Minister, Mr. Donald R. Heath, and the Bulgarian Government's refusal to withdraw the charges publicly made against Mr. Heath in connexion with the Kostov trial.—(New York Times) **(Prev. rep. 10557 A.)**

A. UNITED KINGDOM. — Electricity Industry. - Report and Accounts of Central Electricity Authority, 1956-57. - Atomic Power Developments.

The reports and accounts of the Central Electricity Authority for the year ended March 31, 1957, were published on Sept. 24. They showed that the Authority itself and the 12 Area Boards had earned a combined net surplus of £11,718,915 (compared with a combined net surplus of £12,212,242 in the year ended March 31, 1956), bringing the combined net surplus earned since Vesting Day to about £82,466,000. This will be the last annual report to be published by the C.E.A., whose functions will be taken over from Jan. 1, 1958, by the new Electricity Council and Central Electricity Generating Board (see 15739 A).

The combined revenue of the Authority and the 12 Area Boards was £421,900,000, compared with £379,100,000 (revised figure) in 1955-56. Total expenditure (including £62,700,000 depreciation) amounted to £360,800,000, compared with £324,200,000 (revised figure) in 1955-56, leaving a trading surplus of £61,100,000. The combined net surplus of £11,718,915 shown above was arrived at after deducting £49,400,000 to cover interest, financing expenses, and a further £2,000,000 written off the "Consideration for Undertakings Acquired." It included about £8,800,000 earned by the C.E.A. itself and about £2,900,000 earned by the Area Boards as a whole. Three Area Boards—the Midlands, Merseyside and North Wales, and Yorkshire—incurred deficits during the year.

The following information was given in the report :

Consumers and Sales. The number of consumers rose during the year by 390,201 (2.8 per cent) to 14,538,368. Sales of electricity increased by 6.7 per cent to 67,514,000,000 units.

Prices and Costs. The average price of electricity sold for all purposes increased during the year by 4.7 per cent to 1.469d. Generating costs rose from 0.605d. to 0.649d., chiefly as the result of an increase of 8.5 per cent in the cost of coal.

Effects of Prices Standstill. The report stressed that the prices standstill, which the C.E.A. in June 1956 asked the three Area Boards to impose (see 14930 C), had "seriously reduced the financial working margin of the industry as a whole, involved some Boards in a deficit, and reduced the internal resources available to help finance the industry's capital requirements."

The Future of Nuclear Power. Emphasizing the "far-reaching importance" of nuclear development on power-planning generally (including the deletion from the 1961 programme of conventional plant for some 400,000 kw.), the report stated that the later nuclear power stations were expected to be directly competitive with conventional steam stations situated on the coalfields. With regard to areas of insufficient coal, the report stressed that nuclear power must play a prominent part in the area south of a line from the Bristol Channel to the Wash, which accounted for about two-fifths of the total demand in England and Wales. A warning was given, however, that although the C.E.A. had in the past been anxious to interfere as little as possible with existing amenities, the nuclear power programme, as well as the programme of conventional plant, could be implemented "only to the extent to which the community is prepared to accept the construction of power stations and overhead lines."

Power Stations. At March 31, 1957, the C.E.A was operating 262 power stations, with a maximum output of 20,600,000,000 kw., a record increase of 1,800,000,000 kw. (or 9.5 per cent) during the year. It was intended by 1962 to increase generating capacity by a further 44 per cent to 29,500,000,000 kw., including 1,300,000,000 kw. derived from nuclear plant.

Fuel Consumption and Efficiency. Coal consumption rose in 1956-57 to 41,500,000 tons, an increase of 4.1 per cent, compared with one of 5.2 per cent in the quantity of electricity generated. The report added that in the nine years since nationalization improved efficiency had saved 31,400,000 tons of coal, or about £106,000,000.

Rural Electrification. The total number of farms connected to electricity mains rose during the year by 13,135 to over 188,000. The report added that the number of farms connected had doubled since Vesting Day and was now nearly 69 per cent.

Capital Programme. At the Government's request, this had been reduced from the £213,000,000 originally contemplated (see 15135 A) by postponing work on power stations and distribution networks, actual expenditure in 1956-57 having been about £206,000,000. For 1957-58 the Minister of Power had approved expenditure of £233,000,000, the increase over 1956-57 being mainly accounted for by the acceleration of the nuclear power programme and the urgent need to overtake arrears of reinforcement of the distribution network.

Peak Demand. In 1956-57 maximum demand had for the first time been met without reducing voltage or frequency and without load-shedding.

Lord Citrine, chairman of the C.E.A., commenting on the report on the same day, reviewed the progress made in the industry in the nine years since Vesting Day.

The amount of generating plant available to meet consumer demand, he said, had doubled, and consumption had more than doubled, sales of electricity having increased by 106.7 per cent. Provision had been made to meet further doubling of demand by 1963-65. In 1948 the largest generating sets on order had a capacity of 60 megawatts, compared with the 200 and 275 megawatts of sets now on order or in the design stage; during the same period average thermal efficiency had risen from 20.91 per cent to 24.93 per cent. The national grid had been extended from 3,670 to 4,940 route miles and work was well advanced on an entirely new super-grid of 1,630 route miles. Capital expenditure had risen from £9,500,000 in 1948 to £233,000,000, and revenue from £178,000,000 to £421,000,000. In each of the nine years since nationalization the industry had made a surplus, but prices had increased by only 28 per cent since Vesting Day and by only 38 per cent since 1938, so that, when allowance was made for the fall in the value of money, electricity was "substantially cheaper than before the war."

Lord Citrine added a warning that virtually all Area Boards would show deficits in their accounts for the nine months to Dec. 31, 1957 (when the C.E.A would be dissolved), since this arbitrary accounting period excluded the first quarter of the calendar year, when substantial surpluses were normally earned.

Recent developments in connexion with atomic power development are summarized below.

The Hinckley Point (Somerset) Nuclear Power Station. The C.E.A. announced on Sept. 12 that after lengthy negotiations a provisional contract had been placed with the English Electric-Babcock and Wilcox-Taylor Woodrow group for the erection of the nuclear power station at Hinckley Point, Somerset (see 15311 A). The station, expected to be in full production by the end of 1962, would be the largest yet begun, with an output of 500,000 kw., compared with about 300,000 kw. at Berkeley and Bradwell and 350,00 kw. at Hunterston. The total cost, including all ancillary works, would be about £60,000,000.

A statement issued by the contractors on the same day said that the output of the Hinckley Point power station, which would be "by far the world's largest atomic power station," would be nearly seven times that of the first station at Calder Hall. The new station would have two reactors, each 175 ft. in height, of the gas-cooled graphite-moderated type fuelled by natural uranium. Each reactor would be connected to six steam-raising units, the 12 units being together capable of generating over 5,500,000 lb. of steam per hour. It was estimated that about 300 staff and workmen would be required to operate the station, which compared favourably with the manpower requirements of conventional power stations.

Proposed Nuclear Power Station for North Wales. Earlier, the C.E.A. had announced on Aug. 14 that it would shortly apply to the Minister of Power and the local planning authority for permission to build a nuclear power station (its fourth) at Trawsfynydd, Merionethshire, on the artificial lake of the same name. If the plan was approved, the Trawsfynydd station would be brought into service in 1962, have an output capacity of 400,000-500,000 kw., and be connected by overhead cable with the "pumped storage" station now being built at Blaineau Ffestiniog five miles to the north.

The Authority also stated that a suitable site for a nuclear power station existed near Edern, four miles from Nevin on the north coast of the Lleyn Peninsula (Caernarvonshire); the timing of the proposals for erecting a station there would, however, "depend on the system requirements and the scale of the nuclear power programme as a whole." Both the Trawsfynydd site (which the Authority already owned) and the site at Edern (consisting of heathland and low cliffs) were of no agricultural value.

The following appointments by Lord Mills, the Minister of Power, were announced on Sept. 13 : (*a*) Mr. C. T. Melling, chairman of the Eastern Electricity Board, to be a full-time member of the Electricity Council, with effect from Oct. 1; (*b*) Sir Charles Geddes, Sir William Holford, Mr. G. A. S. Nairn, and Sir Leslie Nicholls to be part-time members of the Central Electricity Generating Board. (Times - Daily Telegraph - Manchester Guardian - Financial Times)

B. GHANA. — Establishment of Bank of Ghana.

The Bank of Ghana, which will act as the country's central bank and issue the national currency, opened for business for the first time on Aug. 1. Legislation setting up the bank had been passed by the Legislative Assembly on Feb. 18, 1957.

The Act established the value of the Ghana pound at par with sterling, and required the Bank on demand to issue and redeem its notes and coins against sterling. The new currency will mostly be backed by sterling assets, but with provision for a limited fiduciary issue. The Bank will act as the main, and ultimately the sole, banker to the Government, and is empowered to make limited temporary advances to the Government to smooth over fluctuations in revenue arising from the predominance of cocoa exports in Ghana's economy.

The Bank may act as banker to other banks and Government institutions, but will not compete for commercial business. The Act empowered it, however, to require that other banks should maintain at all times a minimum holding of liquid assets, which would be expressed as a proportion of their deposit liabilities.

The Bank of the Gold Coast, which had acted as one of the Government's bankers, will be reorganized by separate legislation under the name of the Ghana Commercial Bank.

(Times - Financial Times)

A. CANADA. — Mr. Diefenbaker's Statement on U.S.-Canadian Economic Relations.

The Canadian Prime Minister, Mr. Diefenbaker, speaking at Dartmouth College, Hanover (New Hampshire), on Sept. 7, referred to certain aspects in the economic relations of the U.S.A. and Canada which, he said, were "causing unrest" among Canadians, especially the preponderance of the U.S.A. in Canada's external trade, the U.S. disposals programme for its agricultural surplus stocks, and the large-scale penetration and control of Canadian industry by U.S. interests.

The principal parts of Mr. Diefenbaker's address were as follows :

"The Anglo-Canadian-American Community constitutes a grand alliance for freedom, in partnership with others of the NATO family in the defence of democracy against the Red Menace. This alliance has as its 'built-in' stabilizers for unity a common tradition, a respect for the rights of man, an unswerving dedication to freedom. I believe with you that the maintenance of that unity is the only certain hope for the survival of freedom everywhere in the world . . .

"We are partners in defence—and we realize that the security of this continent cannot be assured without the closest co-operation between our two countries. To that end one of the first acts of the new Canadian Government when it came into power was to agree to the joint operational control of the air defence forces of Canada and the United States . . .

"We have learned to trust one another. Neither has received aid from the other without payment. No hereditary animosities or ancestral fears remain to divide us. In Canada we know that if the United States since the last war had not assumed world leadership, the free world might not have survived. But we cannot take our relationship for granted. The former Secretary of State for External Affairs (Mr. Lester Pearson) expressed the same sentiment a few years ago when he said: 'The era of easy and automatic good relations between Canada and the United States is over.' That does not mean that an era of difficult or bad relations is beginning. It emphasizes the need for care being taken in attending to our relations and viewing each other's problems with common sense, frankness, absolute confidence, and mutual trust.

"The whole measure of warm friendship which has long existed between the United States and Canada, and the parallel interest of the two countries, enables us to speak to each other with a measure of forthrightness which is permitted to very few countries in the world. The candour with which we can communicate with each other strengthens our understanding of each other, and helps us to avoid the pitfalls of misunderstanding which have bedevilled relations of so many other countries in the world.

"May I now with the utmost frankness and goodwill, and in the interests of fullest understanding, deal with one or two economic matters that are causing unrest within my country. By doing so I emphasize that the Government of Canada has as its duty and responsibility to consider Canadian interests first. It is not now, and will not be, anti-American.

"Canada is numbered among the great trading countries of the world. While we are desirous of doing business with all nations, our trading world has become increasingly confined to the United States, which takes 60 per cent of our exports and provides 73 per cent of our imports . . . Even in agricultural products, Canada buys a larger volume of American agricultural products, by some $100,000,000, than Canada sells to the United States. The value of U.S. exports to Canada is almost as much as that of its total sales to all Latin American countries. Canada is the U.S.A.'s greatest customer and the U.S.A. is Canada's greatest customer. What you are buying from us is largely raw materials or semi or partially-manufactured materials, for the U.S. tariff system prohibits any major import of manufactured goods.

"This concentration of trade in one channel contains inherent dangers for Canada. It makes the Canadian economy altogether too vulnerable to sudden changes in trading policy at Washington Canadians do not wish to have their economic, any more than their political, affairs determined outside Canada.

"Canada has always purchased more from the U.S.A. than the U.S.A. has purchased from Canada. This imbalance is now running to record proportions. In our commodity trade last year Canada purchased from the U.S.A. goods to the value of $1,298 millions more than the U.S.A. purchased from Canada. Thus far in 1957 the imbalance has increased, and if the present trend continues, 1957 will establish a new all-time record in imbalance in trade between the two countries. Our trade with the U.S.A. is equivalent to 25 per cent of Canada's gross national product. On the other hand, it is the equivalent of less than 2 per cent of the gross national product of the United States. It is perhaps only natural, therefore, that Canadian-American trade should not make the same claim on the attention and consideration of the United States as it does on Canada.

"A pressing concern in Canada is the question of the U.S. agricultural disposal programme, and in particular that of wheat and wheat flour, which has been more vigorous and more aggressive in the last two years, and which denies fair competition for markets. Canada's carry-over of wheat amounted to more than 700 million bushels this year. It is vital to Canada's economy that some 300 million bushels of wheat be exported every year. Canada can compete for her share of the markets of the world providing other nations follow recognized competitive practices. The share of the world market for wheat by the U.S.A. has been increasing in recent years by its policies of surplus disposal, and that increase has come about mainly at the expense of Canada's export trade, which has been decreasing. The U.S. surplus disposal legislation has made it difficult, if not impossible, for Canada to maintain its fair share of the world's market. Canada cannot compete for agricultural markets against the dominant economic power of the U.S.A., with its export subsidies, barter deals, and sales for foreign currency.

"The free world faces not only the military but also the economic aggression of the U.S.S.R. Military alliances and joint co-ordination for defence are not enough. There must be economic co-operation, which in turn demands recognition by larger nations of the effect of their economic policies on smaller nations. Freedom cannot afford to allow any of the free nations to be weakened economically. We are co-operating in defence measures—why not to a greater degree in economic matters? The joint U.S.-Canadian Cabinet Committee on Trade and Economic Questions will meet in Washington in early October, and Canadians hope that this matter can be resolved by mutual agreement which will provide for a fair and reasonable solution of the problem of the disposal of wheat and other agricultural surpluses.

"One other matter deserves comment in the interest of clarification. Capital from the U.S.A. has played an important role in the development of Canadian resources. We welcome this investment and intend to continue to provide the best foreign investment climate in the world. The heavy influx of American investment has resulted in some 60 per cent of our main manufacturing industries, and a larger proportion of our mine and oil production, being owned and controlled by U.S. interests . . . There would be no potential harm in external ownership as long as companies engaged in these industries are developed in Canada's interests, and their policies take account in their direction of the interests of Canadians.

"There is an intangible sense of disquiet in Canada over the political implications of large-scale and continuing external ownership and control of Canadian industries. The question is being asked: 'can a country have a meaningful independent existence in a situation where non-residents own an important part of that country's basic resources and industry, and are therefore in a position to make important decisions affecting the operation and development of the country's economy?' Canadians ask that American companies investing in Canada should not regard Canada as an extension of the American market; that they should be incorporated as Canadian companies making available equity stock to Canadians. That there is cause for questioning seems clear when I tell you that it is estimated that of American-controlled firms operating in Canada not more than one in four offers stock to Canadians . . .

What I have said is not spoken in a spirit of truculence or of petition. My purpose is to have removed causes for disagreement which, unsolved, may diminish the spirit of understanding which is characteristic of our relationship . . ."

A similar warning to U.S. business undertakings to treat their branch plants in Canada as thoroughly Canadian enterprises, and to remind themselves more often that Canada was a separate nation and not a State of the Union, had been given by Mr. C. D. Howe, Minister of Trade and Commerce in the St. Laurent Administration, when addressing the Canadian Club in Chicago on Oct. 15, 1956.

Mr. Howe said that Americans doing business in Canada "should reckon with the normal feelings of nationalism which is present in Canada, just as it is in the United States." Canadians did not like "to be excluded from an opportunity of participating in the fortunes of large-scale enterprises incorporated in Canada but owned abroad," nor did they like "to see the financial results of large-scale Canadian enterprises treated as if they were the exclusive concern of the foreign owners." He suggested, therefore, that U.S. corporations establishing branch plants in Canada or searching for and developing Canadian natural resources should provide (*a*) opportunities for financial participation by Canadians as minority shareholders; (*b*) greater opportunities for advancement for Canadians technically competent to hold executive and professional positions; and (*c*) more and regular information about the operations of their subsidiary corporations in Canada. He described it as "an encouraging trend" that an increasing number of American companies were now giving Canadians an opportunity to participate in the equity holdings of Canadian-operated enterprises.

Figures issued by the Dominion Bureau of Statistics on Sept. 12 showed that by the end of 1956 Canadian businesses controlled by non-residents had a book value of $8,900,000,000, of which $7,500,000,000, or 82 per cent, was in U.S. hands. This meant that the book value of U.S.-controlled industry had increased by the record figure of $900,000,000 during 1956, whilst it was stated that during the first six months of 1957 another $250,000,000 of capital had come in for direct investment, most of it from the U.S.A.—(External Affairs Dept., Ottawa - Montreal Star - Financial Times)

B. PAKISTAN. — First Pakistani Commander-in-Chief of the Air Force.

Air Vice-Marshal Asghar Kahn was appointed C.-in-C. of the Pakistani Air Force on July 23, becoming the first Pakistani officer to hold this office. He succeeded Air Vice-Marshal A. W. B. McDonald, the last British Service chief of the Pakistani armed forces.—(Pakistani High Commissioner's Office, London)

A. SHIPPING. — The "Pamir" Disaster.

The West German training barque *Pamir* (3,103 gross tons) foundered on the night of Sept. 21 about 600 miles south-west of the Azores after encountering a hurricane in the Atlantic, shortly after sending out S.O.S. messages. Ships in the vicinity hastened to the position given in the S.O.S. message, and U.S. army aircraft joined in the search, but no trace was found of the *Pamir* herself and only six of her complement of 86 were rescued from lifeboats.

The *Pamir*, a steel four-mast barque fitted with auxiliary oil engines, was owned, together with her sister ship the *Passat*, by the *Stiftung Pamir und Passat* (Pamir-Passat Foundation), a co-operative organization formed by West German shipowners, with Government backing, to provide sailing ship training for future officers of the German merchant marine. Bound from Buenos Aires to Hamburg with a cargo of barley, she carried 51 cadets and a crew of 35. Five of the survivors, who had been in a waterlogged life-boat for 54 hours, were picked up by the U.S. freighter *Saxon* and transferred to the U.S. transport *Geiger*, which subsequently landed them at Casablanca. The sixth survivor was rescued by the U.S. coast-guard cutter *Absecon*, transferred to the French liner *Antilles*, and landed at Puerto Rico. Although the search by ships and aircraft continued for several days, no more survivors were found; the U.S. air base at Lagens (Azores), which had been mainly responsible for co-ordinating the search, announced on Sept. 26 that hope of finding further survivors had been almost abandoned, but that the search would continue on a restricted basis for three more days.

The five survivors landed by the *Geiger* at Casablanca arrived at Hamburg by air on Sept. 29 and were interviewed by maritime board officials pending a full inquiry into the *Pamir's* loss to be held at Lübeck (the vessel's home port). Dr. Otto Wachs, chairman of the Pamir-Passat Foundation, stated subsequently that the survivors' accounts showed that the *Pamir* had attempted to ride out the hurricane but, owing to the destruction of her sails and the impossibility of keeping her head-on to the sea, had been literally driven on to her side and had gone down intact, having been submerged by the force of the hurricane.

The disaster caused widespread sorrow throughout Western Germany, and on Sept. 29 memorial services were held in Hamburg churches for those who had lost their lives and flags flown at half-mast throughout the Federal Republic. (Lloyds' List and Shipping Gazette - Die Welt, Hamburg - Times - Daily Telegraph)

Note. Built by Blohm und Voss in 1905 for the "Cape Horn" fleet of nitrate carriers owned by the Hamburg firm of Ferdinand Laeisz, the *Pamir* was acquired in the early 1930's by the Finnish sailing ship owner Captain Gustav Erikson, of Mariehamn. After featuring regularly in the pre-war "Australian grain ship races," the vessel was interned in New Zealand in World War II, but later re-joined the Erikson fleet and in 1949, together with Erikson's *Passat* (see below), sailed in the last "grain ship race" ever to take place. Laid up on arrival in Britain, the two ships were sold in 1951 for breaking up, but before work had started were bought "largely for sentimental reasons" by Herr Schliewen, a Lübeck shipowner, who had them fitted with auxiliary oil engines. In 1954 they were taken over by the Pamir-Passat Foundation and were completely overhauled and refitted by Blohm und Voss.

The *Passat* (built by Blohm und Voss for the Laeisz firm in 1911) had sailed from Buenos Aires for Hamburg shortly before the disaster to the *Pamir*.—(Lloyd's List and Shipping Gazette - Liverpool Journal of Commerce).

B. PERU.—Return of Señor Raul Haya de la Torre.

Señor Raul Haya de la Torre, leader of the Aprista party (*Alianza Popular Revolucionaria Americana*), returned to Peru from exile on July 20. After spending over five years in the Colombian Embassy in Lima, where he had sought asylum, Señor Haya de la Torre was allowed to leave Peru in April 1954 under an agreement between the Colombian and Peruvian Governments and went to Mexico, having received a permit from the Mexican Government to stay in that country. On July 28, 1956, following the inauguration of President Prado, the new Peruvian Congress had passed legislation legalizing the Aprista party and revoking the law under which Señor Haya de la Torre had been exiled.—(New York Times)

(Prev. rep. 15047 A; 13698 B.)

C. SAUDI ARABIA. — Membership of International Bank and International Monetary Fund.

Saudi Arabia became a member of the International Bank and the International Monetary Fund on Aug. 26. Its quota in the I.M.F. is $10,000,000 and its subscription to the capital stock of the Bank is 100 shares with a par value of $10,000,000. Saudi Arabia's admission brought the total membership of both institutions to 62, the total of members' quotas in the Fund to $8,981,000,000, and the total subscribed capital of the International Bank to $9,808,400,000.—(International Monetary Fund - International Bank, Washington)

(Prev. rep. 15707 D.)

D. UNITED KINGDOM. — Gold and Dollar Reserves in September.

The Treasury announced on Oct. 2 that the sterling area's gold and dollar reserves had fallen during September by $292,000,000, after taking into account (*a*) the payment of $134,000,000 to the E.P.U. in respect of the U.K.'s deficit in August; (*b*) the payment of $3,000,000 to creditor countries in the E.P.U. under bilateral settlements. No drawing had been made on the Export-Import Bank credit. As a result, the gold and dollar reserves stood at $1,850,000,000 on Sept. 30 — the lowest level since June 1952.

The decline in the reserves in September was the heaviest suffered since January 1952 and, it was pointed out in the Press, was largely to be attributed to speculation against the pound. The Treasury explained that the drain in the first three weeks of September had amounted to $295,000,000, which indicated that the reserves had risen by some $3,000,000 in the final nine days of the month, following the increase in the Bank Rate and the announcement of the Government's new economic measures on Sept. 19.

Provisional figures for the E.P.U. September settlement showed that Britain had a deficit of £62,000,000; three-quarters of this would be settled in gold or dollars (involving a payment of a further $130,000,000 during October) and the remaining quarter by an increase in the U.K.'s debt to the Union. The Treasury stated in this connexion that less than £1,000,000 of the E.P.U. deficit had been incurred since Sept. 21.

Since Sept. 27 sterling had continued to rise in the international exchange markets, the London-New York spot rate reaching $2.79 ⅜ on Oct. 1 the highest level since March 12, whilst the transferable sterling rate in Zürich rose to $2.7735. In spite of a slight weakening on Oct. 2 after the announcement of the gold and dollar reserve figures, the London-New York spot rate closed at $2.79 ⅛, whilst the transferable sterling rate in Zürich remained at $2.7735. (Treasury Press Office, London - Times - Financial Times) **(Prev. rep. 15770 A.)**

Corrigendum. In report 15770 A the date in the third line of the first paragraph should read Sept. 19, not Sept. 9 as stated in part of the issue. Ed. K.C.A.).

E. DENMARK - NETHERLANDS - UNITED KINGDOM. — Agriculture. - Regular Consultations of Bacon Producers.

A meeting was held in London on Oct. 1-2 between representatives of bacon producers in Denmark, the Netherlands, and the United Kingdom, to consider current problems of production and marketing, the talks being a continuation of earlier discussions at Copenhagen and The Hague. It was announced on Oct. 2 that it had been agreed that regular consultations should take place in future between producers and other bacon interests from the three countries to examine production trends and to review the situation, and that the meetings would take place alternately in Amsterdam, Copenhagen, and London.

A 10 per cent ad valorem duty on bacon imported from countries other than the Commonwealth and the Irish Republic came into force in the U.K. on Oct. 1, 1956, when the import of bacon reverted from Government account into private hands. No quantitative restrictions are applied to imports from O.E.E.C. countries or the sterling area.

It was stated in the Press that during the current year bacon prices had fluctuated widely on a generally falling market, and that considerable concern was felt about the future of prices in view of the recent increase in the pig population in Denmark and, to a lesser extent, in the U.K. (Times - Daily Telegraph - Financial Times) **(Prev. rep. U.K. Bacon Imports, 14780 B; 15578 A, page 15579.)**

F. INDIA. — Inauguration of Eastern, Southern, and Western Zonal Councils.

The Eastern Zonal Council, under which are grouped the States of Bihar, West Bengal, Assam, and Orissa, was inaugurated by Pandit Pant, the Indian Home Minister, on April 30, having its seat at Calcutta; the Southern Zonal Council, covering the States of Madras, Andhra Pradesh, and Kerala, was inaugurated in Madras (its future seat) on July 11; whilst the Western Zonal Council, comprising the States of Bombay and Mysore, held its first meeting in Mysore City on Sept. 20. The Southern Zonal Council decided that Mysore should also be invited to all its future meetings, although it belonged to the Western Zone. The Councils were set up under the States Reorganization Act of 1956.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. 15510 F.)**

OCTOBER 5—12, 1957

A. SOVIET UNION. — Launching of First Man-made Earth Satellite into Outer Space.

The Tass Agency announced at about midnight on Oct. 4, in an English language broadcast, that the Soviet Union had successfully launched an earth satellite by means of a carrier rocket; that the satellite, with an orbital velocity of some 8,000 metres (five miles) per second (about 18,000 miles an hour), was now circling the earth on an elliptical trajectory; that "according to calculations which are now being checked by direct observation" it would move at altitudes of up to 900 kilometres (560 miles) above the earth; and that it would take 95 minutes to make one complete revolution, its orbit being inclined at an angle of 65 degrees to the equatorial plane.

The satellite, the statement added, was in the form of a sphere with a diameter of 58 centimetres (nearly 23 inches) and a weight of 83.6 kilogrammes (184 lb.). It carried two radio transmitters continually sending signals with frequencies of 20.005 and 40.002 megacycles (the corresponding wavelengths being about 15 and 7.5 metres) and "powerful enough to ensure high fidelity reception by large numbers of amateur wireless enthusiasts." The telegraphic signals from each set lasted about 0.3 seconds with pauses of the same length, the signals on one frequency being sent during the pause in the transmission on the other.

The announcement also said that the satellite's flight "can be observed in the rays of the rising and setting sun through binoculars, small telescopes, etc.," that on Oct. 5 the satellite would twice pass over the Moscow area—at 1.46 a.m. and 6.42 a.m. (Moscow time), and that reports on its subsequent movements would be broadcast regularly by Soviet radio stations. It added that, as there was no authentic knowledge about the density of the rarefied upper layers of the atmosphere, there were at the present moment no data to determine exactly how long the satellite would exist and where it would dive into denser layers of the atmosphere. Calculations indicated that at the end of its life its tremendous velocity would cause it to burn out "several dozen kilometres" above the earth.

The announcement concluded: "The possibility of space flight by means of rockets was first scientifically established in Russia at the end of the 19th century in the works of the Russian scientist Konstantin Tsiolkovsky. The successful launching of the first man-made earth satellite makes a tremendous contribution to world science and culture. The scientific experiment staged at such a great height is of great importance for fathoming the properties of cosmic space and for studying the earth as part of our solar system.

"The Soviet Union proposes to send up several more artificial satellites during the International Geophysical Year. These will be bigger and heavier and will help to carry out an extensive programme of scientific research. Artificial earth satellites will pave the way for space travel . . ."

No information was published about where the satellite had been launched, but according to calculations made in the U.S.A. the launching was believed to have taken place in a north-easterly direction from a point north of the Caspian Sea at 9 p.m. (Greenwich mean time) on Oct. 4.

Some further details about the satellite were given on Oct. 6 by Dr. A. A. Blagonravov, leader of a group of Soviet scientists who were attending an International Geophysical Year conference on rockets and missiles in Washington, and one of the key figures in the Soviet Union's satellite programme, and by Professor Fesenkov, leader of a Soviet astronomical mission for the International Geophysical Year at present in Egypt.

Dr. Blagonravov said that when he and his colleagues left the Soviet Union preliminary plans for launching the satellite had been completed, but that discussion was still going on "as to which of two variants would be launched." "Two variants were prepared," he added, "and judging from the available information the simpler of the two variants was chosen." He described the satellite as "the simplest kind of baby moon," and attributed its weight of 184 lb. largely to the heavy batteries it carried. "All it contains," he continued, "is the radio transmitter. It is designed to establish the method of launching and getting into an orbit . . . Of course, this satellite is not going to give all the answers, but it makes the first forward step and will assure that the next one launched will be on the correct orbit."

Speaking in a U.S. television programme, Dr. Blagonravov said that the launching of the satellite had not been announced in advance because "this one was purely experimental," and the Russians themselves had not known for sure that it would work. It was not the one which the Soviet Union had said it would launch in connexion with the International Geophysical Year, but "the next one will be for the I.G.Y." and its launching would be announced in advance.

Dr. Blagonravov added that the Soviet Union would be "most happy to see the United States launch its own satellite," and expressed the belief that launchings by both countries would be of great service to science. The Russian ambition, he declared, was to contribute to science, and "not to gain control over the earth," and nobody should have "anything to fear" from the Soviet satellite programme, which, while it aimed at eventually carrying human beings into space, "will keep everyone too busy watching the instruments to think about anything else." The main thing to do now, he added, was to make satellites which "everyone feels can be safe."

He denied that the present satellite was transmitting code messages [as scientists working on the U.S. satellite projects had claimed to have established], and that it was propelled by atomic energy. First Soviet estimates had indicated that it would remain aloft for about a month, but this calculation was not an exact one.

Professor Fesenkov, on the other hand, said in Cairo on Oct. 6 that the satellite could "take pictures of the earth and other planets and, by magnifying them 400 times the original size, we can learn a lot about them." He added that his part had been "to install scientific instruments inside the satellite now transmitting information back to earth," and expressed the opinion that the satellite could remain in space for several months, depending on its altitude, power, speed, and the temperature of the upper atmosphere. He disclosed that the satellite had been launched after two years of research, and that preparations for launching it had started last autumn.

Moscow Radio announced on Oct. 7 that the rocket which had carried the Soviet satellite into outer space had fallen into the orbit behind the satellite; that it had now been detected following the satellite in its trajectory round the earth at a distance of 1,000 kilometres (625 miles); and that Soviet scientists expected the distance between the satellite and its rocket to grow. An earlier account of the progress of the satellite itself indicated that it was maintaining its initial speed of 18,000 miles an hour in its orbit round the earth.

It was believed by scientists in Western countries that a three-stage multiple rocket had been used to carry the satellite to its great height when it was launched, and that the rocket now circling the earth behind the satellite was the third one

Further information was given on Oct. 9 by an article in *Pravda* and in statements by Moscow Radio and the Tass Agency.

The *Pravda* article said on the method of launching that the satellite had been placed in the nose of a carrier rocket and shielded by a protective cone. The carrier rocket had been fired into the zenith but had then gradually been shifted away from its vertical ascent, and at the end of the flight to the orbit which had been decided upon had moved parallel to the earth's surface, at an altitude of several hundred kilometres and with a speed of some 8,000 metres a second. After the engines had stopped functioning, the protective cone had been jettisoned and the satellite had detached itself from the rocket and begun to move independently. Now not only was the satellite circling the earth but also the carrier rocket and the protective cone.

On the satellite and its equipment *Pravda* said that its casing was made of aluminium alloys, was hermetically sealed, and had its surface polished and specially treated. Before being launched the satellite had been filled with gaseous nitrogen, the forced circulation of which was to ensure the maintenance of an even temperature within the sphere and to regulate the thermal resistance between the casing and the equipment inside. There were four radio antennae attached to the sphere in the form of metal rods respectively 7ft. 10½ inches and 9 ft. 6 inches long; the rods had been folded against the body of the carrier rocket when the satellite was sent to its orbit, but had opened out on their swivels after the satellite had become detached.

In order to register the processes taking place in the satellite, it had been equipped with sensitive elements which were changing the frequency of the telegraphic messages and the ratios between the length of these messages and the pauses in accordance with changes of temperature, etc., inside the satellite. It was also stated that the radio messages were being recorded for subsequent decoding and analysis by electronic computers, but that the transmitter might cease to function after a certain time because of, for instance, damage from meteoric particles or because of the limited supply of electric energy.

Moscow Radio said that the time taken by the satellite to complete its orbit was diminishing by three seconds every 24 hours, that it could be assumed that it would continue its flight round the earth for a considerable time, and that so far only insignificant changes had taken place in the distance between the satellite and its rocket.

The Tass announcement said that a preliminary analysis by Russian scientists of the satellite's trajectory had shown that colder temperatures than had been assumed prevailed at heights from 200 to 300 miles. Professor Valerian Krasovsky, a specialist on the upper layers of the atmosphere, was quoted as saying that the density at these heights was also many times lower than had previously been supposed. He added that "in such conditions the satellite may continue moving for an indefinite period."

The expected movements of the satellite—in Russian, *sputnik*—were broadcast each night for the following day by Moscow Radio, which gave details of the towns and cities over which the satellite would pass at a given time. Scientific institutions, official radio observation posts, and radio amateurs throughout the world followed the movements of the satellite by picking up its radio signals ("bleeps"), which

could clearly be heard when it was passing nearby, and the B.B.C. and other broadcasting services broadcast in their news bulletins on Oct. 5 the sound of some of the first "bleeps" recorded by them, sounding like a rapid series of Morse code dashes.

In the Soviet Union observations were carried out by 66 optical observation stations and 26 clubs affiliated to the Voluntary Society for Assistance to the Armed Forces. In Britain the stations tracking the satellite included the B.B.C.'s listening post at Tatsfield (Kent), the Mullard radio astronomical observatory at Cambridge, the G.P.O. measuring stations at Banbury (Oxon) and Baldock (Herts.), and the Royal Observatory in Edinburgh. The giant radio telescope built for the radio-astronomical department of Manchester University at Jodrell Bank (Cheshire), which was just getting ready for tests when the Soviet satellite was launched, started tracking observations on Oct. 11 after its electrical equipment had been hurriedly completed by men working day and night on the installations.

In the United States the principal observations were made by the Smithsonian astro-physical observatory in Washington, the Naval research laboratory in charge of "Operation Vanguard" (the American satellite project—see below), and "Operation Moon Watch" established at Cambridge, Massachusetts, by the Smithsonian Institute for the U.S. satellite project. American scientists were tracking the satellite with signals recorded at nine points in North and South America.

The satellite or its carrier rocket were seen in various parts of the world, but visual observation was often prevented by cloud conditions. On Oct. 6 it was reported to have been seen over Hobart (Tasmania) and by members of the geophysical institute of Alaska University, and on the following day by thousands of people in Tasmania, Victoria and New South Wales. On Oct. 9 it was seen over Edinburgh by members of the Royal Observatory who described it as "as bright as the brightest star"; on Oct. 10 in Canada, Sweden, and Czechoslovakia; and on Oct 11 by many people in Northern Britain, especially in the Shetlands and Orkneys, and, for the first time, in Moscow.

The first photographs of the satellite or the rocket were reported to have been taken on Oct. 8 at the observatory near Canberra (Australia) and by professional photographers in Sydney and Melbourne, whilst early on Oct. 10 a Canadian scientist at Newbrook observatory (Alberta) and early on Oct. 11 a photographer at Dunfermline, Fife (Scotland), succeeded in taking pictures of the satellite moving across the sky.

The successful launching of the first earth satellite into outer space by the Soviet Union caused a sensation throughout the world. While great admiration was everywhere expressed at the achievement of the Soviet scientists and technologists, considerable concern and even alarm was felt, especially in the United States, that the lead gained by Russia might be exploited for military ends. In particular, it was pointed out that to launch a satellite weighing as much as 184 lb. up to a height of over 500 miles required rockets of an enormous power, and it was feared that this indicated that the Soviet Union had made great strides towards an inter-continental ballistic missile and was determined to gain absolute supremacy in the weapons of the future. At the same time there was widespread disappointment in the U.S.A. that the U.S. programme for launching a satellite during the International Geophysical Year—"Operation Vanguard"—had been delayed until the spring of 1958. Fuller details of the official reactions in the U.S.A. and other countries will be given in a subsequent article.

Professor Marcel Nicolet, secretary-general of the special committee for the International Geophysical Year which has its headquarters in Brussels, said on Oct. 7 that Russian experts had communicated "over a week ago" the wave-lengths on which the satellite would transmit, and that the conventions of the I.G.Y. had been fully respected by the Soviet Union. "Participating countries," he added, "are only bound to communicate successful launchings, which the Russians did within two hours."

By 3 p.m. G.M.T. on Oct. 9 the satellite had circled the earth 70 times and had travelled some 3,000,000 kilometres (about 1,850,000 miles); at about the same time on Oct. 11 it was moving on its one-hundreth orbit round the earth; and on Oct. 12 it had completed over 3,000,000 miles in 115 revolutions. Moscow Radio announced on Oct. 12 that the carrier rocket was now moving about three minutes ahead of the satellite.—(Soviet Embassy Press Dept., London - Times - Daily Telegraph - Manchester Guardian - Sunday Times - Observer - New York Times - New York Herald Tribune - Australian News and Information Bureau - Le Monde, Paris) **(Prev. rep. Soviet Artificial Satellite Project, 14192 A.)**

A. EASTERN GERMANY. — Re-election of President Pieck.

President Wilhelm Pieck was unanimously re-elected for another (his third) four-year term at a joint meeting of the *Volkskammer* and *Länderkammer* (the two Houses of the East German Parliament) on Oct. 7. President Pieck (81), a veteran Communist, has held the office since the formation of the German Democratic Republic.—(Neues Deutschland) **(Prev. rep. 13182 D.)**

B. UNITED KINGDOM - SOUTH AFRICA. — London Defence Talks. - Agreement on Over-Flying Rights for South Africa in High Commission Territories and on Increased Defence Co-operation.

Mr. F. C. Erasmus, the South African Minister of Defence, visited London in August-September for defence talks with Lord Mancroft, the U.K. Minister without Portfolio. A statement issued by the Ministry of Defence on Sept. 18 announced that a proposal by the Union that she should be granted certain over-flying rights in the High Commission Territories had been accepted in principle by the British Government, and that there would also be increased defence co-operation between the U.K. and South Africa. The statement was worded as follows:

"In the light of developments in the international situation and in British defence policy since the meetings between Mr. Erasmus and Mr. Selwyn Lloyd in 1955, the two Ministers reviewed the threat to Africa from external aggression and the contributions which their countries could best make to its defence against that threat.

"During the discussions reference was made to the arrangements agreed in 1955 for the grant of facilities to the Union Government to survey sites for the establishment of radar stations in Bechuanaland Protectorate and Swaziland for possible use in defence in the event of war. It was also then agreed that the survey might be extended to Basutoland if suitable sites could not be found outside its borders.

"On behalf of the U.K. Government Lord Mancroft accepted in principle a proposal by the Union Government for the grant of certain over-flying rights in the High Commission Territories. He also undertook to give careful consideration to further proposals made by the Union Government for facilities in the Territories in relation to planning for the defence of South Africa, while making it clear that responsibility for the security of the Territories themselves rested exclusively with the U.K. Government.

"The Ministers also considered the means by which the Union and the U.K. could most suitably further and develop the proposals for mutual co-operation, set out in the agreement concluded in June, 1955 [see 14294 A] on the need for international discussions with regard to regional defence. In particular, they reached the following conclusions:

(*a*) They should actively promote the implementation of the defence of the sea routes round southern Africa, with particular reference to its extension to other countries with interests lying within the strategic zone, with the purpose of arranging a conference of Ministers of all countries concerned at the appropriate time.

(*b*) There should be joint consideration at an early date of the best means of furthering the plans for ensuring the adequacy and security of logistic facilities and communications within southern Africa, and of bringing about a conference to integrate, forward, and develop the planning already begun at the Nairobi and Dakar conferences [see 13496 A; 11701 A] as contemplated in the memorandum. In the meantime the Union and the U.K. would develop co-operation on a bilateral basis in respect of the territories for which they are responsible."

It was pointed out in the British Press that, though not mentioned in the statement, there was a division of opinion between Mr. Erasmus and the British Government on how South Africa could best be defended, Mr. Erasmus having always advocated a regional anti-Communist defence organization south of the Sahara, whilst the British view was that the best defence for South Africa would be barring the gateway to Africa in the Middle East.

The arrangements for the grant of facilities to the Union Government to survey sites for radar stations in the British High Commission Territories, to which the statement referred, had been announced on Nov. 4, 1955, following defence discussions which Mr. Erasmus had had in London from Oct. 22-26. These sites, it was then stated, would be part of the Union's wider scheme of radar defence which had been outlined by Mr. Erasmus in the House of Assembly on March 7, 1955 (see 14144 C). Mr. Erasmus had subsequently visited the U.S.A. for discussions with U.S. experts on the latest radar equipment. (Times - Daily Telegraph - Cape Times)

C. INDIA. — Air Force. - Order for "Hunter" Fighters.

Hawker Aircraft Ltd. announced in London on Aug. 31 that they had concluded a contract with the Indian Government for the supply of a "substantial number" of single-seater and two-seater *Hunter* jet-fighter aircraft. A spokesman of the company stated that the order would be "normally in the neighbourhood of between 100 and 200 aircraft and between £20,000,000 and £30,000,000."

Hunter fighters are now in service with the R.A.F. and the Danish, Swedish, Belgian, Iraqi, and Peruvian air forces. Excluding the Indian order, export sales and U.S. "off-shore" orders to date were stated to have totalled about £126,000,000. (Times - Observer) **(Prev. rep. 15428 C.)**

A. MALAYA. — Government's New Surrender Terms for Terrorists. - Rejection of Communist Leader's Counter-proposal. - Terrorist Activities and Anti-terrorist Operations. - Defence Treaty with United Kingdom. - Provisions. - Legislative Council Approval and Signature. - Australian and New Zealand Association with Treaty. - Transfer to Federation of Royal Malayan Navy at Singapore.

Following the achievement of independence, the Government of the Malayan Federation announced on Sept. 3 a new amnesty offer to the Communist terrorists, to remain valid for four months. The terms of the amnesty, which were made known to the terrorists by the dropping from the air of millions of leaflets and by numerous broadcasts, provided that those who genuinely desired to give up the armed struggle and came out of the jungle with their arms, or informed the authorities about their location, would not be charged with any offence so far committed under the emergency. If they intended to be loyal to the elected Malayan Government and gave up their Communist activities, they would be helped to regain their normal life, and reunited with their families if they wished. Those who would not forswear Communism, but had surrendered with their arms, would be repatriated to Communist China (with their families, if they desired), without investigation or interrogation.

It was officially stated, however, that operations against the terrorists would not be suspended during the amnesty period, although the civilian population would be asked to help the terrorists to take advantage of the new terms

The Government's latest surrender offer of Sept. 3, like the earlier ones, met with no response from the Communist rebel leaders. On Oct. 4 Chin Peng, the chief rebel leader, sent a pamphlet to leading newspapers and news agencies in Singapore in which he said that the war in the jungle should end, that peace should prevail, and that the Communist Party would pledge its loyalty to the Government but would continue its political activities " by constitutional means." There was no evidence in the pamphlet that Chin Peng and his followers were prepared to accept the Government's amnesty terms.

After consultations with Dato Abdul Razak (the Deputy Premier and Defence Minister), Lt.-Gen. Sir James Cassels (Director of Operations), and other senior officers, Tengku Abdul Rahman, the Prime Minister, announced the same night that there was " nothing new " in the Communist manifesto.

" I told Chin Peng my terms at Baling," the Prime Minister said, " and he assured me he would lay down his arms when I became responsible for defence. Since then I have heard nothing from him. Neither has he laid down his arms." Tengku Abdul Rahman added that it was not enough that members of the Communist Party should merely pledge their loyalty, but that they must prove their genuine intention to be loyal to the elected Government before he could consider any peace overtures. If Chin Peng could make any new constructive proposals based on his complete surrender, and would write to him (the Prime Minister) directly, he would suggest arranging another meeting with Chin Peng.

After the previous Malayan Government's announcement of new surrender terms for Communist terrorists in March 1956 (see 15153 A), Tengku Abdul Rahman (then Chief Minister) had made another offer on Sept. 27, 1956, in which he promised that the Government would provide terrorists with a subsistence allowance of Malayan $100 each a month, for 12 months, if they agreed to return to China Referring to a Peking broadcast that the Malayan Communist Party was willing to begin negotiations to end the war, he said the terrorists were a beaten force, seeking face-saving terms. Leaflets were dropped from the air over the Malayan jungle in a campaign beginning on Nov. 11, 1956, which made known to the rebels the Government's determination to wipe out terrorism, and also informed them that they had no hope of outside assistance as the Chinese Prime Minister had advised all overseas Chinese to be loyal to local Governments.

Terrorist Activities. - Anti-terrorist Operations by Security Forces.

As a result of the undiminished operations of the security forces and the general improvement in the security situation, terrorist activities of the Communist rebels in general, and the number of serious incidents in particular, showed a further steady decline during the past 12 months, enabling the Government to declare additional areas as " white " (i.e. free from terrorists).

Among the more serious acts of terrorism committed by the Communist rebels during this period were the killing of an assistant manager of a rubber estate and two special constables in the Sungei Siput district of Perak (Oct. 25, 1956); an ambush on the road between Bentong and Manchis in Pahang, in which 7 Malay soldiers and a British staff-sergeant were killed (Dec. 26); an engagement near the Siamese border in which a patrol of the Royal Australian Regiment lost two men (June 24, 1957); a terrorist attack on a military vehicle in Johore in which a Malay civilian was killed and a Malay soldier wounded (Oct. 8); and an ambush in the jungle in Perak in which terrorists killed a British soldier who was leading a patrol of the 1st Bn. Royal Lincolnshire Regt. (Oct. 10).

Anti-terrorist operations by the security forces included the following :

Lau Lee, known as the right-hand man of Chin Peng, was ambushed and killed at Tangkak, Johore, on Nov. 18, 1956; 174 terrorist sympathizers and supporters in South Johore who had " flouted and frustrated the administration " were arrested on Nov. 29, 101 of them being kept in custody under the emergency regulations; and Chau Choi, a Communist Party branch secretary, and his mistress were shot dead near Ipoh on Jan. 20, 1957. A patrol of the Royal Australian Regiment on March 7 made " one of the most important finds since the emergency began," when it captured an arms factory of the terrorists in the Kuala Kangsar area of Perak. In May, security forces captured Chin Voon, who was on the wanted list, in an ambush near Ipoh, in Perak, and also destroyed the terrorists' centre in the Ulan Langat district, described as one of the worst areas in the country. Local Communist leaders killed in May included the Negri Sembilan Communist chief, Teng Fook Loong, and the Secretary of the Malayan Communist State Committee, Ah Fatt.

It was announced on Aug. 13 that Malaya was free of major incidents of terrorism for the first time since the beginning of the emergency in June 1948, with only one civilian wounded and no police or military casualties in July. An area of 381 square miles in the State of Kelantan (Eastern Malaya) was declared ' white ' on July 15, and a similar announcement, accompanied by the removal of food control and curfew restrictions, was made on Aug. 26 with respect to a 90 square-mile area extending from Tanjong Piai, on the southern tip of the Malay peninsula, to about 35 miles north; this increased the total ' white ' area to 30,690 square miles, or over three-fifths of the country. Earlier, on July 14, Tengku Abdul Rahman had mentioned " the end of 1958 " as the target-date for ending the emergency, saying that the Government would go all out in the war against the terrorists, and would make use of all available resources at its disposal.

U.K.-Malayan Defence Treaty.

Details of the future defence arrangements between the United Kingdom and the Malayan Federation were published as a White Paper in London and Kuala Lumpur on Sept. 18. The agreement, which had been initialled by both Governments, was to be finally signed after being approved by the Federation's Parliament. It was also stated that Australia and New Zealand proposed to associate themselves with the agreement, whose provisions were as follows :

Art. 1. " The Government of the United Kingdom undertake to afford to the Government of the Federation of Malaya such assistance as the Government of the Federation of Malaya may require for the external defence of its territory."

Art. 2. The U.K. Government agreed to joint Army training, to pay for certain capital costs in expanding the Federation's armed forces, and to foster close military co-operation. If requested, the U.K. Government would provide staff to help in the running and training of the Malayan armed forces, as well as other facilities such as courses of instruction abroad and expert technical advice. Supplies would be provided from the British bases in Malaya.

Art. 3. This allowed Britain to maintain in Malaya " such naval, land, and air forces, including a Commonwealth strategic reserve, as are agreed between the two Governments to be necessary for the purposes of Article 1 and for the fulfilment of Commonwealth and international obligations."

Art. 4. This gave the U.K. Government the right to maintain and use the bases it now occupies, and an annex provided for special legislation to give the Services a 30-year lease on the land, with an extension, if they wished it, " for such further periods as may be necessary to implement the terms of this agreement." The U.K. Government agreed to leave a base if they were asked, but the Malayan Government undertook to provide " agreed alternative accommodation and facilities at their own expense."

Art. 5. This covered the status of U.K. forces in Malaya and jurisdiction over them. An annex, which forms part of the formal agreement, gave the " primary right " to hear cases against members of the U.K. armed forces to the British Service authorities where the case was between Servicemen or arose out of an act committed while a soldier was on duty. [This is the normal provision adopted by NATO countries for Allied forces stationed on their territory.] However, as the Malayan Government wanted the present situation to continue, in which some offences covered by this provision were tried in the Malayan courts, an exchange of letters provided for administrative arrangements " under which the civil courts of the Federation would commonly exercise jurisdiction over such offences in accordance with existing practice."

Art. 6. " In the event of a threat of armed attack against any of the territories or forces of the Federation of Malaya, or any of the territories or protectorates of the U.K. in the Far East, or any of the forces of the U.K. within those territories or protectorates or within the Federation of Malaya, or any other threat to the preservation of peace in the Far East, the Governments of the Federation of Malaya and of the United Kingdom will consult together on the measures to be taken jointly or separately to ensure the fullest co-operation between them for the purpose of meeting the situation effectively."

Art. 7. "In the event of an armed attack against any of the territories or forces of the Federation of Malaya, or any of the territories or protectorates of the U.K. in the Far East, or any of the forces of the U.K. within any of those territories or protectorates or within the Federation of Malaya, the Governments of the Federation of Malaya and of the United Kingdom undertake to co-operate with each other and will take such action as each considers necessary for the purpose of meeting the situation effectively."

Art. 8. "In the event of a threat to the preservation of peace or the outbreak of hostilities elsewhere than in the area covered by Articles 6 and 7, the U.K. Government shall obtain the prior agreement of the Government of the Federation of Malaya before committing U.K. forces to active operations involving the use of bases in the Federation of Malaya; but this shall not affect the right of the U.K. Government to withdraw forces from the Federation of Malaya."

Art. 9. "The U.K. Government will consult the Government of the Federation of Malaya when major changes in the character or deployment of the forces maintained in the Federation of Malaya, as provided for in accordance with Article 3, are contemplated."

Art. 10. Both Governments would give each other notice of major administrative or legislative proposals affecting the agreement.

Arrangements for Employment of Oversea Commonwealth Forces in Emergency Operations.

A second White Paper, covering the employment of oversea Commonwealth forces in emergency operations in the Federation, was also published on Sept. 18.

This White Paper stated that the Malayan Government had asked Britain, Australia, and New Zealand to continue to make their forces available, and that the U.K., Australian, and N.Z. Governments had agreed to do this "to such an extent as they may each at any time consider practicable in the light of their total commitments."

The operations would be controlled by the Emergency Operations Council of the Malayan Government. The British Government would supply an officer of the rank of lieutenant-general to be Director of Emergency Operations, who would have general direction of the Commonwealth forces, but not command. He would be answerable to the Malayan Government, whilst the commanders of the Commonwealth forces would remain responsible to their national authorities. The Commonwealth forces would be available only in response to a request by the Malayan Government, and would only be used if, in the view of the Emergency Operations Council, suitable Malayan forces were not available.

The Commonwealth forces would, "as far as possible, be engaged in direct operations against the Communist terrorists, although they shall not be debarred from other essential duties connected with the campaign." It was specified that Commonwealth forces "would not be employed on operations of a type of which their national authorities may disapprove, or which in the opinion of those authorities are militarily unsound." The three chief Service commanders of the Commonwealth forces were to become members of the Emergency Operations Council.

Defence and Mutual Assistance Treaty approved by Malayan Legislative Council. - Signature of Treaty.

The U.K.-Malayan treaty of defence and mutual assistance was considered by the Legislative Council of the Federation on Oct. 2-3 and approved on a voice vote on the latter day.

Tengku Abdul Rahman, speaking on Oct. 2, emphasized that the agreement reflected both in word and spirit the independence of the new Malaya, and said that he expected it to be honoured by the Federation. He added that the agreement was open to review, and undertook to review its working within one year. A treaty of this kind, he said, did not normally require parliamentary approval and it would not be discussed in the British Parliament. He had, nevertheless, brought it before the Legislative Council in fulfilment of a promise made to the electorate.

Dealing with the provisions of the treaty, the Prime Minister stated that the Federation would not be committed to a war in which Britain was involved except where it concerned Singapore, Borneo, Brunei, and Hong Kong, and would also not be committed if Australia and New Zealand were attacked. Rejecting the arguments put forward by some members (see below) that the treaty invited aggression or committed Malaya to war or compromised her sovereignty, Tengku Abdul Rahman said that aggression did not arise just through allowing bases in Malaya to a friendly country; it arose from a desire for conquest by an aggressor, and there was no safety for any country if others were intent on making war. In these days of internationalism the stationing of foreign forces in one's territory did not constitute an infringement of sovereignty. Malaya, the Prime Minister declared, could not stand alone. She could spend only one-tenth of her revenue on her armed forces, and it would be a crime to leave her open to attack from without.

The only members who spoke against the treaty were the sole elected representative of the Pan-Malayan Moslem Party and the four nominated members representing the Malayan Trade Union Council; the latter, however, announced that they would not vote against the treaty because their role was primarily concerned with workers' interests, and the Pan-Malayan Moslem member also abstained.

Following its approval by the Federation Legislature, the treaty was formally signed on Oct. 12 by Tengku Abdul Rahman and the British High Commissioner, Mr. G. W. Tory.

Transfer of Royal Malayan Navy to Federation.

In his speech opening the Federation Legislature on Sept. 3 the new Head of State (Tuanku Sir Abdul Rahman) announced that the whole of the Royal Malayan Navy at Singapore was to be transferred to the Federation, with the agreement of the British and Singapore Governments; the transfer would be carried out as soon as a suitable base had been built in the Federation.

The Royal Malayan Navy has a strength of about 700 men, most of them Malays, and has one principal sea-going vessel and several coastal and patrol craft. The Federation had hitherto paid towards its upkeep, although it was mainly used in Singapore waters. It was stated in the Press that after the transfer Singapore would rely solely on the Malaya Royal Naval Volunteer Reserve to assist the Royal Navy.

Terrorist, Security Forces' and Civilian Casualties, 1948-57.

It was stated at the headquarters of the Director of Operations on Aug. 29 that since the beginning of the emergency in June 1948 the Communist terrorists had suffered 9,502 casualties, whilst 710 British, Commonwealth and Malayan troops, more than 1,300 police, and over 2,500 civilians had been killed by them. -(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Emergency, 15153 A; Defence Agreement, 15454 A.)**

A. AVIATION. — Opening of California-London Service via Polar Route.

A new direct air service from Los Angeles to London over the Polar route was inaugurated by Trans-World Airlines on Sept. 30 when its "Jetstream Starliner" (the new Lockheed piston-engined L.1649) landed at London Airport after the first non-stop flight from California to Britain ever to be completed. The journey over the 5,500-mile route took 18 hours 32 minutes (an average of 308 miles per hour), compared with about 24 hours, including a three-hour stop in New York, for the existing route *via* that city.

The new route, following the Great Circle, crosses northern Canada and leads north of Winnipeg and over Hudson Bay to Baffin Island, passing 150 miles south of the Magnetic Pole; from Baffin Bay, where a refuelling stop is provided at Frobisher Bay, it runs *via* the southern tip of Greenland and across Ireland to London. Because of favourable winds the aircraft, which was piloted by Capt. R. J. Dick and carried 31 passengers, was able to fly through to London without stopping at Frobisher Bay.

On its return flight the aircraft left London at dusk on Oct. 1 and landed at San Francisco, again after a non-stop journey, in the morning of Oct. 2, covering the distance in 23 hours 20 minutes and thus creating two new world endurance records for distance and time in the air for a civil airliner. (New York Times - New York Herald Tribune - Times - Daily Telegraph - Financial Times) **(Prev. rep. Trans-Polar Routes, 14359 C; 13916 D.)**

B. RHODESIA AND NYASALAND FEDERATION. — Creation of Economic Advisory Council. - Re-examination of Less Important Development Plans.

The Federal Prime Minister, Sir Roy Welensky, announced on Sept. 21 that an Economic Advisory Council would be established immediately to advise the Government on particular aspects of economic policy referred to it. The Council would include representatives of agriculture, commerce, the commercial banks, industry, and mining, as well as three senior Civil servants concerned with economic affairs, and would be under the chairmanship of the Governor of the Bank of Rhodesia and Nyasaland, Mr. A. P. Grafftey-Smith. Sir Roy stated on Sept. 23 that the first problem to be investigated by the new Council would be the general question of immigration.

In an order to the Federal Treasury issued on Sept. 21, following the increase in the U.K. Bank Rate from 5 per cent to 7 per cent, Sir Roy Welensky directed that no development project vital to the Federation's expansion should be stopped or held up on account of the problems facing sterling, but that all other projects should be re-examined with a view to avoiding unnecessary expenditure on "frills of any kind." Mr. Grafftey-Smith stated on Sept. 23 that the Bank of Rhodesia and Nyasaland had decided to make no change in its discount rate.—(Federal Information Dept., Salisbury)
(Prev. rep. Economic Development, 15659 A.)

C. LONDON. — New Lord Mayor.

Sir Dennis Truscott, Alderman of Dowgate, was elected Lord Mayor of London at Guildhall on Sept. 28 for the civic year 1957-58, in succession to Sir Cullum Welch. The new Lord Mayor is chairman of Knight, Brown and Truscott Ltd., the printers.—(Times) **(Prev. rep. 15121 A.)**

A. UNITED KINGDOM. — Armed Forces. - Compensation Plans for Redundant Personnel.

The Government's plans to compensate officers and men prematurely retired from the Armed Services as the result of the intended reduction in the Forces were described in a White Paper (Cmd. 231) published on July 24 and summarized under cross-headings below.

Basic Factors of the Scheme. The main factors taken into account in devising the scheme were . (*a*) the curtailment of the expected period of service ; (*b*) the loss of promotion prospects ; (*c*) the loss of higher pension rates which longer service might have earned ; (*d*) additional difficulties in finding civil employment resulting from the increase in Service retirements. These factors could not always be precisely evaluated, and the problem also varied with the Service to which the man belonged, his rank and age, and the retirement practice of his branch or corps. The Government believed, however, that its scheme was as fair as possible to all concerned.

Officers. Officers serving on permanent commissions and prematurely retired would receive special capital payments and, if possessing over 10 years' qualifying service, retired pay and terminal grants in addition.

The special capital payments would be up to £6,000 for Army colonels or brigadiers (or the equivalent ranks in other Services) ; up to £5,500 for lieutenant-colonels, or the equivalent ; and up to £5,000 for other officers. The payments would reach this level when the officer had 15 years' qualifying service, but would decrease as he approached the expected retirement age for his rank and branch and passed the point at which his promotion prospects declined. They would be based on the paid rank held at the time of retirement, whether acting, temporary, or substantive.

The existing rule, under which retired pay and terminal grants were not awarded for service under 20 years, would be waived to allow proportionate rates to be paid for shorter periods down to 10 years, and the age restriction for commuting retired pay would also be waived. Special arrangements would apply to certain categories of officers serving on non-permanent commissions.

Ratings, Soldiers, and Airmen. Compensation for men serving on pensionable engagements had been based on the same general lines as that for officers, but owing to major differences in their engagement and pension terms the scheme had had to be devised on somewhat different lines. In order to mitigate the loss of entitlement to pension owing to premature retirement it had been decided (*a*) to reduce the minimum period of service qualifying for pension from 22 years to 10 (after age 18) ; (*b*) to calculate pensions and terminal grants by adding 5 years to the service of men who had actually served for at least 10 years (after age 18), provided that the addition did not extend the total service beyond the limit of their current engagements.

In addition, " other ranks " prematurely retired would receive special capital payments of up to £1,250. Payments would reach this level when the " other rank " had 15 years' service (after age 18), and would subsequently decrease as the end of the current engagement was approached.

Selection Procedure. As soon as the composition and rank-structure of the new all-Regular Services had been worked out sufficiently to enable the extent of the redundancy in a particular branch, corps, or arm to be determined, the officers and men within the categories affected would be given an opportunity to apply to be retired with compensation. Subject to maintaining the right balance of age, experience, and special skill, the officers and men to be retired would be selected from these applicants.

Assistance in Resettlement. The additional difficulties in finding civil employment which might result from the temporary increase in Service retirement would not be confined to those prematurely retired, but would equally affect others leaving the Services at the same time. A special grant of £500 to assist in resettlement would therefore be paid to all other officers on permanent commissions of or below the rank of brigadier (or the equivalent in other Services) who retired in the ordinary way at the end of their careers (or were invalided out) during the run-down period. This grant would also be paid to some non-permanent officers.

A £250 grant for the same purpose would be paid to " other ranks " leaving the Services at the end of engagements of 15 years or over, or invalided out before completing them.

Special resettlement grants would not, however, be paid to men permitted to retire voluntarily in the ordinary way or compulsorily retired for misconduct.

General. (*a*) All the capital payments announced above would be tax-free. (*b*) Provision would be made for dealing specially with small groups or individuals whose circumstances were exceptional. (*c*) Officers and men who, within two years of being compulsorily retired, took up Retired Officer or similar posts in the Service Departments, or who obtained established appointments in the Civil or Foreign Services under special schemes, would have to refund part of the special capital payment ; their retired pay or pensions and terminal grants would not, however, be affected. (*d*) The scheme would not apply to men recruited outside the U.K on special conditions of service, or to the Women's Services.

Typical examples of the operation of the scheme in each Service are given below :

Royal Navy.

Officers on Permanent Commissions.

Captain, retired at 42 with under 6 years in the rank and 21 years' reckonable service · Retired Pay, £800 p.a. ; Terminal Grant, £2,400 ; Special Capital Payment, £6,000.

Commander, retired at 40 with 19 years' reckonable service : Retired Pay, £650 p.a. ; Terminal Grant, £1,950 ; Special Capital Payment, £5,500.

Lieutenant-Commander, retired at 40 with 19 years' reckonable service : Retired Pay, £555 p.a. ; Terminal Grant, £1,665 ; Special Capital Payment, £5,000.

Lieutenant, retired at 33, with 12 years' reckonable service : Retired Pay, £355 p.a. , Terminal Grant, £1,065 ; Special Capital Payment, £5,000.

Ratings on Pensionable Engagements.

Chief Petty Officer, signed on at 18 to complete 22 years' service and retired at 35 after having been in the rank for 4 years : Weekly Pension, £2 17s. 10d ; Terminal Grant, £275 ; Special Capital Payment, £1,250.

Petty Officer, signed on at 18 for 22 years' service and retired at 35 after having been a Petty Officer for 8 years . Weekly Pension, £2. 12s. 7d. ; Terminal Grant, £225 ; Special Capital Payment, £1,250.

Army.

Officers on Permanent Commissions.

Brigadier, late R.E., retired at 50 with 29 years' reckonable service : Retired Pay, £1,150 p.a. , Terminal Grant, £3,450 ; Special Capital Payment, £2,330.

Colonel, late Infantry, retired at 49 with 28 years' reckonable service : Retired Pay, £1,000 p a ; Terminal Grant, £3,000 ; Special Capital Payment, £3,245.

Lieutenant-Colonel, R A., retired at 45 with 24 years' reckonable service : Retired Pay, £800 p.a ; Terminal Grant, £2,400 ; Special Capital Payment, £3,500.

Captain, retired at 33 with 12 years' reckonable service : Retired Pay, £355 p.a. ; Terminal Grant, £1,065 ; Special Capital Payment, £3,500.

Soldiers on Pensionable Engagements.

Warrant Officer, Class I, signed on at 18 for 22 years, now completed, subsequently signed on for 5 years' continuation service, and retired at 40 after 2 years in the rank : Weekly pension, £5 1s. 11d. ; Terminal Grant, £490 ; Special Capital Payment, £1,250.

Sergeant, signed on at 18 years for 22 years, of which 17 completed, aged 35, with 10 years in the rank : Weekly Pension, £2 14s. 5d. ; Terminal Grant, £225 ; Special Capital Payment, £1,250.

Royal Air Force.

Officers on Permanent Commissions.

Air Commodore (*General Duties Branch*), retiring at 50 after 29 years' reckonable service : Retired Pay, £1,150 p.a. ; Terminal Grant, £3,450 ; Special Capital Payment, £2,330.

Air Commodore (*Technical Branch*), retiring at 53 after 32 years' reckonable service : Retired Pay, £1,150 p.a. ; Terminal Grant, £3,450 ; Special Capital Payment, £3,550.

Group Captain (*Equipment Branch*), retiring at 50 after 29 years' reckonable service : Retired Pay, £1,000 p.a. ; Terminal Grant, £3,000 ; Special Capital Payment, £3,930.

Wing Commander (*Equipment Branch*), retiring at 43 after 22 years' reckonable service : Retired Pay, £740 p.a. ; Terminal Grant, £2,220 ; Special Capital Payment, £5,500.

Squadron Leader (*Equipment Branch*), retiring at 43 with 22 years' reckonable service : Retired Pay, £625 p.a. ; Terminal Grant, £1,875 ; Special Capital Payment, £4,355.

Flight Lieutenant (*General Duties Branch*), retired at 33 with 12 years' reckonable service : Retired Pay, £355 p.a. ; Terminal Grant, £1,065 ; Special Capital Payment, £3,500.

Airmen on Pensionable Engagements.

Warrant Officer, retired at 50 after 8 years in the rank : Weekly Pension, £8 2s. 6d. ; Terminal Grant, £810 ; Special Capital Payment, £1,250.

Flight Sergeant, retired at 39 after 6 years in the rank : Weekly Pension, £3 8s. 9d. ; Terminal Grant, £323 ; Special Capital Payment, £1,250.

Mr. Macmillan announced in the House of Commons on July 23 that, to assist redundant officers and men to find employment in civil life, the Minister of Labour would appoint a board to advise on the development of a Regular Forces Resettlement Service, with which existing agencies would be linked. The Board would include representatives of industry and commerce under the chairmanship of Sir Frederick Hooper, managing director of Schweppes Ltd., and a founder-member of the British Institute of Management. On the same day Mr. Macleod (the Minister of Labour) announced the appointment of Air Chief Marshal Sir Ronald Ivelaw-Chapman (Vice Chief of Air Staff) as Director of Resettlement, acting under the general direction of the new Board.—(Cmd. 231 ; Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. [illegible])

A. BRITISH COMMONWEALTH. — Finance Ministers' Conference at Mont Tremblant. - Acceptance of Canadian Proposal for Commonwealth Trade and Economic Conference in 1958. - Bilateral Anglo-Canadian Trade Talks. - British Proposal for Anglo-Canadian Free Trade Area. - Canadian Purchases in United Kingdom to be increased.

The conference of Commonwealth Finance Ministers, which had been agreed upon at the recent London conference of Commonwealth Prime Ministers [see 15637 A], was held at Mont Tremblant (Quebec) from Sept. 28-Oct. 1. Those participating were Sir Arthur Fadden, Federal Treasurer (Australia); Mr. Fleming, Finance Minister, and Mr. Churchill, Trade Minister (Canada); Mr. de Zoysa, Finance Minister (Ceylon); Mr. Gbedemah, Finance Minister (Ghana); Mr. Krishnamachari, Finance Minister (India); Sir Henry Haw-shik Lee, Finance Minister (Malaya); Mr. Macdonald, Finance Minister, (New Zealand); Mr. Amjad Ali, Finance Minister (Pakistan); Mr. Naude, Finance Minister (South Africa); Mr. Macintyre, Finance Minister (Federation of Rhodesia and Nyasaland); and Mr. Thorneycroft, Chancellor of the Exchequer, Sir David Eccles, President of the Board of Trade, and Mr. Maudling, Paymaster-General (United Kingdom).

The conference accepted a Canadian proposal to hold a Commonwealth trade and economic conference in the summer of 1958, probably in Canada.

The Ministers' decisions were summarized in a statement issued on Oct. 1, which announced the "agreed conclusions on the three questions that were discussed" as follows:

The Pound Sterling.

"A strong pound sterling is vital to the stability and economic progress not only of the sterling area and its individual members but also of the world trading community as a whole. The Ministers warmly supported the recent statements on sterling made by the Chancellor of the Exchequer in London and Washington [see 15770A], and recognized that its strength depends upon the joint and individual policies of the members of the sterling area. Essentially this involves each member-country living within its available resources. This does not—and should not—imply a static policy, for the resources of each country can be augmented by suitable policies directed towards strengthening its competitive position, increasing its savings, and promoting freer and expanding trade and payments and a larger flow of international capital."

European Economic Integration.

"The Ministers reviewed the progress made towards the ratification of the Treaty of Rome establishing the European Economic Community, and the effect of this treaty on the interests of the Commonwealth. They noted that the treaty would receive further consideration in international organizations.

"U.K. Ministers reported on the progress made following the U.K. initiative for the establishment of a free trade area in Europe. The Commonwealth Ministers recognized that the establishment of an outward-looking free trade area in Europe would broaden the advantages to be derived from economic integration in Europe, not only by the U.K. but by all the other participants. This was regarded as important, as it could contribute to agreed Commonwealth policies of expanding world trade.

"It was also agreed that there is need for effective machinery for continuous consultation among Commonwealth countries on matters related to the European Economic Community and the proposed free trade area. United Kingdom Ministers reaffirmed the undertakings previously given by their Government about the safeguarding of Commonwealth interests in the U.K. market for foodstuffs, drink, and tobacco."

Commonwealth Trade and Economic Conference.

"The Ministers approved the proposal of the Canadian Government that a Commonwealth trade and economic conference should be held at a convenient place and time in 1958, and agreed to recommend this proposal to their Governments. The changing pattern in trade, production, and development throughout the world presents all Commonwealth countries with new problems and new opportunities. They considered that the time is most opportune to assess these problems and opportunities jointly with particular reference to:

(*a*) the significance for Commonwealth countries of changes taking place in world trade;

(*b*) measures to expand trade between Commonwealth countries;

(*c*) progress towards the common objective of freer trade and payments;

(*d*) the progress and direction of economic expansion in the less developed countries of the Commonwealth and the sources of capital and technical assistance that may aid in their further development;

(*e*) economic and trade problems in regard to agriculture and other primary production;

(*f*) the prospects and implications, especially for Commonwealth countries, of the European Economic Community and the proposed free trade area;

(*g*) arrangements for continuing Commonwealth consultations on economic matters.

"It was agreed that the detailed preparatory work for the conference, including the formulation of the agenda and other procedural matters, should be entrusted to a committee of officials, and that this committee should be convened in London early in 1958."

The statement also said that the Ministers had welcomed the presence for the first time of the Finance Ministers of Ghana and the Federation of Malaya, and that the meetings had been held in "an atmosphere of cordiality and understanding."

At a Press conference on Sept. 28 Mr. Thorneycroft disclosed that during the forthcoming Anglo-Canadian trade talks in Ottawa (see below) Britain would be putting forward a proposal for an Anglo-Canadian free trade area. Mr. Fleming, who was also present, stated that although he had not yet received a formal proposal, it was "quite obvious that there will be formidable difficulties as far as the Canadian Government is concerned."

Mr. Thorneycroft stressed that the idea was quite distinct from the proposed European free trade area, but that if it were accepted it might be negotiated on a similar basis, with perhaps a 12-year period of graduated tariff reduction. Such an arrangement, he added, would be permissible under GATT and would not come under the stigma of discrimination. It was an "adventurous proposal" but was so far only informal, and was therefore not one to which the Canadian Government could be expected to give an immediate answer.

The Mont Tremblant conference was immediately followed by bilateral trade talks between Canadian and U.K. Ministers, which were held at Ottawa from Oct. 2-4. Those taking part were, on the Canadian side, Mr. Diefenbaker (the Prime Minister), Mr. Fleming, and Mr. Churchill, and, on the U.K. side, Mr. Thorneycroft and Sir David Eccles. At the end of the discussions it was announced that it had been agreed to take various steps to increase trade between Britain and Canada, including measures to bring about increased Canadian purchases in the U.K. The statement summarizing the results of the talks was as follows:

"It was the agreed conclusion that an expansion in Anglo-Canadian trade is a primary object of policy of both Governments, and consideration was given to methods whereby this object can best be achieved.

Among proposals discussed with this aim in view was the proposal of the U.K. Ministers for a free trade area with Canada. It was emphasized by the U.K. Ministers that this proposal involved not only the progressive removal of tariffs but also a speedier reduction in the quantitative restrictions now applied by the U.K. against imports from Canada. It was also emphasized by the U.K. Ministers that their proposal was a long-term one and not designed to come into full effect save over a period of 12 to 15 years.

The U.K. Ministers recognized that this proposal raised serious and complex problems and difficulties. In view of the long-term nature of the proposal the U.K. Ministers did not ask the Canadian Ministers for an expression of their views on it.

The Ministers for both countries therefore addressed themselves to the immediate problem of expanding the beneficial two-way flow of trade between Canada and the United Kingdom. It was agreed that in a number of ways the Canadian Government can assist U.K. sales and earnings in Canada with full regard for the interests of Canadian producers, and can thereby assist, within the framework of existing U.K. policy and undertakings, towards the reduction of remaining U.K. restrictions against importation from Canada. These ways include:

(*a*) A review of Government purchasing in Canada with a view to encouraging and facilitating sales by U.K. manufacturers of goods now imported from non-Commonwealth sources;

(*b*) A revision of the Canadian tariff relating to exemption of tourist purchases by Canadians making visits oversea; and

(*c*) A visit by a high-level trade delegation from Canada to the United Kingdom.

(1) Canadian Government purchasing falls into three categories: defence purchases, ordinary civilian purchases by the Canadian Government, and other types of purchases, including those of Crown companies.

The Canadian Ministers undertook to institute a detailed review, to be made in collaboration with the U.K. trade commissioner service in Canada, of those areas of Government purchasing where it seems reasonable to hope and expect that U.K. firms would be able to meet Canadian import requirements satisfactorily. The U.K. Ministers emphasized that they do not expect orders to be placed with U.K. suppliers unless their products are fully competitive.

(2) As regards defence purchases, the position is likely to continue to be influenced by the long lead-time involved in existing defence orders and in developing new types of equipment, combined with limitations on defence expenditures. The Canadian Government will welcome any possibility of increasing purchases from the U.K. of equipment now imported from non-Commonwealth sources.

(3) In regard to sales by U.K. firms of civilian items to Canadian Government departments and agencies, Canadian Ministers have undertaken that purchasing arrangements will be reviewed imme-

diately. Close contact will be maintained with the U.K. trade commissioners across Canada who, in turn, will acquaint U.K. exporters with new opportunities that can be opened up with respect to goods now imported from non-Commonwealth sources.

(4) The Canadian Ministers undertook to call for a review of the purchasing arrangements of Crown corporations and other Government agencies with a view to encouraging purchases from the U.K., wherever this is practical and economical, of goods now imported from non-Commonwealth sources.

(5) The U.K. Ministers expressed the hope that some measure could be taken to encourage more Canadian tourists to visit the U.K. and make more purchases there. In this connexion it was noted with satisfaction that, a few months ago, the U.K. authorities had found it possible to make available a currency allowance of £100 to travellers from the U.K. wishing to visit Canada.

(6) Canada now allows Canadians who are out of the country for at least 48 hours to import $100 worth of purchases abroad duty-free every four months. This tourist exemption is of considerably less benefit to tourists making longer but less frequent visits oversea. The Canadian Ministers undertook to give sympathetic consideration to enlarging the benefit of this exemption to tourists visiting the U.K. and other oversea countries.

(7) It was agreed by the Ministers for both countries that a high-level trade delegation from Canada should visit the U.K. at an early date with a view to stimulating purchases from U.K. sources of goods now imported from non-Commonwealth countries. This trade mission will include leading representatives of business, industry, labour, agriculture, and other primary production from all areas of Canada . . . "

Mr. Thorneycroft's proposal for an Anglo-Canadian free trade area met with an unfavourable reception on the part of leading Canadian industrial and commercial interests, which expressed concern that they might be under-sold by British goods. The Canadian industries which would be most affected by the proposals include textiles, rubber footwear, machinery, agricultural implements, electrical and industrial equipment, furniture, pottery and china-ware, plastics, and medical items. Mr. Fleming, broadcasting on Oct. 6, pointed out, however, that the British proposal was not intended to be brought into effect suddenly but over a long period, and added that Mr. Thorneycroft had recognized that his proposal raised complex problems and for this reason had not asked the Canadian Ministers for an expression of their views on it.

Mr. Thorneycroft and Sir David Eccles returned to London on Oct. 5.—(Times - Daily Telegraph - Manchester Guardian - Financial Times - External Affairs Dept., Ottawa - Montreal Star) **(Prev. rep. 15637 A ; European Free Trade Area, 15393 A.)**

A. WESTERN GERMANY. — New Chief Burgomaster of West Berlin. - Death of Dr. Suhr.

The West Berlin House of Deputies elected Herr Willy Brandt Chief Burgomaster of the city on Oct. 6, in succession to the late Dr. Suhr, who had died on Aug. 30. Herr Brandt (Social Democrat), who for the last three years had been President (Speaker) of the City Parliament, received 86 votes out of 118, with 10 deputies voting against and 22 abstaining.

Dr. Otto Suhr (63) was born at Oldenburg, studied history and political economy at Leipzig University, and after serving in the First World War joined the Social Democratic trade union movement, in which he occupied various executive posts, writing and lecturing at the same time on economic subjects. On the disbanding of trade unions by the Nazis he lost his job and earned his living by writing for a number of newspapers. After the Second World War he helped to rebuild the Social Democratic Party in the Soviet Zone, and strongly opposed the Soviet efforts to bring about the merger of the Social Democrats with the Communists into the Socialist Unity Party.

After the all-Berlin municipal elections in October 1946, when the Socialist Unity Party was defeated, Dr. Suhr was elected chairman of the new City Assembly. He took a leading part in resisting the constant intimidation from the Soviet military authorities while the city was still under four-Power rule, and after the split of the city government in 1948 maintained the administration of West Berlin, together with the late Herr Ernst Reuter (then Chief Burgomaster), during the Soviet blockade. In 1949 he was re-elected chairman of the West Berlin Assembly (later renamed House of Deputies), and in January 1955 was elected Chief Burgomaster; in this capacity he was last July elected President of the *Bundesrat* for 1957-58.

Herr Brandt (48) is the youngest Chief Burgomaster Berlin has ever had.—(Der Tagesspiegel, Berlin - Frankfurter Allgemeine Zeitung - Times - Manchester Guardian) **(Prev. rep. 14022 A.)**

B. GHANA-ISRAEL.—Agreement on Black Star Line.

An agreement establishing the Black Star Line, with a capital of £500,000 owned as to 60 per cent by the Government of Ghana and as to 40 per cent by the Israeli Zim Navigation Company, was signed in Accra on Sept. 10.—(Israeli Government Press Office, Jerusalem) **(Prev. rep. 15590 E.)**

C. INDIA. — Progress of Land Gift Movement. - The "Village Gift" (Gramdan) Movement. - Discussions between Acharya Bhave and Government Leaders.

The *bhoodan* (land gift) movement initiated by Acharya Vinoba Bhave in 1951 continued to make progress during 1955-57, and by September 1957 about 4,500,000 acres had been donated, of which, however, only 600,000 acres had so far been effectively made over to new owners because of various difficulties. Meanwhile, a new phase of the movement known as *gramdan* (village gift) had originated in May 1952, when the people of Mangroth (Uttar Pradesh) offered the entire land of their village for redistribution, and in 1955, when Acharya Bhave was touring Orissa on foot, *gramdan* developed into a mass movement. By the end of August 1957, 2,932 villages had been offered, of which 1,847 were in Orissa, 301 in Kerala, 237 in Bombay, and 223 in Madras.

Under the *gramdan* system the inhabitants of a village surrender all property rights to the community ; this process was assisted by the fact that about half the villages where it was adopted were in tribal areas, where forms of collective land tenure already existed. The form of cultivation subsequently followed is decided by the villagers, and may be individual farming, complete common cultivation, or a combination of the two. Other measures adopted include the establishment of co-operative stores for marketing village produce and importing requirements from outside, promotion of village industries, provision of basic education, and sanitation schemes. Certain villages have also pooled their debts and share the expense of marriage and other ceremonies.

A typical example is the village of Mangroth, which formerly contained 67 families with and 40 without land ; since the land was pooled, 86 acres of fallow land have been made cultivable by common effort, an irrigation tank dug, a common village orchard grown, and individual cultivation improved, and in consequence the village, which formerly produced enough food for only six to eight months in the year, now produces more than its needs. Over 1,300 of the villages donated in Orissa are in the Koraput district, which is inhabited by a very backward tribal population with an average family income of only Rs 200-250 a year; in this district a programme of irrigation, soil conservation, and reafforestation has been undertaken and village industries have been established.

A conference under the chairmanship of Acharya Bhave took place at Yelwal, near Mysore, from Sept. 20-22, being attended by President Prasad, Mr. Nehru, Mr. Nanda (the Indian Minister of Planning), and other members of the Central and State Governments.

A statement issued at the end of the talks expressed high appreciation of Acharya Bhave's efforts "to solve national and social problems by non-violent and co-operative methods," and appealed to all sections of the people to give him "enthusiastic support." The Ministers present had pointed out that their Governments would have to proceed with their own schemes of land reforms, which were based on abolition of all intermediate interests in land, the limitation of holdings, and the promotion of a co-operative movement with the consent of the people concerned ; the *gramdan* movement, however, which deserved "every kind of help and encouragement," could create the psychological climate needed for the solution of the land problem, and would help rather than conflict with the governmental plans for reform. The closest co-operation was therefore desirable between the Indian Government's Community Development movement and the *gramdan* movement.—(Indian High Commissioner's Office, London - The Statesman, Calcutta - The Hindu, Madras) **(Prev. rep. 14336 B.)**

D. FRANCE. — Renewal of British Wool Credit.

It was announced in London and Paris on Sept. 17 that a new revolving credit of £12,500,000, which could be increased temporarily to £15,000,000 during the peak of the wool-buying season, had been arranged by Lazard Brothers and Co. of London with the *Groupement d'Importation et de Répartition de la Laine* for financing French wool purchases in the British Commonwealth during the 1957-58 season. The amount was £5,000,000 higher than that arranged last year. Repayment is linked with the export of French wool products, as hitherto, and will be completed in September 1958.—(Financial Times - Le Monde, Paris) **(Prev. rep. 15166 E.)**

E. UNITED KINGDOM. — Royal Fine Art Commission. - New Chairman.

It was announced on Sept. 12 that the Queen had approved the appointment of Lord Bridges as chairman of the Royal Fine Art Commission, in succession to Lord Crawford and Balcarres, who had resigned after having held the chairmanship since 1948. The Commission was set up in 1924 under the chairmanship of the previous (27th) Earl of Crawford and Balcarres, the father of the present Earl.—(Times) **(Prev. rep. 5532 A.)**

A. SOUTH AFRICA. — The Separate University Education Bill.

The Separate University Education Bill, which provided for the establishment of *apartheid* in all South African universities, and for the termination of the right of admission for non-White students to the two "open" universities, viz. those of Cape Town and the Witwatersrand, was introduced into the House of Assembly on March 11 by the Minister of Education, Mr. Viljoen, its main provisions being as follows:

(1) University colleges for Africans might at any time be established or closed down by the Minister of Native Affairs; they would be financed from the Bantu Education Account. Fort Hare University College for Africans would be transferred from the control of Rhodes University to that of the Native Affairs Department, and would become the first "Bantu" college.

(2) University colleges for Coloured people and Indians might at any time be established or closed down by the Minister of Education; they would be financed from money appropriated by Parliament for the purpose. The non-European Medical School of the University of Natal would be transferred from that university to the control of the Department of Education, and would become the first of the "non-White" colleges for Coloured people and Indians, although for the time being Africans would continue to be admitted to this school.

(3) Whites would not be allowed to attend a Bantu or other non-White college, under a maximum penalty of a fine of £100 or six months' imprisonment.

(4) From Jan. 1, 1958, non-Whites would not be allowed to enrol at a White university without the consent of the Minister of Native Affairs in the case of Africans, and the Minister of Education in the case of others. This prohibition would not apply to students already registered for courses, who would be allowed to finish their studies.

(5) An absolute ban on the registration of non-White students in White universities would come into force by stages, as faculties were provided in the new colleges.

(6) The council of each new college would be appointed by the Governor-General, and the principal and the members of the senate by the Minister concerned.

(7) The teaching staffs of the non-White colleges would be public servants in the Department of Native Affairs or the Department of Education, according to the nature of the college, and would be appointed, promoted, transferred, or discharged by the Minister or by an official designated by him. They would be liable to dismissal if they publicly commented adversely upon the administration of any Government department, or were associated with propaganda calculated "to cause or promote antagonism amongst any section of the population of the Union against any other section of the population, or to impede, obstruct, or undermine the activities of any Government department."

(8) Students would be admitted to the non-White colleges only if they were approved by the Minister concerned, who might refuse admission if he considered it "in the best interests of the college."

Contrary to usual practice, the Opposition parties opposed the first reading of the Bill on March 11.

Sir De Villiers Graaff (U.P.), Leader of the Opposition, moved an amendment "that this House declines to grant leave for the introduction of the Bill because it provides for a serious interference with traditional academic freedom by means of the control, other than reasonable financial control, of a university institution by the State." A second amendment, moved by **Mrs. Ballinger** (Natives' Representative) and seconded by **Mr. Lovell** (Labour), opposed the introduction of the Bill because "the division of the universities on an ethnic or racial basis, the control of university institutions by the State, and the denial to all universities of freedom to decide whom they may teach, are violations of the traditional and accepted practices of civilised society." Both amendments were rejected by 75 votes to 46, and the motion for the first reading was adopted by 78 votes to 46.

The Bill was, however, withdrawn on April 1, after the Government's legal advisers had expressed the opinion that it was a "hybrid Bill" and therefore subject to special parliamentary procedure, which would prevent its being passed during the session.

[Hybrid Bills are those which, although introduced as measures of public policy, affect the private rights of individuals or groups of individuals. Such a Bill must be published in the *Government Gazette* before its introduction in Parliament, and after the second reading must be referred to a select committee before which those affected by it can give evidence.]

An amended Bill, which omitted the provisions for the transfer of Fort Hare and the Natal non-European medical school to Government control, was introduced on April 8. The new Bill, however, empowered the Minister to ban non-Whites from Fort Hare as well as from the White universities, though not from the Natal medical school. [The control over admissions of non-Whites to Fort Hare was regarded in South African Press comments as a means to ensure that only Africans would go to that college; Coloured people, Indians, and Africans, however, would be allowed to continue to attend the Natal medical school.] The Bill also provided that if a non-White were enrolled by a White university without a Government permit, the student but not the university would be liable to prosecution. [Under the original Bill both would have committed an offence.]

The new Bill passed its first reading on April 8 by 75 votes to 45, after Sir De Villiers Graaff and Mr. Lovell had unsuccessfully moved amendments similar to those put forward on March 11. Mr. Swart, the Minister of Justice, announced on May 17 that after its second reading the Bill would be sent to a Select Committee, as certain individuals and bodies who supported the principle of the Bill had made representations to the Government that further attention should be given to certain of its administrative aspects; if the Select Committee did not finish its work during the session, he added, it would be converted into a commission. Mr. P. A. Moore (U.P.) then asked the Speaker to rule that it was a hybrid Bill, because if it were passed the Universities of Cape Town and the Witwatersrand would forfeit certain donations which had been made to provide scholarships and other facilities for non-European students. The Speaker (Mr. J. H. Conradie), however, ruled on May 20 that the Bill was a public and not a hybrid one, as it dealt with a matter of public policy, and as, if it were passed, the donations made to the "open" universities would remain at their disposal or the disposal of the donors.

The second reading debate took place on May 27-29.

Moving the second reading, **Mr. Viljoen** declared that the underlying causes of non-White resistance movements could be attributed to the "distorted ideas and false values" which took root in "immature minds" in the artificial atmosphere of a White university. The possibility of social or academic intermingling of White and non-White students must therefore be rejected. He announced that the Government intended to provide five university colleges for non-Europeans—one for the Xhosa group at Fort Hare, one for the Zulu group in Zululand, one for the Sotho group in the Northern Transvaal, one for Coloured people at Athlone (the Coloured suburb of Cape Town), and one for Indians near Durban. Separate medical training facilities for Natives would be established when justified, and the Natal non-European medical school would then be reserved for Indians and Coloured people. Legislation for taking over Fort Hare and the Natal medical school would be introduced as soon as circumstances permitted.

Non-White students, he continued, stood to gain no particular benefit from the maintenance of the *status quo*. At the universities of Cape Town and the Witwatersrand, which in 1956 had 339 and 213 non-White students respectively, they attended the same classes as the Whites but did not share their hostels or take part in athletic and social activities. The question had arisen why there should be separate university institutions when there was at the moment no social mixing worth mentioning. The answer was that in the "open" universities the trend was towards complete social equality, and it was a foregone conclusion that in time this aim would become a reality. The number of non-White students at White universities was increasing at a comparatively rapid rate, and there was no guarantee that the present rate of White to non-White students would be maintained. A danger therefore existed that the students at these universities would in time become predominantly non-White, that the atmosphere would be such that White students would no longer feel at home there, and that they would eventually leave the universities in the hands of the non-Whites. If this were allowed to happen, separate university facilities would have to be established later, with far greater trouble than would be caused now.

Mr. Viljoen rejected the argument that the Bill interfered with the autonomy of the universities and their academic freedom, saying that as their autonomy was granted to them by the State it could also be altered by the State. No organization instituted to fulfil a given social function could dictate to the State how it should act in the treatment of social problems. "Where the State has now decided to follow a certain policy of great national importance connected with White and non-White relations," he went on, "this view must also hold good in the case of the universities. There cannot be a State within a State." It was said that academic freedom demanded that universities should themselves decide who should be admitted as students. This view would have been valid if, as a result of restrictions imposed by the State, non-Whites would not have the same opportunity of acquiring knowledge elsewhere; where the State provided separate university facilities, however, there was no interference with academic freedom.

The courses offered at the non-White colleges, Mr. Viljoen explained, had been selected with an eye on a number of factors, such as the direction in which students who had finished their studies would be able to make a reasonable living, and the number of students expected to study different subjects. As circumstances changed, provision would be made for a wider choice of subjects and for more advanced studies. The subjects which had been decided upon were those which non-European students had chosen so far in such numbers that courses in them were justified, and a preliminary estimate had been made for a 10-year period. On this basis it was considered that provision would have to be made for 370 students at each of the three Native colleges after four years, and that this number would increase to about 500 after 10 years. The colleges for Coloured and Indian students were expected to have 300 students each after three years and 600 after 10 years.

The following subjects would be available at the Bantu colleges: (*a*) Native languages, Afrikaans, English, Latin, history, geography, economics, sociology, psychology, philosophy, public administration, political science, law, and ethnology; (*b*) mathematics, physics, chemistry, botany, and geology; (*c*) a post-graduate secondary teachers' diploma and a lower secondary teachers' diploma. At the Coloured and Indian colleges the subjects would be the same, except that Native languages, political science, and ethnology would be omitted, whereas commercial subjects, music, physiology, and domestic science would be included in the curriculum.

In view of the poor financial position of the large majority of non-Europeans, they would be able to make full use of the facilities envisaged only if financial aid were given to the students. This would take the form of interest-free loan bursaries, which would be repayable. The capital costs for building the three Native colleges were estimated at £1,624,000, and for the colleges for Coloured people and Indians at £1,202,000. The total estimated running expenditure would be £183,070 a year at the outset and £295,160 after 10 years. The capital and running costs for the Native colleges would be covered from the Bantu Education Account, into which Native taxation was paid, whilst the costs of the Coloured and Indian colleges would be paid from Government funds.

It was obvious, Mr. Viljoen concluded, that the control and guardianship now exercised over non-White students by the White universities which admitted them must be transferred to some other body when separate colleges for non-Whites were established. The non-Whites, however, were too immature to assume the responsibility attaching to an independent university, and unfortunate experience had given conclusive proof of how susceptible non-White students were to "undesirable ideological influences." Taking these factors into account, a suitable State department was the obvious authority for the time being to control these colleges. As the Education Department had been in control of university education since the setting up of the Union, it was logical that it should control the Coloured and Indian colleges. There were, however, good reasons why the Bantu colleges should be controlled by the Native Affairs Department, which was already responsible for Bantu secondary education, controlled the Bantu Education Account, and was in a favourable position to co-ordinate the supply of and demand for university-trained Natives with a view to their most beneficial employment.

For the United Party, **Mr. Moore** moved an amendment for the rejection of the Bill "because *inter alia* (*a*) it provides for a serious and unwarranted interference with traditional academic freedom and with the autonomy of existing universities; (*b*) it is another attempt by the Government to cast South African society into a rigid ideological mould; (*c*) it envisages the creation of so-called alternative institutions which would not be true universities; and (*d*) it is motivated by prejudice instead of by statesmanlike consideration of the interests of South Africa as a whole." The Bill, he said, had two completely separate aims—the establishment of new colleges, which might be approved, and the prohibition of the enrolment of non-White students in "open" universities, which the United Party strongly opposed. At their best the proposed new colleges would be teachers' training colleges, and at their worst "something of which the country would be ashamed in the future."

Mrs. Ballinger also moved the rejection of the Bill "because (*a*) it runs counter to the traditional pattern and the well-tried and satisfactory course of development of higher education in this country; (*b*) it proposes a system that must stultify the development of the non-European populations and particularly of the Africans; (*c*) it is unacceptable to the majority of the population; and (*d*) it is generally against the best interests of the country and the people."

Mr. Swart (Minister of Justice) said that as chancellor of one of the Afrikaans universities he felt compelled to reply to the chancellors of the Universities of Cape Town and the Witwatersrand, who had made many statements opposing the principle of the Bill. The tragedy of the situation was that "a sort of iron curtain" was growing up between the English and the Afrikaans universities, because the English students' unions admitted non-Europeans and the Afrikaans unions did not. Where any association did take place, however, it revealed the "hypocrisy" of the students of the mixed universities, because no non-Europeans were included. Turning to the question of academic freedom, Mr. Swart declared that no university in South Africa could exist without considerable aid from the State, and the taxpayer, who had to pay for what was done at universities, rejected completely the idea that Parliament should have no say on what took place. The State could not allow the universities to follow a policy which was breaking down the walls between colour and colour; the policy of mixed universities must necessarily lead to social equality, which the Government rejected outright.

Mr. P. H. Bekker (Independent) moved that the Bill should be referred before the second reading to a Select Committee, with power to bring in an amended Bill which would provide for the continued existence of the traditional autonomy of universities whose policy did not undermine the State; the encouragement of segregated education of non-Europeans at "open" universities; and the development of separate universities for non-Europeans.

Mr. Dönges (Minister of the Interior) maintained, in reply to the Opposition allegation of State interference with academic freedom, that even in the U.S.A., by enforcing integration, the State "had refused certain universities the right to determine whom they shall teach."

Sir De Villiers Graaff alleged that the Bill had been motivated by "unreasoning and unreasonable fear," and by the Government's wish to exploit prejudice for political ends in view of the forthcoming general elections. The only reason for the limitation imposed on the "open" universities was to prevent the development of social equality. Dr. Donges had said that cultural assimilation was the first step on the road to ultimate total assimilation, and had suggested that the meeting of White and non-White students was a step in that direction. Cultural assimilation, however, began when a non-European learned his ABC or learned to count. The only way the Government could avoid Western culture being assimilated at the five new colleges would be to confine the teaching there to "tribal law and custom and a little witchcraft."

The United Party had no objection to the creation of separate non-European university facilities if there was a genuine demand for them, Sir De Villiers Graaff continued, but it was extremely doubtful whether there was such a demand. The risk involved in establishing "tribal colleges" had been shown in the report of the Fort Hare Commission (see 14454 D), and there was a danger that the new colleges would become seed-beds for the growth of Native nationalism and Communism. This very scheme had been turned down by the Holloway Commission (see 14164 A), because they felt that it was unrealistic, the cost to the State would be too high, the services rendered by these colleges would be inferior, they might easily become political danger spots, and very few non-Europeans would go to them unless forced to do so. Sir De Villiers Graaff announced that if the United Party came to power again it would restore the academic freedom of Cape Town and Witwatersrand Universities, which was now being infringed.

At the end of the debate the amendments moved by Mr. Moore, Mrs. Ballinger, and Mr. Bekker were rejected on May 29 by 72 votes to 42, and the Bill was read a second time. On a motion by Mr. Viljoen it was referred to a Select Committee, which was empowered to suggest changes in detail but not in principle. When the parliamentary session ended on June 22 the Select Committee was converted into a Commission, which continued to consider the Bill pending the next session.

The Bill met with widespread opposition in academic circles at the Cape Town, Witwatersrand, and Natal Universities.

Prior to its introduction, the Chancellor of Cape Town University, Mr. A. van de Sandt Centlivres (the former Chief Justice), had appealed to the Government on Feb. 11 to reconsider its decision to legislate for university *apartheid*, which would mean the closing of Cape Town and Witwatersrand Universities to non-European students. He said that the principle of academic freedom was at stake, and pointed out that for a long time to come only a handful of non-European students would offer themselves at the two "open" universities. A joint protest against the Government's proposals was made in a booklet issued by the two universities on Feb. 28 under the title *The Open Universities of South Africa*, which had been edited by a committee led by Mr. Centlivres and Mr. Richard Feetham (Chancellor of the University of Witwatersrand).

The Government's intention to remove the non-European medical school from the control of Natal University [now temporarily deferred —see above] was condemned during February in statements issued by the professors heading the seven faculties of the school, the heads of all non-medical faculties, and the Natal branch of the Medical Association of South Africa which supplies the majority of the part-time lecturers at the school. Dr. E. G. Malherbe, the Principal of the University of Natal, flew to Cape Town on Feb. 15 to protest to Mr. Strydom, the Prime Minister, against the Government's decision.

A joint petition protesting against the Bill, which had been signed by over 5,000 students and members of the staffs, Councils, and Senates of Cape Town and Witwatersrand Universities, was submitted to Parliament on May 21.

The Convocation of Oxford University approved on June 18 a letter to the chancellors of Cape Town and Witwatersrand Universities, expressing deep concern at the South African Government's proposals, and full support for the objections which the two universities had made to them.—(Cape Times - Die Burger, Cape Town - Times) **(Prev. rep. 14164 A.)**

A. COMMUNIST CHINA - WESTERN GERMANY. — Trade Agreement with West German Industry.

An agreement was signed in Peking on Sept. 27 between the Eastern Trade Committee of the West German Federation of Industry and the Chinese Committee for the Promotion of International Trade, providing for an exchange of goods worth 230,000,000 Deutschemark (nearly £20,000,000) in each direction within the next 12 months.

It was arranged that Western Germany would supply to China iron, steel, non-ferrous metals, industrial machinery, machine-tools, lorries, electrical, optical and signal equipment, dyes, chemicals, pharmaceutical products, and textiles, whilst China would deliver oil seeds, vegetable oil, furs, hides, minerals, ores, silk, tea, and pharmaceutical raw materials.

Total trade between the two countries (which have no diplomatic relations) increased, without an agreement, from 242,000,000 DM in 1954 to 379,000,000 DM in 1956. (Frankfurter Allgemeine Zeitung - Times)

A. UNITED KINGDOM. — Mr. Thorneycroft's Mansion House Speech. - Reaffirmation of Government's Monetary and Anti-inflationary Policy. - Mr. Cobbold's Speech. - Sterling reaches $2.80 Parity. - Higher Interest Rates for Local Authority Loans and Tax Reserve Certificates.

Mr. Thorneycroft, the Chancellor of the Exchequer, speaking at the Lord Mayor's dinner to the bankers and merchants of the City of London at the Mansion House on Oct. 8, reaffirmed the Government's determination to fight inflation internally and to maintain the external value of the pound. His speech was as follows :

" We are at a turning point in our fortunes. Important decisions are in train. Events are on the move. It is good that we should discuss them together to see how best we can shape them to our ends and purposes.

" At the beginning of the year, during those anxious three months when the Chancellor prepares his Budget, there were fears and rumours of a recession. The Government was urged in many quarters to forestall it. Inflation, it was claimed, was no longer the main danger, but rather stagnation of our efforts. We did not accept that view of our affairs. Looking back it was just as well we didn't. In the event we founded the Budget upon a cut in Government expenditure and a large surplus. We were right to do so. Budgetary and monetary policy must always march together.

" But even at the time of the Budget, some warning signs were becoming clear. I warned the country in that speech that we had to find a solution to the wage-price problem. I said that, if we failed, there was no Government of any party that could stand between us and a drab decline in all our fortunes. That sentence contained the basic truth of the position and it is still the truth today.

" Events in general have not moved contrary to our expectations at that time. Production has risen, consumption is expanding, exports have been maintained at a level of 6 per cent above last year. Our balance of payments has proved better than we then anticipated. It shows a surplus of £200,000,000 for the year ended June 30, 1957. This is a solid achievement in a period which included the Suez crisis. Turning nearer home to the Exchequer position, neither revenue nor expenditure are running in a way which leads me to revise my estimate of a surplus above the line of over £450,000,000 ; but both show signs of creeping up under inflationary pressures . . .

" In July I made a speech in this city [see 15673 A]. I posed then the question ' How honest is our money ? ' and I gave the answer ' As honest as we choose to make it.' I described the sorry tale of a nation which was constantly seeking to take out more than it put in, asking for more than it was prepared to give, willing to subtract from the economy much faster than it was prepared to add.

" A Chancellor of the Exchequer has in all these matters a difficult choice to make. If he speaks the blunt truth, he may cause alarm ; if he stands silently by, he allows the drift downward to continue ; if he states that there is a crisis, he is accused of spreading despondency ; if he says there is no crisis, he is accused of being complacent. The role of a critic in this complex field is not only a peculiarly easy but also a peculiarly dangerous one.

" What then are the facts ? First, that sterling has been under severe pressure abroad. Second, that prices at home have been rising steadily—almost without a break—over a period of 12 years. These two facts are not separate, unrelated things ; they are the two sides of the same medal. Of course, there are factors abroad which influence from time to time the demand for sterling. The French currency action, the speculation on the Deutschemark which followed, the temporary imbalance of trade between one country and another, these are all examples. But these things are, after all, the normal lift and fall of the financial sea. These are not matters which should throw a nation's economy into disarray, least of all a nation which has just earned £200,000,000 on its external account.

" Our problem is, indeed, much more upon our capital than our current account. Our concern is much less with current trade, important though that is, than with the need to build up and sustain full confidence in sterling. I know that when people talk of confidence in sterling they conjure up in their imagination the picture of some cold and calculating group of foreign bankers. I am not here concerned with foreign bankers, though I say so in no disrespectful tone. I am concerned with the people of this country.

" If a nation has confidence in its own currency, the world will have confidence as well. If a nation loses faith in its money, no one else will have faith either. I wish to state my firm conviction that we will not find a solution to our problems by leaning upon others. I have seen suggestions that we should appeal for help from outside our shores—from foreign countries, from other countries of the Commonwealth, or from international financial organizations. Certainly there are forms of assistance for which we can properly and honourably ask and which are of great benefit to us. But merely to cry for help is no solution at all. It does not give us even the beginnings of a policy.

" Our economic stability will no doubt often be dealt harsh blows by outside events. There will be times when, with all our strength, and given all the wisdom and the courage in the world, we will be hard pressed because of the acts of others. But in the long term our economic destiny rests in our own hands. The fault will be not in our stars, but in ourselves, that we are underlings.

" I have listened to the arguments of the economists as to whether we suffer from a demand inflation or a wage inflation. About these subtleties there is infinite scope for academic discussion. There is, however, no doubt about one thing and that is what enables inflation to go on. What enables it to go on is the supply of money, whether it be new money or existing money travelling rather faster." The Chancellor then repeated his recent statement : " So long as it is generally believed that the Government are prepared to see the necessary finance produced to match the upward spiral of costs, inflation will continue and prices will go up."

He continued : " It is against that background and that basic truth that the Government's policy has been designed. Our policy is to halt the increase in the supply of money. For this purpose money will be scarcer and more expensive to get hold of.

" First, the Bank rate has been raised to 7 per cent—a distinctive and clearly recognizable signal of what we mean to do. Secondly, Government investment in the public sector has been fixed in money terms over the next two years at the level which it is expected to reach this year, namely £1,500,000,000. Thirdly, in the private sector, we have decided that the level of bank advances during the next 12 months should not be allowed to rise above the level attained during the past 12 months. The bankers, for whose co-operation I am grateful in these difficult days, have assured me that they will do their best to meet this requirement.

" I am anxious that the purpose of these measures should be absolutely clear. We are not bringing public investment to a standstill. The total to be carried out next year and the year after will be £1,500,000,000. That is a most formidable rate of increase. What we have declined to do is to accelerate the pace still faster.

" Speaking at the meeting of the I.M.F. in Washington, I described our real purpose in these words : ' Thus we have put ourselves in a position effectively to restrict the money supply over a wide field. Against this background, if an attempt were made to take out of the system in money income more than is put in by new effort and production, the only result would be a reduction in activity and the employment of fewer men. In other words, if one can regard the economy as an electric circuit, we are ensuring that if the current overloads it, the fuse will not be the pound sterling. The strain must be taken in other areas of policy.

" There are some, no doubt, who may regard that as a harsh doctrine . . . It is less harsh than the alternative. The choice is not really between the strength of the pound sterling and full employment, for in the long run the first is a prerequisite to the second. If we had failed to declare this policy, or if we wavered in our determination to put it through, everything that we value in this country, full employment, the Welfare State, our high standard of living, all would be at risk. There is, indeed, little comfort that trade unions or employers can take in higher wages or larger dividends if they are to be paid in terms of constantly depreciating pounds. In the year ahead it will be harder to earn profits under this policy. It is meant to be. It will be harder to get wage increases. They will need to be earned. But the profits and the wages will be paid in honest pounds."

" This, then, is the policy of H.M. Government. We know it is controversial and will be criticized. I know that there are parts of it which even need more definition and more work . . . I know, perhaps better than most, the difficulties which confront us. You do not halt a wage-price spiral of this powerful momentum in a trice. We do not expect success overnight. We recognize that this is a long, stiff haul. But I know that this policy can and will succeed. We are determined to push it through to that success.

" It was with this knowledge and against the background of this policy that I was able to state with confidence where we stood at the meeting of the International Monetary Fund in Washington. We stand at a parity of $2.80 to the pound and no margins widened. The parity of the pound sterling is not something which simply affects the medium of exchange between the citizens of this island. It is a principal interest among the members of the British Commonwealth, as our recent talks at Mont Tremblant demonstrated. It is the basis on which half the world's trade is conducted. The pound yesterday reached this parity ; this is good news, but let me make it clear that this is not the end but the beginning of a difficult uphill struggle . . . But the things we seek are of national and not of mere party concern. A sound currency and stable prices at home, expanding markets abroad, these are objectives for which a nation should be prepared to sacrifice and struggle."

Mr. C. F. Cobbold, the Governor of the Bank of England, who followed the Chancellor, spoke as follows :

" Bank Rate and the other ingredients of monetary control are essential elements in general economic policy, but they are by no means the whole story and can only be effective if they are working in support of Government policy in other fields . . . The first impact of the Government's measures on the exchanges has been good. Their effect at home will need time and a firm follow-through. And it is their effect at home that matters in the long run. For, though the sterling exchange is influenced by actions and judgments taken in other countries, the stability of sterling depends fundamentally on the soundness of our own economy . . .

" If the money supply is not held in check there is no hope of restraining inflation. In fact, by comparison with other great countries fighting the same battle, we have so far been reasonably successful in restraining growth of the money supply . . . It remains

for the Government to ensure that current public expenditure is also kept under control, and that revenue, plus sales to the public of Government securities, cover all Government outgoings. Indeed, in the judgment of many of those for whom I am responding tonight, sterling will need to be buttressed in present circumstances not only by an increasing surplus on balance of payments account, but also by an overall surplus on budget account.

"In restricting the growth of total demand, we certainly do not want to see more consumed and less invested. The Government will doubtless watch the level of consumer demand very closely over the next period. But it is not true that a monetary and budget policy designed to keep total demand within total resources must mean less production. The resources and manpower available in the country set a definite limit to what can be done. A successful monetary and budget policy will mean less of a scramble for the available resources, less pressure for increased costs and prices—and it will in the end mean more and not less production.

"With this objective in view, the larger industrial companies might be well advised to look at their programmes again. In company with the public bodies, they have until recently been little affected by interest rates or by shortage of money. But borrowing will be difficult and expensive in the next period; even companies which still have large liquid resources may find it prudent in their own interest, as well as helpful to the country's, to rephase and extend their investment plans over a longer period.

"I hear it argued, too, that a creeping inflation does not much matter so long as it does not go too fast or quicker than in other countries. I believe that this argument is complacent and dangerous. It is true enough that if our competitors' costs are rising more quickly than our own, the danger to our exchange reserves is less immediate. But if, either in this country or in the rest of the Western world, we were to countenance a continuing rise in costs and a continuing slide in the value of money, then the outlook for currencies, world trade, and standards of living would be grim indeed."

Continued Recovery of Sterling.

During the first week of October sterling continued its recovery in the international exchange markets, and on Oct. 7 reached the parity of $2.80 with the dollar—this being the first time parity had been reached (apart from a short flurry in February) since Jan. 22. The advance of sterling made further progress on Oct. 8, when the rate against the U.S. dollar at $2.80⅛ reached its highest level since June 25, 1956. On Oct. 9 sterling also rose to parity against the Deutschemark at 11.76 DM, the rate finally closing at 11.76½ DM, whilst in Zürich transferable sterling was dealt in above $2.78, i.e. within the official margins, for the first time since May 1956.

Higher Interest Rate on Local Loans.

Following the increase in the Bank Rate to 7 per cent, the Treasury announced on Sept. 27 that interest on new loans to Local Authorities by the Public Works Loan Board would be increased from Sept. 28 as follows (existing rates in parentheses): up to five years, 7¼ per cent (5¾ p.c.); over five years and up to 15 years, 6¾ per cent (6 p.c.); over 15 years, 6¾ per cent (5¾ p.c.).

Tax Reserve Certificates.

It was announced on Sept. 24 that, because of the increase in the Bank Rate, Tax Reserve Certificates issued from Sept. 25 would bear interest at 3½ per cent p.a. free of tax. The new rate compared with the previous one of 3 per cent, which had been in force since February 1956.—(Times - Daily Telegraph - Manchester Guardian - Financial Times)

A. INDIA. — Opening of Maithon Dam.

The Maithon Dam on the Barakar River, eight miles above its confluence with the Damodar River, was opened by Mr. Nehru, the Indian Prime Minister, on Sept. 27.

The Maithon Dam, the third dam of the Damodar Valley Corporation to be put in commission so far, has a length of 3.4 miles and stands 162 feet above the river bed on the border of Bihar and West Bengal. Its underground power house—the first of its kind in Eastern Asia—has an installed capacity of 60,000 kilowatt, whilst the reservoir behind the dam covers an area of 21 square miles. The cost of the dam was estimated at 170,000,000 rupees (£12,750,000).

The first phase of the Damodar Valley project comprised the building of four dams, each with a hydro-electric station attached to it, one thermal power station, and a barrage to divert the water discharged from the four dams into a large network of canals and distribution channels for irrigation purposes in the Lower Damodar Valley. The Tilaiya Dam and the Bokaro thermal power station were opened in 1953, and the Konar Dam and the Durgapur barrage and irrigation canals in 1955.—(The Statesman, Calcutta - The Hindu, Madras - Indian High Commissioner's Office, London)

B. NORWAY. — Funeral of King Haakon VII.

The funeral of the late King Haakon VII took place in Oslo on Oct. 1.

After a private service in the chapel of the Royal Palace, where King Haakon had been lying in state, the coffin, draped in the royal flag, was taken on an open motor hearse to Oslo Cathedral, followed by King Olav and Crown Prince Harald, King Gustav of Sweden, King Frederik of Denmark, King Paul of the Hellenes, King Baudouin of the Belgians, and Prince Bernhard of the Netherlands. The Duke of Gloucester (representing Queen Elizabeth), Prince Alexander Desta of Ethiopia (the grandson of Emperor Haile Selassie), Prince Felix of Luxemburg, President Kekkonen of Finland, and President Asgeirsson of Iceland also walked in the procession, whilst Queen Juliana of the Netherlands, Queen Ingrid of Denmark, and Queen Louise of Sweden rode in the *cortège*.

The funeral service in the Cathedral was conducted by Dr. Smemo, Bishop of Oslo, being preceded by a one-minute silence observed all over Norway. After the service the coffin was taken to Akershus Castle, the old fortress overlooking Oslo harbour, and after a brief service in the Royal Chapel was lowered to the vault of the chapel, where it will rest in a sarcophagus by the side of Queen Maud and Crown Princess Martha.

A guard of honour of ratings and marines from the Royal Navy's aircraft carrier *Ocean*, and another one of officers and men from the Green Howards, were drawn up in the inner courtyard of the castle; King Haakon had been an Honorary Admiral in the Royal Navy and an Honorary Colonel of the Green Howards.

A memorial service for King Haakon was held in London at Westminster Abbey on Oct. 2, being attended by Prince Philip, representing the Queen, British Ministers and Members of both Houses of Parliament, many members of the Norwegian community, and British Service officers, including Admiral of the Fleet Earl Mountbatten, the First Sea Lord.
(Norwegian Embassy, Press Dept., London - Times - Daily Telegraph) **(Prev. rep. 15769 A.)**

C. AUSTRALIA. — Civil Aviation. - Sale of Australian National Airways to Ansett Airways.

Mr. R. M. Ansett, managing director of Ansett Transport Industries Ltd., the owners of Ansett Airways (then the third largest airline in Australia), announced on Aug. 23 that the board of Australian National Airways, the second largest airline in the country, had recommended to shareholders the acceptance of an offer by Ansetts to buy A.N.A. as a going concern for £A3,300,000. It was announced on Aug. 28 that the shareholders of A.N.A. had approved acceptance of Ansett's offer, and on Oct. 3 documents finalizing the purchase were signed and the first contractual payment of £A1,000,000 made over by Ansett's.

The deal, which made Ansett Airways the biggest airline operator in Australia, included the taking over by Ansett's of a Government-guaranteed loan to A.N.A. of about £A3,000,000 for the purchase of *DC*-6 aircraft, as well as the acquisition of the controlling interest in two other airlines, Butler Air Transport and Queensland Airlines. The A.N.A. fleet taken over by Ansetts included six *DC*-6 aircraft, eight *DC*-4's, 20 *DC*-3's, three *Bristol* freighters, and three helicopters. Ansett's own fleet before the merger comprised one Convair *Metropolitan*, two Convair 340's, four *DC*-4's, and two flying boats. Before the merger negotiations Ansetts had announced that they would purchase seven more Convair *Metropolitans* and three Lockheed turbo-props for delivery in 1959.

Australian National Airways was founded in 1936, having developed from Holyman Airways; its shareholders included the Orient Steam Navigation Co., Ltd., Huddart, Parker Ltd., Union Steamship Co, Ltd. of New Zealand, and the Adelaide Steamship Co., Ltd. A recent proposal by A.N.A. to form a holding company to control all Australian airlines had been rejected by the Federal Government on June 25 (see 15634 A).

The only other major Australian internal air transport company left is the Government-owned Trans-Australia Airlines, which now occupies second position.—(Australian News and Information Bureau - Times)

D. CZECHOSLOVAKIA - UNITED KINGDOM. - Resumption of Civil Air Services.

The first British civil airliner since 1951 to fly to Prague on a scheduled flight—a *Viscount* of British European Airways—left London Airport on Oct. 7. Civil air services between Britain and Czechoslovakia were discontinued in 1951, when the Foreign Office informed the Czechoslovak Government that, because the work of the Prague Office of British European Airways had been constantly obstructed, facilities could no longer be granted for Czechoslovak State Airlines to operate a regular service between London and Prague.—(Times)
(Prev. rep. 11484 B.)

A. INDONESIA. — National Conference between Government and Regional Leaders. - Co-operation between President Sukarno and Dr. Hatta to be resumed. - Greater Autonomy for Outer Regions.

A national conference between the Indonesian Government and representatives from the outer regions was held in Jakarta from Sept. 10-15 under the chairmanship of the Prime Minister, Dr. Djuanda. The conference, the convening of which had been suggested by the newly-established National Advisory Council in an endeavour to find a way out of the country's grave difficulties, was attended by about 200 of Indonesia's civil and military leaders, including President Sukarno and Dr. Hatta (the former Vice-President), members of the Government, the chiefs of staff of the armed forces, and regional representatives. The latter included Lieut.-Colonel Hussein, the Army commander in Central Sumatra who had seized power in that province in December 1956, and Lieut.-Colonel Sumual, the former Army commander in East Indonesia who in March last had set up a military council to take over the administration of that area. Colonel Simbolon, the deposed Army commander in North Sumatra, as well as Colonel Lubis, the deposed former deputy chief of staff of the Army, did not attend.

At the end of the conference President Sukarno and Dr. Hatta, who had not met since Dr. Hatta's resignation from the vice-presidency owing to strong differences of opinion, issued a joint statement in which they announced that they would resume their co-operation " in the interest of the State and the people." Their decision was made in response to the requests of the majority of the delegates, who expressed the conviction that renewed co-operation between the two estranged leaders was a prerequisite to a solution of all the problems which, in the Prime Minister's words, had led to the " present chaotic situation in the country."

The conference also decided that relations between the Central Government and the regions outside Java should be restored on the basis of the Constitution and existing laws. Four committees had been set up by the conference to deal respectively with (*a*) military questions ; (*b*) special affairs ; (*c*) general and administrative problems; and (*d*) financial and economic questions.

The military committee decided to leave the settlement of all military questions to the Government, assisted by a seven-man commission which would include President Sukarno, Dr. Hatta, Dr. Djuanda, Dr. Leimena (Third Deputy Premier), Col. Dr. Abdul Azis Saleh (Minister of Health, and formerly head of the Military Health Service), the Sultan of Jogjakarta (a former Minister of Defence), and General Nasution (Army Chief of Staff). It was decided that the Army would abide unconditionally by whatever decisions might be reached by the Government and the seven-man commission, an oath of loyalty being afterwards taken at a special ceremony at the presidential palace by all the military leaders who had been present at the conference.

The committee for special affairs suggested, *inter alia*, that in order to relax the tension in the political sphere, regulations should be made within the shortest possible time with regard to (*a*) the participation of political parties in a " conspicuous and direct way " in the efforts for the reconstruction and welfare of the country ; (*b*) principles for the conduct of parties ; (*c*) conditions for the formation and membership of parties ; and (*d*) supervision of the enrolment of party members and of party resources.

The committee for general and administrative questions urged the speedy setting up of autonomous regions, and recommended legislation embodying new arrangements for the improvement of the financial relationship between the Centre and the regions.

The committee for financial and economic questions recommended, *inter alia*, (i) that there should be a change in the economic structure in order to enable both regional producers and the country as a whole to benefit from exports ; (ii) that steps should be taken to return to a normal trade system, since barter trade (which was the basis for Indonesia's trade exchanges with Communist China and a number of other Communist countries) had not proved to be beneficial to Indonesia ; (iii) that all the available experts for reconstruction projects should be distributed throughout the country ; and (iv) that in all reconstruction plans in the various regions account should be taken of local religious feelings.

The conference unanimously approved all the decisions of the four committees.

Subsequently, the Government set up three *ad hoc* Ministerial committees for the implementation of the conference resolutions, viz. : (*a*) for general and administrative questions ; (*b*) for economic, financial, and reconstruction problems ; and (*c*) for special questions, such as the future co-operation between President Sukarno and Dr. Hatta, the West Irian issue, etc. The seven-man commission, which was to assist the Government in the solution of the military questions, appointed a fact-finding committee of three senior officers to inquire into the views of all Army officers, both loyal and dissident. (Indonesian Embassy Information Dept., London - Times) **(Prev. rep. Revolts, 15636 A ; 15514 A ; 15421 A ; Dr. Hatta, 15312 B ; National Advisory Council, 15678 E.)**

B. CEYLON - COMMUNIST CHINA.—New Five-Year Trade Agreement. - Agreement on Chinese Economic Aid.

A new five-year trade and payments agreement between Ceylon and Communist China was signed in Peking on Sept. 19 by the Chinese Minister of Foreign Trade (Mr. Yeh Chi-chuang) and the Ceylonese Ambassador (Mr. Perera), together with an agreement providing for Chinese economic aid to Ceylon. The agreements will come into effect on Jan. 1, 1958.

Trade and Payments Agreement. Under this, Ceylon will sell to China at least 30,000 tons of rubber annually at world market prices, and in return will buy 200,000 tons of rice ; under the current agreement (expiring at the end of 1957) China undertook to buy 50,000 tons of rubber and to supply 270,000 tons of rice a year.

The reduction in mutual purchases was aimed at reducing the adverse Chinese trade balance which had accumulated during the currency of the existing agreement ; according to a statement by the Minister of Commerce and Trade, Mr. R. G. Senanayake, on July 25, this balance amounted at the end of 1956 to the equivalent of about 60,000,000 rupees (£4,500,000) in foreign exchange. Mr. Senanayake had also stated that the Chinese Government had expressed its willingness to pay off the balance and that the forthcoming discussions in Peking would deal with the terms of settlement. No details were, however, made public about this point in the communiqué announcing the new five-year agreement.

With a view to evening out trade between the two countries and satisfying the Chinese demand that all future trading should be conducted strictly on a barter basis, the new agreement also provided for Chinese exports to Ceylon of textiles, coal, cement, and foodstuffs.

Economic Aid Agreement. This provided that China would grant 15,000,000 rupees (about £1,125,000) a year as economic assistance to Ceylon for the latter's rubber tree replanting programme, making a total of 75,000,000 rupees for the five-year period. Ceylon, in return, would permit China to increase the sale of her goods among private Ceylonese enterprises.

It was also announced in Colombo that the Chinese Communist Government had offered to set up a textile factory in Ceylon at a cost of 70,000,000 rupees (£5,250,000), as a gift to the Ceylon Government. When this gift is made Communist China will become the second largest donor of economic aid to Ceylon, the first being the U.S.A.—(Ceylon Government Information Dept., Colombo - Times - Manchester Guardian) **(Prev. rep. 15463 A ; 15143 B.)**

C. IRISH REPUBLIC - NORTHERN IRELAND. — Draft Constitution for All-Ireland Trade Union Congress.

It was announced on Oct. 14 that the representatives of the Irish T.U.C. and the Congress of Irish Unions on the Provisional United Trade Union Congress set up in 1956 had agreed on a draft constitution for a new single national trade union authority for the whole of Ireland, to be known as the Congress of Trade Unions. The draft constitution provided for :

(1) The affiliation to the new Congress of Trade Unions of (*a*) Irish-based unions ; (*b*) those British-based unions which agreed to elect autonomous Irish committees or conferences to decide policy on industrial or political matters directly affecting their Irish members. It was laid down, however, that policy decided by these Irish committees must not impinge upon or prejudice the position of members outside Ireland.

(2) The election to the new C.T.U. of a national executive of 19 members, including not more than nine members (all of whom must live in Ireland) by unions with headquarters outside Ireland.

(3) The setting up by the C.T.U. of a Northern Ireland committee, consisting of (*a*) national executive members living in Northern Ireland ; (*b*) members elected at a conference of unions having Northern Irish members. A full-time organizer, staff, and offices would be established in Belfast.

The draft constitution will be submitted by the Provisional United Trade Union Congress to its affiliated unions, and if approved will be ratified by national conventions of the Congress of Irish Unions and the Irish Trade Union Congress.

The number of trade union members in Ireland was given as about 500,000 (300,000 in the Irish Republic and 200,000 in Northern Ireland), including about 40,000 members of British-based unions in the Irish Republic and about 150,000 in Northern Ireland.—(Irish Times, Dublin - Belfast Telegraph) **(Prev. rep. 14650 A.)**

D. TURKEY. — Expulsion of Soviet Diplomats.

The Soviet Assistant Naval Attaché at Istanbul, Commander Alexander Marlagine, and two other Soviet officers attached to his office, were asked by the Turkish Government on Sept. 14 to leave the country. It was stated that the three men had been surprised by Turkish security officials at a Bosphorus casino when an agent of the Turkish security service handed to them secret military information and maps which they had asked him to procure. The Soviet diplomats left Turkey on Sept. 17.—(Turkish Embassy Press Dept., London)

OCTOBER 12—19, 1957

A. UNITED STATES. — Racial Desegregation in Schools. - The Little Rock Crisis. - Arkansas National Guard called out by Governor Faubus to prevent Desegregation. - National Guard withdrawn by Order of Federal Court. - Racial Rioting in Little Rock. - President Eisenhower sends Federal Troops to maintain Order.

A serious crisis developed in Little Rock, the capital of the State of Arkansas, during September as a result of measures taken by the State Governor, Mr. Orval E. Faubus, to prevent the admission of Negro pupils to the central high school. The situation eventually led to the intervention of President Eisenhower and the despatch of Federal troops to Little Rock to enable school integration to be carried out.

In implementation of the Supreme Court's decision of May 17, 1954, the Board of Education at Little Rock had in 1955 adopted a programme of integration under which Negroes would be admitted to the Central High School in September 1957, to the Junior High School in 1960, and to the elementary schools in 1963. This plan was upheld in August 1956 by the Federal District Court and in April 1957 by a Federal Court of Appeal, which ruled that the scheme was within the Supreme Court's definition of "all deliberate speed" in introducing desegregation in schools.

Shortly before the beginning of the new term, however, a segregationist organization, the League of Central High School Mothers, applied to the State Chancery Court at Little Rock for an injunction against the School Board forbidding the admission of Negroes to the Central High School. After Governor Faubus (who appeared as the principal witness) had testified that desegregation would lead to bloodshed and mob violence, the Chancery Court issued the injunction on Aug. 29. The School Board thereupon applied to the Federal District Court for a ruling that it could carry out its desegregation plan, and on Aug. 30 Judge Davies issued an injunction making the State Court's order ineffective.

On Sept. 2, the day before the opening of the new term, Governor Faubus declared a state of emergency in Little Rock and ordered the Arkansas National Guard to prevent the nine Negro pupils who had been admitted from entering the school. On Sept. 3 Judge Davies reaffirmed his order for the immediate integration of the school, but on the following day the Negro children were prevented from entering by 200 armed National Guards. In view of this situation the School Board petitioned Judge Davies on Sept. 5 to issue an order temporarily suspending the integration programme, on the ground that the situation had created tension among both pupils and parents and was rendering education impossible, but this application was rejected by Judge Davies on Sept. 7.

Giving the reasons for his decision, Judge Davies recalled that the integration plan had been drafted and proposed by the citizens of Little Rock themselves acting through their own School Board, and had been approved by the Federal District Court and the Court of Appeals. "The chief executive of Little Rock" [i.e. the mayor, Mr. Woodrow W. Mann], the judge went on, "has stated that the Little Rock police have not had a single case of inter-racial violence reported to them, and that there has been no indication from sources available to him that there would be violence in regard to this situation. In an organized society there can be nothing but ultimate confusion and chaos if court decrees are flouted, whatever the pretext." In the circumstances the court was "not persuaded that upon the tenuous showing made by the petitioners it should suspend enforcement of the plan of integration."

In spite of the court's ruling, however, Governor Faubus stated on Sept. 7 that he had not changed his orders to the National Guard and that the troops would continue to turn back any Negro children who attempted to enter the school.

In a statement issued on Sept. 9 Governor Faubus attacked Mr. Mann; quoted a statement by eight members of the Little Rock City Council who supported his (the Governor's) action, and insisted that his duty was to preserve the public peace. He maintained that he had to uphold both the U.S. Constitution and the Constitution of Arkansas, which imposed upon him the duty to maintain public peace and to use the militia if he considered this necessary, and went on: "I cannot abdicate my office and allow a Federal judge to substitute his judgment for mine on this issue. If the Federal Government moves into Arkansas by force or in any other manner, and takes from the people of the State the right to elect a Governor and depend on him to exercise certain discretionary functions of government, then we will have lost our last right of local self-government. If blood is then shed my conscience will be clear."

Meanwhile it had been announced on Sept. 4 by the U.S. Attorney-General, Mr. Brownell, that the Department of Justice, at Judge Davies' request, had begun an investigation to determine whether Governor Faubus's claim to be using the National Guard to prevent violence was well-founded. Governor Faubus thereupon posted two companies of the National Guard round his official residence in Little Rock, and in a telegram to President Eisenhower asserted that the Federal authorities in Arkansas were planning "to take into custody by force the head of a sovereign State" (i.e. Governor Faubus) and were tapping his telephone lines. In his reply the President categorically denied Mr. Faubus's allegations, emphasized that "the Federal Constitution will be upheld by me by every legal means at my command," and declared that he was "sure" that the Governor and all other State officials would give "full co-operation" to the Federal District Court.

After receiving the Justice Department's report on the situation, Judge Davies on Sept. 9 instructed the U.S. Attorney-General, as a "friend of the court," to seek an injunction against Governor Faubus and the two officers commanding the National Guard forbidding them to interfere with the integration programme. Mr. Brownell accordingly filed such a petition on Sept. 10, whereupon Judge Davies issued subpoenas summoning Governor Faubus and the two officers to appear before the Federal Court on Sept. 20.

On Sept. 11 Governor Faubus sent a telegram to President Eisenhower giving an assurance that "it is certainly my desire to comply with the order that has been issued by the District Court in this case, consistent with my responsibility under the Constitution of Arkansas," and requesting an interview with the President to discuss the matter. President Eisenhower agreed to such a meeting, and a two-hour discussion between them took place on Sept. 14 at the President's holiday home at Newport (Rhode Island). Separate statements were issued afterwards by the President and Governor Faubus.

President Eisenhower announced that Mr. Faubus had "stated his intention to respect the decisions of the U.S. District Court and to give his full co-operation in carrying out his responsibilities in respect to these decisions." "In doing so," the President's statement added, "I recognize the inescapable responsibilities resting on the Governor to preserve law and order in his State."

Mr. Faubus, after commenting that the Supreme Court's decision on integration was "the law of the land and must be obeyed," continued: "It is my responsibility to protect the people from violence in any form . . . In meeting this obligation, it is essential in proceeding to implement the orders of the court that complexities of integration be patiently understood by all those in Federal authority as well as others. When I assure the President, as I have already done, that I expect to accept the decisions of the court, I entertain the hope that the Department of Justice and the Federal judiciary will act with understanding and patience in discharging their duties."

Governor Faubus refused to appear in person before the court on Sept. 20, but was represented by counsel, who filed an affidavit alleging that Judge Davies was "biased and prejudiced" against Mr. Faubus and should therefore disqualify himself from hearing the case. A counter-motion filed by counsel for the Department of Justice maintained that the affidavit "must be regarded as solely directed to accomplish delay and cause embarrassment to the administration of justice." After hearing counsel on both sides, Judge Davies ruled that the affidavit was "not legally sufficient." Counsel for Governor Faubus then submitted a motion that the court was without jurisdiction because the action was brought "against the sovereign State of Arkansas and not against an individual," and that the case could therefore be heard only by the Supreme Court. Judge Davies rejected the motion, whereupon Governor Faubus's counsel withdrew, declaring that Governor Faubus "cannot and will not concede that the U.S. Government in this court or anywhere else can question his judgment and discretion acting as chief executive officer of the sovereign State of Arkansas."

After evidence had been given by Mr. Mann (the mayor), the chief of police, and other witnesses, Judge Davies granted an injunction on Sept. 21 forbidding the Governor to use the National Guard to prevent racial integration at the Central High School.

Giving the reasons for his decision, Judge Davies said that the city of Little Rock had "a long history of peaceful and amicable relations between the White and Negro races" (approximately 20 per cent of the population being Coloured), and that "for at least 25 years" there had been "no reported incident of violence arising from racial tension either between adults or between children of school age." He also mentioned that no violent incident had occurred when in January 1956 the public transportation system in the city had abolished the separate seating of Whites and Negroes. After reviewing the arrangements made by the school authorities for the admission of nine Negro students at the beginning of the new term, Judge Davies referred in detail to the events of Sept. 2-4, emphasizing in this connexion that neither the Governor nor any other official of the State Government had consulted with the Little Rock authorities whether the local police were prepared to cope with any incident

that might arise, about the need for any State assistance in maintaining order, or about stationing the National Guard at the Central High School. Commenting on the events of Sept. 4, when the nine Negro students were forcibly prevented by the National Guard from entering the school, the Judge observed that although a crowd of spectators had assembled opposite the school no acts of violence had been committed or threatened by them (except for rude and disparaging remarks made by some of the crowd); that the guardsmen had made no effort to disperse the crowd or to assist or protect the coloured students in their effort to enter the school; and that they had not prevented any white students from entering the school. Judge Davies concluded: "It is very clear to this court from the evidence and testimony adduced today that the plan of integration . . . has been thwarted by the Governor of Arkansas by the use of National Guard troops. It is equally demonstrable from the testimony that there would have been no violence in carrying out the plan of integration, and that there has been no violence."

In a broadcast later the same day, Governor Faubus announced that he had ordered the National Guard to be withdrawn, and reaffirmed that he had called it out only because he had proof that there was danger of serious disorders. Mr. Mann announced that members of the city police would be stationed outside the school, with orders to deal firmly with any individuals who tried to create trouble.

In the early morning of Monday, Sept. 23, a violently anti-Negro crowd of about 1,000 people collected outside the High School. While they were assuming a threatening attitude, nine of the Negro pupils were smuggled into the school through a side door; about 300 white pupils then walked out, but the remainder were reported to have adopted a friendly attitude towards the Negro students. Outside the school the rioters made repeated attempts to break through the barricades which the police had erected round the building; reporters and photographers were assaulted; and State police had to be called in to reinforce the city police. By noon the mob had become so menacing that Mr. Mann and the superintendent of schools agreed that the Negro children should be withdrawn, and they were accordingly driven to their homes in police cars. The president of the Arkansas division of the National Association for the Advancement of Coloured People stated afterwards that the children would not return to school "until they have the assurance of the President of the United States that they will be protected against the mob."

After receiving reports of the rioting from the Department of Justice, President Eisenhower issued the following statement during the afternoon:

"I want to make several things very clear in connexion with the disgraceful occurrences of today at Central High School in the city of Little Rock. They are:

(1) The Federal law and orders of a U.S. District Court implementing that law cannot be flouted with impunity by any individual or any mob of extremists.

(2) I will use the full power of the United States, including whatever force may be necessary, to prevent any obstruction of the law and to carry out the orders of the Federal Court.

(3) Of course, every right-thinking citizen will hope that the American sense of justice and fair play will prevail in this case. It will be a sad day for this country—both at home and abroad—if schoolchildren can safely attend their classes only under the protection of armed guards.

(4) I repeat my expressed confidence that the citizens of Little Rock and of Arkansas will respect the law and will not countenance violations of law and order by extremists."

During the evening President Eisenhower signed a proclamation, entitled "Obstruction of Justice in the State of Arkansas," in which he ordered all "unlawful assemblages" obstructing integration to "cease and desist," and giving a warning that Federal troops would be used to ensure the enforcement of the law if necessary. The proclamation was worded as follows:

"Whereas certain persons in the State of Arkansas, individually and in unlawful assemblages, combinations, and conspiracies, have wilfully obstructed the enforcement of orders of the U.S. District Court for the Eastern District of Arkansas with respect to matters relating to enrolment and attendance at public schools, particularly at Central High School in the Little Rock school district, and

"Whereas such wilful obstruction of justice hinders the execution of the laws of that State and of the United States, and makes it impracticable to enforce such laws by the ordinary course of judicial proceedings, and

"Whereas such obstruction of justice constitutes a denial of the equal protection of the laws secured by the Constitution of the United States and impedes the course of justice under those laws;

"Now, therefore, I, Dwight D. Eisenhower, President of the United States, under and by the virtue of the authority vested in me by the Constitution and statutes of the United States, including Chapter 15 of Title 10 of the United States Code, particularly Sections 332, 333 and 334 thereof, do command all persons engaged in such obstruction of justice to cease and desist therefrom, and to disperse forthwith."

[Section 332 of the U.S. Code empowers the President to call State militia into Federal service and to use the U.S. armed forces if "unlawful obstructions, combinations, or assemblages" make it impracticable to enforce the Federal law "by the ordinary course of judicial proceedings." Section 333 empowers him to use the militia or the armed forces to suppress any "violence, unlawful combination, or conspiracy" which deprives any part of the people of a State of their constitutional rights or obstructs the execution of Federal law. Section 334 requires him to "order the insurgents to disperse . . . within a limited time" before taking such action.]

Mr. Faubus maintained at a press conference on Sept. 23 that Federal forces could not be employed except at the request of the Governor of a State, adding that "I don't plan to make any such request."

This statement apparently referred to Section 331 of the U.S. Code, which lays down that "whenever there is an insurrection in any State against its Government," the President, "upon the request of its Legislature or of its Governor if the Legislature cannot be convened," may use the Federal forces to suppress it. Spokesmen for the Department of Justice, however, pointed out that this section referred only to an insurrection against State law, whereas Sections 332 and 333, which referred to the enforcement of Federal law, did not require that the State authorities should request the President's assistance.

The President's power to use the militia for the enforcement of Federal law originated in a law passed in 1792 during Washington's presidency, and was first employed by Washington in 1794 to suppress the "whisky rebellion" in Pennsylvania. In 1807 Congress authorized the use of Federal troops for the same purpose, and in 1827 the Supreme Court ruled that the President was the "sole and exclusive judge" as to whether such measures were necessary. Two precedents which were regarded as relevant to the situation in Little Rock were President Cleveland's action in using Federal troops in 1894 to enforce an injunction against the Pullman strike in Illinois, despite the opposition of the Governor of the State, and the similar action taken by President Wilson in 1914 against a miners' strike in Arkansas. The statutes cited by President Eisenhower in his proclamation were revised and reaffirmed by Congress in 1956 as part of a general recodification of the laws relating to the armed forces.

In defiance of the President's proclamation, about 300 demonstrators assembled outside the school on the morning of Sept. 24; there was no violence, however, partly because the Negro pupils made no attempt to enter it, and partly because 11 known agitators, two of whom were found to be armed with knives, were arrested by the police. Shortly after noon President Eisenhower issued an Executive Order which (i) noted that the command contained in his proclamation had not been obeyed and that "wilful obstruction of enforcement of the court order still exists and threatens to continue"; (ii) placed the Arkansas National Guard under Federal command for an indefinite period; and (iii) directed the Defence Secretary to use both the National Guard and regular troops, if necessary, "for the removal of obstruction of justice in the State of Arkansas." During the afternoon troops of the 101st Airborne Division were flown to Little Rock, and on arrival immediately took over from the city police posted round the school.

President Eisenhower, who had flown specially from Newport to Washington, explained why he had taken this action in a broadcast to the nation from the White House during the evening of Sept. 24.

After summarizing the events leading up to his decision, the President continued: "The very basis of our individual rights and freedoms rests upon the certainty that the President and the Executive Branch of Government will support and ensure the carrying out of the decisions of the Federal Courts, even, when necessary, with all the means at the President's command. Unless the President did so, anarchy would result. There would be no security for any except that which each one of us could provide for himself. The interest of the nation in the proper fulfilment of the law's requirements cannot yield to opposition and demonstrations by some few persons.

"Let me make it very clear that Federal troops are not being used to relieve local and State authorities of their primary duty to preserve the peace and order of the community. Nor are the troops there for the purpose of taking over the responsibility of the School Board and other responsible local officials in running Central High School. The running of our school system and the maintenance of peace and order in each of our States are strictly local affairs, and the Federal Government does not interfere except in very special cases, and when requested by one of the States. In the present case the troops are there, pursuant to law, solely for the purpose of preventing interference with the orders of the court.

"The proper use of the powers of the Executive Branch to enforce the orders of a Federal Court is limited to extraordinary and compelling circumstances. Manifestly, such an extreme situation has been created in Little Rock. This challenge must be met, and with such measures as will preserve to the people as a whole their lawfully protected rights in a climate permitting their free and fair exercise.

"The overwhelming majority of our people in every section of the country are united in their respect for observance of the law—even in those cases where they may disagree with that law. They deplore the call of extremists to violence . . . In the South, as elsewhere, citizens are keenly aware of the tremendous disservice that has been done to the people of Arkansas in the eyes of the nation, and that has been done to the nation in the eyes of the world.

"At a time when we face grave situations abroad because of the hatred that Communism bears toward a system of government based on human rights, it would be difficult to exaggerate the harm that is being done to the prestige and influence, and indeed to the safety, of our nation and the world. Our enemies are gloating over this incident and using it everywhere to misrepresent our whole nation. We are portrayed as a violator of those standards of conduct which the peoples of the world united to proclaim in the U.N. Charter. There they affirmed 'faith in fundamental human rights and in the dignity and worth of the human person' and they did so 'without distinction as to race, sex, language or religion.'

"And so, with deep confidence, I call upon the citizens of the State of Arkansas to assist in bringing to an immediate end all interference with the law and its processes. If resistance to the Federal Court orders ceases at once, the further presence of Federal troops will be unnecessary, the city of Little Rock will return to its normal habits of peace and order, and a blot upon the fair name and high honour of our nation in the world will be removed."

In the morning of Sept. 25 about 1,000 parachute troops cordoned the streets round the high school, the Negro pupils being escorted to the school under military protection. While the troops were dispersing a crowd one man was pricked by a bayonet after trying to seize a rifle from a soldier, who struck the demonstrator on the head with the butt and slightly injured him. Another demonstrator who refused to move on had his arm cut with a bayonet and was afterwards arrested. These were the only incidents, and on the following day conditions in Little Rock returned to normal.

About 750 of the school's 2,000 pupils were absent on Sept. 25 because their parents feared violence or objected to integration; another 50 pupils walked out as a protest against the admission of the Negro children. The number absent gradually decreased, however, and by Oct. 8 had fallen to 207. Following the replacement of regular troops stationed on the school premises by National Guards, a gang of boys attacked two of the Negro pupils on Oct. 2; the National Guards made no attempt to intervene, and in consequence were again replaced on the following day by regular troops.

President Eisenhower's action was strongly supported by both Republican and Democratic opinion in the Northern States, although he was criticized in some sections of the Press for failing to intervene more firmly at an earlier stage of the crisis.

Mr. Adlai Stevenson, the Democratic candidate in the 1952 and 1956 presidential elections, commented that "the President had no choice" because "a combination of lawless violence and the Governor's irresponsible behaviour have created a crisis which Arkansas is powerless to meet." He expressed the hope that "the Prrsident will now mobilize the nation's conscience as he has mobilized its arms."

In the Southern States the President's action was recognized as a regrettable necessity by a considerable section of the Press, including the Democratic *Arkansas Gazette* (published in Little Rock), the most widely read paper in the State. Other Southern papers, however, as well as a number of prominent Southern politicians, strongly criticized the President's "dictatorial" methods.

Senator Russell (Democrat, Georgia), the leader of the Southern group in the Senate, sent a telegram to President Eisenhower on Sept. 26 accusing the Army of using methods "copied from the manual issued to officers of Hitler's storm troopers," whilst Senator Talmadge (Democrat, Georgia) declared on Sept. 27 that he wished he could "vote for the President's impeachment."

Governor Faubus violently attacked the action of the Federal authorities in a broadcast on Sept. 26.

After declaring that Arkansas was "now an occupied territory," he continued · "Evidence of the naked force of the Federal Government is here apparent in these unsheathed bayonets in the backs of schoolgirls, in the backs of students, and in the bloody face of the railroad worker who was bayoneted and then felled by the butt of a rifle . . . Literally swarms of F.B.I. agents have been operating throughout the city . . . Teen-age schoolgirls have been taken by the F.B.I. and held *incommunicado* for hours of questioning while their frantic parents knew nothing of their whereabouts. To those who know the facts of the Little Rock situation, these combined operations on the part of the judicial, executive, and military departments of the Federal Government are police-State methods in a form never before seen in America. The news commentators and Press reports may proclaim the comparative calm of the Little Rock area. You will recall that it was quiet in Paris during the German occupation, and it is quiet in Budapest today. It always becomes quiet under military rule." Governor Faubus concluded with an appeal to Arkansans to go about their normal pursuits "in a friendly, peaceful manner," as there could be "no question of the supremacy of the U.S. Army when used against a defenceless State."

Mr. Hoover, director of the F.B.I., declared that Governor Faubus's allegation that girls had been held *incommunicado* was "as false as his recent statement that the F.B.I. tapped his telephone."

The Little Rock crisis coincided with the annual three-day conference of Governors of the Southern States, which opened at Sea Island (Georgia) on Sept. 23. The conference appointed a committee on Sept. 25 to mediate between President Eisenhower and Mr. Faubus, in order to secure the withdrawal of Federal troops from Little Rock at the earliest possible moment. The committee consisted of Governors Collins (Florida), Clement (Tennessee), and Hodges (North Carolina), all of whom are moderate Democrats, and Governor McKeldin (Maryland), a Republican and a supporter of integration, who had expressed full support for the President's action. Governor Griffin (Georgia), a segregationist Democrat, was also elected to the committee but refused to take part.

After a long discussion between the four Governors and President Eisenhower, a joint statement was issued on Oct. 1 in which the President undertook to return the command of the National Guard to Governor Faubus and to withdraw all Federal troops as soon as practicable, if Governor Faubus would give an assurance that he would not obstruct the orders of the Federal courts and would maintain law and order in Little Rock. In his reply, issued about an hour later, Governor Faubus denied that he had ever intended to obstruct the orders of the Federal courts; stated that he was prepared, "as I always have been," to maintain law and order; and gave an assurance that "upon the withdrawal of Federal troops I will again assume full responsibility, in co-operation with local authorities, for the maintenance of law and order, and that the Federal courts will not be obstructed by me." President Eisenhower announced later the same day that in his opinion this statement did not constitute an assurance that Mr. Faubus intended "to use his full powers as Governor to prevent the obstruction of the orders of the U.S. District Court," and that in the circumstances he had "no recourse at the present time except to maintain Federal surveillance of the situation."

At a press conference on Oct. 3, President Eisenhower said that Governor Faubus's statement that he was prepared "as I always have been" to maintain order could only mean that the situation should revert to what it had been before the arrival of the Federal troops. The President stressed that the troops would be withdrawn only if Governor Faubus gave "satisfactory and unequivocal assurances," or if peaceful conditions developed to a point where the local police felt confident of their ability to control the situation.

The following statement on the legal principles guiding the President in the integration problem was issued by the White House on Oct. 2:

"(1) The Executive Branch of the Federal Government does not participate in the formulation of plans effecting desegregation. This function is left to the community, where maximum understanding of local problems exists . . . Although the Federal Government has no responsibility to initiate action to desegregate public schools or to formulate any plans for desegregation, the courts have made it clear that the Department of Justice, at the invitation of the court, must participate in litigation involving public school desegregation for the purpose of assisting the court.

(2) The period of time within which any such plan should be put into effect likewise must be proposed by the local authorities and approved by the courts. The Supreme Court . . made it clear that insincere or dilatory tactics could not be used to defeat constitutional protections and rights The Executive Branch of the Government does not play a part in these local deliberations or, under existing law, in the court proceedings when such plans are considered.

(3) A final order of a Federal court giving effect to a desegregation public school plan must be obeyed by State authorities and all citizens as the law of the land . . .

(4) Powers of a State Governor may not be used to defeat a valid order of a Federal court. The Governors of the respective States have the primary responsibility for maintaining domestic order. However, under a pretext of maintaining order a Governor may not interpose military force or permit mob violence to occur so as to prevent the final order of a Federal court from being carried out. When an obstruction of justice has been interposed or mob violence is permitted to exist, so that it is impracticable to enforce the laws by the ordinary course of judicial proceedings, the obligation of the President under the Constitution and laws is inescapable. He is obliged to use whatever means may be required by the particular situation."

In view of the relaxation of tension in Little Rock, it was announced on Oct. 14 that half the regular troops stationed there would be withdrawn, and 8,500 of the 10,000 National Guards called into Federal service would be released.

(Prev. rep. Desegregation, 15359 A.)

A. UNITED KINGDOM. — Atomic Energy. - Overheating of Windscale Reactor. - Ban on Distribution of Milk from Farms in Area.

The U.K. Atomic Energy Authority announced on Oct. 11 that emergency action had had to be taken to cool down one of the two reactors at its Windscale (Cumberland) plant, engaged in producing plutonium for military purposes. During the emergency the second reactor had been shut down to enable the staff to lend aid, but this reactor had not been structurally affected in any way and, with the exception of the reactors themselves, the whole of the Windscale plant had now returned to normal operation. On Oct. 14 it was announced that the second reactor had resumed normal working.

The statement of Oct. 11 explained that some of the uranium fuel cartridges in the centre of No. 1 pile, which had been shut down for the routine discharge of spent uranium and for maintenance work, had become "overheated to the point of red heat." It continued: "The combustion is being held. The staff are now injecting water from above and the temperature has started to fall. Some oxidization of uranium has occurred. The greater part of this has been retained by the filters in the Windscale chimneys. A small amount has been distributed over the works site, and in some areas personnel have, as a precaution, been instructed to remain under cover. Health Physics personnel are carrying out a continuous check both on the site and in the surrounding district in order to ensure that any increase in the amount of radioactivity would be immediately known. There is no evidence of there being any hazard to the public. The type of accident which has occurred could only occur in an air-cooled open circuit pile and could not occur at Calder Hall or any of the power stations now under construction for the electricity authorities."

After saying that the cause of the accident was at present unknown, and that the pile would probably be out of operation for some months, the statement denied local reports that there had been an explosion and that large amounts of radio-activity had been released into the air. It added: "In the beginning there was a fire in the sense that the material glowed, but there was no flame . . . the amount of radio-activity released was not hazardous to the public, and what there was . . . was carried out to sea."

On Oct. 13, however, it was announced by the Authority that tests of milk from cows in the Windscale area had shown an increase in the radio-iodine content since the accident to six times the permissible level. It had therefore been decided to suspend distribution of milk from farms within a coastal strip seven miles long and two miles wide. An Authority spokesman subsequently explained that the increase in radio-iodine content was not considered dangerous for adults but had been imposed because of possible danger to children, who were more sensitive than adults to radio-iodine and who drank more milk in their normal diet.

[The "maximum permissible concentration of radio-iodine" was defined as "a concentration of the isotope which, drunk day after day for a lifetime, would be sufficient to maintain the concentration of radio-iodine in the thyroid at the level considered dangerous for adults."]

A joint statement issued by the Authority and the Milk Marketing Board on Oct. 14 announced that the "level of radio-activity in milk samples taken on a gradually extending survey" had not fallen off as rapidly as expected, and that the distribution ban would therefore be extended to an area of 200 square miles to the south and south-east of Windscale, including the towns of Barrow-in-Furness (population 69,000), Ulverston, and Millom. Alternative milk supplies for the population were being arranged by the Milk Marketing Board.

It was stated that the area included about 150 farms producing about 3,000 gallons of milk daily. Milk samples taken in the outer area had only one-tenth to one-half of the radio-activity present in samples from the original 14-square-mile area, but were still "not down to the level at which experts consider that restrictions on distribution can be avoided." The statement added that people in the area need have no fear about milk already drunk, since the levels of radio-activity were so much lower than in the earlier samples. The restrictions would remain in force until removed by agreement with the Ministry of Agriculture, Fisheries and Food.

Following a Cabinet meeting at 10, Downing St., on Oct. 15, it was announced than an independent inquiry had been ordered into the Windscale incident at the urgent request of the Atomic Energy Authority. The chairman of the committee of inquiry would be Sir William Penney, the member of the Authority responsible for weapons, research and development, and its other members would be: Dr. B. F. J. Schonland, deputy director of the Atomic Energy Research Establishment at Harwell; Professor J. M. Kay, Professor of Nuclear Engineering at the Imperial College of Science; and Professor Jack Diamond, Professor of Mechanical Engineering, Manchester University. The committee would start its work immediately and was expected to report to the Authority within 10 days. The announcement added: "As Windscale is a defence plant, the committee will not meet in public. For the same reason its report will not be published. The fullest statement of its findings consistent with security will, however, be made public."- (Times - Manchester Guardian - Daily Telegraph)

B. AUSTRALIA. — Snowy Mountains Scheme. - Federal-State Agreement on Distribution of Power and Water. - South Australian Objections. - Filling of Adaminaby Reservoir.

After six years of negotiations an agreement governing the distribution of power and water from the Snowy Mountains Hydro-electric and Irrigation Project in South-East Australia was initialled in Canberra on Sept. 18 by representatives of the Federal Government and the States of New South Wales and Victoria. The principal provisions of the agreement were as follows:

(1) New South Wales would receive two-thirds and Victoria one-third of the power produced after the requirements of the Federal Capital Territory (Canberra) and Federal establishments in the Snowy Mountains area had been met. Electricity would be sold to the two States at cost, but they must take and pay for their full quota.

(2) New South Wales and Victoria would share equally the 400,000 acre-feet of water annually diverted under the scheme to the Murray River, while all the water diverted to the Murrumbidgee River an extra 565,000 acre-feet annually - would go to New South Wales. In addition, another 400,000 acre-feet would be available through storage and would be shared out under the Murray River Waters Agreement (see below).

(3) A Snowy Mountains Council would be set up to administer the scheme, consisting of representatives of the Federal Government, New South Wales, Victoria, and the Snowy Mountains Authority.

(4) The Snowy Mountains Authority would build a water storage in the Metray catchment area, or alternatively would contribute half the cost of increasing the capacity of the Hume Reservoir from 2,000,000 acre-feet to 2,500,000 acre-feet.

(5) The Federal Government took over responsibility for completing the project, which is expected to cost £A422,000,000, whilst the States undertook to pass legislation giving the Federal Government constitutional authority to carry out works in connexion with the scheme.

(6) The agreement contained elaborate provisions to ensure that the area in which the Snowy Mountains Authority was constructing works, and the Murray Basin immediately below those works, suffered the minimum amount of damage.

Objections to the agreement were raised by the South Australian Government, and Sir Thomas Playford, the State Premier, told the South Australian Legislative Assembly that he was considering legal action against the Commonwealth because the Federal Government had declined to make available to the South Australian Government a copy of the draft agreement before it was signed. Sir Thomas said that South Australia had been guaranteed water supplies under the Murray River Waters Agreement, and that the latter agreement might have been infringed by the Snowy Mountains Agreement.

Mr. Menzies (the Federal Prime Minister), replying to questions in the House of Representatives on Sept. 18, denied that South Australia's approval was needed, as the Snowy Mountains Agreement would not affect the Murray River Waters Agreement. He pointed out, moreover, that as the extra water made available by storage would be distributed under the latter agreement, South Australia would actually benefit substantially, particularly in dry seasons. At Mr. Menzies' invitation, Sir Thomas Playford discussed the matter with the Prime Minister and other Federal Ministers on Oct. 8, but no agreement was reached, and on Oct. 16 Sir Thomas announced that his Government would begin immediate proceedings in the High Court to seek to restrain the Federal Government from proceeding with the work of diverting the River Tooma as part of the Snowy Mountains project.

Two further large contracts in connexion with the scheme were awarded in recent months, viz. (*a*) one for the building of two 330,000-volt power transmission lines between Muswell Brook and Tamworth and from Beachworth to Upper Tumut respectively, awarded to an Italian-Australian firm—Electric Power Transmission Pty. Ltd. (£A3,000,000); and (*b*) another for the supply of water turbines and generators for the third hydro-electric station, awarded respectively to Charmilles Engineering Ltd. (a Swiss company) and ASEA (the Swedish electrical engineering concern) (£A1,660,000).

Filling of the new Adaminaby Reservoir in the Eucumbene River Valley in New South Wales—one of the major works under the Snowy Mountains scheme—started on June 22. It was estimated that within three months a lake 10 miles long would have been formed, and that the reservoir would eventually be 25 miles long and a mile wide.—(Australian News and Information Bureau - Times) **(Prev. rep. 14013 E.)**

A. POLAND - YUGOSLAVIA.—Polish Government and Communist Party Visit to Yugoslavia. - Tito-Gomulka Talks. - Yugoslav Recognition of Oder-Neisse Frontier.

A delegation of the Central Committee of the Polish United Workers' [Communist] Party and the Polish Government, headed by M. Wladyslaw Gomulka (First Secretary of the P.U.W.P.), visited Yugoslavia from Sept. 10-16 for discussions with the Yugoslav League of Communists. The Polish delegation also included M. Cyrankiewicz (Prime Minister), M. Rapacki (Foreign Minister), and M. Ochab (Minister of Agriculture, and M. Gomulka's predecessor as First Secretary of the P.U.W.P.). The Yugoslav delegation at the talks was headed by President Tito, and included M. Kardelj, M. Rankovich (both Vice-Presidents of the Federal Executive Council), and M. Koca Popovic (State Secretary for Foreign Affairs).

In addition to their discussions with the Yugoslav leaders, which took place partly in Belgrade and partly on the island of Brioni, M. Gomulka and the Polish Ministers visited Ljubljana (the capital of Slovenia), where they inspected the Litostroj turbine works, one of the major industrial establishments built after the war.

The discussions concluded with the publication of a joint declaration which was signed in Belgrade on Sept. 16 by President Tito and M. Gomulka. In addition to stressing their complete identity of views on all questions discussed, the statement announced, *inter alia*, (1) increased co-operation between the two Communist parties ; (2) closer governmental consultation ; (3) the setting-up of a joint commission for economic co-operation ; (4) Yugoslav recognition of the Oder-Neisse Line as the western frontier of Poland ; and (5) the joint support of both countries for the Soviet thesis that there were two German States and that German reunification could only come about through direct talks between the German Federal Republic with the German Democratic Republic. [Hitherto Yugoslavia had not officially recognized the East German Democratic Republic.] The declaration is summarized below under cross-headings.

The statement began by referring to the " cordiality and profound sympathy with which the Polish delegation has everywhere been surrounded " and which " testified to the permanent bonds of vital friendship and fraternal solidarity binding the peoples of Yugoslavia and Poland." The talks between the leaders of both countries, it continued, had covered " questions of the further development of Yugoslav-Polish relations, outstanding problems of the international situation, and current questions of the international workers' movement," and had shown " an identity of attitudes in respect of the assessment of the problems discussed."

International Co-operation and Disarmament. After noting that there had recently been a " certain improvement in the international sphere," the declaration continued : " The two Governments wish to stress their adherence to a policy of constructive co-operation among peoples, based on respect for the principles of sovereignty, independence, territorial integrity, equality, and non-interference in the internal affairs of other countries. Both sides especially pledge themselves to develop the broadest co-operation between all peoples for the unrestricted development of economic and cultural relations, for stimulating further trade exchanges, and for eliminating all forms of discrimination . . ."

" Appreciating the major significance of disarmament," the two Governments called for " continued efforts to reach at least initial and partial agreements which would open the way to an over-all solution of this question," and promised to support " any constructive initiative in this direction." They also stressed the importance of an agreement on the prohibition of the production and use of atomic and thermo-nuclear weapons, and of a suspension of tests of such weapons as a " first step." In addition, the two Governments promised to support " all forms of peaceful co-operation in the use of atomic energy for peaceful purposes."

German Reunification and European Security. " Considering European problems, the two Governments came to the conclusion that German reunification into a peaceful and democratic State would be a great contribution to the stabilization of world peace . . . Any solution of the problem of German reunification must be based on the fact that there are two German States. The two Governments believe that . . . it is necessary to establish contacts and conduct direct talks between the German Democratic Republic and the German Federal Republic in order to find a satisfactory solution for both the German people and for European security. It would be desirable if the big Powers acted in this direction. A European security system which could be attained by the joint efforts of the States concerned would be an indispensable guarantee for peace in Europe."

Polish-German Frontier. " Taking into account the rights of the Polish people, the Yugoslav Government considers the existing frontier on the Oder and Neisse, which was fixed by the Potsdam decisions and recognized by the German Democratic Republic, as the final Polish-German frontier. Recognition of the Western frontiers of Poland by the States which have not yet done so could contribute to . . . the consolidation of peace in Europe."

Middle East. " Both parties exchanged views on the situation in the Near East, where a danger to peace has lately arisen again and where various forms of coercion are being continued, especially against Syria, which is pursuing an independent policy. They are of the opinion that unsolved problems, especially in some of the Asian and African countries, ought not to be settled by colonial methods, military and economic pressure, and interference in internal affairs, but in accordance with the will of the people and with their right to independence, in the spirit of the U.N. Charter."

Under-developed Countries. The joint declaration called for " urgent organized action on an international basis " to " alleviate and solve " the problems of the under-developed countries. This should be in the form of " economic and technical assistance . . . without political conditions and with full respect for the sovereignty and independence of those countries." Such assistance could be " substantially increased from the funds which would become available through a reduction in armaments."

United Nations. - Admission of Communist China. After stressing the importance of the United Nations in settling international disputes peacefully, the communiqué said that it was " indispensable for the People's Republic of China to occupy the seat which belongs to it in that organization."

Principles of Communist Parties' Co-operation. The statement called for the strengthening of the relations and co-operation of the Communist and Workers' Parties and of the Socialist countries. It continued : " The creative application of the basic principles of Marxism-Leninism to the concrete, specific conditions in different countries, which arise from their historical, economic and social development, is of fundamental significance for the development of socialist construction in those countries. From this follows the different nature of the roads to Socialism taken by various countries. Both parties believe that the different forms and methods of building Socialism enrich the experiences of and the theoretical contribution to the international workers' movement . . . Co-operation and relations between the Communist and Workers' parties and between the Socialist countries ought to be based on the principles of proletarian internationalism, solidarity, mutual aid, sovereignty, equality, friendship and non-interference in internal affairs."

Both the Yugoslav League of Communists and the Polish United Workers' Party, it was stated, favoured a " further expansion of contacts and inter-party co-operation " between them, including a " wide exchange of information and experiences " and inter-party discussions. They considered that " bilateral relations between Communist and Workers' parties should be specially developed," although " wider contacts on questions of interest to other [Communist] parties could also be very useful."

Polish-Yugoslav Governmental Relations. After saying that both Governments had " noted with the greatest satisfaction that their relations have assumed the character of all-round cordial and friendly co-operation, based on the principles of equality and mutual respect," the statement enumerated the agreements already concluded between them, including those on trade and payments, scientific and technical co-operation, cultural co-operation, co-operation in the use of nuclear energy for peaceful purposes, and air transport. It continued :

" With a view to further expanding their co-operation, the two Governments have decided to consult each other when necessary, especially when required by the interests of peace and the security of both peoples ; to set up a Yugoslav-Polish commission for economic co-operation ; to expand cultural and scientific co-operation . . . and to open cultural information centres in Belgrade and Warsaw."

In the public speeches made by President Tito and M. Gomulka special emphasis was laid on the restoration of mutual friendship between Poland and Yugoslavia.

In a speech on his arrival M. Gomulka declared : " We meet today after a long time as old friends whom the disturbances of fate had separated . . . Likewise our peoples, after having removed the artificial barriers that had divided them after so long and detrimental a cessation of mutual relations, wish even more strongly that their co-operation shall be closer . . ." At a luncheon given on Sept. 10 President Tito spoke of the " deep admiration " with which the events in Poland in October 1956 had been greeted in Yugoslavia, as well as of the " special sympathies " with which the Yugoslav people were following the efforts of Poland to " overcome the present difficulties in developing a Socialist society." M. Gomulka, in his reply, spoke of the " feeling of profound relief " which the Polish people had felt at the " ending of the period of disagreements and misunderstandings, for which Yugoslavia was not to blame," and added that they in Poland were " aware of and appreciated what had been done in building Socialism in Yugoslavia."

In another speech at a luncheon given by M. Gomulka and the Polish Ministers to the Yugoslav leaders on Sept. 15, President Tito spoke of his attitude to the Soviet Union.

" In some unessential things we had different views," he said, " and that will probably be so again in connexion with day-to-day practice. But this does not mean that we must dramatize and sharpen such momentary disagreement . . . We are co-operating with the Soviet Union on a completely equal basis, and the Soviet Union does not demand of us that we abandon those principles which we have so far held, either in matters of foreign policy or in matters of relations between the Socialist countries. For this reason, when

we speak of 'our own ways' this certainly should not be taken to mean that we are going along a way of our own in every respect. We have many things in common . . . Yugoslavia has its specific conditions, Poland hers, and we cannot transplant experiences as a cliché even from the Soviet Union. We have taken the most useful experiences from the Soviet Union, but what we cannot apply in our country we have rejected. We consider, therefore, that no-one should reprimand us for not being internationalists . . ."

Referring to the "leading role of the Soviet Union," President Tito said: "We allude to its leading role in a sense that as the first country of Socialism it is the most responsible for preserving peace, for correct relations between countries building Socialism . . . No other country has such material or other potentialities as the Soviet Union. We do not dispute this great role, but we ask that in the present stage of development there should be such relations between the big and the small Socialist countries as will be a strong incentive for the creation of confidence towards the Soviet Union and the whole world."

In conclusion, President Tito deprecated the notion that Poland and Yugoslavia were cultivating some sort of "national Communism," saying that a "national Communism" was "impossible" and "entirely at variance with the definition of internationalism."

The Polish leaders returned to Warsaw on Sept. 16. (Tanjug Agency, Belgrade - Polish Embassy Press Office, London) **(Prev. rep. 15188 A; 15161 A, page 15763)**

A. TURKEY. — The Middle East University.

The foundation-stone of a new Technical University for the Middle East was laid near Ankara on Oct. 2 by the Turkish Minister of Education (M. Tevfik Ileri) in the presence of President Bayar, Mr. Adnan Menderes (the Prime Minister), the U.S. Ambassador and the British Chargé d'Affaires. When completed in two years' time the University will have 6,000 students and a staff of 2,500 professors, lecturers and research workers, with Faculties of Mechanical Engineering, Architecture, Industrial Administration, and Agriculture and Forestry. The language of instruction will be English, and students will be accepted from all parts of the Middle East and the Balkans as well as from Turkey itself.

The new University opened in temporary premises during the academic year 1956-57, with six professors and 56 students. About 20 of the students come from Iraq, Jordan and Pakistan. (Turkish Embassy Press Department, London)

B. AZORES. — New Volcanic Island.

A newly-formed volcanic island, some 800 yards in diameter and over 300 ft. high, rose from the sea as a result of a violent undersea eruption in the Azores on Sept. 27-28. The island is situated some 300 yards offshore from Fayal Island, where about 1,000 people had to abandon their homes because of severe earthquake shocks from the eruption. Its centre consists of a volcano with a crater 200 yards wide, which was still emitting large quantities of lava and black smoke by the middle of October. The Portuguese flag was formally hoisted on the island on Oct. 12.—(Diario de Noticias, Lisbon)

C. UNITED KINGDOM. — Travel Allowances.

The Treasury announced on Oct. 18 that tourist allowances for the year beginning Nov. 1, 1957, would remain unchanged and would continue to be available for travel throughout the world. There would also be no change in the amount of sterling notes (£10) which might be taken out of or brought into the United Kingdom.

The existing basic travel allowance is £100, or £70 for children under 12 years. There are extra allowances of £15 for cars and motor-cycles respectively.—(Times)

(Prev. rep. 15577 B; 15200 C.)

D. CEYLON. — Ceylonese Control of Trincomalee Naval Base.

The naval base at Trincomalee was formally handed over to Ceylonese control on Oct. 15, the ceremony being attended by the Prime Minister of Ceylon (Mr. Bandaranaike) and the acting British High Commissioner (Mr. Crosthwaite), deputizing for Vice-Admiral H. W. Biggs, C.-in-C., East Indies Station. The R.A.F. base at Katunayake will be handed over to Ceylon on Nov. 1.—(Times - Daily Telegraph - Ceylon Government Information Department, Colombo)

(Prev. rep. 15591 B.)

E. SOVIET UNION. — Molotov renamed Perm.

It was announced in Moscow on Oct. 3 that the city of Molotov (population 538,000), in the Urals, had reverted to its former name of Perm. The city, an important centre on the Trans-Siberian Railway, had been named after M. Molotov in 1940.—(Soviet Embassy Press Department, London)

(Prev. rep. 15772 B.)

F. JAPAN - UNITED KINGDOM. — Mr. Fujiyama's Visit to London. - Discussions with British Government Leaders. - Joint Communiqué.

The Japanese Foreign Minister, Mr. Fujiyama, paid a four-day visit to London from Sept. 27-30, at the invitation of the British Government, after attending the opening of the 12th session of the U.N. General Assembly in New York. During his visit Mr. Fujiyama had discussions with Mr. Macmillan, Mr. Selwyn Lloyd, and other U.K. Ministers, including Lord Mills (Minister of Power) and Mr. Vaughan-Morgan (Minister of State, Board of Trade). A joint communiqué on these talks was issued on Oct. 1, as summarized below:

(1) In a "frank exchange of views on current international problems" it was agreed that "satisfactory progress was being made in the restoration of close and friendly relations between the two countries," and that Britain and Japan should "co-operate as members of the free world in the maintenance of international peace and work together for the solution of international problems in the spirit of the U.N. Charter."

(2) It was agreed that "the economic development of the world's under-developed areas and the improvement of the living conditions of their peoples were important factors in securing freedom and peace." Progress under the Colombo Plan had been reviewed, and ways discussed in which Japan and Britain might make a further contribution towards economic development in South-East Asia.

(3) Views had also been exchanged on the proposed European Common Market and Free Trade Area.

(4) It was agreed to work for the early conclusion of an Anglo-Japanese treaty of commerce and navigation, negotiations for which had already begun. "In this connexion [the communiqué added] Mr. Fujiyama referred to the Japanese Government's regret that H.M. Government had not found it possible to accept that Japan and the U.K. should enter into full GATT relations, but was glad to note that H.M. Government looked forward to the day when trading relations between the two countries would make this possible. Both welcomed the recent expansion of trade between Japan and the U.K. and expressed the hope that this trend would develop."

(5) Shipping problems and the protection of industrial designs had also been discussed. It was agreed that "considerable improvement in the settlement of differences between the two countries had been made in these spheres," and confidence was expressed that this improvement would continue. Discussions had also been held on outstanding British claims arising out of the Japanese Peace Treaty of 1952.

(6) After stating that Mr. Fujiyama and Mr. Selwyn Lloyd had discussed "problems relating to disarmament and nuclear tests," the communiqué went on:

"The Foreign Secretary (Mr. Selwyn Lloyd) said that H.M. Government were prepared to agree to the suspension of tests provided that this formed part of a first-stage international agreement on disarmament . . . Pending such an agreement H.M. Government must retain their freedom to continue with the testing of nuclear weapons. Mr. Fujiyama expressed deep regret at the statement made in the U.N. Disarmament Commission that H.M. Government were planning to have a further series of tests this winter. He stressed the sincere desire of the Japanese people for the suspension of nuclear tests, and reiterated the firm belief of the Japanese Government that it was essential for the welfare and safety of mankind that nuclear tests should be discontinued."

(7) "Notwithstanding this difference of view with regard to nuclear tests, the two Foreign Ministers were in full agreement that the meeting had been highly valuable to both sides, and expressed their desire to maintain close contacts in the future on all problems of mutual interest."

While in London, Mr. Fujiyama presided over a meeting of Japanese heads of missions in Europe, including ambassadors, ministers and consuls-general.—(Times - Japanese Embassy Press Office, London) **(Prev. rep. Trade Agreement, 15578 A; British Nuclear Tests, Macmillan-Kishi Correspondence, 15540 A.)**

G. BELGIUM. — The Spaak Foundation.

A Paul-Henri Spaak Foundation was set up at the beginning of October by the Belgian Socialist Party and the Socialist trade unions as a tribute to M. Spaak, secretary-general of NATO and former Belgian Premier, Foreign Minister, and Socialist leader. The Foundation will make an annual award to individuals whose activities or publications contribute to the maintenance of peace and the defence of liberty.

(Le Peuple, Brussels)

H. ARGENTINA - ISRAEL. — Cultural Agreement.

A cultural co-operation agreement between Argentina and Israel was signed in Buenos Aires on Sept. 24, providing for exchanges of scientists, lecturers and students and for co-operation in broadcasts of mutual interest. The establishment of special Chairs at the Universities of Buenos Aires and Jerusalem was also envisaged.

(Government Press Office, Jerusalem)

A. UNITED KINGDOM. — Nationalized Gas Industry. - Report and Accounts for 1956-57.

The eighth annual report and accounts of the Gas Council and the 12 Area Boards, covering the year ended March 31, 1957, were published on Oct. 8. They showed that the Gas Industry as a whole had earned a net surplus of £3,803,856 (compared with £531,628 in 1955-56), bringing the cumulative surplus since Vesting Day to £15,300,728.

The net surplus was arrived at after charging £20,900,000 for depreciation and £19,000,000 for interest. All 12 Area Boards earned surpluses, ranging from £13,008 for the South-Western Board to £786,804 for the North-Western. The Northern Board, which in 1955-56 incurred a deficit of £343,908—the largest of any Board—earned a surplus in 1956-57 of £595,704, the second largest surplus recorded.

Detailed information given in the report is summarized below :

Revenue. Gross revenue totalled £370,600,000 (compared with the revised figure of £347,500,000 in 1955-56), comprising £207,400,000 from the sale of gas, £119,100,000 from sales of coke and other by-products, £31,100,000 from the sale and rental of appliances, and £13,000,000 from other sources.

Costs and Prices. The industry incurred additional costs of £9,070,000 in 1956-57, largely owing to the increase in coal prices in June 1956. Ten Area Boards raised their prices in consequence, but all Area Boards undertook not to raise them again before the end of the financial year.

Since March 31, 1957, additional costs, estimated at £12,479,000 for the remainder of 1957-58 and at £16,632,000 in a full year, had been incurred, mainly as a result of the further rise in coal prices in July 1957, but also owing to higher transport and wage costs. No further increase in gas and coke prices was at present envisaged, but the report gave a warning that although the Boards, as in the past, would pass on to the consumer only part of the additional costs, " with increased expenses of this magnitude . . . some increases in the price of gas and coke cannot be avoided."

Number of Consumers. - Gas Sales. The number of consumers rose during the year by 83,780 to 12,875,987 on March 31, 1957. Gas sales totalled 2,607,000,000 therms, compared with 2,649,000,000 therms in 1955-56, the reduction being attributed mainly to the mild weather in January-March 1957. During the year 2,168 miles of mains were laid, raising the total to 90,350 miles.

Plant Efficiency. During 1956-57 overall production efficiency in the industry rose from 76.8 to 77.8 per cent, equivalent to a saving of 350,000 tons of coal. The cumulative effect of improved efficiency since Vesting Day, resulting mainly from the introduction of integration schemes and the concentration of production in modern economic units, was stated to be equivalent to a yearly saving of 2,250,000 tons of coal, costing £15,000,000. The report added that automation and automatic controls in manufacturing processes and in distribution were increasing with the concentration of production in larger works.

Coal Consumption. The industry used 27,668,000 tons of coal in 1956-57 (compared with 27,841,000 tons in 1955-56), including 965,000 tons of imported coal (2,116,000 tons in 1955-56).

Coke Supplies and Clean Air Policy. The report stressed that there was now " ample coke in sight for a beginning to be made with the clean air policy," nearly two-thirds of the 11,300,000 tons of coke made in gasworks being " inherently suitable for use in modern domestic coke fires." In addition, two new fuels made by carbonizing low-rank coals (as recommended by the Beaver Committee) had been produced by the North Thames and North-Western Boards ; these gave a good fire in about three-quarters of the time required for other coke or domestic coal, but demand at present exceeded supply.

Oil Gasification. At March 31, 1957, there were 14 oil gasification plants at work ; the number was expected to have risen by March 1959 to 39, using 388,000 tons of oil and saving over 1,000,000 tons of coal a year.

Gas from Coke Ovens. The quantity of gas produced from coke ovens increased by 11.4 per cent during the year, the increase being most substantial in the Northern, East Midlands, and Welsh areas, which now received 62, 58, and 81 per cent respectively of their total supplies from this source.

Oil Refinery Gas. The first supplies of gas from the Fawley oil refinery had been received at Southampton, and supplies from Shellhaven were expected to reach Romford (Essex) by the middle of 1958. When the schemes were in full operation these refineries would provide the industry with as much gas as would be produced by carbonizing 365,000 tons of coal annually.

Natural Gas. Although the results of the search for natural gas in Britain had so far not been encouraging, the report stressed that there was " every reason to complete the programme." Preparations for natural gas supplied from Cousland (Scotland) had been completed, and it was hoped to supply Musselburgh (Midlothian) with substantial quantities of natural gas piped from Dalkeith.

The report stated that the technical problems of liquifying methane gas to enable it to be transported from the Middle East, the U.S.A. and elsewhere " appeared to have been solved," and that the stage had been reached when the importation of a trial cargo of liquified methane gas could be considered.

Sales of Appliances. Sales of domestic appliances were again affected by hire-purchase restrictions and high rates of purchase tax, hire-purchase sales of the main gas appliances having fallen by 14.4 per cent compared with 1955-56, with cash sales affected to a lesser extent. The balance outstanding on hire-purchase advances fell during the year from £41,800,000 to £36,300,000.

Capital Expenditure. This amounted during the year to £51,300,000, against the approved figure of £52,000,000 (nearly £10,000,000 less than the programmes originally submitted by the Area Boards). Projects deferred from 1955-56 were put at £3,000,000. In submitting their programmes for 1957-58 the Area Boards had again taken account of financial stringency, even at the cost of deferring schemes considered essential. A projected investment of £59,000,000 had been approved for the year.

Employees. The number employed in the industry at March 31, 1957 was 138,740, compared with 141,918 at March 31, 1956.

Sir Henry Jones, deputy chairman of the Gas Council, stated on Oct. 8 that it was hoped to import a trial cargo of about 3,000-4,000 tons of liquified methane gas from the U.S.A. within the next 18 months. The Gas Council expected the cost of imported gas to be " considerably cheaper " than the cost of making gas in Britain, since one ton of liquid methane would replace six or seven tons of coal. The first experimental shipment would be unloaded in the area of the North Thames Gas Board.

The deputy chairman of the South-Western Gas Board (Mr. James Carr) declared on the same day that the importation of liquid methane could " revolutionize the gas industry," and that four cargoes annually of 30,000 tons each (the size eventually envisaged) would supply all the South-Western Board's needs.

Lord Mills, the Minister of Power, announced on Sept. 12 that, with retrospective effect from July 1, the annual salaries of the chairman and deputy chairman of the Gas Council would be increased by £2,500 each to £8,500 and £7,500 respectively. From the same date the salaries of the chairmen and deputy chairmen of Area Boards would be raised by £2,000 and £1,500 respectively to £6,500 and £5,000 ; salaries of full-time members by £1,000 to £4,000 ; and those of part-time members by £500 to £1,000. The annual salaries of the chairmen of consultative committees would be increased by £250 to £500.—(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. 15197 A.)**

B. NETHERLANDS.—The Velsen Road-Rail Tunnel.

A tunnel to carry rail and road traffic under the North Sea Canal, which links the port of Amsterdam with Ymuiden, on the coast, was opened by Queen Juliana on Sept. 28. The tunnel, which is at the town of Velsen (a few miles north of Haarlem), comprises a double-track railway section and two road tunnels, each with two carriageways. The total length of the railway tunnel is about two miles, of which two-thirds are roofed or underground ; the road tunnels are about one mile long, nearly half-a-mile being roofed or underground.

The tunnel scheme, the total cost of which was 130,000,000 guilders (£13,000,000), was approved before the war. Construction started in May 1941 ; was suspended by the German occupation authorities in November 1942 ; and was eventually resumed in April 1952.

The railway tunnel will abolish the need for the existing bridge, which has been a hindrance to shipping in the North Sea Canal, whilst the road tunnels will form an important communications link between North and South Holland. (Algemeen Handelsblad, Amsterdam - Nieuwe Rotterdamse Courant - Netherlands News Agency)

C. UNITED STATES. — Relaxation of Fingerprinting for Foreign Visitors.

It was announced in Washington on Oct. 10 that Mr. Dulles, the Secretary of State, and Mr. Brownell, Jr., the Attorney-General, had jointly issued an Order abolishing fingerprinting for foreign visitors to the U.S.A. staying less than one year. The only exceptions were (i) visitors from Liberia, Peru, and Ecuador, since those countries demand fingerprinting from foreign visitors, including U.S. citizens ; (ii) foreigners entering the U.S.A. without visas, such as seasonal workers from Mexico ; and (iii) seamen wishing to go ashore while in U.S. ports. Visitors from other countries staying more than a year will also have to be fingerprinted, but only on the expiry of the year.

Obligatory fingerprinting for foreign visitors had been introduced in 1942 and had been a source of irritation and annoyance for millions of people entering the U.S.A. for brief visits. The new Order abolishing it in most cases had been authorized by a clause in an immigration law voted by Congress on Sept. 11.

(New York Times - New York Herald Tribune)

A. NORWAY. — General Elections. - Labour Victory.

General elections took place in Norway on Oct. 7, resulting in a victory for the Labour Party, which has been in power since 1935 with the exception of the war years, during which a coalition Government-in-exile was established in London. Results were as follows, figures for the 1953 elections being shown in comparison :

	1957		1953*		Percentage	
	Seats	Votes	Seats	Votes	1957	1953
Labour Party (*Arbeiderpartiet*)	78	863,435	77	830,448	48.4	46.7
Conservatives	29	300,306	27	295,277	16.8	16.6
Agrarian Party (*Bondepartiet*)	15	154,392	14	148,533	8.7	8.3
Liberals (*Venstre*)	15	170,372	15	176,191	9.6	9.9
Christian People's Party	12	182,477	14	186,627	10.2	10 5
Communists ..	1	60,375	3	90,422	3.4	5.1
Joint Cons.-Agrarian and Cons.-Liberal Lists	†	50,587	†	52,311	2.8	2.9
Social Democrats	—	2,838	—	—	0.1	—
	150	1,785,139‡	150	1,779,809	100.0	100.0

*Revised figures. †Four seats gained by the joint lists included in Conservative total, and one seat in the Agrarian total in 1957 ; one seat in Conservative total in 1953. ‡Includes 357 votes for other lists.

The Labour Party, though appreciably increasing its percentage of the total vote, polled less than 50 per cent of the total but retained its majority of four seats over all other parties. The Conservatives remained the second strongest party and the only one which gained seats without losing any. Other notable features of the election were (*a*) the setback suffered for the first time by the Christian People's Party, which reflects the strong evangelical cast of thought of the more isolated parts of the Norwegian coasts and valleys ; (*b*) the further heavy fall in votes for the Communists, who lost two of the three seats they held in the previous *Storting* and retained only their seat in Hedmark, where the party leader, Hr. Emil Lövlien, was re-elected ; (*c*) the failure of the Social Democrats, a new party closely related to the Labour Party but opposed to NATO and military commitments.

The Labour Party gained two seats from the Communists (one in Oslo and the other in Finnmark), whilst losing one to the Conservatives (in Oppland). The Conservatives gained one seat from the Agrarians (in Ostfold) and, as stated above, a second from Labour in Oppland. The Agrarians gained two seats from the Christian People's Party, one on a joint Conservative-Agrarian list in Telemark, and the second in Vest Agder ; on the other hand they lost one seat to the Conservatives (Ostfold). As stated above, the Christian People's Party lost two seats to the Agrarians, and the Communists the same number to the Labour Party. There was no change in the representation of the Liberals.

In Oslo the Labour Party obtained 129,073 votes, or 46.5 per cent of the total poll (against 119,784, or 43 per cent in 1953), the Conservatives 106,099, or 38.2 per cent (105, 817, or 38 per cent), the Liberals 15,963, or 5.7 per cent (18,195, or 6.5 per cent), the Christian People's Party 15,021, or 5.4 per cent (16,961, or 6.1 per cent), and the Communists 11,376 or 4.1 per cent (17,693, or 6.3 per cent). The capital will be represented by six Labour members, five Conservatives, and one member each of the Liberals and Christian People's Party, the Communists having lost to Labour the seat previously held by them.

Hr. Einar Gerhardsen (the Prime Minister) and Hr. Trygve Bratteli (the Finance Minister) were re-elected in Oslo, whilst other Ministers re-elected included Dr. Lange (the Foreign Minister), Hr. Jens Haugland (Justice), Hr. Sjaastad (Industry), Hr. Löbak (Agriculture), and Hr. Ulrik Olsen (Municipal Affairs). Other prominent Labour members who retained their seats included Hr. Finn Moe (chairman of the Foreign Affairs Committee of the *Storting*) and Hr. Oscar Torp (the former Prime Minister).

The electoral campaign had been much restricted owing to the death of King Haakon VII, a suspension of campaigning activities having been agreed to by all parties during the period between the late King's death and his funeral.
(Arbeiderbladet, Oslo - Aftenposten, Oslo - Norwegian Embassy Press Department, London) **(Prev. rep. 13213 A.)**

B. SUDAN. — Membership of International Bank and International Monetary Fund.

The Sudan became a member of the International Bank and the International Monetary Fund on Sept. 5. Its quota in the I.M.F. is $10,000,000, and its subscription to the capital stock of the Bank is 100 shares with a par value of $10,000,000. The Sudan's admission brought the total membership of both institutions to 63, the total of members' quotas in the Fund to $8,991,000,000, and the total subscribed capital of the International Bank to $9,818,400,000.—(International Monetary Fund - International Bank, Washington) (15790 C.)

C. FRANCE. — Construction of Transatlantic Liner "France." - Sale of Liner "Pasteur" to Germany.

The keel of the new transatlantic liner *France* was laid at the St. Nazaire shipyard of the *Union des Constructions Navales de l'Atlantique* on Oct. 7. The ship, of 55,000 tons displacement, is due to be launched in October 1959 and to enter the service of her owners, the *Compagnie Générale Transatlantique* (French Line), before the end of 1961.

The *France*, the third ship of that name built for the C.G.T., will have a length of 950 feet, a maximum speed of 31 knots, and accommodation for about 2,000 passengers in two classes. She is intended to make the Havre-New York crossing in five days (like the former French liner *Normandie*, the Cunard *Queens*, and the American *United States*) compared with the six and seven days respectively required by the French liners *Liberté* (the former German liner *Bremen* of 51,000 tons) and *Ile de France* (41,500 tons).

Although the construction, with Government assistance, of a large new liner for the transatlantic service had been agreed to in June 1956, the signing of the contract had been delayed owing to the Government's financial stringency and its dissatisfaction with the shipbuilders' tender of 31,000,000,000 francs (£31,000,000), which compared with a tender of 18,000,000,000 francs from a foreign shipyard. The Government was unwilling, however, for patriotic and prestige reasons to allow the new liner to be built outside France, and eventually the C.G.T. agreed to finance the construction of the liner itself, provided that it was able to benefit under a Bill (then before Parliament) to aid French shipbuilding. This Bill, which authorized the Government to subsidize merchant shipbuilding in France to keep prices competitive with those of foreign shipbuilders, was approved by the French National Assembly on June 19 and subsequently enacted. Under it the Government agreed to pay 7,660,000,000 francs as subsidy towards the total cost of 25,000,000,000 francs (at the 1955 rate) to which the shipyard had eventually reduced its earlier tender.

The French Ministry of Finance announced on Sept. 18 that the former liner *Pasteur* (33,447 gross tons) had been sold by the Government to the *Norddeutscher Lloyd*, of Bremen, and would be transferred within a few days. The *Pasteur*, built in 1939 for the service to South America and the third largest French liner, had been used as an Allied troopship throughout the war and had since been taken over by the French Government for troop carrying, but had been laid up at Brest since the beginning of 1957.

It was stated in the French Press that the price for the *Pasteur* agreed between the French Government and the *Norddeutscher Lloyd* was 2,300,000,000 francs (£1,900,000), and that, after conversion, she was expected to enter her new owners' transatlantic service in 1959 under the name of *Bremen*. The ship would have accommodation for 1,300 passengers in two classes, and would have a speed of 24 knots.

D. GHANA. — Abolition of British National Anthem at Official Functions.

The Ghana Government announced on Oct. 14 that in future *God Save the Queen* would no longer be played in Ghana at official functions, even when the Queen or her special representative (i.e. the Governor-General) was present. An announcement from the Prime Minister's Office stated :

"The Government decided some time ago that *God Save the Queen* should not be played in Ghana except when her Majesty or a special representative of her Majesty was present. Since then approval has been given to the adoption of the following Royal style and title in relation to Ghana : 'Elizabeth II, Queen of Ghana and her other Realms and Territories, Head of the Commonwealth.' In consequence of this the Government does not consider that it is necessary to play *God Save the Queen*, in addition to the Ghana national anthem, at official functions in Ghana. It has been decided, therefore, that at all official functions in Ghana in future only the Ghana national anthem should be played."

Mr. Kofi Baako, the Minister of Information, emphasized that there was no question of Ghana leaving the Commonwealth or becoming a Republic within it.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15427 A.)**

E. WOMEN'S SUFFRAGE. — U.N. Report.

The annual report of the U.N. Secretary-General on women's progress in political rights, published on Aug. 23, stated that there were now only 11 countries where women did not possess the right to vote and were not eligible for election—Afghanistan, Iraq, Jordan, Libya, Liechtenstein, Paraguay, Persia, San Marino, Saudi Arabia, Switzerland, and Yemen.—(Times)

F. ITALY. — Population Figures.

It was announced in Rome on Oct. 14 that the population of Italy was 49,600,000 at the end of 1956, an increase of 865,000 over the previous year.—(Giornale d'Italia, Rome) (Prev. rep. 11925 B.)

OCTOBER 19—26, 1957

A. MIDDLE EAST. — The Syrian-Turkish Crisis.

A further deterioration of the situation in the Middle East occurred from mid-September onwards as a result of Soviet and Syrian allegations of Turkish troop concentrations on the Syrian border aimed, it was alleged, at invading Syria and overthrowing the existing regime with the help of the United States. These unsubstantiated allegations were completely denied by the Turkish and U.S. Governments, both of which stressed that the tension in the Middle East arose primarily from Soviet attempts to convert Syria into a Communist "satellite," as evidenced by the large supplies of Soviet arms sent to that country during the past two years. Recent developments in the Middle East situation are summarized below under cross-headings.

Marshal Bulganin's Letter to Turkish Prime Minister. - Allegations of Turkish Preparations for "Attack" on Syria. - Soviet Naval Squadron visits Latakia.

The Soviet Prime Minister, Marshal Bulganin, sent a letter on Sept. 10 to the Prime Minister of Turkey (M. Adnan Menderes) expressing "concern" at "reports of Turkish troop concentrations on Syria's frontiers and shipments of American arms to Turkey to carry out an attack on Syria," and warning Turkey that she would "bring great calamities upon herself" if she should be "guided by foreign circles which are entirely unconcerned with the maintenance of peace in the Middle East."

After saying that the "basic cause" of the tension in the Middle East had arisen from the "flagrant interference by certain Powers in the affairs of the Middle East countries," and asserting that both Syria and Egypt had "for a long time been subjected to gross political, economic, and military pressure from outside," Marshal Bulganin continued:

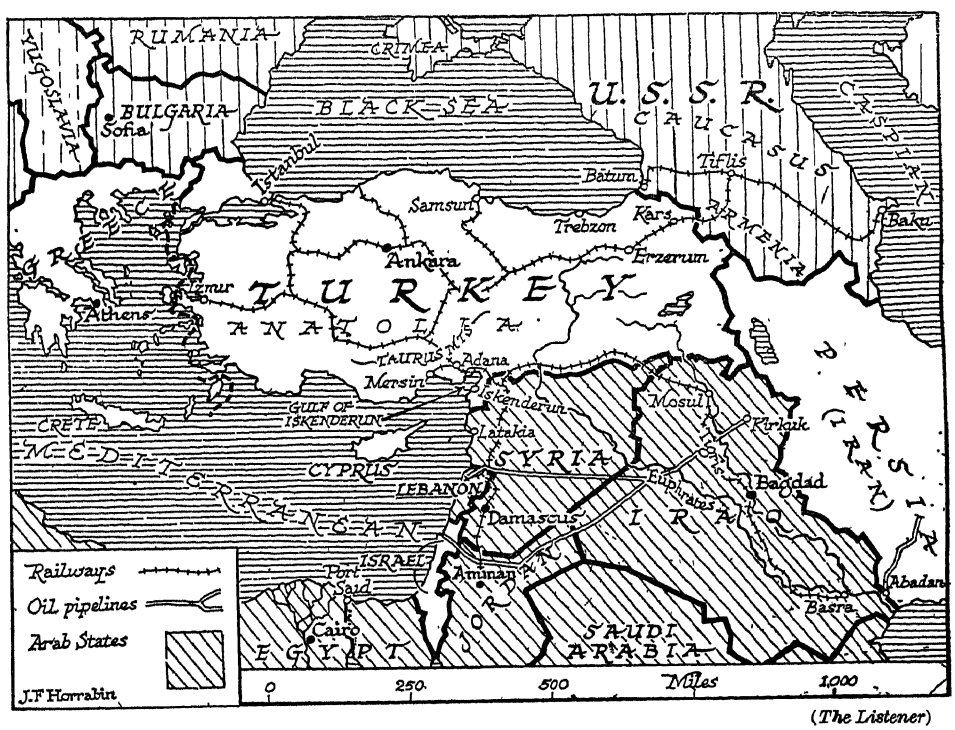
"In recent weeks this pressure on Syria has increased to danger point. The recent visit of the American envoy Henderson to the Middle East [i.e. Mr. Loy Henderson, of the U.S. State Department—see 15721 A] was obviously brought about by a desire to organize military intervention from outside in Syria's internal affairs. It is known that it was Henderson's task to organize a plot against Syria and devise means of overthrowing the Syrian Government, thus changing the situation in that area so as to satisfy the big American monopolies . . . For the purpose of an armed attack on Syria, certain American quarters would like to utilize such Middle East countries as Jordan, Iraq, and possibly others . . . In this connexion . . . a certain role is assigned to Turkey in the plans to unleash military action against Syria. We naturally would not wish to believe this, but the state of affairs is so grave that we have considered it necessary to approach the Turkish Government on the question. We are profoundly alarmed at the fact that there are signs that leading Turkish statesmen are evidently inclined to meet these plans halfway. We do not conceal the fact that we have received with great concern reports about Turkish troop concentrations on Syria's frontiers, and also about shipments of American arms to Turkey for an attack on Syria . . .

"In view of the proximity of the Middle East to the Soviet frontiers, and in the interests of its own State security, the Soviet Union cannot ignore a course of events which could lead to an armed conflict in the area, especially since the danger of a violation of peace would not be limited to that area alone. The Soviet Government, approaching the Turkish Government in the most friendly manner, appeals to it . . . not to take part in such an act as armed intervention against Syria, which is fraught with great danger, and to help to avert an undesirable turn of events in the Middle East and the unleasing of an armed conflict there . . . When reports are received about the concentration of Turkish troops on the Syrian frontier, the question naturally arises as to how the Turks would feel if foreign troops were being concentrated on their own borders.

"It is our deep-seated conviction that Turkey would only bring great calamities upon herself if she should be guided by the advice of those foreign circles which are entirely unconcerned with the maintenance of peace in the Middle East . . . Calculations that a military adventure against Syria could be localized are dangerous . . . The First and Second World Wars began with local military action by the aggressors, but everyone knows the dire consequences those wars entailed for the aggressors, as well as for mankind . . . Once started, military action in such an area [the Middle East] could easily become a broad conflict. It would then be difficult to confine its consequences within the area . . ."

After saying that the "plans for military action against Syria" could not be justified by "the alleged aggressiveness of the small Syrian State, which is defending its national rights and independence," Marshal Bulganin assured M. Menderes of the Soviet Union's "sincere and ardent desire to maintain friendly and good-neighbourly relations with Turkey." Recalling the close friendship which existed between the two countries "when the founder of modern Turkey, Kemal Ataturk, raised the banner of Turkish independence," he said, in conclusion, that his present letter was "prompted by the same kindly sentiments towards Turkey and the Turkish people, and also by concern to maintain and strengthen peace in the Middle East."

A Soviet naval squadron under the command of Vice-Admiral V. F. Kotov, consisting of the cruiser *Zhdanov* and the destroyer *Svobodny*, arrived on Sept. 21 at the Syrian port of Latakia for a week's visit. Admiral Kotov and his senior officers were entertained in Damascus by President Kuwatly, M. Sabry Assali (the Prime Minister), General Bizri (the C.-in-C.) and other Syrian leaders at a number of official functions. A 19-man Soviet economic and technical mission arrived in Damascus on Sept. 18 for discussions on questions arising out of the Syro-Soviet economic co-operation agreement.



(*The Listener*)

M. Menderes' Reply to Marshal Bulganin. - Refutation of Soviet Allegations. - Criticism of Soviet Policy in the Middle East.

In his reply to Marshal Bulganin (published on Oct. 5) M. Menderes denied the Soviet allegations *in toto*, emphasizing that Turkey had no aggressive designs against Syria or any other nation. He pointed out that Syria herself had made no complaints about the alleged "troop concentrations," a fact which showed that the U.S.S.R. had "adopted Syria and the Syrian question."

After referring to the friendly relations between the U.S.S.R. and Turkey before the Second World War, and pointing out that Turkey had pursued a policy of "friendly and benevolent neutrality" towards the U.S.S.R. in that conflict, M. Menderes recalled that the Soviet Union had begun to adopt a hostile attitude towards Turkey in the immediate post-war years—as evidenced by the repudiation of the Turkish-Soviet treaty of 1925, and the Soviet demands for a base on the Straits and for the cession of the provinces of Kars and Ardahan. It was therefore natural that "Turkey's confidence in her northern neighbour had been thoroughly shaken by these regrettable demands."

Stressing that Turkey desired the resumption of "genuine friendship" with Russia, M. Menderes continued: "The new [i.e. post-Stalinist] Soviet leaders began to criticize the policy of pressure and threats of the former leaders, and this resulted in certain hopes being raised in Turkey and elsewhere. However, positive results in matters concerning the independence of nations are not possible by words alone but by *de facto* and *de jure* actions. It is a mistake to think that confidence and trust can be restored otherwise . . ."

Turning to "general and related events in the light of the position of Turkey and of the Middle East, in which she is situated," M. Menderes went on: "We are obliged frankly to point out that a new and dangerous situation is developing. You will understand that I am referring to Syria, which was the subject of your message. At a time when the sense of insecurity caused to the Turkish national conscience as a result of the demand for Turkish bases and territory was to a certain extent alleviated by the Russian leaders' criticism of this very policy, which indicated a recantation, the emergence of the Syrian question, and the fact that this matter inspired your message —which unfortunately contains expressions of pressure in various parts—has had the effect of re-creating exactly the same atmosphere of insecurity caused by the 1945 attempt on our national existence . . . We regret that the efforts of the new Soviet leaders to correct a past mistake have thus been wasted."

As regards the situation in Syria, M. Menderes said that subversive activities in that country had "reached the maximum limit"; that Syria was "hastily arming beyond the limit of any reasonable defence needs"; and that she was becoming "an arms depot which will probably be used by others in case of need." He continued: "It is noteworthy that although we have not received any complaint from our neighbour Syria, your message . . . proves that, as the matter stands today, Soviet Russia has adopted Syria and the Syrian question. Analysis of the facts will suffice to bring out in bold relief the contrast between the policy pursued by your country in the Middle East and your expressions of desire to establish real friendship between Turkey and the U.S.S.R. If it is desired to establish relations of genuine friendship with Turkey based upon mutual confidence, abandonment of the policy pursued in the Middle East, particularly in Syria, will certainly have a positive effect.

"We wish to emphasize that we do not in the least entertain aggressive designs on any of our neighbours, and that there will never be such designs. On the contrary, we desire the inviolability of the independence and territorial integrity of Syria, as well as its happiness and prosperity. As such, we follow with anxiety the events taking place in Syria, an important member of the Arab commonwealth.

"Moved by this sense of uneasiness, and following a joint request together with our friends, the U.S.A. sent Mr. Loy Henderson to Turkey to examine the situation. The talks with Mr. Henderson were not intended for any aggressive purpose but were designed for countries which felt anxiety from the standpoint of their own security as a result of the developments described above. It is the anxiety of losing their independence and freedom in the face of a probable threat which encouraged the peace-loving States of the Middle East to effect a defensive arrangement among themselves, and to enlist the aid of the U.S.A. and the U.K. to strengthen it. In the circumstances it is not in the least in accord with the facts to look for an aggressive aim in the Baghdad Pact and to brand the Western Powers which joined it with 'colonialism.' . . . The Baghdad Pact, like other defensive pacts, is the product of the anxiety felt by nations which desire to be free . . .

"As to your reference to the need to pay attention to safeguarding peace, Turkey will not lag in this respect and has little to learn from others . . ."

In a press statement on Sept. 25 to the Anatolia Agency, M. Menderes had said that the present "highly dangerous situation" in Syria resulted from "the subversive activities of the Soviet Union during the past two years," in disregard of U.N. resolutions. The large supplies of arms shipments to Syria, far beyond the quantities which that country could require for reasonable defensive needs, implied its conversion into "a bridgehead for subversive purposes and with aggressive aims." In view of her long frontier with Syria, Turkey could not but observe the situation with concern from the standpoint of her own security.

In a statement on Sept. 14, the Turkish Defence Ministry had referred to "baseless rumours in certain foreign newspapers, and in agency reports, in connexion with military manoeuvres in certain regions of Turkey." It was pointed out that the Turkish armed forces, as previously announced, would be participating in NATO exercises during September, and that the customary annual manoeuvres would be taking place in the same month. "To fasten on these events for insidious and incitatory purposes," the statement added, "shows the intentions of those who . . . wish to sow seeds of intrigue by propaganda."

M. Khrushchev's Attack on U.S. Middle East Policy. - Allegations of American "Pressure" on Turkey. - Threat to Turkey in Event of War.

In an interview in Moscow on Oct. 9 to Mr. James Reston, of the *New York Times*, M. Khrushchev accused Mr. Dulles of "inciting" Turkey to attack Syria; challenged the U.S. Senate to investigate his charges; and declared that Turkey would "not last one day" in the event of war.

M. Khrushchev alleged that after Mr. Dulles and Mr. Loy Henderson had unsuccessfully tried to incite Iraq and Jordan to attack Syria, Mr. Henderson had "turned the pressure on Turkey" during his visit to the Middle East. Asked by Mr. Reston on what he based these charges, and whether the Soviet Union was in possession of documents to prove these allegations, M. Khrushchev replied: "I advise you to ask Mr. Dulles. As a man who often appeals to God, let him swear that he did not give such instructions to Henderson."

After accusing the U.S.A. of "pushing Turkey into war with Syria," M. Khrushchev declared: "In moving their troops [to the Syrian border] the Turks are laying bare parts of their frontier with us. They should not do that. They are very weak. Turkey would not last one day in case of war . . . If war breaks out, we are near Turkey and you [the Americans] are not. When the guns begin to fire the rockets can begin flying, and then it will be too late to think about it."

M. Khrushchev went on to condemn the "Eisenhower Doctrine" and to deny that there was any "Soviet provocation" in Syria or any Communist threat in the Middle East. He admitted that the U.S.S.R. had sold arms to Syria, but stressed that there was "not one of our soldiers" in that country. The Arabs in general, he commented, were far from Communist ideas, and were not Communists but nationalists. The Soviet Union knew that Egyptian Communists were imprisoned by President Nasser, but the U.S.S.R. nevertheless co-operated with Egypt against "all kinds of colonialism, including American," in the spirit of "practical co-existence."

During the interview M. Khrushchev made frequent reference to documents which, he said, would prove his charges against the U.S. Government. He declined to go into any details but said that they would be published in due course.

U.S. Rejection of M. Khrushchev's Allegations. - Mr. Dulles's Warning to Soviet Union against Aggression on Turkey.

M. Khrushchev's allegation that the United States was "inciting" Turkey to attack Syria was described by the U.S. State Department as "an absurdity when viewed in the light of the U.S. record last winter during the Suez crisis." In a statement issued on Oct. 10, the State Department also emphasized that the charges against Mr. Dulles and Mr. Henderson were "completely unfounded"; that Mr. Henderson had taken no such action as that imputed to him by M. Khrushchev; and that his (Mr. Henderson's) instructions were to consult U.S. and foreign officials in the Middle East and bring back a first-hand impression of the situation.

Commenting on the fact that "M. Khrushchev, who often glibly talks of peace, now openly threatens Turkey," the statement said: "Despite distances, he should be under no illusion that the United States, Turkey's friend and ally, takes lightly its obligations under the North Atlantic Treaty or is not determined to carry out the national policy expressed in the joint congressional resolution on the Middle East" [i.e. the Eisenhower Doctrine.]

Answering questions at a press conference on Oct. 16, Mr. Dulles said that if the Soviet Union were to attack Turkey, the United States would not restrict itself to a "purely defensive operation" and Russia would not be left as "a privileged sanctuary" from which to mount aggression.

Pointing out that Turkey was a favourite topic for Russian "alarums and threats," Mr. Dulles said that the present "Soviet furore over Turkey" was reminiscent of a number that had arisen in the past - e.g. when Turkey accepted aid under the Marshall Plan in 1947, and when she joined NATO in 1951. There was, however, a possibility that the Russian charges against Turkey might be "a smokescreen behind which something more serious might be taking place," and the United States must be on guard against the possibility that the "something more serious" might be some form of aggression against Turkey."

Mr. Dulles described the present situation in the Middle East as not unlike that of the period just before the Korean War. He believed, however, that an outbreak of war in the Middle East was unlikely, as the eyes of the world were focussed on that area.

The U.S. guided missile cruiser *Canberra*, together with some smaller vessels of the U.S. Sixth Fleet, arrived at Izmir (Smyrna) on Oct. 18 on a courtesy visit, which was regarded as a demonstration of U.S. solidarity with Turkey in face of the Russian threats to that country.

Note Exchanges between Syria and Turkey. - Syrian "Emergency Measures."

Although the Soviet allegations of Turkish "troop concentrations" on the Syrian border were first made by Marshal Bulganin on Sept. 10 in his letter to M. Menderes, no complaint was made by Syria until Oct. 9—i.e. until a month later. In a Note to Turkey on the latter date, the Syrian Government alleged that Turkish troops were concentrating on the Syrian frontier, that Turkish planes had flown over Syrian territory, and that Turkish frontier guards had fired on and wounded Syrian civilians. The Syrian Government demanded that these alleged activities "should cease."

The Turkish reply (Oct. 17) denied that there had been any troop concentrations on the frontier, any flights over Syrian territory, or any firing by Turkish forces on Syrian civilians. It reiterated Turkey's desire for the preservation of Syria's independence and territorial integrity ; denied any aggressive intentions against Syria ; and pointed out that there was a long-established procedure for the settlement of border incidents. The present tension in Turkish-Syrian relations (the Note continued) was due entirely to the massive armaments supplied by the U.S.S.R. to Syria, which were out of all proportion to the defence needs of the Syrian Army, and which were designed to convert Syria into an " arms dump " to be used eventually against Turkey. Finally, the Turkish Government pointed out that movements of Turkish troops inside Turkish territory did not exceed the normal seasonal movements during manoeuvres.

An incident occurred on the Syrian-Turkish frontier on Oct. 8, near the Syrian town of Jerablus, in which gunfire was exchanged for 45 minutes between border guards. It was stated in Ankara that a Turkish railway worker had been shot in the leg by Syrian gendarmes after Turkish workmen had entered a " free zone " area at the point where the Istanbul-Baghdad railway crossed the border, the Syrian police, for the first time, had insisted on searching the workers, and in the ensuing altercation a workman had been shot and wounded. The Syrian version of the incident attributed responsibility to the Turkish border guards and alleged that Syrian civilians had been fired on and wounded.

An excitable atmosphere of " war hysteria " prevailed in Syria during the second fortnight of October, during which all leave for the Syrian Army was cancelled, a state of emergency declared, and arms distributed to the People's Resistance Movement (the Syrian home guard organization) and youth organizations in Aleppo, Homs, and Hama. By Oct. 20, however, the situation had quietened and no further " emergency " measures were announced.

The following information on the arms build-up in Syria was given by the Diplomatic Correspondent of *The Times* on Oct. 3 :

" An estimate of the military aid received by Syria from Communist sources up to the present time can now be made from reports which have been reaching London from various sources. The aid has been given apparently in two main blocks. Syria first made an approach to the Communists at the end of 1955, and early in 1956 an agreement was reached with Czechoslovakia for the supply of MIG-15 aircraft, T-34 tanks, self-propelled guns, field and anti-aircraft artillery, light weapons, and other military stores. Most of this material had arrived by October, 1956, after regular shipments throughout the summer.

" At the end of October President Kuwatly visited Moscow and accepted an offer of further large supplies on favourable terms. The deliveries under this second agreement began in December and are still continuing, and arms up to a total value of £50,000,000 are believed to have reached Syria up to the present time from the Soviet bloc. These arms include : 60 jet fighters, at least 6 motor torpedo-boats, 200 T-34 tanks, 100 self-propelled guns, over 200 armoured personnel carriers, over 150 field guns, and 200 anti-aircraft guns.

" Large numbers of mortars, bazookas, sub-machine guns, machine guns, rifles, military vehicles of all kinds, a wide range of military stores, and quantities of ammunition have also been supplied. Some reports say that at least 250 Soviet-bloc advisers and instructors have arrived in Syria, mostly this year. Some Syrian officers have been sent to Communist countries for training. It is also believed that a third agreement was made in August, to a value of £35,000,000, under which would be supplied a further 50 aircraft of various types, two submarines, more tanks, artillery, and unspecified naval vessels."

Landing of Egyptian Troops in Syria.

It was jointly announced in Cairo and Damascus on Oct. 13 that Egyptian forces had landed at Latakia on that date " to support and strengthen Syria's defence potential." The communiqué said that Egyptian troops had arrived in Syria " under the joint defence agreement between the two countries, and in implementation of the joint plans to strengthen Syrian defences formulated in Cairo on Sept. 11 by the Commanders-in-Chief of the Egyptian and Syrian armed forces " [see page 15745, second column]. It was added that the Egyptian troops had been escorted to Latakia by Egyptian naval forces and the air forces of the two countries.

No information was given as to the size of the Egyptian forces sent to Syria, but in Western official circles it was believed that they were small in numbers and of a " token " character.

King Saud's Offer of Mediation in Turkish-Syrian Crisis. - Acceptance by Turkey and Rejection by Syria.

During September and October an active part was taken by King Saud of Saudi Arabia in attempting to bring about a relaxation of tension in the Middle East, firstly in the relations between Syria and Jordan and subsequently in the relations between Syria and Turkey. The King's efforts culminated in an offer to mediate in the Syrian-Turkish dispute, the offer being accepted by Turkey but rejected by Syria.

Prior to these developments, the Saudi Arabian Ambassador in Damascus had been withdrawn to Beirut as a protest against an attack on King Saud by the Syrian Defence Minister (M. Khaled Azem), who had declared on June 15 that the King was " actively co-operating with American foreign policy " and " assisting the cause of American imperialism." [These remarks were incorrectly attributed in 15612 A to the Syrian Foreign Minister, M. Salah Bitar, whereas they were in fact made by the Defence Minister.] Despite repeated requests for an apology or retraction, no *amende* was offered by the Syrian Government, and the Saudi Ambassador was therefore instructed to withdraw to Beirut until a satisfactory explanation had been given by Syria. On July 1, however, it was announced in Damascus that M. Khaled Azem was leaving for Italy " for health reasons," a statement which was interpreted as an expression of regret for his attack on King Saud. The Saudi Ambassador subsequently returned to Damascus and normal relations were restored between the two countries. M. Azem continued to hold the post of Defence Minister, and headed the delegation which visited Moscow in July and August for discussions on economic and technical co-operation between the U.S.S.R. and Syria (see 15705 A).

King Saud arrived in Damascus on Sept. 25 for a three-day visit, during which he had discussions with President Kuwatly, M. Assali, and other Syrian leaders. The Prime Minister of Iraq, Mr. Ali Jawdat, also arrived in Damascus on Sept. 26 from Beirut (where he had seen President Chamoun and other Lebanese leaders) and took part in the Saudi-Syrian talks. King Saud's visit was the first paid by him to Damascus since his accession in 1953, while Mr. Jawdat's visit was the first paid by an Iraqi Premier to Syria for eight years. A joint communiqué was issued by King Saud and the Syrian leaders on Sept. 27 reiterating the solidarity of the Arab countries, stating that Saudi Arabia would assist Syria and all other Arab countries against aggression from whatever source, and declaring that Syria posed no threat to any other Arab State.

Although no official statement to that effect was issued, it was understood that King Saud's visit to Damascus was primarily intended to improve relations between Syria and Jordan and to heal the breach between the two countries. King Saud and King Hussein exchanged messages both during and after King Saud's visit to Damascus, and it was commented abroad that there had been a considerable reduction in the Syrian press and radio campaign against Jordan following the King's return to Riyadh. On Oct. 16 King Hussein summoned the British, U.S. and Turkish Ambassadors in Amman to the Royal palace and informed them that Jordan would consider an attack on Syria as an attack on all Arab countries. A similar declaration was made by King Hussein to the Egyptian, Iraqi, Lebanese, and Saudi Arabian heads of mission, together with a pledge of Jordan's support for and co-operation with all Arab nations.

King Saud paid a ten-day visit to Beirut from Oct. 11-20 during which he had a number of conversations with President Chamoun ; at the same time he maintained frequent contact by telephone or courier with Damascus, and also with President Bayar of Turkey. Although no official statement was issued, it was understood that King Saud and President Chamoun were considering ways to bring about a relaxation of the tension between Syria and Turkey, and it subsequently became known that President Bayar had sent messages to the King and the Lebanese President assuring them that Turkey harboured no aggressive designs whatever against Syria. Similar assurances were given to the Syrian Government in the Turkish Note of Oct. 17 (see above), and by the Iraqi and U.S. diplomatic representatives in Damascus.

A joint communiqué issued on Oct. 20 by King Saud and President Chamoun made no direct reference to the Syrian-Turkish dispute, but stated that Saudi Arabia and the Lebanon would support Syria or any other Arab State in the event of any aggression. It added that respect for the independence, sovereignty, and territorial integrity of the Arab States, and non-intervention in their internal affairs, were among the fundamental requirements of Middle Eastern security.

In a broadcast on Oct. 21 from Mecca Radio, and in a statement issued on that date by the Saudi Arabian Embassy in Washington, it was announced that King Saud had offered to mediate in the Syrian-Turkish dispute ; that the offer had been conveyed to President Bayar and President Kuwatly by King Saud during his visit to Beirut ; that both Turkey and Syria had accepted the King's good offices ; and that Turkish and Syrian delegations would meet King Saud at Damman (Saudi Arabia) within two days. On the same day (Oct. 21) it was officially announced in Ankara, and confirmed by the Turkish delegation at the United Nations, that Turkey had accepted the King's mediation offer.

Syrian reactions to the King's mediation offer were extremely ambiguous, and at first took the form of a denial by the Syrian Foreign Ministry that any such offer had been made. Shortly

afterwards, however (i.e. on Oct. 21), it was authoritatively stated in Damascus that Syria had accepted an offer of mediation by King Saud and would send a delegation to Saudi Arabia. The Syrian Embassy in Washington then announced that Syria had accepted King Saud's good offices in the dispute with Turkey, but retracted this statement a few hours later. The Syrian Foreign Ministry said that the Embassy in Washington had been "misinformed," that Syria would not accept King Saud's mediation, and that she intended to proceed with her original intention of bringing the matter before the United Nations (see below).

The Saudi Arabian Government issued a statement on Oct. 22 expressing "great astonishment" at Syria's denial that she had accepted King Saud's mediation offer. A communiqué issued in Jedda quoted President Kuwatly as saying to King Saud: "We received with satisfaction your efforts to make Turkey avoid what could lead to a catrastophe, the extent of which only Allah knows." It added that the Saudi Ambassador in Damascus had been informed orally that the Syrian Cabinet had met to discuss who should lead the Syrian delegation in the mediation talks which were to have taken place in Damman.

Nothing was known of the reasons behind Syria's first apparent acceptance, and then rejection, of King Saud's mediation offer. It was suggested in the London *Daily Telegraph* that President Kuwatly had decided to accept mediation but had been overruled by the Syrian military junta, "acting on its own or on instructions from Moscow."

Syrian Complaint to U.N. General Assembly. - Soviet Charges against Turkey and United States.

On Oct. 16 the Syrian Foreign Minister (M. Bitar) had sent a letter to the President of the U.N. General Assembly (Sir Leslie Munro) asking the Assembly to place on its agenda, as a matter of urgency, the item: "Complaints about threats to the security of Syria and to international peace." At the same time the Soviet Foreign Minister, M. Gromyko, sent a letter to Sir Leslie Munro referring to the existence of a "military threat" to Syria, bitterly attacking Turkey and the United States, and urging all U.N. member-nations to render Syria "the armed assistance necessary to put a stop to aggression" in the event of a Turkish attack.

The Syrian Letter. After asserting that the security and independence of Syria were being endangered to a degree which required "measures by the United Nations in fulfilment of its Charter," M. Bitar's letter went on: "At present there exists an actual military threat to Syria, resulting from the heavy, unprecedented, and unwarranted concentration of Turkish troops, up to several divisions, in close proximity to the Syrian-Turkish border. These troops are constantly being reinforced. They are now massed mainly in a small sector and have taken up dispositions which presage imminent attack. The Turkish troops have apparently been given the slogan: 'To Aleppo!' . . ."

Reiterating the allegations that Turkish troops and aircraft had violated the Syrian frontier on a number of occasions, and that border clashes were becoming more frequent, M. Bitar continued: "The military pressures on Syria and threats to her security are connected with other actions, such as interference in the affairs of Syria to sway her policy or overthrow her Government . . . These actions have been accompanied by other foreign pressures on the Syrian people and Government, designed to create conditions which would bring about internal unrest and international strife. Besides pressures of a political nature, a propaganda campaign has been mounted, aimed at creating animosity towards Syria in order to pave the way for adventurous action against her."

In conclusion, M. Bitar proposed that the General Assembly should set up a commission to investigate the situation on the Syrian-Turkish border and report back.

The Soviet Letter. In his letter to Sir Leslie Munro, M. Gromyko asserted that the situation on the Syrian-Turkish border was "fraught with the possibility of armed conflict" which might break out at any moment. He went on to say that there was "reliable information" that the Turkish General Staff, together with American advisers, had "elaborated detailed plans for an attack on Syria to be carried out immediately after the general elections in Turkey on Oct. 27," and that the United States was "openly declaring its intention to intervene directly with armed forces" on the side of Turkey in hostilities against Syria.

After saying that the Soviet Government could not regard impassively the military "provocations" that were being planned in the proximity of her southern borders, M. Gromyko went on: "Account should be taken of the fact that the United States, while prodding Turkey to commit aggression against Syria, is urging that this operation should be carried out with lightning speed, and that the U.N. should be confronted with a *fait accompli* in order that it may have no time to take steps to prevent aggression. Apparently the intention of the U.S.A. is to employ in Syria the method resorted to by it to suppress the independence of Guatemala . . . The Soviet Government supports Syria's proposal that the General Assembly should consider without delay the threat of armed attack on Syria endangering general peace. The Soviet Government also supports the proposal that a special U.N. commission be set up forthwith to investigate the situation on the Syrian-Turkish frontier. The commission should be requested to submit its conclusions to the Security Council and the General Assembly within two weeks."

M. Gromyko added that in the event of an attack on Syria the Soviet Union was prepared to take part with its forces in "suppressing aggression and punishing the violators of peace."

The 17-nation Steering Committee of the General Assembly, meeting on Oct. 18, decided by unanimous vote to put the Syrian request on the Assembly's agenda.

M. Seyfullah Esin (Turkey) described the Syrian-Soviet allegations as "fantastic" and said that Turkey would welcome a debate on the "fictitious situation" that had been wilfully created. **Mr. Cabot Lodge** (U.S.A.) similarly welcomed a debate and a U.N. investigation, since it would show up the "absurdity" of the charges against the U.S.A. and Turkey and would demonstrate clearly "the true source of the tension in the area." **Commander Noble** (U.K.), who said that the Committee was meeting in "a spurious air of crisis," expressed doubts about the *bona fides* of the Syrian request and pointed out that it had been heralded by a large-scale Soviet propaganda offensive.

The full Assembly, meeting immediately afterwards, agreed without debate to place the Syrian item on its agenda. The vote was 60 to nil, with Liberia abstaining.

Turkish Statement to U.N. General Assembly.

In a speech in the General Assembly on Sept. 27, the Turkish representative at the U.N. (M. Seyfullah Esin) had previously expressed his Government's "concern and anxiety over the recent increase of efforts made by the Soviet Union towards the Middle East in general and Syria in particular."

"We in Turkey," said M. Esin, "have affection and respect for the people of Syria, with whom, as with all Arab nations, we are linked by cultural, religious and historic ties. We value the independence, sovereignty and territorial integrity of Syria and consider a strong, prosperous and independent Syria on our border as an additional guarantee of our own security. That is the reason why the recent events in that country are being followed by my Government with attention and concern from the viewpoint of our own security. The fact that these events have been accompanied by a campaign of propaganda and false rumours, aimed at discrediting my country and impairing our relations with our southern neighbour, have made caution and vigilance on our part even more necessary. Allegations of this nature have been made by a powerful country with which we have long common frontiers to the north. If a reserve of arms and ammunition were to be constituted by that country on our southern flank, my Government would naturally be bound to appraise the significance of such an event from the viewpoint of our own security, and to take such internal measures within our own frontiers as are customary in all independent countries desiring to live in peace and security . . ."

M. Seyfullah sent a letter to Dr. Hammarskjöld on Oct. 15 describing the Syrian allegations against Turkey as "entirely false"; pointing out that Syria had been "following of late a policy entirely parallel to that of the Soviet Union"; and stressing that Turkey had "valid reasons for feeling concerned about recent developments in Syria." (Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - U.N. Information Centre, London - Turkish Embassy Press Office, London - Soviet Embassy Press Department, London) **(Prev. rep. Syria, 15745 A; 15721 A.)**

A. WESTERN GERMANY. — Saar Mines returned to German Ownership.

The Saar coal mines were returned to German ownership on Oct. 1, when a new company, the *Saarbergwerke A.G.*, took over from the Franco-Saar company which had hitherto administered them as trustee. The new company has a capital of 35,000,000,000 French francs (350,000,000 DM), of which the Federal Government holds 74 per cent and the Saar Government 26 per cent. The Administrative Council of the new company met for the first time on Oct. 1 under the chairmanship of Professor Adolf Blind, Finance Minister in the former Saar Government.

Total coal production of the Saar mines is about 17,000,000 tons a year, representing about 13 per cent of coal production in the Federal Republic.—(Frankfurter Allgemeine Zeitung) **(Prev. rep. 15303 A.)**

B. EGYPT - SOVIET UNION. — Cultural Agreement.

An agreement on Soviet-Egyptian cultural co-operation was signed in Cairo on Oct. 19. It provided for exchanges of students, lecturers, delegations, artists, writers, etc.; closer contacts between libraries and educational establishments; exchanges of films and encouragement for the translation of literary works; special broadcasts to provide information about either country in the other; and increased contacts in the field of sport.—(Soviet Embassy Press Dept., London)

A. BRITISH COMMONWEALTH. — Anglo-Australian and Anglo-New Zealand Defence Talks. - Mr. Sandys' Visits to Canberra and Wellington.

The U.K. Minister of Defence, Mr. Duncan Sandys, accompanied by Marshal of the R.A.F. Sir William Dickson (chairman of the U.K. Chiefs of Staff Committee), visited Australia and New Zealand during August and September for discussions on joint defence policy in South-East Asia and the South-West Pacific. During their visit to Australia (Aug. 19-Sept. 1) Mr. Sandys and Sir William Dickson had conversations with Mr. Menzies (the Prime Minister), Sir Philip McBride (Defence Minister), and other Federal Ministers and Service chiefs, in addition to visiting the Woomera rocket range and the atomic testing site at Maralinga.

A communiqué on the Anglo-Australian defence talks was issued in Canberra on Aug. 28, as follows :

" (1) The talks centred principally upon the defence problems of South-East Asia. It was agreed that SEATO is the prime instrument for the defence of this area and that every effort must be made to ensure its effectiveness both as a means of deterring aggression and as a stabilizing factor for the countries concerned.

" (2) The size and composition of the forces which the two Governments are planning to contribute now and in the future to the defences of this area were discussed. Mr. Sandys assured the Australian Government that Britain intends to maintain substantial land, sea, and air forces in South-East Asia and the Far East, and that the British Far East Fleet will continue to be based on Singapore. Although the number of British troops in that area will be somewhat reduced, this will largely be offset by increased mobility and striking power.

" (3) The Australian Government confirmed that in addition to the Australian forces already serving in the Commonwealth strategic reserve, their plans provide for the increased mobility of the Army and Air Force, including the creation of a mobile brigade group based in Australia, which would be readily available if needed

" (4) The progress of the ANZAM [i.e. Australian-N.Z.-American] defence organization was reviewed in the light of recent meetings between the British, Australian, and N.Z. Chiefs of Staff. It was agreed that the existence of this organization greatly facilitates the study of common defence problems in this area and will help to ensure that the contributions of the three countries to the SEATO alliance are made as effective as possible.

" (5) Mr. Sandys took the opportunity to explain the principles underlying Britain's new defence policy. He emphasized that its prime objective is not so much to prepare for war as to prevent it. The use of military resources is being replanned with a view to concentrating them where they will produce the maximum effort.

" (6) The Australian Government fully supports Britain's decision to go ahead with the development and production of nuclear weapons, thereby making a British contribution to the nuclear deterrent upon which, pending disarmament, the peace of the world so largely depends. At the same time the Australian Government was pleased to note that Britain would continue to maintain in Europe, the Middle East, and the Far East substantial conventional forces, which are essential to meet a limited and cold war situation.

" (7) Mr. Sandys expressed appreciation of the invaluable co-operation of the Australian Government and Services in the development of atomic weapons and guided rockets, and of the fine progress which he had seen during his visits to Woomera and Maralinga

" (8) It was agreed on both sides that the meetings have proved of great value. Exchange of information about future plans has been extremely useful, and the talks will undoubtedly help to make co-operation between Britain and Australia in the field of defence still closer and more effective."

At a press conference in Canberra on Sept. 20, Mr. Sandys stated that Britain would continue to develop and stockpile nuclear weapons for her own and Commonwealth defence ; would continue to use the Maralinga proving ground to test a variety of atomic weapons ; and proposed to extend the Woomera rocket range, in collaboration with the Australian authorities, to develop a ballistic missile with a range of 2,000 miles. He added that Britain continued to regard SEATO as " a vital factor in the defence of the free world " ; that she would continue to maintain substantial land, sea, and air forces in the SEATO area, including in due course " elements of nuclear power which will greatly enhance the effectiveness of these forces " ; and that R.A.F. *Canberra* bombers, equipped to carry atomic weapons, would be sent to Malaya.

Mr. Sandys' statement gave rise to some concern in Kuala Lumpur, where it was interpreted as implying that Malaya might become an " atomic base." The Chief Minister (Tengku Abdul Rahman) stressed that the Malayan Government would in no circumstances allow atomic weapons to be stored on its territory, whilst the Malayan Defence Minister pointed out that the Anglo-Malayan defence treaty (see 15793 A) made no provision for atomic bases anywhere in the Federation. To correct these impressions, Mr. Sandys emphasized on Sept. 23 that no decision had yet been made on what atomic weapons would be made available to British forces in the Far East, nor where such weapons would be kept.

Discussions were held in Wellington from Sept. 1-5 between Mr. Sandys and New Zealand Ministers and Service chiefs, the following communiqué being issued on the latter date :

" (1) Mr. Sandys explained the British Government's new defence policy and stressed that its central theme was collective defence through regional alliances (NATO, the Baghdad Pact, and SEATO).

" (2) The N.Z. Government welcomed the fact that, in addition to the provision of considerable conventional forces to support these alliances, Britain has decided to be a nuclear Power and to make a contribution of her own to the nuclear deterrent

" (3) Mr. Sandys expressed the appreciation of the British Government for the help given by the N.Z. Government in connexion with the recent thermo-nuclear tests at Christmas Island.

" (4) Mr. Sandys made it clear that Britain regarded South-East Asia as a vital theatre in the defensive system of the free world and would continue to maintain large land, sea, and air forces in that area. In addition plans had been made to send further considerable reinforcements by air should the need arise.

" (5) Mr. Sandys welcomed the decision of the N.Z. Government to send as soon as possible a full battalion to Malaya as their contribution to the Commonwealth force, and their proposal for despatching overseas at short notice a New Zealand brigade group in the event of an emergency. Mr. Sandys was also glad to note the intention of the N.Z. Government to replace their force of *Vampire* and *Venom* fighters with *Canberra* bombers.

" (6) It was agreed that close co-ordination of the defence effort of the Commonwealth countries in this area is of the highest importance, and it was decided to study, through the ANZAM defence organization, methods of making co-operation still more effective "

Before returning to Britain, Mr. Sandys visited Singapore (Sept. 11-14) and Hong Kong (Sept. 15) for discussions with local Service chiefs and the Governors of the two Colonies, respectively Sir Robert Brown and Sir Alexander Grantham. During these visits Mr. Sandys emphasized that Britain would continue to maintain " substantial forces " in Hong Kong and intended to keep the fortress base at Singapore as strong as possible. He reiterated that H.M Government had no intention of stockpiling atomic weapons in Malaya or anywhere else in South-East Asia.

Prior to Mr. Sandys' visits to Australia and New Zealand, joint discussions on defence questions had been held in Wellington from July 29-31 between Mr. Beale, the Australian Minister of Supply and Defence Production, and Mr. Macdonald, N.Z. Minister of Defence and External Affairs. Service chiefs of both countries took part in the talks. (Sydney Morning Herald - Australian News and Information Bureau - N.Z. Directorate of Information, Wellington - Times - Daily Telegraph) **(Prev. rep. Australian Defence Policy, 15504 A ; N.Z. Defence Policy, 15612 B ; SEATO, 15452 A.)**

B. CYPRUS. — New Governor.

The Colonial Office in London announced on Oct. 22 that Sir Hugh Foot, Captain-General and Governor of Jamaica, would succeed Field-Marshal Sir John Harding as Governor and Commander-in-Chief of Cyprus, and would take up his new duties about the beginning of December.

Sir Hugh Foot (50) entered the Colonial Service in 1929 and served in Palestine and Transjordan before becoming Colonial Secretary in Cyprus, a post he held from November 1943 to April 1945. He was subsequently Colonial Secretary in Jamaica and Chief Secretary in Nigeria before his appointment as Captain-General and Governor of Jamaica in November 1950. He is the second of five sons of Mr. Isaac Foot, the former Liberal statesman and one-time Lord Mayor of Plymouth. He is a brother of Mr. Michael Foot, the former Labour M.P. for Devonport ; Mr. Dingle Foot, a former Liberal M.P. and now Labour Member for Ipswich (see 15821 E); and Mr. John Foot, who contested Bodmin as a Liberal in 1950.

Field-Marshal Sir John Harding (60) became Governor of Cyprus in November 1955, shortly after relinquishing the post of Chief of the Imperial General Staff. The Colonial Office stated that he would relinquish the Governorship " on the expiry of the period for which he accepted the post." (Times - Manchester Guardian) **(Prev. rep. 14513 A.)**

C. PERU. — Relations broken with Czechoslovakia.

The Peruvian Government broke off diplomatic relations with Czechoslovakia on Oct. 4, when the Czechoslovak Chargé d'Affaires (M. Josef Rutta) was ordered to leave the country immediately and to close down the Czechoslovak Legation in Lima. It was announced that this action had been taken because M. Rutta had authorized the secretary-general of the Peruvian Communist party to appoint five Peruvian representatives to a labour congress in Leipzig (East Germany), constituting direct intervention in Peruvian internal affairs. (New York Times)

A. YUGOSLAVIA - GERMANY. — Yugoslav Recognition of East German Government. - Western Germany severs Diplomatic Relations with Yugoslavia.

It was officially announced in Belgrade and East Berlin on Oct. 15 that Yugoslavia and the German Democratic Republic (Eastern Germany) had agreed to establish diplomatic relations and to exchange representatives at Ministerial level. The statement said that the decision had been taken on Oct. 10 in conversations between representatives of the two Governments, following an exchange of letters between President Tito and Herr Grotewohl, the East German Prime Minister.

The Yugoslav Foreign Ministry explained that it was "the wish of the Yugoslav Government, in the spirit of seeking a working system of co-existence by the avoidance of *blocs*, to develop good relations with both German States, believing that this will contribute to German unity." It called on other countries also to recognize both German States, and declared that all the necessary conditions existed for extending co-operation in the economic, cultural, and political spheres between Yugoslavia and Western Germany as well as between Yugoslavia and Eastern Germany.

The Yugoslav decision, which had already been foreshadowed in the communiqué published after the recent visit of the Polish leaders to Belgrade, and which had been formally notified to the Federal German Government on Oct. 14, caused deep resentment and concern in Western Germany, since Yugoslavia was the first country outside the Soviet *bloc* to accord recognition to the East German Government. In 1955 the Federal Government had officially announced that any recognition of the East German régime would be considered an unfriendly act, and that it would break off diplomatic relations with all countries outside the Soviet *bloc* recognizing that régime. It was therefore feared that West German acquiescence in the Yugoslav step might cause a number of other countries to accord similar recognition to the East German régime.

Dr. von Brentano, the Federal Foreign Minister, discussed the matter on Oct. 16 with the British, U.S., and French diplomatic representatives in Bonn, whilst Herr Blankenhorn, the West German representative on the NATO Council, was instructed to raise the matter at the Standing Committee of the North Atlantic Council under Article 2 of the North Atlantic Treaty. On Oct. 18 Dr. von Brentano also had discussions with the West German party leaders in Bonn, in an effort to obtain the support of the Social Democrats and the Free Democrats for the breaking-off of diplomatic relations with Yugoslavia. Both parties, however, expressed disagreement with the Government's intention on the grounds that a break with Yugoslavia would isolate Western Germany and would have a detrimental effect on its East European policies, whilst merely delaying, but not preventing, other countries from recognizing the East German régime.

After further Cabinet discussions, the Federal Government finally decided on Oct. 19 to break off diplomatic relations with Yugoslavia. The German Note to that effect, which was handed to the Yugoslav Ambassador in Bonn (M. Kfeder) on the same date, declared that Yugoslavia's action was an affront to the whole German people as well as to its legitimate Government ; that Yugoslav recognition of the East German régime entailed support for the Soviet policy of interference in German internal affairs, which was alone responsible for the maintenance of the East German régime and which made German reunification on a democratic basis impossible ; and that the Yugoslav Ambassador had been clearly informed beforehand of the consequences of such recognition.

It was officially stated on Oct. 20, however, that the breaking-off of diplomatic relations would not affect the fulfilment of existing agreements between Western Germany and Yugoslavia, and that reparations would continue to be paid to the latter country in the form of the long-term credits agreed upon in 1956.

Dr. von Brentano stated a a press conference on Oct. 20 that he had assured the Yugoslav Ambassador that the Federal Government's decision was not an expression of hostility. Yugoslav recognition of Eastern Germany, however, had raised the question whether or not the Federal Republic should persist with its reunification policy as hitherto. If it had merely protested against the Yugoslav action it would, in effect, have recognized the existence of two German States. This would have made reunification by free elections impossible. The Federal Government had therefore no choice but to sever relations—a decision which, though deeply regrettable, was inevitable because of Yugoslavia's unilateral action.

The Federal Government's decision was strongly resented in Belgrade and was described by the Yugoslav Government as a "unilateral, arbitrary and hostile act."

M. Kfeder, who left Bonn for Belgrade on Oct. 20, said at a press conference that his Government condemned and protested against an act which would have a direct and detrimental impact on the world situation. He was unable to understand the Federal Government's decision, as Yugoslavia had been among the first countries to recognize the Federal Republic, and the first to release German prisoners-of-war, although she had lost 1,700,000 men in the Second World War. He denied that recognition of the East German Government had been an unfriendly gesture to the German Federal Government, maintaining that it was "merely the sovereign decision of one sovereign State concerning another sovereign State."

The Yugoslav Foreign Ministry described the Federal Government's decision as "a return to the cold war," and accused Western Germany of "relying on a policy of force and pressure with a view to imposing a solution which suits its political conceptions." The official *Borba* described the severance of diplomatic relations as "the second German act of aggression against Yugoslavia."

The U.S. State Department spokesman (Mr. Lincoln White) on Oct. 15 expressed "regret that Yugoslavia has taken this move," and added : "We do not think it will contribute to a settlement of the German problem. Our attitude on the question has been made known to Yugoslavia on a number of occasions." A spokesman of the French Foreign Ministry said on the same date that the French Government had officially drawn the attention of the Yugoslav Government to the "regrettable consequences" which might follow Yugoslav recognition of the East German régime, whilst the British Foreign Office stated on Oct. 18 that neither H.M. Government nor the British Embassy in Bonn had at any time attempted to dissuade the German Federal Government from breaking off relations with Yugoslavia, or suggested any alternative course of action. "On the contrary," the spokesman added, "H.M. Government have told the Federal Government that if they should decide to break off relations the Government would fully sympathize with the Federal Government's decision, which would be entirely understandable in the circumstances."

It was announced in Bonn on Oct. 20 that France would represent West German interests in Yugoslavia, whilst on Oct. 23 it was announced in Stockholm that Sweden had agreed to represent Yugoslav interests in Western Germany. (Tanjug Agency, Belgrade - Frankfurter Allgemeine Zeitung - Times - Daily Telegraph - Le Monde, Paris - New York Times)

B. AUSTRIA. — Formation of Austrian Airlines.

An Austrian civil aviation company under the name of *Oesterreichische Luftverkehrs A.G.* (Austrian Airlines) was set up on Sept. 20 with Austrian and Scandinavian participation. Its capital was fixed at 60,000,000 schillings, of which one-quarter will be payable in cash immediately. The founder-members included the Scandinavian Airlines System (9,000,000 s.) ; Fred Olsens Air Transport Ltd., Oslo, (9,000,000 s.) ; the City of Vienna (5,000,000 s.) ; the Austrian Tourist Office (1,500,000 s.) ; and 19 State-owned and private industrial, banking, and insurance concerns.

The formation of the new company followed an agreement in April last between the two parties of the Government coalition (the Austrian People's Party and the Socialist Party) which settled a dispute between two rival airline companies (Air Austria and Austrian Airways) that had been set up in January 1956. Air Austria had been set up with the participation of the Royal Dutch Airlines (K.L.M.), and Austrian Airways with the participation of the Scandinavian Airlines System.

The new company will start regular services in 1958 between Vienna and Zürich and Vienna and London, using British *Viscount* aircraft.—(Wiener Zeitung - Neue Zürcher Zeitung)

C. NORTHERN IRELAND. — Cabinet Appointment.

Mr. John L. O. Andrews, M.P., was appointed Minister of Health and Local Government in the Northern Ireland Government on March 26 in succession to Dame Dehra Parker, who had resigned through ill-health on March 14 after holding the post since 1940. Mr. Andrews was also appointed a member of the Privy Council.

Dame Dehra Parker continued to sit in the N.I. Parliament, of which she was an original member on its foundation in 1921. The first woman to hold ministerial office in Northern Ireland, she has sat at Stormont from 1921-29 and from 1933 onwards, and was Parliamentary Secretary to the Ministry of Education from 1937-44 before succeeding the late Mr. William Grant as Minister of Health and Local Government in 1949. She received the G.B.E. in the Birthday Honours of June last for political and public services in Northern Ireland.
(N.I. Agent's Office, London - Times - Belfast Telegraph)

A. GHANA. — Merger of Opposition Organizations as United Party. - Government Allegations of Subversive Activities by Opposition. - Denial by Professor Busia. - Suspension of Paramount Chief of Akim Abuakwa. - Regional Commissioners. - Cabinet Changes.

At a conference held in Kumasi on Oct. 6, six political organizations opposed to the ruling Convention People's Party (C.P.P.) agreed to unite as a single party. The organizations concerned were the three main Opposition parties—the National Liberation Movement, the Northern People's Party, and the Moslem Association - and three regional groups, the Ga People's Association (*Ga Shifimo Kpee*), the Wasaw Youth Association, and the Ashanti Youth Association.

The Ga People's Association had been formed soon after the establishment of independence to oppose the acquisition of tribal lands by the Government, its membership being restricted to the Ga tribe. It rapidly developed into the strongest Opposition organization in Accra, hitherto a C.P.P. stronghold, and was responsible for the riots in the capital on Aug. 20-21 (see 15760 A). To counter its activities the Government forbade the Association on Oct. 1 to hold rallies in Accra, and also decided to introduce legislation in November banning political organizations formed on a tribal, regional, or religious basis. [A resolution calling for such a ban had been adopted by the Assembly in 1954 see 13730 B.] Reports of the Government's decision were believed to have influenced Professor Busia, the leader of the National Liberation Movement, in convening the Kumasi conference. The proposed formation of a single Opposition party was welcomed on Oct. 7 by Mr. Baako, the Minister of Information.

The six organizations resumed their conference in Accra on Oct. 13, when it was decided to adopt the name of the United Party. A 12-point manifesto was approved which defined the party's aims as follows :

(1) " To build on the foundations of our traditions and culture a true parliamentary democracy, and to see that it is practised by whichever party is in power."

(2) " To see that the Constitution as by law established is upheld and strictly adhered to."

(3) " To preserve by deeds and words the fundamental rights and liberties of the individual, and to secure true freedom and justice in accordance with the U.N. Declaration of Human Rights."

(4) " To uphold and maintain the institution of chieftaincy and the rights of people to their lands, and to ensure that the chiefs play a democratic and effective part in the development of Ghana."

(5) " To ensure equal opportunity for all to develop their talents."

(6) " To develop the productive use of the country's resources."

(7) " To encourage investment of capital by creating confidence at home and abroad through stable and efficient administration based on government by persuasion."

(8) " To maintain an efficient and independent Civil Service free from interference and threats of victimization."

(9) " To maintain the independence of the judiciary, uphold the rule of law based on reason and natural justice, and ensure that everyone is equal before the law."

(10) " To help in the liberation of colonial territories to full independence, and in schemes for the rapid development of Africa in general and West Africa in particular."

(11) " To settle by negotiation and agreement problems created in Africa by the arbitrary imposition of imperialist frontiers."

(12) " To maintain the position of Ghana as a useful member of the British Commonwealth and of the United Nations, to build up high prestige for Ghana in the comity of nations, and to dedicate ourselves to the service of our country and humanity."

It was announced on Oct. 15 that Professor Busia would be the parliamentary leader of the United Party. The new party has 24 representatives in the Assembly, of whom 12 previously belonged to the National Liberation Movement, 11 to the Northern People's Party, and one to the Federation of Youth Organizations.

In a speech on Sept. 21, Mr. Edusei (Minister of the Interior) had alleged that members of the Opposition had offered £1,000 to certain persons to assassinate Dr. Nkrumah and members of the Cabinet. He declared that all Opposition M.P.s would be arrested and put on trial in the event of attempts on the lives of the Premier or other Ministers, and announced that the Government proposed to introduce a Bill to remove or detain persons indulging in unconstitutional and subversive activities. At a meeting on Oct. 3 Mr. Edusei gave warning that " the day an attempt is made on the life of the Prime Minister or any of the Ministers, that will be the beginning of dictatorship in this country. The Constitution will be suspended and we shall deal with them as we like."

Professor Busia denied on Oct. 13 that the Opposition were plotting the assassination of members of the Government or other subversive activities, and declared that these accusations were merely a part of the Government's plan to remain in power by intimidating the people. He added : " Discovering non-existent plots and making wild accusations against political opponents are familiar techniques employed by those who seek to establish or maintain dictatorship. The C.P.P. are obviously preparing the ground for staging an incident to lay at the door of the Opposition as a pretext for the most unprecedented acts of oppression which they have threatened."

Statements by Paramount Chiefs. - Suspension of the Okyenhene.

The two most powerful chiefs in Ghana, the Asantehene and the Okyenhene (paramount chiefs of Ashanti and Akim Abuakwa respectively) made public statements in October in reply to a letter from Dr. Nkrumah inviting them to define their attitude toward party politics.

The Asantehene—Otumfuo Sir Osei Agyeman Prempeh II, who rules over 1,000,000 Ashantis—said in a statement to the Asanteman Council (the supreme council of Ashanti chiefs) on Oct. 10 that it would be inconsistent with his role as the elected constitutional head of his people to join or support any political party ; in accordance with tradition, however, he would always follow the advice of his councillors, who were themselves elected representatives of the people, as he had done in the past.

The Okyenhene (Nana Ofori Atta II, who has 300,000 subjects in Southern Ghana) made a similar statement on Oct. 11 to the Okyeman Council, the supreme council of chiefs in Akim Abuakwa. The Council, he said, was a political body, but its political decisions were not partisan, and he therefore could not support one party against another either in Akim Abuakwa or in Ghana as a whole. " At the same time," he went on, " I cannot forget my duty as political head of the State. My duty is to seek the best interest of the people upon the advice of the Okyeman Council. I pledge myself to perform my duty without fear or favour, and irrespective of the political affiliations of any of my people." It would be his constant care, he went on, to uphold the traditions and prestige of the country, to preserve the rights of the people and the chiefs, to uphold the democratic principles enshrined in the Constitution, to watch jealously the observance of the rule of law, and " to see to it that the party in power, whichever it be, is guided by the principle that the interests of the governed are paramount."

In both Ashanti and Akim Abuakwa the majority of the chiefs had in the past supported the Opposition, and in consequence a minority group of C.P.P. supporters had boycotted the meetings of the Okyeman Council for some time. The Okyenhene in his speech appealed to this group to resume their participation in the work of the Council.

Following the Okyenhene's declaration of neutrality in political matters, the Government appointed a commission of inquiry on Oct. 16, headed by Mr. J. Jackson (a former judge of the Ghana Supreme Court), to investigate the administration of Akim Abuakwa State, and suspended the Okyenhene from the exercise of his statutory functions pending the commission's report. A conference of chiefs from all over Ghana, meeting on Oct. 17 at Dodowa, appointed a delegation to protest against the suspension of the Okyenhene ; it also passed a resolution asking for the appointment of a commission to consider the powers and functions of the proposed Houses of Chiefs in the five regions of Ghana and the various aspects of chieftainship.

Appointment of Regional Commissioners. - Ministerial Changes.

The names of the five regional commissioners appointed under the Statute Law Amendment Act, who will have ministerial rank, were announced on Oct. 16. The commissioners, all of whom are C.P.P. members of the Assembly, were Mr. L. R. Abavana, formerly Minister of Agriculture (Northern Region), Mr. C. H. Chapman, formerly Deputy Speaker of the Assembly (Transvolta-Togoland), Mr. C. De-Graft Dickson (Ashanti), Mr. H. T. Korboe (Eastern Region), and Mr. J. E. Jagan (Western Region).

Two Cabinet changes were announced on the same date, Mr. F. Y. Asare (Minister of Communications) succeeding Mr. Abavana as Minister of Agriculture, and Mr. B. Yeboah-Afari (formerly Minister without portfolio) becoming the new Minister of Communications.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15760 A.)**

B. UNITED KINGDOM. — Rejection of Mr. P. A. Marrinan's Appeal against Disbarment.

The appeal lodged by Mr. Patrick Marrinan against the decision of the Benchers of Lincoln's Inn to disbar him was heard on Sept. 27 by a panel of five High Court judges, sitting not as a judicial but as a domestic " appeal tribunal," with Mr. Marrinan conducting his appeal in person. The tribunal announced on Oct. 27, however, that the appeal would be dismissed as there was ample evidence to justify the findings against Mr. Marrinan, and as, having regard to their gravity, he had been properly disbarred.

The judges hearing the appeal, who sat in the Lord Chief Justice's court as " visitors," were Justices Barry, Pearson, Sachs, Davies, and Ashworth.—(Times - Daily Telegraph) **(Prev. rep. 15776 A.)**

A. UNITED NATIONS. — Opening of 12th Session of General Assembly. - Sir Leslie Munro elected Assembly President. - Dr. Hammarskjöld reappointed U.N. Secretary-General. - Elections to Security Council.

The 12th session of the U.N. General Assembly opened in New York on Sept. 17, when Sir Leslie Munro (New Zealand) was elected President of the Assembly in succession to Prince Wan Waithayakon (Siam), who presided over the 11th session. Sir Leslie Munro received 77 votes on a secret ballot against one for Dr. Charles Malik (the Lebanese Foreign Minister), with three abstentions.

Prior to the vote, Dr. Malik had agreed to withdraw his candidature at the suggestion of the Mexican Foreign Minister (Dr. Padilla Nervo, himself a former President of the Assembly), who had suggested that one of the two candidates should withdraw to enable the Assembly to give "complete authority and unanimous support" to its President. Dr. Malik's gesture was warmly commended by Mr. Dulles (U.S.A.), Mr. Casey (Australia), Dr. Padilla Nervo (Mexico) and many other delegates, as well as by Sir Leslie himself, who said that he was "very conscious of Dr. Malik's magnanimity and high-mindedness."

Sir Leslie Munro (56) has been New Zealand Ambassador in Washington since 1951 and concurrently N.Z. representative at the United Nations. Born in Auckland, he graduated in law at Auckland University College and had a distinguished legal and academic career. In addition to his private law practice he lectured in Jurisprudence, Roman Law, and Constitutional Law at Auckland University College, was Dean of the Faculty of Law in 1938, and was a member of the Council of the New Zealand Law Society from 1936-39. In 1941 he became editor of the *New Zealand Herald*, a post he retained until his appointment as Ambassador in Washington. He represented New Zealand on the U.N. Security Council in 1954-55.

The chairmen of the Assembly committees, all of whom were nominated without opposition, were appointed as follows :

Political Committee	M. Jalal Abdoh (Persia).
Ad Hoc Political Committee ..	Señor Emilio Arenales Catalan (Guatemala).
Economic and Financial Committee	M. Jiri Nosek (Czechoslovakia).
Social, Humanitarian, and Cultural Committee	Frn (Mrs.) Aase Lionaes (Norway).
Trusteeship Committee .	M. Thanat Khoman (Siam).
Administrative and Budgetary Committee	Mr. W. H. J. van Asch van Wyck (Netherlands).
Legal Committee	Dr. Santiago Perez-Perez (Venezuela).

The first action of the Assembly after electing its President was to give unanimous approval to Malaya's admission to the United Nations as the 82nd member-State (see 15761 B). The relevant resolution was sponsored jointly by eight members of the British Commonwealth (Australia, Canada, Ceylon, Ghana, India, New Zealand, Pakistan, and the United Kingdom) and introduced by the British Foreign Secretary, Mr. Selwyn Lloyd. After the vote (80 to nil, with South Africa absent) Dr. Ismail bin Dato Abdul Rahman took his place as Malayan representative in the Assembly.

Elections to Security Council.

In the elections to the Security Council, held on Oct. 1, Canada, Japan and Panama were elected on the first ballot to replace Australia, the Philippines and Cuba. The membership of the Security Council thus became : Canada (until 1960), Nationalist China (permanent), Colombia (until 1959), France (permanent), Iraq (until 1959), Japan (until 1960), Panama (until 1960), Sweden (until 1959), U.S.S.R. (permanent), United Kingdom (permanent), United States (permanent).

Panama received 74 votes, Canada 72, Japan 55, and Czechoslovakia 25, the first three countries thus obtaining the necessary two-thirds majority of the countries present and voting. In addition, Argentina, Brazil, Chile, the Dominican Republic, India, Italy, and the Sudan received one vote each.

The Soviet delegation, which had supported the candidacy of Czechoslovakia, described the election of Japan as "a flagrant breach of the U.N. Charter and the London Agreement of 1946," since both the Charter and the 1946 agreement stipulated that one non-permanent seat on the Council should be reserved for an East European country. The Soviet statement said that while Panama, representing Latin America, and Canada, representing the British Commonwealth, had been elected in conformity with the "gentlemen's agreement" reached in London, the election of Japan was a "flagrant violation" of the principle of equitable geographical representation and constituted "an open discrimination against the East European countries."

Re-election of Dr. Hammarskjöld.

Dr. Dag Hammarskjöld, whose five-year term of office was due to expire in April 1958, was unanimously re-elected Secretary-General of the U.N. Organization for a further five years (until April 1963) on Sept. 26, following a unanimous recommendation to the Assembly by the Security Council. The voting on a secret ballot was 80 in favour of Dr. Hammarskjold's reappointment, with one vote invalid. The Israeli delegation was absent because of the Jewish New Year, but sent a letter supporting the re-election of Dr. Hammarskjöld. High tributes to Dr. Hammarskjöld's services to the United Nations were paid by Sir Leslie Munro, Mr. Cabot Lodge (U.S.A.), M. Kuznetsov (U.S.S.R.) and many other delegates, the Secretary-General receiving a standing ovation from the Assembly. (U.N. Information Centre, London - United Nations Review, New York - Times - New York Times)

(Prev. rep. 11th Session, 15505 A.)

B. WESTERN GERMANY. — Final Results of General Election. - Berlin Meeting of New Bundestag.

The final results of the Bundestag elections of Sept. 15 were announced by the Federal Election Commission on Oct. 1, as follows :

	Seats 1957	Seats 1953	Votes 1957	Percentage 1957	Percentage 1953
Christian Democratic Union	215	243	11,875,339	39.7	45.2
Christian Social Union	55		3,133,060	10.5	
Social Democrats ..	169	151	9,495,571	31.8	28.8
Free Democrats ..	41	48	2,307,135	7.7	9.5
German Party ..	17	15	1,007,282	3.4	3.3
All-German Bloc* ..	—	27	1,374,066	4.6	5.9
Other parties ..	·	3	702,975	2.3	4.9

*Refugee Party (B.H.E.).

†Comprising the German Reich Party, 308,564 votes (1 per cent); Federalist Union (Bavarian Party Centre Party), 254,322 votes (0.9 per cent); League of Germans, Party of Unity, Peace and Freedom, 58,725 votes (0.2 per cent); German Middle Class Party, 36,592 votes (0.1 per cent); South Schleswig Electors' Association (Danish minority), 32,262 votes (0.1 per cent); German Community, 17,490 votes (0.1 per cent); and Patriotic Union, 5,020 votes.

The electorate numbered 35,226,212, of whom 31,072,894, or 88.2 per cent, went to the polls. Under the electoral system two votes were cast by each voter, as explained in 15757 A: the first one for the candidate in his constituency, and the second one for the party list in his *Land*. Altogether 30,156,214 valid "first votes" were cast, whilst 916,680 were invalid; the total of valid "second votes" was 29,005,428, with another 1,167,468 votes invalid. The voting figures for the various parties given above all refer to "second votes."

The Saar participated for the first time in Federal elections, this being the reason for the increase in the number of seats from 487 in 1953 to 497 in 1957. Of the new deputies, 247 were elected on the constituency vote and 250 on the *Land* list vote, compared with 241 and 246 respectively in 1953.

The new Bundestag met for the first time on Oct. 15, the inaugural session taking place in West Berlin, instead of Bonn, so as to underline the Bundestag's claim to represent the entire German people. Dr. Gerstenmaier (Christian Democrat) was re-elected President of the Bundestag by 437 votes to 54. (Frankfurter Allgemeine Zeitung - Der Tagesspiegel, Berlin)

(Prev. rep. 15757 A.)

C. EASTERN GERMANY - SOVIET UNION. — Three-year Trade Agreement. - Soviet Credits to Eastern Germany. - Commerce and Navigation Treaty.

Following negotiations held in East Berlin from Sept. 9-27, it was announced on Oct. 1 that Eastern Germany and the Soviet Union had signed (*a*) a three-year trade agreement covering the years 1958-60; (*b*) an agreement on Soviet credits to the German Democratic Republic; and (*c*) a treaty of commerce and navigation.

The trade agreement provided for a total volume of trade during the three-year period of about 20,000,000,000 roubles on the basis of present world market prices. It laid down the goods and commodities which would be supplied by either side on the lines earlier agreed upon (see 15785 A).

Under the protocol on Soviet credits, the U.S.S.R. undertook to grant the East German Government during 1958 a 300,000,000-rouble credit in foreign exchange and a 400,000,000-rouble credit in connexion with the supply of goods. Both credits will bear interest at 2 per cent per annum and will be repaid within five years from Jan. 1, 1961. Repayment will take the form of East German deliveries of goods to the U.S.S.R.

Under the treaty of commerce and navigation both countries granted each other most-favoured-nation treatment. The treaty comes into force on the exchange of ratification instruments, and will be valid for an indefinite period until one side gives six months' notice of termination.

The conclusion of these agreements implemented the decisions taken by the two Governments during the visit of the Soviet ministerial and party delegation to East Berlin in August.—(Neues Deutschland) **(Prev. rep. 15785 A.)**

A. PAKISTAN. — Resignation of Mr. Suhrawardy. - New Cabinet formed by Mr. Chundrigar. - Elections to be held in November 1958.

Mr. Suhrawardy, the Prime Minister of Pakistan, resigned on Oct. 11 following a decision by the Republican Party on the previous day to withdraw its support from the Coalition Government. Although Mr. Suhrawardy asked President Mirza to convene a meeting of the National Assembly on Oct. 24 to enable him to seek a vote of confidence, which he claimed he could still obtain, President Mirza declined to follow this course, being unconvinced by Mr. Suhrawardy's argument. Mr. Suhrawardy thereupon resigned "in deference to the wishes of the President," but agreed to stay in office pending the formation of a new Government.

The decision of the Republicans to withdraw their support from Mr. Suhrawardy followed his refusal to act upon the resolution, recently adopted by the West Pakistan Legislative Assembly, which called for the breaking-up of West Pakistan as a single unit and its reconstitution as a sub-federation of four provinces; although this resolution had been passed with the votes of the Republicans and the National Awami League members (see 15775 A), President Mirza had publicly supported Mr. Suhrawardy's stand at the time.

After consulting with various party leaders, President Mirza on Oct. 17 commissioned Mr. I. I. Chundrigar, Parliamentary leader of the Moslem League, to form a new Government. The official communiqué described Mr. Chundrigar as "leader of the Coalition Party," thereby giving the first official indication that agreement had been reached between the Moslem League and the Republicans on the basis for a new administration.

The membership of the new Government, which was also supported by the *Krishak Sramik* (Peasants and Workers) and the *Nizam-i-Islam* parties, was announced on Oct. 19 and 23 as follows:

Mr. Ismail Ibrahim Chundrigar (Moslem League) ..	Prime Minister, Economic Affairs and Rehabilitation.
*Malik Firoz Khan Noon (Republican)	Foreign Affairs and Commonwealth Relations.
Mr. Fazlur Rahman (Moslem League) . ..	Commerce and Law.
*Syed Amjad Ali (Republican)	Finance.
Mian Mumtaz Mohammad Khan Daultana (Moslem League)	Defence.
Mr. Mozaffar Ali Khan Qizilbash (Republican) ..	Industry.
Mr. Farid Ahmed (*Nizam-i-Islam*)	Labour.
Mr. Abdul Latif Biswas (*Krishak Sramik* party) ..	Food and Agriculture.
*Mir Ghulam Ali Talpur (Republican)	Interior.
Syed Misbahuddin Husain (*Krishak Sramik* party) ..	Communications.
†Mian Jaffar Shah (Republican)	States and Frontier Regions. Information, and Broadcasting.
Mr. Abdul Aleem (Republican)	Works.
Mr. Yusuf Haroon (Moslem League)	Kashmir Affairs and Parliamentary Affairs.
Mr. Lutfur Rehman Khan (*Krishak Sramik* party) ..	Health and Education.

*Held same portfolio in Suhrawardy Cabinet.
†Held different portfolio in Suhrawardy Cabinet.

Mr. H. M. Soomro (Republican) and Mr. A. Kumar Das (Independent) were appointed Ministers of State, the former for Rehabilitation. Mr. Das's portfolio will be announced later.

The Cabinet thus consists of seven Republicans, four members of the Moslem League, three of the *Krishak Sramik* party, one of the *Nizam-i-Islam* party, and one Independent.

Mr. Chundrigar (60), who graduated in law at Bombay University, was a member of the Ahmedabad Municipal Council from 1924-27 and was elected to the Bombay Legislative Assembly in 1937. President of the Bombay Provincial Moslem League from 1940-45, and a member of the Working Committee of the All-India Moslem League, he was appointed Minister of Commerce when the Interim Government of India was set up in 1946. After the formation of Pakistan in 1947 he became Minister for Commerce, Industries, and Works in the first Pakistani administration. He was Pakistani Ambassador to Afghanistan from 1948-50, Governor of the North-West Frontier Province in 1950-51, and Governor of the Punjab from 1951-53. In August 1955 he became Law Minister in the Government of Chaudri Mohammad Ali, in which capacity he played a prominent part in piloting the new Pakistan Constitution through its final stages. Since the formation of Mr. Suhrawardy's Government he had been Leader of the Opposition.

Of the other new Ministers, Abdul Latif Biswas and Lutfur Rehman Khan had been respectively Minister of Food and Agriculture and Minister of State for Finance in the Cabinet of Chaudri Mohammad Ali. Mr. Yusuf Haroon is a former High Commissioner in Australia, whilst Mr. M. A. K. Qizilbash was formerly Minister of Industries, Labour, Commerce, and Village Aid in the West Pakistan Provincial Government. Mr. Fazlur Rahman was Minister of Education and Commerce in the Liaquat Ali Khan and Nazimuddin Cabinets.

The Ministers leaving the Government were, in addition to Mr. Suhrawardy, Mr. Abdul Mansur Ahmed, Mr. Abdul Khaleque, Mr. Dildar Ahmad, Mr. Zahiruddin (all belonging to the Awami League) and Mr. Mandal (Scheduled Castes Federation). Sardar Amir Azam Khan (Republican), Minister of Information, Broadcasting, and Parliamentary Affairs, had previously resigned on Aug. 30 in protest against the dismissal of Mr. Gurmani as Governor of West Pakistan.

Mr. Chundrigar announced on Oct. 17 that two of the principal points in his Government's domestic programme would be (*a*) the replacement of the present system of joint or non-communal electorates by one of separate communal electorates, and (*b*) the maintenance of the present "one-unit" system of government in West Pakistan until after the general elections, which it was hoped would be held in November 1958 (see below).

In a broadcast on Oct. 18 Mr. Chundrigar declared that his Government's external policy would rest on four bases: (i) adherence to the U.N. Charter; (ii) adherence to the Baghdad and SEATO pacts; (iii) "unity and brotherly relations" among the Moslem countries; (iv) "abhorrence of colonialism and imperialism in every shape and form."

Referring to Indo-Pakistani relations, Mr. Chundrigar deplored India's attitude on Kashmir; declared that his Government would uphold the right of Kashmiris to determine their future in accordance with their conscience; and accused India of "having tried to thwart and stultify all efforts to enable the people of Kashmir to do so," whilst at the same time adopting "other methods with a view to bringing about the gradual integration of the State with India." Appealing to "world conscience, and particularly to all freedom-loving countries and Pakistan's friends," to expedite a solution of the Kashmir problem, Mr. Chundrigar declared that the sooner this dispute and the canal waters dispute, which posed "a life and death problem for Pakistan," were resolved, the sooner Indo-Pakistani relations would be placed on a stable and friendly basis. Friendship between the two countries was essential, he added, if they were to make the maximum use of their limited resources for raising the living standards of their peoples.

Internally, he declared, Pakistan faced a grave economic crisis because of continued inflation, and his Government would take every measure to check it. He also announced that the Government was likely to be expanded within a short time, and said that the Awami League had not joined the Coalition because of "ideological differences" on the electorate question and its opposition to the Government's plan to reintroduce separate electorates. As regards the status of West Pakistan, no action would be taken to dismember the "one-unit" administration until after the general elections.

In the National Assembly the Republicans have at present 23 members, the Moslem League 12, the *Krishak Sramik* party 7, and the *Nizam-i-Islam* party 3. The Awami League, now in opposition, has 13, and the National Awami party 4. Of the other parties (all based on East Pakistan), the Pakistan National Congress has four members, the Scheduled Castes Federation two, and the United Progressive Parliamentary party one. There are nine Independents, whilst two seats are vacant.

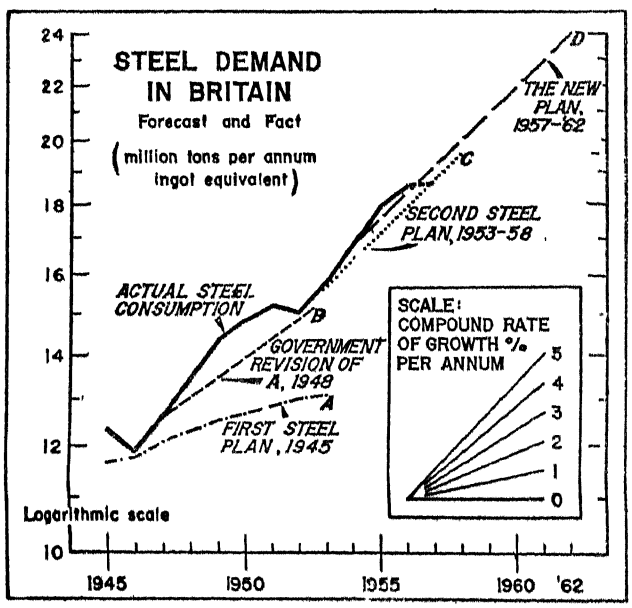
It was announced on Oct. 19 that five (out of the nine) Independent members of the National Assembly had formed a parliamentary group under the leadership of Chaudri Mohammad Ali, the former Prime Minister. Three members representing the tribal areas in West Pakistan had previously (Aug. 24) resigned from the Republican Parliamentary Party to sit as Independents supporting Mr. Suhrawardy.

The Election Commission had announced on Sept. 30 that it felt that general elections should be held "at the earliest suitable time after the rains," and that it was working towards a polling date in the first week of November 1958. This announcement followed a meeting of party leaders in the National Assembly, convened by Mr. Suhrawardy, at which the Commission stated that it was "humanly impossible" to go to the polls by May 1958, by which time either the rainy or the hot seasons would have begun in the two sections of the country. The Election Commission had previously declared on Aug. 4 that it would be impossible to hold elections in March 1958, as had originally been intended.—(Pakistan High Commissioner's Office, London - Times) **(Prev. rep. 15187B; 15112 A; West Pakistan, 15775 A; Elections, 15677 A.)**

A. UNITED KINGDOM. — Steel Industry. - New Five-Year Development Plan. - Production Figures. - Scottish Plant Extension Scheme.

A review of the iron and steel industry's development plans for the five-year period 1958-62 was contained in a special report by the Iron and Steel Board to Lord Mills, the Minister of Power, published on July 25. The plans involved a total expenditure of about £600,000,000, or an average of about £120,000,000 a year.

The Board considered that the industry should aim at a productive capacity of 29,000,000 ingot tons annually, compared with an actual output of 20,559,000 tons in 1956 and an estimated demand for 22,500,000 tons by 1958. Of the 1962 figure, 24,000,000 tons would be for the home market and 5,000,000 tons for export. The Board believed that this aim could be achieved, since proposals already approved should raise productive capacity to 28,000,000 tons by 1962 and other proposals now under consideration should, if approved, add another 1,000,000 tons. The proposals not yet finally determined included major developments by Richard Thomas and Baldwins Ltd., comprising a new iron and steel works at Newport and extensions of existing works at Ebbw Vale (S. Wales) and Redbourne (Lincolnshire).



(*Economist*)

The principal requirements for the future were listed by the Board as follows:

(1) Greater exploitation of English orefields and expansion of home production of pig-iron, to avoid too great a dependance on imports. The Board estimated that pig-iron production might rise to 19,000,000-20,000,000 tons by 1962, requiring about 21,000,000-22,000,000 tons of indigenous ore and 22,000,000-23,000,000 tons of imported ore. The report stated that home ore producers planned to increase production from 16,250,000 tons in 1956 to about 22,000,000 tons in 1962, whilst surveys now being carried out in the Oxfordshire orefield might enable even this rate to be improved on. Further expansion would probably come from orefields in Northamptonshire and Lincolnshire. The principal home ore producers, Stewarts and Lloyds and the United Steel Companies, were proceeding immediately with a survey of the reserves north of the River Welland in Northamptonshire, but considered that no ore from this source would be available by 1962. Difficulty over imported ore was increasing because of growing competition, and Britain was having to look further afield for her supplies.

(2) Replacement of obsolete iron- and steel-making capacity. The Board explained that although the amount of really obsolete plant remaining by 1962 would be small, this should be replaced as soon as possible, since some of it was barely economic even today.

(3) More capacity for producing semi-finished steel and finished products such as steel sheet and tinplate. The Board stated that there was "clear need for further capacity" in semi-finished steel, and that although supplies of the principal finished steel products should in most cases be adequate to meet demand in 1962, there would "rarely be much margin." The industry and the Board agreed that at some stage a new hot strip mill for making sheet and tinplate would be needed, but differed as to when this should be undertaken; the industry believed that the Board had overestimated the demand for sheet and tinplate in 1962, and that construction should be postponed until the position was clearer. Developments already approved should increase steel plate capacity by nearly 60 per cent above the 1956 output and should be adequate to meet the 1962 demand, whilst supplies of heavy steel sections should improve substantially from the end of 1957.

As to finance, the Board stated that projects already approved were likely to involve the industry in capital expenditure within the next five years of £350,000,000, whilst orders under contemplation - including minor schemes not requiring the Board's consent - might bring the total to about £500,000,000. In addition, further works, designed to come into operation after 1962, would be begun during the period, so that the industry's total expenditure was unlikely to be less than £600,000,000 at present prices. This would mean maintaining a capital expenditure rate of £120,000,000 a year (compared with £76,000,000 in 1956), the greater part of which would come from internal savings within the industry. The remainder would have to be raised from external sources, and the difficulties which might arise from credit restrictions were now being discussed with the authorities concerned.

Discussing the steel industry's achievements and its position *vis-à-vis* the steel industries of other countries, the Board stated that in the five years to Dec. 31, 1956, crude steel output in Britain had increased by 32 per cent (compared with an increase of only 7 per cent in the number of steel workers), whilst the least efficient British firm could make steel plates at £50 a ton, compared with the price for imported plates of £70 a ton. In proportion to their resources Britain and some European countries were now spending on steel as much as, or slightly more than, the U.S.A., where, in proportion to the country's size, production had been growing more slowly than in the United Kingdom. The report added that home demand for steel in 1958 seemed likely to be much as expected, but that export demand appeared likely to be higher; in this connexion it referred to the continuing demands at home of the shipbuilding industry and of the atomic energy and railway modernization programmes, and to the special prospects in the export market for oil pipe-line and tinplate.

The report concluded by speaking of the "many new processes and improved techniques" developed by the world's iron and steel industries in the past few years. It declared that although none of these appeared likely to revolutionize the industry in the immediate future, it might well be that the next 10 or 15 years would see "more technical change than there had been so far in this century." The Board considered it improbable, however, that a large-scale application of nuclear energy would be practicable in the industry in the near future, except through the generation of electricity, since present reactor types could not be allowed to attain useful steelmaking temperatures. Nor did it foresee any serious problems of labour redundancy as a result of automation, since there would remain so many operations which would have to be done manually that even the fullest degree of automatic control would not save much labour.

Detailed figures of iron and steel production in Britain in the second and third quarters of 1957 are given below:

	1957		1956	
	Weekly Average Tons	Annual Rate Tons	Weekly Average Tons	Annual Rate Tons
Steel Ingots and Castings.				
April	430,000	22,360,000	421,100	21,896,000
May	443,200	23,046,000	396,400	20,612,000
June	418,700	21,771,000	379,700	19,744,000
July	362,500	18,848,000	326,400	16,971,000
August	373,400	19,417,000	340,600	17,712,000
September	438,200	23,789,000	417,000	21,686,000
Pig-Iron.				
April	277,400	14,425,000	254,300	13,225,000
May	283,500	14,742,000	246,500	12,820,000
June	274,600	14,282,000	239,600	12,459,000
July	263,400	13,695,000	240,300	12,498,000
August	272,500	14,169,000	235,900	12,265,000
September	282,700	14,698,000	252,500	13,131,000

Developments in the iron and steel industry in recent months are summarized below:

Price Increases. In consequence of higher costs of coal, coke, transport, scrap, and imported ore, maximum prices of iron and steel products were increased from July 29 by an average of £1 per ton, or about 7½ per cent. From the same date maximum prices of iron and steel scrap were also raised by about £1 per ton, equivalent to about 10 per cent.

Import Duties. The Board of Trade announced on Aug. 8 that the suspension of import duties on a wide range of steel products, including iron and steel plates, would be continued for a further six months from March 18, 1958 - i.e. until Sept. 18, 1958.

Plant Expansion. Sir Andrew McCance, chairman of Colville's Ltd., announced on July 17 details of a further major development programme, estimated to cost £32,000,000 and to take four years to complete. The project—the second stage of the expansion programme begun in 1954 (see 13732 A)—had already been approved by the Iron and Steel Board and the British Iron and Steel Federation and comprised: (1) a second blast furnace and a duplicate set of coke ovens at the Ravenscraig works; (2) the replacement of the Dalzell slabbing and plate mills and the plate mill at the Clydebridge works by modern mills, in order to increase annual output of steel plates from 600,000 tons to 800,000 tons; (3) concentration of special and alloy steel production at Motherwell. Sir Andrew added that the first stage of the firm's development programme had virtually been completed, and that the second stage, now announced, would enable Colville's to produce an extra 300,000 tons of steel a year.

The South Durham Steel and Iron Co., Ltd. announced on Oct. 3 that the Minister of Housing and Local Government had approved its plan to build a large new steelworks on the site of West Hartlepool's civic airport at Greatham, Co. Durham (see 15593 A).

The Iron and Steel Realization Agency announced on Sept. 10 that it had sold its holding of the entire capital of Raine and Company to Cyril Kieft and Company and Close Brothers for £400,000. The Agency's investment in Raine and Co. was £393,232, represented by compensation under the Iron and Steel Act. -(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. 15593 A.)**

A. CIVIL AVIATION. — New Airline Company for Malaya, Singapore, Sarawak, North Borneo and Brunei.

The Singapore Minister for Communications and Works, Mr. Francis Thomas, announced in the Colony's Legislative Assembly on Oct. 16 that agreement had been reached on the conversion of Malayan Airways Ltd. (a company incorporated in Singapore) into a public limited liability company in which B.O.A.C., Qantas Airways, and the Governments of Singapore, the Malayan Federation, and the British territories of North Borneo, Brunei, and Sarawak would have shares.

It was proposed that the company's capital should be 8,000,000 Malayan dollars; that B.O.A.C. and Qantas together should hold 51 per cent in roughly equal shares; that the Malayan Federation, Singapore, and the three other Governments together should each subscribe 500,000 Malayan dollars of the capital; and that the remainder of the shares should be offered for public subscription. The Governments would have three directors on the company's Board.

The agreement would run until 1967, with a monopoly for the company for seven years; after that time a new Borneo subsidiary of B.O.A.C. (Borneo Airways Ltd.) was expected to operate between Malaya and Borneo, whilst a Malayan company might operate services within Malaya.

The new company had undertaken that at least four-fifths of its employees, all the operating crews, and all the directors would be British subjects or citizens of the Federation or of Singapore. It would provide training and promotion schemes to ensure the fullest practicable employment and advancement of locally domiciled staff possessing the appropriate basic qualifications, compatible with the maintenance of proper standards of safety and efficiency. [At present nearly one-quarter of the air crews and nearly half the ground staff are Malayan.]

The existing Malayan Airways Ltd. runs services between Singapore and all parts of the mainland of Malaya and British North Borneo, as well as flights to Bangkok and Sumatra. Its concession expires on Nov. 30, 1957.—(Times)

B. JAMAICA. — Cabinet System to be introduced.

In the Speech from the Throne on March 14, the Captain-General and Governor of Jamaica (Sir Hugh Foot) announced proposals for virtual self-government and the introduction of a Cabinet system in Jamaica during the present year.

It was proposed that a Council of Ministers should replace the existing Executive Council, and that it should consist of nine members of the House of Representatives and three from the Legislative Council (the Upper House of the Legislature), making a total membership of 12, compared with 15 in the present Executive Council. The three official members of the latter body—the Colonial Secretary, the Financial Secretary, and the Attorney-General—would not belong to the Council of Ministers; the first two would relinquish their seats in the Legislative Council, whilst the Colonial Secretary's title would be changed to Chief Secretary.

Sir Hugh pointed out that the proposals had been put forward in the spring of 1957 because it was unlikely that general elections would be held until after the Federal elections, and as it was considered that these important steps to self-government should not be delayed. The general revision of the Constitution, on the other hand, should wait for the enlargement of the House of Representatives.

The Governor's proposals were endorsed by the Legislative Council on May 2 and by the House of Representatives on July 3. The Chief Minister (Mr. Norman Manley) announced on Sept. 26 that Mr. Lennox-Boyd, the U.K. Colonial Secretary, had approved the constitutional changes and that draft Orders-in-Council implementing them would be submitted to the Queen in due course.—(Times) **(Prev. rep. 12931 C.)**

C. UNITED STATES. — New York Census.

Final results of the special census in New York City, published on Oct. 8, showed that the city's population was 7,795,471, a drop of 96,486 (1.2 per cent) since 1950. The census was taken in the spring at the request of the civic authorities.—(New York Times) **(Prev. rep. 15705 B.)**

D. UNITED KINGDOM. — Travel Allowances. - Corrigendum.

The last sentence of 15808 C should correctly read as follows: "There are allowances of £35 and £15 for cars and motor-cycles respectively." (Ed. K.C.A.)

E. UNITED KINGDOM. — Ipswich By-election.

The Ipswich by-election, caused by the death of Mr. Richard Stokes (Labour), was held on Oct. 24 with the following result:

Foot, Dingle (Labour)	26,898
Cobbold, John C. (Conservative)	19,161
Sykes, Miss Manuela (Liberal)	12,587
No change. Labour majority	7,737

Figures at the general election were . R. R. Stokes (Lab.) 32,306; J. C. Cobbold (C.) 28,724—Labour majority, 3,582.

The Labour candidate received 45.9 per cent of the votes, the Conservative candidate 32.7 per cent, and the Liberal candidate 21.4 per cent, whereas at the general election Mr. Stokes received 52 9 per cent and Mr. Cobbold 47.1 per cent in a straight fight. The Labour proportion of the poll thus dropped by 7 per cent and the Conservative proportion by 14 per cent. The Liberals had not contested Ipswich since 1950, when they polled 8,340 votes.

77.5 per cent of the electorate went to the polls, compared with 80.5 per cent at the general election. The total electorate numbered 77,621 an increase of 1,829 since the general election.

Mr. Richard Rapier Stokes (60) died on Aug. 3, a fortnight after he had been badly injured in a motor accident.

Educated at Downside (the Roman Catholic public school), he fought on the Western front in the First World War, winning the M.C. and bar and the French *Croix de Guerre* and being gazetted major at the age of 20. After the war he went to Trinity College, Cambridge, where he gained a Rugby blue, and subsequently entered the family engineering business of Ransome and Rapier, of which he became chairman and managing director when 30 years of age. He joined the Labour Party in 1935, unsuccessfully contested Glasgow Central, but was returned for Ipswich at a by-election in 1938 and represented that constituency until his death. One of the most forceful and independent-minded back-benchers, he was a vigorous critic of the Churchill Government during the war for its alleged inefficiency in the supply of tanks. He remained a back-bencher from 1940-50, during which period he frequently criticized the Labour Government's policy in Germany and the Middle East, but served as Minister of Works in 1950 and as Lord Privy Seal and Minister of Materials in 1951. In the latter capacity he went to Persia to negotiate with Dr. Mossadeq during the Abadan oil crisis. During the last months of his life Mr. Stokes had expressed strong criticism of the Labour Party's nationalization policy on the ground that it was too "doctrinaire." A bachelor, he was a devout member of the Roman Catholic Church throughout his life, and a prominent Catholic layman.

Mr. Dingle Foot, Q.C. (52) was Liberal M.P. for Dundee from 1931 to 1945 and Parliamentary Secretary to the Ministry of Economic Warfare from 1940 to 1945. He joined the Labour Party in 1956 (see 15007 B). He is a brother of Mr. Michael Foot, editor of *Tribune* and Labour M.P. for Devonport before the last general election, and of Sir Hugh Foot, Governor-designate of Cyprus (see 15815 B) and Captain-General and Governor of Jamaica since 1950.—(Times - Daily Herald) **(Prev. rep. By-elections, 15756 B.)**

F. MEDICAL RESEARCH. — Development of Vaccine against Common Cold Virus.

Dr. Winston H. Price, director of the division of medical ecology at Johns Hopkins University (Baltimore, U.S.A.), announced on Sept. 18 that he had developed a successful vaccine against a major common cold virus, following experiments covering a two-year period.

Dr. Price (who is 33) explained that a virus causing 30 per cent of common colds had been isolated in 1954 during researches on influenza, but no announcement had been made at the time because "we wanted to make sure we really had a common cold virus." In the course of subsequent researches a vaccine had been developed against this virus (known as the JH virus after John Hopkins University), and it had been successful in 88 per cent of 400 cases inoculated in a series of controlled tests extending over two years. The vaccine had been grown in monkey kidney tissue and then killed with formaldehyde (a procedure that had been used for many other vaccines), and those inoculated had suffered no ill effects or discomfort. The vaccine would give protection against the common cold caused by the JH virus for a minimum period of eight months. The viruses accounting for the other 70 per cent of common colds had not been isolated.

It was stated by Dr. Price that the colds caused by the JH virus were "the ordinary common or garden variety, bothersome but not particularly severe."—(New York Times)

G. LIBYA. — Egyptian Arms Supplies.

A Libyan Foreign Ministry spokesman announced on Oct. 15 that a quantity of arms, consisting of armoured cars, light weapons and ammunition, had been presented by Egypt to the Libyan Royal Guard as a "symbol of Arab solidarity." A military mission had also arrived in Libya to train the Royal Guard in the use of the arms.—(Times) **(Prev. rep. 14988 A.)**

A. YUGOSLAVIA. — Publication of M. Djilas's "The New Class." - M. Djilas sentenced to Seven Years' Imprisonment for Anti-State Propaganda. - M. Dedijer refused Permission to leave Yugoslavia.

An English translation of a book by M. Milovan Djilas (the former Vice-President of Yugoslavia) entitled *The New Class*, in which he strongly criticized the Communist system, was published in New York during August and subsequently in London. M. Djilas had written this work, which was smuggled out of Yugoslavia, during the period between his first trial for propaganda against the State in January 1955, when he was given a suspended sentence of 18 months' imprisonment, and his second trial on the same charge in December 1956, when he was sentenced to three years' imprisonment. The book was bitterly attacked by *Borba* (the official Yugoslav Communist organ), its import and distribution inside Yugoslavia being banned on Sept. 5. Foreign periodicals publishing the text of the book or extracts from it were also banned.

M. Djilas, while writing as a convinced Socialist, made a scathing indictment of Communism in *The New Class*, which attracted wide attention on its publication in Britain and America. Extracts from reviews of the book in the *Times Literary Supplement* and *The Observer* are given below :

The *Times Literary Supplement* described *The New Class* as "a uniquely important document" for two reasons : "Mr. Djilas is by far the most important defector so far from the Communist cause ; and the language of his recantation is by far the most categorical and uncompromising so far used by anyone qualified to subject Communism to serious criticism."

"The main point made in *The New Class*," said the review, "is that which gives the book its title : that so-called Communism, once it comes to power, tends to abolish itself and to give place to a tyranny of expert political managers, such as Stalin and Khrushchev, who acquire exclusive control of the national property, and thus constitute a new 'class' . . . Communism in the strict sense is therefore doomed to extinction, though Marxism, being also represented by democratic Socialism, is not. In fact, when the great schism came between Communists and Social Democrats, it was, according to Mr. Djilas, the former and not the latter who chose the wrong road, leading to a dead end . . ."

The Observer's review said : "The main ideas of the book . . . can be quickly summarized. Communism has come to power not as the movement of the working class in advanced industrial countries, but as an engine for the industrial modernization of under-developed countries where the native *bourgeoisie* was too weak, too dependent on feudal landowners and foreign capital, to fulfil this historic function. In those conditions the task could be performed only by an anti-capitalist and anti-imperialist force seizing State power, and using it for the unique purpose not of freeing a new society from traditional political shackles, as earlier revolutions had done, but of *creating* a new society. Hence the use of political compulsion proved not a passing phase of the struggle for power, but a permanent characteristic of the new regime ; the revolution ended in a rigid, totalitarian despotism, based on an unprecedented monopoly of political, economic and spiritual power in the hands of the revolutionary party, or rather of its bureaucratic oligarchy.

"Yet this monopoly of power gives to the party bureaucracy exclusive control over the means of production, i.e. the position of a ruling class in the strict Marxian sense : not being accountable to the mass of the producers who have no way of removing them, the Communist oligarchy are described by Djilas as the 'collective owners' of the apparatus of the economy, directing it as they think fit and enjoying its fruits like any privileged class. As such, they cease to have any progressive function once the task of industrialisation has been accomplished and are no longer interested in anything but the defence of their own power. In this phase of decline, though the revolutionary faith has died, its dogma is maintained as a justification of the power and privilege of the collective rulers. Territorial conflicts arise among the different 'national Communist' bureaucracies about their respective jurisdiction, but remain ultimately subordinate to the common interest in preserving their rule ; reforms are attempted to prevent the masses from revolting, but remain limited to insignificant dimensions by the unchanging power structure, and liable to be withdrawn at will.

"The book ends with an assertion of faith in the superiority of free societies, in which social control by the people—the true aim of Socialism—is advancing in many different forms while it remains unrealisable in Communist States . . ."

The publication of *The New Class* was followed on Oct. 4 by M. Djilas's third trial for spreading hostile propaganda against the State. The trial took place at Sremska Mitrovica, where he was serving the prison sentence imposed at his previous trial.

The indictment alleged that in *The New Class* M. Djilas had conducted "slanderous propaganda" against the Yugoslav State, and its social organization and constitutional institutions, with the intention of endangering the Socialist basis of the State, and had undermined Yugoslavia's reputation and interests abroad. "The statements of the accused that he only wished to make an objective criticism of the situation in our country, without any desire to act in a destructive way, has no foundation," the indictment added. "On the contrary, the book clearly reveals not only the writer's hostile attitude towards Socialism and the present constitutional order in Yugoslavia, but also his intention to mobilize all the enemies of the social order at home and abroad for action against the Socialist system and against Yugoslavia's political interests abroad."

The prosecutor asked that the trial should be held *in camera* "to eliminate the possibility that material from the trial might be used for propaganda against the social system and against Yugoslav interests." This was opposed by counsel for the defence (M. Kovacevic), who maintained that a secret trial would damage Yugoslavia in the eyes of foreign opinion. M. Djilas himself, who declared that he stood by every word of his book, also protested against being denied the right to reply publicly to the charges against him, and announced that he would refuse to answer any questions if the trial were held in secret. The judge granted the prosecutor's request and the trial was accordingly held *in camera*.

M. Djilas was found guilty on Oct. 5 and condemned to seven years' imprisonment, in addition to the three years' sentence he was already serving. He was also sentenced to five years' loss of civil rights after his release and to deprivation of all his decorations, including the wartime honour of "people's hero."

M. Vladimir Dedijer, a former member of the Central Committee of the League of Communists, and a friend of M. Djilas, was refused permission on Sept. 21 to leave Yugoslavia to take up a fellowship at Manchester University, where he was to have delivered lectures on the partisan war in Yugoslavia. M. Dedijer had been tried with M. Djilas in January, 1955, and given a suspended sentence of six months' imprisonment. During a two-months' tour of Northern and Western Europe in the spring of 1957 he gave a series of lectures in which he criticized the policy of the Soviet Union, his views being subsequently repudiated by the Yugoslav Government in an official statement. (Tanjug Agency, Belgrade - Times - Manchester Guardian - Observer - Times Literary Supplement) **(Prev. rep. M. Djilas, 15273 B ; M. Dedijer, 15258 A.)**

B. DENMARK - SOVIET UNION. — Expulsion of Attachés in Copenhagen and Moscow.

M. Sergei Smirnov, an assistant to the Soviet military attaché in Copenhagen, was expelled from Denmark on Oct. 2 for "activities incompatible with diplomatic procedure." In a strong protest Note on Oct. 13 the Soviet Government denied the allegation, and at the same time expelled Mr. Ranck, the Danish agricultural attaché in Moscow. The Danish Prime Minister, Mr. H. C. Hansen, thereupon disclosed on the same date (Oct. 13) that M. Smirnov had been expelled from Denmark because he had attempted to obtain secret defence information from a Danish radar worker. Mr. Hansen expressed his astonishment at the Soviet demand for the withdrawal of Mr. Ranck, declaring that the latter had committed no illegal act against the Soviet Union, that there was therefore no logical connexion between the two expulsions, and that the expulsion of Mr. Ranck was "clearly a mere reprisal."

M. Smirnov was the third Soviet diplomat to be expelled from Denmark during 1957, following the expulsion of one of the two Soviet military attachés in January last and of the Soviet assistant naval attaché in February.
(Berlingske Tidende, Copenhagen) **(15376 D ; 15434 C.)**

C. CHINA. — Opening of Yangtse Road-Rail Bridge.

The new road and rail bridge over the Yangtse River, construction of which began in 1955, was opened to traffic on Oct. 15. The largest bridge in China, and one of the largest in the world, it crosses the Yangtse at Hankow, has a main span of 3,800 feet, and is carried across the river on eight piers. The bridge is of "double-decker" construction—a lower level for trains and an upper level for motor-cars and pedestrians. One of the most important communications projects in China's current Five-Year Plan, it links the rail systems of North and South China and, for the first time, makes through rail traffic possible between Peking and Canton. Formerly rail passengers between North and South China had to cross the Yangtse by ferry, involving several hours' delay.—(New York Times)
(Prev. rep. 14403 A.)

D. NEW ZEALAND. — Population Figures.

A report recently published by the N.Z. Department of Statistics gave the population of New Zealand at June 30, 1957, as 2,229,437, including 248,840 Maoris.
(The Dominion, Wellington) **(Prev. rep. 15168 D.)**

OCTOBER 26—NOVEMBER 2, 1957

A. UNITED KINGDOM - UNITED STATES - CANADA — Mr. Macmillan's Visits to Washington and Ottawa. - Discussions with President Eisenhower and Mr. Diefenbaker. - Anglo-American "Declaration of Inter-dependence." - President Eisenhower to attend Paris Meeting of North Atlantic Council.

The British Prime Minister, Mr. Harold Macmillan, paid a three-day visit to Washington from Oct. 23-25 for discussions with President Eisenhower, in which Mr. Dulles, Mr. Selwyn Lloyd, and senior officials of both countries took part.

Mr. Macmillan had issued a statement on Oct. 17 announcing that he would be visiting Washington the following week to discuss with President Eisenhower "world problems which are of active concern to both of us." The statement added: "This meeting will be in the tradition of the many talks which have taken place between our two Governments. I expect that it will be one of several which we will have with our American friends and with other friendly Governments in the coming months."

President Eisenhower also issued a statement on the same day saying that Mr. Macmillan's visit would "provide an opportunity for useful talks with an old and trusted friend," and adding: "Mr. Macmillan's visit reflects the practice of free countries to consult as often as circumstances require. I hope that there will soon be occasions when I and my colleagues can meet with leaders of other free countries associated with us for similar discussions."

Mr. Macmillan left London Airport for Washington on Oct. 22, accompanied by Sir Edwin Plowden (chairman of the U.K. Atomic Energy Authority), Sir Norman Brook (Joint Permanent Secretary to the Treasury), Sir Richard Powell (Permanent Secretary to the Ministry of Defence), Sir William Hayter and Sir Patrick Dean (of the Foreign Office) and other officials. The Foreign Secretary, Mr. Selwyn Lloyd, was already in the United States, where he had been attending the 12th session of the U.N. General Assembly; Mr. Lloyd had also been in attendance on the Queen during her American tour (see 15828 A), which ended a few hours before Mr. Macmillan's departure for Washington.

Shortly after Mr. Macmillan's arrival on Oct. 23 Mr. Dulles visited the British Embassy for discussions with the Prime Minister and Mr. Selwyn Lloyd, described by the State Department as "a general review of world affairs and an appraisal of the political and military considerations involved." President Eisenhower, Mr. Macmillan, Mr. Dulles and Mr. Selwyn Lloyd opened their talks at the White House the same evening, the discussions lasting over three hours.

At the White House conference in the morning of Oct. 24 President Eisenhower and Mr. Dulles were joined by Mr. McElroy (the U.S. Secretary of Defence), Mr. Quarles (Deputy Secretary of Defence), General Twining (chairman of the U.S. Joint Chiefs of Staff), Admiral Strauss (chairman of the U.S. Atomic Energy Commission), and the U.S. Ambassadors in London and Ottawa, respectively Mr. John Hay Whitney and Mr. Livingston Merchant. Mr. Macmillan and Mr. Selwyn Lloyd were joined by Sir Edwin Plowden, Sir Norman Brook, Sir Richard Powell, Sir William Hayter, Sir Patrick Dean, Admiral Sir Michael Denny (head of the British Joint Services Mission in Washington), and Sir Harold Caccia, H.M. Ambassador in Washington.

A statement was issued after the meeting announcing (1) that President Eisenhower and Mr. Macmillan had decided to set up two study groups, one headed by Admiral Strauss and Sir Edwin Plowden and the other headed by Sir Richard Powell and Mr. Quarles; (2) that the Strauss-Plowden group had been assigned "the duties of making recommendations in the field of nuclear relationship and co-operation"; (3) that the Powell-Quarles group had been asked "to make recommendations in the field of military defence, particularly those problems dealing with missiles and rocketry"; and (4) that, under the directive of President Eisenhower and Mr. Macmillan, the work of these two groups would be "guided by the underlying principle of the meeting—namely, how our two countries can be of greater service to the free world."

Anglo-American Declaration of Inter-dependence.

The discussions ended on Oct. 25, when the following "Declaration of Inter-dependence" (cross-headings inserted) was issued jointly by President Eisenhower and Mr. Macmillan:

General Principles.

"We have met together as trusted friends of many years who have come to head the Governments of our respective countries. These two countries have close and historic ties, just as each has intimate and unbreakable ties with other free countries.

"Recognizing that only in the establishment of a just peace can the deepest aspirations of free peoples be realized, the guiding purpose of our deliberations has been the determination of how best to utilize the moral, intellectual and material strength of our two nations in the performance of our full share of those tasks that will more surely and promptly bring about conditions in which peace can prosper. One of these tasks is to provide adequate security for the free world.

"The free nations possess vast assets, both material and moral. These in the aggregate are far greater than those of the Communist world. We do not ignore the fact that the Soviet rulers can achieve formidable material accomplishments by concentrating upon selected developments and scientific applications, and by yoking their people to this effort. Despotisms have often been able to produce spectacular monuments. But the price has been heavy.

"All peoples yearn for intellectual and economic freedom, the more so if from their bondage they see others manifest the glory of freedom. Even despots are forced to permit freedom to grow by an evolutionary process, or in time there will be violent revolution. This principle is inexorable in its operation. Already it has begun to be noticeable even within the Soviet orbit. If the free nations are steadfast, and if they utilize their resources in harmonious co-operation, the totalitarian menace that now confronts them will in good time recede.

"In order, however, that freedom may be secure and show its good fruits, it is necessary first that the collective military strength of the free nations should be adequate to meet the threat against them. At the same time, the aggregate of the free world's military expenditure must be kept within limits compatible with individual freedom. Otherwise we risk losing the very liberties which we seek to defend.

"These ideas have been the central theme of our conversations which, in part, were participated in by M. Spaak, the Secretary-General of NATO [see below]. In application of these ideas, and as an example which we believe can and should spread among the nations of the free world, we reached the following understanding:

Inter-dependence of the Free World. - Intensification of Collective Scientific Research by NATO Countries.

"(1) The arrangements which the nations of the free world have made for collective defence and mutual help are based on the recognition that the concept of national self-sufficiency is out of date. The countries of the free world are inter-dependent, and only in genuine partnership, by combining their resources and sharing tasks in many fields, can progress and safety be found. For our part, we have agreed that our two countries will henceforth act in accordance with this principle.

"(2) Our representatives on the North Atlantic Council will urge an enlarged Atlantic effort in scientific research and development in support of greater collective security, and the expansion of current activities of the task force working in this field under the Council's decision of last December.

Amendment of U.S. Atomic Energy Act.

"(3) The President of the United States will request Congress to amend the Atomic Energy Act as may be necessary and desirable to permit of close and fruitful collaboration of scientists and engineers of Great Britain, the United States, and other friendly countries.

Disarmament.

"(4) The disarmament proposals made by the Western representatives on the Disarmament Sub-committee in London, and approved by all members of NATO, are a sound and fair basis for an agreement which would reduce the threat of war and the burden of armaments. The indefinite accumulation of nuclear weapons and the indiscriminate spreading of the capacity to produce them should be prevented. Effective and reliable inspection must be an integral part of initial steps in the control and reduction of armaments.

Nuclear Defence and Collective Security.

"(5) In the absence of such disarmament as we are seeking, international security now depends not merely upon local defensive shields but upon reinforcing them with the deterrent and retaliatory power of nuclear weapons. So long as the threat of international Communism persists, the free nations must be prepared to provide for their own security. Because the free world measures are purely defensive, and for security against outside threat, the period for which they must be maintained cannot be foreseen.

"It is not within the capacity of each nation acting alone to make itself fully secure. Only collective measures will suffice. These should preferably be found by implementing the provisions of the U.N. Charter for forces at the disposal of the Security Council. But if the Soviet Union persists in nullifying these provisions by veto, there must otherwise be developed a greater sense of community security. The framework for this exists in collective defence arrangements now participated in by nearly 50 free nations, as authorized by the Charter. All members of this community, and other free nations which so desire, should possess more knowledge of the total capabilities of security that are in being and in prospect.

"There should also be provided greater opportunity to assure that this power will in fact be available in case of need for their common security, and that it will not be misused by any nation for purposes other than individual and collective self-defence, as authorized by the U.N. Charter. For our part we regard our possession of nuclear-weapons power as a trust for the defence of the free world.

Free World Regional Alliances.

"(6) Our two countries plan to discuss these ideas with all of their security partners. So far as the North Atlantic Council is concerned, the December meeting of the Council may perhaps be given a special character in this respect. This has been discussed with M. Spaak.

KANSAS CITY PUBLIC LIBRARY

" (7) In addition to the North Atlantic Treaty, the South-East Asia collective defence treaty, the Baghdad Pact, and other security arrangements constitute a strong bulwark against aggression in the various treaty areas.

" There are also vitally important relationships of a somewhat different character. There is the Commonwealth ; and in the Western hemisphere the Organization of American States. There are individual mutual defence agreements to which the United States is a party.

Free World Economic Co-operation.

" (8) We recognize that our collective security efforts must be supported and reinforced by co-operative economic action. The present offers a challenging opportunity for improvement of trading conditions and the expansion of trade throughout the free world. It is encouraging that plans are developing for a European Free Trade Area in association with the European Common Market. We recognize that, especially in the less developed countries, there should be a steady and significant increase in standards of living and economic development.

Pledge to Turkey. - German Reunification.

" (9) We took note of specific factors in the ideological struggle in which we are engaged. In particular, we were in full agreement that :

Soviet threats directed against Turkey give solemn significance to the obligation, under Article 5 of the North Atlantic Treaty, to consider an armed attack against any member of the alliance as an attack against all ;

The reunification of Germany by free elections is essential. At the Geneva conference of 1955 M. Khrushchev and M. Bulganin agreed to this with us and our French allies. Continued repudiation of that agreement and continued suppression of freedom in Eastern Europe undermine international confidence and perpetuate an injustice, a folly, and a danger.

Conclusion.

" The President and the Prime Minister believe that the understandings they have reached will be increasingly effective as they become more widespread between the free nations. By co-ordinating the strength of all free peoples, safety can be assured, the danger of Communist despotism will in due course be dissipated, and a just and lasting peace will be achieved."

Mr. Macmillan and Mr. Selwyn Lloyd flew to Ottawa on Oct. 26 for discussions with Mr. Diefenbaker (Prime Minister of Canada), Major-General Pearkes (Defence Minister), and senior officials of the Canadian Atomic Energy Commission, the Defence Research Board, and the armed services. They also attended a meeting of the Canadian Cabinet.

On his return to London on Oct. 27, Mr. Macmillan described his discussions with President Eisenhower as " the beginning of a new chapter of combination and co-operation between the free nations of the world," adding that the Washington meeting had been " the most fruitful I can remember and the most effective." A statement on his visits to Washington and Ottawa was made by the Prime Minister to the House of Commons on Oct. 29, when Parliament reassembled after the summer recess :

After describing his talks with President Eisenhower as a " new start " in Anglo-American relations, Mr. Macmillan said : " The main purpose of the [Washington] declaration is to establish the principle of the inter-dependence of the countries of the free world. This principle will guide the policies of the Governments of the United Kingdom and the United States. We shall seek to secure the participation of all our Allies, and the support of the other free nations, in a common partnership. Thereby the resources of the free world can most effectively be used in the maintenance of the interests of all.

" Our two countries will pursue this purpose in the North Atlantic Treaty Organization, as well as with our other allies and with the nations of the free world, in the most appropriate way. We will urge at NATO an increase of scientific research and development in support of greater collective security. The President of the United States will request Congress to amend the Atomic Energy Act as may be necessary and desirable.

" In conformity with the same principles, we have declared that, in their possession of nuclear weapons, both our Governments regard themselves as trustees for the defence of the free world.

" In Canada, the Foreign Secretary and I had an opportunity of reporting on those discussions to the Canadian Government. The Canadian Government expressed themselves most ready to subscribe to the principle of inter-dependence and to join in the common effort necessary to make it effective."

As indicated in the Washington declaration, the Secretary-General of NATO (M. Spaak) met the President and the Prime Minister on Oct. 25, the last day of their talks. On Oct. 30 President Eisenhower announced at a press conference that he proposed to visit Paris for the December meeting of the North Atlantic Council, assuming that most of the other heads of Government concerned had accepted the invitation extended by M. Spaak (see below). The President also indicated that he would " very much like " to break his journey in London if it could be arranged.

President Eisenhower stated that he hoped to meet Congressional leaders early in December, before his projected visit to Paris, since he did not wish to leave the U.S.A. without securing bipartisan approval in advance. He added that his acceptance of M. Spaak's invitation had been inspired by the conviction he had gained at Panama, during the meeting of American Presidents in 1956 (see 15036 A), that such meetings could do much to awaken people to the realities of common problems.

The permanent representatives on the North Atlantic Council agreed on Oct. 30 to a suggestion by M. Spaak that the forthcoming December session of the Council should be attended by the heads of Government of all NATO countries. This suggestion, it was stated, was the outcome of M. Spaak's conversations in Washington with President Eisenhower and Mr. Macmillan. The Paris Correspondent of *The Times* commented : " The December meeting of the Atlantic Council is always the most important of the year and is usually attended by the Foreign, Defence, and Finance Ministers. The presence of 15 heads of Government, including President Eisenhower, on this occasion will clearly give it an importance exceeding that of any of its predecessors." (New York Times - New York Herald Tribune - Department of External Affairs, Ottawa - Montreal Star - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Bermuda Conference, 15457 A.)**

A. WESTERN GERMANY. — New Government in Bavaria. - Dr. Seidel appointed Prime Minister.

Dr. Wilhelm Hoegner, Social Democratic Prime Minister of Bavaria, resigned on Oct. 9 following the resignation on the previous day of the four members of his Government belonging to the Bavarian Party, and the decision of the All-German Bloc (Refugee Party) also to withdraw its support from the Government. The defection of these two coalition parties was caused by the success of the Christian Social Union in the recent Federal elections, in which it obtained 57 per cent of all votes in Bavaria, whereas all the smaller parties lost heavily. In consequence, Dr. Hoegner's majority in the Bavarian *Landtag* was converted into a minority of 73 (Social Democrats and Free Democrats), against 131 votes for the Christian Social Union, the Bavarian Party, and the All-German Bloc. Dr. Hoegner's coalition government had held office in Bavaria since 1954.

On Oct. 16 the Bavarian *Landtag* elected Dr. Hans Seidel (Christian Social Union) as the new *Land* Premier, Dr. Seidel receiving 110 out of 198 votes and being supported also by the Free Democrats and the All-German Bloc. The composition of his Cabinet was announced later the same day as follows :

Dr. Hans Seidel (C.S.U.) - Prime Minister ; Herr Walter Stein (All-German Bloc) - Deputy Premier and Labour ; Herr Otto Bezold (Free Democrat) - Interior ; Herr Rudolf Eberhard (C.S.U.) - Finance ; Dr. Otto Schedl (C.S.U.) Economic Affairs ; Professor Theodor Maunz (non-party) Education ; Dr. Willi Ankermüller (C.S.U.) - Justice ; Dr. Alois Hundhammer (C.S.U.) Agriculture.

There were also seven State Secretaries (one for each Ministry), of whom three belonged to the Christian Social Union, one to the Free Democrats, two to the All-German Bloc, and one was non-party.

Dr. Seidel (65) had been chairman of the Christian Social Union since 1955. Herr Stein and Herr Bezold had both been members of Dr. Hoegner's Cabinet. The Bavarian Party, two of whose members had joined the Christian Social Union, was not represented in Dr. Seidel's Ministry.

The formation of a Christian Social *Land* Ministry in place of the previous coalition government under Social Democratic leadership gave Dr. Adenauer a safe majority in the Bundesrat.—(Frankfurter Allgemeine Zeitung) **(Prev. rep. 14022 A.)**

B. FRANCE - UNITED STATES. — Export-Import Bank Loan for Air France.

The U.S. Export-Import Bank announced on Oct. 24 that it had granted to *Air France* a loan of $78,500,000 (about 33,000 million francs) to assist in financing the purchase of 17 *Boeing-707* long-range jet airliners, the total cost of which was $118,300,000. The loan, which is guaranteed by the French Government, bears interest at 5½ per cent per annum and will be repayable within seven years from the delivery of the aircraft, which is expected to take place towards the end of 1959 and in 1960.—(Le Monde, Paris - New York Times)

C. SOVIET UNION. — Government Appointments. - New Vice-Minister of Foreign Affairs.

It was announced in Moscow on Sept. 20 that M. Firyubin, lately Soviet Ambassador in Belgrade, had been appointed a Vice-Minister of Foreign Affairs. M. Firyubin is the husband of Mme. Ekaterina Furtseva, the only woman member of the Presidium of the Central Committee of the Soviet Communist Party.—(Le Monde, Paris) **(Prev. rep. 15260 C.)**

A. CANADA - UNITED STATES. — Discussions on Trade and Economic Affairs.

A meeting of the Joint United States - Canadian Committee on Trade and Economic Affairs was held in Washington on Oct. 7-8, Canada being represented by the Secretary of State for External Affairs (Dr. Sidney Smith) and the Ministers of Finance (Mr. Donald Fleming), Trade and Commerce (Mr. Gordon Churchill), and Agriculture (Mr. Douglas Harkness), and the U.S. delegation consisting of the Secretary of State (Mr. Dulles) and the Secretaries of the Treasury (Mr. Robert Anderson), Agriculture (Mr. Benson) and Commerce (Mr. Weekes).

A communiqué issued at the end of the meeting summarized the principal matters discussed as follows :

General Economic Conditions. " It was recognized that the two countries have a deep and continuing interest in each other's economic stability and strength. In particular, representatives of the two Governments expressed their full accord on the importance of a high level of business activity being maintained in their economies, and on the need for growth that does not endanger stability, both in their domestic economies and in the trade of the free world. The recognition of this reciprocal interest was considered basic to close and effective co-operation between the two countries as an integral part of their contribution to world peace and security, including the common defence of North America."

General Trade Policies. " Canadian Ministers drew attention to the important implications for Canada of the very high proportion of its external trade which is taking place with the United States. The volume and variety of goods entering into this trade made Canada by far the most important commercial customer of the U.S.A., and *vice versa*. In 1956 well over $1,000,000,000 worth of U.S. goods, or approximately one-quarter of total U.S. cash exports, were sold in Canada. On the other hand Canadian exports to the U.S.A. amounted to less than $3,000,000,000. In the light of these facts Canadian Ministers stressed the effects on Canada of developments in U.S. commercial policies.

" The U.S. members for their part stressed the dependability of the U.S. economy both as a market and as a supply source. They drew attention to the strong economic position of Canada and pointed out that Canada's trading deficit with the U.S.A. had been accompanied by an inflow of U.S. capital, and that the rest of the deficit had been covered by Canada's trade surplus and investment inflows from other parts of the world. In these circumstances the U.S. members felt that the trade and payments relationships between the two countries were basically sound, and demonstrated the effective working of multilateral trading policies. It was agreed that in formulating its trade policies each country should show careful regard for the interests of the other."

Expansion of World Trade. " There was considerable discussion of means for promoting the orderly expansion of world trade. In particular the representatives of the two Governments were in accord on the need for continued support of the General Agreement on Tariffs and Trade (GATT), to which both the United States and Canada are parties."

U.S. Agricultural Surplus Disposal Transactions. " Canadian Ministers maintained that U.S. surplus disposal operations have adversely affected Canadian wheat sales. In particular they emphasized the harmful effects barter transactions have had on commercial marketings of all exporting countries, including Canada and the United States. The U.S. members affirmed their intention in all surplus disposal activities to avoid, insofar as possible, interfering with normal commercial marketings. They gave an assurance that under the revised Commodity Credit Corporation barter programme each barter contract must result in a net increase in exports of the agricultural commodity involved, and that interest must be paid until the strategic materials are delivered or payment is otherwise effected for the agricultural commodities. The members of the committee were also agreed on the value of continuing consultation in order to keep to a minimum any harmful effects of surplus disposal activities."

U.S. Lead and Zinc Imports. " The Canadian Ministers expressed concern over the effect on Canadian producers resulting from any future U.S. action to raise duties on imported lead and zinc. The U.S. members explained the situation confronting their domestic producers. They called attention to the continuing need for imports of certain minerals and metals, and indicated that any U.S. tariff action that might be taken to relieve serious injury to U.S. producers would have the primary objective of maintaining a normal relationship between imports and domestic production. They noted that any such action would be applied in accordance with GATT procedures."

U.S Investments in Canada. " The Canadian Ministers clarified the concern frequently expressed in Canada regarding the nature and extent of U.S. investment in Canadian natural resources and important manufacturing industries They made it clear that Canada welcomed the inflow of capital and recognized its important contribution to Canadian development. It was the hope of the Canadian Government that all U.S. companies participating in the expansion of the Canadian economy would develop and maintain closer and mutually beneficial relationships with the people of Canada. In this connexion note was taken of the recent supplementary tax convention between the U.S.A. and Canada, which was designed to facilitate greater Canadian participation in American-owned corporations operating in Canada. The U.S. members welcomed this clarification by the Canadian Ministers and pointed out that the great confidence which U.S. business feels towards Canada is the result of many years of experience and association."

The meeting of the committee was the third since its establishment in 1953, its previous two meetings having been held in Washington in March 1954 and in Ottawa in September 1955. (Department of External Affairs, Ottawa - Montreal Star - New York Times - New York Herald Tribune)

(Prev. rep. 15789 A ; 14492 C.)

B. BALKANS. — Rumanian Proposal for Conference of Balkan Prime Ministers. - Greek Rejection.

It was officially announced in Bucharest on Sept. 17 that M. Chiva Stoica, the Rumanian Prime Minister, had sent a message to the Prime Ministers of Albania, Bulgaria, Greece, Turkey, and Yugoslavia proposing a conference of the Premiers of all six Balkan countries in one of their capitals before the end of 1957, in order to promote co-operation between their countries.

The message said that collective co-operation between the Balkan States for the purpose of safeguarding peace in the region, as well as for the prosperity and progress of their peoples, should be based on the full equality of the participating countries, mutual respect for their sovereignty, and non-interference in their internal affairs. The conference should take decisions on the strengthening of peace in the Balkans ; the mutual application of the principle of non-aggression ; the peaceful settlement of disputes ; the development of economic and cultural relations ; and personal contacts between leaders. The six countries could also agree on guaranteeing the security of their common frontiers by a collective treaty. M. Stoica added : " I wish to emphasize that such co-operation will in no way be directed towards the creation of a *bloc* opposed to other non-participating States."

The Albanian and Bulgarian Governments accepted the Rumanian proposal, while the Yugoslav Government also accepted it with the reservation that all Balkan countries should agree to participate. Assurances to that effect were conveyed to the Greek Government by the Yugoslav Ambassador in Athens, who also explained that his Government's endorsement of the Rumanian invitation did not imply Yugoslav agreement to the proposed treaty of friendship and non-aggression between the Balkan countries. The Greek Prime Minister (M. Karamanlis), however, declined the Rumanian invitation on Sept. 23.

In his letter to M. Stoica, M. Karamanlis said that it was impossible for Greece to take part in the proposed conference at present for two chief reasons. One was the hostility encountered by Greece in recent years on the part of certain Balkan countries, which " either of their own volition or as instruments of foreign aggressors " had invaded Greek territory or proclaimed their intention of appropriating certain Greek territories. The other reason was that the border areas of neighbouring countries were still serving as hide-outs and bases for persons who secretly entered Greek territory with the intention of destroying Greece's independence or undermining her regime.

M. Karamanlis went on to say that the question of a conference was, in the Greek view, a secondary matter ; what was important was practical proof of good faith in the settlement of differences, and the creation of a " climate of sincerity and trust." In consequence, Greece could only participate in a Balkan conference after having achieved beforehand a settlement of existing differences with her neighbour-countries, and the ending of the causes which led to tension in the Balkans.

The Turkish Government had not replied to the Rumanian proposal by the end of October.—(Agerpres, Bucharest - Le Monde, Paris - Times - Manchester Guardian)

C. RHODESIA AND NYASALAND FEDERATION. — Reorganization of Armed Forces.

It was announced in October that the ground forces of the Federation had recently been reorganized to bring them into line with those of other Commonwealth armies, and that the regular element, hitherto known as the " Staff Corps," had been designated " the Army."

Under the reorganization there will be a Corps of Engineers, a Corps of Signals, the Rhodesian and Nyasaland Infantry, a Medical Corps, an Army Services Corps, a Pay Corps, and a Chaplains' Department. The Territorial Force (wholly infantry except for supply and transport platoons) will also become part of the Federation Army. There are altogether four Regular and three Territorial infantry battalions in the Federation, but no artillery units.

The strength of the Army is about 6,000 of all ranks, including 3,500 Askaris and 800 Europeans in the Regular forces, and 1,500 Europeans and 150 Coloureds, Asians, and Eurafricans in the Territorial Force. The overall direction of the Army is exercised by Central Africa Command Headquarters. (Federal Information Department, Salisbury)

(Prev. rep. 13856 A.)

A. EASTERN GERMANY. — Currency Reform. - Compulsory Exchange of Bank Notes.

In a surprise move early on Oct. 13 (a Sunday) the East German Government announced (1) that all paper currency in circulation was being withdrawn with immediate effect; (2) that existing bank notes would be exchanged for new ones provided they were presented between 12 noon and 10 p.m. the same day at branches of the Central Note Bank, or at offices specially opened in schools and town halls; and (3) that the exchange would be at par, though each individual would receive only up to 300 East German marks in new notes, any amounts in excess of that limit being credited to special new bank accounts.

A decree was issued at the same time providing (*a*) that existing bank and savings bank accounts, as well as existing debts, both of private individuals and public institutions, would not be affected by the measures; (*b*) that balances held with East German banks by residents of West Berlin and Western Germany, or by foreigners, would also be unaffected insofar as they conformed to East German foreign exchange legislation; (*c*) that East Germans or inhabitants of East Berlin who were absent from their normal place of residence on Oct. 13 (e.g. persons on holiday, in hospitals, etc.), could declare their holdings of notes to an exchange office at the place where they were temporarily staying, and would receive a certificate enabling them to exchange the notes within three days after their return home; (*d*) that East Germans who were in Western Germany or abroad on Oct. 13, as well as crews of ships at sea, could exchange their notes on returning to East German territory.

The decree also laid down that all amounts above 300 East German marks which had been credited to a special account would be released on Oct. 19 "provided there was no suspicion that they were of speculative origin," in which case an inquiry would be held by special commissions to be formed in each administrative district (*Kreis*). All cash accounts of public and private institutions and of firms were ordered to be closed as at Oct. 13, and new cash accounts to be opened showing the holdings of new notes.

Herr Grotewohl (the East German Prime Minister), who announced these measures in a broadcast at 8 a.m., said that they had been taken because the Government had "known for a long time that monopolists and militarists in Western Germany had accumulated certain quantities of our bank notes for speculative purposes, for disturbing our economy, and for financing agents and espionage organizations." It was necessary to protect the East German economy against these "manipulations," as well as against the practice of commodity exports effected "through the exploitation of an artificial swindle rate of exchange." [The exchange rate for East German marks in West Berlin and Western Germany has in recent years fluctuated between four and five East marks for one West mark, whereas the East German Government officially regards the two currencies as being at par.]

According to an official statement in East Berlin, the total amount of bank notes issued in Eastern Germany had risen over an unspecified period from 4,500,000,000 Eastern DM. to 5,800,000,000 Eastern DM., but the East German *Notenbank* was unable to account for about 1,000,000,000 Eastern DM. It was estimated in West Berlin that about 20,000,000 Eastern DM. of this amount were held by banks and exchange offices in the Western sectors, but it was pointed out that there were far greater amounts of East German notes held by private individuals in Eastern Germany itself. The Federal Ministry for All-German Questions said in Bonn on Oct. 13 that the measure was primarily an attempt to control East German private consumers, particularly hoarders of cash; in addition to small tradesmen, it would particularly affect farmers who had remained outside the State co-operatives.

All road traffic between Eastern and Western Germany was stopped during the day, and both road and rail passengers, as well as pedestrians, were subjected to currency checks. The sector boundary between East and West Berlin was cordoned off by the East German "people's police," while underground trains from West Berlin were not allowed to stop at East Berlin stations. On Oct. 14 the East German radio announced that 80 persons had been arrested and nearly 100,000 marks found on them; it was stated that the persons concerned would be brought to trial.

A formal protest at the travel restrictions into and out of West Berlin during the currency changeover was made on Oct. 17 by the British Commandant in West Berlin (Major-General Rome) on behalf of the Western Powers. In a letter to the Soviet Commandant (Major-General Chamov) General Rome described the interference by the East German police with freedom of movement in Berlin as "a direct contravention" of the Four-Power agreement on the city's status. (Neues Deutschland, East Berlin - Frankfurter Allgemeine Zeitung - Times - Manchester Guardian - Le Monde, Paris)

(Prev. rep. Currency Reform, 9337 A.)

B. SOVIET UNION. — Sixth Five-Year Plan to end in 1958. - Replacement by New Seven-Year Plan. - Progress in Formation of Regional Economic Councils.

A major revision of Soviet economic planning, involving the drafting of a new seven-year plan for 1959-65 to supersede the present five-year plan for 1956-60, was announced by the Central Committee of the Communist Party and the Soviet Council of Ministers on Sept. 26.

The statement claimed that the Sixth Five-Year Plan for the period 1956-60 was being successfully carried out, but said that in implementing the directives of the the 20th Party Congress it had "become clear that the adjustment of some provisional targets of the Plan was necessary." In this connexion instructions had already been given in December 1956 for the adjustment of some of the targets "so as to ensure the more rational and effective utilization of material resources and finance in the development of the national economy, and also to make possible the allocation of additional funds for housing construction."

Furthermore, "a fundamental change in long-term and current planning procedure" had been made by the Central Committee and the Supreme Soviet in February 1957, "involving the reorganization of the management of industry and construction along territorial lines, the setting up of economic councils in the newly-established economic administrative areas, and the transfer of planning from separate Ministries and Departments to the Union Republics and the economic administrative areas."

The statement went on: "In recent years geologists have discovered large new deposits of various raw materials and sources of power. On the basis of these resources new enterprises and new industrial centres not provided for in the Sixth Five-Year Plan can be established. The remaining three years of the Sixth Five-Year Plan are not a long enough period for this. Such great tasks will take at least five to seven years to carry out. In view of this, the Central Committee of the C.P.S.U. and the Council of Ministers of the U.S.S.R. have decided that a long-term plan for the development of the national economy of the U.S.S.R. must be drafted for a longer period, and have instructed the State Planning Committee of the U.S.S.R., the Councils of Ministers of the Union Republics, the economic councils, and the Ministries and departments of the U.S.S.R. to draw up a draft plan for the development of the national economy covering 1959-65."

The new plan, the drafting of which should be completed by July 1, 1958, was intended to ensure the "further increase of all branches of the people's economy on the basis of priority for means of production [i.e. heavy industry], with a view to achieving a further big advance towards the accomplishment of the Soviet Union's main economic task - to overtake and surpass in a historically brief period the most developed capitalist countries in *per caput* production." Specifically, the new plan would provide for "the development of the natural resources of the eastern parts of the country on a wider scale; the rapid development of ferrous and non-ferrous metallurgy and the chemical industry, especially the production of synthetic fibres; artificial foodstuffs; the production of plastics and other synthetic materials, including artificial leather; a high rate of electrification; the further development of the oil, gas and coal industries; the speeding-up of building schedules and elimination of the dissipation of capital investments over too many building projects; a faster rate of housing construction; the expansion of agricultural production, so as to overtake the U.S.A. in the course of the next few years in *per caput* production of meat, butter and milk; and a considerable expansion in the production of other consumer goods."

Pravda reported during the second half of June that, under the recent scheme for the reorganization of economic management and control adopted by the Supreme Soviet, 105 economic administrative areas had been formed and a corresponding number of economic councils had already been or would be set up, including 70 in the Russian Soviet Republic, 11 in the Ukraine, nine in Kazakhstan, four in Uzbekistan, and one each in the other eleven Union Republics.—(Soviet Embassy Press Department, London)

(Prev. rep. 15575 A; 15299 A.)

C. HUNGARY. — Credit from Czechoslovakia.

A long-term credit agreement between Hungary and Czechoslovakia was signed in Budapest on July 19. It provided for a Czechoslovak credit to Hungary amounting to 160,000,000 roubles at 2 per cent interest, which would be repaid between 1960 and 1967. The Hungarian Communist organ *Népszabadság* stated that Czechoslovakia had already made certain deliveries on account of this credit by supplying coke, coal, chemical raw materials, textiles, and consumer goods.

(Neue Zürcher Zeitung)

D. FRANCE - POLAND. — Agreement on Exchange of Scientists.

A Franco-Polish agreement was signed in Warsaw on Oct. 24 providing for the exchange of scientists between the Polish Academy of Sciences and the *Centre National de la Recherche Scientifique Français*. The agreement will come into effect at the beginning of the academic year 1957-58.—(Le Monde, Paris)

(Prev. rep. 15668 B.)

A. SHIPPING. — World Construction Figures, Third Quarter of 1957. - Large Contract for Super-Tankers.

Lloyd's Register summary of merchant shipbuilding for the third quarter of 1957, published on Oct. 23, gave the gross tonnage of vessels under construction throughout the world (excluding the U.S.S.R. and China, as well as all vessels under 100 tons, barges, etc.), as 9,350,553, of which 23.96 per cent was building in the United Kingdom and 86.04 per cent elsewhere.

Ships building in Great Britain and Northern Ireland numbered 339 of 2,240,731 gross tons (steamers 1,085,421 tons, motorships 1,115,310 tons), including 3 steamers of over 30,000 tons, 6 steamers of 25,000-30,000 tons, 16 steamers and 1 motorship of 20,000-25,000 tons, and 5 steamers and 1 motorship of 15,000-20,000 tons. Of the total, 276 ships (1,858,123 tons) were building for Great Britain and N. Ireland, 18 (41,726 tons) for other British Commonwealth countries, 11 (117,800 tons) for Norway, 8 (82,207 tons) for Liberia, 3 (25,800 tons) for Belgium, 2 (18,220 tons) for the Irish Republic, 1 (17,900 tons) for Panama, 2 (17,700 tons) for Greece, 4 (10,000 tons) for Cuba, 7 (4,795 tons) for the U.S.S.R., 2 small vessels for Poland and 1 for Iraq, and 4 (45,100 tons) for unspecified countries. Principal shipbuilding centres were: the Clyde (104 ships of 651,162 tons), the Tyne (40 ships of 401,420 tons), Belfast (19 ships of 291,339 tons), the Tees (23 ships of 203,333 tons), Sunderland (27 ships of 199,249 tons), Liverpool (15 ships of 161,340 tons) and Barrow (4 ships of 108,770 tons).

Ships building abroad numbered 1,398 of 7,109,822 tons (steamers 2,990,064 tons, motorships 4,119,758 tons), divided as follows: Japan 209 (1,480,255 tons), Italy 109 (881,202 tons), Germany 234 (827,220 tons), Netherlands 175 (606,165 tons), U.S.A. 39 (601,178 tons), France 66 (521,306 tons), Sweden 65 (490,949 tons), Norway 86 (322, 473 tons), Spain 92 (237,069 tons), Finland 77 (226,172 tons), Poland 71 (199,937 tons), British Commonwealth countries 58 (183,908 tons), Denmark 30 (178,538 tons), Belgium 18 (155,320 tons), Yugoslavia 27 (138,906 tons), Portugal 26 (43,319 tons), Turkey 9 (7,021 tons), Peru 1 (4,297 tons), 2 each in Indonesia and the Irish Republic and 1 each in Brazil and Argentina. The total included 2 steamers of over 30,000 tons in Italy, 2 in Japan, and 1 each in France, the Netherlands, and the U.S.A.; and 9 steamers of 25,000-30,000 tons in Japan, 4 in the U.S.A., 2 in France, and 1 each in the Netherlands and Sweden.

Tankers building throughout the world numbered 329 of 4,448,626 tons, including 75 (1,004,708 tons) in the U.K., 54 (824,815 tons) in Japan, 30 (485,776 tons) in Italy, 22 (481,486 tons) in the U.S.A., 16 (323,892 tons) in France, 19 (293,615 tons) in Sweden, 20 (254,680 tons) in the Netherlands, 17 (196,069 tons) in Norway, and 34 (175,288 tons) in Germany.

Tankers building in British and foreign shipyards on Sept. 30 represented 44.8 per cent and 48.4 per cent respectively of all tonnage under construction.

Japan, the world's leading shipbuilding country in 1956, launched vessels totalling 1,725,000 tons gross during the first nine months of 1957 (compared with the United Kingdom's 953,000 tons and Germany's 872,000 tons), thus retaining her lead.

Notable tankers launched during recent months included the *Rein* (39,000 tons deadweight), launched on Aug. 9 by the *Nederlandse Dok en Scheepsbouw Mij.*, Amsterdam, for the *Tankrederi Skibs A-S Polar Front*, Tromsö (Norway); and the *Esso Windsor* (36,040 tons deadweight), launched on Oct. 12 by the *Cantieri Riuniti dell Adriatico*, Monfalcone (Italy), for the Esso Transportation Company, London.

It was announced on Oct. 1 that Mr. Daniel K. Ludwig, head of National Bulk Carriers Inc., of New York, had placed an order for five tankers, each of 104,500 tons deadweight, to be built at the company's shipyard at Kure, Japan. The order was described as "the largest single shipbuilding contract in maritime history."—(Lloyd's Register of Shipping, London)

(Prev. rep. 15704 A.)

B. BRAZIL. — Creation of State Railway Company.

The *Rêde Ferroviária Federal S.A.*, a joint-stock company incorporating all the railways owned or administered by the Brazilian Federal Government, was inaugurated on Sept. 30. The company, whose formation had been proposed in 1952 by the late President Vargas in an attempt to rehabilitate Brazil's railway system, has a capital of 60,450,000,000 cruzeiros, making it by far the biggest single company in Brazil.

The 18 railway systems incorporated in the new company have a total milcage of 24,641 kilometres (15,400 miles). All employees of the incorporated railways were transferred to the new company as from Oct. 1.—(Bank of London and South America, Fortnightly Review) **(Prev. rep. Railways, 11871 B; 11179 D; 10859 B; 10263 C; 9491 D; 8149 C)**

C. CEYLON - YUGOSLAVIA.—Diplomatic Relations.

It was announced during October that Ceylon and Yugoslavia had agreed to establish diplomatic relations at Legation level.—(Ceylon Government Information Department)

(Prev. rep. 15761 C.)

D. UNITED STATES. — The Jamestown Festival.

The 350th anniversary of the landing of the first British settlers in North America was commemorated by a festival which opened on April 1 at Jamestown (Virginia)—the site of the first settlement—and will continue until Nov. 30. The celebrations centred on the Jamestown Festival Park, which was specially built for the occasion by the Federal and State authorities at a cost of $1,500,000. A British mission headed by Lord Hailsham (then Minister of Education) participated in the opening ceremony.

The Jamestown Festival Park is built on a 35-acre site a few miles from the town of Jamestown, capital of the British Colony of Virginia from 1624 to 1699. The exhibits include a replica of Fort James, the triangular wooden stockade built round the settlement by the first settlers; a reconstruction of the "Glasse House," America's first factory (a glassworks built by the settlers in 1608); and models of the three wooden ships—the *Discovery*, *Godspeed* and *Susan Constant*—which brought the first British settlers to America. A major feature of the Festival Park is the British Pavilion, which deals with the background of the colonization of America and the influence of the British legacy on American life and civilization. Built by the British Government (which was specially invited to take part in the Festival) at a cost of £80,000, its exhibits include a copy of Magna Carta; tableaux and actual relics illustrating the parts which Elizabeth I and her sea captains played in achieving control of the seas; and displays symbolizing the British background of the early settlers in America and their heritages of religion, law, government, learning and liberty.

In addition to Jamestown, two other historic American cities played a special part in the celebrations—Williamsburg, which succeeded Jamestown as the capital of Virginia Colony after 1699, and Yorktown, where American independence was assured by Washington's victory over Cornwallis in 1781. The Jamestown Festival Park will be maintained permanently by the State of Virginia after the festival ends.

An international naval review, the largest ever held in U.S. waters, took place from June 8-17 at Hampton Roads, Virginia, in connexion with the Jamestown celebrations. It comprised 115 warships (82 American and 33 foreign) from 18 countries, drawn up in two 14-mile-long columns and consisting of naval vessels of all types.

Units of the U.S. Fleet taking part included the battleships *Iowa* and *Wisconsin*, the new 70,000-ton aircraft carrier *Saratoga*, the guided missile cruisers *Boston* and *Canberra*, and the atomic submarine *Seawolf*, the second of her kind. Foreign naval vessels participating included the British aircraft carrier *Ark Royal*, the French carrier *Bois-Belleau* and cruiser *De Grasse*, the Italian cruisers *San Giorgio* and *San Marco*, and the Netherlands cruiser *Zeven Provincien*. Other foreign navies represented were those of Belgium, Canada, Colombia, Cuba, Denmark, the Dominican Republic, Norway, Peru, Portugal, Spain, Turkey, Uruguay and Venezuela.

The first settlers—105 in number, led by Captain John Smith—landed in Virginia on May 13, 1607, from the *Discovery*, *Godspeed* and *Susan Constant* after a five-months' voyage from Blackwall (London). Their settlement of Jamestown was named in honour of King James I, who had given Captain Smith a charter to establish a settlement in Virginia. On May 13, 1957, three U.S. *Sabre* jet fighters, named after Captain Smith's three vessels and taking the same route, made a commemoration flight from London Airport to Jamestown in 7 hours 33 minutes.—(New York Times - New York Herald Tribune - U.S. Information Service)

E. BAGHDAD PACT. — Examination of Possibility of creating Free Trade Area.

A Baghdad Pact working party, meeting in London from Sept. 16-24, unanimously approved a report recommending that the study of either a Customs union or a common market in the pact area should not be proceeded with at present, but that the possibility of setting up a Free Trade Area in the pact region should receive further consideration. The report set out the most important issues requiring further study, collectively as well as at national level, in the light of the experience gained in Europe in connexion with the proposed Common Market and Free Trade Area projects.

The working party, consisting of delegates from Iraq, Pakistan, Persia, Turkey, the U.K., and the U.S.A., had been set up by the Baghdad Pact Economic Committee after its meeting in Karachi last May.—(Financial Times)

(Prev. rep. 15617 A.)

F. FRANCE. — New Inspector-General of Air Force.

Air General Max Gelée was appointed Inspector-General of the French Air Force under a decree published on Aug. 28. General Gelée was formerly Chief of Staff at the NATO headquarters of the C.-in-C., Allied Forces, Central Europe. (Le Monde, Paris) **(Prev. rep. 14309 D.)**

A. CANADA - UNITED STATES. — State Visits of Queen Elizabeth II and the Duke of Edinburgh.

Her Majesty Queen Elizabeth II and the Duke of Edinburgh paid a State visit to Canada from Oct. 12-16, followed by a State visit to the United States from Oct. 16-21. It had previously been announced in June that her Majesty and the Duke had accepted invitations from the Canadian Government and from President Eisenhower to visit Canada and the United States during October.

State Visit to Canada.

The Queen and Prince Philip arrived on Oct. 12 at Uplands Airport (near Ottawa), where they were welcomed by the Governor-General of Canada (Mr. Vincent Massey), the Canadian Prime Minister (Mr. Diefenbaker) and some 20,000 people. They drove along a 10-mile route lined by cheering crowds to Government House (Rideau Hall), where the Queen and Prince Philip attended a reception given by press correspondents covering the royal tour. On the following day (Sunday, Oct. 13) the Queen and the Duke of Edinburgh laid wreaths at the National War Memorial in Confederation Square, and later attended Divine Service at Christ Church Cathedral. In the evening the Queen made a nation-wide radio and television broadcast in which she expressed her pleasure at returning to Canada after an absence of six years.

After referring to her visit to Canada in 1951, before her accession (see 11886 A), the Queen expressed her pleasure that she would be opening the Canadian Parliament in person on the following day [see below], and her regret that her present visit was a short one. She hoped, however, "to pay more visits in the future" and to be present at the opening of the St. Lawrence Waterway in 1959. Referring to her forthcoming visit to the U.S.A., she stressed that she would be going "as the head of the Canadian nation to pay a State visit to the head of our great neighbouring country." In the course of her broadcast the Queen spoke of the great industrial and economic progress made by Canada since her last visit in 1951, and expressed her pride and happiness at being "the Queen of such a nation." Her Majesty added: "In this wonderful land of yours, men and women of various racial origins live and work together on terms of equality. That is a splendid lesson for everyone. As Queen of Canada I am proud of it . . ."

In the morning of Oct. 14 her Majesty presided at a special meeting of the Privy Council of Canada, at which the Duke of Edinburgh was sworn in as a member. [The only other living non-Canadian members are Sir Winston Churchill, the Duke of Windsor, and Field-Marshal Earl Alexander of Tunis]. Later the Queen held a reception at Government House for the heads of Commonwealth and foreign diplomatic missions in Ottawa, while Prince Philip received the president of the Royal Society of Canada (Dr. Cameron) and was presented with a diploma making him an honorary member of the society.

During the afternoon the Queen drove in state from Government House to open the Canadian Parliament—the first time in Canadian history that a reigning sovereign had done so. At a joint session of the Senate and the House of Commons, her Majesty—speaking in both English and French—read the Speech from the Throne containing the legislative programme of Mr. Diefenbaker's new Conservative Government. In the evening the Queen and Prince Philip attended a State dinner given by Mr. Diefenbaker at which the guests included all members of the Cabinet, leaders of all the political parties, the Lieutenant-Governors of the provinces, and all provincial Premiers.

At the end of her speech to the Canadian Parliament her Majesty recalled the words spoken 300 years earlier by Queen Elizabeth I to her last Parliament: "Though God hath raised me high, yet this I count the glory of my Crown—that I have reigned with your loves." Her Majesty added: "Here, in the New World, I say to you that it is my wish that in the years before me I may so reign in Canada and be so remembered."

On Oct. 15 the Queen and Prince Philip visited the French-speaking city of Hull, on the south (Quebec) bank of the Ottawa River opposite the Federal capital. On returning to Ottawa, the Queen inaugurated the beginning of work on the Queensway project which, when completed, will form part of the Trans-Canada highway system within the City of Ottawa; it involves the removal of certain railway lines and marshalling yards and their replacement by a four-lane highway, spacious boulevards, and over-passes. In the afternoon the Duke of Edinburgh made a broadcast from Government House in which he discussed the work and results of his Study Conference on Industrial Relations held at Oxford in 1956 (see 15411 A), with special reference to the human problems of industrial communities within the Commonwealth and Empire. In the evening her Majesty and Prince Philip attended an official reception at the Château Laurier Hotel, and later dined with Mr. Diefenbaker at his home. At the Château Laurier a number of Indian chiefs were presented to her Majesty, including the heads of the Algonquin, Iroquois, Cree, Micmac and other tribes.

Before leaving Ottawa for the United States in the morning of Oct. 16, the Queen and Prince Philip visited Lansdowne Park, where 20,000 children were assembled to bid them farewell.

State Visit to United States.

Her Majesty and the Duke of Edinburgh flew from Ottawa to Virginia in a Royal Canadian Air Force plane and were welcomed at Patrick Henry Airport, Newport News, by the Governor of Virginia (Mr. Thomas Stanley) and the British Foreign Secretary (Mr. Selwyn Lloyd). From the airport they drove to Jamestown, where they attended a service in the Old Church (dating from 1639) before visiting the site of the Jamestown Festival celebrations (see 15827 D). They then drove to Williamsburg, the former capital of British America, whose old Colonial character has been restored by the Rockefeller family since 1926 at a cost of £20,000,000. At Williamsburg, where 50,000 people were gathered to greet the royal visitors, her Majesty and the Duke visited many of the historic buildings dating from Colonial days and later paid a visit to the College of William and Mary, the second oldest institution of university status in the U.S.A. after Harvard.

After staying overnight at Williamsburg, the Queen and Prince Philip flew to Washington on Oct. 17 in the presidential plane *Columbine* and were greeted at the airport by President Eisenhower, Mr. Diefenbaker (who had arrived from Ottawa to act as Minister-in-attendance), Mr. Selwyn Lloyd, and the Commonwealth Ambassadors (including Sir Leslie Munro, President of the U.N. General Assembly). From the airport her Majesty and the Duke drove to the White House along a route lined by 2,500 troops and tens of thousands of enthusiastic spectators. After lunching with President and Mrs. Eisenhower the Queen and Prince Philip drove to the Arlington National Cemetery to lay wreaths on the Tomb of the American Unknown Soldier. Later in the day the Queen attended an informal reception given in her honour by the Press corps in Washington, followed by a State banquet given by President and Mrs. Eisenhower at the White House.

In the morning of Oct. 18 the Queen visited the National Gallery of Art and the Washington Children's Hospital, while the Duke of Edinburgh remained at the White House, where he was presented by President Eisenhower with the National Geographic Society's medal for services to geography. Prince Philip later drove to the National Academy of Sciences, where he spent nearly two hours with leading U.S. scientists concerned with the International Geophysical Year. The Queen and the Duke were the guests of Vice-President Nixon at a luncheon given at the Capitol, while in the evening they attended a reception at the British Embassy given by the heads of Commonwealth diplomatic missions, followed by a dinner given by Mr. Dulles at the Pan-American Union.

The National Geographic Society's medal was awarded to Prince Philip in connexion with his 40,000-mile round-the-world tour (see 15411 A) during which he visited many remote and lonely outposts of the Commonwealth. The inscription on the medal referred to the "questing spirit" of Prince Philip which had "taken him to the far corners of the globe and brought to millions a better understanding of our planet and its peoples."

On Oct. 19 the Queen held an investiture at the British Embassy at which she conferred decorations on 27 British and American nationals; among those honoured was Mr. Lewis Douglas, the former U.S. Ambassador in London, who was made an honorary G.B.E. The Queen also laid the foundation-stone of an annexe to the Embassy and attended a party for more than 2,000 Commonwealth children in Washington. In the afternoon the Queen and Prince Philip drove to the University of Maryland Stadium to see an American football game between the Universities of Maryland and North Carolina; on the return journey to Washington they paid an informal visit at short notice to a suburban "super-market," where the Queen talked to many of the staff and shoppers. In the evening the Queen and Prince Philip gave a reception at the British Embassy for President and Mrs. Eisenhower.

On their last day in Washington (Sunday, Oct. 20) the Queen and the Duke of Edinburgh, accompanied by President and Mrs. Eisenhower, attended two church services: first at the Episcopal Cathedral, where they were present at the dedication of a war memorial chapel, and later at the National Presbyterian Church, the President's regular place of worship. In the afternoon her Majesty and Prince Philip were the guests of Mr. and Mrs. Andrew Mellon (son and daughter-in-law of

the late Mr. Andrew Mellon, former Secretary of the Treasury and Ambassador in London), Mrs. Mellon being the only private hostess to entertain the Queen during her visit. In the evening the Queen and Prince Philip were the guests of the Commonwealth heads of mission at a dinner given at the Australian Embassy by Sir Percy Spender, the senior Commonwealth Ambassador in Washington.

The State visit ended on Oct. 21 with a 14-hour visit to New York, where the Queen and Prince Philip were welcomed by Mr. Averell Harriman (Governor of New York State) on their arrival by train from Washington. A spectacular "ticker-tape" procession along Broadway, where the Queen and the Duke were enthusiastically welcomed by vast crowds, was followed by a reception at City Hall given by Mayor Wagner, followed by a lunch at the Waldorf-Astoria Hotel at which her Majesty and Prince Philip were the guests of Mr. Wagner and the civic authorities. In the afternoon the Queen visited the United Nations headquarters, where she was received by Dr. Hammarskjold and Sir Leslie Munro, and addressed the U.N. General Assembly. Later in the day the Queen and the Duke went to the top of the Empire State Building (the highest in the world), followed by a visit to the Waldorf-Astoria Hotel at which her Majesty spoke at a banquet given jointly by the Pilgrims of the United States and the English-Speaking Union. In the evening the Queen and Prince Philip attended a Commonwealth Ball organized by 58 Commonwealth societies in New York.

In her address to the U.N. General Assembly the Queen spoke of the ideals, principles and purposes of the United Nations and of the organization's work for "the preservation of peace between the nations, equality of justice for all before the law, and the right of the peoples of the world to live their lives in freedom and security." Referring in particular to the role of the Commonwealth, her Majesty said:

"Ten Commonwealth countries are represented in this Assembly—countries which form a free association of fully independent States and have widely different histories, culture, and traditions. Common ideals and hopes, not formal bonds, unite the members of the Commonwealth and promote that association between them which, in my belief, has contributed significantly to the cause of human freedom. The countries of the Commonwealth regard their continuing association with one another and joint service to their high ideals as an essential contribution to world peace and justice. They add, and will continue to add, to the United Nations a tried element of strength and of accumulated experience"

The Queen and Prince Philip left Idlewild Airport at midnight on Oct. 21, arriving at London Airport the following morning. Before leaving the United States the Queen sent a message to President Eisenhower conveying the "heartfelt thanks" of Prince Philip and herself for the great welcome that had been extended to them in Virginia, Washington and New York. The Queen received a personal message from President Eisenhower before her departure, the contents of which were not divulged.—(Montreal Star - Department of External Affairs, Ottawa - New York Times - New York Herald Tribune - U.S. Information Service - U.N. Information Centre, London) **(Prev. rep. State Visits to France, 15523 A; Denmark, 15596 C; Portugal, 15416 E.)**

A. PERSIA - IRAQ.—Pledge of Support for Baghdad Pact. - King Faisal's Visit to Teheran.

A joint statement was issued in Teheran on Oct. 28, at the end of a 12-day State visit by King Faisal of Iraq, in which King Faisal and the Shah pledged their full support for the Baghdad Pact as "the most practicable instrument to maintain understanding and secure peace and order in the region." The two rulers also stressed the importance of raising living standards in the region by implementing "joint economic projects" within the framework of the pact. The official statement emphasized "the importance of non-interference by foreign powers in the internal affairs of the Middle Eastern countries."—(Times - Daily Telegraph - Le Monde, Paris) **(Prev. rep. Baghdad Pact, 15617 A.)**

B. ISRAEL. — Re-election of President Ben-Zvi.

Presidnet Ben-Zvi of Israel was re-elected for a second five-year presidential term by the *Knesset* on Oct. 28, receiving 76 votes out of the 94 members present. His re-election was supported by the Government parties and the General Zionists, while the Nationalists (*Heruth*), the Communists, and the orthodox *Agudath Israel* group abstained. A *Heruth* candidate withdrew his nomination before the election and President Ben-Zvi was not opposed. The President (who is 73) was sworn in for a second term of office on Oct. 30.
(Government Press Office, Jerusalem) **(Prev. rep. 12665 A.)**

C. AUSTRALIA - UNITED KINGDOM. — Agreement on Exchange of Air Routes.

An agreement was signed in London on Oct. 4, after talks between representatives of the U.K. and Australian Governments, laying the foundations of a new world-wide system of air routes to be operated by BOAC and Qantas Empire Airways.

New routes between the U.K. and Australia agreed upon included (i) a route across the Atlantic, North America, and the Pacific (the "Southern Cross" route); (ii) routes across the Atlantic, North and Central America, and the Pacific, including a Polar route; and (iii) an Atlantic route *via* South America and the Southern Pacific.

The existing "Kangaroo" route from London to Australia *via* the Middle East (on which sharing of traffic has been in operation for some time) was confirmed, and agreement was reached on the establishment of a new U.K.-Australia route to include the Antarctic. Other routes agreed upon were for a U.K.-Australian service *via* Africa and across the Indian Ocean, and for a service between Australia and Hong Kong.

It was also agreed that U.K airlines would be able to use new stopping-points in Australia, including Perth, Melbourne, and Brisbane. As a result, British "picking-up" points in Australia will become more numerous than those of Pan-American Airways and Trans-World Airways. Moreover, the British and Australian airlines will also enjoy an advantage in the use of the whole route from Australia *via* New York to London, since Pan-American has no rights between San Francisco and New York and Trans-World Airlines has no route from San Francisco to Australia.

An official statement was issued in London on Oct. 4 saying that it had been "agreed that the trends in world civil air transport strengthen the community of interests shared by the two countries and, in particular, underlines the importance of maintaining air communications between them on a scale proportionate to the rapid growth in air travel and in the increasing development of new world air routes."
(Times - Australian News and Information Bureau) **(Prev. rep. 15634 A.)**

D. MIDDLE EAST. — Mr. Menzies' Six-Point Plan for Settlement of Middle Eastern Problems.

In a speech to the annual meeting of the Australian Liberal Party on Oct. 21, the Prime Minister (Mr. Menzies) urged that a new attempt should be made to "break the vicious circle" in the Middle East, and called on the United Nations to "promote urgently discussions on a high level designed to discover the practicability of a new and guaranteed international agreement aimed at removing the root causes of tension" in the area. Mr. Menzies suggested the following six points as a basis for a Middle East settlement:

"(1) A final and guaranteed settlement of the Arab-Israel borders.

"(2) A settlement of the refugee problem.

"(3) Economic aid without military strings, afforded by genuine international co-operation, to Middle East nations who need it.

"(4) Peaceful trade, good for both buyer and seller, should be encouraged.

"(5) Civil and economic aspects of the Baghdad Pact should be recognized and extended.

"(6) The great problem of oil supplies should be looked at in terms of co-operation and international guarantee and not merely in terms of international competition."

Mr. Menzies also proposed the setting-up of an international advisory body or commission to advise the Middle East countries on their financial and economic problems and to "make recommendations to other nations, particularly the great ones, for constructive advice and assistance."

Mr. Menzies subsequently told the House of Representatives that the proposals represented Australian Government policy. The Leader of the Opposition, Dr. Evatt, described them as "positive and of great interest."—(Australian News and Information Bureau) **(Prev. rep. Middle East, 15811 A; Mr. Menzies on M.E. Crisis, 15201 A, page 15208)**

E. BAHAMAS. — Establishment of Joint Anglo-American Naval Research Stations.

An Anglo-American agreement to set up joint naval research stations in the Bahamas to obtain data useful in meeting any submarine threat was signed in Washington on Nov. 1 by Sir Harold Caccia, the British Ambassador, and Mr. Murphy, Deputy Under-Secretary of State. American officials said that during the Second World War allied navies often found themselves at a severe disadvantage in dealing with enemy submarines because of lack of information about water conditions in the Atlantic and Caribbean. For logistic and administrative reasons, it had been agreed that the joint shore stations would be manned and supported by the U.S. Navy.—(Times) **(Prev. rep. 14964 B.)**

A. INTERNATIONAL BANK. — Loans and Bond Issues. - Borrowing from Western Germany.

The following loans were announced by the World Bank during the period August-October :

Austria. 15,000,000 DM on Oct. 5 to the *Vorarlberger Illwerke* (a publicly-owned electricity company) towards the completion of a 190,000-kw. hydro-electric project near the Lünersee, in Western Austria. Most of the power will be exported to the Ruhr and South-West Germany, and the remainder consumed in the Austrian provinces of Vorarlberg and Tirol. The *Dresdner Bank* of Frankfurt participated to the extent of 1,960,000 DM.—the first West German commercial bank to participate in a World Bank loan. Terms : 22 years, 5¾ per cent interest, including one per cent commission ; repayment to begin May 1, 1960.

The loan, guaranteed by the Austrian Government, was the first World Bank loan in Deutschemarks, and the second for the Lünersee project. The first, for the equivalent of $10,000,000 was made in June 1955.

Belgium. $10,000,000 on Sept. 10 to the Belgian Government, concurrently with a loan of $30,000,000 issued for public subscription by two New York Banks (Morgan Stanley & Co. and Smith, Barney & Co.) to finance part of the capital expenditure authorized for public works in the 1957 extraordinary budget. The funds from the World Bank will assist in financing improvements to the Charleroi-Clabecq Canal.

Terms of the World Bank loan : 15 years ; 5¾ per cent interest, including one per cent commission ; repayment in half-yearly instalments between March 1, 1963, and Sept. 1, 1972. Terms of the bond issue (which was fully subscribed) : 15 years ; 5¼ per cent interest ; repayable in 1972. The bonds were issued at 97½ per cent.

In December 1954 the World Bank had made a loan of $20,000,000 to Belgium, and a commercial loan of $30,000,000 was also issued through the same two U.S. banks.

Ecuador. (*a*) $14,500,000 on Sept. 20 to the Government of Ecuador, of which $11,000,000 will be used towards the construction of four key roads and $3,500,000 towards a four-year road maintenance programme. Terms : 20 years ; 5¾ per cent interest, including one per cent commission ; repayment as from March 15, 1962. [A loan of $8,500,000 had previously been made by the World Bank for road improvements in 1954.]

(*b*) $5,000,000 on Oct. 1 to the *Empresa Electrica*, Quito, for the expansion of electric power supplies to Quito and its suburban area. Terms : 20 years ; 5¾ per cent interest, including one per cent commission ; repayment as from Feb. 1, 1962.. Guaranteed by the Ecuadorean Government. [This was the second World Bank loan to the *Empresa Electrica*, following one of $5,000,000 in 1956.]

Japan. The equivalent of $7,000,000 on Aug. 9 to the Aichi Irrigation Public Corporation (a Government agency formed in 1955) for a multi-purpose project for irrigation, water supply, and power in the Aichi region of Central Japan. The First National City Bank of New York participated in the loan to the extent of $721,000. Terms : 20 years ; 5¾ per cent interest, including one per cent commission ; repayment as from Nov. 1, 1961.

This was the eighth World Bank loan to Japan, bringing the total of loans to that country to the equivalent of $83,000,000.

Pakistan. The equivalent of $31,000,000 in various currencies on Oct. 18, for the purchase of goods trucks, sleepers and rails in connexion with the improvement and expansion programme of Pakistan Railways. The Bank of America and the First National City Bank of New York participated to the extent of $850,000. Terms : 15½ years ; 6 per cent interest, including one per cent commission ; repayment in semi-annual instalments as from May 15, 1961.

This was the second World Bank loan for Pakistan Railways (one for the equivalent of $27,200,000 having been made in 1952) and the seventh to Pakistan, bringing the total of loans to that country to the equivalent of $108,250,000.

Siam. The equivalent of $66,000,000 on Sept. 12 to the Yanhee Electricity Authority—an autonomous Government agency which operates the Yanhee power, flood control, and irrigation project in North-East Siam, as well as all large power plants and transmission facilities in Central Siam. Terms : 25 years ; 5¾ per cent interest, including one per cent commission ; repayment to begin Oct. 15, 1963.

The loan, guaranteed by the Siamese Government, was the sixth World Bank loan to Siam, bringing total loans to $106,800,000.

South Africa. The equivalent in various currencies of $25,000,000 on Oct. 1 to the Union Government for the expansion programme of the South African Railways and Harbour Administration. Terms : 10 years, 5¾ per cent interest ; repayment as from April 1, 1960. The World Bank loan was made concurrently with a revolving credit of $20,000,000 by seven U.S. Banks—the Bank of America National Trust and Savings Association, the First National City Bank of New York, the Hanover Bank, the Bankers Trust Company, the Chemical Corn Exchange Bank, the New York Trust Company, and the First National Bank of Chicago—replacing a similar credit of $10,000,000 originally arranged in 1951 and regularly renewed since. Of the new credit, $10,000,000 will also be used for the railway and harbour expansion programme. The World Bank loan was the fourth for this programme, and the sixth made by the Bank to the South African Government, bringing total loans to the Union to $160,200,000.

Second Loan from Western Germany.

It was announced on Sept. 23 that the *Deutsche Bundesbank* (formerly the *Bank Deutscher Länder*) had agreed to lend $75,000,000 to the International Bank against the issue of 4⅜ per cent Notes ; repayment would be made in three equal instalments between Jan. 16, 1959 and Jan. 16, 1961. A previous issue of $100,000,000 4¼ per cent bonds was placed by the World Bank with the then *Bank Deutscher Länder* in July 1957.

Bond Issue.

$75,000,000 4¾ per cent World Bank bonds were issued in the U.S.A. on Oct. 15 through a group of U.S. investment firms and banks. The Bonds, issued at 100 per cent, will be repayable on Nov. 1, 1980, but may be redeemed as from Nov. 1, 1967. This was the Bank's third Bond issue in the U.S.A. during 1957. (International Bank, Washington) **(Prev. rep. 15692 A.)**

B. ISRAEL. — Mr. Ben-Gurion on the Middle East and Syrian Situations.

In a statement to the *Knesset* on Oct. 21, Mr. Ben-Gurion spoke of the present situation in the Middle East, with special reference to the Syrian situation and to the position of Israel.

The Israeli Prime Minister said that the contending forces in the Middle East area " are not so much forces of the area itself as of world blocks of East and West, headed in one case by the United States and in the other by Russia." The arming of the Arab States brought about by this competition between the two great Powers, and " the specifically new situation which has developed in Syria following a similar situation in Egypt, causes us concern but should not lead to unnecessary panic."

Israel, Mr. Ben-Gurion continued, had " lived in two spheres " ever since the foundation of the State nine years ago a regional sphere comprising Israel and her Arab neighbours, and a " greater world sphere " which for historical and geo-political reasons had always attached great importance to the affairs of the area. Until two years ago, when the Czechoslovak-Egyptian arms transaction was concluded, the forces in the smaller area had been directed mainly by internal regional considerations. " Matters between ourselves and our neighbours were calculated then mainly according to our own balance of strength. Since then this limited sphere has lost much of its capacity for independent action. It is now politically and militarily dependent to a far greater degree than it was nine or even two years ago on the principal forces operating in the greater world sphere."

After commenting that the recent strengthening of ties between the Syrian military junta and the U.S.S.R. had at first been accompanied by incessant Soviet press and radio attacks on Israel, Mr. Ben-Gurion continued : " Recently Israel's name has been deleted, although it would be unwise to come to any exaggerated optimistic conclusions. Although the arrows of Syrian and Soviet propaganda are now aimed at Turkey it is not possible to say that Soviet enmity and hatred towards Israel has been weakened, in spite of all our efforts to improve relations with this mighty Power that includes about three million Jews among its peoples."

The transfer of the Middle East crisis from the regional to the world sphere, Mr. Ben-Gurion continued, had been closely connected with the cleavage in the Arab camp a cleavage which was no help to Israel and which, paradoxical though it might seem, actually worsened her position to some extent. This cleavage, he said, derived from two sources—overt or concealed competition between President Nasser and King Saud for the leadership of the Arab world, and internal rivalries which were the direct result of contention between the world Powers seeking to expand their influence in the region.

Mr. Ben-Gurion added : " The Arabs have exploited the world situation to get more and more arms, so that Soviet weapons are reaching Egypt, Syria, and Yemen while American weapons are going to Jordan, Saudi Arabia and Iraq. All these Arab States have been plotting to destroy Israel and have publicly proclaimed their intention to do so. Egypt, Syria, and Yemen have no intention of using their Soviet arms against the United States, while Jordan, Saudi Arabia, and Iraq do not intend to use their American and British arms against the Soviet Union. In all these countries armaments are intended to be used solely against Israel."

The Prime Minister emphasized that the present tension in the Middle East would not lead to any change in the fundamental policy of Israel, which remained " a democratic nation respecting the rights and freedom of men."—(Times)

C. INDIA. — Export Risks Insurance Corporation.

The Export Risks Insurance Corporation, a new organization in the public sector, was inaugurated in Bombay on Oct. 10 by the Union Minister of Commerce and Industry, Mr. Morarji Desai. The corporation, all shares in which are held by the Central Government, will give protection to exporters against the risks involved in export on credit terms, and help Indian exporters to transact their business on conditions similar to those offered by foreign competitors. Its functions include coverage of political and commercial risks.

(The Statesman, Calcutta)

A. SOVIET UNION - WESTERN EUROPE. — M. Khrushchev's Letters to West European Socialist and Labour Parties. - Request for Support of Soviet Attitude in Syrian-Turkish Crisis. - Rejection of M. Khrushchev's Letter. - British Labour Party refuses Discussions with Soviet Communist Party.

Letters were sent by M. Khrushchev on Oct. 12 to the Labour and Socialist parties of Great Britain, France, the German Federal Republic, Italy, Belgium, the Netherlands, Denmark and Norway speaking of a "barely disguised threat of war in the Middle East," and urging those parties to "do everything necessary to prevent aggression and preserve peace" in the area. The letters referred to a Turkish and U.S. "conspiracy" against Syria, and reiterated the allegations against Turkey and the United States previously made by Marshal Bulganin in his letter to the Turkish Prime Minister, by M. Khrushchev in his interview to Mr. James Reston of the *New York Times*, and by M. Gromyko at the United Nations (see 15811 A).

The letters, sent by M. Khrushchev on behalf of the Soviet Communist Party, were not phrased in identical terms but were worded to suit the special circumstances of the recipient countries and parties. All of them, however, contained similar denunciations of Turkey and the United States, coupled with frequent references to the alleged "designs" of those countries against Syria. The letter to the British Labour Party (but not to the other Labour and Socialist parties) suggested "the possibility of a meeting between our two parties [i.e. the Labour Party and the Soviet Communist Party] to consider any constructive proposals you may make concerning possible ways of removing the threat of war in the Middle East and preserving peace throughout the wrold."

In the case of Italy M. Khrushchev wrote to Signor Nenni, the leader of the (left-wing) Italian Socialist Party, and not to Signor Saragat, leader of the Italian Social Democratic Party. Whereas the Labour and Socialist parties of Great Britain, France, Western Germany, Belgium, the Netherlands, Denmark and Norway are members of the Socialist International, Italy is represented in that organization by the "Saragat" Socialists and not by the "Nenni" Socialists.

Extracts are given below from M. Khrushchev's letter to the British Labour Party :

After referring to the "extremely grave and dangerous situation now prevailing in the Middle East, particularly around Syria," and asserting that "the peaceloving and democratic State of Syria is faced with the grave threat of a military attack," M. Khrushchev continued : "Foreign troops are being concentrated on the Syrian frontiers. Warships of the U.S. Sixth Fleet are being assembled off the coast of Syria. U.S. officials and military leaders are making warlike statements against Syria, full of provocative fabrications and threats. Similar statements are being made by certain Turkish statesmen who cherish the idea of restoring Turkey's former domination over the Arab nations. Reactionary Syrian émigrés who hope to play the part of a puppet 'Syrian government,' backed by the bayonets of foreign invaders, have gathered in Istanbul under the protection of the Turkish authorities . . . Thus a politically unstable and dangerous situation has developed in the Middle East. There exists a barely disguised threat of war . . .

"The main reason for this dangerous worsening of the situation in the Middle East is the boundless greed of the big oil monopolies, and above all the oil monopolies of the U.S.A., who desire to secure unlimited domination over the Middle East area. The present democratic Government of Syria does not suit them because it is pursuing an independent national policy and does not wish to adhere to the aggressive Baghdad bloc and the colonialist Eisenhower doctrine . . . The oil pipelines of foreign companies run through Syria, and on these grounds . . . the monopolists want . . . to set up a government there which would slavishly carry out their orders . . . After Syria, the organizers of the plot are planning to make short work of Egypt and then, one by one, of the other Arab States which have won their independence since the war . . ."

After denying the existence of any "Communist threat" in the Middle East, M. Khrushchev went on : "In striving to establish American domination over Syria, Egypt, and other countries, the overseas colonizers calculate later on to enslave other peoples of Asia and Africa who have won political independence and freedom. They do not shrink even when confronted by the fact that through their provocative actions they are bringing the peoples to the brink of a new and devastating war. The fate of Syria thus becomes a problem which affects the destinies of all peaceloving peoples, and the budding armed conflict around Syria is fraught with the danger of developing into a wide conflagration. It is well known that both World Wars started from military actions of a local character. But in our days, in an age of rapidly developing military techniques and nuclear weapons, it is more difficult to set limits to an armed conflict, should it start in any particular area.

"Great responsibility for the preservation of peace in the Middle East rests with Britain and the British people, together with other Powers. The approval given by British ruling circles to the policy of the U.S.A. and Turkey results in a real danger of Britain becoming involved in a military conflict . . . One cannot ignore the fact that Britain is a member of the North Atlantic bloc, and a military gamble by Turkey and the U.S.A. against Syria would in effect predetermine Britain's participation in it. Any extension of the conflict around Syria may plunge Britain into a new and devastating war, with all its terrible consequences for the population of the British Isles. We are firmly convinced that the British people are not interested in the selfish aims which the imperialist forces are pursuing in the Middle East in fomenting a conflict against Syria . . .

"The events of the autumn of last year, when they were thrown into a military gamble against Egypt, are undoubtedly still fresh in the memories of the British people . . . Britain suffered a tremendous material, moral and political setback. The economic position of the British working people has worsened. Britain is being unceremoniously pushed out of a number of important positions by stronger competitors. There is no doubt that a new armed conflict in the Middle East would disorganize Britain's supplies of oil and other raw materials and would make more difficult her trade relations, both with the countries of the Middle East and with South-East Asia. All this would create difficulties for British industry and would have its effect on employment. Moreover, all this would lead to a further increase in Britain's financial, economic, and consequently political, dependence on the United States.

"Only a gambler can ignore the fact that Syria would not be alone in her struggle against aggression. The Egyptian Government has declared its unlimited support for Syria in the event of aggression against her. A number of other Arab States have also come out in support of independent Syria. On the side of Syria stand the peaceloving peoples of other countries, and in particular the peoples of the Soviet Union, which cannot be indifferent to military provocations being prepared in direct proximity to the southern frontiers of the U.S.S.R."

After an assurance that the Soviet Union "has no special economic or other interests in the Middle East," M. Khrushchev continued : "We know that when the Labour Party took resolute action to stop aggression against Egypt in October and November of last year, it proved to be of great service to the cause of peace. We also know that some leaders of the Labour Party have spoken in favour of solving all outstanding problems of the Middle East by peaceful means. We hope that the plans for organizing military intervention against Syria . . . will be condemned by the British Labour Party. . . . The situation has now become so dangerous that it admits of no complacency or delay. The criminal activities of the warmongers must be exposed and their plans frustrated.

"Being aware of the great sense of responsibility felt by the Labour Party for the fate of the British people, and of the great influence they have on the public and in the representative bodies of Great Britain, the Central Committee of the Communist Party of the U.S.S.R. appeals to the British Labour Party to do everything necessary to prevent aggression and preserve peace in the Middle East . . . To achieve this aim, a declaration by Britain, the U.S.S.R., the United States and France on the condemnation of the use of force as a means of settling outstanding problems in the Middle East, on non-interference in the internal affairs of the countries of that region, and on the reciprocal cessation of arms deliveries to all these countries, would be of great importance.

"We ask the British Labour Party to support this proposal. We are ready, in any form convenient for you, not excluding the possibility of a meeting between representatives of our parties, to consider any constructive proposals you make concerning possible ways of removing the threat of war in the Middle East and preserving peace throughout the world."

Members of the Socialist International, meeting at Strasbourg on Oct. 20, decided against drafting a joint reply to M. Khrushchev on behalf of the West European Labour and Socialist parties. As several parties—e.g. the British Labour Party and the German Social Democrats—had already acknowledged M. Khrushchev's letter, it was agreed that the various parties should send their own individual replies.

British Labour Party's Rejection of M. Khrushchev's Approach. - Reply to Khrushchev Letter.

In view of the constitutional implications of M. Khrushchev's letter (i.e. because it had been addressed to the Leader of the Opposition on a question concerning the international situation, and not to the Government) Mr. Hugh Gaitskell and Mr. Aneurin Bevan called on the Prime Minister on Oct. 15, at their own request, to acquaint Mr. Macmillan with its contents. Mr. Bevan, as the Labour Party's principal spokesman on foreign affairs, also saw Mr. Ormsby-Gore, Minister of State at the Foreign Office.

After consultation with the Leader and Deputy Leader of the Labour Party (Mr. Gaitskell and Mr. Griffiths), the party chairman (Mr. Tom Driberg), and the party treasurer (Mr. Bevan), the following interim reply was sent to M. Khrushchev on Oct. 15 by Mr. Morgan Phillips, secretary of the Labour Party :

"We are not in a position to form a judgment on the specific allegations contained in your memorandum. We note that these have been denied in other quarters. Nevertheless if, in the view of the Soviet Government, the situation has become so grave as to constitute an imminent threat to peace, then the attention of the

U.N. Security Council should be called to it immediately in accordance with the provisions of the U.N. Charter." The reply added that the communication, "and the channels through which it reached us," raised constitutional issues which would be considered by the National Executive Committee of the Labour Party.

The Labour Party's reply to M. Khrushchev, issued on Oct. 23 after a meeting of the National Executive Committee, pointed out that an opposition party did not enter into negotiations with foreign Governments; that the Labour Party was "not prepared to enter into joint activities with any Communist party"; and that the Syrian-Turkish question had already been referred to the United Nations. It was worded as follows:

"Under the British Constitution a party which is in opposition, as the Labour Party is at present, does not enter into direct negotiation with the Governments of other States on matters affecting Britain's official relations and commitments in the international sphere. Decisions on all such matters belong, constitutionally, to the Government of the day. Even though your memorandum is in a formal sense sent by the Soviet Communist Party, it reached us through the Soviet Embassy in London, and, in view of the constitutional position in the Soviet Union, we feel bound to regard it as in fact coming from the Soviet Government.

"Your suggestions for possible meetings between representatives of the Russian Communist Party and the British Labour Party cannot be accepted since the Labour Party, for reasons which have been made plain on many occasions, is not prepared to undertake joint activities with any Communist Party.

"As regards the content of your memorandum, the executive committee notes that the Turkish-Syrian question is being considered by the United Nations, to whom . . . it was obviously right to refer it. We believe it should now be left in their hands. The Labour Party's point of view on the general problems of the Middle East has been repeatedly explained in statements made in Parliament and elsewhere.

"The Labour Party will continue to do everything in its power to bring about a settlement of international problems and to secure lasting world peace."

Replies of Continental Parties.

The French, German, Belgian, Netherlands, Danish and Norwegian Labour parties all rejected M. Khrushchev's letter or intimated their intention of doing so. Signor Nenni, however, sent a letter to M. Khrushchev stating that he agreed with the latter's views on the situation in Syria, and recalling that the Italian Socialist Party had previously denounced the "**Eisenhower doctrine**" **in the Middle East.**

France. The secretary-general of the French Socialist Party (M. Pierre Commin) stated on Oct. 17 that M. Khrushchev's letter "contains no basis for discussion." No further statement was issued pending a meeting of the party's executive committee.

Western Germany. After seeing the Federal Foreign Minister (Dr. Brentano), an interim reply was sent to M. Khrushchev by Herr Ollenhauer (leader of the German Social Democratic Party) stating that the Syrian situation should be brought before the U.N. if it took a turn for the worse. Herr Ollenhauer added that his party would send a further message to M. Khrushchev "in an appropriate form after the necessary consultations."

Belgium. The Belgian Socialist Party sent a reply to M. Khrushchev on Oct. 19 rejecting his allegations *in toto*, and declaring that the party "does not intend to be the agent of Soviet or any other foreign propaganda." It condemned Russia's "partisan manoeuvres, blackmail, and recourse to the veto" at the United Nations; denounced the "massive consignments of Soviet arms" which had been sent to Syria and Egypt; and said that world confidence in the U.N. had been shaken by the "senseless abuse" to which it had been subjected by the Soviet Union and some other nations. After recalling that the Soviet Communist Party had "passed over in silence the repeated interventions of the U.S.S.R. in this same part of the world," the letter added: "Present circumstances give the Soviet Union a unique opportunity to change its policy and to give the world the first real chance to embark on the road to a true organization of peace based on respect for international law . . ."

Netherlands. The Netherlands Labour Party replied to M. Khrushchev in one sentence: "In view of our conviction that it is you who, with your system of government and domination, are threatening the peace, there is no basis for discussion between you and us."

Denmark. The Danish Social Democratic Party informed M. Khrushchev (Oct. 12) that it would confine itself to observing that it was opposed to aggression in all its forms, whether it was "the aggression by North Korea, the Suez action, or the Soviet intervention in Hungary." As regards the Middle East, it was the duty of the United Nations to bring about a settlement in that area and to "seek to avoid any possibility of bellicose complications."

Norway. The Norwegian Labour Party sent an interim reply to M. Khrushchev on Oct. 12 stating that the matters contained in his letter related to the international situation; that the letter had accordingly been sent to the Foreign Ministry and to the Foreign Affairs Committee of the Storting; and that all Norwegian democratic parties were united behind the Norwegian Government's foreign policy.

Mr. Haakon Lie, chairman of the Norwegian Labour Party, flew to London on Oct. 13 to see Mr. Gaitskell and other British Labour leaders in connexion with M. Khrushchev's letter.

At its meeting in Zürich in 1956 (see 14843 A) the Socialist International had unanimously adopted a resolution rejecting any form of political co-operation between Social Democratic and Communist parties. – (Soviet Embassy Press Dept., London - Times - Manchester Guardian - Daily Herald - Le Monde, Paris - Frankfurter Allgemeine Zeitung - Le Peuple, Brussels - Het Vrije Volk, Amsterdam - Socialdemokraten, Copenhagen - Arbeiderbladet, Oslo - Neue Zürcher Zeitung)
(Prev. rep. Middle East, 15811 A.)

A. INDIA - JAPAN. — Mr. Nehru's Visit to Tokio. - Discussions with Mr. Kishi and Mr. Fujiyama.

The Indian Prime Minister, Mr. Nehru, visited Japan from Oct. 4-13, and during his stay in Tokio had extensive talks with the Japanese Prime Minister, Mr. Kishi, and the Foreign Minister, Mr. Fujiyama. He attended a number of official functions, was received in audience by the Emperor Hirohito, and visited Hiroshima as well as the ancient cultural centres of Nara and Kyoto.

A joint communiqué was issued on Oct. 13 at the conclusion of Mr. Nehru's visit and is summarized below under cross-headings:

Indo-Japanese Relations. After referring to the Nehru-Kishi talks in Delhi in May last, the communiqué continued: "The Prime Ministers agreed that there were no difficult problems between the two countries and reaffirmed their desire for increasing understanding and co-operation between Japan and India, which will not only be to their mutual benefit but will contribute to the peace and prosperity of Asia and the world.

"Referring to Japan's recent election to a non-permanent seat on the U.N. Security Council [see 15818 A], Prime Minister Kishi stated that this brought her new and heavy international responsibilities and expressed Japan's determination in that capacity to work ceaselessly for world peace and the realization of the principles and purposes of the U.N. Charter . . ."

Nuclear Weapons and Disarmament. "The two Prime Ministers were convinced that the piling up of arms, especially weapons of mass destruction by the major Powers, spelt grave dangers to the peace of the world, which were further enhanced by the recent invention of space missiles. While comprehensive all-round disarmament is essential, the prohibition of the manufacture and use of nuclear and other weapons of mass destruction is urgent and imperative. The Prime Ministers considered that the suspension of nuclear tests must be a first step toward creating conditions in which the prohibition of the manufacture and use of nuclear weapons, and of disarmament in other fields, might become possible. They recalled in this connexion the unanimous appeal of the Afro-Asian nations at Bandung in 1955 [see 14181 A], and decided to instruct their delegations at the U.N. to co-operate with a view to bringing about suspension of nuclear tests, as well as agreement on disarmament among the Powers concerned."

Economic Co-operation. "The Prime Ministers discussed ways and means of promoting economic co-operation between the two countries, and expressed their desire that the Indo-Japanese trade agreement now under negotiation should be concluded as early as possible. They also recognized that there were many further fields of economic co-operation between Japan and India e.g. long-term arrangements for a stabilized supply of iron-ore from India to Japan, and the financing of India's import of capital goods from Japan—and they agreed that discussions should be held at expert level between the two Governments."

Mr. Kishi had offered Japan's help in establishing technical training centres in India for the purpose of contributing to the development of medium- and small-scale industries. Mr. Nehru had welcomed the offer and it was agreed that details should be discussed between the two Governments at an early date.

In connexion with India's Second Five-Year Plan, the two Prime Ministers agreed in principle on Japanese co-operation by way of a yen credit to finance the supply of capital goods from Japan.

Cultural Relations. The Prime Ministers expressed their determination to take all possible steps under the recently concluded cultural agreement between Japan and India [see 15658 A] to promote and strengthen cultural relations between the two countries. They discussed in particular the possibility of exchanging professors and students; of encouraging mutual visits by scientists, artists, and other persons eminent in the cultural life of the two countries; and of exchanging films.

Mr. Fujiyama stated on Oct. 12 that an Indian trade mission would visit Japan to discuss "concrete economic matters" with the Japanese Government, and that Japan would establish two technical training centres in India. He also said that while no agreement had been reached on Japan's proposal for a Development Fund for South-East Asia, Mr. Nehru had agreed to study the proposal further.—(Japanese Embassy Press Office, London - Indian High Commissioner's Office, London - The Hindu, Madras) **(Prev. rep. 15658 A.)**

A. LITERATURE. — Book Selections, September and October.

Selected books published in Great Britain and the United States are given below :

Great Britain. Aldington, Richard—"Portrait of a Rebel · The Life and Work of Robert Louis Stevenson." (Evans, 21s.)

André-Maurois, Simone—"Miss Howard and the Emperor." The Story of Napoleon III and Miss Howard. Translated from the French. (Collins, 18s.)

Ashley, Maurice—"The Greatness of Oliver Cromwell." (Hodder and Stoughton, 25s.)

Ashe, Geoffrey—"King Arthur's Avalon : The Story of Glastonbury." (Collins, 18s.).

B. JAMAICA. — New Governor.

It was announced in London on Oct. 30 that Sir Kenneth Blackburne, Governor of the Leeward Islands, had been appointed Captain-General and Governor of Jamaica in succession to Sir Hugh Foot, following Sir Hugh's recent appointment as Governor of Cyprus. Sir Kenneth Blackburne (49) has been Governor of the Leeward Islands since 1950, and was formerly Director of Information Services at the Colonial Office.—(Times) **(Prev. rep. 15815 B.)**

C. EGYPT. — Army and Civilian Plot against President Nasser. - Sentences on Alleged Conspirators. - Prison Sentences on Egyptian Communists.

Dr. Mohammed Salah ed-Din, who as Foreign Minister in M. Nahas' Wafdist Cabinet from 1950-52 was largely responsible for the abrogation of the Anglo-Egyptian treaty of 1936, and Dr. Abdel Fattah Hassan, Minister of Social Affairs in the Nahas Government, were arrested in April on charges of conspiracy, together with 11 Army officers, ex-officers, and civilians. Brigadier Ahmed Atef Nasser (no relative of President Nasser), a retired officer, was alleged to have been the leader of the conspiracy, and M. Abdel Hamid Islambouly, a senior official in the Ministry of National Guidance, to have acted as the link between the military and civilian conspirators. The other persons involved were five ex-officers—Lieut.-Colonel Fahim el-Gamam, Lieut-Colonel Mohammed Helmi Ibrahim, Major Hassan Sayam, Major Abdel Mautal el-Saidi, and Major Hassan Abdel Gaffar ; two artillery officers, Colonel Ahmed Kawkah and Major Amin Fawzy ; and two civilians, M. Mohammed el-Sawadi and M. Ahmed el-Sakka.

The trial of the accused, all of whom pleaded not guilty, opened before a military court in Cairo on Aug. 12.

The indictment alleged that they had formed a secret organization called the "Society of Upholders of Righteousness" in 1956 and had planned to assassinate President Nasser and his Ministers during a Cabinet meeting ; to instal General Neguib as President ; and to set up a Cabinet headed by Dr. Salah ed-Din which would reach an understanding with the U.S. Government and de-nationalize the Suez Canal. This plan, it was alleged, was to have been carried out at the end of April but had been frustrated by the arrest of the conspirators. The indictment made no suggestion that any foreign Power was implicated in the alleged plot.

Evidence for the prosecution was given by M. Ahmed Kadri, an official of the Ministry of National Guidance, who asserted that M. Islambouly had tried to persuade him to join the conspiracy by telling him that the U.S. Intelligence was "paving the way for the Eisenhower Doctrine all over the Middle East." He also alleged that the U.S. Ambassador had attempted to contact Dr. Salah ed-Din and M. Nahas shortly before the Israeli attack on Egypt, and that early in 1957 Dr. Salah ed-Din had visited Saudi Arabia, where he had stayed with the Minister of Commerce, to "contact Americans." Under cross-examination, however, M. Kadri admitted that he had no specific proof of U.S. complicity in the "conspiracy." A U.S. Embassy spokesman subsequently stated that the Ambassador had had "no contact whatsoever with the persons mentioned or with any others regarding domestic political matters."

M Islambouly testified that he had been forced to sign a "confession" by military intelligence officers, who had whipped him on the soles of his feet, kept him a whole day without food or water, and threatened to arrest his wife. He declared that he had never heard of the "conspiracy" before his arrest, and maintained that his conversations with M. Kadri had been merely "careless talk." Major Sayam, Major Fawzy, and two others of the accused also declared that their confessions had been extorted from them by threats and maltreatment. Major el-Saidi, Captain Kawkah, and Lieut.-Colonel Ibrahim, on the other hand, stated that their confessions were genuine and denied that they had been ill-used in any way. Dr. Hassan and Brigadier Nasser both denied all knowledge of the plot, whilst Dr. Salah ed-Din refused to give evidence.

The court on Oct. 20 found all the accused guilty except Lieut.-Colonel el-Gamam and Lieut.-Colonel Ibrahim, and pronounced the following sentences of imprisonment : Brigadier Nasser, Major Sayam, Major Fawzy, and M. Islambouly—life imprisonment ; Dr. Salah ed-Din, 15 years ; Dr. Hassan—12 years ; Major el-Saidi—10 years ; Colonel Kawkah, M. el-Sawadi, and M. el-Sakka—seven years ; Major Gaffar—five years. All the sentences, except those of M. el-Sawadi and M. el-Sakka, were to imprisonment with hard labour.

Thirteen members of the outlawed Egyptian Communist Party were sentenced by a military court on Oct. 31 to prison terms ranging from one to seven years on charges of conspiring to overthrow the regime by force. The sentences were imposed after a three-day trial held *in camera* from Oct. 21-24. Five of the accused received sentences of seven years with hard labour, together with fines of £E.200 ; three (including two women) were sent to prison for three years and ordered to pay £E.200 fines ; and five others received one-year sentences. Five other defendants were acquitted. The judge ordered the confiscation of the property of all organizations belonging to the Egyptian Communist Party.—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times) **(Prev. rep. 14135 A.)**

D. CEYLON. — Transfer of Katunayake Air Base.

The R.A.F. base at Katunayake, 20 miles north of Colombo, was formally transferred to Ceylonese control on Nov. 1 (Times) **(Prev. rep. Trincomalee, 15808 D.)**

A. SAN MARINO.—Grand Council dissolved by Left-wing Government. - Provisional Government formed by Opposition Parties. - Italian Blockade of San Marino. - Resignation of Left-wing Government. - New Government formed by Democratic Parties.

A political crisis was precipitated in the Republic of San Marino when a Government supporter in the Grand and General Council, Signor Giannini, announced on Sept. 17 his intention to join the Opposition. At the last general elections in 1955 the coalition of Communists and left-wing Socialists (which had held office since 1945) obtained 35 seats against 25 for the Opposition parties, but Signor Giannini's defection, which followed that of five other Government supporters, converted the Government's original majority of 10 into a minority of two (i.e. 29 against an Opposition strength of 31). The election of two new Captains-Regent (the joint heads of State, who hold office for periods of six months expiring on Oct. 1 and April 1) was due to take place in the afternoon of Sept. 19, and the Opposition had decided to oust the Communist and left-wing Socialist regime at that meeting. The same morning, however, the remaining 29 Communist and left-wing Socialist councillors tendered their resignations, whereupon the Captains-Regent, Signor Giacomini (a Communist) and Signor Marani (a Socialist), announced half-an-hour before the Council meeting that they had issued a decree dissolving the Council and calling general elections for Nov. 3.

The Opposition councillors, who were prevented by the police from entering the Council buildings, immediately protested against the dissolution and accused the Captains-Regent of having staged a *coup d'état* and usurped power illegally. These charges were rejected by Signor Giacomini, who in turn accused the Opposition of acting illegally, claiming that under an electoral law of 1920 the Captains-Regent could dissolve the Council if there was no quorum.

In a statement on Oct. 3, Signor Giacomini maintained that as elections were conducted on the party-list system, all Left-wing councillors on taking their seats had submitted letters pledging themselves to resign if they changed their party allegiance. Hence the five councillors who had joined the Opposition had thereby forfeited their seats; the resignation of the Government's supporters had reduced the number of councillors to 26; and there was no longer a quorum. [Signor Giacomini did not explain, however, why the Government had failed to claim at the time when its five former supporters joined the Opposition that they had thereby lost their seats.]

The 31 Opposition councillors (Christian Democrats, Social Democrats, and Independent Socialists) assembled at Rimini, on Italian soil, during the night of Sept. 30 - Oct. 1, and at midnight declared that the legal term of the Captains-Regent had expired. They then formed a "provisional Government" headed by Professor Bigi, a Christian Democrat, which established its headquarters in an abandoned factory at Rovereta, a few yards inside the San Marinese frontier. The provisional Government was formally recognized by Italy in the early hours of Oct. 1.

Italian *carabinieri* closely blockaded the San Marino frontier on Oct. 1, allowing no-one to pass in either direction on the only main road to and from Rimini, 11 miles away. On Oct. 3 tanks and armoured cars were moved up to the border; *carabinieri* were subsequently stationed at all the cart-tracks leading into San Marino; and telegraphic communications between Italy and San Marino were cut off on Oct. 7. Italian and foreign press representatives however, were allowed to cross the border after Oct. 3, following strong representations to the Italian authorities.

The Captains-Regent appealed to the United Nations on Oct. 2 to send an international police force to San Marino, and on the following day appealed to President Gronchi to assist in setting up an arbitration commission—whose decision they undertook to accept—to investigate the conflicting claims of San Marino and Italy. This appeal was ignored by the Italian Government, and on Oct. 7 the provisional Government announced that it had recruited a force of 110 Italian ex-*carabinieri* in preparation for a march on the town of San Marino with the aim of restoring the rule of law as quickly as possible, though there would be no reprisals or vendettas. A resolution to that effect had been adopted earlier the same day by the 31 Opposition councillors, who, however, instructed the provisional Government not to use force until all peaceful means had been exhausted.

Negotiations between the rival Governments had meanwhile opened on Oct. 6. The provisional Government proposed that the Council should reassemble to elect the new Captains-Regent, and that general elections should not be held until 1959. As a compromise, the left-wing Government suggested that each side should nominate one of the Captains-Regent, and that general elections should take place before the end of 1958. This was rejected by Professor Bigi's Government, which demanded that the resignations of the left-wing councillors should remain in force. Whilst refusing to accept these conditions, the left-wing Government agreed on Oct. 11 to hand over power after a 48-hour interregnum, during which the Chief of Police was authorized to disarm the volunteer militias which had been organized by both sides. Before relinquishing office the Captains-General issued a proclamation in which they declared that "the popular Government of San Marino, overpowered by the forces of a foreign Government, have ceased all resistance . . . for the supreme good of the country." The proclamation "denounced to the world the gravest blow in the memory of the San Marinese people to the freedom of the republic," and appealed to the citizens "to remain serene and calm."

The provisional Government and its supporters re-entered San Marino and assumed control of the administration on Oct. 14, the day being celebrated as a public holiday.

The Grand Council, at its first meeting on Oct. 23 following the installation of the new Government, elected Professor Marino Valdes Francios (Democratic Socialist) and Dr. Federico Nicheloni (Independent Socialist) as Captains-Regent. Signor Forcellini (Ind. Socialist) was appointed State Secretary of the Interior, and Professor Bigi State Secretary for External Affairs. The Council also decided that the 29 Communist and left-wing Socialist councillors who resigned on Sept. 19 had forfeited their seats, and that the necessary steps should be taken to replace them.—(Corriere della Sera, Milan - Giornale d'Italia, Rome - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14422 B.)**

B. YUGOSLAVIA. — Implementation of Agreements with U.S.S.R. and Eastern Germany for Setting-up of Aluminium Industry and other Industrial Plants.

A protocol was signed in Moscow on July 29 between representatives of the Soviet, Eastern German, and Yugoslav Governments specifying the terms for the setting-up of an aluminium industry in Yugoslavia with Soviet and East German aid, in implementation of the agreement between the three Governments announced in August 1956. It was laid down that the first section of the aluminium works, with a projected annual capacity of 50,000 tons, should be completed in 1964.

A second protocol, signed by Soviet and Yugoslav representatives, laid down time-limits for the delivery by the U.S.S.R. of equipment and materials for the other industrial enterprises to be constructed in Yugoslavia with Soviet aid, in implementation of the Soviet-Yugoslav agreement of January 1956; it specified that Soviet deliveries for the nitrogen fertilizer plant would take place in 1958-60 and those for the superphosphate works in 1961-63.

The implementation of the earlier agreements had been held up because of the renewed deterioration of Soviet-Yugoslav relations during the winter of 1956-57, when the U.S.S.R. had suggested that all the projects should be delayed until the end of the current Soviet Five-Year Plan in 1960—a suggestion which was rejected by Yugoslavia. The new agreement represented a compromise, as the original arrangements envisaged that the aluminium plant would be ready in 1961 and the other two plants by 1959.

A protocol on Soviet-Yugoslav trade in 1957 had been signed on Feb. 26 after protracted negotiations which—as indicated by M. Popovich, the Yugoslav Foreign Secretary, in his speech on the same day [see 15731 A] had been delayed by Soviet intransigence for political reasons. Subsequently a three-year trade agreement was signed on April 10 covering deliveries of staple goods during the period 1958-60. Under this agreement the Soviet Union undertook to supply coal and anthracite, oil, grain, manganese ore, asbestos, iron and steel, non-ferrous metal products, and machinery, whilst Yugoslavia agreed to send to the U.S.S.R. iron, steel, and non-ferrous metal products, cement, chemicals, agricultural produce, textiles, leather goods, machinery, and equipment.
(Tanjug Agency, Belgrade - Soviet Embassy Press Dept., London) **(Prev. rep. 15035 B; 14937 A, page 14939.)**

C. SOUTH PACIFIC COMMISSION. — Appointment of New Secretary-General.

It was announced on Oct. 28 that Mr. Thomas Smith (New Zealand) had been appointed Secretary-General of the South Pacific Commission in succession to Dr. Ralph Bedell. Mr. Smith is Secretary for the Department of Western Samoa.
(New Zealand Directorate of Information, Wellington) **(Prev. rep. 14198 E.)**

NOVEMBER 2—9, 1957

A. SOVIET UNION. — Launching of Second Earth Satellite. - Dog sent into Outer Space in Pressurized Container. - No Further Signals from "Sputnik I."

The Tass Agency issued a special announcement at 6 a.m. on Nov. 3, broadcast by Moscow Radio, stating that a second Soviet artificial satellite, carrying a dog in a pressurized container, had been successfully launched into outer space and was circling the earth every 102 minutes. The Tass announcement was worded as follows :

"In conformity with the International Geophysical Year programme for studying the upper layers of the atmosphere, as well as the physical processes and conditions of life in cosmic space, the Earth's second artificial satellite has been launched on Nov. 3 in the Soviet Union. It represents the last stage of the carrier rocket, housing containers with scientific instruments.

"The second artificial satellite carries instruments for studying solar radiation in the short-wave, ultra-violet, and X-ray regions of the spectrum; instruments for cosmic ray studies; instruments for studying temperature and pressure; an airtight container with an animal for experimental purposes (a dog); an air-conditioning system; food and instruments for studying life processes in the conditions of cosmic space; measuring instruments for transmitting the results of scientific measurements to the Earth; two radio transmitters operating on frequencies of 40.002 and 20.005 megacycles (wavelengths of 7.5 and 15 metres respectively); and the necessary power sources. The total weight of this apparatus, the experimental animal, and power sources amounts to 508.3 kilograms [1,118 lb., or about half a ton].

"The satellite has been given an orbital velocity of about 8,000 metres per second [i.e. about 5 miles a second or 18,000 m.p.h.]. According to calculations which are being verified by direct observations, the maximum distance of the satellite from the Earth's surface exceeds 1,500 kilometres [about 1,000 miles]; the time of one complete circuit is about 1 hour 42 minutes; and the angle of inclination of the orbit to the plane of the equator is approximately 65 degrees [as in the case of the first satellite]. According to information received from the satellite, the scientific instruments and control of the life processes in the animal are proceeding normally.

"Signals from the satellite's radio transmitters on 20.005 megacycles are in the form of telegraph beats lasting about 0.3 second, with a pause of an equal duration. The 40.002 megacycles transmitter emits signals continuously.

"By the successful launching of the second artificial Earth satellite, with diverse scientific instruments and an experimental animal, Soviet scientists are extending the programme of studying cosmic space and the upper layers of the atmosphere. The unfathomed natural processes going on in the cosmos will now become more understandable to man."

The announcement added that the satellite was "dedicated to the 40th anniversary of the Great October Socialist Revolution" [which was celebrated in the U.S.S.R. on Nov. 7].

The magnitude of the Soviet achievement in launching a second satellite of such size, only a month after the launching of the first and smaller satellite, created a profound impression throughout the world. As the new satellite weighed half a ton—six times as much as the first *Sputnik*—U.S. scientists estimated that a rocket weighing 500 tons must have been used to launch it. Dr. Frank Whipple (director of the Smithsonian Astrophysical Observatory in Washington) described the second launching as "six times as great a scientific achievement as the first," while Professor A. C. B. Lovell (the British astronomer, and head of the Radio-Astronomical Station at Jodrell Bank, Cheshire) said that it was "a very dramatic and spectacular demonstration of Russian achievement in science and technology." Similar tributes were paid by many other scientists in America, Britain, France and other countries.

Comparative data about the two earth satellites, as far as known, are given below :

	Second Satellite (*Sputnik II*)	First Satellite (*Sputnik I*)
Weight	1,118 lb.	184 lb.
Maximum height of orbit	About 1,000 miles	About 630 miles
Speed	18,000 m.p.h.	18,000 m.p.h.
Time round world ..	102 minutes	96.2 minutes
Size	Unknown	Diameter 23 in.
Broadcasting wavelengths		
7.5 metres	Continuous	Every 0.3 sec.*
15 metres	Every 0.3 sec.	Every 0.3 sec.*
Launched	Morning Nov. 3	Evening Oct. 4

*As stated below, signals from *Sputnik I* gradually became inaudible during the last week of October and were no longer heard by the end of the month.

Professor A. A. Blagonravov (see below), who played a leading part in the launching of *Sputnik I*, and who is believed to be directing the Soviet earth satellite programme, said that the second satellite would remain in space for a much longer time that the first. In a broadcast from Moscow Radio (Nov. 3) he advised observers tracking the second satellite to listen for a "hissing sound" which, he said, "embodies a multitude of signals which tell everything of interest to scientists, and of how the first living being to rise to such a height is feeling." Professor Dishukin, of the Soviet Academy of Sciences, said on Nov. 4 that "new sources of power" were used to project the second *Sputnik* into space, and also spoke of a "multi-staged rocket carrier of a new design with foolproof precision controls." As quoted by Tass, he said : "The increase in the satellite's size to provide for a larger number of telemetering instruments, and even for an animal passenger, necessitated the development of new, improved instruments and sources of power."

Professor Anatol Arkadyevich Blagonravov (63) is one of the leading weapons specialists in the Soviet Union. He studied at the Soviet Military-Technical Academy in the 'twenties, specializing in the artillery branch, and began weapons research about 1930. The author of some 25 scientific works, he was awarded a Stalin Prize in 1941 for his contributions to Soviet artillery, and has been head of the Soviet Academy of Artillery Science for most of the post-war period. He holds the rank of lieutenant-general in the Soviet Army and is a member of the Soviet Academy of Sciences.

The second earth satellite, like its predecessor, was tracked by astronomical observatories and research stations throughout the world and by observers in many countries. Within a few minutes of the Tass announcement the satellite had been picked up by the Mullard Radio-Astronomy Observatory at Cambridge (England), which worked out a provisional orbit. These calculations showed that the inclination of the orbit of *Sputnik II* to the Equator was 65 deg. 5 min. (within five minutes of the figure announced by the Russians); that it was circling the earth in 1 hour 43 min. 40 sec. (about the same time as given by Tass); and that the satellite's greatest height was just over 1,000 miles and its lowest height just over 100 miles. By Nov. 5 it had completed its first million miles, circled the earth over 45 times, and passed over or near most of the world's great cities, including Moscow, London, Paris, New York, Tokio, and Sydney.

It was announced in Moscow that the dog enclosed within the satellite—the first living creature to enter outer space—was a specially-trained "husky" of the Samoyede type, its name being given as "Laika." Professor Blagonravov disclosed that the dog had previously made some rocket flights and had undergone special training "in conditions closely resembling those in which it now is." He added that the dog's breathing and the working of its heart and blood-pressure were being registered by instruments; that the data thus received, telemetered back to earth, would "be of tremendous help to our physiologists in their further work on problems of cosmic flight"; and that the animal was perfectly comfortable and getting artificial food. Up to Nov. 5, when the satellite had completed over a million miles, Moscow Radio bulletins had announced that the dog's condition was still satisfactory and its pulse and respiration normal. After that date, however, no further mention was made of "Laika" by Moscow Radio, and it was conjectured abroad that the dog might no longer be alive.

Reports from Moscow stated that the dog had been trained for her journey by previous laboratory experiments and flights in actual rockets. So that she would not eat all her food at once she had been conditioned by Pavlovian experiments to eat only at the sound of a bell, which was rung inside her pressurized and air-conditioned compartment at regular intervals. It was stated that great difficulties had been overcome to provide for regular feeding and drinking by the dog in conditions of weightlessness inside the satellite.

Two Soviet scientists—Dr. Paziekin (director of the Moscow Planetarium) and Professor Petrovsky—said on Nov. 4 that the dog would be catapulted out of the satellite at a "suitable altitude" and would have a "good chance" of survival. They disclosed that dogs had been recovered from rockets which had ascended to a height of 120 miles and added that, in the case of the present animal, "we shall try to choose a moment when the rocket is at its lowest point in the orbit, providing this coincides with other essential factors." They also said that there were several flasks of a highly calorific liquid in the dog's cabin, constituting sufficient food "for more than just a few days," and that a television tube in the rocket was recording oscillograph information about the animal, which was being transmitted. No details were given as to how the dog would return to earth, if at all.

Despite the Russian assurances as to the dog's condition, strong protests were made by animal-lovers in many countries at the launching of the dog into outer space. Such protests were particularly numerous in Britain, where representations were made to the Soviet Embassy by the Royal Society for the Prevention of Cruelty to Animals, the National Canine Defence League, and the League against Cruel Sports.

A deputation from the Canine Defence League called at the Soviet Embassy with a letter for the Ambassador (M. Malik) which said that there could be "no justification for submitting this dog to such an ordeal," and that the "horror induced in the mind of the dog can never be known, just as no explanation of the purpose of the journey can be made to her." The deputation was received by the First Secretary of the Embassy (M. Modin), who stressed that the dog's journey into outer space would be for the ultimate benefit of humanity; that every care had been taken for the comfort and welfare of the animal, which had been specially trained; and that the Russians themselves were a nation of dog-lovers. M. Modin disclosed that there had been many human volunteers, but said that none would be accepted until the risks were known —though not necessarily when the risks were negligible. Asked whether there was any chance of the dog returning to earth, M. Modin said that he did not see how this was possible, though it was only his own opinion.

The R.S.P.C.A., which received hundreds of individual protests from British dog-lovers, sent a letter expressing deep regret that "so splendid a scientific achievement should be marred by exposing an animal to unknown hazards and the likelihood of acute suffering."

The League against Cruel Sports expressed its "horror, disgust and contempt" at the Russian experiment; declared that "such acts as this will put scientists, whether Russian or otherwise, outside the pale of decent people"; and called on the United Nations to "outlaw such foul experiments and those who perpetrate them."

The First Earth Satellite.

Meanwhile the first *Sputnik* launched on Oct. 4 had remained under constant observation in all parts of the world. In Britain, careful tracking and observation were maintained by Professor A. C. B. Lovell and his staff at the radio-astronomical station of Manchester University at Jodrell Bank; by the Mullard Observatory at Cambridge, headed by Dr. Martin Ryle; by the Royal Observatory at Herstmonceaux; by Ministry of Supply establishments, including the Royal Radar Establishment at Malvern and the R.A.E. Establishment at Farnborough; and by the B.B.C.'s listening post at Tatsfield.

During the last week of October the signals from *Sputnik I* became less and less distinguishable, and finally inaudible. On Oct. 26 the Soviet Astronomical Council sent a telegram to Professor Lovell requesting the help of Jodrell Bank in locating the carrier-rocket of the satellite, and giving its probable position. [It was announced on the same day in Moscow that no more signals were being received from the satellite itself, as its batteries were exhausted.] Within a short time the Jodrell Bank telescope had located the rocket at a range of over 1,000 miles, while it was crossing the Arctic Circle towards the U.S.S.R.—an achievement which the Scientific Correspondent of the *Manchester Guardian* described as "probably never before equalled by a radar instrument." The position as found by Jodrell Bank showed the Soviet forecasts of the rocket's path to have been inaccurate. Professor Lovell received four more Soviet requests for assistance between Oct. 27-31.

By Nov. 1 the first *Sputnik* had made about 400 circuits of the earth and had travelled well over 10,000,000 miles. The rocket had passed the satellite for the first time on Oct. 10, and by the end of the month was about 30,000 miles ahead of it. Scientists in different countries expressed varying opinions as to the probable length of time the satellite would continue to encircle the earth—some believing that it would "burn out" within a comparatively short time, others affirming that it would remain in its orbit for several more weeks or even months. The consensus of opinion among Soviet scientists was that the *Sputnik* would circle the earth several hundred times more before burning out, whilst the carrier rocket (which had a stronger body) might hit the earth earlier. Professor Lovell expressed the opinion that the rocket would stay up for several weeks and the satellite for several months. (Soviet Embassy Press Department, London - Times - Daily Telegraph - Manchester Guardian - New York Times) **(15791 A.)**

A. INDIA - JAPAN. — Credit Agreement for Japanese Textile Machinery Supplies.

An agreement for the supply of textile machinery by Japan to India on a deferred payment basis was signed in New Delhi on Oct. 19 by the chairman of the Indian State Trading Corporation (Mr. K. B. Lall) and the president of the Japan Textile Machinery Manufacturers' Association (Mr. T. Ishida). It laid down (1) that various items of machinery would be supplied by the Japanese manufacturers to Indian mills with the co-operation of the Indian State Trading Corporation and the Japanese Association; (2) that orders would be placed directly by the mills with the machinery manufacturers; and (3) that 10 per cent of the value of each contract would be paid immediately, another 10 per cent on presentation of shipping documents, and the balance of 80 per cent (which will bear interest at 6 per cent p.a.) in 10 equal half-yearly instalments.—(Indian High Commissioner's Office, London)

(Prev. rep. 15832 A.)

B. WESTERN GERMANY. — New Adenauer Cabinet. - Professor Erhard appointed Vice-Chancellor.

Dr. Konrad Adenauer was re-elected Federal Chancellor by the new Bundestag on Oct. 22, receiving 274 votes to 193 with nine abstentions; of the deputies from Berlin (whose votes are not officially counted in a division), eight votes were cast for Dr. Adenauer and 13 against. Dr Adenauer has been at the head o' the Federal Government since 1949, having previously been re-elected in 1953 after the elections of that year.

The membership of Dr. Adenauer's third Cabinet was announced on Oct. 24, the Ministers being appointed by President Heuss on Oct. 28 as follows:

*Dr. Konrad Adenauer (CDU) ..	Federal Chancellor.
*Dr. Heinrich von Brentano (CDU)	Foreign Affairs.
*Dr. Gerhard Schröder (CDU) ..	Interior.
†Herr Fritz Schaffer (CSU) ..	Justice.
Herr Franz Etzel (CDU)	Finance.
*Professor Ludwig Erhard (CDU)	Economics.
*Dr. Heinrich Lübke (CDU) ..	Food and Agriculture.
Herr Theodor Blank (CDU) ..	Labour and Social Affairs
*Herr Franz-Josef Strauss (CSU)	Defence.
*Dr. Hans-Christoph Seebohm (DP)	Transport.
Herr Richard Stücklen (CSU) ..	Posts.
Herr Paul Lücke (CDU) ..	Housing.
*Professor Theodor Oberländer (CDU)	Refugees.
†Herr Ernst Lemmer (CDU) ..	All-German Questions.
*Dr. Franz-Josef Wuermeling (CDU)	Family and Youth Questions.
*Professor Siegfried Balke (CSU)	Atomic Energy and Power.
Dr. Hermann Lindrath (CDU) ..	Federal-owned Properties.
*Dr. Hans-Joachim von Merkatz (DP)	Bundesrat Affairs.

Abbreviations: CDU- Christian Democratic Union; CSU - Christian Social Union; D.P. German Party (*Deutsche Partei*).
*No change.
†Held different portfolio in previous Cabinet.

The Cabinet thus consisted of 12 Christian Democrats, four members of the Christian Social Union (the Bavarian wing of the C.D.U.), and two members of the German Party. It was evenly divided between Roman Catholics and Protestants, comprising nine Ministers of each faith.

The new Ministers were Herr Etzel, hitherto vice-president of the High Authority of the European Coal and Steel Community in Luxemburg; Herr Stücklen, business manager of the Christian Social Union; and Herr Lindrath and Herr Lücke, both members of the Bundestag. Herr Schäffer had been Finance Minister in Dr. Adenauer's previous Cabinets, whilst Herr Lemmer had hitherto been Minister of Posts. Herr Theodor Blank, who re-entered the Government, had been Defence Minister in 1955-56.

Dr. von Merkatz had previously also held the Justice portfolio, now taken over by Herr Schäffer. The responsibilities of three Ministers were widened, viz., Professor Balke became responsible for all forms of power, and not only atomic energy; Herr Blank will deal with social affairs as well as labour; and Dr. Wuermeling took over Youth Questions in addition to Family Affairs.

The outgoing Ministers were Dr. Franz Blücher, who had been Vice-Chancellor and Minister for Economic Co-ordination; Herr Jakob Kaiser, previously Minister for All-German Affairs, who retired for health reasons; Herr Anton Storch, the former Minister of Labour; and Dr. Preusker, formerly Minister of Housing. Both Dr. Blücher and Dr. Preusker originally belonged to the Free Democratic Party, but after the split in that party in February 1956 had joined the newly-formed Free People's Party, which in turn merged with the German Party in January 1957 (see 15757 A); although they had originally joined the Government as Free Democrats they had remained in the Cabinet in spite of these changes.

The Ministry of Federal-owned Properties is a new portfolio. The Ministry for Economic Co-ordination disappeared, and Professor Erhard will now be directly responsible for international economic affairs.

On Oct. 30 it was announced that Dr. Adenauer had appointed Professor Ludwig Erhard as Vice-Chancellor in succession to Dr. Franz Blücher. Professor Erhard retained the portfolio of Economics.—(Frankfurter Allgemeine Zeitung)

(Prev. rep. Elections, 15818 B; Cabinet, 15757 A.)

C. UNITED STATES. — New Attorney-General.

Mr. Herbert Brownell jr. resigned as Attorney-General on Oct. 28 in order to return to his private law practice in New York. He was succeeded by Mr. William P. Rogers (44), deputy Attorney-General since Mr. Brownell took office in 1953. (New York Herald Tribune) **(Prev. rep. 15712 B.)**

A. PERSIA - ITALY. — New Persian Oil Legislation. - Italo-Persian Oil Agreement. - President Gronchi's Visit to Teheran.

The Persian Government presented a Bill to the *Majlis* on May 16 seeking authority to develop the national oil resources with foreign participation, and laying down the principles governing such concessions. Its principal provisions were as follows :

(1) The National Iranian Oil Company (N.I.O.C.) would be authorized to make agreements for the exploration and production of oil in three ways : (*a*) by joint ventures in which the N.I O.C. would hold 50 per cent or more of the shares ; (*b*) by joint ventures in which N.I.O.C. would hold 30 to 50 per cent of the shares , and (*c*) by agreements in which N.I.O.C. would have no ownership interest.

(2) Contracts would be granted for specified areas. Drilling must be begun within a specified period and (*a*) within 10 years half of each area granted must be returned to N.I.O.C. ; (*b*) if oil was not found in commercial quantities within 12 years the whole area must be returned ; and (*c*) if oil was found a production period of 25 years would begin, with a right to three extensions of five years each.

(3) Companies concluding such agreements with N.I.O.C. would have, broadly, to make three payments, except where N.I O.C. held a share interest of at least 50 per cent : (*a*) an annual rent, part of which would be paid as a lump sum in advance ; (*b*) a cash bonus on signature of the agreement ; and (*c*) income tax equalling 50 per cent of profits less the rent.

In undertakings where N.I.O.C. held a 50 per cent or higher interest, only the annual rent and the income tax would be payable by the foreign oil company, but no cash bonus on signature.

(4) In a joint venture the foreign oil company might provide all or part of N.I.O.C.'s share of exploration costs. In that case the first payment—i.e. the rental including the initial lump sum—would be waived. If the foreign oil company provided all the exploration capital, N.I.O.C. would have to pay this back only if oil was discovered in commercial quantities, but would then be able to pay its share in the exploration costs out of profits.

(5) Any new oil agreement signed under the Bill, either with Persian or foreign oil companies, must be submitted to Parliament for approval. [This constituted an amendment of the law of 1944, which forbade the Government to negotiate or sign any oil agreement without first receiving permission from both Houses of Parliament.]

(6) The Bill would not apply to the agreement with the international oil consortium operating the Abadan refinery and the oilfields formerly belonging to the Anglo-Iranian Oil Company on behalf of the N.I.O.C.

The Bill was passed by the *Majlis* by virtually unanimous vote on July 11, and was approved by the Senate on July 29 by 33 votes to one, with nine abstentions.

The Italo-Persian Oil Agreement.

Prior to the enactment of the new oil legislation, arrangements for an oil concession had been tentatively agreed upon on March 14 between the Persian Government and Signor Enrico Mattei, chairman of the Italian State Oil Corporation (*Ente Nazionale Idrocarburi*, ENI).

The main provisions of the agreement, which conformed to the principles of the new oil legislation, and which was designed to promote the sale of Persian oil in Italy, were as follows :

(1) The National Iranian Oil Company and the AGIP Mineraria Company (a subsidiary of ENI) agreed to set up jointly a new company, to be called SIRIP (*Société Irano-Italienne des Pétroles*), to explore, produce, and market Persian oil, and possibly to extend operations to refining. Its initial capital would be 10,000,000,000 lire (about £5,700,000).

(2) During the first four years operations could not be suspended "for reasons of expediency," but after this period, or at the end of each of the following eight years, AGIP might terminate exploration by notice to SIRIP on condition that half of any unspent balance on exploration expenditure within the limits accepted by AGIP [see section 10 below] must be paid to the N.I.O.C.

(3) SIRIP would be granted three exploration zones totalling about 8,635 square miles for prospecting and exploitation in the following areas : (i) the Continental shelf at the northern end of the Persian Gulf (i.e. an area south of Isfahan and roughly east of Abadan, near the borders of the concession area now worked by the international consortium) ; (ii) the eastern side of the Central Zagros mountains [in Luristan, near the Iraqi border] ; and (iii) an area on the Makran coast of Persian Baluchistan.

(4) The original capital of SIRIP would be subscribed as to 50 per cent by N.I.O.C. and 50 per cent by AGIP. Half the directors on the board of SIRIP would represent the N.I.O.C. and half AGIP. A committee of auditors would be nominated (half by N.I.O.C. and half by AGIP) under an independent chairman named by a Swiss trustee or audit company.

(5) N.I.O.C. would nominate the president of the board of SIRIP, whilst AGIP would nominate the vice-president and the general manager.

(6) AGIP undertook to explore any oil resources in the concession areas, and if it was found that no commercial operation was possible would bear the whole cost of such explorations. If, however, commercial productivity was established, SIRIP would repay to AGIP part of the exploration costs borne by the latter.

(7) Development of any oil found would be financed in equal parts by AGIP and N.I.O.C.

(8) Fifty per cent of any profits of SIRIP (i.e. gross income after deduction of costs in Persia and abroad) would be paid to the Persian State as taxes and royalties (*redevance*), while the other 50 per cent would be divided equally between N.I.O C. and AGIP.

(9) Exploration would start within six months of the agreement coming into force, and drilling would begin when deemed useful, but in any case before the end of the first four years. If no commercial result was obtained within 12 years the agreement would lapse.

(10) AGIP undertook to spend not less than $22,000,000 during the exploration period if it maintained its rights for the full 12-year term—viz., $6,000,000 in the first four years, and $16,000,000 in the next eight years at a rate of at least $2,000,000 a year.

(11) The agreement would run for 25 years from the start of sales of petroleum, with an option for SIRIP to have it extended for three further five-year periods. If during the second and third extensions conditions in other oil agreements " collectively are more favourable to the Persian State," these conditions would apply to the extension periods, but these second and third extensions must be renounced by SIRIP if AGIP requested this.

The agreement, while preserving the rule—now customary in Middle East oil agreements—of a 50-50 division of profits between the operating company and the Government granting the concession, constituted a departure from precedent as it created a new pattern of partnership between oversea and local interests by (i) providing for actual participation by the Persian State in financing the venture, and (ii) giving Persia in return not only the customary 50 per cent share in all profits but an additional 25 per cent share through its ownership of the National Iranian Oil Company. Another feature of the agreement was the fact that it was based on co-operation between two State organizations.

The agreement with ENI-AGIP was ratified by the Persian Government on Aug. 3 and was submitted to Parliament for approval on the following day. It was agreed to by the *Majlis* on Aug. 15 and by the Senate on Aug. 24, and on Sept. 8 Signor Mattei (then in Teheran—see below) and M. Abdullah Entezam, the Administrator of N.I.O.C., signed the documents for the constitution of SIRIP. At the same time both sides deposited their shares in the initial capital of SIRIP with the National Bank of Persia.

President Gronchi's Visit to Teheran.

President Gronchi of Italy, accompanied by Signor Pella (Deputy Premier and Minister of Foreign Affairs) and Signor Mattei, visited Persia from Sept. 8-12 as guests of the Shah. During his stay in Teheran President Gronchi had discussions with the Shah, and subsequently visited the historic cities of Isfahan and Shiraz before returning to Italy.

A joint communiqué issued on Sept. 11 announced that (1) both countries, " because of their geographical position and the possibilities resulting therefrom," were determined to contribute to the maintenance of a stable situation in the Middle East, and would have regular consultations on Middle East questions ; (2) Italy and Persia, " faithful to the principles of the U.N.," believed that the Western Powers should pursue towards the countries of the Middle East a joint policy based on a spirit of sincere co-operation and mutual respect ; (3) both countries had decided to develop their economic relations still further, the newly-concluded oil agreement being the first step towards such a development, and to exchange technical missions ; (4) Italy would make scholarships available for 30 Persian students at Italian universities and technical colleges ; (5) both countries, " considering that the solidarity and co-operation of the countries of the free world, in harmony with the U.N. Charter, affords the safest guarantee for maintaining peace," regarded as a " basic factor of their policy " their faithful adherence to the defensive alliances which they had both joined to safeguard their independence and ensure their prosperity.

President Gronchi and Signor Pella returned to Rome on Sept. 12.—(Corriere della Sera, Milan - Giornale d'Italia, Rome - Le Monde - Times - Daily Telegraph - Financial Times) **(Prev. rep. Persian Oil, 15066 B ; 15048 D.)**

B. UNITED KINGDOM. — Appointments to National Research Development Corporation.

The *Board of Trade Journal* announced on Oct. 25 that Major Richard Miles and Sir Owen Wansbrough-Jones had been appointed part-time members of the National Research Development Corporation for three years ; and that the part-time appointments of Professor P. M. S. Blackett, Mr. J. F. Lockwood, and Sir Rowland Smith had been renewed for a further two years, and that of Sir John Duncanson for one year. Major Miles is chairman and managing director of Head, Wrightson and Co. Ltd., whilst Sir Owen Wansbrough-Jones is Chief Scientist of the Ministry of Supply.
(Board of Trade Journal) **(Prev. rep. 15684 B.)**

A. GHANA. — The Colvin Case. - Dr. Nkrumah's Statement. - Rejection of Appeals by Alhaji Baba and Alhaji Lalemie against Deportation Orders.

The acting Chief Justice of Ghana, Mr. Quashie-Idun, granted on Aug. 20 an application for leave to issue writs of attachment for contempt of court against Mr. Ian Colvin, correspondent of the *Daily Telegraph*, and the editor, directors and publishers of the *Ashanti Pioneer* (Kumasi), an Opposition daily.

Mr. Geoffroy Bing, Q.C., who appeared for the Minister of the Interior and Justice, the Commissioner of Police, and the Attorney-General, contended in support of the application that Mr. Colvin's report in the *Daily Telegraph* of Aug. 13 of the proceedings in the Kumasi Divisional Court in the case of Alhaji Baba and Alhaji Lalemie (see 15760 A) attacked the impartiality of the judge, Mr. Justice Smith. The case against the *Ashanti Pioneer* referred to an editorial reprinted on Aug. 15 from the London *Daily Express* and a second article of Aug. 17 which, Mr. Bing alleged, "scandalized the court by implying injustice."

The hearing of the action against Mr. Colvin and the *Ashanti Pioneer* opened in the Accra Divisional High Court on Sept. 9 before Mr. Justice Quashie-Idun and Mr. Justice Windsor-Aubrey, with Mr. Bing leading for the prosecution and Mr. Christopher Shawcross, Q.C., for the defence. The court ruled on Sept. 12 that it had no jurisdiction to hear the Government's application, and that the proceedings should have been brought in the Kumasi Divisional Court, costs of 250 guineas being awarded to Mr. Colvin and of 100 guineas to the *Ashanti Pioneer*. Writs claiming damages for alleged unlawful detention, malicious prosecution, and slander were filed by the *Daily Telegraph* and Mr. Colvin on Sept. 14 against Dr. Nkrumah (the Prime Minister), Mr. Adjei (Minister of Justice), Mr. Bing, and Major Collens (Commissioner of Police).

The Minister of the Interior, Mr. Krobo Edusei, instructed the immigration authorities on Sept. 15 to prevent Mr. Shawcross (who had left on a visit to Nigeria) from re-entering Ghana, and in a speech on the same day Mr. Edusei said that Ghana could not "tolerate British lawyers coming here to abuse her elected Government." In consequence Mr. Shawcross was refused entry to Ghana when he arrived back at Accra on Sept. 18, and had to return to Lagos. The *Daily Telegraph* announced on Sept. 17 that it considered that the exclusion of Mr. Shawcross released Mr. Colvin (who was also in Nigeria) from any obligation to return to Ghana until he was allowed to make freely the arrangements he desired for his defence.

A Commonwealth Relations Office spokesman stated in London on Sept. 16 that Sir Ian Maclennan, U.K. High Commissioner in Accra, had been instructed to express the British Government's concern at developments in the case, and to obtain additional information concerning it. A Note from the Government of Ghana was received in London on Sept. 17, to which the British Government replied on the following day. The text of the two Notes was not published.

In a broadcast on Sept. 24 Dr. Nkrumah announced that the Government had decided not to continue proceedings against Mr. Colvin, and that in consequence it would be unnecessary for Mr. Colvin or Mr. Shawcross to return to Ghana. Orders declaring Mr. Colvin and Mr. Shawcross prohibited immigrants were issued on Sept. 25.

Dr. Nkrumah referred to comments on recent developments in Ghana which had appeared in the foreign Press, and observed that while in some cases this had shown an understanding of Ghana's problems, in others criticism had been "ignorant, malicious, or both." "The first duty of a Government is to govern," he continued. "Hence the preservation of our internal security is paramount. I wonder if those abroad who have criticized us fully appreciate this problem in Ghana, where we have to deal with a complex relationship of feudal, tribal, and other factors, and where we have to fight against inspired rumours and vicious misrepresentations. It is obvious that we are dealing with conditions quite unlike those in many other countries. Thus we must adopt methods appropriate to the problems we have to solve, and still preserve the basic rights of the individual."

Dealing with the deportations, Dr. Nkrumah recalled that that section of the Deportation Act of 1957, under which action was originally taken, had not been questioned by members of either side when debated in Parliament. "That section simply renewed the powers previously possessed and exercised by the old colonial Government," he went on. "Parliament thus recognized that these powers of deportation are still necessary under the existing conditions in Ghana . . . My Government will not hesitate to act if unlawful or subversive . . . methods are used to undermine it . . . When deliberate attempts were being made to render impossible court proceedings under the Deportation Act, the Government was faced with a situation in which police and civil servants were being attacked, and in which organized disturbances were taking place in Accra and Kumasi. We took action by deporting, by Act of Parliament, two persons who we knew were behind these and other disturbances in the past. Since then the country has never been quieter . . .

"The judiciary is unfettered. The most recent African appointments to the Bench include two former politicians who were very active members of the Opposition parties. The latest appointment to the Ghana Appeal Court is an English Queen's Counsel who was a former member of the General Council of the Bar in the United Kingdom. When the international Press and radio comment on our affairs, I hope they will keep facts such as these in mind . . . Do not apply to us standards of conduct and efficiency which are often not attained in your own countries. . . ."

After announcing that the case against Mr. Colvin would be dropped, and, in consequence, that it would not be necessary for Mr. Colvin or Mr. Shawcross to return to Ghana, Dr. Nkrumah added: "I wish to stress, however, that any lawyer who fulfils the conditions imposed by our laws as to entry into Ghana and admission to our Bar will always be welcome in Ghana. What the Government cannot accept is that legal proceedings are conducted in such a way that they amount to improper interference in the political and internal affairs of Ghana. My Government cannot allow lawyers, especially from abroad, to use the courts of Ghana for political purposes. If we were to allow this it would destroy the concept of justice which we are trying to strengthen -namely, that the courts are above politics and that judges in Ghana should not be involved in political issues . . ."

In an interview on Oct. 2 with Mr. Kingsley Martin, editor of the *New Statesman*, Dr. Nkrumah stated that if he had had his way he would not have taken action against Mr. Colvin, but the acting Chief Justice had advised otherwise. After Mr. Justice Quashie-Idun had denied this, a correction was issued on Oct. 10 by the Ministry of Justice, which stated that he had advised the taking of proceedings against the *Ashanti Pioneer* but not against Mr. Colvin.

The hearing of the appeals of Alhaji Baba and Alhaji Lalemie against the deportation orders served on them was resumed in the Kumasi Divisional Court on Oct. 1 before Mr. Justice Smith, who ruled on Oct. 25 that - contrary to the submission of the appellants—the court had no power to inquire into the validity of the special Act under which they had been deported.—(Times - Daily Telegraph - Manchester Guardian - New Statesman) **(Prev. rep. 15760 A.)**

B. ASTRONOMY. — Inauguration of Radio-Astronomical Stations at Jodrell Bank and Cambridge.

The largest radio telescope in the world, built at Jodrell Bank (Cheshire) for the University of Manchester, went into operation on Oct. 11 ahead of schedule. As previously explained (see page 15792, first column) its electrical equipment was hurriedly completed to enable the telescope to track the first Soviet earth satellite which had been launched a week beforehand. Both the first and second *sputniks* were kept under constant observation by the Jodrell Bank research station, which, at the request of Soviet scientists, succeeded in tracking the rocket-container of the second satellite after Russian astronomers had failed to do so (see 15835 A).

The Jodrell Bank radio telescope weighs about 270 tons and has a paraboloid reflecting-bowl with a diameter of 250 feet. Built over five years at a cost of £500,000 (shared equally between the Department of Scientific and Industrial Research and the Nuffield Foundation), it supersedes an older radio telescope which was already the largest of its kind in the world (see 12191 B), and which had picked up radio waves from far outside the Milky Way -e.g. from the Andromedan galaxy, over 750,000 light-years distant. The Director of the Jodrell Bank station (Professor A. C. B. Lovell) said that the new telescope gave Britain a four to five years' lead in radio astronomy and would greatly expand man's knowledge of the cosmos by making it possible to explore regions of space 1,000 times greater than those visible through optical instruments.

The most extensive radio-astronomical observatory in Britian—the Mullard Radio-Astronomy Observatory—was opened a few miles from Cambridge on July 20, 1957. The Mullard Company provided £100,000 (over half the total cost) towards its construction, the remainder being found by the Department of Scientific and Industrial Research and the University of Cambridge.

The Mullard Observatory forms part of the Cavendish Laboratory of Cambridge University and contains many new instruments, based mostly on the ideas of Dr. Martin Ryle, Director of the observatory and, like Professor Lovell, one of the world's leading radio-astronomers. Its 180-acre site is covered with massive aerials in a variety of fantastic shapes—many of 'V' and parabolic form, and others described by the Radio Correspondent of the *Daily Telegraph* (Mr. L. Marsland Gander) as looking "like weird celestial harps." One array comprises a row of huge kerb structures mounted on parallel rails, so arranged that the whole can be moved backwards and forwards to cover different sections of the sky; another array is 3,300 feet long, consisting of 128 V-shaped towers each measuring 40 feet from tip to tip. There are two major aerial systems—one designed for accurate measurements of the position of faint "radio stars," and the other for measurements of radio emissions from different parts of the galaxy. The data obtained is studied and analysed in a small central observatory.

The work of the Mullard Observatory will be complementary to that at the Jodrell Bank research station.—(Times - Daily Telegraph - Manchester Guardian) **(Prev rep. Jodrell Bank, 12191 B; Palomar Telescope, 9367 B.)**

A. CHINA. — "Rectification Campaign" against "Bureaucrats" and "Rightists." - Meeting of National People's Congress. - Denunciation of "Rightist" Ministers and Writers. - Strikes and Local Revolts.

The Peking *People's Daily* (the official organ of the Chinese Communist Party) denounced in a long editorial on April 13 the bureaucratic methods of certain Communist officials, who, it declared, had ignored popular grievances, "grossly infringed the rights and interests of the masses," and "made use of brutal forms of pressure," thereby arousing "justified popular discontent." To correct these methods, it was announced, a "rectification campaign" would be launched during which "bureaucrats" would be exposed by means of public discussions and would be required to "remould" themselves by confessing their errors. A directive issued by the Communist Party's Central Committee on April 30 stated that the campaign would last six months, that the methods employed would be "gentle as a summer breeze," and that there would be solely "discussion and persuasion."

This proposal met with such an enthusiastic response throughout China that in certain towns normal working virtually came to a standstill during May, and the Government was obliged to issue an order that "rectification meetings" should be confined to two half-days a week. A prominent part in the movement was played by the intellectuals, who at meetings of their various professional associations demanded greater freedom of thought and expression and the ending of the Communist Party's control of cultural life.

Authors complained that the Chinese Writers' Association gave them orders, that the Communist Party regarded them with suspicion, and that literary works were judged by purely political criteria; these complaints were admitted to be justified by the Minister of Culture (Mr. Mao Tun), who publicly stated that writers regarded the bureaucrats who dominated the Association as "their masters." The poor quality of many new books, plays, and films, and the censoring for political reasons of classical Chinese novels and plays, were also strongly criticized by writers and by theatrical and cinema workers. Meetings of journalists protested against the obstacles placed in their way by officials and by the police; scholars pointed out that research was being hindered by the amount of time which they were obliged to devote to political meetings; and philologists criticized the Government's proposal to introduce a Latin alphabet (see 14722 A), which, they stated, had been imposed upon them against their will.

As the campaign proceeded, criticism was increasingly directed against the Communist Party and the political system as a whole, and the non-Communist parties began to demand a greater share of power. [The most important of these organizations are the Democratic League, the Kuomintang Revolutionary Committee, the Peasants' and Workers' Party, and the *Chiu San* ("September 3") Society; the last-named is so called because the victory over Japan is celebrated in China on Sept. 3.] It was pointed out that the National People's Congress (the Chinese Parliament) exercised no effective control over the Government; that the liberties guaranteed by the Constitution were constantly violated; and that the non-Communists in the Government had decreased in number and exercised no real power. Communist Party members were alleged to form a privileged class and to enjoy a much higher standard of living than the mass of the people. Finally, demands were put forward for the rehabilitation of persons unjustly accused of being "counter-revolutionaries," and for the abolition of detention without trial. The Minister of Justice (Mr. Tung Pi-wu admitted in reply to these demands that innocent people had been arrested and detained purely on suspicion; the worst abuses had taken place in 1955, during the period following the discovery of Kao Kang's conspiracy (see 14152 C), but these, he claimed, had been or were being rectified.

Full publicity was given to these criticisms by the Press, which played a prominent part in the campaign. Among the non-Communist papers the lead was taken by *Kwang Ming* ("Light"), a daily published by the Democratic League; its editor, Mr. Chu An-ping, even raised the question whether, in view of the highly organized and disciplined nature of the Communist Party, its Central Committee could evade responsibility for the abuses committed by party officials. The magazine *People's Literature* provoked a controversy, similar to that aroused in the Soviet Union by Vladimir Dudintsev's novel *Not by Bread Alone* [see 15833 A], by publishing a novel which traced the gradual disillusionment of a young Communist.

As a result of the campaign against "bureaucracy," it was announced on Sept. 12 that 300,000 Government and Communist Party officials had been removed from their posts and transferred to "productive work" in factories, mines, or agricultural co-operatives.

The Campaign against "Rightists."

The Communist Party reacted to the unexpected strength of the movement which it had itself initiated by substituting "rightists" for "bureaucrats" as the main target of the "rectification campaign." During the first half of June the *People's Daily* gave increasing prominence to attacks on "right-wing elements," and on June 18 President Mao Tse-tung's speech of Feb. 27 on "contradictions among the people" [see 15681 A] was published in a revised text which emphasized that criticism was useful only if it strengthened the "people's democratic dictatorship" and the leadership of the Communist Party. "Rectification meetings" continued, but were increasingly devoted to denunciations of "rightists"; at one such meeting at Peking University on July 26 a 67-year-old professor attempted to commit suicide by hurling himself against a stone pillar after being interrogated for several hours.

A session of the National People's Congress from June 26-July 15 was made the occasion both for public denunciation of the leading "rightists" in the non-Communist parties and for private "rectification meetings" of deputies from the same city or province. Three Ministers belonging to the Democratic League—Mr. Chang Po-chun (Communications, Dr. Lo Lung-chi (Timber Industry), and Mr. Chang Nai-chi (Food)—were the object of particularly violent attacks, as a result of which they were finally induced to "confess" their political "errors."

Mr. Chou En-lai (the Prime Minister), in his opening speech, replied in detail to criticisms which had been brought against the regime, and denounced the "calumnies" and "fantastic demands" of "certain right-wing elements." He expressed the hope that, "profiting by their own experience and increased awareness," they would "repent and accept opportunities of remoulding themselves," but warned them that they might be considered "enemies of the people" if they persisted in their "anti-Socialist position."

On July 6 Mr. Chang Po-chun and Dr. Lo Lung-chi were denounced in the Congress by **Dr. Wu Han** (chairman of the Peking branch of the Democratic League), who declared that "after the Hungarian affair this clique considered that the Communist Party could not continue leading the country, and that this offered the non-Communist parties their chance." Through their numerous supporters inside the League and through its Press, Dr. Wu Han alleged, they had tried to incite disorders in the nine largest cities and in many universities, but "their plot had been discovered and their criminal plans frustrated." Despite their activities, he concluded, the League would continue to collaborate loyally with the Communist Party. Other deputies attacked General Lung Yun, a member of the Kuomintang Revolutionary Committee and a vice-chairman of the National Defence Council, who was accused of persecuting Communists when Governor of Yunnan under the Kuomintang régime, and of adopting a hostile attitude towards the Soviet Union.

Several leading "rightists" made public confessions before the Congress on July 13. **General Lung Yun** admitted that he had displayed an "anti-Soviet and anti-Socialist attitude" by calling for easier terms for the repayment of Soviet loans to China. **Mr. Chu An-ping** confessed that during April and May, under the influence of Mr. Chang Po-chun and Dr. Lo Lung-chi, he had published many "ill-intentioned, one-sided, and destructive" reports in *Kwang Ming*; had sent reporters to nine cities deliberately to stir up disturbances; and had used the paper to "attack the Communist Party and weaken its prestige and leadership among the people." **Professor Fei Hsiao-tung** (a distinguished anthropologist and a member of the Democratic League) stated that a meeting of Peking professors addressed by Mr. Chang Po-chun on June 6 had discussed plans involving a contest for leadership against the Communist Party, whilst **Mr. Wang Hsi-chang** (vice-chairman of the Peasants' and Workers' Party) made a highly emotional confession during which he broke down and wept.

Written confessions by the Democratic League Ministers were submitted to the closing session of the Congress on July 15. **Mr. Chang Po-chun** said that his political ideas were in "a dreadful state," which he attributed to his "feudal-landlord-bourgeois" background. He had proposed that the People's Political Consultative Conference (the committee of representatives of the Communist and non-Communist parties) should be converted into an Upper House in which Communists would be in a minority, with the right to veto decisions of the National People's Congress, and had helped to set up committees to work for the weakening of Communist influence in the universities and the replacement of proletarian dictatorship by "bourgeois democracy"—a policy which, he admitted, would "inevitably have led to a capitalist comeback." **Dr. Lo Lung-chi** confessed that he had directed the Democratic League towards the right during the past year, with the aim of placing the non-Communist parties in a position to compete for power with the Communist Party. He attributed his failings to the "feudal and bourgeois" outlook of his family, to his education in Britain and the U.S.A., and to the fact that he had been "poisoned" by reading British and American magazines. The confession made by **Mr. Chang Nai-chi** was much more restrained in tone; he admitted minor errors caused by "bourgeois individualism," but denied other charges brought against him, including one of conspiring with Mr. Chang Po-chun and Dr. Lo Lung-chi.

During July and August two other Ministers, Mr. Hsu Teh-heng (Marine Products) and Mr. Tseng Chao-lun (Deputy Minister of Higher Education), were denounced for "rightist" activities. Mr. Hsu Teh-heng was accused of attempting to recruit new members in intellectual circles for the *Chiu San* society (of which he is chairman) and of advocating the abolition of the Communist Party committees which run schools and universities. Despite the gravity of some of the charges brought against them, however, all the "rightist" Ministers apparently retained their posts.

In its later stages the campaign against "rightists," which reached its height during August, was directed particularly against the intellectuals. Beginning in the universities, it was later extended to cover the Writers' Association, the schools, and cinema workers', theatrical workers', and musicians' organizations.

On Aug. 7 the Press announced that Miss Ting Ling (a famous novelist and dramatist, who had been a Communist Party member since 1931) and another writer, Miss Chen Chi-hsia, had been denounced as the leaders of an "anti-party clique" which had opposed the Communist Party's supervision of literary work, propagated "bourgeois" ideas, and conducted a campaign against fundamental aspects of the party's policy in collaboration with the leaders of the Democratic League. At the time of the Hungarian revolt, it was alleged, they had decided that "the time had come to launch a counter-attack against the party," and subsequently had taken advantage of the "rectification campaign" to "carry out their attack on the party both from inside and outside." Miss Chen Chi-hsia was reported to have confessed on Aug. 3, at the tenth of a series of meetings of the Writers' Association, but Miss Ting Ling consistently denied the charges against her.

In a report presented to the Communist Party Central Committee on Sept. 23, the secretary-general (Mr. Teng Hsiao-ping) announced that the campaign against "rightists" had been completed. The first two stages of the "rectification campaign," he stated, had permitted first the "flowering of opinions" and then "a violent counter-attack against the right." Two more stages remained, which would be concerned respectively with "reforms" and with "meditation and study."

Strikes and Local Revolts.

During the first stage of the "rectification campaign" the Press gave details of the strikes and the unrest among students to which President Mao Tse-tung had referred in his speech of Feb. 27. During 1956, it was admitted, strikes had taken place at factories in Peking, Tientsin, Chungking, and elsewhere, and disorders had occurred in the Universities of Peking, Tientsin, Chungking, Harbin, and Taiyuan. These disturbances were officially attributed to the bureaucratic attitude of the authorities; trade union leaders admitted that the unions were "out of touch with the masses," and that when unrest developed the workers had formed their own organizations outside the official trade unions. The Press also referred, though more discreetly, to opposition by the peasantry to collectivization of the land, which had led to disturbances in Shensi province (Central China).

From July to September, on the other hand, the Chinese Press gave increasing prominence to reports of the activities of "counter-revolutionary" organizations and local revolts, 18 alleged conspiracies being reported between July 24 and Aug. 19. These reports showed an increasing tendency to connect the disturbances with the activities of leading "rightists," at first indirectly and later directly. An exhibition illustrating the "crimes of the reactionaries," organized by the Ministry of Public Security, was held in Peking during September, one section being devoted to the attempts made by "counter-revolutionaries" to utilize the "rightists" in order to restore capitalism. In connexion with this exhibition, it was announced that 81,000 "reactionaries" had been arrested since July 1955.

According to reports published in the Press during July-September, local revolts took place in Shensi on May 17, when members of an organization called the "Army for Justice and Salvation" destroyed two offices of local people's committees; in Kwangtung (S.E. China) on July 12, when seven people were killed; and in Chekiang province (S.E. China) in July, when a Communist Party office and a bank were raided. Over 1,000 students rioted in the city of Hanyang in June, after they had been ordered to find employment because of the shortage of classrooms; during the riots, which continued for two days, they stuck up posters demanding the restoration of the Kuomintang régime, attacked Communist Party officials, stormed the party headquarters, and attempted to seize an ammunition depot. The leaders of the rioters, who included several teachers, were arrested.

The *People's Daily* accused Mr. Chang Po-chun on Sept. 3 of being involved in a plot to turn Fukien province (S.E. China) into an independent State, and alleged that Mr. Li Shu-chung (leader of the Peasants' and Workers' Party in the province) had tried to establish contact with "bandit groups" for this purpose through 16 agents, 10 of whom had since been sentenced to death or placed under police supervision. The arrest of members of various anti-Communist organizations had previously been reported during July and August from the provinces of Shantung (E. China), Honan and Hupeh (Central China), Kwangtung and Kwangsi (S.E. China), and Tsinghai (N.W. China).

Local revolts had previously occurred in the early months of 1956 in two areas inhabited by national minorities. In Liangshan (a district on the borders of Szechwan and Yunnan inhabited by Yis) members of the landowning class rebelled against the abolition of slavery and the division of part of their land among their former slaves, whilst in the Kanze autonomous region of Szechwan (inhabited by Tibetans) the landlords similarly revolted in February 1956 against the abolition of slavery and forced labour and the liquidation of usurious debts. [Mr. Liu Ke-ping, chairman of the Nationalities Affairs Committee of the National People's Congress, suggested on Aug. 7, 1956, that the latter revolt had given rise to the unfounded reports of a rebellion in Tibet (see 14942 A) which had appeared in the foreign Press.] Both risings were quickly suppressed with the co-operation of the local peasantry; it was suggested, however, that they were partly responsible for the warnings against undue haste in introducing reforms among the national minorities which were given by speakers at the eighth Communist Party congress (see 15232 A) and by President Mao Tse-tung in his speech of Feb. 27 1957.

A. UNITED KINGDOM.—Gold and Dollar Reserves. - First Drawing on Export-Import Bank Credit.

The Treasury announced on Nov. 4 that the sterling area's gold and dollar reserves had risen during October by $243,000,000, after taking into account (*a*) the payment of $130,000,000 to the E.P.U. in respect of the U.K.'s deficit in September; (*b*) the payment of $3,000,000 to creditor countries in the E.P.U. under bilateral settlements; (*c*) the drawing of $250,000,000 on the Export-Import Bank credit.

It was pointed out by the Treasury that, excluding the drawing on the Export-Import Bank credit on the one hand and the payments to the E.P.U. on the other, neither of which concerned transactions in October, there was a net gain for the reserves of $126,000,000 during the month, compared with a fall of $292,000,000 in September and of $225,000,000 in August. Although this marked improvement reflected the corresponding improvement in sterling in the international exchange markets, it was difficult to say how much was due to currency transactions and how much to normal commercial payments.

Provisional figures for the E.P.U. October settlement showed that Britain had a surplus of £9,000,000; three-quarters of this would be settled by the E.P.U. in gold or dollars (involving a payment of $19,000,000 during November), and the remaining quarter by a reduction in the U.K.'s debt to the Union. It was officially suggested that, without the extensive drawing-in of funds by the Bank of France, Britain's E.P.U. surplus might well have reached £20,000,000.

Between Oct. 10 and the end of the month sterling continued to fluctuate around the parity of $2.80, being quoted either above or only very slightly below that level, and reaching its highest point since June 20, 1956, at $2.80⅛ on Oct. 15. On Oct. 21 it also reached its highest point against the Deutsche-mark since April 28, 1955, at 11.78⅛ DM.—(Treasury Press Office, London - Times - Daily Telegraph - Financial Times)
(Prev. rep. 15790 D; Sterling-Dollar Rate, 15800 A.)

B. EGYPT. — Formation of National Union.

A decree was promulgated by President Nasser on Nov. 2 setting up the National Union, the single-party organization which was envisaged in the Constitution adopted in 1956. Replacing the former Liberation Rally, it is designed "to realize the objectives of the revolution of 1952 and to promote efforts to build up the nation on sound foundations by establishing a socialist, democratic, co-operative society free from political, social and economic exploitation."

The National Union will have a supreme executive committee of 20 members, headed by President Nasser, which will nominate all future candidates for the 350-member National Assembly. It will be organized in local, area, provincial and national committees; will receive financial aid from the State; and is authorized to invest its funds and accept donations. Membership is open to all Egyptians aged 16 and over.

A. TURKEY. — Democratic Party Victory in General Elections. - Amendment of Electoral Law. - Re-election of President Bayar. - Opposition Protests at Press Legislation and Restriction of Political Meetings. - Arrest of Mr. Gulek and Mr. Bolukbashi.

General elections were held in Turkey on Oct. 27, following the dissolution of the *Kamutay* (Grand National Assembly) on Sept. 11, in accordance with a decision of the ruling Democratic Party to advance the election date from the spring of 1958.

Immediately before its dissolution the old Assembly had passed Government-sponsored legislation amending the electoral law. This legislation, adopted against strong Opposition protests, was aimed at countering an agreement between the three Opposition parties—the People's Republican Party, the Freedom (*Hurriyet*) Party, and the Republican National Party—for full co-operation between them at future elections. The three-party agreement had been announced on Aug. 22.

The Electoral Amendment Bill, which was passed by the *Kamutay* on Sept. 11, laid down :

(1) that anyone whose candidature had been discussed by a party could not join another party or stand for it in an election ;

(2) that parties participating in elections must produce lists of candidates in every Province in which they maintained a political organization, and that the number of candidates submitted by them must be equal to the number of deputies to be elected in each constituency, failing which their participation in the elections would be nullified ;

(3) that no person could become a candidate of a political party if he had resigned from another party less than six months before the election ;

(4) that any party official or other person making false statements in connexion with investigations into possible violations of the above-mentioned rules would be liable to imprisonment from one to three years ;

(5) that no person could become a candidate of any other party but his own, candidatures violating this rule being liable to invalidation ,

(6) that lists containing candidates from more than one party, or combining Independents with party candidates, would not be admitted, and that the inclusion of names other than those presented in official party lists would be illegal ;

(7) that when Parliament had decided to call general elections, new voting lists would be prepared.

The principal objectives of the legislation were : to require each political party to present lists of its own ; to prevent the presentation of common lists by a coalition of the Opposition parties ; and also to forestall the repartitioning of seats among the Opposition parties under an arrangement whereby two of them agreed to vote for the candidates of the third party. Another objective was to prevent Democratic deputies who had either recently resigned from the Democratic Party, or had not been re-nominated by it for the elections, from running for any of the Opposition parties. [Shortly before the dissolution of the old National Assembly three deputies had resigned from the Democratic Party—Professor Köprülü, the former Foreign Minister and Deputy Premier, and two deputies from Konia province.]

Following the passage of the Bill, the three Opposition parties decided on Sept. 20 that the legislation had made it impossible for them to unite in fighting the general election.

Under the electoral system members of the Grand National Assembly are elected from multi-member constituencies, each corresponding to Turkey's 67 provinces and each returning one member for every 40,000 of the population. The party list obtaining the largest number of votes is automatically entitled to all the seats in the constituency, even if it has gained a bare majority. On the basis of the population census of 1955 [see 14097 E], the Assembly's membership was increased from 541 to 610. The number of deputies for each constituency varied between 39 for Istanbul (the largest) and four for Van (the smallest).

Both the Democratic Party and the Republican People's Party contested all 67 constituencies, while the Freedom Party contested 56 and the Republican National Party 63. The Democratic Party's lists included the names of high officers of the armed forces who—in accordance with the electoral law—had previously resigned from the armed forces in order to stand as candidates. They included General Tunaboylu (former Chief of General Staff), General Aknoz (former C.-in-C., Land Forces), General Uchaner (former C.-in-C , Air Forces), and Admiral Altinjan (former C.-in-C., Naval Forces). On the other hand, the Democratic lists did not include over 100 members of the old Parliament, who were replaced by newcomers—many of whom were younger men. Among the women candidates was Mme. Nazli Tlabar, a well known deputy who stood as a Democrat in Istanbul. Altogether there were over 2,000 candidates.

At the time of its dissolution the former Grand National Assembly comprised 448 Democrats, 31 members of the Republican People's Party, 34 of the Freedom Party (including the three who had left the Democrats early in September—see above), and four of the Republican National Party ; there were also eight Independents and 21 vacant seats.

All parties were agreed on the main outlines of Turkey's foreign policy, the elections being fought mainly on domestic issues—notably on questions of economic policy, the Government's Press legislation, and the new electoral amendment law. As regards economic policy, the Democrats pointed to the achievements of their large-scale expansion programme, whilst the Opposition parties claimed that this policy had led to inflation and to a shortage of commodities, thereby causing great hardship to the poorer classes. In addition to demanding measures against inflation, the Opposition also advocated the creation of a Second Chamber and of a Supreme Court to decide on constitutional matters ; the preservation of the judiciary from interference by the Executive ; the repeal of the stringent press legislation enacted by the outgoing Parliament and of other measures restricting the liberty of the individual (see below) ; the introduction of proportional representation ; and the holding of new elections within six months. To enable the proposed constitutional changes to be enacted, the Opposition suggested that the new Assembly should become a Constituent Assembly.

The results of the elections were as follows, comparison being given with the 1954 elections :

	Seats	
	1957	1954
Democratic Party	421	503
Republican People's Party ..	173	31
Freedom Party*	4	—
Republican National Party ..	4	5
Independents	—	2

*The Freedom Party was formed in 1955 by dissident Democratic deputies [see 14549 A].

Nearly 11,000,000 voters went to the polls, representing about 90 per cent of the electorate. The successful candidates included seven women.

As the party lists for some constituencies included candidates who had also been named for a second constituency, the total number of seats actually exceeded the total number of candidates elected. Thus 424 Democrats candidates were successful, of whom three, however, were elected for two constituencies ; of the candidates standing for the Republican People's Party, 178 were successful, including five who had been elected in two constituencies. The candidates returned for two constituencies—among whom were President Bayar (elected in Istanbul and Bursa), M. Adnan Menderes (elected in Istanbul and Aydin), and M. Inonü, leader of the Republican People's Party (elected in Ankara and Malatya)—will have to choose which seat they wish to retain, whilst the second seat not accepted by them will have to be contested in a by-election. Eight by-elections will thus have to be held before the membership of the new Grand National Assembly is complete.

Of the provincial constituencies, 44 (including Istanbul and Izmir) were won by the Democrats, 18 (including Ankara) by the Republican People's Party, and one each by the Freedom and Republican National parties. In three Provinces there were mixed results owing to candidates from one party list having been combined by the voters with those from others. Among those elected was M. Osman Bolukbashi, the leader of the Republican National Party, who is in prison on charges of contempt of Parliament [see below] and who was re-elected as a deputy for Kirshehir.

The elections themselves passed off in complete calm, but several incidents occurred during the election campaign in Ankara and Istanbul, whilst serious rioting broke out on Oct. 29 in connexion with demonstrations organized by the Opposition in protest against alleged electoral frauds by the Democratic Party.

At Gaziantep (Southern Turkey) a policeman and a boy were killed and seven people wounded when several thousand followers of the Republican Party, complaining that their names had been omitted from the electoral register, attacked the headquarters of the Democratic Party and the Prefecture. The police used tear-gas and eventually fired shots to disperse the demonstrators. The election results in Gaziantep had been announced as 70,731 votes for the Democrats and 70,550 for the People's Republican Party, the Democrats thus gaining all the 10 seats for the province though having a majority of only 181.

The Republican People's Party announced on Oct. 31 that it contested the validity of the election results in 15 provinces (in which 137 Democratic deputies had been elected), on the ground that a relatively large number of voters had been unable to cast their votes because their names had been omitted from the electoral register although they possessed voters' certificates. The Opposition also complained that radio stations had announced certain results before the closing of the poll, which, it was alleged, had influenced the electorate.

The new Grand National Assembly met for the first time on Nov. 1 to elect the President of the Republic and its own president and vice-presidents. M. Jelal Bayar, the Democratic candidate, was re-elected President of the Republic for a third term by 418 votes to nil, the Opposition abstaining.

Internal Developments in 1956-57. - Restrictions on the Press and Political Meetings. - Premature Superannuation of Judges.

The Opposition's electoral campaign was particularly directed against legislation (enacted during 1956) imposing new and far-reaching restrictions on the Press and on political meetings. The Opposition parties also strongly opposed previous legislation superannuating a number of judges, including three members of the Supreme Court, before they had reached the retiring age. These and other internal developments during 1956-57 are summarized below under cross-headings :

Press Legislation. Two Bills—one tightening up the existing Press law and the other dealing with the law of libel—were introduced by the Government on June 4, 1956. The first Bill laid down (i) that the publication of "false reports" calculated to shake the political or economic stability of the State, or to cause unrest among the population, or to cause shortages of essential commodities or higher prices for such commodities, would be punishable by imprisonment from one to three years or fines up to £T.10,000 (about £1,250); (ii) that persons who published, or caused to be published, information which was false, exaggerated, or calculated to undermine the reputation of the Turkish State would be liable to similar penalties; (iii) that newspapers infringing the new regulations could be suspended for three months; (iv) that denials of false, exaggerated or tendentious reports would have to be published without comment or rebuttal, such denials to be given the same space and prominence as the original report; (v) that newspaper proprietors would be liable, equally with publishers and editors, for offences against the Press law; (vi) that journalists would be required to possess a university degree, except those who already had three years' service on a newspaper. The libel law laid down similar penalties in the case of statements directed against the honour, prestige, credit or standing of any person, either by direct attacks or by insinuation, implication, mockery, or satire. The penalties were increased if the person against whom such attacks were made held an official position.

The preamble to the Press law accused a large section of the Turkish Press of having systematically distorted or misrepresented facts in a manner detrimental to the State's prestige both at home and abroad; of having misquoted statements made by Turkish Ministers or foreign visitors, thereby creating a false impression of conditions prevailing in Turkey; and of indulging in deliberate slander of persons holding official positions, thereby shaking public confidence in their efficiency and honesty.

Both Bills were passed by the Grand National Assembly on June 7, 1956—the Press law by 297 votes to 51, and the libel law by 247 votes to 48—after violent scenes in which deputies twice came to blows. M. Ismet Inönü, leader of the People's Republican Party, accused the Government of wishing to create a regime of "violence and duress" and alleged that it had introduced the legislation to conceal its failure to deal with the economic crisis. M. Osman Bolukbashi, leader of the National Party, described the legislation as "dictatorial" and as being in absolute contradiction to the principles expressed by the Democratic Party when in opposition. The spokesman of the Freedom Party, M. Turan Guresh, denounced the Bill in similar terms. For the Government, the Minister of Justice (M. Göktürk) reiterated the allegations that certain newspapers had consistently abused democratic rights and freedoms, published slanderous reports, and attacked the honour of individuals.

By May, 1957, fifteen Turkish journalists had been sentenced to varying terms of imprisonment on charges of violating the Press law. They included the publisher and editor of the newspaper *Zaman* (now defunct) and the editor of an Eskeshir paper, who was sentenced to eight months' imprisonment for insulting the Governor of Eskeshir Province. The Syndicate of Journalists in Istanbul was temporarily closed by the courts in July last on the ground that it had indulged in political activities in violation of the legislation (see below) restricting such activities only to political parties. The case arose over a protest issued by the Syndicate alleging that journalists had been roughly handled by police officers while reporting political demonstrations.

Restrictions on Political Assemblies. A Government Bill curtailing meetings of political parties was passed by the Assembly on June 27, 1956, by 281 votes to 2, after the deputies of all three Opposition parties had walked out of the Chamber in protest. The Bill laid down (i) that political meetings could only be held within a period of 45 days prior to elections; (ii) that, outside this 45-day period, parties would be allowed to hold only three closed meetings a year (e.g. regional conferences), which must be attended by card-carrying members and to which the Press would not be admitted; (iii) that permission for such meetings would have to be sought 48 hours in advance, the Government retaining power to give or deny permission; (iv) that the names of speakers at such meetings, and the subject-matter of their speeches, would also have to be submitted in advance to the Government; (v) that political processions, demonstrations, and other forms of "propaganda" would be prohibited. The most controversial section, however, was that laying down that if attempts were made to violate the law by holding public meetings and demonstrations in the open air, a Government official present would issue a warning; if this warning were unheeded, the official would be authorized to direct the police to use firearms to disperse the demonstrators, firing three times into the air before firing "without aim" into the crowd. Violations of the law were made punishable by imprisonment from three months to two years or fines ranging from £T.1,000 to £T.5,000.

The leaders of the three Opposition parties - M. Inönü (People's Party), M. Karaosmanoglu (Freedom Party) and M. Bolukbashi (National Party)—bitterly attacked the legislation, M. Karaosmanoglu being expelled from the Chamber after he had declared that the provision giving the police powers to fire on political demonstrations was the work of a "dictator" a statement which he refused to retract when called upon to do so. M. Bolukbashi similarly denounced the powers given to the police to open fire on persons attending a political meeting, while M. Inönü declared that the law constituted a clear violation of the constitutional guarantees of freedom of speech, free assembly and political discussion. As stated above, all three Opposition parties walked out of the Chamber before the vote, the two dissentient votes being cast by Independent deputies. Government spokesmen justified the legislation on the grounds of the alleged abuse made of political meetings and demonstrations organized by Opposition parties in different parts of the country.

M. Inönü, M. Karaosmanoglu, and M. Bolukbashi issued a joint declaration in July 1956 reiterating their opposition to the legislation, and affirming the determination of the Opposition parties to press for its repeal. Only a short summary of the manifesto was issued in the Turkish Press.

Arrests of Opposition Leaders. M. Kasim Gulek, secretary-general of the People's Party and publisher of *Ulus* (the leading Opposition newspaper), was arrested on Aug. 2, 1956 at Rize (a town on the Black Sea coast) because he had shaken hands with a group of admirers—an action which was held to be an infringement of the law against political demonstrations. M. Gulek who was making a tour of the Black Sea coast, and who had been under close police surveillance at every town he visited in order to prevent any political demonstration—was sentenced a week later to six months' imprisonment and a fine of £T.1,000, both penalties being however remitted as first offences.

M. Gulek had previously been sentenced in June 1956 to a year's imprisonment, and four months' "banishment" to Bursa, for asserting that the elections of 1954 were illegal. Pending an appeal against his sentence, he had continued to remain at liberty. On Nov. 24, 1956, the Istanbul Magistrates' Court reversed the sentence, holding that the statement for which M. Gulek had been arrested could not be interpreted as questioning the legality of Parliament.

On Dec. 20, 1956, however, M. Gulek was sentenced by an Ankara court to a year's imprisonment and a heavy fine for publishing in *Ulus* the text of one of his speeches criticizing the Government's economic policy. The same sentences were passed on the editor of *Ulus*, the newspaper itself being suspended for one month. Both sentences were imposed under the new Press law described above. It was understood, however, that they would not be put into effect pending an appeal by M. Gulek and the editor of *Ulus* to the courts.

A Bill lifting parliamentary immunity from M. Bolukbashi (leader of the National Party and deputy for Kirshehir) was passed by the Grand National Assembly on June 24, 1957, against strong Opposition protests. It was the outcome of a debate a week earlier during which M. Bolukbashi had violently attacked the Democratic Party and had come to blows with one of its members, leading to his suspension from three sittings of the Assembly. The Minister of Justice thereupon introduced a Bill to remove parliamentary immunity from M. Bolukbashi on the ground that he had insulted the Assembly, and thereby the national sovereignty of which the Assembly was the symbol. The Bill was denounced by M. Inönü as unconstitutional because it limited the freedom of speech of members of Parliament in the performance of their duties. [The incidents in which M. Bolukbashi had been involved a week earlier arose during a debate on a Bill for the re-establishment of Kirshehir as a *vilayet* minus two districts, one of which was M. Bolukbashi's birthplace.]

M. Bolukbashi was arrested on July 2 on a charge of having shown disrespect for the Grand National Assembly, and of having insulted that body. He was released on July 21 but re-arrested on July 25, and was awaiting trial at the time of the general elections.

Compulsory Retirement of Judges. The Opposition had also strongly criticized the Government's action (taken in May 1956) in compulsorily retiring 16 judges, including three members of the Supreme Court, before they had reached the retirement age-limit of 60. The Government maintained that the superannuation of these judges was perfectly legal, as it had been effected in accordance with a law—passed two years earlier—whereby judges and university professors were assimilated with Civil servants and could be placed on the retired list after 25 years' service or on reaching the age of 60. At the time that law was passed, the Government—replying to Opposition criticisms—said that it would be applied in the interests of the judiciary service, and only in cases of incapacity or unfitness to exercise judicial functions. Despite these assurances, the Opposition had continued to demand the repeal of the legislation.

The president, vice-president, and four members of the Supreme Court, as well as the Attorney-General of the Turkish Republic, were also compulsorily retired by the Ministry of Justice in June 1956 in accordance with the above-mentioned legislation.

Heated controversy also arose between the Government and the Opposition in December 1956 as the result of the Government's action in dismissing Professor Fevzioglu, Dean of the Faculty of Political Science in Ankara University—an action which led to the resignation of several assistant professors and lecturers in sympathy with the Dean. The Government justified Professor Fevzioglu's dismissal on the ground that he had allegedly shown political partisanship and attempted to influence students accordingly, whilst the Opposition accused the Government of violating the academic independence of the universities and persecuting scholars who were suspected of holding views opposed to those of the Government.—(Turkish Embassy Press Department, London - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris) **(Prev. rep. 1954 Elections, 13597 A; Political Developments, 14549 A; Press Legislation, 13511 D.)**

A. SOVIET UNION. — Marshal Malinovsky succeeds Marshal Zhukov as Minister of Defence. - Marshal Zhukov dismissed from Presidium and Central Committee of Soviet Communist Party.

It was announced in Moscow on Oct. 26 (*a*) that the Presidium of the Supreme Soviet of the U.S.S.R. had "released Marshal Grigori Zhukov of his obligations as Minister of Defence," and (*b*) that Marshal Rodion Malinovsky had been appointed Minister of Defence in place of Marshal Zhukov.

Marshal Rodion Yakovlevich Malinovsky (59) was born in Odessa, served in the Russian Imperial Army as a corporal during the First World War, and after the collapse on the Eastern front made an adventurous journey *via* Siberia, Singapore and the Mediterranean to join a Russian brigade fighting in France at the side of the British, U.S. and French armies. He made his way back to Russia after the outbreak of the Revolution, joined the Red Army, and subsequently studied at Soviet military academies, rising to the rank of major-general at the time of the German invasion of the U.S.S.R. in 1941. One of Russia's outstanding generals in the Second World War, he commanded the armies which liberated Rostov, Kharkov and the Dnieper industrial region in 1943-44 and which captured Budapest in 1945. After the German surrender he was put in charge of the Soviet forces in the Far East, and led the Russian armies which advanced through Manchuria in the closing days of the war against Japan. He remained Commander of the Soviet Sixth (Far Eastern) Army after the Japanese surrender. A member of the Communist Party since 1926, he holds the Order of Lenin, the Order of Suvorov, and many other decorations.

The dismissal of Marshal Zhukov was announced on the same day as his return from an official visit to Yugoslavia and Albania (see below). No further statement was issued until Nov. 2, when it was officially announced that he had also been dismissed from the Presidium of the Central Committee of the Communist Party, and from the Central Committee itself, for "violation of Leninist principles in the leadership of the armed forces," building round himself a "cult of personality," surrounding himself with "flatterers and sycophants," and "adventurism."

After stating that the action against Marshal Zhukov (referred to throughout as "Comrade" Zhukov) had been taken unanimously at a plenary meeting of the Central Committee of the C.P.S.U., held late in October, the statement said that the meeting had been specially called to consider the "improvement of party-political work" in the Soviet armed forces. Admitting that there were still "serious shortcomings in practical party and political work" in the armed forces, the statement went on:

"The 20th Congress [of the C.P.S.U.] set before the party and the people the task of keeping our defences abreast of up-to-date military techniques and science, to ensure the security of our socialist State. Along with Commanders exercising single authority, an important part in the accomplishment of this task belongs to the military councils, political organs and party organizations of the Army and Navy. They must all firmly and consistently implement the policy of the Communist Party. The chief wellspring of the might of our Army and Navy lies in the fact that the Communist Party—the guiding and directing force of Soviet society—is their organizer, leader and instructor. We must always remember Lenin's directive that the 'policy of the military establishment, as of all other establishments and institutions' is pursued in strict accordance with the general directives given by the party through its Central Committee and under its direct control.'"

After accusing Marshal Zhukov of having "violated Leninist principles" by pursuing in the armed forces "a policy of curtailing the work of party organizations, political organs and military councils, and of abolishing the leadership and control of the party and the Government over the Army and Navy," the statement continued: "The Central Committee has established that the cult of Comrade Zhukov's personality was cultivated in the Soviet Army with his personal participation. With the help of sycophants and flatterers he was praised to the sky in lectures and reports, in articles, films and pamphlets, and his person and role in the Great Patriotic War [i.e. the Second World War] were over-glorified . . ."

Recalling the high military honours which had been conferred on Marshal Zhukov, and the high rank to which he had risen in the Communist Party, the statement went on: "As a result of insufficient party consciousness and incorrect understanding of this recognition of his services, Comrade Zhukov forfeited the party modesty taught us by Lenin; imagined that he was the sole hero of all the victories scored by our people and their armed forces under the leadership of the Communist Party; and grossly violated the Leninist principles of guiding the armed forces. Thus Comrade Zhukov has not justified the confidence reposed in him by the party. He has proved to be a politically unsteady leader, disposed to adventurism both in understanding the basic tasks of the Soviet Union's foreign policy and in heading the Defence Ministry."

In conclusion, it was stated that Marshal Zhukov would be given other work suitable to his experience and qualifications.

An article by Marshal Koniev (C.-in-C. of the Warsaw Pact forces) strongly criticizing Marshal Zhukov was published in *Pravda* on Nov. 3. The paper also gave a long list of senior military commanders who had been present at the Central Committee's meeting, saying in this connexion: "Many of them had known Zhukov for decades. They pointed out his serious shortcomings, sharply criticized his mistakes and distortions, and unanimously condemned his wrong, unparty-like behaviour in the post of Minister of Defence."

Marshal Koniev asserted that Marshal Zhukov must bear some of the responsibility for the unpreparedness of the Soviet forces at the time of the German invasion in 1941. Though his responsibility was less than Stalin's, he (Zhukov) had had at his disposal "indisputable data" of the impending German attack against the U.S.S.R., and bore "serious responsibility for the unpreparedness of our border troops in the face of sudden attack by the Fascist armies."

Describing Marshal Zhukov as "a person of unusual vanity," Marshal Koniev accused him of "immodestly" claiming a decisive role in the Battle of Berlin; of claiming that he had never suffered defeat in battle, which was "incorrect"; and of having allowed a painting of himself to be displayed in Soviet Army museums, in which he was shown astride a white horse with the ruins of Berlin in the background and the banners of defeated Germany beneath the horse's hooves. Moreover, Marshal Zhukov had "downgraded the party organization inside the armed forces to the level of purely educational forums" and had "over-estimated himself and his abilities."

The same issue of *Pravda* contained a "confession of errors" by Marshal Zhukov himself, which he was stated to have made at the plenary session of the Central Committee.

Pravda quoted Marshal Zhukov as saying that he recognized the "correctness" of the charges made against him, and also realized "the significance of the mistakes I made in the leadership of the armed forces . . . and the political mistakes I made as a member of the Central Committee and of the Presidium."

Marshal Zhukov was also quoted as saying: "The criticism against me I consider to be substantially correct, and look upon it as comradely party help to me personally and to other military workers in correctly understanding the demands and line of the party in the management of the Army and Navy, and the question of the correct party-political training of the personnel of the armed forces.

"In proposing the exaction of penalties some comrades mentioned that I had already once been excluded from the Central Committee when Stalin was alive in 1946, and that I had not understood the need to correct those mistakes for which I had been eliminated. At that time I did not admit as correct my elimination from the Central Committee and the charges brought against me. Now it is a different matter. I recognize my mistakes. I have become deeply conscious of them in the course of the plenary meeting, and I pledge my word to the Central Committee that I shall eliminate my shortcomings."

Marshal Zhukov (who had been Minister of Defence since February 1955) had paid a visit to Yugoslavia from Oct. 8-17, returning the visit paid to the U.S.S.R. in June by the Yugoslav Defence Minister, General Gosnjak (see 15731 A). While in Yugoslavia he had a meeting with President Tito at Bled, as well as discussions with General Gosnjak, and attended Yugoslav Army manoeuvres in Croatia. He returned on Oct. 26 to Moscow after paying a four-day visit to Albania.

B. ISRAEL. — Grenade-throwing Incident in Parliament. - Wounding of Israeli Ministers.

Six Ministers in the Israeli Government were injured on Oct. 29 when a hand-grenade was thrown from the visitors' gallery during a debate in the *Knesset*. The grenade, which exploded on the ministerial bench, caused superficial injuries to the Prime Minister (Mr. Ben-Gurion), the Foreign Minister (Mrs. Golda Meir) and the Ministers of Health (Mr. Barzilai), Transport (Mr. Carmel) and Trade (Mr. Saphir). The Minister for Religious Affairs, Mr. Shapiro, was seriously injured and had to undergo an immediate operation, but was later reported to be out of danger. The assailant, a 25-year-old Iraqi Jew without political connexions, was immediately arrested. He was found to be of unbalanced mentality and it was stated that he had previously been in a mental institution. (Times)

A. UNITED KINGDOM. — The Queen's Speech.

The new session of Parliament was opened on Nov. 5 by H.M. the Queen, who announced the Government's legislative programme in the following Speech from the Throne :

"My Lords and Members of the House of Commons :

"I look forward with much pleasure to the visit which the President of the Italian Republic and Signora Gronchi will pay to this country next May.

"I and my dear husband have been most profoundly moved by our recent stay in Canada and our visit to the United States of America. The warmth of the welcome which greeted us wherever we went was spontaneous evidence of the bond of common sympathy which unites the peoples of the Commonwealth and the English-speaking world.

"It will be the constant endeavour of my Government to foster this unity of sentiment and purpose among the free peoples, that they may be confirmed in their resolve to defend the right and to sustain those values on which our civilization is founded. My Government have recently held discussions in Washington with the U.S. Government, the results of which, they confidently believe, will greatly further the achievement of this aim.

"My Government will seek to strengthen the United Nations in the task of maintaining justice and peace throughout the world. They will pursue their endeavours to achieve an agreement on disarmament, mindful that, at this momentous time, the advance of science into the unknown should be inspired by the hopes, and not retarded by the fears, of mankind.

"In accordance with their belief in responsible self-government by free peoples, my Ministers will continue to promote the economic and constitutional development of the territories overseas which are in their care. They will introduce legislation to give effect to certain recommendations of the Conference held in April, 1957, about the future Constitution of Singapore. They will endeavour, in agreement with the Government of Malta, to further the plans for the closer association of Malta with the United Kingdom. They will continue to seek a just and enduring solution of the problems of Cyprus, in conformity both with the interests of the local communities and with those of this country and our allies.

"Members of the House of Commons :

"Estimates for the public services will be laid before you in due course.

"My Lords and Members of the House of Commons :

"My Ministers are resolved to take all steps necessary to maintain the value of our money, to preserve the economic basis of full employment by restraining inflation, to strengthen our balance of payments and to fortify our reserves, upon which depends the strength of sterling and hence the strength of the sterling area as a whole. My Government believe that these are purposes which should command the support of all sections of the nation.

"My Government welcome the recommendation, made by the recent meeting of Commonwealth Finance Ministers in Canada, that a Commonwealth trade and economic conference should be held in 1958. They consider that this would provide a valuable opportunity to reinforce still further the economic ties between the members of the Commonwealth.

"My Government also welcome the recent declaration by the Council of the Organization for European Economic Co-operation of their determination to promote the establishment of a European Free Trade Area. It is the firm purpose of my Ministers to seek to bring these negotiations to a successful conclusion, and so to strengthen the resources of the free world.

"A Bill will be introduced to revise and codify existing legislation relating to import duties.

"My Ministers will continue to give support to agriculture and fishing. Legislation will be introduced to amend certain provisions of the Agriculture and Agricultural Holdings Acts and to improve agricultural drainage in Scotland.

"My Government have completed a comprehensive review of the emergency powers relating to land. They will propose the repeal of certain of these powers and their replacement, so far as necessary, by statutory provisions.

"A measure will be laid before you to establish a Conservancy Authority for Milford Haven to regulate the increased maritime traffic which should result from the projected development of this important harbour.

"My Ministers will seek to promote the progressive development of the institutions of Government in this country, to enlarge the opportunities for public service, and to foster the sense of shared responsibility for the efficient discharge of the manifold functions of Government. Thus legislation will be laid before you to establish machinery for the reorganization of local government in England and Wales. This measure will also make adjustments in the rating system, and in the system of Exchequer grants to local authorities. Separate legislation will be introduced for these two purposes in Scotland.

"You will also be invited to approve a measure to permit the creation of life peerages for men and women, carrying the right to sit and vote in the House of Lords.

"My Government have considered with care the report of the Committee on Administrative Tribunals and Enquiries and will introduce legislation to give effect to certain of the recommendations of that committee.

"My Ministers will continue to promote the social welfare of my people. A Bill will be introduced to improve the arrangements for the industrial rehabilitation, training and resettlement of disabled persons.

"War pensions will be increased. Legislation will be introduced to authorize increases in retirement and other benefits, and in contributions under the National Insurance and Industrial Injuries Schemes ; and my Government will continue to study the wider problems of provision for old age.

"They will also introduce legislation amending the law relating to the adoption of children and providing for the supervision of those who take children into their care for payment.

"They will continue to pay particular attention to penal reform and the treatment of offenders, and will develop improvements in the prison system in the light of an imaginative programme of research.

"Other measures will be laid before you in due course.

"My Lords and Members of the House of Commons :

"Three weeks ago I opened the Parliament of Canada. Today I open Parliament at Westminster, where our forefathers, many centuries ago, laid the first foundations of those institutions of Parliamentary democracy which peoples throughout the world have adopted as the guardian of their rights, their liberties, and their hopes.

"From the New World I have brought a message of firm fellowship and the assurance of a common faith. Bearing in my heart the inspiration of that message, I pray that the blessing of Almighty God may rest upon your counsels."

Important legislative measures announced by the Queen included the creation of life peerages for men and women, a reform which will enable women to sit in the House of Lords for the first time ; reorganization of local government ; the repeal of certain emergency powers relating to land ; the establishment of a Conservancy Authority for Milford Haven ; pensions increases ; and amendment of the law relating to the adoption of children.

The forthcoming visit of the Italian President to Britain, referred to by her Majesty, had been announced from Buckingham Palace and in Rome on Oct. 29. The announcement stated that President and Signora Gronchi had accepted an invitation from the Queen to pay a State visit to London from May 13-15, 1958. It will be the first visit to Britain by the head of the Italian State since 1924, when King Victor Emanuel III and Queen Elena visited London.– (Times)

(Prev. rep. 15199 A.)

B. SYRIA - SOVIET UNION. — Signing of Agreement on Soviet Economic and Technical Aid.

Following the visit of a Soviet economic delegation to Syria (see page 15811, second column), an agreement on economic and technical co-operation between the two countries was signed in Damascus on Oct. 28 by M. Sabry Assali, the Syrian Prime Minister, and M. Nikitin, vice-chairman of the Soviet State Committee for Foreign Economic Relations and leader of the Soviet delegation. The principal provisions of the agreement were stated to be as follows :

(1) The U.S.S.R. would give technical and economic aid for 10 projects, including the building of dams and hydro-electric stations on the Euphrates, Yarmuk, and Orontes rivers ; the construction of an irrigation system benefiting 190,000 hectares (733.6 sq. miles) ; the building of two railway lines, one linking Aleppo with Kamechlieh (312 miles) and the other from Homs to the port of Latakia (95 miles) ; the construction of a nitrogen fertilizer plant ; the building of new and the reconstruction of existing road bridges ; the preparation of a geological map of Syria ; and the carrying-out of geological prospecting with regard to Syrian national resources.

(2) Soviet aid would be given in the form of designing, prospecting, and research work, the supply of equipment and materials, and other services connected with the above-mentioned projects.

(3) The U.S.S.R. would grant to Syria a 12-year rouble credit in respect of the cost involved, bearing interest at 2½ per cent p.a. and being repayable either in freely convertible foreign currencies or through the delivery of goods.

(4) The agreement would come into force on the exchange of ratification instruments.

The total amount involved was not officially given, but according to unofficial reports from Damascus the Soviet aid will amount to $98,000,000, or about £35,000,000.

C. RHODESIA AND NYASALAND FEDERATION. — Lord Dalhousie installed as Governor-General.

Lord Dalhousie was formally installed as Governor-General of the Federation of Rhodesia and Nyasaland on Oct. 8 in succession to the late Lord Llewellin. The ceremony at Government House in Salisbury was attended by Sir Roy Welensky, Prime Minister of the Federation, and Mr. Garfield Todd, Prime Minister of Southern Rhodesia. (Federal Information Dept.)

(Prev. rep. 15501 B.)

A. INTERNATIONAL ATOMIC ENERGY AGENCY. — Inaugural Congress in Vienna. - Elections to Board of Governors. - Mr. Sterling Cole appointed Director-General of I.A.E.A. - First Programme and Budget.

The foundation conference of the International Atomic Energy Agency was held in Vienna (the permanent headquarters of the Agency) from Oct. 1 - 23. The conference, attended by representatives of 59 countries, took place in the Vienna *Konzerthaus* and was opened by the President of Austria (Dr. Adolf Scharf), who described it as "an important landmark in the history of the world." Dr. Karl Gruber, Austrian Ambassador in Washington and former Foreign Minister of the Austrian Republic, was elected president of the conference by acclamation.

Messages welcoming the establishment of the I.A.E.A., and stressing the importance for mankind of the "atoms-for-peace" programmes for which it would be responsible, were sent by many heads of States and Governments, including President Eisenhower, President Voroshilov, and Mr. Macmillan.

At the opening of the conference the U.S.S.R. and Czechoslovakia jointly presented a resolution proposing that all countries wishing to do so should participate by sending observers. This proposal (which would have allowed Communist China and Eastern Germany, for example, to be represented) was rejected by 35 votes to 13, with Morocco abstaining. In its place, the conference adopted a Canadian amendment proposing that all countries in membership of the United Nations or any of its specialized agencies, but not in membership of the I.A.E.A., should be permitted to send observers. The Soviet-Czechoslovak resolution was supported by Bulgaria, Byelorussia, Ceylon, Egypt, Hungary, India, Indonesia, Poland, Rumania, the Ukraine, and Yugoslavia, in addition to the two sponsors.

A Soviet attempt to invalidate the credentials of the Chinese Nationalist delegation was similarly rejected by 25 votes to 16, the minority vote including India, Indonesia and Yugoslavia.

The principal features of the conference were (1) the completion of elections to the Board of Governors of the I.A.E.A., on which 23 countries are represented; (2) the election of Mr. W. Sterling Cole (U.S.A.) as Director-General of the Agency; and (3) the adoption of the Agency's first programme and budget.

Board of Governors. As laid down in the Statute of the I.A.E.A., the 23-nation Board of Governors is chosen as follows: (*a*) 13 members elected by the Agency's Preparatory Commission, comprising five nations regarded as "the most advanced in the technology of atomic energy," five other countries where atomic technology is in an advanced state, two major suppliers of source materials, and one supplying technical assistance; (*b*) seven countries elected on a geographical basis; and (*c*) three members elected "at large." The Statute laid down that the countries under (*b*) and (*c*) were to be elected at the first conference of the I.A.E.A.

The 13 members under (*a*) were elected by the Preparatory Commission on July 31, prior to the opening of the conference. They were: Australia, Brazil, Canada, Czechoslovakia, France, India, Japan, Portugal, South Africa, Sweden, the U.S.S.R., the United Kingdom and the United States. The other ten members were elected by secret ballot during the conference, those elected to represent geographical areas being: Argentina (Latin America), Italy (Western Europe), Rumania (Eastern Europe), Egypt (Africa and Middle East), Pakistan (South Asia), Indonesia (South-East Asia and Pacific) and South Korea (Far East). The three members elected "at large" were Guatemala, Peru, and Turkey.

Dr. Pavel Winkler (Czechoslovakia) was unanimously elected chairman of the Board of Governors.

Director-General of Agency. Mr. William Sterling Cole (53), a Republican member of the U.S. House of Representatives, was unanimously chosen by the Board of Governors as the first Director-General of the I.A.E.A., to serve for a four-year term. His election was approved in closed session (Oct. 4) and was subsequently agreed to at a plenary session of the conference without opposition. No alternative candidate was put forward, although the Soviet delegate (Professor Emilianov) said that his Government would have preferred a representative of one of the "neutral" countries to have filled the office, rather than a representative of a great Power.

Mr. Sterling Cole, a lawyer, has been a member of the U.S. House of Representatives for Bath (New York State) since 1935. He has served on the Joint Congressional Committee on Atomic Energy since its creation in 1946, acting as chairman in 1953-54, and was a member of the U.S. delegations both to the atoms-for-peace conference held at Geneva in 1955 and the conference which drew up the Agency's Statute in New York in 1956. As Director-General of the I.A.E.A. he will be assisted by a staff of about 370. Until Mr. Cole's resignation from the U.S. Congress the functions of Director-General will be discharged *ad interim* by Dr. Paul Jolles (Switzerland), the acting Secretary-General of the I.A.E.A. and previously Executive Secretary of the Preparatory Commission which drew up the Agency's Statute in 1956.

The candidature of Mr. Cole was proposed to the Agency by the U.S. Government, whose recommendation stated in part: "It was under his chairmanship that the basic U.S. law concerning atomic energy was rewritten to make it possible for peaceful uses of atomic energy to be developed more rapidly in the United States and for these applications to be made broadly available to other nations. This legislation authorized, among other things, U.S. activities in establishing the International Atomic Energy Agency."

Agency's First Programme and Budget. The conference unanimously approved a first atoms-for-peace programme laying special emphasis on measures to help improve conditions in the under-developed countries. It called specifically (1) for the Board of Governors to give high priority to items designed to give maximum possible benefit in raising living standards in under-developed areas; (2) for members to make voluntary contributions to the I.A.E.A. towards the provision of technicians and scientists for the under-developed areas; (3) for expenditure of $250,000 from the Agency's general fund for establishing fellowships; and (4) for a reactor-building programme.

A budget of $4,089,000 (about £1,460,000) was approved for the Agency's first year, to be contributed by member-nations on a basis similar to their contributions to the U.N. Budget. Under provisional scales the United States will contribute $1,363,000 (33 per cent), the Soviet Union $682,000 (16 per cent), and Great Britain $307,000 (7.5 per cent), followed by France (5.47 per cent), the German Federal Republic (4.08), Canada (3.02) and India (2.85).

During the conference a number of countries promised to make fissionable material available for the Agency's "atoms-for-peace" programmes, and to provide facilities for training and research. The most important offers were made by the United States, the U.S.S.R., Great Britain, and Portugal.

The U.S. delegate announced that his Government would offer 5,000 kilograms (11,000 lb.) of Uranium-235 to the Agency's "pool," together with a research reactor, an isotopes laboratory, and a comprehensive technical library on the peaceful uses of atomic energy.

[A Bill permitting the United States to make small quantities of nuclear materials available to the I.A.E.A. for "atoms-for-peace" purposes, but requiring the President to obtain Congressional approval for furnishing large amounts of material, was signed by President Eisenhower on Aug. 28. It supplemented the legislation signed by the President on July 29—see 15780 A].

The Soviet representative promised 50 kilograms (110 lb.) of U-235 on behalf of his Government, and also announced that the U.S.S.R. was ready to receive 50-100 students from member-countries, to provide 50 scholarships for students from the under-developed areas, and to train specialists in the use of radioactive isotopes in science, medicine, industry and agriculture.

The British delegate announced that H.M. Government would place 20 kilograms (44 lb.) of U-235 at the Agency's disposal, and would also make fellowships available, provide radioactive isotopes, and help in the training of technical staff. It was pointed out that Britain had exported isotopes to 52 countries during 1956, and that British experience in this and related fields could form an important contribution to the Agency's work.

Portugal (which has large deposits of uranium but no facilities for enriching it) offered to make available 112½ tons of uranium oxide, from which 1,575 lb. of U-235 could be produced.

In a statement at the end of the conference, Dr. Jolles spoke of the "very encouraging" nature of the discussions and the "atmosphere of conciliation" in which the discussions had taken place; political issues between East and West had been raised but were never pressed home, and all important decisions had been taken unanimously. The most important result of the conference had been the offers by various countries to place at the disposal of the I.A.E.A. a total of 5,140 kilograms of U-235 and 200 tons of natural uranium. Dr. Jolles pointed out that the quantity of U-235 made available was sufficient to keep 20 reactors of 140 megawatts capacity going for ten years.

Dr Jolles also announced that membership of the I.A.E.A. had risen to 59 States; that Finland had applied for membership during the conference; and that one of the Agency's first and most important tasks would be the recruitment and training of permanent staff for its Vienna headquarters. The Agency was also offering 100 fellowships, which it was hoped to finance by voluntary contributions, in addition to the fellowships offered by Great Britain, the Soviet Union, and other countries.

The next general conference of the I.A.E.A. will be held at Vienna in September 1958.—(U.N. Information Centre, London - Times - Manchester Guardian - New York Times - Le Monde, Paris - Soviet Embassy Press Department, London)

(Prev. rep. I.A.E.A., 15780 A; Statute, 15261 A.)

B. TURKEY - FRANCE. — Agreement on Construction of Bosphorus Bridge.

The final agreement providing for the construction of a bridge across the Bosphorus by the *Société Française d'Entreprises Industrielles* was signed by the French and Turkish Governments on Oct. 21. The cost of the project was estimated at $35,000,000 (about 14,000,000,000 French francs). The French Government agreed to grant Turkey a credit of between $20,000,000 and $25,000,000, repayable within nine years, the balance of the expenditure being financed by Turkey herself.—(Le Monde, Paris) **(Prev. rep. 15717 B.)**

A. SOVIET UNION. — Civil Aviation. - Building of World's Largest Airliner. - Soviet Civil Aircraft Types.

Simultaneously with the launching of the second Russian earth satellite (see 15835 A), it was announced by Moscow Radio on Nov. 3 that the world's largest airliner, the TU-114, had been built in the Soviet Union. It was stated that the aircraft could carry up to 220 passengers, though its normal complement would be 170 (reduced to 120 on inter-continental flights); that its four turbo-prop engines had twice the power of those in any foreign aircraft; and that the plane could make 10 to 12 hours non-stop flights between Moscow and Vladivostok, Peking, Tokio, Delhi, Rangoon, or New York.

Moscow Radio said that one of the features of the TU-114 was a restaurant which could seat 48 people, served from two kitchens placed one above the other and connected by a lift. It was claimed that the airliner's big carrying-capacity, long range, and high speed would make possible considerable reductions in air fares and might even reduce them to the level of rail fares.

Although no name was given to the new aircraft, it was believed to be the Tupolev *Rossiya*, a civil development of the Russian four-engined swept-wing turbo-prop bomber known as the "Bear." The Aeronautical Correspondent of *The Times* said that the *Rossiya* was reported to have a range of between 4,300 and 5,100 miles and a cruising speed of over 500 m.p.h. It was designed for Aeroflot (Soviet Airlines) by M. Andrei Tupolev, Russia's leading aircraft engineer and designer of two other large turbo-prop airliners (the TU-104 and TU-110) already in service.

The TU-104 first went into service on the Moscow-Irkutsk route on Sept. 15, 1956 and is now flying regular services from Moscow to Khabarovsk, Tashkent, Tiflis, Prague, and Peking. New lines are projected from Tashkent to Novosibirsk and from Moscow to Vladivostok, and it is planned in December to open a service with TU-104 aircraft between Moscow and Copenhagen. When inaugurated, it will be the first regular passenger service between Moscow and a non-Communist capital, although the TU-104 has made special flights to London, Paris, Zürich, Delhi, Rangoon, and Jakarta.

Four new types of Soviet civil aircraft were displayed for the first time in July last at a Moscow aviation show—the TU-104A (a tourist version of the TU-104), the TU-110, the *Moskva*, and the *Ukraina*. The TU-104A carries 70 passengers and has a speed of 500-600 m.p.h.; its two engines are claimed to be more powerful and more economical than those of its predecessor. The TU-110 has approximately the same speed (500-600 m.p.h.) and is able to fly non-stop for 2,000 miles; it has two variations, for 78 and 100 passengers respectively.

The *Moskva*, designed by M. Serge Ilyushin, has four turbo-prop engines and can carry 75-100 passengers at a cruising speed of about 400 m.p.h. One of its features is its low landing speed, enabling it to land on any airfield. The *Ukraina*, designed by M. Antonov, is also a four-engined turbo-prop and can carry 84-126 passengers, like the *Moskva*, it can land at slow speed on any airfield.

All the types mentioned above are designed for service on internal and international routes, including non-stop flights from Moscow to Irkutsk, Delhi, and Paris, from Irkutsk to Peking, and from Paris to New York.

Marshal Zhigarev, the head of Soviet civil aviation, stated on Nov. 3 that Russian airlines would be entirely equipped with jet and turbo-jet aircraft by 1960.
(Soviet Embassy Press Department, London)

B. VATICAN. — New Radio Station.

The new Vatican Radio station, one of the most powerful in the world, was inaugurated on Oct. 25 by the Pope, who broadcast a speech in Latin appealing for world peace and making special reference to the tension in the Middle East. The station is situated at Santa Maria di Galeria, 15 miles north of Rome, and covers a 1,000-acre site which, by special agreement with Italy, enjoys extra-territorial status and is under Vatican sovereignty. Round-the-clock broadcasts will be made in some 30 languages and will reach all parts of the world, including North and South America and the Far East in addition to countries behind the "Iron Curtain." The station will be run by the Jesuits under the direction of Father Stefanizzi, director of Vatican Radio. (Osservatore Romano)

C. SPEED RECORDS. — New World Water Speed Record set up by Mr. Donald Campbell.

Mr. Donald Campbell established a new world water speed record of 289.07 miles an hour on Nov. 7 in his jet-engined speedboat *Bluebird*, thereby beating his own previous record of 225.6 m.p.h. set up in 1956. The new record was set up in two runs on Coniston Water (Lake District), the first run over a measured kilometre being 260.10 m.p.h. and the second being reduced to 218.02 m.p.h. owing to a swell on the lake, giving an average of 289.07 m.p.h.—(Times) **(Prev. rep. 15111 B.)**

D. CANADA. — Royal Commission on Energy.

The Canadian Prime Minister, Mr. Diefenbaker, announced on Oct. 15 that the Governor-General in Council had established a Royal Commission to inquire into and make recommendations concerning a number of matters relating to energy and sources of energy that fell within the jurisdiction of Parliament.

The Royal Commission will inquire into and make recommendations concerning:

(*a*) "The policies which will best serve the national interest in relation to the export of energy and sources of energy from Canada;

(*b*) "The problems involved in, and the policies which ought to be applied to, the regulation of the transmission of oil and natural gas between provinces or from Canada to another country, including, but without limiting the generality of the foregoing, the regulation of prices or rates to be charged or paid, the financial structure and control of pipeline corporations in relation to the setting of proper prices or charges, and all such other matters as it is necessary to inquire into and report upon, in order to ensure the efficient and economical operation of pipelines in the national interest;

(*c*) "The extent of authority that might be best conferred on a National Energy Board to administer, subject to the control and authority of Parliament, such aspects of energy policy coming within the jurisdiction of Parliament as it may be desirable to entrust to such a board, together with the character of administration and procedure that might be best established for such a board;

(*d*) "Whether, in view of its special relationship to the Northern Ontario Pipeline Crown Corporation and the nature of its financing and control, any special measures need be taken in relation to Trans-Canada Pipe Lines, in order to safeguard the interests of Canadian producers or consumers of gas; and

(*e*) "Such other related matters as the Commissioners consider it necessary to include in reporting upon the powers already specified."

Mr. Diefenbaker added that there was a special clause in the Order-in-Council to ensure that the establishment of the Commission, and the conduct of its inquiries, should not delay the negotiations relating to waters crossing the international (i.e. Canadian-U.S.) boundary.

The following were appointed members of the Commission: Mr. Henry Borden, Q.C., of Toronto; Mr. J. Louis Levesque, of Montreal; Mr. George Britnell, of Saskatoon; Mr. Gordon Cushing, of Ottawa; Mr. Robert Howland, of Halifax; and Mr. Leon Ladner, of Vancouver.—(Department of External Affairs) **(Prev. rep. Trans-Canada Pipelines, 15513 C.)**

E. PORTUGAL. — Setting-up of Corporations for Agriculture, Transport and Tourism, Credit and Insurance, and Fishing and Canning.

Four of the six Portuguese corporations, the creation of which had been provided for by legislation promulgated in August 1956, were set up under a decree issued in Lisbon on Sept. 28, 1957. The corporations concerned were for agriculture, transport and tourism, credit and insurance, and fishing and canning, each of them being formed by representatives of employers' and workers' organizations.

Dr. Veiga de Macedo, the Minister of Corporations, stated on Sept. 25 that an essential element of the Portuguese corporative system was the principle of parity between capital and labour. A representative of the Government would be attached to each corporation with the task of "defending the interests of the community and the consumers," and would be authorized to suspend the implementation of resolutions which were considered detrimental to the higher interests of the country, pending a final decision by the Corporative Council (see below).

The new corporations will exercise certain political functions; represent and defend the common interests of their respective branches *vis-à-vis* the Government; assist in the negotiation of collective agreements; develop social services and insurance; and lay down disciplinary rules for their respective branches. Their principal organs will be a Corporative Council, sectional councils, a directorate, and a disciplinary court.

The legislation of 1956 also provided for the setting-up of corporations for industry and commerce respectively.
(Le Monde Paris - Bank of London and South America) **(Prev. rep. 14990 B.)**

F. HUNGARY. — Prince Wan refused Admission.

The spokesman of the Hungarian Ministry of Foreign Affairs announced on Oct. 12 that the Hungarian Government had refused a request by Prince Wan Waithayakon for a visa to visit Hungary in order to carry out the mission entrusted to him by the U.N. General Assembly on Sept. 14. The spokesman added that the Hungarian Government regarded the U.N. resolution as "null and void" and could therefore not agree to the presence of U.N. observers in the country.
(Le Monde, Paris - New York Times) **(Prev. rep. 15777 A.)**

NOVEMBER 9—16, 1957

A. FRANCE. — Enactment of Emergency Powers Bill for Algeria. - Extension of Emergency Powers to Metropolitan France. - National Assembly rejects Constitutional Reform Bill. - Fall of Bourgès-Maunoury Cabinet. - National Assembly refuses Investiture to M. Pinay and M. Mollet. - M. Gaillard confirmed as Prime Minister. - Formation of Gaillard Cabinet.

The Government of M. Bourgès-Maunoury was defeated in the French National Assembly on Sept. 30 in a confidence vote on its Bill authorizing certain constitutional changes in Algeria (*loi-cadre pour l'Algérie*). Earlier, in July, the French Parliament had passed legislation granting to M. Bourgès-Maunoury's Government an extension of the emergency powers for Algeria which had been voted to M. Mollet's Government ; at the same time these powers were broadened to enable the authorities to deal with the growing terrorism by Algerians living in Metropolitan France directed against other Algerians in the metropolitan territory. These developments are summarized below under cross-headings.

Extension of Emergency Powers of Bourgès-Maunoury Government.

The Emergency Powers Bill as finally adopted comprised the following provisions :

Art. 1. An extension of the emergency powers under the legislation of March 16, 1956, which authorized the Government to carry out in Algeria a programme of economic development, social progress, and administrative reform, and empowered it to take any extraordinary measures considered necessary for the re-establishment of public order, the protection of people and property, and the security of the territory. These powers, however, were limited to the lifetime of M. Bourgès-Maunoury's Government, and it was laid down that any new Government would have to obtain a further extension from Parliament within 10 days of its investiture.

Art. 2. Any individual condemned for treason, espionage, illegal possession of arms or explosives, active support of banned movements, or disobedience or resistance to constituted authority could be sent to a place of fixed residence in Metropolitan France after his prison sentence. This measure could be carried out irrespective of any appeal lodged against the court's decision, but would automatically lose its validity if the person concerned was subsequently acquitted.

Art. 3. Anyone evading an Order committing him to a place of forced residence would be liable to imprisonment from one month to a year, and a fine of 50,000 to 500,000 francs.

Art. 4. During the period of the emergency powers anyone accused and arrested on suspicion of the above-mentioned crimes or offences, provided these were punishable by at least two years' imprisonment, could be held under detention without judicial order for up to 21 days, instead of the five-day period laid down in the code of criminal procedure.

Art. 5. When investigating crimes enumerated under Article 2, the police could search a suspect's home by night as well as by day. [Night searches are not usually permitted under existing law.]

The Government had originally proposed that the special powers should apply in Metropolitan France only to persons born in Algeria, but this aroused strong protests on the ground that it implied racial discrimination ; the Algerian birth qualification was therefore withdrawn. Further objections were raised when the Bill came before the National Assembly's Commission for the Interior, which on July 11 rejected the extension of the emergency powers to Metropolitan France altogether—the voting being 15 (Poujadists and Communists) against 11 (Socialists, etc.), with 14 abstentions (all the Radicals save one, the Independents and *paysans*, the Social Republicans, and the M.R.P. members).

The debate in the full Assembly opened on July 16, and during a confused all-night sitting on July 17-18 a number of amendments to Article 2 were adopted which virtually destroyed the Government's text. M. Bourgès-Maunoury thereupon announced on July 18 that the Government would ask for a vote of confidence on its version of Articles 2-5 of the Bill, which, however, incorporated two of the amendments adopted : (i) the omission of an earlier provision under which persons committed to forced residence could be sent to Algeria ; (ii) limitation of the period of detention without judicial decision to 21 days, instead of the original provision for unlimited detention. The revised version also incorporated an amendment to Article 1, previously adopted by the Assembly, under which any new Government would have to seek an extension of the emergency powers within 10 days of its investiture.

During the debate on July 17-18 M. Bourgès-Maunoury defended the Government's demand for an extension of the emergency powers to Metropolitan France, where, he said, the terrorists were trying to increase their activities after they had been checked in Algeria. He pointed out (*a*) that during the first six months of 1957 there had been in the Paris area alone 174 terrorist incidents amongst Algerians, which had caused 73 deaths and 198 other casualties ; (*b*) that the Algerian Liberation Front was imposing a compulsory levy on the wages of the 300,000 Algerian workers in France, who sent over 40,000,000,000 francs annually to their families ; and (*c*) that Algerian terrorists in Metropolitan France believed that they could carry out their activities with impunity because the Government lacked the powers with which it had been able to destroy a large number of their cells in Algeria itself.

During his speech the Prime Minister quoted from a letter found in the papers of Ben Bella [the arrested leader of the National Liberation Front—see 15329 A] in which a member of the Front's central committee had urged the movement's leaders in France to proceed with the "glorious spectacular action" which they were expected to undertake. The letter added : "We will only consider you as militants of the National Liberation Front if the papers devote entire pages to your action in France . . . Don't bother any longer with political history, but carry out terrorism." Rejecting the suggestion that the Bill would lead to a "dictatorship," M. Bourgès-Maunoury declared that the powers demanded by the Government were, on the contrary, necessary to save liberty in France and to prevent a feeling of general insecurity from spreading in French factories and workshops.

The Government received a vote of confidence on July 19 by 280 votes to 183, with 29 abstentions and 79 deputies not taking part in the division.

The majority vote included 73 of the 101 Socialists, 26 of the 45 Radicals, 10 out of 22 members of the U.D.S.R.-R.D.A., 11 of the 13 dissident Radicals, 11 of the 13 members of the R.G.R., 46 of the 74 Popular Republicans (M.R.P.), 13 of the 21 Social Republicans, 82 of the 95 Independents, four of the eight *paysans*, and four of the 11 *non-inscrits*.

The minority vote comprised 130 out of the 143 Communists, the six *progressistes* (allied to the Communists), 29 out of 37 Poujadists, 10 Radicals (including MM. Daladier and Mendès-France), two U.D.S.R., one Overseas Independent, one Social Republican, one *paysan*, and three *non-inscrits*.

The abstentions consisted of 13 M.R.P. deputies, five Poujadists, three U.D.S.R., three Social Republicans, two Radicals, two *paysans*, and one *non-inscrit*. Those not taking part in the vote comprised 26 Socialists, 13 Communists, eight M.R.P., seven U.D.S.R.-R.D.A., six Overseas Independents, five Radicals, four Social Republicans, four Independents, three Poujadists, one dissident Radical, one R.G.R., and one *non-inscrit*.

The Emergency Powers Bill was adopted by the Council of the Republic without amendment on July 25, the voting being 269 in favour and 25 against.

During the debate M. Benhabyles (*Gauche Démocratique*), senator for Constantine and one of the few Algerian Moslem members still attending the meetings of the Council, described the Government's policy as "a vicious circle" and said that even the most draconian military measures would not be able to end the Algerian revolt. While Algeria wanted to receive her independence from France, no Algerian desired the humiliation of France ; there was now only one man left in France who could initiate the necessary negotiations —namely, General de Gaulle.

M. Bourgès-Maunoury repeated an undertaking (which he had already given in the National Assembly) to the effect that the Government would soon submit a draft Bill for a *loi-cadre* embodying constitutional changes in Algeria.

National Assembly rejects Constitutional "Outline Law" for Algeria. - Fall of Bourgès-Maunoury Government.

In accordance with his promise during the debates on the Emergency Powers Bill, M. Bourgès-Maunoury started discussions during August with members of his Cabinet and parliamentary leaders on the scope and contents of a *loi-cadre* outlining certain constitutional reforms in Algeria. Although it was announced on Aug. 19 that the Prime Minister and M. Lacoste (the Minister-Resident in Algeria) were in complete agreement about the main features of the Government's new plan, difficulties subsequently arose within the Cabinet when the Ministers discussed detailed provisions of the legislation. The principal objections to the terms of the draft Bill (on which the Cabinet agreed on Sept. 12-13) were raised by M. André Morice, the Defence Minister, who expressed himself strongly opposed to the creation in Algiers of any political Assembly or any autonomous executive, in contrast to the Socialist Ministers' insistence on an Algerian legislature and executive as laid down in the draft of the *loi-cadre*. Whilst M. Morice finally agreed to accept provisionally the views of the rest of the Cabinet, he reserved his position pending discussions with his colleagues in the Dissident Radical party. M. Morice's reservations were supported by the Independents and Social Republicans (Gaullists), whilst the French Senators for Algeria likewise told M. Bourgès-Maunoury that they were categorically opposed to the granting of political powers to any federal assembly or executive in Algiers.

PUBLIC LIBRARY
DEC 23 1957

On Sept. 16 M. Morice announced that he would not put his signature to the Government's draft Bill and that his stand had been endorsed by his 13 party colleagues, whilst two days later he told the Cabinet that he and three junior Ministers—all Dissident Radicals—would resign if the Government persisted in going ahead with the Bill in its present form. In the light of this situation M. Bourgès-Maunoury proposed that a "round-table conference" of all party leaders, excluding the Communists and Poujadists, should be held on Sept. 20 to work out a compromise on the Bill and to rally "a large majority" for it in the Assembly. The Prime Minister's proposal was agreed to by the other Ministers.

After "round-table" discussions on Sept. 20-21 lasting 19 hours, M. Bourgès-Maunoury succeeded in achieving a compromise by shelving a decision on the powers of the proposed Algerian federal executive and limiting the potential functions of the federal assembly.

Under the Bill in its previous form it had been laid down that certain functions could be transferred to the federal assembly by the new territorial assemblies, as well as by the French Parliament. This was strongly opposed by the Right-wing parties, which expressed concern lest the federal assembly might eventually assume autonomous functions and become a stepping-stone towards complete Algerian independence. Under the above-mentioned compromise the clause relating to the possible transfer of functions by the French Parliament was dropped altogether, whilst the transfer of powers by the territorial assemblies was restricted to the purpose of co-ordination, "without infringing upon territorial autonomy."

As regards the federal executive, the Government had originally suggested that it should be presided over by an Algerian, whereas M. Morice and the Right-wing parties insisted that it be headed by a Minister responsible to the French Government. The "compromise" provided (*a*) that the clause relating to the presidency of the federal executive council would be dropped, and (*b*) that the Government, within 18 months after the election of the territorial assemblies, would introduce a Bill defining the conditions under which the federal executive was to operate.

The Universal Suffrage Commission of the National Assembly accepted the Bill on Sept. 24 with some modifications, but the Commission of the Interior, after a 20-hour discussion during which it adopted a number of amendments substantially altering the Bill, decided on the same day not to submit any report on it. This decision followed the resignation of the Commission's *rapporteur*, M. Roclore (Independent), who had strongly opposed many features of the Bill, and, in particular, had demanded that the explicit reference to the introduction of a single electoral college should be replaced by a clause merely abolishing the existing "double" electoral college—a proposal which was rejected by the Commission.

The National Assembly opened its debate on the Bill on Sept. 25 and continued it on Sept. 26, several amendments being adopted. On Sept. 27, however, before detailed discussion of the various articles of the Bill, M. Bourgès-Maunoury put the question of confidence in respect of the Bill as a whole, as revised on the basis of the "round-table conference" and incorporating several amendments moved or adopted during the debates. In this amended form the principal provisions of the Bill were as follows :

Art. 1. "Algeria is an integral part of the one and indivisible French Republic. Its Departments are grouped in territories federated with each other, which freely and democratically conduct their own affairs. The French Republic recognizes and guarantees the individual character of Algeria (*personalité algérienne*), takes account of its diversity by instituting territorial autonomy, and ensures the common interests by creating federal institutions. All citizens of the Republic living in Algeria have a share in French sovereignty."

Art. 2. "Algeria's federal institutions will result from agreement between the territories."

Art. 3. "The Republic guarantees to all citizens without distinction an equal enjoyment of all the democratic, political, economic, and social rights and liberties that are the prerogatives of French citizenship. Conversely, they are subject to the obligations deriving from those rights.

"The Republic places under its protection the rights and liberties of the various communities, and guarantees them against any interference with their equality in their mutual relations on a basis of co-existence.

"Any political, economic, social, or cultural measure involving arbitrary discrimination is null and void."

Art. 4. "All persons possessing citizenship will preserve their status, but may renounce it."

Art. 5. "Government by the people for the people is assured in Algeria by universal, equal, and secret suffrage, both in territorial and in national elections. The Republic guarantees the freedom and integrity of elections, with a single electoral college, and with equitable and statutory representation of the various communities at all levels.

"Special legislation will determine the methods of election to the various Assemblies with a view to assuring the statutory and authentic representation of minority communities, and will thus guarantee to the minorities a number of seats corresponding to the total number of votes obtained by them in each Department or Territory. If a Bill regulating the electoral procedure is not passed by Parliament within three months after its introduction, the Government may issue a decree determining the electoral procedure on the above-mentioned basis."

Art. 6. "The organs provided for under the present Bill will exercise their powers with full respect for international agreements, the principles laid down in the French Constitution, and those recognized under the present legislation."

Art. 7. "Under the autonomy principle each Territory has the right to conduct its affairs freely and democratically through a Territorial Assembly, elected in accordance with Article 5, and through a Government responsible to the Assembly on conditions laid down by the latter. All matters not expressly assigned to the central organs of the French Republic or their representatives, or to local authorities, will be dealt with by the Territorial organs."

Art. 8. "All citizens of the French Republic in Algeria enjoy a territorial citizenship according to their birthplace, enabling them to exercise the franchise in territorial elections and giving them access to public office in the Territories. French citizens not born in Algeria may acquire territorial citizenship through residence under the conditions laid down in accordance with Art. 24 [below], whilst the acquisition of citizenship of any Territory by the holder of another territorial citizenship will be regulated in the same way."

Art. 9. "The Representative of the French Republic in each Territory designates the person charged with the formation of a [Territorial] Government . . . whose members must be presented at his investiture by the Territorial Assembly. The Representative of the Republic signs the decrees for Ministerial appointments."

Art. 10. "After two years following its election each Territorial Assembly can decide which of its functions it wishes to transfer to Federal organs for the purpose of co-ordination, without infringing upon territorial autonomy." [Originally the Bill laid down that the French Parliament could transfer to the Federal and Territorial organs certain functions reserved to the French Republic, but this was dropped after the "round-table conference."]

Art. 11. "When decisions *re* Article 10 have been taken by more than one-half of the Territorial Assemblies, a Federal Assembly will be set up, comprising an equal number of delegates from each of the Territorial Assemblies of all the Territories, elected from among their membership in accordance with Article 5."

Art. 12. "The Federal Council consists of delegates elected by each Territorial Assembly in equal numbers and for a fixed period. It will carry out the decisions of the Federal Assembly after their promulgation.

"Within 18 months after the election of all Territorial Assemblies the French Government will introduce a Bill determining the conditions under which the Federal Council is to function. If, however, this Bill has not been passed by the French Parliament before the first meeting of the Federal Assembly, the conditions will be laid down by decree."

[The original version of the Bill said that the meetings of the Federal Council would be presided over by the Minister representing the French Republic, whilst its work would be directed by one of its own members, who would be elected annually from each of the Territorial delegations in turn. This version, however, was dropped after the "round-table conference."]

Art. 13. "All French citizens in Algeria will participate in the exercise of the national sovereignty through their representatives in the French Parliament, and will also be represented in the other Assemblies provided for under the French Constitution. The conditions of their representation will be laid down by special legislation."

Art. 14. "The French Republic will retain control over the following subjects : nationality and French civil rights ; foreign affairs, national defence, and general security ; electoral matters and the organization of Algerian political institutions (see Article 22) ; currency, finance, Customs, taxes, and State expenditure ; justice and criminal law, with certain exceptions ; education, as far as preparations for all State examinations are concerned ; administration of public mineral and energy resources ; public services and establishments."

Art. 15. "The depository of the powers of the Republic in Algeria will be a Minister, a member of the French Government. He may be assisted by one or several Secretaries of State."

Art. 16. "The above-mentioned Minister will direct the Civil Service, except for justice and education, and will have authority over Government servants in Algeria. He will see that the provisions of the present law and of the French Constitution are obeyed, and will preside over the meetings of the Federal Council. In the event of inability to carry out his functions he will be replaced by one of the State Secretaries."

The Minister would also supervise the implementation of the decisions of the Court of Arbitration and would promulgate the decisions of the Federal Assembly within 15 days of their adoption ; but during this 15-day period he could return the matter to the Assembly for a new decision—a demand which could not be rejected. Within 15 clear days after the first or second reading of a Bill he could either bring the matter before the *Conseil d'Etat* or lodge an appeal

with the Court of Arbitration, with suspensory effect in respect of the legislation concerned; a decision must then be given within six months, otherwise the appeal would automatically lapse and the legislation would be promulgated.

Art. 17. "The Representative of the Republic in each Territory will be appointed by the President of the Republic in Council [i.e. with the approval of the French Cabinet]. Under the authority of the Minister in Algiers, each Territorial Representative will direct the activities of Government servants in his Territory and ensure that the institutions, rights, and liberties guaranteed under the Constitution and the present law are respected."

Art. 18. "The Representative of the French Republic in each Territory will preside at meetings of the Territorial Governments. He will promulgate the decisions of the Territorial Assemblies in the same manner as laid down in Article 16 for decisions of the Federal Assembly."

Art. 19. A Court of Arbitration would "ensure the juridical protection of the co-existence of the various communities on a basis of equality, and of the rights and liberties guaranteed to these communities." The juridical protection of the rights and liberties guaranteed to individual citizens would be a matter for the law courts and administrative tribunals.

Art. 20. "The Court of Arbitration will consist of (*a*) eight to ten members appointed by the President of the Republic on the grounds of their competence and independence, and (*b*) a president elected by the members of the court from outside its membership, and similarly appointed by the President of the Republic."

Art. 21. There would be no appeal from the decisions of the Court of Arbitration.

Art. 21*a*. "The economic and social development of Algeria will be guaranteed by the French Republic, and the Re-equipment Fund created under a decree of Aug. 10, 1957, will be supplied from the French Budget. The participation of the Territories in the programme to be financed by this Fund will be laid down by decree."

Art. 22. The French Republic would "recognize and guarantee the possibility of an evolution of the Algerian institutions within the framework of the Republic, and with due regard for the rights and liberties of Algeria's citizens and communities." The institutions fixed by the present law, as well as their functions, could be modified by the French Parliament on the joint proposal of the Algerian Territorial Assemblies and the Federal Assembly.

Art. 23. During the transitional period, and until territorial elections could be organized, the first Territorial Assemblies would consist of members who had been designated by the existing municipal councils (*conseils généraux*) or assemblies. The provisional Territorial Assemblies would cease to function when the first elections for new Assemblies had taken place.

A provisional Consultative Council, consisting of equal numbers of delegates from each Territorial Government and presided over by the Minister representing the French Republic, would assist the latter in the transfer to the Territorial organs of the functions conferred upon them by the present Bill.

Art. 24. The necessary measures to implement the Bill would be taken by governmental decree, on the proposal of the Minister for Algeria and other Ministers concerned. These decrees could "modify, abrogate, or revive existing legislation." They would have to be submitted to the National Assembly "after its decision on the constitutional amendments at present under consideration, but at the latest on Feb. 28, 1958, with the request that they be treated as a matter of urgency." They would then automatically come into force unless Parliament had amended them within three months after such submission. Periods during which Parliament was not in session, or when the session was interrupted, would not be included in the three-months' period.

Art. 25. The above-mentioned decrees would determine, *inter alia*, the borders of the autonomous Territories; the conditions of the acquisition of Territorial citizenship; details of the setting-up of the organs provided for by the present law, as well as the terms under which they would function; the conditions under which the powers conferred on the Minister and the other representatives of the French Republic would be exercised; public services and organizations; changes in the organization and electoral regime of local communities; rules for the organization and functioning of the Court of Arbitration; and the conditions under which French law in matters enumerated in Article 14 would apply to Algeria.

Art. 26. The *Gouvernement-Général* of Algeria would be abolished, and the method whereby its functions would be provisionally transferred to the new institutions would be laid down by decree.

Art. 27. The 1947 Statute for Algeria would be abrogated.

The principal point which had emerged in the debate on Sept. 25-26 was the concern expressed by a number of Right-wing speakers in respect of the introduction of a single electoral college. This led to the moving of an amendment to Article 5 by M. Brocas (Radical Socialist) which combined the introduction of a single electoral college system with provisions designed to protect the French, Jewish, and other minorities in Algeria against being "swamped" by the Moslem majority. The "Brocas amendment" was accepted by the Government and incorporated in the version of the Article on which M. Bourgès-Maunoury put the question of confidence.

M. Bourgès-Maunoury, justifying the Government's decision to introduce constitutional reforms in Algeria, pointed out that French military efforts had to be accompanied by parallel measures of pacification and social action. The *loi-cadre* would bring fresh hope to the numerous Moslems who had not yet been overwhelmed by the rebellion, and would discourage the revolt by showing clearly the determination of France to define her policy towards Algeria.

M. Roclore (Independent) maintained that it was essential to safeguard the rights of the minorities in the new electoral system; **M. Bonnet** (M.R.P.) demanded that the *loi-cadre* be accompanied by French constitutional reforms designed to reinforce the power of the centre while at the same time creating a federal system for the overseas territories; **M. Duclos** (Communist) denounced the *loi-cadre* as a "kind of monster" which would fail to restore peace in Algeria because it did not recognize Algerian independence; and **M. Merigonde** (Socialist) insisted on the introduction of the single electoral college, without which he thought the Moslems would have no confidence in the measure.

M. Lapie (Socialist), who had spent a month in Algeria staying at military and administrative outposts, spoke of the improvement of the general position in that country. Saying that "things have begun to change," he mentioned that more and more Moslems were willing to act as mayors of local communities, despite threats of death by the rebels; that, contrary to the "wall of silence" which had been experienced by the French during the last two years, more information about the rebels was now forthcoming; and that new communal administrations were being set up, new roads under construction, schools being built, law courts established, and medical services installed. However, all the hopes created by the *loi-cadre* in Algeria rested on the single electoral college, which meant "equality and the end of racialism." M. Lapie nevertheless recognized that it was essential to safeguard the rights of the European minority in the electoral system.

M. Soustelle (Social Republican), a former Governor-General of Algeria, welcomed the *loi-cadre* as such; declared that French military efforts in Algeria must be followed by economic and social measures; and supported the system of a single electoral college, though pointing out that it created amongst the French population in Algeria a "disquiet bordering on despair." While he himself considered this alarm exaggerated, he felt that it was necessary to allay these fears and that the single electoral college system should be accompanied by a twofold safeguard: (i) giving the minority community in each constituency a number of seats corresponding to its proportional strength compared with the whole electorate; and (ii) ensuring that these representatives of the minorities were elected by a majority vote of the electors belonging to the minority concerned. The 1,200,000 Frenchmen and 140,000 Jews in Algeria, M. Soustelle said, must not be confronted with the choice of becoming oppressed minorities or displaced persons. He also described it as absurd for France to go to the United Nations "on the defensive," and said that she should attack those who had helped the rebels.

M. Sid Cara (Secretary of State for Algeria) stressed that those Moslems who were faithful to France would be seriously shocked if the *loi-cadre* were rejected, or if it were adopted by only a small majority; they had been given the impression that France wanted to move forward on the path of liberalism, and they were now waiting for the implementation of the promises made to them during the past year.

M. Lacoste (Socialist), Minister-Resident in Algeria, appealed for the adoption of the *loi-cadre* as an "absolute necessity" and as "a clear expression of our determination to do justice in the face of the destructive fury of the National Liberation Front." He stressed that the situation was improving every day, whereas a year ago the fighting had raged around the principal communications, the cities, and public buildings. Today, however, free traffic had been re-established, the various services were functioning, life in the big cities was no longer unsettled, terrorism was receding, and in the countryside major results had been achieved in the destruction of the armed forces and the political and administrative organization of the rebels. Local administrations imposed by the rebels had already been largely suppressed, and over 3,000 genuine representatives of the Moslem population were participating in the administration of Departments and Regions. "One often thinks, especially abroad," M. Lacoste continued, "that Algeria is plunged in anarchy, that her economy is paralysed, and that no reform is possible. Nothing could be further from the truth. Those who come to Algeria are impressed by the vitality and expansion of the country, and the most prejudiced journalists have recognized this."

After pointing out that 35,000 Moslems were serving in the French Army and its auxiliary formations. M. Lacoste emphasized that the status proposed for Algeria as an integral part of the French Republic was quite different from the solution of the Tunisian and Moroccan questions. It was vital, however, to lay down the principle of equality of rights, which implied the abolition of all electoral privileges and the introduction of the single electoral college. This could well be combined with the protection of minorities.

The final stage of the debate took place on Sept. 30, when various deputies gave their *explications de vote* before the vote of confidence was taken.

M. Teitgen, on behalf of the M.R.P., expressed support for the Bill despite his party's opposition to the Government; **M. Roclore** indicated that, in spite of his earlier reservations, he also would vote for the Bill because of the repercussions which a negative vote would produce in Algeria; **M. André Morice,** the Defence Minister, declared himself satisfied with the changes made in the text of the Bill; and

M. Guy Petit (Independent), while regretting that certain of his party's arguments had not been met, said that he himself and a number of his party colleagues would support the Bill—both in order not to estrange the Socialists, whose leaders had given "so many proofs of their patriotism," and to equip Algeria with institutions allowing the free development of her inhabitants as well as safeguarding the presence of France.

M. Soustelle, on the other hand, declared that the "Brocas amendment" did not go far enough in protecting the minorities. Maintaining his opposition to any centralized political organs in Algeria, and his proposal for an "assembly of the communities," he expressed the belief that the Bill would "create a barrier alike to integration and federation." Because a vote for the *loi-cadre* implied support for the Government's entire foreign policy *vis-à-vis* the Arab countries, which had had dangerous results, he and his friends would vote against the Bill. Both **M. Berthommier,** for the Poujadists, and **M. Balanger,** for the Communists, violently denounced the Bill and the Government's policy.

M. Bourgès-Maunoury, winding up the debate, declared that lack of unity on the French side would only help the rebellion, and emphasized that "Algeria will be saved or lost by our joint action." He reiterated the three basic principles of the *loi-cadre*: (i) that "nothing and nobody" could separate Algeria from France; (ii) that in order to win over Moslem youth from the "fanatic nihilism of the rebels to loyal co-operation," France undertook to promote a policy of progress and justice with equal rights for everyone, implying a single electoral college, (iii) recognition that nothing would be done in Algeria without the co-operation of the Algerians themselves.

At the end of the debate the Government was defeated by 279 votes to 253, with five voluntary abstentions and 39 deputies not taking part in the division.

The minority vote for the *loi-cadre* comprised 95 Socialists, 67 M.R.P. deputies, 44 (out of 92) Independents, 26 (out of 44) Radicals, 9 Dissident Radicals, 5 (out of 13) R.G.R. deputies, 5 U.D.S.R.-R.D.A. deputies and 2 *paysans d'action sociale.*

The majority vote against the Government consisted of 139 Communists, the 6 *progressistes,* 38 Independents, 30 Poujadists, 17 (out of 21) Social Republicans, 13 Radicals, 10 (out of 12) *paysans,* 8 (out of 11) *non-inscrits,* 6 R.G.R., 5 Dissident Radicals, 3 *paysans d'action sociale,* and 2 Overseas Independents.

One Socialist, two Radicals, and two Independents abstained, whilst those not taking part in the vote comprised 14 U.D.S.R.-R.D.A. deputies (including all the African members of the party), 4 Socialists, 4 Communists, 4 M.R.P., 4 Overseas Independents, 3 *non-inscrits,* 2 Social Republicans, 1 Radical, 1 R.G.R., 1 *Paysan,* and 1 *paysan d'action sociale.*

M. Bourgès-Maunoury tendered his resignation to President Coty immediately after his Government's defeat in the National Assembly.

The Cabinet Crisis. - Unsuccessful Attempts by M. Mollet, M. Pleven and M. Pinay to form New Government. - M. Pinay and M. Mollet defeated on Votes of Investiture.

After receiving the resignation of M. Bourgès-Maunoury, and consulting the party leaders, President Coty requested M. Mollet on Oct. 4 to form a new Cabinet. On Oct. 6, however, M. Mollet informed the President of his inability to do so, his decision being endorsed by the Socialist Party after M. Mollet had had a number of consultations with other party leaders and representatives of employers' and workers' organizations. President Coty then asked M. René Pleven (leader of the U.D.S.R.) to undertake the task, which M. Pleven accepted on condition that all "national and republican" parties, from the Socialists to the Independents, agreed to take office in a Government headed by himself. After three days of inter-party consultations, however, M. Pleven abandoned the attempt to form a Government on Oct. 9, when the Radical parliamentary group voted by a small majority (21 votes to 17) not to take office under him.

On Oct. 11 M. Pinay (the Independent leader) accepted an invitation from President Coty to try to form an administration. Despite the decision of the Socialist, Radical, Popular Republican (M.R.P.) and Social Republican parties not to take office under him, M. Pinay nevertheless formed a minority Cabinet on Oct. 16 drawn mainly from the Independents, but including also some representatives of small centre groups—the R.G.R., R.D.A., and anti-Mendesian Radicals. Its membership was as follows:

M. Antoine Pinay (Independent)—Prime Minister, Foreign Affairs, and Finance; M. Houphouet-Boigny (R.D.A.)—Minister of State; M. Guy Petit (Independent)—Minister of State in charge of Administrative Reform; M. Barrachin (Independent)—Minister of State in charge of Institutional Reform; M. Corniglion-Molinier (R.G.R.)—Justice; M. Jacquinot (Independent)—Algeria; M. Badie (Radical)—Interior; M. Bonnefous (U.D.S.R.)—Public Works; M. André Morice (Dissident Radical)—National Defence; Senator Masteau (*Gauche Démocratique*)—Education, Youth, and Sports; Senator Duchet (Independent)—Industry, Commerce, and Sahara; M. Courant (Independent)—Overseas Territories; M. Bergasse (Independent)—War Veterans; M. Garet (Independent)—Labour and Social Affairs; Senator Houdet (Independent)—Agriculture.

M. Pinay presented his Cabinet to the National Assembly on Oct. 18, but was defeated on the *vote d'investiture* by 248 votes to 198, with 60 deputies voluntarily abstaining and 70 not taking part in the vote. He thereupon presented his resignation to President Coty

The 198 deputies supporting M. Pinay comprised 89 Independents, 29 Poujadists, 13 Dissident Radicals, 15 M.R.P., 13 R.G.R., 11 U.D.S.R.-R.D.A., 9 *paysans,* 6 *paysans d'action sociale,* 7 Radicals, 5 *non-inscrits,* and 1 Social Republican.

The 248 opposing votes comprised 141 Communists and *progressistes,* 85 Socialists, 7 Radicals, 2 U.D.S.R.-R.D.A., 2 *Mouvement Socialiste Africain* (M.S.A.), and 1 *non-inscrit.*

48 of the 60 "voluntary abstentions" were M.R.P. deputies, the remainder comprising 9 Radicals, 1 *paysan* and 2 *non-inscrits.* The 71 who took no part in the vote included 18 Social Republicans, 11 Socialists, 8 Communists, 7 Radicals, 7 U.D.S.R.-R.D.A., 6 M.R.P., 6 Overseas Independents, and a few Poujadists, *paysans,* and *non-inscrits.*

On Oct. 19, as the Cabinet crisis was entering its third week, President Coty asked M. Robert Schuman (M.R.P.) to draw up a report on the country's financial situation as a preliminary to further attempts to reach agreement between the political parties on the measures necessary to overcome France's economic crisis. M. Schuman accepted this mission, had a number of discussions with Treasury officials and economic experts during the next two days, and on Oct. 21 presented his report to the President. Although it was not published, it was understood to have emphasized the general gravity of the country's economic and financial position, to have stressed the danger to the franc, and to have outlined rigorous measures which, in his (M. Schuman's) opinion, the next Government should take to remedy the situation.

After M. Schuman had declined an invitation to form a Government, on the ground that such a task was hopeless until further efforts were made to narrow the gap between Socialist and Independent (i.e. conservative) opinion, President Coty summoned M. Mollet and M. Pinay to the Elysée on the same day (Oct. 21), showed them M. Schuman's report and, it was understood, stressed the gravity of the situation. It was believed that the President had emphasized the urgent need of an agreement between the Socialist and Independent parties as a pre-requisite to the formation of a stable administration which could deal effectively with the country's financial problems.

On Oct. 22 M. Mollet accepted another request by President Coty to form an administration, and in the next few days had intensive consultations with the other party leaders. On Oct. 28 he formed a "left-centre" Cabinet with the participation of his own party (the Socialists,) the M.R.P., the Radical Socialists, and the U.D.S.R.-R.D.A., group, its membership being as follows:

M. Guy Mollet (Socialist)—Prime Minister; M. Robert Schuman (M.R.P.)—Deputy Premier; M. Henri Queuille (Radical), M. René Pleven (U.D.S.R.), M. Edouard Daladier (Radical Socialist), and M. Houphouet-Boigny (R.D.A.)—Ministers of State; M. Pierre Pflimlin (M.R.P.)—Minister of State in charge of Finance and National Economy; M. Pineau (Socialist)—Foreign Affairs; M. Mitterrand (U.D.S.R.)—Justice; M. Chaban-Delmas (Social Republican)—National Defence; M. Lacoste (Socialist)—Algeria; M. Lejeune (Socialist)—Sahara; M. Jacquet (Socialist)—Overseas Territories; M. Filippi (Radical Socialist)—External Finance; M. Gaillard (Radical Socialist)—Industry and Commerce; M. Lecourt (M.R.P.)—Interior; M. Corniglion-Molinier (R.G.R.)—Public Works; M. Billères (Radical Socialist)—Education; Senator Chochoy (Socialist)—Housing and Construction; M. Charpentier (M.R.P.)—Agriculture; M. Gazier (Socialist)—Social Affairs; M. André Colin (M.R.P.)—War Veterans.

Like M. Pinay, however, M. Mollet failed to obtain a *vote d'investiture* when he presented his Cabinet to the National Assembly on Oct. 28. After hearing a lengthy statement by M. Mollet, devoted mainly to the country's financial and economic difficulties, the Assembly refused to give him a *vote d'investiture* by 200 votes to 227, with 27 voluntary abstentions and 32 deputies not participating in the division. The vote was taken in the early hours of Oct. 29.

M. Mollet was supported by 90 Socialists, 70 M.R.P., 27 Radicals, 12 U.D.S.R.-R.D.A., 11 Social Republicans, 6 R.G.R., 5 *Convention Africaine* (the West African party headed by M. Léopold Senghor), 3 M.S.A., 2 Dissident Radicals, and 1 Independent.

The 290 opposing votes comprised 144 Communists and *progressistes,* 81 Independents, 30 Poujadists, 11 *paysans,* 9 Radicals, 6 *paysans d'action sociale,* 3 Social Republicans, 2 R.G.R., and 4 *non-inscrits.*

Of the deputies voluntarily abstaining, 12 were Dissident Radicals, 4 *non-inscrits,* 3 Social Republicans, and 2 each from the Radical, R.G.R., U.D.S.R.-R.D.A., and M.R.P. groups.

Formation of Gaillard Cabinet.

Following M. Mollet's defeat, President Coty sent for M. Gaillard (Finance Minister in the Bourgès-Maunoury Government) in the early hours of Oct. 29 and asked him to form a new Government—a task which M. Gaillard accepted on the following day. He was able to obtain the support of the Socialists, M.R.P., Independents, and U.D.S.R.-R.D.A., the decision of the Socialist parliamentary leaders being confirmed on Nov. 3 by the party's national council. The voting at that session (2,087 to 1,732) showed, however, the reluctance of many Socialists to join a coalition with the Independents, in which they would be in a minority; it was believed that the decision to serve under M. Gaillard was largely due to M. Mollet's personal influence.

M. Gaillard presented his Cabinet to the National Assembly on Nov. 5 (his 38th birthday), its membership being:

†M. Félix Gaillard (Radical Socialist)	Prime Minister.
M. Robert Lecourt (M.R.P.)	Justice, and Constitutional and Electoral Reform.
*M. Christian Pineau (Socialist)	Foreign Affairs.
†M. Maurice Bourgès-Maunoury (Radical Socialist) ..	Interior.
M. Chaban-Delmas (Social Republican) ..	National Defence.
M. Pierre Pflimlin (M.R.P.) ..	Finance and Economic Affairs.
*M. René Billères (Radical Socialist)	Education and Youth.
M. Paul Ribeyre (Independent)	Industrial Production.
*M. Edouard Bonnefous (U.D.S.R.)	Public Works and Transport.
M. Paul Bacon (M.R.P.) ..	Labour.
M. Boscary-Monsservin (Independent)	Agriculture.
M. Pierre Garet (Independent)	Reconstruction.
*M. Gérard Jaquet (Socialist)	Overseas Territories.
*M. Robert Lacoste (Socialist)	Algeria.
*M. Max Lejeune (Socialist) ..	Sahara.
M. Antoine Quinson (R.G.R.)	War Veterans.
†M. Félix Houphouet-Boigny (R.D.A.)	Health.

*Held same portfolio in Bourgès-Maunoury Cabinet.
†Member of Bourgès-Maunoury Cabinet.

In his investiture speech M. Gaillard outlined his immediate programme, which would be concentrated—in that sequence—on the Algerian question, the 1958 Budget and the economic and financial problems facing France, constitutional reform, educational reform, and health service reform. His statement is summarized below under cross-headings:

Algeria. M. Gaillard said that in the first instance it was necessary to renew the emergency powers for Algeria and resume discussion of the *loi-cadre*, thus making it clear "without ambiguity" that France would "not be satisfied with the suppression of terrorism but seeks a political solution of the Algerian problem." "Within the framework of the indissoluble links between Algeria and Metropolitan France," he went on, "the Algerian personality must find its full expression. This must be achieved by respecting the various ethnic communities while assuring the whole population of equitable representation in the administrative organs of the territory. An assurance of the co-existence of the Algerian communities must thus be combined with equality of individual rights within a single electoral college." With this aim in view the Government would fix the terms of the electoral law, taking into account the anxieties of those members of the Assembly who feared for the European minority under such a system. The two Bills—the extension of the emergency powers, and the *loi-cadre*—would be submitted to Parliament at the same time.

The Government, M. Gaillard continued, would renew the appeal for a cease-fire, to be followed first by free elections and then by discussions with the elected representatives of the people on the future organization of Algeria. After declaring that his Government was ready "to make all necessary contacts at any time with a view to bringing about a cease-fire," M. Gaillard made a special appeal to the Nationalists in Algeria, declaring in this connexion: "They must understand that three years of fighting have not weakened France's determination . . . Over a million young persons have been in Algeria during that period doing their duty. They have not only carried arms but have administered the territory, given education to the children, built roads. On their return to the Metropolis, far from criticizing the work and actions of France in Algeria, they have, on the contrary, praised it . . . No-one, therefore, can count on our weakness, hoping thereby to force us to scuttle. Neither can the terrorism in Metropolitan France, which the Government is determined not to tolerate, change our aims . . . If the leaders of the National Liberation Front will not respond to this appeal they will show themselves to be the worst enemies of the Algerian people by forcing upon them terror, assassination, and war, and by depriving them of a new prosperity through the future exploitation of the resources of the Sahara . . . France, for her part, proposes peace in Algeria and the association of Tunisia, Morocco, and all other adjoining territories of *Afrique Noire* and *Afrique Arabe* in the exploitation of these resources."

Finance and Economics. Immediately after the passage of the Algerian legislation Parliament would have to deal with the 1958 Budget, which must be voted by Jan. 1. France was threatened by a most serious monetary crisis, which a month without a Government had increased. New advances were necessary from the Bank of France. About 100,000,000,000 francs (£84,000,000) of new economies in the 1958 Budget was the highest target possible, since any more would mean sacrificing capital investment and thus paving the way for economic recession or reducing the Algerian effort. It was therefore necessary to decide on new revenue, whilst any further expenses must also be met by additional taxation.

The whole future was dependent on the solution of the foreign exchange crisis, and everything must be sacrificed to solve it, lest there should not only be a halt in the country's economic expansion but recession, rationing of raw materials, and unemployment. The first condition of success was the suppression of all causes of inflation, whether they resulted from a disequilibrium of public finance, the relaxation of the credit system, or the shortage of manpower. The second condition of success was to equip the Government with powers to prevent and suppress unjustified price increases. The Government would act with vigour and would immediately ask for powers to take the necessary measures. At the same time it would bring about reforms in distribution. Too much time had already been lost, making immediate action all the more urgent and making it essential that the Government should possess extensive special powers in the economic and financial spheres.

A determined anti-inflationary policy implied that the Government would maintain the exchange rate of the franc on the basis of the recent 20 per cent devaluation, as any further changes would be contrary to its stabilization policy.

Such a policy however, would need not only the confidence of Parliament but also the understanding of those from whom sacrifices would be initially demanded, and the active co-operation of the workers. For this reason the Government would establish permanent contact with the trade unions, so as to associate them with the emergency measures to be taken. The previous Government had already proposed to the employers', workers', and State employees' organizations that they should jointly examine the situation with it so as to reach a general understanding on the action to be taken. In this manner the details of a closer association between all those contributing to industrial progress could be discussed and worked out.

Constitutional Reform. In the New Year the Assembly would have to proceed to the discussion of constitutional reforms, after a small committee of 10-12 representatives of the parties supporting the Government had prepared the ground. Any decision must be the result of an agreement between the majority parties, with the final decision left to the Government instead of to "those who are hostile in principle to any reform of our institutions." If no complete agreement could be reached the Government would itself make proposals, including the restoration of the right of dissolution of the Assembly by the President of the Republic, modification of Article 17 of the Constitution, so as to end the Legislature's right to initiate expenditure; measures to ensure greater governmental stability by amending Articles 49 and 50, relating to votes of confidence and censure; and amendments to the rules of the National Assembly to ensure time for Government Bills. At the same time the Government would set up a committee of party representatives to consider the question of electoral reform. M. Gaillard added that it was also essential to amend the Constitution with a view to preventing the present dispersion of votes, multiplication of parties, and difficulty of constituting a governmental majority. Finally, the constitutional reform committee would have to consider a reform of Chapter VIII of the Constitution with a view to creating a new structure for the Franco-African community.

Educational Reform. Stressing the need for this—and, in particular, for the development of scientific education—M. Gaillard said that there was one French engineer for every three British engineers, and that if France did not change her methods of education she would become "a country of decadent rhetoricians." Probably in no other modern country in the world were the children of workers and farmers given less encouragement to enter higher careers vital to the national welfare.

Health Service Reform. The Government would set up a committee of the coalition parties to study the salaries of doctors under the social security system, and any other reform proposals concerning that system and national assistance.

M. Gaillard received a *vote d'investiture* by 337 votes to 178, with 20 voluntary abstentions and 48 deputies not taking part in the division.

Those supporting him comprised 87 (of the 97) Socialists and 3 (of the 4) members of the *Mouvement Socialiste Africain*, 78 (of 92) Independents, 71 (out of 75) M.R.P., 28 (of 43) Radicals, 17 (of 21) Social Republicans, the 14 Dissident Radicals and the 13 R.G.R. deputies, 9 (of 21) members of the U.D.S.R.-R.D.A., 5 *paysans d'action sociale*, 4 *Convention Africaine* deputies, 3 *paysans*, and 5 *non-inscrits*.

The opposition consisted of 131 (of 143) Communists and 4 (of 6) *progressistes*, 30 Poujadists, 7 *paysans*, and 1 *non-inscrit*.

The abstentions comprised 11 Radicals, 6 Independents, 2 *non-inscrits*, and 1 *paysan*, whilst those not taking part in the vote were 12 Communists, 11 U.D.S.R.-R.D.A. deputies (including a number of African members), 8 Socialists, 4 Social Republicans, 2 M.R.P., 2 Independents, 2 *Convention Africaine*, 2 *non-inscrits*, and 1 each from the Radical, Poujadist, *paysan*, *progressiste*, and M.S.A. groups.

M. Gaillard's Cabinet consisted of four Socialists, three Radical Socialists, three members of the M.R.P., three Independents, two members of the U.D.S.R.-R.D.A., and one member each of the R.G.R. and the Social Republicans. It was pointed out in the French press that a characteristic of the new Government was that social, economic, and financial responsibilities had been taken over by members of the M.R.P. ; all the portfolios covering African affairs (including the foreign affairs portfolio) by the Socialists ; and general political responsibilities by the centre groups together.

The Social Republicans, by a small majority (56 votes to 52), had voted against participation in the Government, but nevertheless allowed M. Chaban-Delmas to accept the Defence portfolio ; M. Chaban-Delmas undertook, however, to resign as chairman of the party. Of the two dissident Radical groups, the R.G.R. was represented in the Cabinet but not the Dissident Radicals.

Ministers of the Bourgès-Maunoury Cabinet who left the Government were M. Corniglion-Molinier (Justice), Senator Gilbert-Jules (Interior), M. André Morice (National Defence), M. Gazier (Social Affairs), and Senator André Dulin (War Veterans).

The new Ministers were M. Lecourt, M. Chaban-Delmas, M. Pflimlin, M. Ribeyre, M. Bacon, M. Boscary-Monsservin, and M. Garet. All of them, except M. Boscary-Monsservin, had at one time or other held ministerial posts in previous French Cabinets. M. Quinson had been Under-Secretary of State for War Veterans in the Bourgès-Maunoury Government.

Of those Ministers retaining the posts which they previously held, M. Bonnefous took over the Transport portfolio in addition to Public Works, whilst M. Billères took over the Youth Department in addition to Education.

M. Félix Gaillard (38) is the youngest Prime Minister in the history of the French Republic, and is generally regarded as one of the most promising of the younger men in French political life. At the age of 25 he entered the French Civil Service as its youngest *inspecteur de finance* ; at the age of 34 he became the youngest Secretary of State in the Government ; and at the age of 37, when he entered M. Bourgès-Maunoury's administration, he was the youngest Finance Minister in any French Cabinet since 1899. [Further biographical details are given on page 15598, second column]. Six other Ministers in M. Gaillard's Cabinet are under 50 years of age.

The Gaillard Cabinet was completed by the appointment on Nov. 12 of the following Secretaries of State :

Senator Emile Claparède (Radical Socialist)	*Présidence du Conseil*, in charge of Information.
M. Raymond Marcellin (Independent)	Civil Service and Administrative Reform.
*M. Maurice Faure (Radical Socialist)	Foreign Affairs.
*Senator Maurice Pic (Socialist)	Interior.
*M. Pierre Métayer (Socialist)	Land Forces.
Senator Alain Poher (M.R.P.)	Naval Forces.
M. Louis Christiaens (Independent)	Air Forces.
*M. Jean-Raymond Guyon (Socialist)	Budget.
*M. Emile Hugues (Dissident Radical)	Economic Affairs.
*M. Eugène Thomas (Socialist)	Posts and Telegraphs.
M. Maurice Simmonet (M.R.P.)	Merchant Navy.
Senator François Schleiter (Independent)	Commerce.
M. Henri Dorey (M.R.P.)	Agriculture.
*M. François Giacobbi (Radical Socialist)	Under-Secretary of State, *Présidence du Conseil*.

*No change.

Senator Claparède had been State Secretary for Moroccan and Tunisian Affairs in the Bourgès-Maunoury Cabinet ; MM. Christiaens and Marcellin and Senators Poher and Schleiter had held State Secretaryships in various earlier Governments ; whilst MM. Dorey and Simmonet had not previously held Government office.

The number of State Secretaries was reduced from 25 in the Bourgès-Maunoury Cabinet to 13, and of Under-Secretaries of State from seven to one.—(Le Monde - Le Figaro) **(Prev. rep. Cabinet, 15687 C ; 15597 A ; Algerian Emergency Powers Bill, 14913 A.)**

A. GUATEMALA. — Army Junta takes Power. - Invalidation of Presidential Elections.

Presidential elections were held in Guatemala on Oct. 20 to elect a successor to the late President Castillo Armas, who was assassinated in July. They were contested by three Right-wing candidates : Señor Ortiz Passarelli, who had resigned from the post of Chief Justice of the Supreme Court to contest the elections, and who was the candidate of the ruling National Democratic Movement (*Movimiento Democrático Nacionalista*) ; General Miguel Ydigoras Fuentes, candidate of an extreme right-wing group known as the *Partido Redención* ; and Señor Miguel Asturias Quiñonez, an educationist, candidate of the small Christian Democratic Party. A new left-wing but anti-Communist party (the Revolutionary Party) had also announced its intention of contesting the election, but registration was denied to it by the Provisional Government of President Gonzalez Lopez (see 15693 D) on the ground that it had been infiltrated by Communist elements.

The elections were held in a quiet atmosphere, all men and women over 18 (whether literate or not) being entitled to vote. In the case of illiterates, who represent about 73 per cent of Guatemala's population of 3,500,000, ballot-papers of different colours were used to differentiate between the three candidates.

The Provisional Government announced on Oct. 21 that "partial" results showed 198,931 votes for Señor Ortiz Passarelli (who was officially declared elected), 128,323 for General Ydigoras Fuentes, and 26,452 for Señor Asturias Quiñonez, these figures being "subject to definite confirmation." General Ydigoras Fuentes, however, alleged that the elections had been fraudulently manipulated through the Government's control of the political machinery in rural areas, and by making illiterate peasants vote "twice, thrice, and even four times." Widespread rioting in Guatemala City by supporters of General Ydigoras Fuentes led on Oct. 23 to the proclamation of a state of siege (a form of martial law) by the Provisional Government.

On Oct. 24, after further serious riots in which three people were killed, the High Command of the Guatemalan Army issued a decree announcing that the Provisional Government of President Gonzalez Lopez had been replaced by a three-man military *junta*, and that the "provisional military government" would "restore the normal operation of public institutions and do justice to the people." The *junta* was headed by Colonel Oscar Mendoza Azurdia, the other members being Colonel Gonzalez Yurrita Novoa and Colonel Roberto Lorenzana.

Following discussions between the *junta* and General Ydigoras Fuentes, the latter agreed on Oct. 25 to call off the demonstrations by his supporters for 24 hours so as to enable the *junta* to find a solution to the political crisis. Colonel Mendoza Azurdia said after the meeting that General Ydigoras Fuentes had proposed (*a*) that the Guatemalan Congress should investigate the votes cast in the presidential election, excluding the "illegal" votes cast for Señor Ortiz Passarelli ; and (*b*) that, in accordance with the Constitution of 1956, the Second Vice-President should be installed as Provisional President of Guatemala pending new presidential elections.

General Miguel Ydigoras Fuentes (62), a career Army officer, held provincial governorships during the 14-year dictatorship of President Ubico, which was overthrown in 1944. He was subsequently appointed Minister in London (where he studied at the London School of Economics) and returned to Guatemala in 1950 to contest the presidential election in opposition to Colonel Arbenz Guzman. After the latter's electoral victory General Ydigoras Fuentes went into exile and subsequently co-operated with Colonel Castillo Armas in overthrowing the pro-Communist regime of President Arbenz Guzman. Personal differences with President Castillo Armas led to his appointment as Ambassador to Colombia, a post from which he resigned to run for the Presidency.

The military *junta* issued a decree on Oct. 26 invalidating the presidential elections of Oct. 20 ; describing those elections as "vitiated because the citizens had no full guarantee of the exercise of their rights" ; and asking the Guatemalan Congress to approve the appointment of the Second Vice-President (Señor Guillermo Flores Avendano) as Provisional President of the Republic in place of Señor Gonzalez Lopez.

The Guatemalan Constitution provides for a President and two Vice-Presidents. During the lifetime of President Castillo Armas the office of First Vice-President had been held by Señor Gonzalez Lopez and of Second Vice-President by Señor Flores Avendano ; on the assassination of President Castillo Armas the First Vice-President had taken office as Provisional President of the Republic.

The Guatemalan Congress, meeting on the same day with only 48 of its 66 members present, annulled the presidential election on the basis of "proven fraud," no date being set for new elections. Señor Flores Avenado was sworn in as Provisional President of Guatemala at a secret session of Congress on Oct. 27.—(New York Times) **(Prev. rep. 15768 C ; 15693 D.)**

A. UNITED KINGDOM. — The 1957 Trades Union Congress. - Debates and Resolutions.

The 89th Trades Union Congress was held at Blackpool on Sept. 2-6 under the presidency of Sir Thomas Williamson. The most important decisions taken by the Congress were its continued rejection of wage restraint, its approval in principle of the Labour Party's scheme for national superannuation, and its conditional support of the proposals for a European Free Trade Area.

Sir Thomas Williamson, in his presidential address, discounted the suggestion that relations in industry were "getting worse, with strikes becoming more and more the order of the day." It was true, he admitted, that more time would have been lost through disputes in 1957 than in any year since the General Strike of 1926, but it should be realized that a greater incidence of strikes in one year did not necessarily mean further trouble in the next, provided that all concerned honestly strove for industrial peace. Peace in industry was not a political matter, and should not be made into one. The trade union movement renounced any attempt to challenge the sovereignty of Parliament and resisted the temptation to dislodge a Government they disliked by industrial action. Trade unionists, like other citizens, had political rights, but could not and ought not to claim political privileges.

Condemning "minorities who organize unofficial movements and unofficial strikes," Sir Thomas stressed that trade unionists should honour agreements, accept majority decisions, and remain loyal to leaders who had to apply them. The strike weapon should only be used under constitutional trade union rules, and then only when all means of negotiation had failed. "There is no virtue in striking when there is no need to do so," he declared. "We should work for a solution before a stoppage takes place, even though it may call for patience and forbearance in the face of provocation." In this connexion Sir Thomas alleged that the recent stoppages in the engineering and shipbuilding industries (see 15609 A) had been "provoked by the employers' deliberate and contemptuous disregard of normal democratic processes."

Turning to the relationship between higher wages and inflation, Sir Thomas asserted that by cutting food subsidies, increasing purchase tax and interest rates, and removing controls, the Government had "deliberately helped to push up costs at a time when, owing to falling import prices, there had been a chance of holding the line." Trade unionists had naturally reacted by demanding wage and salary increases, and no wage restriction would be acceptable to them unless profits, salaries, and interest were also controlled. He added: "Stable prices cannot be combined with full employment by leaving our fortunes to the push and pull of market forces. The only answer to rising costs and prices is greater industrial efficiency."

Sir Thomas concluded by outlining the trade union movement's attitude towards the proposed European Free Trade Area. Although it believed that Britain would "probably lose more than she would gain" by being completely out of the scheme, it also believed that it was possible to pay too high a price for European free trade. Trade unionists would therefore want to see "a treaty precise about providing work for all," and would need to "have a look at the rules before deciding whether we can support an application by Britain to join the club."

The more important subjects discussed and resolutions adopted by the Congress are summarized below under cross-headings.

Wages Policy. - Rejection of Wage Restraint. A resolution blaming the Government for Britain's economic difficulties, and declaring that the trade unions would not accept a policy of wage restraint, was moved by Mr. Frank Cousins (Transport and General Workers' Union). It (1) condemned "the Government's refusal to direct the country's economic and social policies so as to maintain full employment, stimulate production, deal effectively with the problem of prices and profits, and enable living standards to be steadily increased"; (2) declared that Congress was not prepared to accept a policy which would decrease workers' living standards, and therefore "rejected wage restraint in any form"; (3) affirmed the unions' determination, while prices and profits remained uncontrolled, to "take such steps industrially as will ensure that wages keep pace with rising costs"; (4) reaffirmed the unions' confidence in collective bargaining and their right to pursue justifiable wage claims; (5) urged trade unionists to work for the early return of a Labour Government pledged to halt inflation and to re-establish the national economy on a firm foundation.

Mr. Cousins said that notwithstanding the Government's talk in 1956 of a "price plateau," the index of retail prices had risen five points in the past 10 months, mainly as a result of direct action by the Government itself. During that time wages had risen by 5½ per cent but profits had gone up by 6½ per cent, so the unions could not reasonably be accused of irresponsibility. He explained that the reference in the motion to "industrial action" meant that the unions would take "every possible step through negotiation and, where appropriate, through arbitration," but reserved the right to adopt strike action if these other methods failed. Trade union executives, he stressed, did not like strikes, but recognized that they were sometimes necessary "to show we are not bluffing." The T.U. movement recognized its responsibilities and would continue to show restraint, but could not stand by while the living standards of members were worsening. After describing "talk of pricing Britain out of markets" as "the language of incompetence," and calling for a planned approach to investment, production and distribution, Mr. Cousins concluded by criticizing the setting-up of the Council on Prices, Productivity, and Incomes [see 15705 D]. "The unions," he said, "do not want anyone to tell them how to divide the national cake unless they are also told how to control those who control the size of the cake . . ."

Pensions and National Superannuation. The section of the General Council's report dealing with social insurance and industrial welfare was introduced by Sir Alfred Roberts, who discussed the Labour Party's proposals for national superannuation. [These proposals, which aim at replacing the existing flat-rate basis of old age pensions by a system of benefits and contributions related to wages and salaries, will be described in a subsequent article].

Sir Alfred Roberts said that the General Council considered that although the proposals involved "an approach to social insurance on lines fundamentally different from those previously endorsed by Congress," they were "sufficiently attractive to justify further consideration" If the Congress endorsed this view it would be possible to present the results of the examination to next year's Congress. The General Council suggested that, in order to ensure the maximum consideration within the trade union movement, a series of conferences should be convened in the coming year similar to those held on the Beveridge Report.

The outstanding questions which concerned the Congress, Sir Alfred Roberts continued, were (1) whether the time had come to replace the flat-rate basis for pensions by a pensions system such as the Labour Party proposed; (2) if so, what protection could be given to ensure that all workers, including existing pensioners and the lower-paid workers, would receive an adequate subsistence minimum, (3) whether the new system would take full account of the needs of the sick, the unemployed, and the industrially disabled; (4) the problems presented by existing occupational pensions schemes. With regard to (1) it might be argued that the T.U.C. should exert its influence to demand the raising of existing flat-rate benefits to an adequate level; but although the General Council had repeatedly brought all practicable pressure to bear on successive post-war Governments in efforts to secure a substantial increase, these efforts had always failed. In consequence, over 1,000,000 of those at present drawing national insurance benefit were having to supplement it by national assistance. The General Council and the Labour Party had come to the conclusion that they could not hope to secure a proper minimum scale of benefits so long as they stuck to the flat-rate system. The two major political parties had rejected as impracticable the subsistence principle under the scheme as it now stood, and it was against this background that the General Council recommended a comprehensive re-examination of the flat-rate basis of the scheme.

After warning Congress that national superannuation, as proposed by the Labour Party, would undoubtedly mean "substantially increased contributions for most people," Sir Alfred Roberts concluded by saying that the broad principle behind the scheme—which would affect about 8,000,000 workers—was that there should be an option either to join national superannuation or to remain in an existing superannuation scheme, provided this satisfied certain conditions. The Labour Party proposals, though "certainly not utopian," were "an imaginative concept," but the General Council wished to proceed with caution in order to be quite sure that the scheme was financially and economically sound, workable and equitable.

After debate, Congress unanimously passed a resolution, moved by Mr. Cousins on behalf of the TGWU: (1) welcoming "in general principle" the Labour Party's plan for national superannuation; and (2) demanding an "immediate and substantial increase" in pension rates, to be followed by periodical reviews based on the cost of living."

Public Ownership. A debate on this subject was initiated by Mr. Bryn Roberts (National Union of Public Employees), who moved a composite resolution which (1) noted that it had not yet been possible for the General Council to carry out the mandate given at the 1952 Congress and the pledges on social ownership given at the 1953 Congress; (2) instructed the General Council to work for the implementation of the policy of public ownership "so that the trade union movement may determine the part it is to play . . . in shaping Labour's next general election programme."

Mr. Roberts said that on the public ownership question a very serious difference appeared to have developed between the declared policy of the T.U.C. and Labour Party leaders. This difference must be resolved quickly, or it might cost the party the next General Election. Congress was jealous of its rights in shaping industrial policy, and held that public ownership was "the main Socialist argument" which should not be "relegated and wrapped up in moth balls," but remain "in the front line."

In the debate, Mr. R. J. Gunter (Transport Salaried Staffs Association, and a member of the Labour Party Executive) explained that although the party had not "moved an inch from its belief in public ownership," it no longer thought that the public corporation was "inevitably the instrument on which every nationalization measure should be based." Mr. W. L. Heywood stressed that the General Council did not regard the Labour Party's proposals as "irreconcilable with the programme of public ownership to which Congress is committed," but considered the differences between them as "differences of emphasis only."

Mr. Roberts's motion was carried without dissent, but a number of trade unions abstained from voting.

A resolution (moved by Mr. J. E. Mortimer, Association of Engineering and Shipbuilding Draughtsmen), calling for the nationalization of the machine-tool industry, was subsequently carried.

The 40-Hour Week. Congress approved a motion (moved by the Amalgamated Union of Foundryworkers) pledging the T.U.C.'s support to affiliated unions in their efforts to secure a shorter working week without loss of pay, and to establish a working day and week for all manual workers of not more than 8 hours daily and 40 hours weekly.

Education. A debate on educational subjects was introduced by Mr. W. Beard (vice-president of the General Council), who referred to the successful inauguration at T.U.C. headquarters in London of a training scheme for trade union officers. Congress approved motions: (1) expressing concern at the shortage of suitably trained technical workers in industry and commerce, and calling for increases in the number of comprehensive and technical schools, in technical teachers' salaries, and in schemes for "sandwich" courses for young people in industry (sponsored by the Association of Supervisory Staffs, Executives, and Technicians); (2) condemning the Government's policy of replacing percentage grants from the Treasury to local authorities for social services by fixed block grants (sponsored by the Inland Revenue Staff Federation).

Housing Policy and the Rent Act. After approving a motion (by the Amalgamated Society of Woodworkers) expressing concern at the continued decline of local authority house-building as a result of the Government's monetary policy, Congress debated a resolution (moved by Mr. E. J. Hill for the Boilermakers' Society) dealing with the Rent Act. In its original form this had sought support for a token 24-hour strike in protest against the Act, but Mr. Hill explained that his society had accepted an amendment (by the Tobacco Workers' Union) to delete the reference to a strike and substitute the words: "This Congress calls on the next Labour Government to repeal this inquitous Act." In this form the resolution was carried without dissent.

Health Services. A debate on this subject was initiated by Dr. Bruce Cardew (Medical Practitioners' Union), who moved a resolution calling on the Government to end prescription charges under the National Health Service, abolish the special contribution towards the cost of the service, and remove restrictions on spending on hospitals, etc. The resolution was carried unanimously.

The Press. The Congress adopted a resolution (1) expressing concern at "the demise of increasing numbers of national and provincial newspapers"; (2) instructing the General Council to demand that the rise in the cost of newsprint should be investigated by the Monopolies and Restrictive Practices Commission and to take "all appropriate action" to "halt monopolistic tendencies in the field of publication"; (3) approving the General Council's arrangement with Odhams Press for the continued publication of the *Daily Herald* [see 15716 A], but instructing it to safeguard the paper's position as the official organ of the trade union movement and to ensure its continued allegiance to trade union policy. The resolution was moved by Mr. G. H. Elvin (Association of Cinematograph, Television, and Allied Technicians).

Inter-Union Disputes and Trade Union Organization. On this subject Congress first considered a resolution which (1) condemned demarcation disputes and similar inter-union differences as "inimical to the best interests of the trade union movement"; (2) called on the General Council to set up an arbitration tribunal for settling differences when agreement could not otherwise be reached. Mr. Prestwich (Engineer Surveyors' Association), who moved the resolution, stressed that the trade union movement was largely unplanned, and that there could be no planning while every union was reluctant to part with its individual prerogatives. On the advice of Sir Vincent Tewson, who explained that the General Council already had adequate powers to deal with virtually all inter-union disputes, the resolution was rejected by a large majority.

On the General Council's advice Congress also rejected resolutions (1) calling for the establishment of a special industrial department of the T.U.C. to collect and distribute information on wages and related subjects (sponsored by the National Union of Tailors and Garment Workers); (2) affirming the right of trade unionists to transfer from one union to another (moved by the National Amalgamated Union of Life Assurance Workers).

Congress went into private session to discuss a composite resolution moved by Mr. Jim Campbell, of the National Union of Railwaymen. It (1) asked the General Council to conduct a survey of the subject of trade union reorganization and make recommendations to next year's Congress; (2) stressed that in any reconstruction the interests of trade union officers and staffs must be protected. The resolution was supported by the National Union of Public Employees, the National Union of Mineworkers, and the Tobacco and Building Workers' Unions but was opposed by the Association of Locomotive Engineers and Firemen, the Transport Salaried Staffs' Association, and the Union of Shop, Distributive and Allied Workers. On the advice of the General Council it was rejected by a large majority.

Security Risks and Telephone-tapping. Security risks were considered on a resolution from the Society of Technical Civil Servants which (1) recognized the need for effective precautions, but suggested that existing procedures could weigh heavily against the individual; (2) urged the General Council to take steps to ensure that security suspects should be given details of the charges against them, and should be accompanied by a trade union representative or legal adviser at interviews and appeals. At the request of the General Council the resolution was remitted for further consideration.

The European Free Trade Area. The section of the General Council's report dealing with this subject was presented by Mr. W. L. Heywood, chairman of the T.U.C. Economic Committee. Describing the proposals as "possibly the most important we have ever been called on to consider in peacetime," he said that after carefully estimating their probable effects on full employment and on workers' living standards, the General Council had decided that it was right for Britain to be associated with the scheme. The T.U.C. could not be indifferent, however, to the passing to other countries of a considerable competitive advantage in export markets, and the General Council had asked the Government to see that full employment was maintained and that the impact of the change was softened by compensation for displaced workers and financial help for those re-training or having to move to new areas. As to the possible effects of Britain's joining a free trade area which included countries with lower wage standards, Mr. Heywood stressed that low wages were not the same as low labour costs, and that many countries with low wage levels believed that they had more to fear from higher British efficiency than Britain had to fear from those countries with lower wages.

In the subsequent debate the General Council's decision was welcomed by Mr. R. Edwards (Chemical Workers' Union), who said that failure to develop a free trade area would expose Europe to economic subjugation by Russia or the U.S.A. Trade union support of the proposals was strongly condemned, however, by Mr. G. Winchester (National Union of Vehicle Workers) and by Mr. L. Ambrose (Amalgamated Engineering Union). Mr. Winchester maintained that the competitive advantages possessed by many European countries in specific trades - e.g. the automobile industry—would lead to mass unemployment in Britain, and contended that these industries should be nationalized and given Government support before Britain associated herself with any free trade arrangements.

Nuclear Weapon Tests. The Congress unanimously adopted a composite resolution which (1) expressed "grave concern" at "the growing health hazards and danger to world peace" arising from the continued manufacture and testing of atomic and hydrogen bombs, and called for an immediate halt to their manufacture and testing; (2) urged the General Council to press the Government to propose to other Governments concerned the immediate unconditional suspension of nuclear tests as a first step towards the banning of nuclear weapons; (3) called on the International Confederation of Free Trade Unions to recommend its member movements to take similar action; (4) urged the T.U.C. General Council to press the Government for an immediate inquiry into health hazards arising from the use of nuclear materials.

International Trade Union Solidarity. Sir Charles Geddes, for the General Council, initiated a discussion on a proposal to raise £500,000 for an International Solidarity Fund set up by the International Confederation of Free Trade Unions to develop trade unionism in under-developed countries. He explained that the General Council proposed that this sum—representing 25 per cent of the total which the I.C.F.T.U. proposed to raise - should not come from trade union funds but from individual trade unionists, who would be asked to subscribe about sixpence a year for three years to the fund. The proposal was approved.

During the debate Mr. McGee (Amalgamated Society of Woodworkers) attacked the section of the General Council's report praising "the heroic fight of the Hungarian people" in the 1956 revolution. After explaining that he was not speaking for his union, he declared that the report merely "re-stated the views of spokesmen of political reaction" and ignored "widely-known facts." Mr. McGee's attitude was strongly denounced by a number of delegates, and aroused violent and sustained protests.

The elections to the General Council resulted in four changes, all caused by the retirement of senior members. Mr. W. L. Heywood (Dyers, Bleachers, and Textile Workers), Sir Charles Geddes (Union of Post Office Workers), and Mr. R. Openshaw (Amalgamated Engineering Union) were succeeded respectively by Mr. L. Sharp, Mr. R. Smith, and Mr. W. M. Tallon, of the same unions, while Mr. R. Jones (North Wales Quarrymen's Union) was succeeded by Mr. B. Walsh (Colliery Overmen, Deputies, and Shotfirers). Mr. T. Yates, general secretary of the National Union of Seamen, was elected chairman of the General Council for 1957-58 in succession to Sir Thomas Williamson.—(Times - Manchester Guardian - Daily Herald) **(Prev. rep. 15280.)**

Note. The number of trade unions represented at the Congress was 185, with a total membership of 8,304,709. The number of unions and members in each of the 18 trade groups represented was as follows: Mining and Quarrying, 5 (717,027 members); Railways, 3 (530,224); Transport (except railways), 11 (1,387,882); Shipbuilding, 5 (127,381); Engineering, Founding, and Vehicle Building, 26 (1,458,020); Iron and Steel and Minor Metal Trades, 16 (210,791); Building, Woodworking, and Furnishing, 19 (588,686); Printing and Paper, 13 (324,900); Cotton, 6 (147,076); Textiles (except cotton), 22 (102,939); Clothing, 7 (179,095); Leather and Footwear, 5 (106,940); Glass, Pottery, Food, Chemicals, etc., 15 (469,688); Agriculture, 1 (135,000); Public Employees, 4 (277,979); Civil Service, 8 (474,692); Non-manual Workers, 15 (260,548); General Workers, 4 (805,841).—(Ministry of Labour Gazette).

A. UNITED STATES. — Espionage Trials.

Several trials took place in the U.S.A. in recent months of persons accused of espionage for the Soviet Union, the various trials being summarized below.

The Soble-Albam Trial.

Jack Soble (53), a Lithuanian-born brush importer who came to the U.S.A. in 1942 and was naturalized in 1947, his wife Myra (52), also naturalized in 1947, and Jacob Albam (65), a Lithuanian whose citizenship application was still pending, appeared before a Federal Grand Jury in New York on Feb. 4 on charges of espionage for the Soviet Union. All three had been arrested in January last [see 15375 D]. After hearing evidence, the Grand Jury returned a six-point indictment.

Specifically, the charges were: (1) that the three defendants had conspired with "numerous high-ranking Soviet officials" to transmit to the Soviet Union "documents, writings, photographs, and other information relating to the national defence, particularly to intelligence activities of the U.S.A. and the U.S. armed forces"; (2) that they had conspired to obtain such information for transmission to the U.S.S.R.; and (3) that they had acted as Soviet agents without notifying the State Department. Soble was also accused of being a Soviet agent, and Soble and Albam were charged with failing to register as Soviet agents with the Attorney-General.

When their trial opened in the New York Federal District Court on April 10, both Jack and Myra Soble pleaded guilty to the second charge of conspiring with Soviet nationals to obtain documents and other material relating to U.S. defence for transmission to the U.S.S.R. By doing so they escaped the risk of being sentenced to death on the first count under the espionage law of 1954. Albam likewise pleaded guilty to the second count on April 25.

Mrs. Soble and Albam were each sentenced on Aug. 9 to 5½ years' imprisonment, but on Oct. 8 Judge Richard H. Levet reduced their terms and re-sentenced Albam to five years and Mrs. Soble to four years. Jack Soble was sentenced on the same day (Oct. 8) to seven years' imprisonment. In reducing Mrs. Soble's and Albam's sentences, the judge said that he had taken into account the valuable assistance which they had given to the Government since their arrest. On a motion by the Government's representative the judge dismissed the remaining counts against the three defendants.

The Abel Trial.

Rudolf Ivanovich Abel (55) was indicted by a Federal Grand Jury in New York on Aug. 9 on charges of conspiring with others since 1948 (1) to collect and transmit to the Soviet Union information "relating to the national defence of the U.S.A., and particularly information as to arms, equipment, and disposition of the armed forces and the atomic energy programme"; (2) conspiring with others to obtain such information; and (3) failing to register as a foreign agent. Abel, a Soviet citizen, was born in Moscow, entered the U.S.A. illegally in 1948, and had run a photographic studio in Brooklyn under the name of Rusil R. Goldfus, but had also used other *aliases*. He had been arrested on June 21 on a charge of illegally entering the country and was sent to an alien detention camp for deportation to Mexico; subsequently, however, he was found to have been a colonel in the Soviet intelligence service and one of the leading Soviet agents in the United States.

The indictment said that when F.B.I. agents inspected Abel's one-room studio they found a short-wave radio set, a hollowed-out pencil containing film, and numerous cryptic messages, some of them in code, as well as radio and photographic equipment, including microfilm. Messages containing defence secrets sent by Abel and his fellow-conspirators had been transmitted to the Soviet Union by minute containers provided by hollowed-out bolts, nails, coins, batteries, pencils, cuff-links, ear-rings, etc. Information had also been sent, both directly and indirectly, through agents and on documents, writings, photographs, plans, maps, and photographic negatives. It was alleged that he had used prearranged places in New York parks to communicate with members of his ring, which had received its instructions by radio direct from the Soviet Union. He and his co-conspirators had received large sums of money from the Soviet Union to carry out espionage activities.

Abel's trial opened on Oct. 3 in the Federal District Court in Brooklyn, and on Oct. 25 the jury found him guilty on all three counts of the indictment.

The principal witness against Abel was Reino Hayhanen, a former Soviet agent in the U.S.A., who had come over to the West in Paris in May 1957. Hayhanen, formerly a lieutenant-colonel in the Soviet secret police, testified that he had been sent to the U.S.A. in 1952 with instructions to report to the "chief resident officer" for Soviet espionage in the U.S.A.; this man, then known to him (Hayhanen) only as "Mark," had been Abel. Hayhanen also testified that Soviet spies had exchanged messages by leaving them under a certain bolt in the seat of a bench in New York's Riverside Drive Park, where they had been picked up by Soviet officials; and that Abel had shown him a number of "drops" where he (Hayhanen) could send and receive messages. Furthermore, Hayhanen said that in 1955 Abel had ordered him to locate a Master Sergeant Roy A. Rhodes, of the U.S. Army, who had been attached to the U.S. Embassy in Moscow in 1952-53. To support Hayhanen's testimony, a microfilm message concerning Rhodes was produced in court which had been removed by F.B.I. agents from a hollowed-out bolt found in Hayhanen's home; it said that the sergeant had been recruited into the Soviet intelligence service in January 1952, that he had given information and signed receipts, but that he had not been heard of since his return to the U.S.A. in June 1953. When called as a witness, Sgt. Rhodes confirmed that he had been an agent for the Russians while in Moscow in 1952-53 and that he had been paid $2,500-$3,000 in roubles for his services. He said, however, that he had not worked for the Russians since his return, and denied that he knew Abel or had ever had any dealings with him.

Further evidence was presented by F.B.I. agents, including coded reports of meetings of Soviet agents in a number of U.S. cities, as well as in London and Mexico. Abel himself did not go into the witness-box and no witnesses were produced on his behalf, but his counsel impugned the credibility and character of both Hayhanen and Rhodes.

Abel was sentenced on Nov. 15 to 30 years' imprisonment and a fine of $3,000.

The French Trial.

Captain George French, a regular officer in the U.S. Air Force, was convicted on Sept. 21 by a court-martial at Shreveport (Louisiana) of having attempted to sell secrets about atomic weapons in jet bombers to the Soviet Union.

French (36), who had an outstanding record in the Second World War and the Korean War, and had been many times decorated, had been serving with the U.S. Strategic Air Command based at Puerto Rico, being a bomb-aimer in an atomic bomber force. An Air Force spokesman said that on the night of April 5, 1957, when French had been on leave in Washington, he had tried to deliver to the Soviet Embassy a letter in which he offered to sell for $27,500 secret documents and diagrams on the handling of atomic weapons in jet-bomber aircraft, on component parts of the bomb, and on fusing methods and power yields. French, who had apparently been acting alone, had failed to deliver the letter because it had been intercepted by a Government agent, and the Russians had thus known nothing about it. French had not used the mails but had dropped the letter in the Embassy grounds, hoping that a Russian would pick it up.

French was sentenced to life imprisonment, dishonourable discharge from the Air Force, and loss of all pay and allowances.

(Prev. rep. 15375 D.)

B. INTERNATIONAL BANK AND MONETARY FUND. — Membership of Ghana. - New Admissions.

Ghana became a member of the International Bank and the International Monetary Fund on Sept. 20, her quota in the I.M.F. being $15,000,000 and her subscription to the capital stock of the Bank 150 shares, with a par value of $15,000,000. Ghana's admission brought the total membership of both institutions to 64; the total of members' quotas in the Fund to $9,006,000,000; and the total subscribed capital of the Bank to $9,333,400,000.

At their annual meeting in Washington on Sept 25 the Governors of the Bank and the Fund approved applications for membership from four more countries—Libya, Malaya, Morocco, and Tunisia. These countries will officially join the two institutions on signing the Articles of Association.
(International Bank and I.M.F., Washington) **(15810 B.)**

C. TURKEY - UNITED KINGDOM. — Turkish Purchase of British Destroyers. - Details of Agreement.

The exchange of Notes between Britain and Turkey on the purchase by the latter country of four "M" class destroyers was published in London as a White Paper on Sept. 10. It showed (*a*) that the destroyers would be refitted in Britain at an estimated maximum cost of £500,000 each; (*b*) that the Turkish Government would pay a deposit of £100,000 and would receive a loan of £2,900,000 towards the purchase price and cost of refitting; and (*c*) that the loan would bear interest at 5 per cent p.a. until Jan. 1, 1968, after which it would be repaid in two equal half-yearly instalments from July 1, 1968.
(Times) **(Prev. rep. 15743 B.)**

D. SOVIET UNION. — Army. - Marshal Rokossovsky appointed to Transcaucasian Military Command.

A broadcast from Tiflis Radio on Oct. 23 announced that Marshal Konstantin Rokossovsky had been appointed Commander of the Transcaucasian Military District, an area bordering on the Turkish and Persian frontiers. Marshal Rokossovsky had been Deputy Minister of Defence in the Soviet Government since November 1956.
(Soviet Embassy Press Dept., London) **(Prev. rep. 15260 C.)**

A. UNITED KINGDOM. — Civil Aviation. - BEA and BOAC Reports for 1956-57. - New Aircraft Types. - Purchase of Britannias, Comets, and U.S. Boeings.

The reports and accounts of the British European Airways and British Overseas Airways Corporations for the financial year ended March 31, 1957, were published on Aug. 27 and Sept. 10 respectively. They showed that while the net profit earned by BEA was little more than one-third of the 1955-56 figure, BOAC almost trebled the profit shown in the 1955-56 accounts. Important decisions announced in the reports were : (1) that of BEA to introduce jet airliners on its longer routes by 1960 ; (2) that of BOAC to place orders for American *Boeing-707* jets for its North Atlantic services and for a new jet aircraft, the *Vickers VC-10*, for its Eastern hemisphere routes. The reports are summarized below :

British European Airways Corporation.

Gross revenue on operating account totalled £23,947,774 (compared with £21,599,494 in 1955-56), whilst operating expenditure amounted to £23,023,008 (£20,497,345), resulting in a gross profit on operations of £924,766 (£1,102,149). The deduction of £72,396 for losses on subsidiary and associated companies and BEA's share of helicopter experimental operations, £19,312 for salaries of the chairman and board members, and £2,596 for other charges, left an overall gross profit of £830,462. Interest on capital and other financial charges totalled £618,692, reducing the net profit to £216,770, compared with £603,614 in 1955-56.

Detailed financial and traffic statistics are shown below, with 1955-56 figures for comparison :

	1956-57		1955-56	
Traffic Revenue :				
Passenger	£19,815,203		£17,870,636	
Freight ..	1,568,514		1,290,669	
Mail ..	1,534,323		1,554,241	
Charters ..	162,638	£23,080,678	136,485	£20,852,031
Load-ton-miles flown :				
International services	67,239,528		59,030,392	
Domestic services	22,445,859	89,685,387	19,640,072	78,670,464
Passengers carried :				
International routes ..	1,342,777		1,215,259	
Domestic routes ..	1,118,288	2,461,065	1,029,488	2,244,747
Passenger-miles flown :				
International services	578,595,000		508,032,000	
Domestic services	230,277,000	808,872,000	200,737,000	708,769,000
Passenger load factor (per cent)		70.3		69.4
Cargo carried (tons)		22,524		18,586
Freight ton-miles flown		9,227,790		7,547,708
Mail carried (tons)		7,541		7,895
Mail ton-miles flown		3,622,641		3,745,538
Revenue load factor (per cent)		64.5		63.2
" Break even " load factor (per cent)		63.9		61.4
Costs per capacity-ton-mile		41.0d.		40.5d.
Total route mileage		26,169		23,367
Staff (March 31)		10,509		9,629

The following information was given in the report :

Future Fares Policy. BEA hoped to get other European operators to agree to the introduction of cheaper tourist fares, based on slightly increased aircraft seating and simplified cabin service. The Corporation believed that the best way of catering for the regional air traffic market was to introduce very low tourist fares at off-peak times.

Aircraft Fleet. Fixed-wing aircraft in service at March 31, 1957, numbered 107, comprising 10 *Viscount 800's*, 26 *Viscounts 700's*, 19 *Elizabethans*, 38 *Pionairs*, 3 *Hebrides*, 3 *Islanders*, and 8 *Pionair-Leopard* freighters.

Helicopter Experimental Unit. Hours flown totalled 995. The experimental London Airport-South Bank service ended on May 31, 1956, having carried 3,882 passengers in its 10 months of operation. The Birmingham-Leicester-Nottingham service began on July 2, 1956 but was withdrawn on Nov. 10, having disappointed expectations.

Future Plans. After studying the replacement plans of other airlines, the Corporation had decided to proceed cautiously in building up the *Viscount* fleet and had informed Vickers-Armstrong's that it would not be taking up its option on seven *Viscount 810's* for delivery in the autumn of 1958. It had also come to the conclusion that BEA could not afford to be without jet aircraft in the early 1960's. It was explained that the Corporation considered that on the comparatively short European stages turbo-props were better than jets from both the operational and costs standpoints, but that the decision of major world airlines to order jets for their international operations meant that BEA would inevitably face competition on some European routes from jet aircraft at least 125 m.p.h. faster than its own 425 m.p.h. *Vanguards*. The Corporation believed that cost differences between jets and turbo-props warranted a difference in fares between them. But whether or not other members of the International Air Transport Association agreed to this, it was clear that BEA would need some jet aircraft for its longer routes as early as possible in the 1960s.

After lengthy discussions with BOAC with a view to drawing up a specification for a jet airliner for use on the longer BEA and shorter BOAC routes, it had been reluctantly agreed that the two airlines' requirements were too far apart to permit of a compromise airliner satisfactory to both. The BEA specification envisaged an aircraft with a standard seating capacity for 70-80 passengers and high-density accommodation for 95-100, cruising at about 600 m.p.h. and able to carry its full payload for 1,000 miles. Several firms had put forward projects, and BEA expected shortly to decide on the most suitable [see below].
